It is for these reasons I view the legislation before us today, the Surface Transportation Assistance Act of 1982, with so much importance. This measure authorizes Federal assistance to the States for highway and mass transit programs and presents the Congress with an opportunity to not only reverse the trend of deterioration of our highway system, but to stimulate the creation and retention of jobs during a period of skyrocketing unemployment.

Resurfacing West Virginia, and the Nation's roads today before they completely wear out would save a great deal of money. The $11 billion highway authorization before us, coupled with the 5-cent per gallon Federal gasoline tax increase reported by the Committee on Ways and Means, is a prudent approach to ameliorating the multifaceted problems associated with roadway deterioration. This tax increase—the first in over 20 years—will enable the States to embark on projects to arrest this deterioration. In light of the 13 wasted cents per gallon of gasoline already being paid by West Virginia drivers due to faulty pavement, I view the tax increase as a sound investment not only in terms of repairing the transportation infrastructure but toward energy conservation.

The authorization will make a total of $160 million available in fiscal year 1983 to West Virginia in roadway apportionments. About $15 million will be earmarked in fiscal year 1983 for interstate restoration, resurfacting, rehabilitation and reconstruction; more than a twofold increase over fiscal year 1982 levels. This legislation contains $83 million for interstate constuction for the State in fiscal year 1983, up for $70 million in fiscal year 1982. Also provided for by the authorization are $23 million in primary road funds and $7.7 million in secondary road funds in addition to $22.8 million for West Virginia bridges in fiscal year 1983 alone. The State will be able to continue road hazard elimination through its $1.6 million allotment for this program and may reduce faulty rail/highway crossing with the $2 million received for this program.

The people of West Virginia have experienced dwindling transportation opportunities over the past few years. Airline deregulation has reduced service to the State by the major carriers. Only one Amtrak line now runs in the southern portion of the State. And, under the recently enacted bus deregulation bill, there is fear that interstate service of this nature may be reduced. While the highway section of the bill alleviates some of my concerns over inadequate roads, the mass transit portion insures that public transportation opportunities will still be available to West Virginians.

In my State, five transit authorities received section 5 operating funds which this bill provides for in the form of block grants. These authorities in Huntington, Clarksburg, Parkersburg, Charleston, and Wheeling will share with other transit authorities throughout the Nation the $3.8 billion authorized for transit programs by this legislation for fiscal year 1983. Nine other entities in Summersville,

Petersburg, Morgantown, Fairmont, Martinsburg, Kingwood, Clarksburg, and Bluefield, W. Va., will receive section 18 funds for bus service under the Surface Transportation Assistance Act of 1982. Combined, these operations serve almost 9 million passengers in 25 West Virginia counties.

I would now like to turn to what I view as a particularly exciting new element in the Federal-aid-to-highway legislation. In the Appalachian region one of the most pressing road problems affecting communities is that of energy-impacted roads. Road damage incurred through the movement of domestic energy resources such as coal is alarming and is increasing dramatically. Today, a national coal market is benefiting at the expense of the Appalachian taxpayer. There is a national responsibility for the maintenance of energy-impacted roads and this legislation contains a provision which I authored aimed at placing greater emphasis on their improvement by increasing the Federal share to 85 percent for 4-R work done on such roads. A State has complete discretion on whether to use any of its primary/secondary apportionment for this purpose. All this provision does is say to the States if you want to direct funds to energy-impacted roads, the Federal share will increase to 85 percent from the normal 75 percent for those projects. It is my hope this program will enable the States to repair many of these roads; a prospect which will greatly contribute to our national energy transportation system.

This highway authorization has been touted as a jobs bill and it will without a doubt create some employment. From my particular standpoint this legislation will provide some stimulus for the metallurgical coal industry prevalent in southern West Virginia. Recent statistics show that McDowell County—in my congressional district—is experiencing an unemployment rate of 34.6 percent. One in three county residents in McDowell are jobless and the major reason is because of the condition of the metallurgical coal industry. Obviously, as roads and bridges are constructed and repaired a great deal of steel will be used. As steel demand goes up, so does demand for metallurgical coal which will help to put some of the 11,000 unemployed West Virginia miners back to work.

I would like to close with some minor points. This legislation contains a section authorizing a study of weather-related factors in apportionment formulas, something that is very important to a State like West Virginia. The bill before us today changes the interstate 4-R apportionment from a land mile and vehicle mile traveled basis to one which considers gasoline and diesel fuel consumption in addition to vehicle miles. The purchase of gasoline and diesel fuel in a particular State has a very weak correlation to roadway conditions and is unfair to a rural State like West Virginia which does not have heavy traffic corridors insofar as fuel purchases are concerned. For this reason I look forward to the Secretary of Transportation's study authorized by this legislation.

Mr. Chairman, I commend the distinguished chairman of the Committee on Public Works and Transportation, JIM HOWARD, and the chairman of the Subcommittee on Surface Transportation, GLENN ANDERSON, for their diligence in bringing this most important legislation to the floor. I rise in strong support of this authorization and urge my colleagues to join in our effort to make America's roads sound again.●

● Mr. GILMAN. Mr. Chairman, the bill before us, H.R. 6211, poses real problems for me, inasmuch as the intentions are honorable, but the means are not. I understand that the desire to reduce unemployment, and the creation of over 300,000 jobs, as this legislation purports to do, is certainly a welcome step in rejuvenating our economic problems. I was however distressed to learn that not only was a tax of 5 cents per gallon to be levied on the public, but that additional and inequitous taxes were proposed regarding heavy trucks and trailers.

I voted against the fiscal portions of this measure for several reasons, Mr. Speaker, and I would like to explain my rationale for that vote. My concerns are many: The 5 cents a gallon tax is another burden on our senior citizens, who, especially in my area, must continue to rely on their automobiles due to the lack of a developed mass transit system. These men and women are being asked to shoulder another tax—money that would have gone for food, medicines, and other necessities of life. It is not right that we should continue to demand of the most deserving group in our society.

This tax is not in the best interests of all consumers, either, regardless of socioeconomic status. The automobile is used extensively, and for many purposes, by every eligible segment of our population. At a time when our goals have been to cut taxes in order to spur investments, this measure decreases the amount of disposable income available. The average family is struggling to meet their financial obligations, and, in this day and age, it is more than likely that one or more children, presently in college, possesses a car. For students to be asked to take additional money from part-time jobs for this tax, when it is probable that a portion of the tuition is being financed by that student, is another inequity that is created by this amendment.

I am also disappointed that the Ways and Means Committee opted to impose a substantial increase in taxes on trucks and trailers. The tax on tires, currently set at 9.75 cents per pound, is increased almost threefold to 25 cents per pound for tires over 100 pounds. Furthermore, the present 5 cent tax on tread rubber is increased fivefold to 25 cents per pound for tires over 100 pounds. The 12 percent tax on retail sales of trucks over 33,000 pounds, and trailers over 26,000 pounds, places a burden on those who might have been willing to invest in new vehicles; now, I fear, it will deter them.

What strikes me as clear about these taxes is that those utilizing trucks and trailers in their livelihood will now be forced to pass this additional cost on to the consumer. I was astounded to read that the taxes I have just mentioned are not the only taxes being levied at this time—the list goes on and on. The excise taxes on trucks have been raised enormously; the current tax is $3 per 1,000 pounds for trucks over 26,000 pounds. The amendment proposed not to tax vehicles under 33,000 pounds, but rather required a $60 plus $20 tax per 1,000 pounds for trucks between 33,000 and 55,000 pounds, a $500 plus $60 tax per 1,000 pounds for trucks between the weight of 55,000 and 80,000 pounds, and a flat $2,000 fee for trucks over 80,000. This is not a one-time tax, but an annual tax rate on each and every truck owned. This is sure to drain everyone who relies on trucks to bring goods to consumers, as the farmers in my district know. They will be forced to pay this money, and as the truck rolls along the highway to market, so will the prices increase in the foodstuffs being delivered to consumers.

As I stated earlier, I understand the salutary intent of this legislation. That is why I supported the final passage of the bill, despite my objections to the fiscal provision of the measure. The bulk of H.R. 6211 deals with necessary highway authorizations. But the 5 cents a gallon tax on the automobile user, as well as the additional taxes on truck and trailer owners, makes the amendment a real burden for us all. What the American people need are cogent and thoughtful solutions to the problems of our day, and this additional burden is no such animal.●

□ 1630

Mr. SHUSTER. Mr. Chairman, the gentleman from Maryland (Mr. MITCHELL) had asked for time. I do not see the gentleman on the floor at this time. If the gentleman were available I would be pleased to yield to him but I see he is not on the floor at this time and therefore I yield back the balance of my time.

Mr. ANDERSON. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. Pursuant to the rule, the text of H.R. 7360 is consid-

ered by titles as an original bill for the purpose of amendment under the 5-minute rule, and each title is considered as having been read. It shall be in order to consider an amendment to said substitute recommended by the Committee on Ways and Means, if offered by the chairman of the Committee on Ways and Means, or his designee, inserting a new title. Said amendment shall not be subject to amendment except amendments recommended by the Committee on Ways and Means, which shall not be subject to amendment. After the adoption of the amendment recommended by the Committee on Ways and Means, no further amendments to the bill are in order.

The Clerk will designate section 1.

Section 1 reads as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Surface Transportation Assistance Act of 1982".

The CHAIRMAN. Are there any amendments to section 1?

If not, the Clerk will designate title I.

Title I reads as follows:

TITLE I

SHORT TITLE

SEC. 101. This title may be cited as the "Highway Improvement Act of 1982".

REVISION OF AUTHORIZATION FOR APPROPRIATIONS FOR THE INTERSTATE SYSTEM

SEC. 102. Subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, is amended by striking out "the additional sum of $3,225,000,000 for the fiscal year ending September 30, 1984," and all that follows down through the period at the end of the sentence and by inserting in lieu thereof the following: "the additional sum of $4,000,000,000 for the fiscal year ending September 30, 1984, the additional sum of $4,000,000,000 for the fiscal year ending September 30, 1985, the additional sum of $4,000,000,000 for the fiscal year ending September 30, 1986, the additional sum of $4,000,000,000 for the fiscal year ending September 30, 1987, the additional sum of $4,000,000,000 for the fiscal year ending September 30, 1988, the additional sum of $4,000,000,000 for the fiscal year ending September 30, 1989, and the additional sum of $4,000,000,000 for the fiscal year ending September 30, 1990.".

APPROVAL OF INTERSTATE COST ESTIMATE

SEC. 103. (a) The Secretary of Transportation shall apportion for the fiscal year ending September 30, 1984, the sums authorized to be apportioned for such year by section 108(b) of the Federal-Aid Highway Act of 1956, as amended, for expenditures on the National System of Interstate and Defense Highways, using the apportionment factors contained in revised table 5 of the Committee Print Numbered 97-53 of the Committee on Public Works and Transportation of the House of Representatives.

(b)(1) For fiscal year 1984, no State, including the State of Alaska, shall be apportioned under this section less than one-half of 1 per centum of the amount authorized for such fiscal year by section 108(b) of the Federal-Aid Highway Act of 1956, as in effect immediately before the date of enactment of this Act. Whenever amounts made available under this subsection for the Interstate System in any State exceed the estimated cost of completing that State's portion of the Interstate System, and exceed the estimated cost of necessary resurfacing, restoration, rehabilitation, and reconstruction of the Interstate System within such State, the excess amount shall be available for expenditure for those purposes for which funds apportioned under paragraphs (1), (2), and (6) of such section 104(b) of title 23, United States Code, may be expended and shall also be available for expenditure to carry out section 152 of title 23, United States Code.

(2) Sections 3 and 4(b) of the Federal-Aid Highway Act of 1982 are repealed.

OBLIGATION CEILING

SEC. 104. (a) Notwithstanding any other provision of law, the total of all obligations for Federal-aid highways and highway safety construction programs shall not exceed—

(1) $12,200,000,000 for fiscal year 1983;

(2) $12,700,000,000 for fiscal year 1984;

(3) $13,500,000,000 for fiscal year 1985; and

(4) $14,400,000,000 for fiscal year 1986.

These limitations shall not apply to obligations for emergency relief under section 125 of title 23, United States Code, or projects covered under section 147 of the Surface Transportation Assistance Act of 1978, or section 9 of the Federal-Aid Highway Act of 1981. No obligation constraints shall be placed upon any ongoing emergency project carried out under section 125 of title 23, United States Code, or section 147 of the Surface Transportation Assistance Act of 1978.

(b) For each of the fiscal years 1983, 1984, 1985, and 1986, the Secretary of Transportation shall distribute the limitation imposed by subsection (a) by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned or allocated to each State for such fiscal year bears to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned or allocated to all the States for such fiscal year.

(c) During the period October 1 through December 31 of each of the fiscal years 1983, 1984, 1985, and 1986, no State shall obligate more than 35 per centum of the amount distributed to such State under subsection (b) for such fiscal year, and the total of all State obligations during such period shall not exceed 25 per centum of the total amount distributed to all States under such subsection for such fiscal year.

(d) Notwithstanding subsections (b) and (c), the Secretary shall—

(1) provide all States with authority sufficient to prevent lapses of sums authorized to be appropriated for Federal-aid highways and highway safety construction which have been apportioned or allocated to a State, except in those instances in which a State indicates its intention to lapse sums apportioned under section 104(b)(5)(A) of title 23, United States Code;

(2) after August 1 of each of the fiscal years 1983, 1984, 1985, and 1986, revise a distribution of the funds made available under subsection (b) for such fiscal year if a State will not obligate the amount distributed during such fiscal year and redistribute sufficient amounts to those States able to obligate amounts in addition to those previously distributed during such fiscal year giving priority to those States having large unobligated balances of funds apportioned under section 104 of title 23, United States Code; and

(3) not distribute amounts authorized for administrative expenses and forest highways.

(e)(1) Section 1106(b) of the Omnibus Budget Reconciliation Act of 1981 is repealed.

(2) Section 1106(c) of the Omnibus Budget Reconciliation Act of 1981 is amended to read as follows:

"(c) For the fiscal year 1982, the Secretary of Transportation shall distribute the limitation imposed by subsection (a) by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to each State for such fiscal year bears to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to all the States for such fiscal year.".

(3) Section 1106(d) of the Omnibus Budget Reconciliation Act of 1981 is amended by striking out "periods" and inserting in lieu thereof "period" and by striking out "and October 1 through December 31, 1982,".

(4) Section 1106(e)(2) of the Omnibus Budget Reconciliation Act of 1981 is amended by striking out "and after August 1, 1983,".

AUTHORIZATIONS

SEC. 105. (a) For the purpose of carrying out the provisions of title 23, United States Code, the following sums are hereby authorized to be appropriated:

(1) For the Federal-aid primary system in rural areas, including the extensions of the Federal-aid primary system in urban areas, and the priority primary routes, out of the Highway Trust Fund, $2,000,000,000 (reduced by the amount authorized by the first sentence of section 4(a)(1) of the Federal-Aid Highway Act of 1982) for the fiscal year ending September 30, 1983, $2,100,000,000 for the fiscal year ending September 30, 1984, $2,200,000,000 for the fiscal year ending September 30, 1985, and $2,500,000,000 for the fiscal year ending September 30, 1986. For the Federal-aid secondary system in rural areas, out of the Highway Trust Fund, $600,000,000 (reduced by the amount authorized by the second sentence of section 4(a)(1) of the Federal-Aid Highway Act of 1982) for the fiscal year ending September 30, 1983, $600,000,000 for the fiscal year ending September 30, 1984, $600,000,000 for the fiscal year ending September 30, 1985, and $600,000,000 for the fiscal year ending September 30, 1986.

(2) For the Federal-aid urban system, out of the Highway Trust Fund, $800,000,000 (reduced by the amount authorized by section 4(a)(2) of the Federal-Aid Highway Act of 1982) for the fiscal year ending September 30, 1983, and $800,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, September 30, 1985, and September 30, 1986.

(3) For Indian reservation roads and bridges, $83,000,000 per fiscal year for each of the fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986.

(4) For the Virgin Islands, all such sums as may be required for the continued presence and operation of the office of the territorial representative of the Federal High-

way Administration in St. Thomas, Virgin Islands.

(5) For the Commonwealth of the Northern Mariana Islands, not to exceed $1,000,000 per fiscal year for each of the fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986. Sums authorized by this paragraph shall be expended in the same manner as sums authorized to carry out section 215 of title 23, United States Code. Sums authorized by this paragraph shall be available for obligation at the beginning of the period for which authorized in the same manner and to the same extent as if such sums were apportioned under chapter 1 of title 23, United States Code.

(6) For the forest highways, out of the Highway Trust Fund, $33,000,000 (reduced by the amount authorized by section 4(a)(3) of the Federal-Aid Highway Act of 1982) for the fiscal year ending September 30, 1983, and $33,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, September 30, 1985, and September 30, 1986.

(7) For public lands highways, out of the Highway Trust Fund, $16,000,000 (reduced by the amount authorized by section 4(a)(4) of the Federal-Aid Highway Act of 1982) for the fiscal year ending September 30, 1983, and $16,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, September 30, 1985, and September 30, 1986.

(b) Section 151 of the Federal-Aid Highway Act of 1978 is repealed.

(c) In the case of fiscal years 1983 and 1984, each State shall, with respect to any Federal funds available to such State for expenditure on the Federal-aid primary system in excess of the amount apportioned to such State under section 104(b)(1) of title 23, United States Code, for such expenditure in fiscal year 1982, give priority consideration to those priority primary routes under section 147 of this title designated in Committee Print Numbered 97-61 of the Committee on Public Works and Transportation of the House of Representatives.

(d) In the case of fiscal years 1983 and 1984, each State shall, with respect to any Federal funds available to such State for expenditure on the Federal-aid primary system, the Federal-aid secondary system, or the Federal-aid urban system in excess of the amount apportioned to such State under section 104(b) (1), (2), or (6), respectively, of title 23, United States Code, for such expenditure in fiscal year 1982, give priority consideration to any project authorized by section 163 of the Federal-Aid Highway Act of 1973 in such State on the Federal-aid primary system, the Federal-aid secondary system, or the Federal-aid urban system, respectively.

(e) Section 4(a) of the Federal-Aid Highway Act of 1982 is amended by striking out "a joint resolution making continuing appropriations for such fiscal year," and inserting in lieu thereof "Public Law 97-276,".

INTERSTATE RESURFACING

SEC. 106. Section 105 of the Surface Transportation Assistance Act of 1978 is amended by striking out "and not to exceed $800,000,000 for the fiscal year ending September 30, 1984." and inserting in lieu thereof "not to exceed $2,100,000,000 for the fiscal year ending September 30, 1984, not to exceed $2,400,000,000 for the fiscal year ending September 30, 1985, not to exceed $2,800,000,000 for the fiscal year ending September 30, 1986, and not to exceed $3,100,000,000 for the fiscal year ending September 30, 1987.".

INTERSTATE TRANSFERS

SEC. 107. (a)(1) Section 103(e)(4) of title 23, United States Code, is amended by striking out the eighth sentence and inserting in lieu thereof the following: "For the fiscal year ending September 30, 1983, $257,000,000 shall be available out of the Highway Trust Fund for expenditure at the discretion of the Secretary for projects under highway assistance programs. For the fiscal years ending September 30, 1984, September 30, 1985, and September 30, 1986, sums obligated for projects under highway assistance programs shall be paid out of the Highway Trust Fund, and $775,000,000 shall be available for expenditure during each such fiscal year. Twenty-five per centum of the funds available from the Highway Trust Fund for each of the fiscal years ending September 30, 1984, September 30, 1985, and September 30, 1986, for substitute highway projects under this paragraph shall be distributed at the discretion of the Secretary. The remaining 75 per centum of such funds shall be apportioned in accordance with cost estimates approved by Congress. The Secretary shall make an estimate of the cost of completing substitute highway projects under this paragraph and transmit the same to the Senate and the House of Representatives as soon as practicable after the date of enactment of this sentence. Upon approval of such cost estimate by Congress, the Secretary shall use the Federal share of such approved estimate in making apportionments for substitute highway projects for the fiscal year ending September 30, 1984. The Secretary shall make a revised estimate of the cost of completing substitute highway projects under this paragraph and transmit the same to the Senate and the House of Representatives within ten days subsequent to January 2, 1984, and upon approval by Congress, the Secretary shall use the Federal share of such approved estimate in making apportionments for substitute highway projects for the fiscal years ending September 30, 1985, and September 30, 1986. There are authorized to be appropriated for liquidation of obligations incurred under this paragraph for public mass transit projects such sums as may be necessary from the general fund of the Treasury. Twenty-five per centum of the funds appropriated for each fiscal year beginning after September 30, 1983, for carrying out substitute transit projects under this paragraph shall be distributed at the discretion of the Secretary. The remaining 75 per centum of such funds shall be apportioned in accordance with cost estimates approved by Congress. The Secretary shall make an estimate of the cost of completing substitute transit projects under this paragraph and transmit the same to the Senate and the House of Representatives as soon as practicable after the date of enactment of this sentence. Upon approval of such cost estimate by Congress, the Secretary shall use the Federal share of such approved estimate in making apportionments for substitute transit projects for the fiscal year ending September 30, 1984. The Secretary shall make a revised estimate of the cost of completing substitute transit projects under this paragraph and transmit the same to the Senate and the House of Representatives within ten days subsequent to January 2, 1984, and upon approval by Congress, the Secretary shall use the Federal share of such approved estimate in making apportionments for substitute transit projects for the fiscal years ending September 30, 1985, and September 30, 1986.".

(2) Section 103(e)(4) of title 23, United States Code, is amended by striking out the sixth sentence and inserting in lieu thereof the following: "The sums apportioned under this paragraph for public mass transit projects shall remain available for the fiscal year for which apportioned. The sums available for obligation under this paragraph for projects under any highway assistance program shall remain available for the fiscal year for which apportioned. Any sums which are apportioned to a State for a fiscal year and are unobligated (other than an amount which, by itself, is insufficient to pay the Federal share of the cost of a substitute project which has been submitted by the State to the Secretary for approval) at the end of such fiscal year shall be apportioned among those States which have obligated all sums (other than such an amount) apportioned to them for such fiscal year, in accordance with the latest approved estimate of the cost of completing the appropriate substitute projects in such States.".

(b) Section 103(e)(4) of title 23, United States Code, is amended by adding at the end thereof the following: "Any route or segment thereof which was statutorily designated after March 7, 1978, to be on the Interstate System shall not be eligible for withdrawal or substitution under this subsection.".

(c) Section 103(e)(4) of title 23, United States Code, is further amended by—

(1) inserting in the second sentence after the words "approved by Congress," the following: "or up to and including the 1983 interstate cost estimate, whichever is earlier,";

(2) striking out in the second sentence "the date of enactment of the Federal-Aid Highway Act of 1976 or" and "whichever is later, and in accordance with the design of the route or portion thereof that is the basis of the latest cost estimate";

(3) inserting in the second sentence after "approval of each substitute project under this paragraph," the following: "or the date of approval of the 1983 interstate cost estimate, whichever is earlier,".

(d) The third sentence of section 103(e)(4) of title 23, United States Code, is amended by striking out the period and inserting in lieu thereof the following: ", and except that with respect to any route which on May 12, 1982, is under judicial injunction prohibiting its construction the Secretary may approve substitute projects and withdrawals on such route for a reasonable period of time after September 30, 1983.".

(e) Section 115 of title 23, United States Code, is amended by adding at the end thereof the following new subsection:

"(d) When a State proceeds to construct without the aid of Federal funds any substitute highway project approved under section 103(e)(4) of this title, in accordance with all procedures and requirements applicable to such projects, except insofar as such procedures and requirements limit a State to the construction of projects with the aid of Federal funds previously apportioned to it, the Secretary, upon application by such State and his approval of such application, is authorized to pay to such State the Federal share of the cost of construction of such project when additional funds are apportioned to such State under section 103(e)(4) of this title if—

"(1) prior to the construction of the project the Secretary approves the plans and specifications therefor in the same manner as other projects approved under section 103(e)(4) of this title, and

"(2) the project conforms to the applicable standards under section 109 of this title. The Secretary may not approve an application under this section unless an authorization is in effect for the fiscal year for which the application is sought beyond the currently authorized funds for such State. No application may be approved which will exceed the State's expected apportionment of such authorizations.".

(f) The first sentence of section 122 of title 23, United States Code, is amended to read as follows: "Any State that shall use the proceeds of bonds issued by the State, county, city, or other political subdivision of the State for the construction of one or more projects on the Federal-aid primary or Interstate System, or extensions of any of the Federal-aid highway systems in urban areas, or for substitute highway projects approved under section 103(e)(4) of this title, may claim payment of any portion of the sums apportioned to it for expenditure on such system or on highway projects approved under section 103(e)(4) of this title to aid in the retirement of the principal of such bonds the proceeds of which were used for projects on the Federal-aid primary system or extensions of any of the Federal-aid highway systems in urban areas and the retirement of the principal and interest of such bonds the proceeds of which were used for projects on the Interstate System or for substitute highway projects approved under section 103(e)(4) of this title at their maturities, to the extent that the proceeds of such bonds have been actually expended in the construction of one or more of such projects.".

(g) Section 107(e) of the Federal-Aid Highway Act of 1978 is amended by adding at the end thereof the following new sentence: "For purposes of this subsection, the term 'construction' has the meaning such term has under section 101(a) of title 23, United States Code.".

FEDERAL-AID PRIMARY FORMULA

SEC. 108. (a) Section 104(b)(1) of title 23, United States Code, is amended to read as follows:

"(1) For the Federal-aid primary system (including extensions in urban areas and priority primary routes): One-half in the ratio which the population of rural areas of each State bears to the total population of rural areas of all the States as shown by the latest available Federal census and one-half in the ratio which the population in urban areas in each State bears to the total population in urban areas in all the States as shown by the latest Federal census. For purposes of this paragraph and subsection (b) of section 103 of this title, the Virgin Islands, Guam, and American Samoa shall be considered together as one State. The State consisting of the Virgin Islands, Guam, and American Samoa shall not receive less than one-half of one per centum of each year's apportionment.".

(b) The amendment made by subsection (a) of this section shall take effect October 1, 1982, and apply with respect to each fiscal year beginning on or after such date. Notwithstanding section 104(b) of title 23, United States Code, as soon as practical after the date of enactment of this Act, the Secretary of Transportation shall apportion under paragraph (1) of such section, as amended by subsection (a) of this section, sums authorized to be appropriated for expenditure upon the Federal-aid primary system for the fiscal year ending September 30, 1983. For such fiscal year, no State shall be apportioned less under such paragraph (1), as so amended, than such State was apportioned for such fiscal year under such paragraph (1) before the date of enactment of this Act.

(c) Section 103(b)(1) of title 23, United States Code, is amended by striking out "or Puerto Rico" and inserting in lieu thereof "Puerto Rico, the Virgin Islands, Guam, and American Samoa".

INTERSTATE RESURFACING FORMULA

SEC. 109. Section 104(b)(5)(B) of title 23, United States Code, is amended by striking out "55 per centum" and inserting in lieu thereof "(i) For the fiscal year ending on September 30, 1983, 55 per centum" and by adding at the end thereof the following:

"(ii) For fiscal years beginning on or after October 1, 1983, one-third in the ratio that vehicle miles traveled on lanes on the Interstate routes designated under sections 103 and 139(c) of this title (other than those on toll roads not subject to a Secretarial agreement provided for in section 105 of the Federal-Aid Highway Act of 1978) in each State bears to the total of all such vehicle miles in all States; one-third in the ratio that gasoline used by motor vehicles on highways in such State bears to the total of gasoline used by motor vehicles on highways in all States; and one-third in the ratio that diesel fuel used by motor vehicles on highways in such State bears to the total of diesel fuel used by motor vehicles on highways in all States. For the fiscal year ending September 30, 1984, no State shall be apportioned less under this clause than such State was apportioned before the date of enactment of this clause under this subparagraph for such fiscal year.

The Secretary shall establish such rules and regulations as may be necessary to carry out this provision.".

ENERGY IMPACTED ROADS

SEC. 110. (a) Section 105 of title 23, United States Code, is amended by adding at the end thereof the following new subsection:

"(h) In preparing programs to submit in accordance with subsection (a) of this section, the State highway departments may give priority to projects for the reconstruction, resurfacing, restoration, or rehabilitation of highways which are incurring a substantial use as a result of transportation activities to meet national energy requirements and which will continue to incur such use, and in approving such programs the Secretary may give priority to such projects.".

(b) Section 120 of title 23, United States Code, is amended by adding at the end thereof the following new subsection:

"(k) Notwithstanding any other provision of this section, the Federal share payable on account of any project under this title to reconstruct, resurface, restore, and rehabilitate any highway which the Secretary determines, at the request of any State, is incurring a substantial use as a result of transportation activities to meet national energy requirements and will continue to incur such use is 85 per centum of the cost of such project.".

COST REDUCTION

SEC. 111. Section 106(d) of title 23, United States Code, is amended to read as follows:

"(d) Plans, specifications, and estimates for proposed projects on any Federal-aid system shall be accompanied by a value engineering or other cost reduction analysis on all projects with construction costs of $2,000,000 or above. The Secretary shall establish such rules and regulations as may be necessary to carry out this provision.".

RESURFACING STANDARDS

SEC. 112. (a) Section 109 of title 23, United States Code, is amended by adding at the end thereof the following new subsection:

"(o) It is the intent of Congress that any project for resurfacing, restoring, or rehabilitating any highway, other than a highway access to which is fully controlled, in which Federal funds participate shall be constructed in accordance with standards to preserve and extend the service life of highways and enhance highway safety.".

(b) The Secretary of Transportation shall enter into appropriate arrangements with the National Academy of Sciences (1) to conduct a study of the safety cost-effectiveness of geometric design criteria of standards currently in effect for construction and reconstruction of highways, other than highways access to which is fully controlled, to determine the most appropriate minimum standards to apply to resurfacing, restoration, and rehabilitation projects on such highways, and (2) to propose standards to preserve and extend the service life of such highways and enhance highway safety. The National Academy of Sciences shall conduct such study in cooperation with the National Transportation Safety Board, the Congressional Budget Office, and the American Association of State Highway and Transportation Officials. Upon completion of such study, the National Academy of Sciences shall submit such study and its proposed standards to the Secretary of Transportation for review. Within ninety days after submission of such standards to the Secretary of Transportation, the Secretary shall submit such study and the proposed standards of the National Academy of Sciences, together with the recommendations of the Secretary, to Congress for approval.

VENDING MACHINES

SEC. 113. Section 111 of title 23, United States Code, is amended by inserting "(a)" before "All agreements between the Secretary" and by adding at the end thereof the following new subsection:

"(b) Notwithstanding subsection (a) of this section, any State may permit the placement of vending machines in rest and recreation areas and in safety rest areas constructed or located on rights-of-way of the Interstate System in such State. Such vending machines may only dispense such food, drink, and other articles as the State highway department determines are appropriate and desirable. Such vending machines may only be operated by the State through the State licensing agency designated pursuant to section 2(a)(5) of the Act of June 20, 1936, commonly known as the Randolph-Sheppard Act (20 U.S.C. 107a(a)(5)). The costs of installation, operation, and maintenance of vending machines under this section shall not be eligible for Federal assistance under this title.".

LETTING OF CONTRACTS

SEC. 114. Section 112 of title 23, United States Code, is amended—

(1) in subsection (b) by striking out "unless the Secretary shall affirmatively find that, under the circumstances relating to such project, some other method is in the public interest" and inserting in lieu thereof "unless the State highway department demonstrates, to the satisfaction of the Secretary, that some other method is more cost effective"; and

(2) by striking out subsection (e).

CONSTRUCTION IN ADVANCE OF APPORTIONMENT

SEC. 115. (a) Section 115(b)(2) of title 23, United States Code, is amended by striking out "1978" each place it appears and inserting in lieu thereof "1983".

(b) Section 115(b) of title 23, United States Code, is amended by adding at the end thereof the following:

"(3) subject to the provisions of this paragraph, the cost of construction of a project, the Federal share of which the Secretary is authorized to pay under this subsection, shall include the amount of any interest earned and payable on bonds issued by the State to the extent that the proceeds of such bonds have actually been expended in the construction of such project. In no event shall the amount of interest considered as a cost of construction of a project under the preceding sentence be greater than the excess of (A) the amount which would be the estimated cost of construction of the project if the project were to be constructed at the time the project is converted to a regularly funded project, over (B) the actual cost of construction of such project (not including such interest). The Secretary shall consider changes in construction cost indices in determining the amount under clause (A) of this paragraph.".

ADVANCE CONSTRUCTION FOR BRIDGE PROJECTS

SEC. 116. Section 115 of title 23, United States Code, is amended by adding at the end thereof the following new subsection:

"(e) When a State has obligated all funds apportioned to it under section 144 of this title, and proceeds to construct any project without the aid of Federal funds for the replacement or rehabilitation of a bridge in accordance with all procedures and all requirements applicable to projects under such section, except insofar as such procedures and requirements limit a State to the construction of projects with the aid of Federal funds previously apportioned to it, the Secretary, upon application by such State and his approval of such application, is authorized to pay to such State the Federal share of the costs of construction of such project when additional funds are apportioned to such State under section 144 of this title if—

"(1) prior to the construction of the project the Secretary approves the plans and specifications therefor in the same manner as other projects under such section; and

"(2) the project conforms to the applicable standards adopted under section 109 of this title.

The Secretary may not approve an application under this section unless an authorization is in effect for the fiscal year for which the application is sought beyond the currently authorized funds for such State and no application may be approved which will exceed the State's expected apportionment of such authorizations.".

MAINTENANCE

SEC. 117. The second sentence of subsection (c) of section 116 of title 23, United States Code, is amended to read as follows: "If, within ninety days after receipt of such notice, such project has not been put in proper condition of maintenance, the Secretary shall withhold approval of further projects of all types in the State highway district, municipality, county, other political or administrative subdivision of the State, or the entire State in which such project is located, whichever the Secretary deems most appropriate, until such project shall have been put in proper condition of maintenance.".

INTERSTATE DISCRETIONARY FUNDS

SEC. 118. (a) Section 118(b) of title 23, United States Code, is amended to read as follows:

"(b)(1) Sums apportioned to each Federal-aid system (other than the Interstate System) shall continue available for expenditure in that State for the appropriate Federal-aid system or part thereof (other than the Interstate System) for a period of three years after the close of the fiscal year for which such sums are authorized and any amounts so apportioned remaining unexpended at the end of such period shall lapse.

"(2) Except as otherwise provided in this subsection, sums apportioned for the Interstate System in any State shall remain available for expenditure in that State for the Interstate System until the end of the fiscal year for which authorized. Sums not obligated within the time period prescribed by the preceding sentence shall be made available by the Secretary for projects on the Interstate System (other than projects for which sums are apportioned under section 104(b)(5)(B)) in accordance with the following priorities: First, for high cost projects which directly contribute to the completion of an Interstate segment which is not open to traffic; and second, for projects of high cost in relation to a State's apportionment. Sums may only be made available under this paragraph in any State if the Secretary determines that the State has obligated all of its apportionments other than an amount which, by itself, is insufficient to pay the Federal share of the cost of a project on the Interstate System which has been submitted by such State to the Secretary for approval, and the applicant is willing and able to (A) apply the funds to a ready-to-commence project; and (B) in the case of construction work, begin work within ninety days of obligation. Sums made available under this paragraph shall remain available until expended.

"(3) Any amount apportioned to the States for the Interstate System under subsection (b)(5)(B) of section 104 of this title shall continue to be available for expenditure in that State for a period of two years after the close of the fiscal year for which such sums are authorized. Sums not obligated within the time period prescribed by the preceding sentence shall be made available by the Secretary for projects for resurfacing, restoring, rehabilitating, and reconstructing the Interstate System to any other State applying for such funds, if the Secretary determines that the State has obligated all of its apportionments under such subsection other than an amount which, by itself, is insufficient to pay the Federal share of the cost of such a project which has been submitted by such State to the Secretary for approval, and the applicant is willing and able to (A) obligate the funds within one year of the date the funds are made available; (B) apply them to a ready-to-commence project; and (C) in the case of construction work, begin work within ninety days of obligation. Sums made available under this paragraph shall remain available until expended.

"(4) Sums apportioned to a Federal-aid system for any fiscal year shall be deemed to be expended if a sum equal to the total of the sums apportioned to the State for such fiscal year and previous fiscal years is obligated. Any Federal-aid highway funds released by the payment of the final voucher or by the modification of the formal project agreement shall be credited to the same class of funds, primary, secondary, urban, or interstate, previously apportioned to the State and be immediately available for expenditure.".

(b) Section 118 of title 23 is amended by relettering subsections (c) and (d) as subsections (e) and (f), respectively, and by adding after subsection (b) thereof the following new subsections:

"(c) Before any apportionment is made under section 104(b)(5)(A) of this title for a fiscal year beginning after September 30, 1983, the Secretary shall set aside $300,000,000. Such amount shall be available only for obligation by the Secretary in accordance with subsection (b)(2) of this section.

"(d) In addition to amounts otherwise available to carry out this section, an amount equal to the amount by which the unobligated apportionment for the Interstate System in any State is reduced under section 103(e)(4) of this title on account of the withdrawal of a route or portion thereof on the Interstate System, which withdrawal is approved after the date of enactment of this subsection, shall be available to the Secretary for obligation in accordance with subsection (b)(2) of this section.".

INTERSTATE SYSTEM RESURFACING TRANSFERS

SEC. 119. (a)(1) Section 119(a) of title 23, United States Code, is amended by inserting after the first sentence the following: "In addition to projects approved under the preceding sentence, beginning with funds apportioned for fiscal year 1984, the Secretary may approve projects for resurfacing, restoring, rehabilitating, and reconstructing those routes or portions thereof on the Interstate System designated before the date of enactment of this sentence under section 139(a) of this title (other than routes on toll roads not subject to a Secretarial agreement provided for in section 105 of the Federal-Aid Highway Act of 1978) which routes or portions were so designated in conjunction with the withdrawal of approval of another route or portion thereof on the Interstate System under section 103(e)(4) of this title.".

(2) The last sentence of section 119(a) of title 23, United States Code, is amended by striking out "designated under sections 103 and 139(c) of this title" and inserting in lieu thereof "under this subsection".

(3) The last sentence of section 139(a) of title 23, United States Code, is amended by striking out the period at the end thereof and inserting in lieu thereof the following: ", except that any State may use funds available to it under section 104(b)(1) of this title and, beginning with funds apportioned for fiscal year 1984, under section 104(b)(5)(B) of this title for the resurfacing, restoring, rehabilitating, and reconstructing of any route or portion thereof on the Interstate System on which a project may be approved under the second sentence of section 119(a) of this title.".

(b) The last subsection of section 119 of title 23, United States Code, is relettered as subsection (c).

(c) Section 119 of title 23, United States Code, is amended by adding at the end thereof the following new subsection:

"(d) Upon application by a State and approval by the Secretary, the Secretary may authorize the transfer of so much of the amount apportioned to such State for any fiscal year under paragraph (5)(A) of subsection (b) of section 104 of this title, as does not exceed the Federal share of the cost of segments of the Interstate System open to traffic in such State (other than

high occupancy vehicle lanes), in the most recent cost estimate, to the apportionment under paragraph (5)(B) of subsection (b) of section 104 of this title, except that not more than 50 per centum of the total apportionment under such paragraph (5)(A) for a fiscal year shall be transferred under this subsection for such fiscal year. The next cost estimate submitted to Congress under paragraph (5)(A) of subsection (b) of such section 104 of the cost of completing segments of the Interstate System open to traffic in that State (other than high occupancy vehicle lanes) shall be reduced for such State in an amount equal to the amount transferred under this subsection.".

FEDERAL SHARE

SEC. 120. (a) Section 120(c) of title 23, United States Code, is amended by adding at the end thereof the following new sentence: "Notwithstanding subsection (a) of this section, the Federal share payable on account of any project financed with primary funds on the Interstate System for resurfacing, restoring, rehabilitating, and reconstructing shall be the percentage provided in this subsection.".

(b) Section 120(d) of title 23, United States Code, is amended by inserting "or for pavement marking" after "signalization" and by adding at the end thereof the following: "The Federal share payable on account of any project for traffic control signalization under section 103(e)(4) of this title may amount to 100 per centum of the cost of construction of such project.".

(c) Section 120 of title 23, United States Code, is amended by adding at the end thereof the following new subsection:

"(j) Notwithstanding any other provision of this section (other than subsection (i)), of this title, or of any other law, in any case where a State elects to use funds apportioned to it for any Federal-aid system for any project, under sections 143, 146, 148, 155, and 217 of this title, section 163 of the Federal-Aid Highway Act of 1973, as amended, and for those priority primary routes under section 147 of this title designated in Committee Print Numbered 97-61 of the Committee on Public Works and Transportation of the House of Representatives, the Federal share payable on account of such project shall be 95 per centum of the cost thereof, unless—

"(1) such project is on land owned by the United States in which case the Federal share shall be 100 per centum of the cost of such project, or

"(2) a Federal share of the cost of the project greater than 95 per centum is specifically authorized by law.".

HIGHWAY BEAUTIFICATION

SEC. 121. (a) Subsections (a), (b), (c), and (d) of section 131 of title 23, United States Code, are amended to read as follows:

"(a) The Congress hereby finds and declares that it is in the public interest to deregulate to the maximum extent practicable Federal controls over outdoor advertising signs, displays, and devices and for the States to control the erection, maintenance, and eminent domain removal of outdoor advertising signs, displays, and devices in order to protect the public investment in highways, to preserve communications through the outdoor medium, and to promote natural beauty in scenic areas.

"(b)(1) For purposes of this section, the term 'outdoor advertising sign, display, or device' means an outdoor billboard or other display or device which (A) is customarily used to communicate a commercial or noncommercial message, and (B)(i) is located within six hundred and sixty feet of the nearest edge of the right-of-way of the Interstate System or the primary system and is visible from the main traveled way of such system, or (ii) outside of urban areas, is located more than six hundred and sixty feet from the nearest edge of the right-of-way, is visible from the main traveled way of such system, and is erected with the purpose of its message being read from such main traveled way.

"(2) This section does not apply to—

"(A) directional and official signs and notices, conforming to national standards promulgated by the Secretary;

"(B) signs, displays, and devices advertising the sale or lease of property upon which they are located;

"(C) signs, displays, and devices, including those which may be changed at reasonable intervals by electronic process or by remote control, advertising activities conducted on the property on which they are located;

"(D) signs lawfully in existence on October 22, 1965, determined by the State, to be landmark signs, including signs on farm structures or natural surfaces, of historic or artistic significance; and

"(E) signs, displays, and devices advertising the distribution by nonprofit organizations of free coffee to individuals traveling on the Interstate System or the primary system.

For the purposes of this subsection, the term 'free coffee' shall include coffee for which a donation may be made, but is not required.

"(c) Each State is encouraged to make such provision as it deems proper for the effective control of the location, erection, maintenance, or removal of outdoor advertising signs, displays, and devices. In order to assure that any control efforts are effective, the control efforts taken by a State, and by a political subdivision thereof, with respect to the location, erection, maintenance, or removal of such outdoor advertising signs, displays, and devices shall include, at a minimum, the following:

"(1) A requirement that outdoor advertising signs, displays, and devices may be erected only in areas which are zoned commercial or industrial under authority of State law and in such unzoned commercial and industrial areas as the State may deem appropriate;

"(2) Prohibition of the erection of any outdoor advertising sign, display, or device upon a site previously occupied by an outdoor advertising sign, display, or device which has been removed by order of a State or a political subdivision thereof, and for which just compensation has been paid;

"(3) The payment of just compensation through condemnation or eminent domain for any outdoor advertising sign, display, or device, lawfully erected under State law, upon the removal or upon the substantial impairment of the customary use or maintenance of such sign, display, or device by the State or any political subdivision thereof whether or not removed pursuant to or because of this section. Such compensation shall be paid for the taking from the owner of such sign, display, or device of his interest therein, and for the taking from the owner of the real property, on which such sign, display, or device is located, of the right to erect and maintain outdoor advertising signs, displays, and devices thereon. In the case of any outdoor advertising sign, display, or device, lawfully erected under State law, which is damaged or destroyed by an act of God or by a willful act of a third party, any action by a State or a political subdivision of a State which has the effect of preventing the owner from restoring such sign, display, or device to its previous condition or replacing such sign, display, or device with an outdoor advertising sign, display, or device meeting the requirements of State law which applied to the damaged or destroyed sign, display, or device at the time it was erected, shall be considered a substantial impairment of the customary use or maintenance of such sign, display, or device. For purposes of this paragraph, no growth of vegetation which wholly or partially impairs the visibility of an outdoor advertising sign, display, or device shall be considered a substantial impairment of the customary use or maintenance of such sign, display, or device unless such growth is the result of any action by a State or any political subdivision thereof which is primarily intended to conceal such sign, display, or device; and

"(4) Prohibition of the erection of any such sign, display, or device within areas which have been specifically designated by the State as scenic areas or areas of historic preservation if such prohibition is general and not applicable or intended for the control of outdoor advertising signs, displays, or devices.

"(d) In order to assure that each State, in the exercise of its discretion, makes some provision for control of the location, erection, maintenance, or removal of outdoor advertising signs, displays, and devices and does not eliminate all such controls, the Governor of each State shall certify to the Secretary annually that the State has a program which provides for the reasonable and orderly control of outdoor advertising, incorporating the minimum controls set forth in subsection (c) of this section. The Secretary shall accept as such certification a statement that a State has continued to enforce the controls on outdoor advertising which were in effect in such State on January 1, 1982.

"(e) Where the Secretary determines that a State has failed to establish effective control regarding the location, erection, maintenance, or removal of outdoor advertising signs, displays, or devices in accordance with subsections (c) and (d), Federal-aid highway funds apportioned to that State shall be reduced by an amount equal to 10 per centum of the amounts which would otherwise be apportioned to such State under section 104 of this title, until such time as such State shall provide for effective control. Any amount withheld from apportionment to any State hereunder shall be apportioned to the other States.

"(f) The Secretary may promulgate only such procedural regulations as are necessary for the enforcement of this section.".

(b) Section 131 of title 23, United States Code, is amended by striking out subsections (e), (g), (h), (l), (m), (n), (o), (p), and (q) and by redesignating subsections (f), (i), (j), and (k), and any references thereto, as subsections (g), (h), (i), and (j), respectively.

(c) Subsection (j) of section 131 of title 23, United States Code, as redesignated by subsection (b) of this section, is amended by striking out "(g)" and inserting in lieu thereof "(c)(3)".

(d) Section 131 of title 23, United States Code, is amended by adding at the end thereof the following new subsection:

"(k) There is authorized to be appropriated to carry out the provisions of subsection (i) of this section such sums as may be necessary.".

APPROACHES

SEC. 122. Subsection (c) of section 129 of title 23, United States Code, is amended by adding at the end thereof the following: "In the case of any connection of a highway free of tolls with a toll facility, Federal funds available for expenditure on any Federal-aid system may be expended on a project for an approach, as defined by the Secretary, to any toll road, bridge, or tunnel to that point where such approach enters the main lanes of the toll facility or the toll plaza, whichever first occurs. No Federal funds shall be expended for toll collection equipment.".

PARKING FACILITIES

SEC. 123. (a) Subsection (a) of section 137 of title 23, United States Code, is amended by inserting "(1)" after "(a)" and by inserting at the end thereof the following:

"(2) The Secretary may approve as a project on the Interstate System the acquisition of land adjacent to the right-of-way and the construction of publicly owned parking facilities thereon or within such right-of-way, including the use of the air space above and below the established grade line of the highway pavement. Such parking facility shall be for the exclusive use of carpools and vanpools. In the event fees are charged for the use of any such facility, the rate thereof shall not be in excess of that required for maintenance and operation (including compensation to any person for operating such facility). Sums apportioned under section 104(b)(5)(B) of this title shall be available to pay the Federal share of the cost of projects authorized by this paragraph.".

(b) Subsection (b)(2) of section 137 of such title is amended by inserting after "including" the following: ", in the case of any project approved under subsection (a)(1) of this section,".

(c) Subsection (e) of section 137 of such title is amended by inserting after "project" the following: "in an urbanized area".

EQUAL OPPORTUNITY

SEC. 124. (a) The first and third sentences of subsection (a) of section 140 of title 23, United States Code, are amended by striking out "or national origin" and inserting in lieu thereof ", national origin, or sex".

(b) Subsection (b) of section 140 of title 23, United States Code, is amended by striking out the second and third sentences and inserting in lieu thereof the following new sentence: "Of the sums available for carrying out the provisions of section 104(a) of this title, not to exceed $10,000,000 per fiscal year, as provided in annual appropriation Acts, shall be available for the administration of this subsection.".

(c) Section 140 of title 23, United States Code, is amended by adding at the end thereof the following new subsection:

"(c) The Secretary, in cooperation with any other department or agency of the Government, State agency, authority, association, institution, corporation (profit or nonprofit), or any other organization or person, is authorized to develop, conduct, and administer training programs and assistance programs in connection with any program under this title in order that minority businesses may achieve proficiency to compete, on an equal basis, for contracts and subcontracts under this title. Of the sums available for carrying out the provisions of section 104(a) of this title, not to exceed $10,000,000 per fiscal year, as provided in annual appropriation Acts, shall be available for the administration of this subsection. The provisions of section 3709 of the Revised Statutes, as amended (41 U.S.C. 5), and section 302 of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 252) shall not be applicable to contracts and agreements made under the authority granted to the Secretary by this section.".

(d)(1) The heading of section 140 of title 23, United States Code, is amended to read as follows:

"§ 140. Equal opportunity"

(2) The analysis for chapter 1 of title 23, United States Code, is amended by striking out

"140. Equal employment opportunity."

and inserting in lieu thereof

"140. Equal opportunity.".

PUBLIC TRANSPORTATION

SEC. 125. The last sentence of section 142(a)(1) of title 23, United States Code, is amended by inserting "and the cost of providing shuttle service to and from the facility" after "of the facility" and by inserting "and for providing such shuttle service" after "operating the facility".

BRIDGE PROGRAM APPORTIONMENT

SEC. 126. (a) Subsection (e) of section 144 of title 23, United States Code, is amended to read as follows:

"(e) Funds authorized to carry out this section shall be apportioned among the several States on October 1 of the fiscal year for which authorized in accordance with this subsection. Each deficient bridge shall be placed into one of the following categories: (1) Federal-aid system bridges eligible for replacement, (2) Federal-aid system bridges eligible for rehabilitation, (3) off-system bridges eligible for replacement, and (4) off-system bridges eligible for rehabilitation. The square footage of deficient bridges in each category shall be multiplied by the respective unit price on a State-by-State basis, as determined by the Secretary; and the total cost in each State divided by the total cost of the deficient bridges in all States shall determine the apportionment factors. No State shall receive more than 10 per centum or less than 0.25 per centum of the total apportionment for any one fiscal year. The Secretary shall make these determinations based upon the latest available data, which shall be updated annually.".

(b) The amendment made by subsection (a) of this section shall take effect October 1, 1982, and shall apply with respect to each fiscal year beginning on or after such date. Notwithstanding subsection (e) of section 144 of title 23, United States Code, as soon as practical after the date of enactment of this Act, the Secretary of Transportation shall apportion under such subsection (e), as amended by subsection (a) of this section, sums authorized to be appropriated to carry out such section 144 for the fiscal year ending September 30, 1983.

HIGHWAY BRIDGE REPLACEMENT AND REHABILITATION

SEC. 127. (a) Subsection (g) of section 144 of title 23, United States Code, is amended by inserting after "(g)" the following: "(1)". Such subsection is further amended by striking out the fourth and fifth sentences and by adding at the end thereof the following:

"(2) Of the amount authorized per fiscal year for each of the fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986, by section 5(a)(1) of the Federal-Aid Highway Act of 1982 and section 202(1) of the Highway Safety Act of 1982, all but $200,000,000 per fiscal year shall be apportioned as provided in subsection (e) of this section. $200,000,000 per fiscal year of the amount authorized for each of the fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986, shall be available for obligation on the date of each such apportionment in the same manner and to the same extent as the sums apportioned on such date, except that the obligation of such $200,000,000 shall be at the discretion of the Secretary and shall be only for projects for those highway bridges the replacement or rehabilitation cost of each of which is more than $10,000,000, and for any project for a highway bridge the replacement or rehabilitation costs of which is less than $10,000,000 if such cost is at least twice the amount apportioned to the State in which such bridge is located under subsection (e) of this section for the fiscal year in which application is made for a grant for such bridge. Not less than 15 per centum nor more than 35 per centum of the amount apportioned to each State in each of the fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986, shall be expended for projects to replace or rehabilitate highway bridges located on public roads, other than those on a Federal-aid system. The Secretary after consultation with State and local officials may, with respect to a State, reduce the requirement for expenditure for bridges not on a Federal-aid system when he determines that such State has inadequate needs to justify such expenditure.".

(b) Notwithstanding section 144 of title 23, United States Code, and any other provision of law, the Secretary of Transportation may approve under such section 144 (including subsection (g)) a project to relocate and replace (1) any bridge across a river located on a two-lane Federal-aid highway which is in a slide area, in a flood plain, and in the vicinity of and north of Cloverdale, California, together with (2) all highways and approaches required as a result of such relocation and replacement.

(c) Notwithstanding section 144 of title 23, United States Code, and any other provision of law, the Secretary of Transportation may approve under such section 144 (including subsection (g)) a project to replace the La-Salle Peru Bridge which is part of a complete replacement of United States 51 in a new location.

CARPOOL AND VANPOOL PROJECTS

SEC. 128. Subsection (b) of section 146 of title 23, United States Code, is amended by striking out "A project authorized by this section" and inserting in lieu thereof the following: "The Federal share of a project authorized by this section shall be that provided in section 120(j) of this title, and such project otherwise".

ALLOCATION OF URBAN FUNDS

SEC. 129. (a) Section 150 of title 23, United States Code, is amended by adding at the end thereof the following: "Funds allocated to an urbanized area under this section may, at the request of the Governor of a State and upon approval of the appropriate local officials of such area and of the Secretary, be made available for expenditure in another urbanized area or in any urban area in such State.".

HAZARD ELIMINATION PROGRAM EXTENSION

SEC. 130. Subsection (c) of section 152 of title 23, United States Code, is amended to read as follows:

"(c) Funds authorized to carry out this section shall be available for expenditure on any public road (other than a highway on the Interstate System).".

FEDERAL LANDS HIGHWAYS PROGRAM

SEC. 131. (a) Section 204 of title 23, United States Code, is amended to read as follows:

"§ 204. Federal lands highways program

"(a) Recognizing the need for all Federal roads to be treated under the same uniform policies there is established a coordinated Federal lands highways program to be administered by the Secretary which shall consist of the forest highways, public lands highways, park roads, parkways, and Indian reservation roads and bridges as defined in section 101 of title 23, United States Code.

"(b) Funds available for forest highways and public lands highways shall be used by the Secretary to pay for the cost of construction and improvement thereof. Funds available for park roads, parkways, and Indian reservation roads and bridges shall be used by the Secretary of the Interior to pay for the cost of construction and improvement thereof. In connection therewith, the Secretary or the Secretary of the Interior, as appropriate, may enter into construction contracts and such other contracts with a State, or civil subdivision thereof as deemed advisable.

"(c) Cooperation of States, counties, or other local subdivisions may be accepted in construction and improvement, and any funds received from a State, county, or local subdivision shall be credited to appropriations available for the class of Federal lands highways to which such funds were contributed.

"(d) Construction of each project shall be performed by contracts awarded by competitive bidding, unless the Secretary or the Secretary of the Interior, as appropriate, shall affirmatively find that, under the circumstances relating to such project, some other method is in the public interest.

"(e) All appropriations for the construction and improvement of each class of Federal lands highways shall be administered in conformity with regulations and agreements jointly approved by the Secretary and the Secretary of the appropriate Federal land managing agency.

"(f) The Secretary shall transfer to the Secretary of Agriculture from appropriations for forest highways such amounts as may be needed to cover necessary administrative expenses of the Forest Service in connection with forest highways.

"(g) Funds available for each class of Federal lands highways shall be available for adjacent vehicular parking areas and scenic easements.

"(h) As used in this section, the term 'Federal lands highways' means forest highways, public lands highways, park roads, parkways, and Indian reservation roads and bridges.".

(b) Section 202 of title 23, United States Code, is amended to read as follows:

"§ 202. Allocations

"(a) On October 1 of each fiscal year, the Secretary shall allocate the sums authorized to be appropriated for such fiscal year for forest highways according to the relative needs of the various elements of the National Forest System as determined by the Secretary, taking into consideration the need for access as identified by the Secretary of Agriculture through renewable resource and land use planning, and the impact of such planning on existing transportation facilities.

"(b) On October 1 of each fiscal year, the Secretary shall allocate the sums authorized to be appropriated for such fiscal year for public lands highways among those States having unappropriated or unreserved public lands, nontaxable Indian lands, or other Federal reservations, on the basis of need in such States, respectively, as determined by the Secretary upon application of the State highway departments of the respective States. The Secretary shall give preference to those projects which are significantly impacted by Federal land and resource management activities.

"(c) Sums authorized to be appropriated for forest development roads and trails shall be allocated by the Secretary of Agriculture according to the relative needs of the various national forests, taking into consideration the existing transportation facilities, value of timber or other resources served, relative fire danger, and comparative difficulties of road and trail construction.

"(d) On October 1 of each fiscal year, the Secretary of the Interior shall allocate the sums appropriated for such fiscal year for park roads and parkways according to the relative needs of the various elements of the National Park System, taking into consideration the need for access as identified through land use planning and the impact of such planning on existing transportation facilities.

"(e) On October 1 of each fiscal year, the Secretary of the Interior shall allocate the sums appropriated for such fiscal year for Indian reservation roads and bridges according to the relative needs of the various reservations as jointly identified by the Secretary and the Secretary of the Interior.".

(c) Section 101(a) of title 23, United States Code, is amended by striking out the twelfth undesignated paragraph, defining the term "park roads and trails", and inserting in lieu thereof the following new paragraph:

"The term 'park road' means a public road that is located within or provides access to an area in the National Park System.".

(d) Sections 206, 207, 208, and 209 of title 23, United States Code, are hereby repealed.

(e) The analysis of chapter 2 of title 23, United States Code, is amended—

(1) by striking out

"202. Apportionment for allocation."

and inserting in lieu thereof

"202. Allocations.";

(2) by striking out

"204. Forest highways."

and inserting in lieu thereof

"204. Federal lands highways program.";

and

(3) by striking out

"206. Park roads and trails.
"207. Parkways.
"208. Indian reservation roads.
"209. Public lands highways.".

(f) Section 201 of title 23, United States Code, is amended by inserting "(a)" before "The provision" and by adding at the end thereof the following new subsection:

"(b) There is hereby authorized to be appropriated such sums as may be necessary for forest development roads and trails, public lands development roads and trails, and park roads.".

(g) Sections 201 and 203 of title 23, United States Code, are amended by striking out "park roads and trails" each place it appears and inserting in lieu thereof "park roads".

(h) Section 307 of title 23, United States Code, is amended by adding at the end thereof the following new subsection:

"(e) Up to one and one-half per centum of funds appropriated for forest highways, public lands highways, park roads, parkways, and Indian reservation roads and bridges may be made available for expenditure by the Secretary for the planning of future highway programs, for engineering and economic studies and investigations, and for the development and demonstration of technology relative to the planning, design, construction, and maintenance of such highways.".

(i) The amendments and repeals made by this section shall only be applicable to fiscal years beginning after September 30, 1982.

BICYCLE TRANSPORTATION

SEC. 132. Section 217 of title 23, United States Code, is amended to read as follows:

"§ 217. Bicycle transportation and pedestrian walkway

"(a) To encourage energy conservation and the multiple use of highway rights-of-way, including the development and improvement of pedestrian walkways on or in conjunction with highway rights-of-way, the States may, as Federal-aid highway projects, construct pedestrian walkways. Sums apportioned in accordance with paragraphs (1), (2), and (6) of section 104(b) of this title shall be available for pedestrian walkways authorized under this section and such projects shall be located and designed pursuant to an overall plan which will provide due consideration for safety and contiguous routes.

"(b)(1) To encourage energy conservation, including the development, improvement, and use of bicycle transportation, the States may, as Federal-aid highway projects, construct new or improved lanes, paths, or shoulders; traffic control devices, shelters for and parking facilities for bicycles, and carry out nonconstruction projects related to safe bicycle use. Sums apportioned in accordance with paragraphs (1), (2), and (6) of section 104(b) of this title shall be available for bicycle projects authorized under this section and such projects shall be located and designed pursuant to an overall plan which will provide due consideration for safety and contiguous routes.

"(2) In any case where a highway bridge deck being replaced or rehabilitated with Federal financial participation is located on a highway, other than a highway access to which is fully controlled, on which bicycles are permitted to operate at each end of such bridge, and the Secretary determines that the safe accommodation of bicycles can be provided at reasonable cost as part of such replacement or rehabilitation, then such bridge shall be so replaced or rehabilitated as to provide such safe accommodations.

"(3) No bicycle project shall be authorized by this section unless the Secretary shall have determined that such bicycle project will be principally for transportation, rather than recreation, purposes.

"(c) For all purposes of this title, a pedestrian walkway project authorized by subsection (a) of this section shall be deemed to be a highway project, and the Federal share payable on account of such pedestrian walkway project shall be that provided in section 120 of this title.

"(d) For all purposes of this title, a bicycle project authorized by subsection (b) of this section shall be deemed to be a highway project, and the Federal share payable on account of such bicycle project shall be that provided in section 120(j) of this title.

"(e) Funds authorized for forest highways, forest development roads and trails,

public lands development roads and trails, park roads, parkways, Indian reservation roads, and public lands highways shall be available, at the discretion of the department charged with the administration of such funds, for the construction of pedestrian walkways in conjunction with such trails, roads, highways, and parkways.

"(f) Funds authorized for forest highways, forest development roads and trails, public lands development roads and trails, park roads, parkways, Indian reservation roads, and public lands highways shall be available, at the discretion of the department charged with the administration of such funds, for the construction of bicycle routes.

"(g) No motorized vehicles shall be permitted on trails and walkways authorized under this section except for maintenance purposes and, when snow conditions and State or local regulations permit, snowmobiles.

"(h) Not more than $45,000,000 of funds authorized to be appropriated in any fiscal year may be obligated for projects authorized by subsections (a), (b), (e), and (f) of this section. No State shall obligate more than $4,500,000 for such projects in any fiscal year, except that the Secretary may, upon application, waive this limitation for a State for any fiscal year.".

PARKING RAMPS AND FRONTAGE ROADS

SEC. 133. (a) Subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, is further amended by adding before the last sentence thereof a new sentence as follows: "Notwithstanding any other provisions of law, including any other provision of this subsection, where a project is to be constructed with high occupancy vehicle lanes which flow into a distributor system emptying directly into ramps for off-street parking with preferential parking for carpools, vanpools, and buses, and the ramps are part of an environmental mitigation effort and are designed to feed into an aerial walkway system, the cost of such parking ramps and parking garage project shall be eligible for funds authorized by this subsection as if the costs of such parking ramps and parking garage project were included in the 1981 interstate cost estimate and shall be included as an eligible project in any future interstate cost estimate.".

(b) Notwithstanding the provisions of section 108(b) of the Federal-Aid Highway Act of 1956, as amended, the Secretary of Transportation may approve the expenditure of funds authorized under such section for the construction of a previously approved project which provides for improvements to and reconstruction of ramps and service roads which are being developed as part of a roadway system to relieve a severely congested segment on an Interstate route. Such expenditures shall be limited (1) to work necessary to provide more effective and safe operation of such Interstate route, and (2) to a section of an Interstate route which proceeded to construction contract prior to the date of enactment of such Act and which Interstate route, together with service roads, was constructed without the expenditure of any funds authorized by such section.

PROJECT ELIGIBILITY

SEC. 134. In any case where a project involving a Federal-aid primary route not on the Interstate System, and a route on the Interstate System which was originally constructed without the expenditure of any funds authorized under section 108(b) of the Federal-Aid Highway Act of 1956, as amended, and was subsequently added to the Interstate System, both occupying a common alignment and having elements which have been approved in concept by the Secretary of Transportation as part of a project providing for the upgrading of an interchange on such Interstate route, the cost of improvements in the vicinity of the interchange necessary to upgrade the safety of that part of such Federal-aid primary route not on a common alignment with such Interstate route in an environmentally acceptable manner shall be eligible for the expenditure of funds authorized by such section 108(b).

ACCELERATION OF PROJECTS

SEC. 135. The Secretary of Transportation shall by rule or regulation establish, as soon as practicable, alternative methods for processing projects under title 23, United States Code, so as to reduce the time required from the request for project approval through the completion of construction. In carrying out this section the Secretary shall utilize the knowledge and experience resulting from the demonstration project authorized by and carried out under section 141 of the Federal-Aid Highway Act of 1976.

FOUR-LANE BRIDGES

SEC. 136. Whenever any law of the United States, enacted after January 1, 1970, and before the date of enactment of this Act, authorizes payment, in financing the relocation of an existing road, for the cost of construction of a two-lane bridge with a substructure and deck truss capable of supporting a four-lane bridge, payment for the cost of completing the construction of such bridge as a four-lane bridge is authorized upon the completion of such substructure and deck truss.

DEMONSTRATION PROJECTS

SEC. 137. (a)(1) The Secretary of Transportation is authorized to carry out a demonstration project in Los Angeles County, California, for the purpose of demonstrating methods of improving the motor vehicle transportation of freight to and from areas for the transshipment of waterborne commerce.

(2) There is authorized to be appropriated to carry out this subsection, out of the Highway Trust Fund, not to exceed $19,000,000 for the fiscal year ending September 30, 1983, not to exceed $19,000,000 for the fiscal year ending September 30, 1984, and not to exceed $20,000,000 for the fiscal year ending September 30, 1985.

(3) Funds authorized by this subsection shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of any project under this subsection shall be 100 per centum of the total cost thereof and such funds shall remain available until expended.

(b)(1) The Secretary of Transportation shall carry out a highway project to demonstrate state of the art technology which can be applied to a section of highway the construction of which will close a gap of not more than 10 miles in a multi-lane limited access approach road through hilly terrain connecting a city (not directly connected to the Interstate System by such an approach road) with a route on such System on which tolls are charged. For comparison purposes, the highway section shall connect both highway construction using current technology and older completed highway construction. The project shall demonstrate the latest high-type geometric design features and new advances in highway traffic control and safety hardware. All design elements, including the highway pavement, shall be designed to provide the best life-cycle costs, thereby minimizing future maintenance costs. The Secretary of Transportation shall provide necessary technical assistance in the design and construction of the project. Upon completion of the project, the highway shall be added to the Federal-aid primary system.

(2) Not later than one year, six years, and eleven years after the completion of the state of the art technology project, the Secretary of Transportation shall submit reports to the Congress, including but not limited to the results of such project, the effects of using the best available technology on safety and other considerations, recommendations for applying the results to other highway projects, and any changes that may be necessary by law to permit further use of such features.

(3) There is authorized to be appropriated to carry out this subsection, out of the Highway Trust Fund, not to exceed $5,000,000 for the fiscal year ending September 30, 1983, $10,000,000 for the fiscal year ending September 30, 1984, and $62,000,000 for the fiscal year ending September 30, 1985. Such funds shall be available until expended, shall be available for obligation in the same manner and to the same extent as if apportioned under chapter 1 of title 23, United States Code, and shall not be subject to any obligation limitation. The Federal share payable for the state of the art technology project shall be 100 per centum.

(c)(1) The Secretary of Transportation shall conduct a project to demonstrate state of the art methods of repairing damaged highways, and preventing damage to highways, resulting from shoreline erosion. Such project shall be carried out in the vicinity of Buhne Point, Humboldt Bay, California, at a cost not to exceed $9,000,000 for fiscal years beginning after September 30, 1982, out of the Highway Trust Fund.

(2) The Secretary of Transportation may enter with the heads of other departments, agencies, and instrumentalities of the Federal Government into such arrangements as may be necessary to carry out the provisions of this subsection.

(3) The Secretary of Transportation shall submit to Congress a report on the results of the demonstration project not later than 180 days after completion of such project.

(4) Funds authorized by this subsection shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of any project under this subsection shall be 100 per centum of the total cost thereof and such funds shall remain available until expended.

(d)(1) The Secretary of Transportation is authorized to carry out a demonstration project in the vicinity of East Baton Rouge, Louisiana, for the purpose of demonstrating the efficacy of reducing traffic congestion in the immediate vicinity of a partial-diamond, partial-cloverleaf interchange which connects an east-west highway on the Interstate System and a four lane highway not on such system by providing a direct access ramp to, and a travel lane on, the Interstate highway and by eliminating a crossover which is used for access to the Interstate highway.

(2) There is authorized to be appropriated to carry out this subsection, out of the

Highway Trust Fund, not to exceed $5,000,000 for the fiscal years beginning after September 30, 1982.

(3) Funds authorized by this subsection shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of any project under this subsection shall be 100 per centum of the total cost thereof and such funds shall remain available until expended.

(e)(1) The Secretary of Transportation is authorized to carry out a demonstration project in the vicinity of Louisville, Kentucky, for the purpose of demonstrating methods of accelerating construction of high traffic sections of highways on the Federal-aid primary system which are directly connected to the Interstate System.

(2) The Secretary of Transportation shall submit to Congress a report on the results of the demonstration project carried out under this subsection not later than 180 days after completion of such project.

(3) There is authorized to be appropriated to carry out this subsection, out of the Highway Trust Fund, not to exceed $25,000,000 for the fiscal year ending September 30, 1983, and not to exceed $27,000,000 for the fiscal year ending September 30, 1984.

(4) Funds authorized by this subsection shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of any project under this subsection shall be 100 per centum of the total cost thereof and such funds shall remain available until expended.

VEHICLE WEIGHT, LENGTH, AND WIDTH LIMITATIONS

SEC. 138. (a) Section 127 of title 23 of the United States Code is amended to read:

"§ 127. Vehicle weight, length, and width limitations—Interstate System

"(a) No funds authorized to be appropriated for any fiscal year under provisions of the Federal-Aid Highway Act of 1956 shall be apportioned to any State which does not permit the use of the National System of Interstate and Defense Highways within its boundaries by vehicles with a weight of twenty thousand pounds carried on any one axle, including enforcement tolerances, or with a tandem axle weight of thirty-four thousand pounds, including enforcement tolerances, or a gross weight of at least eighty thousand pounds for vehicle combinations of five axles or more. However, the maximum gross weight to be allowed by any State for vehicles using the National System of Interstate and Defense Highways shall be twenty thousand pounds carried on one axle, including enforcement tolerances, and a tandem axle weight of thirty-four thousand pounds, including enforcement tolerances and with an overall maximum gross weight, including enforcement tolerances, on a group of two or more consecutive axles produced by application of the following formula:

$$W = 500\left(\frac{LN}{N-1} + 12N + 36\right)$$

where W equals overall gross weight on any group of two or more consecutive axles to the nearest five hundred pounds, L equals distance in feet between the extreme of any group of two or more consecutive axles, and N equals number of axles in group under consideration, except that two consecutive sets of tandem axles may carry a gross load of thirty-four thousand pounds each providing the overall distance between the first and last axles of such consecutive sets of tandem axles is thirty-six feet or more: *Provided*, That such overall gross weight may not exceed eighty thousand pounds, including all enforcement tolerances, except for those vehicles and loads which cannot be easily dismantled or divided and which have been issued special permits in accordance with applicable State laws, or the corresponding maximum weights permitted for vehicles using the public highways of such State under laws or regulations established by appropriate State authority in effect on July 1, 1956, except in the case of the overall gross weight of any group of two or more consecutive axles, on the date of enactment of the Federal-Aid Highway Amendments of 1974, whichever is the greater. Any amount which is withheld from apportionment to any State pursuant to the foregoing provisions shall lapse. This section shall not be construed to deny apportionment to any State allowing the operation within such State of any vehicles or combinations thereof which the State determines, after consultation with the Secretary, could be lawfully operated within such State on July 1, 1956, except in the case of the overall gross weight of any group of two or more consecutive axles, on the date of enactment of the Federal-Aid Highway Amendments of 1974. With respect to the State of Hawaii, laws or regulations in effect on February 1, 1960, shall be applicable for the purposes of this section in lieu of those in effect on July 1, 1956. With respect to the State of Michigan, laws or regulations in effect on May 1, 1982, shall be applicable for the purposes of this subsection.

"(b) No funds authorized to be appropriated for any fiscal year under provisions of the Federal-Aid Highway Act of 1956 shall be apportioned to any State which imposes a vehicle length limitation of less than 48 feet on the length of the semitrailer unit operating in a truck tractor-semitrailer combination, and of less than 28 feet on the length of any semitrailer or trailer operating in a truck tractor-semitrailer-trailer combination on any segment of the National System of Interstate and Defense Highways. No funds authorized to be appropriated for any fiscal year under provisions of the Federal-Aid Highway Act of 1956 shall be apportioned to any State which imposes a vehicle width limitation of more or less than 102 inches on any segment of the National System of Interstate and Defense Highways.

"(c) Length limitations established, maintained, or enforced by the States under subsection (b) of this section shall apply solely to the semitrailer or trailer and not to a truck tractor. No State shall establish, maintain, or enforce any regulation which imposes an overall length limitation on motor vehicles operating in truck-tractor semitrailer or truck tractor semitrailer, trailer combinations authorized in subsection (b) of this section. No State shall establish, maintain, or enforce any regulation which has the effect of prohibiting the use of trailers or semitrailers of such dimensions as those that were in actual and lawful use in such State on the date of enactment of the Highway Improvement Act of 1982. No State shall establish, maintain, or enforce any regulation of commerce which has the effect of prohibiting the use of existing trailers or semitrailers, of up to 28½ feet in length, in a truck tractor-semitrailer-trailer combination if those trailers or semitrailers were actually and lawfully operating on December 1, 1981, within a 65-foot overall length limit in any State.

"(d) No State shall prohibit motor vehicle combinations consisting of a truck tractor and two trailing units on any segment of the National System of Interstate and Defense Highways.

"(e) The Secretary of Transportation is authorized to establish, consistent with this title, rules to implement the provisions of this section, and to make such determinations as are necessary to accommodate specialized equipment (including, but not limited to, automobile transporters) subject to subsections (b) and (c) of this section.

"(f) For purposes of this section, 'truck tractor' means the noncargo carrying power unit that operates in combination with a semitrailer or trailer.

"(g) The length and width limitations described in subsections (b) and (c) of this section shall be exclusive of safety and energy conservation devices, such as rear view mirrors, turn signal lamps, marker lamps, steps and handholds for entry and egress, flexible fender extensions, mudflaps and splash and spray suppressant devices, load-induced tire bulge, refrigeration units or air compressors and other devices, which the Secretary of Transportation may interpret as necessary for safe and efficient operation of commercial motor vehicles, except that no device excluded under this subsection from the limitations of subsections (b) and (c) of this section shall have by its design or use the capability to carry cargo.

"(h) No State may enact or enforce any law denying reasonable access to motor vehicles subject to this title to and from the Interstate Highway System to terminals and facilities for food, fuel, repairs, and rest.".

(b) The amendment made by subsection (a) of this section shall only take effect upon the enactment into law of a tax structure which more nearly achieves an equitable distribution of the tax burden among classes of persons and vehicles using Federal-aid highways then the current distribution.

MARTIN LUTHER KING BRIDGE

SEC. 139. The Martin Luther King Bridge which crosses the Mississippi River between St. Louis, Missouri, and East St. Louis, Illinois, and is not on a Federal-aid system shall be eligible for assistance under section 144 of title 23, United States Code, to the same extent that any other bridge which is not on a Federal-aid system is eligible for assistance under such section, except that no such assistance shall be made available with respect to such bridge until such bridge—

(1) has been transferred to one or both of the States of Missouri and Illinois;

(2) is freed from tolls; and

(3) otherwise meets the eligibility requirements of such section, and the rules and regulations promulgated thereunder.

MANPOWER STUDY

SEC. 140. The Secretary of Transportation shall undertake to enter into appropriate arrangements with the National Academy of Sciences' Transportation Research Board to conduct a comprehensive study and investigation of future transportation professional manpower needs, including but not limited to prevailing methods of recruitment,

training, and financial and other incentives and disincentives which encourage or discourage retention in service of such professional manpower by Federal, State, and local governments. In entering into any arrangement with the National Academy of Sciences for conducting such study and investigation, the Secretary shall request the National Academy of Sciences to report to the Secretary and the Congress not later than two years after the enactment of this Act on the results of such study and investigation, together with its recommendations. The Secretary shall furnish to the Academy at its request any information which the Academy deems necessary for the purpose of conducting the study and investigation authorized by this section.

FERRYBOAT STUDY

SEC. 141. The Office of Technology Assessment shall conduct a comprehensive investigation and study of the feasibility of a high speed ferryboat operation over the waters of the Caribbean Sea between Saint Croix and Saint Thomas in the Virgin Islands in accordance with this section. The Department of Transportation, the Army Corps of Engineers, the National Oceanic and Atmospheric Administration, and all other agencies, offices, and instrumentalities of the United States shall assist the Office in conducting an objective investigation and study of such projected operation. The Office shall evaluate this projected operation for its feasibility under various degrees of commercial and government sponsorship. The Office shall complete and transmit a report on such investigation and study to the Congress no later than January 1, 1984.

STUDY OF WEATHER-RELATED FACTORS IN APPORTIONMENT FORMULAS

SEC. 142. The Secretary of Transportation shall study and determine the need for including weather-related factors, particularly the effects of freezing and thawing, in the apportionment formulas for Federal-aid highways under section 104 of title 23, United States Code. The Secretary shall report to Congress not later than one year after the date of enactment of this Act on the results of such study and shall include in such report specific recommendations for changing such apportionment formulas to take into account weather-related factors.

REPORT REGARDING LONGER COMBINATION COMMERCIAL MOTOR VEHICLES

SEC. 143. (a) Within one year after the date of enactment of this Act, the Secretary of Transportation, after consultation with the transportation officials and Governors of the several States and after an opportunity for public comment, shall submit to Congress a detailed report on the potential benefits and costs, if any, to shippers, receivers, operators of commercial motor vehicles, and the general public, that reasonably may be anticipated from the establishment of a national intercity truck route network for the operation of a special class of longer combination commercial motor vehicles.

(b) For the purposes of this section—

(1) the term "longer combination commercial motor vehicles" means multiple-trailer combinations consisting of (A) truck tractor-semitrailer-full trailer, and (B) truck tractor-semitrailer-full trailer-full trailer combinations with an overall length not in excess of one hundred and ten feet; and

(2) the term "national intercity truck route network" means a network consisting of a number of controlled-access, interconnecting segments of the National System of Interstate and Defense Highways and other highways of comparable design and traffic capacity including, but not limited to, all such highways where the operation of longer combination commercial motor vehicles is authorized on the date of enactment of this Act.

(c) The detailed report mandated by this section shall include, but need not be limited to, the following:

(1) a specific plan for the establishment of a national intercity truck route network, including the designation of those specific highway segments which would be required to connect the major distribution centers and markets for long-haul intercity freight service; except that the Secretary of Transportation shall not include in the plan any highway segment which, because of design limitations or other factors, cannot accommodate the safe operation of longer combination commercial motor vehicles;

(2) an analysis of the intercity motor freight volume that reasonably can be anticipated to be transported by longer combination commercial motor vehicles over the national intercity truck route network if such network is established by Congress;

(3) an analysis of the fuel savings that reasonably can be anticipated in the transportation of freight by commercial motor vehicle if such network is established by Congress;

(4) an analysis of the productivity gains that reasonably can be anticipated to be achieved in the transportation of freight by commercial motor vehicle if such network is established by Congress;

(5) an analysis of the fuel conservation and productivity gains historically achieved by operators of longer combination commercial motor vehicles;

(6) an analysis of the safety record of longer combination commercial motor vehicle operations that have been conducted prior to the date of enactment of this Act; and

(7) an analysis of the effect of the size and weight limitations contained in section 127 of title 23, United States Code, as in effect after the date of enactment of this Act.

(d) In making the findings and determinations required by subsection (c) of this section, and in making the detailed report to Congress required by this section, the Secretary of Transportation shall assume that the longer combination commercial motor vehicles operating on the national intercity truck route network, if and when established by Congress, would be subject to the single- and tandem-axle weight limits imposed by section 127 of title 23, United States Code. The Secretary of Transportation shall further assume that the overall gross weight of such vehicles on a group of two or more consecutive axles shall be limited by the formula set forth in such section, and only by such formula.

(e) In making the detailed report to Congress required by this section, the Secretary of Transportation shall assume that longer combination commercial motor vehicles operating on the national intercity truck route network will have reasonable access to terminals, combination breakup areas, and food and fuel facilities consistent with safe operations of such vehicles.

(f) Nothing in this section shall be construed to establish Federal policy with regard to highway vehicle weight and size standards, nor shall anything in this section be construed to preempt or to affect any State law establishing highway vehicle weight or size standards. The provisions of this section require an investigation and study on the feasibility and propriety of making changes in vehicle weight and size standards which the Congress may choose to consider in the future.

CHANGE IN LOCATION OF INTERSTATE SEGMENTS

SEC. 144. (a) Notwithstanding the provisions of section 4(b) of the Federal-Aid Highway Act of 1981, the Secretary may approve a change in location of any Interstate route or segment and approve, in lieu thereof, the construction of such Interstate route or segment on a new location if the original location of such route or segment meets the following criteria: (1) it has been designated under section 103(e) of title 23, United States Code; (2) it is serving Interstate travel as of the date of enactment of this section; (3) it requires improvements which are eligible under the Federal-Aid Highway Act of 1981, and which would either involve major modifications in order to meet acceptable standards or result in severe environmental impacts and such major modifications or mitigation measures relating to the environmental impacts are not cost effective. The cost of the construction of such Interstate route or segment on new location with funds available under section 108(b) of the Federal-Aid Highway Act of 1956, as amended, shall not exceed the estimated cost of the eligible improvements on the original location as eligible under the Federal-Aid Highway Act of 1981 and included in the 1983 interstate cost estimate as approved by the Congress. Such cost shall be increased or decreased, as determined by the Secretary, based on changes in construction costs of the original location of the route or segment as of the date of approval of each project on the new location. Upon approval of a new location, any funds apportioned under section 104(b)(5)(A) of title 23, United States Code, which were expended on the route or segment in the original location shall be refunded to the Highway Trust Fund and credited to the unobligated balance of the State's apportionment made under section 104(b)(5)(A) of title 23, United States Code, and other eligible Federal-aid highway funds may be substituted in lieu thereof at the appropriate Federal share.

(b) Where the Secretary approves a relocation of an Interstate route or segment under the provisions of subsection (a) of this section, such route or segment shall not be eligible for withdrawal under the provisions of section 103(e)(4) of title 23, United States Code, and shall be subject to the Interstate System completion deadlines provided in subsections (d) and (e) of section 107 of the Surface Transportation Assistance Act of 1978 or subject to Interstate System completion deadlines as may be determined by Congress.

ACCESS CONTROL DEMONSTRATION PROJECTS

SEC. 145. Section 150(b) of the Federal-Aid Highway Act of 1978 is amended by striking out "1983" and inserting in lieu thereof "1985".

REVISION OF PROJECT AGREEMENT

SEC. 146. Notwithstanding any other provision of law, as a condition of reimbursement of the Federal share of the cost of Federal-aid project 23-D-U-54 (100) in New Jersey, the Secretary of Transportation and the New Jersey Department of Transportation shall revise the project agreement for such project to make available financial assistance not to exceed $1,000,000 for the purpose of compensating businesses in the general vicinity of such project that have suffered monetary losses as a result of the

temporary bypass established to accommodate the construction of the project.

STUDY OF THE USE OF SURFACING MATERIALS PRODUCED FROM RECYCLED TIRES

SEC. 147. The Secretary of Transportation shall conduct a study to determine the feasibility of the use by the States of highway and bridge surfacing, restoration, and maintenance substances or materials produced in substantial part from rubber recovered from recycled tires. The Secretary shall determine the extent to which such use would conserve energy and operate to remove discarded tires from areas adjacent to the highways, and thereby effectively assist in the accomplishment of highway beautification and safety programs. The Secretary shall complete such study and submit a report thereof to the Congress not later than one year after the date of enactment of this Act.

ENFORCEMENT OF HEAVY VEHICLE USE TAX

SEC. 148. (a) Section 141 of title 23, United States Code, is amended by adding subsection (d) as follows:

"(d) No funds shall be apportioned to a State under section 104(b)(5) of this title in any fiscal year during which heavy vehicles, subject to the use tax imposed under section 4481 of the Internal Revenue Code of 1954, may be lawfully registered in the State without having presented proof of payment, in such form as may be prescribed by the Secretary of the Treasury, of the use tax imposed by section 4481 of such Code. Amounts withheld from apportionment to a State under this subsection shall be apportioned to the other States pursuant to the formulas of section 104(b)(5) of this title and shall be available in the same manner and to the same extent as other Interstate funds apportioned at the same time to other States.".

(b) The amendment made by subsection (a) of this section shall be effective January 1, 1985.

MONITORING OF EFFECT OF DOUBLE BOTTOM TRUCKS

SEC. 149. (a) The Secretary of Transportation shall undertake to enter into appropriate arrangements with the National Academy of Sciences to monitor the effects on the National System of Interstate and Defense Highways of the use of trucks with two trailing units, in light of the amendment made by this Act to section 127 of title 23, United States Code, providing that no State shall prohibit the use of such vehicle combinations. Such monitoring shall include, but need not be limited to, determining the effects of the use of such vehicle combinations on highways and highway safety in urban and rural areas and in different regions of the country, taking into account differences in age and design features of highways on the Interstate System.

(b) The Secretary of Transportation shall request the National Academy of Sciences to submit a report to the Secretary and the Congress of such monitoring, not later than two years after appropriate arrangements are entered into under subsection (a). The Secretary shall furnish to the Academy, at its request, any information which the Academy deems necessary for the purpose of conducting such monitoring.

ADVANCEMENT OF NON-FEDERAL SHARE

SEC. 150. (a) Notwithstanding any other provision of law, the Federal share of any qualifying project approved by the Secretary of Transportation under section 106(a), and of any qualifying project for which the United States becomes obligated to pay under section 117, of title 23, United States Code, during the period beginning on the date of enactment of this Act and ending September 30, 1984, shall be such percentage of the construction cost as the State highway department requests, up to and including 100 per centum.

(b) For purposes of this section, the term "qualifying project" means a project approved by the Secretary of Transportation under section 106(a) of title 23, United States Code, or a project for which the United States becomes obligated to pay under section 117 of title 23, United States Code, for which the Governor of the State submitting the project has certified that sufficient funds are not available to pay the cost of the non-Federal share of the project.

(c) The total amount which may be obligated for qualifying projects in any State under subsection (a) shall not be greater than the excess of—

(1) the amount of obligation authority distributed to such State for fiscal year 1983 under section 104(b) of this Act, over

(2) the amount of obligation authority distributed to such State for fiscal year 1982 under section 3(b) of the Federal-Aid Highway Act of 1981.

(d) The total amount of such increases in the Federal share as are made pursuant to subsection (a) for any State shall be repaid to the United States by such State on or before September 30, 1984. Such payments shall be deposited in the Highway Trust Fund. No project shall be approved under section 106 or 117 of title 23, United States Code, for any project in any State which has failed to make its repayment in accordance with this subsection until such repayment has been made.

LANE RESTRICTIONS

SEC. 151. The State of California shall not restrict or require the restriction of the use of any lane on any Federal-aid highway in the unincorporated areas of Alameda County, California, to high occupancy vehicles, exclusive of approaches to controlled access highways, toll roads, or bridges.

UPGRADING CERTAIN INTERCHANGES

SEC. 152. Notwithstanding any other provision of law, in the case of any portion of a route on the Interstate System in the State of California which is open to traffic and which has less than two through lanes in either direction in the area where such route connects with a limited access highway on the Federal-aid primary system, a project to improve the portion of the Interstate route to a design of six lanes and to upgrade the interchange between such Interstate route and primary route to accommodate such design shall be eligible for funds authorized by section 108(b) of the Federal-Aid Highway Act of 1956, as amended, as if the costs of such project were included in the 1981 interstate cost estimate and shall be included as an eligible project in the 1983 interstate cost estimate and any later interstate cost estimate.

CONVICT LABOR

SEC. 153. Section 114(b) of title 23, United States Code, is amended by inserting after "Convict labor" the following: "or materials produced by convict labor".

PREVAILING RATE OF WAGE

SEC. 154. Section 113(a) of title 23, United States Code, is amended by striking out "initial".

AMENDMENT OFFERED BY MR. HOWARD

Mr. HOWARD. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HOWARD: After section 154, insert the following:

MINIMUM ALLOCATION

SEC. 155. (a) In the fiscal year year ending September 30, 1983, as soon as practicable after the date of enactment of this Act, and in each of the fiscal years ending September 30, 1984, September 30, 1985, and September 30, 1986, on October 1, the Secretary of Transportation shall allocate among the States, as defined in section 101 of title 23, United States Code, amounts sufficient to insure that a State's percentage of the total apportionments in each such fiscal year of Interstate highway substitute, primary, secondary, Interstate, urban, bridge replacement and rehabilitation, hazard elimination, and rail-highway crossings funds under sections 103(e)(4), 104(b), 144, and 152 of title 23, United States Code, and section 203 of the Highway Safety Act of 1973, as amended, shall not be less than 85 per centum of the percentage of estimated tax payments attributable to highway users in that State paid into the highway trust fund, other than the mass transit account, in the latest fiscal year for which data is available.

(b) Amounts allocated pursuant to subsection (a) of this section shall be available for obligation when allocated for the year authorized plus the three succeeding fiscal years, shall be subject to the provisions of title 23, United States Code, and may be obligated for interstate highway substitute, primary, secondary, Interstate, urban, bridge replacement and rehabilitation, hazard elimination, and rail-highway crossings projects. Obligation limitations for Federal-aid highways and highway safety construction programs established by this Act or any subsequent Act shall not apply to obligations made under this section except where the provision of law establishing such limitation specifically amends or limits the applicability of this sentence. Sums allocated pursuant to this section shall not be considered to be sums allocated for purposes of section 104(b) of this Act.

(c) In order to carry out this section there is authorized to be appropriated out of the Highway Trust Fund, other than the Mass Transit Account, $420,000,000 for the fiscal year ending September 30, 1983, and such sums as may be necessary for each of the fiscal years ending September 30, 1984, September 30, 1985, and September 30, 1986.

Mr. HOWARD (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. HOWARD. I would like to state in developing this bill we did find that there is and has been throughout the history of the highway trust fund a discrepancy between the amount of money that certain States may contribute into the highway trust fund and the amount of money that they may receive for that State from the highway trust fund.

When this program was established in the 1950's it was found that there was a national need for a major interstate highway network across the country, a superhighway, a safe highway, a limited access highway.

States would be or individuals throughout the country would be asked to pay 3 cents and later 4 cents a gallon that would go into the highway trust fund to pay for this.

The amount of money going into the trust fund from a particular State had no relationship to the needs of that State. We could take a State like the State of New Jersey, a State with a fairly high population, many automobiles. The State would put a great deal of money into the Federal Highway Trust Funds. However, when it came to the Interstate Highway, we find that New Jersey is a very small State and so, in order to complete this necessary national network it would not get many miles of interstate or much money to build this interstate.

We find in other States, mainly out in the West, fairly rural States like Montana, Nebraska or South Dakota, with relatively few people, that they did not send very much to the highway trust fund at all and yet they had a need for many miles of interstate.

So in the national interests, to have a national program, the States were allocated sufficient money to build the interstates in that State no matter how much it cost. That is why we had some States like smaller, more populous States, contributing money to the rest of the country to build the system, because it was in the national interests.

Many of the States which were allocated money on what it would cost to complete the interstate, many of the States used their money early and they are now getting near the end of the interstate needs in their State. So their allocation is going down. Therefore, if you look at a number you would find that some States are getting 80 cents, 75 cents, 78 cents back on each dollar they contribute. Other States are getting more than a dollar for each dollar they contribute.

We cannot balance that out one to one. Otherwise we will have 50 separate highway situations in the country, good roads in one State and poor roads in another State.

So what we did in order to help the imbalance was to not bother any State that was getting more than 85 cents per dollar back, but for the States which got fewer than 85 cents, to lift them up to a minimum of 85 cents.

The way this was done was to add money to the bill each year and in the first year, the only year we have the figures for on projected revenues, this adds $420 million in just the first year alone to the bill. States will get at least 85 percent back for each dollar they send in.

One of the major recipients, one of the ones that was lowest because it used a lot of its interstate money, was the State of Texas. The State of Texas in fiscal 1982 got $346 million. Even though we only double the tax this year, the State of Texas, bringing it up to the 85 percent, will get in fiscal 1983 $779 million, much more than double what they got, even though the gas tax for the highway trust fund is double.

We think this is a good compromise. It seems to have satisfied most of the States.

The $420 million addition to the program is something that we can live with through the 4 years of this bill without triggering the Byrd amendment or any other amendments which would cause a reduction for all of the other States.

So this is an amendment that helps several States and hurts no State. We believe that it will help in the passage of the legislation and I urge adoption of the amendment.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I will be happy to yield to the gentleman from Pennsylvania.

Mr. SHUSTER. This indeed is a compromise and substantially different from the original amendment which I understood the gentleman was going to offer.

I have studied it. I think it is fair. It is equitable and I support the gentleman.

Mr. HOWARD. I thank the gentleman for his support.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. I thank my colleague. He told us about Texas. What happens to New Jersey?

The CHAIRMAN. The time of the gentleman from New Jersey (Mr. HOWARD) has expired.

(By unanimous consent Mr. HOWARD was allowed to proceed for 2 additional minutes.)

Mr. HOWARD. The State of New Jersey I believe is at 95 percent. We were at the 95 cents and well above that.

Mrs. FENWICK. I thought we were at 84 cents.

Mr. HOWARD. No, it is 95 cents and we stay at the 95 in the new bill.

However, I would say this is only the highway portion. If you look at what we New Jerseyites are contributing, we are finally getting a little justice because of the great needs we have in transit in the area, which part of the trust fund will be part of, and we finally do fairly well in that.

Mrs. FENWICK. I thank the gentleman.

Mr. CLINGER. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I am happy to yield to the gentleman from Pennsylvania.

Mr. CLINGER. I would just ask the chairman: Does this include all Federal highway assistance?

Mr. HOWARD. What this includes is a total of about $11.048 billion. The only thing that is not cranked into this are two areas. One area is the interstate transfer money of which 75 percent is formulated out; and then, two, 20 percent, $200 million, is discretionary. That comes under general revenue for this first year so that it would not be a factor in relation to getting back money from the trust fund that you put in. That is not in there.

On the bridge money, in the first year we have $1.5 billion, $1.3 billion of which is formula money. That is factored in.

We have, as you know, $200 million of that which is discretionary. We do not know that is going. So out of the tax money in the trust fund everything is covered, $11 billion, except $200 million of the $1.5 billion in the bridge money.

□ 1640

So it is as close as we can come, within half a point or so, of what would happen, depending upon what happens with the discretionary money in the bridge program.

Mr. ANDERSON. Mr. Chairman, I rise in support of the amendment. One of the unfortunate aspects of programs distributed according to formulas, is that they often appear to have winners and losers. I happen to think, though, that when it comes to having a national Federal-aid highway system, we are all winners.

Because certain States have been raising an equity question over the past few weeks, the decision was made that each State should receive an 85-cent return on apportioned programs for each dollar they invest in the trust fund.

Let me say that I feel it is unfortunate that some States, because they have virtually completed their Interstate System, now complain that they do not get a fair share, because those States that are only now building their interstate, and have not been able to enjoy the economic advantages of a completed system, are now receiving greater apportionments of interstate construction funding.

But if we are to have a healthy Federal-aid system, it must enjoy broad support from all States. And so, I think it is wise for the chairman of the full Public Works and Transportation Committee to be offering this amendment today. I will support it. But I am supporting this equity amendment knowing full well that what is equitable for one person or one State may not be so equitable for the next.

As it is crafted, the amendment will not cost any State a dime. Rather, additional funds are added to those normally apportioned, to bring each State's return on its trust fund contribution for apportioned programs to at least 85 cents. I support this amendment.

Mr. PETRI. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment.

This amendment is a matter of simple equity. Without it, Wisconsin will get back only 70 cents in highway spending for every $1 it pays in highway taxes. With the amendment, Wisconsin and other similar States will be assured a return of at least 85 cents on the dollar. In Wisconsin's case, this amounts to an extra $30 million a year for highway improvement, which we would otherwise have to get from State sources.

The funds to be raised by this bill have been called user fees. As I understand it, that means that users of services are to pay directly for those services in proportion to the amount they use. Now, paying $1 for 70 cents worth of services does not sound like a user fee to me. It sounds more like a plain old ordinary tax. Under current economic circumstances, I cannot vote for a plain old ordinary tax increase. However, I can support a true user fee for increased highway maintenance, which we badly need, and more equitable distribution provisions, as contained in this amendment, will move the bill a long way in that direction.

I wish to congratulate and thank the distinguished chairman of the Public Works and Transportation Committee for offering this important amendment, and I urge its adoption.

AMENDMENT OFFERED BY MR. ARCHER AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. HOWARD

Mr. ARCHER. Mr. Chairman, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. ARCHER as a substitute for the amendment offered by Mr. HOWARD: In section 107(a)(1) concerning interstate transfers strike "$775,000,000" and insert in lieu thereof "$650,000,000".

In section 118(b) concerning Interstate discretionary funds strike "$300,000,000" and insert in lieu thereof "$200,000,000".

At the end of title I add a new section as follows:

APPORTIONMENTS AND ALLOCATIONS

SEC. . (a) In each of the fiscal years 1984, 1985, and 1986, on October 1, the Secretary of Transportation shall allocate among the States, as defined in title 23, United States Code, amounts sufficient to insure that the total sum of apportionments and allocations, excluding apportionments under section 103(e)(4) and 104(b)(5)(A) of title 23, United States Code, a State receives during that fiscal year to incur obligations for which expenditures may be made from the highway trust fund, excluding the mass transit account, shall not be less than 90 percent of the estimated tax payments attributable to highway users in that State into the highway trust fund in the latest fiscal year for which data is available.

(b) Amounts allocated pursuant to subsection (a) of this section shall be available for obligation when allocated for the year authorized plus 3 fiscal years, shall be subject to the provisions of title 23, United States Code, and may be obligated for those purposes for which funds are apportioned or allocated pursuant to title 23, United States Code, to incur obligations for which expenditures may be made from the highway trust fund, excluding the mass transit account.

(c) In order to carry out this section there is authorized to be appropriated out of the highway trust fund not to exceed $125,000,000 per fiscal year for each of the fiscal years 1984, 1985 and 1986.

(d) In addition to the sums authorized by subsection (c) of this section and before any apportionment of authorizations is made under section 104(b)(5)(A) of title 23, United States Code, during the fiscal years 1984, 1985, and 1986, the Secretary of Transportation shall set aside from such authorizations $100,000,000 per fiscal year for each of the fiscal years 1984, 1985, and 1986 to carry out this section.

Mr. ARCHER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. ARCHER. Mr. Chairman, I want to compliment the chairman of the committee, the gentleman from New Jersey (Mr. HOWARD), for recognizing the inequities that have existed over the years in the distribution of funds out of the highway trust fund compared to the amount of taxes that have been paid in by each State.

I recognize that there is a need for an Interstate System and that it cannot be 100 cents on the dollar, but certainly over a 20-year period, when the State of Texas has received less than three-quarters of the money that it has paid in, there is a gross inequity when you consider the number of highway miles that our State has to build.

There has been much discussion in recent days about the basic inequity perpetrated by the bill we are considering in regard to allocation of these funds. The so-called donor/donee problem is a very real one for many States. As I mentioned, I understand the reluctance of States receiving more than 100-percent return on the taxes they pay in to accept a change in the allocation formulas to help States which are net losers under the bill. that is why the amendment that I am offering as a cosponsor with Congressman JACK FIELDS should be acceptable to all States. Under our amendment, no State's percentage allocation is reduced. Instead, we provide for a 90-percent floor for all States as a minimum return on the taxes they pay in, in those categories other than interstate construction and interstate transfer.

Chairman HOWARD has just stated that his proposed amendment would increase the authorized expenditure under the bill by $420 million. The amendment that Congressman FIELDS and I offer as a substitute would accomplish the 90-percent floor without increasing the bill's authorization at all. It would keep the total spending within the limits of the committee bill, thereby reducing the overall budget deficits. The revenues necessary to bring all States up to a 90-percent floor are instead drawn from the Transportation Secretary's existing discretionary accounts.

Relative to the bill as it now stands, six States would directly benefit from this 90-percent floor. But no States will see their allocations reduced. My colleagues from Arizona, California, Florida, Michigan, Ohio, and Texas should vote for this amendment in the knowledge that it reduces the inequitable treatment our States received under the committee bill's allocation process. My colleagues from other States in the Union can support it in the knowledge that they are providing greater equity nationwide without reducing their own State's allocations. It is fiscally sound as an approach to reducing a basic inequity which has existed for many years in our highway program and others.

The amendment also addresses the need to set as a priority the completion of our National Interstate System. For that reason, as I mentioned earlier, categories for interstate construction and interstate transfer are not included. Those funds will still be allocated according to the need for completion of the Interstate System.

□ 1650

I urge my colleagues in the House to search their consciences and vote to provide more equitable treatment for those States which are tremendously disadvantaged under the present bill before us. Whether or not a Member is from one of the States directly benefited by this amendment, that Member can be assured that not a single State's allocation under any category will be reduced as stated in the bill that came out of the committee. To me that is a very fair and compelling reason for support of this amendment.

Mr. CLAUSEN. Mr. Chairman, will the gentleman yield?

Mr. ARCHER. I yield to the gentleman from California.

Mr. CLAUSEN. I thank the gentleman for yielding.

The gentleman's suggestion tends to coincide with some reservations that I have expressed to the chairman about

how we deal with this donor-donee issue. It may very well be that the efforts on the part of the gentleman may not succeed at this point. I am not sure. But I do want the gentleman to know that I think the fact his amendment leaves the interstate system out of the donor-donee issue, so that we can complete the system itself, is a very meritorious objective.

I want to let the gentleman know I commend him and the gentleman from Texas (Mr. FIELDS) for moving in this direction because I think it is conceivable we may end up doing something like this in the conference.

The CHAIRMAN. The time of the gentleman from Texas (Mr. ARCHER) has expired.

(At the request of Mr. HOWARD and by unanimous consent, Mr. ARCHER was allowed to proceed for 1 additional minute.)

Mr. SHAW. Mr. Chairman, will the gentleman yield?

Mr. ARCHER. I yield to the gentleman from Florida.

Mr. SHAW. I thank the gentleman for yielding.

I would like to compliment the gentleman in the well for a very fine amendment. For years many of the States have suffered the inequities of the distribution of the Interstate System funds. I think what the gentleman has offered is a recognition of the contributions made today by the States, but also an overriding recognition for the need for the completion of the Interstate project throughout the entire country. I compliment the gentleman for a very equitable formula and one that I would hope that the whole House would support.

Mr. ARCHER. I thank the gentleman.

Mr. FIELDS. Mr. Chairman, I move to strike the requisite number of words and I rise in support of the amendment offered by the gentleman from Texas (Mr. ARCHER) and myself.

Mr. Chairman, first I must compliment and applaud the chairman of the Committee on Public Works and Transportation for offering his amendment to help resolve the donor-donee problem, a problem that Texas has historically experienced. The amendment offered by the gentleman from Texas (Mr. ARCHER) and myself, however, attempts to correct one of the historic inequities of the Federal-aid highway program; namely, the situation which exists for the so-called donor-donee States. But we do so in a different manner than the chairman.

Mr. Chairman, over the life of the Federal-aid highway program and the highway trust fund, each State has contributed its share of gasoline tax and excise tax money to the highway trust fund. This money is then apportioned among the various 50 States for programs under the Federal-Aid Highway System. The distribution formulas of these revenues originally devised over 20 years ago, are based on a number of factors including total lane miles and total vehicle miles traveled in a State.

Unfortunately, because of the failure of these distribution formulas to reflect other statistics, many States are not receiving an adequate share of the revenue which they contribute. For example, my own State of Texas will contribute an estimated $783 million in fiscal year 1983 but will only receive back $627 million according to this legislation. This represents a return of approximately $968 for every dollar which Texas contributes to the trust fund, hardly an equitable return on this money.

Mr. Chairman, our amendment would correct this situation in a way which would not take money away from any other States but would guarantee that each State receive at least 90 percent of its contributed revenues. In this way, States such as Texas will be guaranteed an apportioned share of Federal-aid highway money which is directly proportional to its contribution level.

In keeping with this administration's and previous administration's philosophy and, the priority of the Public Works and Transportation Committee's priority of completing the Interstate System by 1991, our amendment would exclude the interstate construction program and the interstate transfer program. We feel strongly that the interstate is indeed a program of national scope and its completion should not be delayed or deterred in any way. The 42,000-mile Interstate System which is now 95 percent complete provides vital transport and mobility for all of our Nation's citizens in addition to being one of the essential links to interstate commerce in our country. In this regard, we recognize and accept that some States will, until completion of this system, bear a disproportionate share of the cost.

However, the apportionment inequity which now exists for the other Federal aid highway programs such as the Interstate 4-R, the urban, secondary, and primary categories cannot be justified as an overriding national priority. Rather, because these moneys are spent on construction of roads and highways which directly serve the transportation needs of each State, their distribution should reflect the diversity of these needs.

Mr. Chairman, our amendment would correct the donor-donee problem by guaranteeing qualifying donor States a minimum of 90 percent of their contributed revenues. According to the Federal Highway Administration, the revenue needed to fund this guarantee for fiscal year 1984 would total $225 million, with subsequent fiscal years averaging approximately the same amount. This $225 million would be generated from two sources; $125 million would come from the interstate transfer authorization and $100 million would come from the interstate discretionary authorization. This money would then be spent by the Secretary to supplement the trust fund shares of those donor States which do not receive at least 90 percent of their contributed revenues. The recipient States would then be free to spend this additional money in whatever highway category they deem necessary.

An additional feature of this amendment, Mr. Chairman, is that it does not increase the authorization levels of this legislation. I do not feel that with the deficit for fiscal year 1984 approaching $180 billion, we can stand here and arbitrarily increase the spending levels of this legislation. I find it unconscionable that with a 1983 authorization level of $12.1 billion we can even consider increasing the authorization levels any further. It is because of this terrible deficit problem that our amendment would shift existing authorizations within this legislation to solve the donor-donee problem and not increase the overall authorization levels.

Mr. Chairman, it is only fitting and equitable that States should be receiving a proportionate and fair share of their contribution to the highway trust fund, especially since the revenues collected for the trust fund reflect the level of use and road service within each State. This amendment would achieve that equity and balance while not penalizing other States. In the spirit of fairness and equity, I welcome the support of my colleagues and urge the adoption of this amendment.

Mr. HOWARD. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, we have before us an amendment that I had offered which brings all the States up 85 percent, adds $420 million to the program, does not take funds from any other States, and will not slow down the completion of the interstate program.

Now we have a substitute which states that it is going to bring all the States up to 90 percent, taking some of the money away from the program for interstate transfer, which means that funds for a highway that was not going to be built, as I understand it.

Mr. ARCHER. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I yield to the gentleman from Texas.

Mr. ARCHER. I thank the gentleman for yielding.

We do not touch the formula for allocating interstate transfers or interstate construction.

Mr. HOWARD. As I understand from the gentleman's amendment it

affects that and it also affects the discretionary interstate program.

Mr. ARCHER. It affects the discretionary fund.

Mr. HOWARD. The discretionary fund is intended so we may complete this system at the lowest cost possible by having discretionary money into high-cost programs so we can get them finished earlier so they do not run the cost up higher, and therefore cause more of an increase in costs to all the States.

Mr. BREAUX. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I yield to the gentleman from Louisiana.

Mr. BREAUX. I thank the gentleman for yielding.

Paragraph 1 of the gentleman's amendment says in section 107(A)(1) concerning interstate transfers, "Strike $775 million and insert in lieu thereof $650 million."

Mr. ARCHER. If the gentleman will yield, we do not reduce any allocation to any State under the interstate transfer category.

Mr. HOWARD. How do you save money if you do not get it from some place?

Beyond that, if I may reclaim my time, we talk about every State wanting to get in these programs everything back that they give. And we said Texas goes from $300 and some million to $779 million. Nobody talks about needs, when the figures are on their side. But they want to get as much proportionally as any other State gets.

We need a national highway system, we need good roads in every State, if we are going to have commerce and safety in our transportation. And so we have to consider having a good national highway system. And if it is going to cost some States, like my own State, to have my people in New Jersey have safe, decent, good, efficient roads when they travel to other States, that is the way I would like it.

If we are going to talk about giving back, getting back everything we give, we could talk to the State of Texas, and ask them how much of the billions of dollars in the Federal space program that goes into Texas would they like to share with New Jersey and some of the other States, or how many of our farm States would like to share money from the farm program.

We in New Jersey are willing to help the farm areas, because it is important nationally. We could ask about the defense money that goes to California, and does not go to other States. The word "united" in United States of America is there for a reason. We are not supposed to be 50 separate competing individual entities that just want to get back everything that they can, no matter what it does to the rest of the country. We have got to have a national system. We have raised the bill $425 million. We know that that will not trigger the Byrd amendment to cause all the other States to be reduced. We are not sure what will happen in this substitute, whether it will trigger the Byrd amendment or the Rostenkowski amendment.

□ 1700

So I just want to urge opposition to this amendment. We think we have done a fair job.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I yield to the gentleman from Pennsylvania.

Mr. SHUSTER. Mr. Chairman, I thank the gentleman.

It is my understanding that this amendment would take money away from the interstate discretionary fund, which is our highest priority. Is that not true?

Mr. HOWARD. That is what we were just talking about. I believe it reduces it by at least $100 million.

Mr. SHUSTER. So we would be taking funds away from the Nation's highest highway priority.

Mr. HOWARD. I agree with the gentleman. I urge a vote against it.

Mr. ARCHER. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I am happy to yield.

Mr. ARCHER. Mr. Chairman, I want to clarify the gentleman's own amendment, which I applaud the gentleman for introducing in order to try to treat these inequities.

The problem we had is that it does require an increased level of funding of $420 million. We are trying to live within the existing funding.

I wonder if the gentleman can tell us whether it would not be possible for the Appropriations Committee to fail to appropriate this extra $420 million and leave us with really nothing under the gentleman's amendment.

The CHAIRMAN. The time of the gentleman from New Jersey has expired.

(By unanimous consent, Mr. HOWARD was allowed to proceed for 1 additional minute.)

Mr. HOWARD. Mr. Chairman, I have to say to the gentleman, it is entirely possible; but I believe that the fact that this is trust money makes it much more sure than we would be of being able to have the Appropriation Committee come out with this, rather than if it were general revenue funds where every dollar they come out with actually adds to the deficit of the budget; whereas this one, of course, should be separate from that and does not and the money is there; so I believe that it is possible, certainly. I am not going to fool the gentleman.

Mr. ARCHER. Mr. Chairman, if the gentleman will yield further, I am not going to try to make a strong argument against the gentleman's amendment, but I think ours is better, because we can stay within the funding that exists under the bill.

Mr. HOWARD. But we do damage to a certain program that is important.

Mr. ARCHER Without damaging any single State.

Mr. HOWARD. We would damage programs that are supposed to go under the interstate discretionary program, we certainly would.

Mr. ARCHER. But if the gentleman would yield further, that is, as the gentleman said, discretionary. It is not a commitment to any particular State. It is within the power of the Secretary to determine where those funds go.

Mr. HOWARD. That is right, and he is supposed to use them for that purpose, not just give them out in areas where they do not have a tremendous need for it.

Mr. SENSENBRENNER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the Archer amendment, and I rise in support of the amendment to the amendment in the nature of a substitute offered by the gentleman from New Jersey.

The amendment offered by the gentlemen from New Jersey affords an opportunity to partially correct an inherent inequity in the distribution of the highway trust fund.

The highway trust fund formula creates two classes of States: Those which receive more than they contributed; and those which receive less than they contributed, often referred to as "donor States." Wisconsin is a donor State. Wisconsin has about 2 percent of the Nation's land area and population. We pay 2.1 percent of all Federal excise fees. Yet Wisconsin has averaged, since its creation in 1956, only about 1.5 percent of all highway trust fund apportionments, in effect receiving back only 75 cents per $1 of fees paid. Wisconsin in fiscal year 1982 received 70 cents from every $1 contributed. Wisconsin drivers pay for road rehabilitation in other States, as its roads deteriorate. If the amount of the revenue contributed to the fund is increased, this disparity will only be exacerbated. The State of Wisconsin, as well as other donor States, will be deprived of scarce revenues, which will have to be offset if its transportation systems are to remain usable. Further, employment opportunities will be lost, in many cases, to States with less unemployment than the State of Wisconsin.

The amendment offered by the gentlemen from New Jersey, will allocate at least 85 percent of the percentage of estimated tax payments attributable to highways in that State, to be returned to the State. This amendment will provide for a more equitable distribution of the highway trust fund.

I, therefore, strongly urge my colleagues to support the amendment.

Mr. LOWRY of Washington. Mr. Speaker, I move to strike the requisite number of words. I rise in opposition to the Archer amendment.

Mr. Chairman, in the State of Washington there has been serious doubt that adequate funding will be available in the future to complete all aspects of the Seattle portion of the Interstate 90 project. It is feared that after the highway portion of the project is completed there will not be adequate money to complete the necessary amenities, such as the environmentally important lidding of the freeway. The U.S. Department of Transportation has stated that the level of Interstate 4-R funding authorized by the Federal Highway Act of 1981 did not adequately reflect the system's needs. I want to be certain that the additional money made available by this legislation will provide for completion of all the amenities of the I-90 project and specifically those amenities, in their entirety, included in the agreements with local governments and final environmental impact statements for the completion of the Interstate 90.

I have today received correspondence from the U.S. Department of Transportation and the Washington State Department of Transportation stating the additional funding provided by this legislation will allow completion of the I-90 Seattle project. A letter from the U.S. Department of Transportation from the Deputy Administrator of the Federal Highway Administration, Mr. L. P. Lamm, states the problem of inadequate funding will be "rectified by congressional approval of the proposed user tax increase." Under H.R. 6211, Washington State will receive a significant increase in the amount of Interstate 4-R funds it receives. Washington State's apportionment for fiscal year 1984 would increase from $16.8 million to approximately $40 million according to the Department of Transportation. In his letter, Mr. Lamm stated:

> We believe there would be enough interstate construction funding to finance all remaining gap work by the early 1990's and also enough Interstate 4-R funds to complete the 4-R work items on projects such as I-90.

In a telegram from the Washington State Department of Transportation, I have received assurances that with the passage of H.R. 6211 the State will be in a position to meet its commitments on the completion of the I-90 project as agreed with local governments and as authorized.

I will enter both the letter from the U.S. Department of Transportation and the telegram when we return to the full House.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. ARCHER) as a substitute for the amendment offered by the gentleman from New Jersey (Mr. HOWARD).

The question was taken; and on a division (demanded by Mr. ARCHER) there were—ayes 8, noes 31.

So the amendment offered as a substitute for the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey (Mr. HOWARD).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. HOWARD

Mr. HOWARD. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HOWARD: Amend the section heading for section 150 to read as follows:

TEMPORARY MATCHING FUND WAIVER

In subsection (a) of section 150, strike out "September 30, 1984" and insert in lieu of "September 30, 1983".

In subsection (b) of section 150, insert after "has certified" the following: ", in accordance with regulations established by the Secretary of Transportation,".

In subsection (c) of section 150, strike out paragraph (1) and insert in lieu of the following:

(1) the sum of the amount of obligation authority distributed to such State for fiscal year 1983 under section 104(b) of this Act, plus the amount, if any, available to such State under section 155 of this Act, pertaining to minimum allocation, over

In subsection (d) of such section, strike out the second and third sentences and insert in lieu of the following: Such payments shall be deposited in the Highway Trust Fund and such repaid amounts shall be credited to the appropriate apportionment accounts of such State.

After subsection (d) of such section, insert the following new subsection:

(e) If a State has not made the repayment as required by subsection (d) of this section, the Secretary shall deduct from funds apportioned to such State under section 104(b) of title 23, United States Code, except for paragraph (5)(A), in each of the fiscal years ending September 30, 1985 and September 30, 1986, a pro rata share of each category of such apportioned funds, the total amount of which shall be equal to 50 per centum of the amount needed for repayment.

Mr. HOWARD (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

Mr. CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. HOWARD. Mr. Chairman, this is the second amendment that I referred to during the general debate. We are, as we know, passing a bill that had not been anticipated just a few weeks ago. It is going to be able to provide for the States several billions of dollars in additional money which will be used for highway improvements, maintenance, construction, bridge improvement, and safety projects.

The States are very, very happy about this; however, they do have a problem. They did not know this legislation was coming and many of them are not in a position to match the Federal funds.

As we know, in the Interstate and Interstate 4-R program we pay 90 percent. The States have to come up with 10 percent of that.

In the bridge program and in the transit program, it is 80-20.

In the non-Interstate Highway program, it is 75-25.

The States either because their budgets are completed or the legislatures do not meet are put in a terrible bind. So we want to get this money out, have the people put to work, have the projects start, hopefully almost all of it in 90 days.

This happened in the mid-1970's when we had a similar program during a recession under former President Ford, where money was being put out; so what we did with the States that could not match it was this. We said, "All right, if you will certify that you validly cannot match this money, but you do have the programs ready to go, we will give you the Federal share without a match."

All of the new money in the bill, all this money that is in addition to what is in the present law, and what we will ask these States to do is to have this repaid by the end of the second year. If all of it or any part of it is not repaid by the end of the second year, under this amendment then that money will be repaid by having the Federal Government deduct half of what is owed by the third year and the remaining half by the fourth year, the entire amount will be paid back to the highway trust fund and the money will have been utilized as speedily as possible and jobs provided.

Ms. OAKAR. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I am happy to yield to the gentlewoman from Ohio.

Ms. OAKAR. Mr. Chairman, I want to commend the gentleman for both amendments. It certainly helps States like the State of Ohio. I know that this has been a concern of our delegation and, indeed, of our Governor-elect. It certainly will give us the option that we were looking for.

Also in respect to the gentleman's previous amendment, it increased Ohio's amount by $73 million and I think we are all very, very grateful for that. This, in addition to the three projects totaling $54.5 million, adds to the commitment of the chairman to the State of Ohio. We are a lot better off than we were yesterday as stated by an article which appeared in the Plain Dealer, Ohio's largest newspaper which I would like to put in the RECORD at this time:

[The Plain Dealer, Sunday, Dec. 5, 1982]

GAS TAX BILL TO DRAIN OHIO

(By Geraldine M. Strozier)

If Ohioans think the gas tax hike-jobs bill working its way through Congress will help pull the state out of its recession, they should think again.

According to the U.S. Department of Transportation, the proposal to increase the federal gasoline tax four cents a gallon to finance highway and bridge renovation and one cent for mass transit, will end up costing the state at least $95 million and possibly more than $143 million, in total gas taxes.

If the House bill is enacted in its present form—adding five cents to the four cents a gallon already levied—Ohio will be sending about $472 million in gasoline taxes to Washington and it will get back only about $329 million, even though Ohio's unemployment rate of 14.2 percent is the second highest in the country.

According to one analysis of the House bill, Ohio could get back only 61 cents for every $1 in highway taxes it sends to Washington, said David L. Weir, the Ohio director of transportation.

The amount of Ohio's loss depends on which of several bills before Congress is enacted, and does not include an accurate analysis yet of what the state will get for mass transit nor how much truck taxes will increase. But no matter what happens, Ohio will end up subsidizing states with lower unemployment and higher revenues.

Mr. HOWARD. Mr. Chairman, I thank the gentlewoman.

I would like to say that the National Governors' Conference has supported and endorsed both these amendments. Should these amendments both be adopted, they then strongly support the passage of the legislation.

Mr. ROEMER. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I am happy to yield to the gentleman from Louisiana.

Mr. ROEMER. Mr. Chairman, a quick question. As I understand it, for the jobs aspect of this bill, this allows those States that are in a cash bind to take advantage of the money here and now. It does not forego their matching share in the appropriate categories.

Mr. HOWARD. That is true.

Mr. ROEMER. What about the match for the transit money?

Mr. HOWARD. I believe that is not included in this. I am sorry that I mentioned that. It is in the highway programs, but we believe that what they will be able to save there, they will be able to use in their States certainly to match the transit portion.

Mr. SHAW. Will the gentleman yield?

Mr. HOWARD. I am happy to yield.

Mr. SHAW. I would like to complement the gentleman on this most important amendment. Many States, like Florida, cannot by its own constitution deficit-finance construction of any sort. This is going to help our State in the event that the funds are not available as, of course, we as the other States were not prepared for the passage of this bill.

I thank the gentleman for his amendment.

Mr. HOWARD. We are very happy to help the gentleman's State and the other States.

Mr. MYERS. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I am happy to yield to the gentleman from Indiana.

Mr. MYERS. I would like to ask the gentleman, how soon do the States have to start paying this back?

Mr. HOWARD. We expect, as we said, that the money that is utilized from this first year where they will be able to get it will be paid back by the end of the second year. If it is not paid back by the end of the second year, then what we will do is take half of what is owed out of the third year allocation to the State and the other half out of the fourth year, so that by the end of this bill, by the end of the fourth year, it will all be repaid.

Mr. MYERS. So in effect, by the third year they would have to start paying one way or the other, either through their own contribution or by withholding future appropriations.

Mr. HOWARD. As I say, either pay us now or pay us later.

Mr. MYERS. I have heard that before.

Mr. ANDERSON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment offered by my good friend and chairman from New Jersey.

One of the concerns I have heard from many States during the crafting of this bill was that they might have difficulty coming up with their required match of the additional Federal funds that we are making available.

As our colleagues who have served on the State level are aware, most States have a budget cycle that runs from July to July. Many legislatures will not be meeting again for several months. And when they last met, as a matter of fact up until about 2 weeks ago, it looked as though there would be no increase in Federal highway funding this year. Of course, it now looks as if there will be.

□ 1710

But this confusion has left many States high and dry. They want the Federal funds, they need them; but they simply were not expecting this infusion of money and have not pursued the mechanisms which would allow them to provide the match.

This amendment would allow States to forgo their match the first year, to be made up at the end of the second year. If they are not made up by that time, the Secretary will reduce 50 percent of the appropriate amount in making his apportionment to the States during each of the fiscal years 1985 and 1986.

This is an equitable amendment, a fair amendment, and one which ought to be adopted.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. I yield to the gentleman from California.

Mr. ROUSSELOT. I thank the gentleman for yielding to me.

Mr. Chairman, some of us did receive notification from several States, including our own, California, that various States would not, in fact, be able to make the match. The gentleman is telling us now that this amendment will solve that problem?

Mr. ANDERSON. First, it is my understanding that the Governor has to declare that his or her State is unable to make the match; there has to be a clear need.

Then they get their first years required match waived, or put off. They are supposed to pay it back the end of the second year. If they do not pay it the second year, then the Secretary takes out in the third year half of it and in the fourth year the other half.

So it all eventually gets back into the highway trust fund. This makes it possible for States not ready for this money to get moving right away.

Mr. ROUSSELOT. So to the best of the gentleman's knowledge, this amendment solves the problem and the questions raised by our highway people in California?

Mr. ANDERSON. I say to the gentleman that the National Governors Conference has supported this amendment. I know our own State is facing the question of whether they have the money to get moving. So if that is true, this would allow them to move. I think it is a very good amendment.

Mr. ROUSSELOT. Mr. Chairman, I thank the gentleman for yielding to me and for his statements.

Mr. MYERS. Mr. Chairman, will the gentleman yield to me?

Mr. ANDERSON. I yield to the gentleman from Indiana.

Mr. MYERS. I thank the gentleman for yielding to me.

Mr. Chairman, it is not clear in my mind what the impact of this amendment would be. Is it the fact that the State would not have to put their share up and the Federal Government would match that share so the States can get 100, or it it just that they are not required to put their share up?

Mr. HOWARD. Mr. Chairman, will the gentleman yield to me?

Mr. ANDERSON. I yield to the gentleman from New Jersey.

Mr. HOWARD. I thank the gentleman for yielding.

Mr. Chairman, what would happen is that we would not put up the Federal share and the State share. We would put up the Federal share.

Let us make it simple. Let us assume we have a $90 million Federal share

for interstate which they would normally match with $10 million so we would have a $100 million program. If they do not have the money, they will get only $90 million.

Mr. MYERS. They will get only the $90 million. The $10 million is not advanced to the State.

Mr. HOWARD. No, but that will be their 90 percent, so they will have to put in another 10 percent, or $9 million, into the fund later on.

Mr. MYERS. Later on? All right.

Mr. HOWARD. They put that into the fund.

Mr. MYERS. I am glad we got that clarified.

Mr. HOWARD. We went round and round on this one. That is the way it works.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey (Mr. HOWARD).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. LEVITAS

Mr. LEVITAS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LEVITAS: Page 33, line 18, strike out "order" and all that follows through line 21 on page 33 and insert in lieu thereof the following: "areas adjacent to the Interstate System and the primary system in order to protect the public investment in such highways, to promote the safety and recreational value of public travel, and to preserve natural beauty.".

Mr. LEVITAS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. LEVITAS. Mr. Chairman, this amendment amends section 121 of the bill entitled "Highway Beautification" in subsection (a) by striking language beginning with the word "order" that was added in the new version, and it restores the language to the original purpose language of the Highway Beautification Act.

In a sense, what it does is to maintain the same emphasis and thrust of the highway beautification program as was originally intended and does not change the emphasis by suggesting that one of the purposes of the Highway Beautification Act is to preserve communications through the outdoor media. It simply leaves the purpose as the Congress wrote it when the legislation was first passed. Since that sets the theme and the purpose of the legislation, which does get reflected in regulations and litigation, I feel it is important to restore the language to the original form that it was in and would urge my colleagues to join me in supporting this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. LEVITAS).

The amendment was agreed to.

Mr. LOWERY of California. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise to ask a question of the distinguished gentleman from California (Mr. ANDERSON), the chairman of the Subcommittee on Surface Transportation of the Committee on Public Works and Transportation.

It is my understanding that a major emphasis of the legislation under consideration is significant increases in funding for 4-R rebuilding and repair activities. Am I correct?

Mr. ANDERSON. My distinguished colleague is correct.

Mr. LOWERY of California. The motorists of San Diego County have been awaiting the completion of an important interchange at the intersection of Interstate 8 and State Route 125 for a number of years now. Because of existing obsolete geometric standards and a poor safety record, funding for the I-8/125 interchange was previously approved under the regular interstate completion program. However, with the passage of the 1981 Federal-Aid Highway Act, the project was reclassified from the interstate completion program to the 4-R program. I-8 on either side of the interchange is an eight-lane freeway. However, through the interchange there are only six lanes, without shoulders, contributing to a severe bottleneck in the area.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield to me?

Mr. LOWERY of California. I yield to the gentleman from Pennsylvania.

Mr. SHUSTER. I thank the gentleman for yielding.

Mr. Chairman, I have reviewed this particular project, if I remember correctly, the I-8/125 intersection controls the only major land access from the east to service the many military bases and activities in San Diego. Completion of the interchange would greatly relieve the terrible congestion problems that exist in the area.

Mr. LOWERY of California. The gentleman is absolutely correct. In a national emergency, the present configuration would be totally inadequate.

Mr. SHUSTER. If the gentleman will yield further, there are many projects nationwide that are worthy of funding. Is it the gentleman's understanding that the State of California sees this as a priority project?

Mr. LOWERY of California. Yes, my colleagues will be interested to know that under the Brown administration, this project is considered a priority. It is also my understanding that it is approved by the San Diego Association of governments, CALTRANS, and the State transportation board. In addition, the impacted municiplaities strongly suport the project. Am I correct in assuming that this is the kind of project that the proposed change in existing law was designed to help?

Mr. ANDERSON. Mr. Chairman, will the gentleman yield to me?

Mr. LOWERY of California. I yield to the gentleman from California.

Mr. ANDERSON. I thank the gentleman for yielding.

Mr. Chairman, I have also reviewed the project to which the distinguished gentleman has referred, and agree that it is entirely appropriate that it be considered for completion under an expanded 4-R program. given the previous commitments by Governor Brown, I am certain that the State of California under the new administration will give this project priority consideration.

□ 1720

AMENDMENTS OFFERED BY MR. CONTE

Mr. CONTE. Mr. Chairman, I offer amendments, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The Clerk read as follows:

Amendments offered by Mr. CONTE: On page 12, line 14, strike "Twenty-five per centum of the" and insert "The" in lieu thereof; and

On page 12, strike all after the period in line 18 through the end of line 11 of page 13.

On page 88, strike all after the period in line 14 through the end of line 17.

Mr. CONTE. Mr. Chairman, the bill as written provides for contract authority, rather than budget authority, for substitute highway projects under the interstate transfer program; 25 percent of the funds would be allocated at the discretion of the Secretary, while the remaining 75 percent would be appropriated according to formula.

For transit projects under the interstate transfer program, the bill again provides for 25 percent of the funds to be allocated at the discretion of the Secretary, while the remaining 75 percent would be apportioned according to formula.

Mr. Chairman, the purpose of my first amendment is to prevent funding interstate transfer transit projects through the Appropriations Committee.

Mr. Chairman, it seems to me that there is a grave danger in the expansion of backdoor spending as proposed in this bill. We already face deficits of over $150 billion this year. Part of our problem is the uncontrollable nature of so many of our expenditures.

Without the opportunity for annual oversight of the Appropriations Committee, I am afraid that these pro-

grams, once underway, will continue to operate as entitlements. Without the Appropriations Committee's ability to provide annual oversight, and to adapt these programs to the individual needs of transit systems and our general economic conditions, I fear that we are setting ourselves up for another uncontrollable program.

Mr. Chairman, my second amendment would eliminate the authorization of contract authority for expenditures for transit capital projects from the transit account of the highway trust fund.

As currently written, this bill would provide for transit capital projects under contract authorizations to be spent at the discretion of the Secretary. This effectively transfers control of approximately $1.1 billion per year in transit discretionary funding from the Appropriations Committee to the administration, with only limited oversight by the Public Works Committee. This form of back-door spending authority should be eliminated.

Mr. Chairman, permitting the use of contract authorization makes the budget more and more uncontrollable. At a time when we are facing budget deficits of over $150 billion, we can ill afford this type of approach.

Last year, the Appropriations Committee spent almost 15 hours with the UMTA Administrator discussing the projects in UMTA's budget. It is critical that we retain the ability to exercise this oversight on a yearly basis. In addition, we should be able to allow for changing circumstances and adjust project funding levels to meet the individual needs of the transit systems involved. This discretion should remain with the Congress, not be delegated to this or any other administration.

Mr. Chairman, this provision raises serious questions about the ability of new rail projects or extensions of existing systems to be funded. To my knowledge, this would include such cities as Boston, Houston, Los Angeles, Seattle, San Jose, Jacksonville, St. Louis, Honolulu, San Juan, Denver, Miami, Atlanta, Portland, Baltimore, Buffalo, and San Diego. While I sympathize with the need for stable and predictable funding, back-door spending is not the way to accomplish this end. I urge the adoption of these amendments.

Mr. CONTE. Mr. Chairman, let me say—and I want Mr. HOWARD to hear this—you know, the Committee on Appropriations has been raped down through the years, and Members are going home and saying that we have to bring the budget in balance, but we can't do anything to bring this about because it is all in entitlements—or contract authority—medicare, medicaid, food stamps. Now, you are chipping away a little further with this bill.

Let me tell you, it is going to have a great bearing on whether I am going to stand here and vote for this 5-cent gasoline tax. You may be winning a great coup here today, Mr. HOWARD, but it is going to have a great bearing on the outcome of this legislation.

Mr. HOWARD. Mr. Chairman, I rise in opposition to the amendments. I would just like to state to my good friend from Massachusetts, the highway program is not an entitlement program—contract authority program. So, for him to talk about entitlement programs that can just run away with themselves, it cannot happen here. As the gentleman knows, this is a 4-year bill. We know exactly what the cost level of authorization is. So, I think the gentleman does a disservice to his colleagues to try and imply that that is not the case.

Mr. Chairman, for the interstate transit project, present law allows the appropriations process to set annual funding levels, and appropriation committees determine how these funds are apportioned to transfer cities. H.R. 6211 will still have appropriation process to determine local funding levels, but say that 75 percent of the funds will be distributed on a fair share basis among the cities in proportion to the amount of work the city must do as determined on a periodic construction schedule prepared by the Secretary. And so, the way 75 percent of this money will be given out under the present law, without the gentleman's amendment, is on a cost to complete the project, a fair share for everyone.

What the gentleman wants to do is to eliminate that and to have it up to the Appropriations Committee to give it all to Massachusetts and Boston if it wants to, and with that long list that he read of all the cities that might be involved, the only way they can be sure of getting a fair share at least of 75 percent of the money is to be able to reject this amendment and make sure that it goes out based upon the cost to complete, the money available, and not open it wide open so that it can be given all to one special area.

I think that we do a great deal of harm with this.

Another program which would apparently, as I believe, eliminate the 1 cent of the gasoline tax for the transit which I believe that is absolutely necessary. This money in transit also helps the highways. The more people who use public transportation, the more people we get off the highways. Not only will we conserve fuel, not only will we have less air pollution, but we will have fewer cars on the highways; we will have better traffic; we will have a savings on fuel; we will have better safety. I think this is all one package, and I think we should just summarily reject the one or both or en bloc amendments offered by Mr. CONTE, the gentleman from Massachusetts.

Mr. MYERS. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I reluctantly rise on this occasion, not because I have any hesitancy in supporting the amendment, but to take the time; I shall not take the 5 minutes.

But, the argument that the chairman, the gentleman from New Jersey, has used this afternoon for justification to bypass the appropriations process is one I have heard a number of times, in fact, too often. It seems to me that if this continues we might just as well abolish the Appropriations Committee. Why have the necessary hearings? Why go through the routine we do of inviting agencies that use this money and to examine after authorization the necessity for, on an annual basis, I might add, not a 4-year program as this is, but to annually review and to make certain that there still is a need or there might be a better way of accomplishing this?

□ 1730

Now, to suggest that, as our Chairman has suggested, that the Appropriations Committee might give all the money to Boston or Massachusetts, or any one else means that someone impugns the motives, if not the judgment, of the Appropriations Committee. My friend, the gentleman from Massachusetts, who is the ranking minority member of the Transportation Subcommittee of the Committee on Appropriations, and I have had some disagreements over a lot of things, but I have never seen him try to get everything for Massachusetts.

But really, I think if we are interested in protecting the rights not only of the Appropriations Committee—maybe you have no feelings toward that committee—but of the other committees, the authorizing committees, this is going to expand if we allow this to happen today.

I am not questioning the Committee on Public Works and Transportation. I know that committee does a good job, and certainly I generally support everything if does, and I do not think it is any fault of theirs that this bill has been drafted and brought together so quickly to get it through at the end of this session.

Mr. Chairman, I urge my colleagues to support the committee because we cannot just allow this to continue and continue to expand. The gentleman from Massachusetts certainly performs a very important service by offering this stopper with this amendment. I hope the Members will support it.

Mr. PURSELL. Mr. Chairman, will the gentleman yield?

Mr. MYERS. I yield to the gentleman from Michigan, who is a member of the Appropriations Committee.

Mr. PURSELL. Mr. Chairman, I rise in support of the Conte amendment.

I think to give up that legislative prerogative would be a mistake on the part of the Congress. It is a matter of policy. I think we have been fair in our distribution as members of the appropriations or authorizing committees. That is critical. I think we should keep that prerogative here at the congressional level. It is a principle here that we ought not overlook, and I think the gentleman from Massachusetts (Mr. CONTE) has offered an excellent amendment.

Mr. MYERS. Mr. Chairman, I think so. We have all seen the Budget Committee take more and more away. Again, if we are all going to go this route, why not just turn it all over to the Budget Committee and we will not need a Public Works Committee or our committee?

Mr. HOWARD. Mr. Chairman, will the gentleman yield?

Mr. MYERS. I yield to the committee chairman.

Mr. HOWARD. Mr. Chairman, I thank the gentleman for yielding.

I just want to correct one thing. It seems to the gentleman from Michigan as though we were going to change something here if we do not pass the amendment. I just want to say that if we pass the amendment, then we would take away the right of contract authority which we have had, so the change will come if the amendment passes. It is not that we are now in this bill trying to change something.

Mr. MYERS. But this is not additional tax money we are bringing in now. We have had that contract authority. But the appropriations process is being violated here, and no one can deny that.

Mr. HOWARD. Mr. Chairman, it seem that our programs have run very well in the past. Most States have said that they have been very good programs. I do not know why we want to pick on Public Works all the time to change things.

Mr. MYERS. Mr. Chairman, we are certainly not picking on Public Works. We did not bring this subject up.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Massachusetts.

The question was taken; and the Chairman being in doubt, the Committee divided, and there were—ayes 11, noes 22.

RECORDED VOTE

Mr. CONTE. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 96, noes 305, not voting 32, as follows:

[Roll No. 415]

□ 1750

Mr. ARCHER changed his vote from "aye" to "no."

Messrs. WALKER, MICHEL, EDWARDS of Oklahoma, DICKS, and FOUNTAIN changed their votes from "no" to "aye."

So the amendments were rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. WYDEN

Mr. WYDEN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WYDEN: Strike out section 147 of the amendment and insert in lieu thereof the following:

USE OF SUBSTANCES FROM RECYCLED TIRES IN PAVING MATERIALS

SEC. 147. (a) Chapter 1 of title 23, United States Code, is amended by adding at the end thereof the following new section:

"§ 157. Substances produced from recycled tires.

"(a) The Congress hereby finds and declares that it is in the national interest to

encourage and promote utilization by the States of highway and bridge surfacing, restoration, and maintenance substances or materials produced in substantial part from rubber recovered from recycled tires. Such utilization conserves energy and operates to remove old, unsightly, discarded tires from the countryside, junkyards, public parks, and recreation lands adjacent to the Interstate System, and it thereby effectively assists in the accomplishment of highway beautification and safety programs under this title.

"(b) Subject to the provisions of this section, the Secretary shall make grants to each State which adopts and implements an effective program that requires the utilization of significant volumes of substances or materials produced in substantial part from rubber recovered from recycled tires in projects for construction, resurfacing, restoration, rehabilitation, reconstruction, or maintenance on routes of Federal-aid highways in such State. Such grants may only be used by recipient States to implement and enforce such programs. The Secretary shall establish a procedure for the selection of grant applications submitted under this section. Any State may make an application under this section, and such application shall be in the form and contain such information as the Secretary, by regulation, shall prescribe.

"(c) The Secretary shall issue and publish in the Federal Register proposed regulations to implement this section not later than 90 days after the date of enactment of this section and shall issue and publish in the Federal Register final regulations not later than 60 days after the date of publication of the proposed regulations.

"(d) There is hereby authorized to be appropriated to carry out this section, out of the Highway Trust Fund, not to exceed $5,000,000 for the fiscal year ending September 30, 1983, and not to exceed $25,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, and September 30, 1985. All provisions of this chapter that are applicable to Federal-aid primary funds, other than provisions relating to the apportionment formula, shall apply to the funds authorized to be appropriated to carry out this section, except as determined by the Secretary to be inconsistent with this section.".

(b) The analysis for chapter 1 of title 23, United States Code, is amended by adding at the end thereof the following:

"157. Substances produced from recycled tires.".

Mr. WYDEN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Oregon?

There was no objection.

Mr. WYDEN. Mr. Chairman, our debate today highlights the widespread concern over continued high levels of unemployment and the deterioration of our highway infrastructure.

With these concerns in mind, I offer an amendment that will rebuild our roads in a cost-effective manner, alleviate our dependence on oil and remedy our Nation's most pressing solid waste problem: the disposal of old tires.

The amendment is simple: It earmarks a small portion of the $685 million per year paid into the trust fund from tire excise taxes to provide grants to States to establish highway rehabilitation projects that use asphalt mixed with rubber recycled from old, discarded tires. The grants—which would total $5 million in fiscal 1983 and $25 million in fiscal 1984 and 1985—would be administered by the Secretary of Transportation.

The facts—based on 8 years of study and more than 25 State demonstration projects—prove that the proposal adds up for taxpayers—and for our infrastructure.

Study after study has shown asphalt containing recycled tire rubber to be a superior, longer lived, highway paving material.

The Federal Highway Administration (FHWA) reports that after years of heavy use and observation, rubber/asphalt roads are still in good to excellent condition.

The FHWA also reports that asphalt/rubber substantially extends the service life of pavement and that asphalt/rubber is far superior to plain asphalt in the control of cracks and potholes.

The city of Phoenix, Ariz., with more than 11 years experience using rubber/asphalt, concludes that asphalt/rubber has virtually stopped maintenance costs. Indeed, they report asphalt/rubber mixtures actually improve with time whereas conventional mixtures deteoriate.

The facts also show that the amendment adds up for energy independence:

By converting to asphalt/rubber mixtures, America could reduce its dependence on crude oil—the principal component of asphalt—of which it still imports more than 4 million barrels per day.

In fact, if 25 percent of the asphalt used in 1979 for repaving roads had been replaced with recycled tire rubber, more than 7 million tons of asphalt from crude oil could have been saved and the country would have been rid of 659 million. Texas alone has reaped a 40-percent overall energy savings from the use of asphalt/rubber over conventional methods.

Finally, Mr. Chairman, the amendment adds up for financially strapped counties and cities:

By transforming one of the most distressing solid waste problems—used tires—into a national asset, this proposal will provide our cities and counties with a new raw material source for building our roads—at a savings to taxpayers.

Each year this country must dispose of 240 million used tires. Burying these tires in landfills costs our cities and counties over $100 million annually. In addition, tire disposal presents a costly and intractable problem because tires have a tendency to float to the surface and do not decompose.

By enhancing the market for recycled tire rubber we will not only alleviate the disposal problems with tires, we will provide cities and counties with a veritable gold mine in tires to be recovered from landfills and sold as a highway paving material.

Mr. Chairman, this amendment is a small but crucial step in closing an open-ended and costly loop.

It is easy to implement—the recipe simply calls for 20 to 25 percent shredded tire rubber mixed with asphalt.

It is cost effective. By cutting down on road maintenance costs, which are taking up an ever-increasing portion of our highway trust fund, and extending the life of our highways, it saves the taxpayers money.

And it is a particularly fitting solution to our decaying transportation infrastructure. How much more sensible it is to use the very tires that wear down our roads to rebuild those roads than it is to simply allow them to become eyesores along our roadsides or in our landfills.

Mr. Chairman, I believe my amendment adds up for America in every possible way. I urge adoption of the amendment.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. WYDEN. I yield to the gentleman from California. And at this time I also want to thank him for the tremendous help he has given me in preparing this amendment.

Mr. ANDERSON. I thank the gentleman for yielding.

Mr. Chairman, I will accept the amendment offered by the gentleman from Oregon, which is intended to encourage and promote the acceptance of a promising technology that may help us improve the resurfacing of our roads, conserve energy, and clean our environment.

I appreciate the persistent efforts of the gentleman from Oregon, thank him, and accept his amendment.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield?

Mr. WYDEN. I yield to the gentleman from Pennsylvania.

Mr. SHUSTER. I thank the gentleman for yielding.

Mr. Chairman, we have examined the gentleman's amendment and we support it.

Mr. WYDEN. I thank the gentleman.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. WYDEN. I yield to the gentleman from Arizona.

Mr. UDALL. I thank the gentleman for yielding.

Mr. Chairman, I strongly endorse this amendment. It is conservation in

its very best sense. I think the gentleman from Oregon has done a real public service. I am delighted to be a supporter of his amendment.

Mr. WYDEN. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oregon (Mr. WYDEN).

The amendment was agreed to.

Mr. SHUSTER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like to lend my support and make clarifications on several projects which have been mentioned by several colleagues on this side of the aisle and the other.

Congressman JOHN BREAUX has a project in this legislation which could clear up a severe problem at the intersection of College Drive and Interstate 10 in East Baton Rouge, La. I agree with my colleague that this project should be given expeditious consideration.

In section 137(b) of the substitute, there is a project intended to demonstrate the latest state-of-the-art highway technology. It is stated in this section, among other criteria, that this project should close a gap of not more than 10 miles and connect both highway construction using current technology and older completed highway construction. I agree with my colleague, Mr. ANDERSON of California, that this project should be given priority consideration and that a segment of Route 220 from East Freedom, Pa., south to the Blair County/Bedford County line qualifies for all the specific criteria in this section and shall be eligible for this demonstration project and shall be funded.

In regard to discretionary bridges, I would like to make reference to those bridges mentioned by the committee in House Report 97-555. I agree with my colleagues that these bridges should be given priority consideration.

I also want to make it clear that the committee intends that the relevant legislative history in House Report 97-555, including sections 105, 107, 118, 120, 127, 133, and 137 of such report, to the extent that the provisions of H.R. 6211 as reported are not inconsistent with such bill as amended by H.R. 7360, concerning special concerns and priorities apply to the appropriate provisions in our substitute.

I also want to note that the committee will be publishing a revised table of priority primary routes. This table will include the state of Franklin Road in the vicinity of Johnson City, Tenn. This matter was brought to our attention by the distinguished gentleman from Tennessee, JAMES QUILLEN, and I am most pleased that we have been able to take care of this important matter.

Also, there are several of my colleagues who have expressed a concern about bridges in their respective districts which should receive priority consideration out of the discretionary bridge program. I agree with Congressman TOM BLILEY that the Robert E. Lee Bridge spanning the James River at Richmond, Va., meets the criteria under the program and should be given priority consideration for funding. I would wholeheartedly agree with my colleague from California, Mr. CLAUSEN, that the Russian River Bridge near Cloverdale, Calif., receive priority funding under the discretionary bridge program and priority consideration should be warranted as referenced in section 127(b) of the substitute.

In addition, I would agree with ROBERT MICHEL, the distinguished minority leader, that the Franklin Street Bridge in Peoria, Ill., should be given priority in the allocation of discretionary bridge funds. The Franklin Street Bridge is in serious need of replacement because it is a narrow two-lane bridge serving 12,000 vehicles daily and has been closed frequently for repairs.

Furthermore, I would agree with Congressman DAVID EMERY that the Cook's Corner Bridge over the Androscoggin River between Topsham and Brunswick, Maine, should be given priority consideration in the allocation of discretionary bridge funds.

Congressman TRENT LOTT has also expressed his concern about two critical projects in Mississippi. I agree with Mr. LOTT that the Fort Bayou Bridge and the Moss Point-Escatawpa Bridge qualify under the discretionary bridge program and should be given priority consideration. The Fort Bayou Bridge would need $10.3 million and the Moss Point-Escatawpa Bridge would need $27 million.

Finally, Congressman TOM HAGEDORN of Minnesota has brought to the committee's attention the need for reconstruction of the Wabasha Bridge over the Mississippi River connecting Minnesota and Wisconsin via Fap Trunk Highway 60. I agree with the Congressman that this project should receive priority consideration and funding under the discretionary bridge program. The cost of the bridge to be shared equally with Wisconsin, is $18.4 million. Additionally, Minnesota's approach cost is $2.25 million, bringing the total Minnesota cost to $11.45 million.

In regard to interstate transfers, I have spoken with the gentleman from Virginia, Mr. WOLF, and agree with him that the project providing for the withdrawal of funds from the I-595 project and transfer to improvements to U.S. Route 1 from I-395 to Route 120 should receive priority consideration and approval.

This bill omits the provision contained in section 138 of the substitute requiring an investigation by the Comptroller General into competitive bidding practices with respect to highway and mass transit construction in this country. Our sole reason for dropping this provision is that it has proven to be unnecesssary. This is because, since the time our highway legislation was first developed this past spring, the study has been requested and is now underway.

Prior to the October 1 adjournment of the regular session, the deletion was discussed by both the House and Senate sides with full agreement that, whether initiated by statute or otherwise, this investigation is urgently needed, has the support of both the House and Senate committees, and should be completed expeditiously.

The purpose of the language in section 112 of the substitute dealing with resurfacing standards under Section 109 of Title 23, United States Code, is to assure that enhancement of highway safety result from the carrying out of any project for the resurfacing, restoring, or rehabilitation of any highway. The intent of this provision, moreover, is to provide some flexibility to the States in the degree of safety improvement which reasonably can be required in the circumstances of a given project. It is explicitly not the intent of the committee, for example, that new construction standards necessarily be applied in every case.

One final point on this provision: It is further the intent that adequate opportunity for public participation be provided as standards mandated under this provision are developed to the point of approval by the Congress.

Congressman JACK BRINKLEY has been instrumental in calling to the committee's attention, the 13th Street Viaduct Bridge in Columbus, Ga. The bridge is a vital link in an east-west transportation corridor which facilitiates the movement of interstate and intracity traffic. Replacement of the bridge is essential for two reasons. The bridge is in a state of disrepair resulting from 57 years of service. If the bridge were to be declared unsafe and placed out of service, the disruption to traffic flow and the progress of commerce would be severe. Second, the existing viaduct no longer meets the necessary traffic capacity standards. Traffic volume presently exceeds 20,000 vehicles per day. The Columbus-Phenix City transportation study calls for additional reliance on the 13th Street corridor for east-west traffic movement. A multilane replacement of the existing viaduct is imperative to provide necessary traffic capacity. The existing 13th Street Viaduct Bridge has a sufficiency rating under 50 and an estimated replacement cost of $13.8 million. The committee believes it should receive priority consideration under the discretionary bridge program.

Similarly, the Green Bridge in Manatee County, Fla., qualifies under the

discretionary bridge program. It has a sufficiency rating of 28.7, and will cost $16.1 million to replace. It is structurally deficient, functionally obsolete, and yet vitally important to surface transportation in the county. The Green Bridge should receive priority consideration when discretionary bridge funds are distributed. The committee wishes to thank Congressman IRELAND for his tireless efforts on behalf of this project.

Congressman SHAW has expressed a great concern over the availability of section 402 funding for safety projects related to motorcycle, bicycle, and pedestrian safety. It should be made quite clear that the States may apply for such funds. We are concerned, however, that the States may be laboring under the false impression that these programs are not eligible for funding despite the fact that they have proven successful and effective, and are certainly eligible for funding under requirements set forth in the Code of Federal Regulations.

I would also like to bring to the Members' attention an accelerated construction project and demonstration project for Primary Route 841 known as the Jefferson Freeway. The project would be located between Route 60/31W and Interstate Route 65 in the vicinity of Louisville, Ky., and would fit the criteria established in section 137(e) of the substitute to H.R. 6211. It also should be mentioned that Route 841 in being added in its entirety to the priority primary list of projects.

At the request of the distinguished chairman of the House Ways and Means Committee, I agree that three bridges in Illinois should receive priority consideration. Those bridges are the Dan Ryan, Clark, and Staley Viaduct.

Congresswoman BARBARA KENNELLY has brought to this committee's attention a comprehensive interstate project to complete and improve the interchange of I-91 and I-84 in Hartford, Conn. The structurally deficient bridge program is an essential element of the comprehensive project. The committee believes the Charter Oak Bridge should receive priority consideration when discretionary funds are distributed.

Also, Congressman PANETA has brought to the attention of the committee State Route 101 from Monterrey Street and Gilroy, Calif., to Russell Road in Salinas, Calif. I believe this route qualifies to be added to the priority primary program.

In addition, Congressman FAZIO requests that Highway 99 in Sacramento, Calif., be designated as priority primary. This highway is a 13-mile stretch of roadway north from Interstate 5 to where Highways 99 and 70 divide.

AMENDMENT OFFERED BY MR. DONNELLY

Mr. DONNELLY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DONNELLY: Page 22, line 2, after "highways," insert the following: "which study shall include a study of the cost effectiveness of the hot dip galvanizing process for the installation, repair, or replacement of exposed structural and miscellaneous steel,".

Mr. DONNELLY. Mr. Chairman, the amendment which I am offering today is of a technical nature and does not call for additional funding. Section 112 of H.R. 6211 requires that the National Academy of Sciences conduct a study to assess the cost effectiveness of new construction and reconstruction standards that could be applied to projects. My amendment would simply include the review of the cost effectiveness of the hot dip galvanizing process. A National Bureau of Standards study stated that corrosion costs the United States an estimated $123 billion in 1981. It was further estimated that 15 percent of the total loss due to corrosion, or $18.5 billion, could have been avoided by making use of the available corrosion-control techniques.

Hot dip galvanizing is an effective and widely applicable corrosion control technique, yielding long lasting rust prevention for steel. The life expectancy of galvanized steel is up to 50 years more than conventional products and would protect the investment made into our Interstate System. NASA engineers have used galvanized steel in many sections of the Space Shuttle which upon takeoff suffers 100 years of corrosion every 30 seconds. I believe that it is time to use this same technique on our transportation system, to save the Congress from reestablishing programs to rebuild our roads every 15-20 years.

Once again, I would like to point out that my amendment does not call for a new study or additional funds but simply requires that the authorized study review a procedure which has proven to save billions of dollars.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. DONNELLY. I yield to the gentleman from California.

Mr. ANDERSON. I just would like to inform the gentleman, we have no opposition to his amendment and accept it.

Mr. DONNELLY. Mr. Chairman, I thank the gentleman for his interest.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield?

Mr. DONNELLY. I am more than happy to yield to the ranking minority member.

Mr. SHUSTER. We have examined this amendment and believe it is a good amendment and we support it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts (Mr. DONNELLY).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. SHAW

Mr. SHAW. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SHAW: Page 33, line 10, strike "Subsections (a)" and all that follows through the period on page 39, line 8. Insert in lieu thereof the following:

Section 131 of title 23 United States Code is amended by inserting the following new subsection:

"(r) The Secretary shall submit to the Congress, not later than one year from the date of enactment of this legislation, a study:

"(1) regarding the effectiveness of the Federal Highway Beautification Act in controlling and removing outdoor advertising signs, displays, and devices in areas adjacent to the Interstate System and the primary system for the purposes of protecting the public investment in such highways, promoting the safety and recreational value of public travel, and preserving natural beauty, and;

"(2) in preparation for the possible deregulation of the Federal Highway Beautification Act, the responsibilities of federal, state, and local governments in the control and removal of outdoor advertising signs, displays, and devices in order to provide an effective and responsive highway beautification program, and;

"(3) possible administrative improvements and alternative funding methods for removing nonconforming compensable outdoor advertising signs, displays, and devices, and;

"(4) any other aspect deemed appropriate by the Secretary of Transportation regarding the Highway Beautification Act."

Mr. SHAW (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. SHAW. Mr. Chairman, in the debate on the bill, I made reference to section 131, the Highway Beautification Act.

I would like to take a few minutes to tell this body exactly what the existing law is that has been on the books since 1965 and has served this country well. It provides that each of the States is by agreement with the Secretrary of Transportation to set up certain guidelines which in effect regulate the placement of billboards on the interstate system. In doing so, it recognizes the responsibility and intention of this Congress as set forth in the opening paragraph that was just restored by an amendment that was made and passed by the gentleman from Georgia (Mr. LEVITAS).

In doing so, we have enacted a set of laws which are not necessarily on the State statutes of the States of this country.

Now, let us take a minute to examine exactly what the new law would do

that I am trying to amend out of the bill and revert back to the old law.

The new law would completely erase these agreements and make them null and void. Also it instructs the States under certain guidelines that are set forth in the new act, to come up with a new set of statutes which shall be certified by the Federal Government.

Now, in the period of time between the enactment of this act and the certification, it is my opinion that the country and the various States of this country may be totally without any regulations for the placement of billboards on the interstate and federally funded highway systems as they exist now.

Further, this puts an additional burden upon the various States. It requires the States to leave a clear and unobscured vision for the motoring public of the billboards placed along the interstate system.

Now, let us take an example of what that might mean to your particular State. If your State comes along and allows a tree or plants a tree which obscures the view of a billboard, it has to do one of three things: Either it has to justify that this is part of a general landscape system, which might be very hard to do particularly in the country areas, or it has to buy the billboard; that is, to pay the billboard company the fair market value of that billboard, and I can tell you, the billboards along the interstate system are worth tens of thousands of dollars because of their advertising value; or it has a third alternative and that is to cut down the tree.

Now, let us see what else this provision does. This new act would require the various municipalities and States of this country, in addition to setting forth the criteria for obstructing billboards and the penalties of the various States, it also grandfathers in for all time the billboards that are erected under present law or future law.

Now, let us examine what exactly this does. Under our present law, if a city or a State were to change various ordinances or statutes which would change the placement of billboards, then the billboards would be allowed to stay there until they were taken out by an act of God, hurricane or storm or whatever or simply deteriorated and rotted fell to the ground. This bill says, no. It says even under an act of God, the States or the cities will have to either allow these billboards to be replaced, or they will have to compensate the owners of the billboard for the fact that they are not allowed to put these billboards back into place. These are just a few of the fishhooks that are replete throughout this provision.

Now, I would also like the full Congress to know exactly how much testimony the Public Works and Transportation Committee had on this particular provision. I have searched my own memory and I have also searched the records of the Public Works and Transportation Committee and I am only aware of one witness, one witness who has come before that very important committee to testify on this particulary issue and this particular witness, as I recall, was representing the camping industry, which has some gripe with a particular section of some State's agreement which provided for the placement of his camping signs sending the motoring public to his campground.

I also very vividly recall the amount of time that the committee spent on this bill and I do not believe it was even 5 minutes. I am talking now only about the highway beautification provision.

The amendment that I have provided would go back and retain the existing law.

The CHAIRMAN. The time of the gentleman from Florida has expired.

(By unanimous consent, Mr. SHAW was allowed to proceed for 1 additional minute.)

Mr. SHAW. In addition, my proposed amendment would instruct the Secretary of Transportation to do a study and report back in concert with the Public Works and Transportation Committee, come in with an evaluation as to what we have accomplished or failed to accomplish under the Highway Beautification Act and then bring it back to the Public Works and Transportation Committee for further action in next year's session.

A lameduck session with the pressing business that is coming before this Congress in my opinion is no time to eliminate 20 years of work and eliminate the highway beautification bill as it presently stands.

Mr. HOWARD. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to discuss with the gentleman from Florida his amendment, which we understand would require a study of the several things that he lists here.

The gentleman mentioned that it also maintains the existing law, which we do not see here in the amendment.

I would like to ask the gentleman, does the gentleman mean that it does not change any of the language that was placed in this legislation, but would require a study?

□ 1810

Mr. SHAW. The legislation that I am striking strikes the existing legislation, but by getting rid of this provision of the amendment we would go back to the old law.

Mr. HOWARD. We would go back to where we are. This means we go back to where we were and where we are now.

Mr. SHAW. Yes; that is absolutely correct.

Mr. HOWARD. I thank the gentleman.

Mr. Chairman, in October of 1965 this Congress passed the so-called beautification legislation with relation to billboards, among other things. For several years, this legislation worked quite well.

It is estimated that because of this legislation, there have been about half a million billboards taken down in this country. There have been about a million billboards that might have gone up that have not gone up. However, during the past several years, we have seen that the Federal Government has been unwilling to appropriate money to pay the 80-percent Federal cost.

Here is where we have been the last several years with the beautification program that we brag about: It is estimated that the cost to do the complete job throughout the country is about $1 billion. The Federal share of that would be $800 million. The Congress has been appropriating about $500,000 per year for this program, so that means that all the illegal billboards in this Nation will be down in 1,600 years.

This administration's budget—the last two budgets of this administration—which the gentleman from Florida supported, provided no money to take down the billboards and, therefore, no billboards would come down.

Many States wish to move on their own, with their own dealings with the billboard operators. Compensation must be paid; there is no doubt about that. It is a constitutional right. The Government may not take private property unless the person is compensated.

If we build a highway and it goes through a house, we take that property but we must compensate for it. The courts protect that right. But many States wish to go on their own. We in this legislation permit that.

One thing that the billboard people wanted that they did not get was a change in the criteria. Whatever the States do, whatever deals they make, whatever progress they make in taking down billboards, they may not change the criteria. Any billboard that is illegal under our Federal law today remains illegal and must come down. The States may not do anything to permit a billboard to go up where one would not be permitted to go up at this time.

I think it is a farce. I think that it is not to the credit of the Congress nor our committee to go around saying that we have a billboard removal program when we know, if the Congress keeps doing what it does, it will take us 1,600 years to take them down, and if we do what this administration's budget has wanted to do, we would not take any more down at any time.

We are on our way to at least getting part of the job done. Let us stick with the committee, reject this amendment, and admit that we are not doing the job here in the Congress.

I urge a "no" vote on this amendment.

Mr. SHAW. Mr. Chairman, will the gentleman yield to me?

Mr. HOWARD. I yield to the gentleman from Florida.

Mr. SHAW. I thank the gentleman for yielding.

Mr. Chairman, in my statement I made reference to the fact that many of the States were not aware of this and were simply not prepared with a statute that in any way followed the guidelines as set forth in the amendment which is part of the public works bill.

I would like to ask the chairman, in his opinion, upon the enactment of this bill, what would happen?

The CHAIRMAN. The time of the gentleman from New Jersey (Mr. HOWARD) has expired.

(By unanimous consent, Mr. HOWARD was allowed to proceed for 1 additional minute.)

Mr. HOWARD. Mr. Chairman, I yield to the gentleman from Florida.

Mr. SHAW. I thank the gentleman for yielding further.

If I could ask the chairman's opinion, what law would govern in the event the States were not ready to take on this responsibility? Is it not possible that we might have a situation where it is open season on the placement of billboards?

Mr. HOWARD. No.

Mr. SHAW. If the gentleman would yield further, there is no law on the books to take care of that?

Mr. HOWARD. No, no. What would happen if the States are not ready is to continue what we are doing now? At least there will be a chance for some States to move ahead. But where we are now, what we are looking at now is 1,600 years to get them, now. But the States would not be in a position of changing the criteria or being able to permit any billboards to go up in any other areas. That Federal criterion stays as is in the language of the bill now.

So we are not weakening this provision at all, I say to the gentleman; we are not.

Mr. SHAW. Mr. Chairman, if the gentleman will yield further, what is the chairman's position?

Mr. HOWARD. That the States will do a better job than we will. I am sort of a "States Rightist," as you may well know. I would like to give them a crack at it since we have been so unsuccessful.

Mr. SHAW. Mr. Chairman, if the gentleman would yield further, I would be the first to agree with the chairman that the States can do a better job, but the States have no idea what we are doing here and are in no way ready to accept the responsibility.

The CHAIRMAN. The time of the gentleman from New Jersey (Mr. HOWARD) has again expired.

(By unanimous consent, Mr. HOWARD was allowed to proceed for 1 additional minute.)

Mr. HOWARD. Mr. Chairman, I met with the Governor of Florida last week; I met with the transportation leaders of Florida last week, and with the two prior amendments that were passed earlier this evening, the State of Florida has indicated that they are in total support of this legislation as it stands at this moment.

Mr. SHAW. Mr. Chairman, will the gentleman yield to me?

Mr. HOWARD. I yield to the gentleman from Florida.

Mr. SHAW. I thank the gentleman for yielding further.

Mr. Chairman, I met with the Governor after the gentleman from New Jersey did, and he was not aware of what this particular provision was because I discussed it with him and he asked me to keep him advised.

Mr. HAGEDORN. Mr. Chairman, will the gentleman yield to me?

Mr. HOWARD. I yield to the gentleman from Minnesota.

Mr. HAGEDORN. I thank the gentleman for yielding.

Mr. Chairman, I want to concur with the position of the chairman of the committee. I think the State highway commissioners and the Governors know full well what is being done. I think the American people recognize that nothing is being done by the Congress, nor will it be done in regards to the funding of this program.

What we are doing is turning the proper responsibilities back to the States. If they want to provide just compensation and move forward, they can.

Mr. HOWARD. And, of course, the people and the businesses will be protected under their institutional rights in the courts, also, and the Federal criteria remain.

The CHAIRMAN. The time of the gentleman from New Jersey (Mr. HOWARD) has again expired.

(By unanimous consent, Mr. HOWARD was allowed to proceed for 1 additional minute.)

Mr. CLAUSEN. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I yield to the gentleman from California.

Mr. CLAUSEN. I thank the gentleman for yielding.

Mr. Chairman, I do concur with the gentleman's statement. I am concerned about the fundamental constitutional issue of just compensation. Compensation has to be followed all the way through the process, be it Federal or State levels, in order to give people that have the investment in these kinds of facilities the right to be paid for a public taking.

Mr. HOWARD. No matter what we want to do, we in the Congress cannot take constitutional rights away from people.

Mr. SHAW. Mr. Chairman, will the gentleman yield further to me in order that I may address a question?

Mr. HOWARD. I yield to the gentleman from Florida.

Mr. SHAW. I thank the gentleman for yielding further to me.

Mr. Chairman, I think the question of just compensation here is being abused as the Constitution provides for. There is no right for all time under any zone ordinance, as construed by the Constitution, to have a billboard that is legal in 1982 there in the year 2082, and that is exactly what the language of the gentleman in the well would do.

Mr. HOWARD. No.

Mr. SHAW. It completely undercuts any powers that the States or local governments would have, and even an act of God cannot take them away.

Mr. HOWARD. I assure the gentleman that the courts will protect the people if the Congress or the States will not.

Mr. BREAUX. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I will not belabor the point. What we have here is an effort by the gentleman from Florida to do what normally may be something that is needed and accepted; that is, where we have a problem, let us authorize a Federal study.

In this case, this is an issue that not only has the Department of Transportation studied, but this Congress indeed has studied since 1965. Not only have we studied it, our committees have debated it, and this House has debated this issue extensively in the past.

In 1978, we had several hours of debate on the floor about what to do with billboards. This Congress at that time made a decision to say very simply that some billboards are going to be illegal. In those areas where they are illegal, they are going to be taken down. But we cannot take those pieces of property down without paying just compensation for them.

□ 1820

So, Congress in fact has studied this issue and we have made a decision. Signs that intially are lawfully erected will have to be compensated if they are going to be taken down. So, I think we have studied the issue, and I think to ask the Federal Department of Transportation to go through another study, go through the expenditure of studying an issue which we have already studied, is really wasteful and certainly is not going to shed any new light on something we have already decided on.

So, I urge rejection of the gentleman's amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida (Mr. SHAW).

The amendment was rejected.

AMENDMENT OFFERED BY MR. MITCHELL OF MARYLAND

Mr. MITCHELL of Maryland. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MITCHELL of Maryland: Section 105 of the Act is amended by adding at the end thereof the following new section:

Section 105(7)(e). Notwithstanding any other provision of the law not less than 10 percent of the amounts authorized to be appropriated under this Act shall be expended directly with small business concerns owned and controlled by socially and economically disadvantaged individuals as defined by section 8(d)(3) of the Small Business Act (15 U.S.C. Section 637(d)(3)) and relevant regulations promulgated pursuant thereto.

Mr. MITCHELL of Maryland. Mr. Chairman, I hope not to take the entire 5 minutes. When this body considered the Public Works Act in 1977, it acted almost unanimously to set aside for small and disadvantaged, economically disadvantaged businesses, a set-aside to insure the participation of the businesses in these massive public spendings. That is all I am attempting to do in the amendment that is before the Committee.

I would simply like to indicate that, based on the experience of the Public Works Act of 1977, the amendment met with enormous success. There was a test as to its constitutionality. The Supreme Court in 1980 upheld the constitutionality of it. That is all we are dealing with, is a set-aside for small and disadvantaged businesses in this amendment.

In light of the disproportionate unemployment enjoyed by minorities as of this time, and in light of the success of the public works amendment in mixing together county, State, and local governments with minority business provisions, I would urge the passage of my amendment.

Mr. Chairman, I certainly share the deep concern of State and local elected officials, my colleagues, and constituents about the critical unemployment levels which continue to haunt this Nation.

Just last week, the November unemployment figures were released; 10.8 percent of Americans are out of work. This translates to approximately 12 million Americans who have no hope of providing their families with the necessities of life. Mr. Chairman, while 10.8 percent of Americans are without jobs, the percentage of unemployed black American adults is at an atrocious level of 20 percent. This percentage is low because it does not recognize the millions of individuals who have given up total hope and thus are no longer seeking employment.

It is projected that the measure before us today will create nearly 300,000 jobs. I am deeply concerned that the twin forces of racism and economic discrimination will once again raise their ugly heads. Of course, this will result in a few blacks and other minorities being part of this employment rejuvenation program.

Mr. Chairman, the above exclusionary scenario does not have to become a reality. Yes we have the power within our grasp today to provide blacks and other minorities with a hope for the future. In 1977 with my amendment to the local public works program we gave hope to the less fortunate in this Nation by requiring a 10-percent set-aside for minority contractors. Over $600 million were awarded to minority businesses and this resulted in the creation of many jobs for the minority population. Today, I present to you a similar amendment. This amendment requires that not less than 10 percent of the amounts, authorized to be appropriated under the Surface Transportation Act of 1982, shall be expended directly with small business concerns owned and controlled by socially and economically disadvantaged businesses.

Mr. Chairman, earlier this year, this body debated a small business legislative initiative. I am confident that you and our colleagues are aware of the major contributions such businesses have made to job creation. As far as I am concerned, the scenario is clear and simple—if you want to create jobs then give the responsibility to the segment of our economic system that has the proven track record, the small and minority business community. The small minority business community can play a major role in assisting this Nation to reduce the 20-percent black unemployment figure.

I urge my colleagues to support my amendment; for in supporting it, you are indeed making a commitment to get this country working again.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Maryland (Mr. MITCHELL).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. SIMON

Mr. SIMON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SIMON: At the end of title I, add the following new section:

DEMONSTRATION PROJECTS—RAIL HIGHWAY CROSSINGS

Sec. 155. Section 163(p) of the Federal-Aid Highway Act of 1973, as amended, is amended by inserting after "1982," the following: "and $50,000,000 for the fiscal year ending September 30, 1983, and $50,000,000 for the fiscal year ending September 30, 1984, and $50,000,000 for the fiscal year ending September 30, 1985, and $50,000,000 for the fiscal year ending September 30, 1986," and by adding at the end thereof the following: "Notwithstanding any other provision of this section, any project which is not under construction, according to the Secretary of Transportation, by September 30, 1985, shall not be eligible for additional funds under this authorization."

Mr. SIMON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. SIMON. Mr. Chairman and my colleagues, this amendment attempts to preserve the railway demonstration project that affects some of the districts in this Nation. My colleague from Indiana (Mr. MYERS), my colleague from Louisiana (Mrs. BOGGS), and some of the other Members of this body are affected. It does not preserve it at the present level. It brings it from $100 million a year authorization, down to $50 million, and says that projects not under construction by September 1986 will be phased out. So, there is a sunset provision.

What we have are railway demonstration projects involving highways where communities have had Federal funding, and they have moved ahead, and now without this amendment there is the danger that they would be cut off.

Now, I recognize what the committee has done, and that is to provide 95 percent funding on these projects, and that sounds good and I hope that will protect us. I have today talked with the Governor of Illinois and the very able Secretary of Transportation, John Kramer, on this matter, but even if I am protected there may be some communities in other States that are not projects that are halfway down the road. Once we authorize these kinds of projects, it seems to me it is only fair and equitable that we permit the conclusion of them.

I would also add two other factors. One, this was defeated by amendment in the committee—it was an 18 to 18 vote, with the majority of those present voting for the amendment. So this is a very, very close matter.

Finally, while we authorize this here, this leaves it up to the Appropriations Committee, the very point made by the gentleman from Massachusetts (Mr. CONTE) earlier and it gives the flexibility to the Appropriations Committee. I would urge my colleagues in the House to accept this amendment.

Mr. BARNARD. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I will be pleased to yield to my colleague from Georgia.

Mr. BARNARD. Mr. Chairman, I want to thank the gentleman for yielding, and certainly thank him for bringing this very, very important

needed development back into this particular legislation.

In the gentleman's amendment, does this include all of the original demonstration projects that were authorized, or how does this work?

Mr. SIMON. It does. It leaves it open to the community in the gentleman's district, so long as that community acts, has it under construction by September 1986. We do have a sunset provision. We also cut back the total appropriations authorized from $100 million a year down to $50 million, because on the basis of what we know now, we do not believe the larger authorization is needed.

Mr. BARNARD. I thank the gentleman.

Mr. BEREUTER. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield.

Mr. BEREUTER. Mr. Chairman, I thank the gentleman for yielding. I commend him on his initiative and his vigor in continuing to pursue this point. I would have to say, I think without fear of being refuted, that my predecessor from the State of Nebraska, colleagues in both bodies in this Congress, probably had a more active role in achieving this authorizing legislation than any other State. We have had a substantial commitment of planning and legislative action in my home State on the designated demonstration project in Lincoln, Nebr.—all in anticipation of eventually having some benefit from this particular authorizing legislation. Yet the delegation most responsible for the authorizing legislation continues to have its designated project languish unfunded.

Now that we have made this kind of legislative and fiscal commitments on the part of our State and the city of Lincoln, we are left with the possibility of no certain funding from the Federal Government. So, I think in short, that a commitment has been made to variety of designated demonstration projects designated in the past; therefore, it is, I believe only equitable that there at least be some result from those State and local commitments in the designated demonstration projects.

I thank the gentleman for yielding to me at this point.

Mr. SIMON. I thank my colleague from Nebraska, and I appreciate his point.

Mr. MYERS. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to my colleague from Indiana.

Mr. MYERS. Mr. Chairman, I thank my friend from Illinois for yielding, and I thank him for his amendment. We did have a discussion earlier between the gentleman from Illinois and myself about this problem, and had an earlier colloquy with the chairman of the committee, who assured us that the original—I believe 21 demonstration projects——

Mr. SIMON. Nineteen.

Mr. MYERS [continuing]. Lack of local support, funding, or other problems have possibly reduced this more.

□ 1830

So we do not need the same number of dollars, and it seems to me that the amendment the gentleman from Illinois (Mr. SIMON) has offered here responds to all the questions and all the reasons why the committee might oppose.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. SIMON) has expired.

(By unanimous consent, Mr. SIMON was allowed to proceed for 2 additional minutes.)

Mr. MYERS. So, Mr. Chairman, I think the amendment the gentleman from Illinois (Mr. SIMON) is offering here is one that we certainly can live with, and I hope the committee will accept it because it carries forth in spirit what the intent of the act was back in 1973.

Even though the chairman of the subcommittee earlier confirmed these projects that had been identified back in 1973 were continued to be authorized, there might be some question as we move along because this act does not specifically up to this point designate these projects. The language in the gentleman's amendment keeps them alive and provides, if they start to construct in a reasonable time, in 1986, they continue to be authorized. That gives an opportunity to the communities to continue these projects, many of whom have spent so much money in engineering plans, construction, buying property, and so forth, and many of them have already given up, so this is certainly a reason why the committee ought to accept the amendment.

Mr. ANDERSON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, in our committee we had a record vote against the railroad demonstrations. The gentleman may ask, why? The reason is because we thought the solution we were offering was a better solution for the gentleman from Illinois (Mr. SIMON) and the others because there are 18 demonstration projects.

The total cost of these is over $1 billion. The Federal Government cannot possibly find the resources to finance them as individual items, and so we suggested that if the State or local agency wished to go on with their project and wished to use some of their own allocated money, either from the primary, secondary or urban apportionment, we would let them have it at a 95-to-5 match, which is extremely favorable. Right now the primary, secondary, and urban systems match is at 75 to 25.

So this does make money available. If a State thinks that a project is of such high priority, it can take that money they are getting for work on the system and use it with a 19-to-1 match.

I might also say that we have had most of these 18 demonstration projects on the books since 1973, and very little money has gone out in all this time. So, the present program is not even working. We think ours will, because in recent years, there has been very little money actually going to these projects.

We think our solution, allowing States to use their apportionments with a 19-to-1 match, is a much better inducement to get these railroad demos built, than would reauthorization of the separate category.

Mr. SIMON. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. I yield to the gentleman from Illinois.

Mr. SIMON. Mr. Chairman, I thank the subcommittee chairman for yielding, and I appreciate the fact that the committee has been sensitive to this.

But I think the problem is a little complicated from the viewpoint of those of us who are involved in our communities. As I indicated earlier, I have today talked to the Governor of Illinois and the Secretary of our transportation system, and I think probably the gentleman's formula will protect me, although I hate to take that chance because we have forced businesses to move and done some things like that. And if this protects me, I do not know if it is going to protect Savannah, Ga.; I do not know if the gentleman is going to protect a community in Indiana or Nebraska or somewhere else. And there is a Federal commitment here.

Second, when the gentleman talks about $1 billion, my amendment limits it to $50 million a year for the 4-year period. So we are talking about a substantial reduction here.

So, Mr. Chairman, I would urge the House to seriously consider what I think is a sensible amendment.

Mr. ANDERSON. Mr. Chairman, I might point out to the gentleman that under the Howard amendment to bring all States up to an 85-percent return on their dollar, Illinois will receive an additional $65 million. It would seem to me that out of that $65 million, when you are getting money on a 19-to-1 match, you ought to be able to build this project. I think we are being pretty reasonable on this.

Mr. SIMON. Mr. Chairman, again, if the gentleman will yield, I think frankly that I am protected, but I am protected a little more with my amendment. However, I think some of the other communities are not as ade-

quately protected, and I hate to see the Federal Government make a commitment and say, "sorry, fellows, we are backing out of our commitment."

Mr. MYERS. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. I yield to the gentleman from Indiana.

Mr. MYERS. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I have sympathy with what the subcommittee chairman is saying. As to the community that the gentleman from Indiana (Mr. FITHIAN) and I share and are talking about here, I have told those people that as far as I am concerned, they are going to have to wait until we get a balanced budget before we advance the money from here. But in line with what the gentleman from Illinois said, Carbondale and others have already started their projects. They have done their part. They have made sacrifices, and now we come along and change the rules after they have spent considerable time and money and effort toward solving their problem. It seems to me that we are changing the rules in the middle of the game.

Mr. ANDERSON. But we are giving them a 95-to-5 match.

Mr. MYERS. But these were demonstration projects, and the local community has in kind offered to do their share and now we are changing the rules in the middle.

Maybe this will be faster, that is, the 95 to 5. But what the gentleman from Illinois and some of us are trying to do is to protect these communities and make certain, without any question, that they are grandfathered in, for want of a better word, and that they will be protected and get those projects started, either in planning, engineering, and/or construction. This is the only thing we are trying to accomplish.

I am sure the gentleman's committee and those of us who support the amendment want to get to the same place. I believe this option does not preclude anything, and it does not cut off anything.

Mr. Chairman, I think the better approach is to accept the amendment offered by the gentleman from Illinois (Mr. SIMON).

The CHAIRMAN. The time of the gentleman from California (Mr. ANDERSON) has expired.

(On request of Mr. BARNARD, and by unanimous consent, Mr. ANDERSON was allowed to proceed for 2 additional minutes.)

Mr. BARNARD. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. I yield to the gentleman from Georgia.

Mr. BARNARD. Mr. Chairman, would the gentleman clarify for me now what the difference is? I am gaining the impression that in the bill these construction projects are no longer authorized. Is that my understanding?

Mr. ANDERSON. They are eligible for Federal assistance, but there is no separate authorization as in the past.

Mr. BARNARD. They are not designated as they were in the original highway bill as individual demonstration projects.

Mr. Chairman, I would have to reiterate what my friend, the gentleman from Illinois (Mr. SIMON), has said about this. My State has put far more money into the demonstration project in Augusta, Ga., than the Federal Government has, and it just seems unfair to me at this point in time to put all of them in the same kettle when we have been laboring under the apprehension since 1977 that we were included.

We have got some small funding in 1978, 1979, and 1980, but the bulk of the funds has come from the State of Georgia, and I would hope that some consideration could be given to this, because anything the State has put into it up to now, unless we continue to have it designated as a demonstration project, is going to be of no avail.

Mr. ANDERSON. Mr. Chairman, does the gentleman not think we have been pretty reasonable by allowing these projects to be built with a 95-to-5 match: That is almost 100 percent. If a project has such a high priority and is so important I would think a Governor could come up with 5 percent.

Mr. BARNARD. It is already 95 to 5, but it is designated.

Mr. ANDERSON. It is taking money that we have currently in the bill, and that is primary and secondary and urban moneys. They go out on a 75-to-25 basis. We are taking that same money and saying, "You can have it at 95 to 5."

Mr. BARNARD. It was amended in 1977 for 95 to 5.

Mr. ANDERSON. But I point out that you are not getting very much, because you need to spend a billion dollars that we do not have to spend and you have to take it out of revenues that we do not have. There are 18 demonstration projects, and I am sure every one of them is worthy.

Mr. BARNARD. So what the gentleman is saying, then, is that the funding would come out of the trust fund?

Mr. ANDERSON. It would come out of the money the States are currently entitled to. If they think there is a high enough priority, they could take it out of the primary, secondary, and urban money on a 95-to-5 basis.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. BARNARD, and by unanimous consent, Mr. ANDERSON was allowed to proceed for 1 additional minute.)

Mr. BARNARD. Mr. Chairman, if the gentleman will yield, the thing that disturbs me is that these projects that have already been identified and are receiving some funding would not get any priority or preference over brand new demonstration projects; is that not true?

Mr. ANDERSON. That is right, yes. But it would be up to the States to set their own priorities.

Mr. BARNARD. Mr. Chairman, I would say again that I can go along with the gentleman on the amendment to the point of what he is trying to accomplish, but I would at least like to protect those demonstrations that are in there.

Mr. ANDERSON. But where is the gentleman going to get the money?

Mr. BARNARD. I do not want to rewrite the amendment, but I would hope that the subcommittee chairman could reconsider and accept the amendment offered by the gentleman from Illinois (Mr. SIMON), because I would think that would clarify the program and we would have helped ourselves to get the funding.

□ 1840

Mr. BLILEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to engage the gentleman from Pennsylvania (Mr. SHUSTER) in a colloquy if I might.

I wonder if the gentleman could corroborate something for me. I am correct in understanding that this bill, H.R. 6211, includes discretionary funding which can be used to replace or repair deteriorating bridges?

Mr. SHUSTER. The gentleman is correct. It is my understanding that passage of this legislation will authorize funds for those purposes.

Mr. BLILEY. Could the gentleman clarify for me what criteria must be satisfied for consideration of funding new construction to repair or replace existing structures under this bill?

Mr. SHUSTER. For an existing bridge to qualify for funding under the discretionary bridge program, it must meet the warrants for replacement in accordance with section 114(g) of title 23 of the United States Code.

Mr. BLILEY. Then, as I understand the gentleman, the Robert E. Lee Bridge spanning the James River at Richmond, Va., which meets these warrants for replacement is eligible as an appropriate candidate for funding under the discretionary bridge program in this legislation?

Mr. SHUSTER. If the Robert E. Lee Bridge meets the warrants I have mentioned, as I have been assured by the gentleman that it does, then I would assume that the bridge is indeed eligible to be considered for the funds needed.

Mr. BLILEY. I have an additional question in regard to section 122—approaches. One of my counties wishes

to extend the Powhite Expressway, a toll road, to assist a desperate traffic problem. Is it not true that under the language in this section this county could be eligible for assistance for a portion of the road up to but not including the first toll plaza.

Mr. SHUSTER. The gentleman is correct.

Mr. BLILEY. I thank the gentleman, and I appreciate his remarks.

Mr. FITHIAN. Mr. Chairman, I move to strike the requisite number of words and would like to speak in favor of the amendment.

There have been very many fine arguments put forth here about the amendment offered by the gentleman from Illinois, Mr. SIMON. I would just like to reiterate those and say that I want to strongly support my colleague from the new Seventh District of Indiana, JOHN MYERS, and his support for this.

I will be departing but, before I depart, let me just make one last moment of argument. The community of Lafayette, Ind., has been involved in this for a very long time and on their own initiative went out and got a private grant at the time when the engineering, when the study needed to be made. They did that.

For some time now this has been an authorized project. It has been delineated in various authorization bills over the years.

The community has worked long and the city administration has worked long and the Congress has responded and cooperated with them.

I think the Simon amendment is an extraordinarily fine compromise for we recognize the authorization problems of the committee. I think that the gentleman from Illinois (Mr. SIMON) recognized that when he cut the authorization from $100 million to $50 million.

I think also he recognized the confusion that we have caused in the last 2 years on these projects, the uncertainty of them, and the problems of the committee when he said that the project must absolutely be started by January 1986, a date which is responsible to the projects and to the Congress.

I would urge my friends to support the Simon amendment. I think it is an excellent amendment.

I know well one project. I know the Lafayette Railroad demonstration project. It is an extremely fine project, well thought out and worked at over the years.

I would urge the committee to support the amendment which I believe to be an excellent compromise and one which does not get the 19 projects that they wanted, it does not get the committee all that it wanted, but it is a reasonable compromise that brings together the two points of view.

We recognize in this amendment both the problems of the communities and the problems of the committee.

Mr. MYERS. Mr. Chairman, will the gentleman yield?

Mr. FITHIAN. I would be happy to yield to my friend from the Seventh District.

Mr. MYERS. I thank my colleague for yielding and certainly thank him for his remarks. It has been 8 years that he has worked for this project in Lafayette, Ind., and knows much more about it than I do. But I am going to try to continue the project as the gentleman has worked for it in the past.

One thing that concerns me that the chairman has not mentioned, and I tried to mention it a while ago in my question to the Chairman, I am not questioning for a moment the intent of this committee to continue these 19 or however many projects, and there will not be that many, there is no question about it. But what about future Secretaries of Transportation, Federal Highway Administrators, or someone else in the Department of Transportation who decides that these projects do not meet the criteria to meet the priority that we spell out now in section 105, that they do not meet the Federal requirements here as far as primary, secondary, and urban systems.

Second, under section 120, some future interpretrations by the Department decides that these projects that had already been advanced, as the one the gentleman from Indiana is discussing, do not meet the funding criteria in section 120 for the Federal 95, local 5 percent. Suppose they decide that it does not meet that criteria? Then these are out.

This is the reason this amendment offered by the gentleman from Illinois is so important. It spells out for some future Congress, future Secretary of Transportation, or some interpreter between now and 1986 that it was the intent of Congress to continue these projects that are already started.

I can see no problem with keeping both of these approaches open and I do not understand why the committee fights it so much and that we do not keep both of them open. At least we would be just clarifying what already has been done and what the intent of this Congress is.

Mr. FITHIAN. I thank the gentleman.

I would add that over the period of time of this project, and I believe in others I have worked with and talked to the sponsors of, they have worked very hard to demonstrate their quality.

As the gentleman from Indiana (Mr. MYERS) points out, now some projects will not make it, they will not make it either on the basis of quality or they will not make it on the basis of timeliness.

But the Lafayette project and some of the others have met that test repeatedly. It has met the criteria and it has moved along in much the order the committee has previously spelled out. So it has met the criterion of quality and merit and it has met the criterion of timeliness, at least in the Lafayette case.

On every single occasion they have met the timeliness factor.

I would urge the committee to recognize what local governments must go through with the vicissitudes and shifting of activities in the Congress and recognize the problems that the local governments have.

● Mrs. BOGGS. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Illinois (Mr. SIMON) to extend the funding authorization for the railroad/highway crossings demonstration program which was originally authorized in the Federal-Aid Highway Act of 1973.

Jefferson Parish, La., and New Orleans, La., are fortunate indeed to be at the very crossroads of commerce in the South Central part of our country. Five major railroad lines use our area as their major terminal and interchange points. These railroads include the Louisville and Nashville (CSX), Illinois Central-Gulf, Norfolk and Southern, Missouri-Pacific and Kansas City-Southern. Four of these lines, L&N, ICG, KCS and N&S, perform key interchange functions in Metairie, La.

For more than 30 years the citizens of Metairie have had to live with several major railroad lines running through the heart of their neighborhood. The lengthy delays caused by switching railroad cars between the several lines involved has caused considerable discomfort to the people of the area and it has served as a threat to their health and safety. Because of delays and blocked streets and highways, people living in the neighborhoods frequently find themselves cut off from fire and rescue services for significant periods of time. In addition, there is the potential danger posed by the hazardous chemicals and materials transported through these neighborhoods by the railroads.

In 1976 Metairie was included as one of the railroad/highway demonstration projects. As a result of engineering and design studies, a proposed solution has been developed to relocate and consolidate the railroad alinements of several of the railroads involved. Rights-of-way acquisition has already commenced for a new interchange. The next phase will be the actual construction of the new interchange which will permit Kansas City-Southern traffic to be rerouted along the Illinois Central-Gulf right-of-way. This will eliminate 17 at-grade highway-railroad crossings. This can be ac-

complished at an estimated cost of $2.5 million.

Improved rail/highway safety in a dangerous area will result directly from completion of this plan. In addition, the people of the area will have greater assurance of access to needed fire and safety services that have long been imperiled by the current configuration.

It should also be noted that the 1984 Louisiana World Exposition will be held in New Orleans. It is extremely important that the Metairie project be kept on line and moved as near to completion as possible prior to that event in order to accommodate the tremendous influx of people. By approving this amendment, we can help to resolve this problem as well as the problem currently faced by thousands of commuters who must contend with the congestion caused by the present situation.

On first blush, this may seem to be a local problem but it is, in fact, a national one. This is one of the key rail junctions in the Nation. The lines affected by this project serve the entire country. This is certainly the most important rail interchange point south of St. Louis. It is a national problem that requires a national solution. The gentleman's amendment will help to achieve the needed solution by extending the funding authority for the railroad/highway relocation demonstration projects. I urge its adoption.●

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. SIMON).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. PANETTA

Mr. PANETTA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PANETTA: Section 117 is amended by inserting "(a)" after "SEC. 117." and by adding at the end thereof the following new subsection:

(b) Notwithstanding section 116 of title 23, United States Code, or any other provision of law, maintenance of any projects constructed on the Federal-aid primary system, Federal-aid secondary system, and the Federal-aid urban system may be paid from sums apportioned in accordance with section 104(b)(1) of such title for the Federal-aid primary system, section 104(b)(2) of such title for the Federal-aid secondary system, and section 104(b)(6) for the Federal-aid urban system, respectively; except that (1) a State may only obligate such sums for maintenance projects in the 120-day period beginning on the date of enactment of this Act, and (2) no State may obligate under this subsection more than 50 percent of the funds apportioned under sections 104(b)(1), 104(b)(2), and 104(b)(6) of such title to such State for the fiscal year ending September 30, 1983, for maintenance projects constructed on the Federal-aid primary, Federal-aid secondary, and Federal-aid urban systems, respectively. Notwithstanding section 120 of this title, the Federal share payable on account of any maintenance project under this subsection shall be 95 per centum of the costs of such project.

Mr. PANETTA (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. PANETTA. Mr. Chairman, first of all I want to commend the gentleman from New Jersey (Mr. HOWARD), the gentleman from California (Mr. ANDERSON), and the committee members on the Republican side as well, and of the entire committee for their leadership in bringing this bill to the floor.

But I think the question that is being asked by the American people as we debate this bill is, is this a jobs bill or is this a highway bill?

It is I think largely a highway bill without question. It does not change the formula that is in place. It does not have any specific provision that would expedite the projects any faster than they normally would be done, and the funds basically go into the trust fund to be disbursed pursuant to the formula contained in the trust fund.

□ 1850

The managers have been honest about that. The gentleman from New Jersey, the distinguished chairman of this committee, has in fact said this is in effect a highway bill. And I respect him for having said that publicly.

But this bill and the proposal for a 5-cent tax would have no life at all in a lameduck session were it not for a 10.8-percent unemployment rate, were it not for the fact that there is a tremendous unemployment problem in this country, and were it not for the fact that there was a message that was included in the November election and indeed a message that the leadership on the Democratic side and the Republican side have sent this country that this Congress is going to try to do something about jobs now.

Now, I do not disagree with the basic intent of trying to add funds to the highway trust fund. I would be willing to support that effort on its own merits. But I think we have to be straight with the American people, who are going to have to pay another 5 cents on their gasoline tax. I think the bulk of the American people sense that the purpose of this legislation is not simply to put more money into a trust fund, but to try to create jobs for the American people at a time of high unemployment in our society.

For all of the testimony, for all of the statements concerning this legislation, the fact is that there is nothing specific in the bill that requires that these funds be expedited now to produce jobs.

My amendment is designed to translate these funds authorized by H.R. 6211 into as many jobs as possible within the shortest period of time, 120 days. If this amendment is not approved, States will not be permitted to spend gas tax proceeds for the purpose which would create the most jobs in the shortest amount of time, which is maintenance of highways and roads.

The amendment I offer will allow State and local governments to use funds obligated under the Federal highway primary, secondary, and urban road system for maintenance purposes. At the present time such purposes as pothole repair, joints and shoulder repair, many other maintenance tasks, are prohibited to be carried out with Federal moneys. The Federal policy in this area of highway construction has been basically that Federal assistance is to go to the construction and building of roads, leaving the function of maintenance of those roads to the State and local governments.

While this is generally a sound and reasonable policy, it is not a sound and reasonable policy when we have a 10.8-percent unemployment rate, and it is not a sound policy when there is a need to develop labor intensive work.

The inability now of State and local governments to do major highway repair work leaves the country with a tremendous need for an important maintenance effort throughout the country. Because of budget constrictions, because of the economic situation, I think the greatest need for this money is in the area of maintenance.

My amendment would allow States and local governments, for a period of 120 days after enactment of this act, to use the funds obligated to them for primary, secondary, and urban roads for the maintenance of these roads. States would be able to use 50 percent of the appropriated funds for maintenance projects, and at the same time the Federal share of these maintenance projects would be 95 percent to insure that the States could commit themselves quickly to this kind of work.

The CHAIRMAN. The time of the gentleman from California (Mr. PANETTA) has expired.

(By unanimous consent, Mr. PANETTA was allowed to proceed for 3 additional minutes.)

Mr. PANETTA. Mr. Chairman, it has been pointed out on many occasions that repair and maintenance work is highly labor intensive and will certainly demand the least amount of time for startup. Also the identification of projects in need of maintenance can be readily designated by State and local transportation officials, and most of the design and technical requirements demanded on new construction projects can be avoided.

I think it is important that we put forth an effective program to repair and maintain the public infrastructures of our society. I believe that we need to repair our Nation's highway and transportation system, so that it can become a part hopefully of long-range recovery in our economy. But at the same time, we have to make use of this opportunity to provide employment opportunities now, not later.

This legislation would not alter the basic formula of the highway fund program. It does not call for additional money. It simply directs money where we can use it the fastest, which is in the maintenance of highways and roads.

The basic reason that we are here today is because we have an unemployment problem in our society. This amendment offers an approach that would expedite funds to labor intensive use within the first 120 days. In that way I think we can fulfill not only our responsibility to the highway program, but more importantly we can fulfill our responsibility to the unemployed in our society.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. PANETTA. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. I thank the gentleman for yielding.

I understand what the gentleman is attempting to do. Others are going to get into the merits and demerits of the gentleman's amendment. But in the early part of the gentleman's statement he asked a very critical question—is this a highway bill or is this a jobs bill. And I would like to make just one minor correction to the statement.

This is not a jobs bill, it is a transportation bill. It has not only highways and bridges, but has public transit as part of the component, and it is a bill that could stand worthy on its own apart from the fact that we have 10.8 percent of our population unemployed.

As the gentleman from New Jersey has indicated, this bill will, by virtue of expending these funds, put some 320,000 people to work. Now, the gentleman's concern about those who are structurally unemployed, those who have low skills and need to be put to work very quickly, that is an important responsibility. And I wish that we were dealing today with a comprehensive jobs bill that was handling the issue of the 10.8-percent unemployment. But I do not think that the public or any of us should be fooled into believing that this bill in in fact a jobs bill.

The CHAIRMAN. The time of the gentleman from California (Mr. PANETTA) has again expired.

(At the request of Mr. EDGAR and by unanimous consent, Mr. PANETTA was allowed to proceed for 3 additional minutes.)

Mr. EDGAR. If the gentleman will continue to yield, I do not think this bill amended on the floor can make up for a comprehensive jobs program. And I have just two small questions about the gentleman's amendment.

The first deals with the issue of maintenance. Has not that traditionally been the role and responsibility of the States, while we at the Federal level have taken care of major reconstruction and renovation of the highways?

Mr. PANETTA. Well, as I stated in my statement, this is the basic policy, that the Federal moneys would be used for construction and building of roads and that the State and local governments would handle maintenance of these roads. But it seems to me that at a time of high unemployment, at a time when I think all of us agree, we would not be here talking about a 5-cent tax unless we had a serious unemployment problem in the country, we must take expeditious action. And yet many of these construction projects are going to take a year or 2 years before they are implemented. I understand that. But I think we need to send a message to the American people that we are concerned about people who are unemployed.

Mr. EDGAR. I agree with the message.

The other question is do we send that signal with the gentleman's amendment? I do not see anything specifically in the gentleman's amendment that would obligate these funds quickly within the 120-day period that the gentleman is suggesting.

How does that happen with no regulations in place?

Mr. PANETTA. I think as normally happens under the trust fund, if the States, local communities, decide to proceed to do repair work within the 120 days, they could certainly seek the same kind of reimbursement that would cover the work they do. That is what I am after. I am trying to get as much work out there in the shortest period of time as possible.

Mr. ROEMER. Mr. Chairman, will the gentleman yield?

Mr. PANETTA. I yield to the gentleman from Louisiana.

Mr. ROEMER. I thank the gentleman for yielding.

If I could follow up, could the gentleman quantify for the benefit of the body. The gentleman has made the point about the need for jobs. I think it is shared deeply by everyone here. Could the gentleman put a number on the jobs that would be created by the gentleman's approach versus that of the committee?

Mr. PANETTA. The gentleman asks a question that I have been asking. Very frankly, it is difficult to pinpoint numbers of jobs for this area. I do know one thing. That in the State of California, it is going to take a year before we get projects out there, before we are able to provide jobs under the bill as it stands now. I know right now in the counties in my district and in many counties throughout my State that they can do maintenance work right now, and that money could directly flow into those areas right now, rather than waiting a year of 2 years.

Mr. ROEMER. The gentleman has made that point. If the gentleman will continue to yield, however, there is just no way the gentleman can quantify the impact of his approach versus that of the committee?

Mr. PANETTA. The gentleman is correct.

Mr. ROEMER. One additional question. Is it true, under the gentleman's amendment, that the States and localities, if they opt for the gentleman's approach, would do that over a 4-year life of the bill?

□ 1900

The CHAIRMAN. The time of the gentleman from California has again expired.

(By unanimous consent, Mr. PANETTA was allowed to proceed for 1 additional minute.)

Mr. PANETTA. The gentleman has asked a good question, because this would be a one-shot, 120-day operation. Once we go beyond the 120 days, the trust fund goes back to its standard approach. It could not be used for maintenance.

What I am looking for here is an emergency program that would flow to the local communities in a 120-day period.

Mr. ROEMER. But no longer than that?

Mr. PANETTA. That is correct.

Mr. ROEMER. The 50-percent maintenance threshold would be eliminated?

Mr. PANETTA. That is correct.

Mr. ROEMER. I thank the gentleman.

Mr. HOWARD. Mr. Chairman, I move to strike the requisite number of words.

Mr. HOWARD. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, the gentleman from California states that we in the Congress should take action on producing a jobs bill for the Nation. I agree with him on that, but that is the end of where I agree with him, because I do not believe that it would be wise to take this necessary legislation that is long-term steady legislation for long-term permanent jobs to the degree of the 335,000 of them and turn it into a quick fix, short-term operation, which may not produce any jobs at all. What you would be doing is you would be working on maintenance throughout the country and being asked to provide 50 percent of, I presume, the first

year's total money in 120 days. I do not know how much of that, how far that will be extended beyond the 120 days for those jobs; that is not in the amendment and I did not hear that in the discussion, but I do know also, and we had arguments and are going to have arguments about the kind of pay that is given, that all that money that will be spent would be exempt from the Davis-Bacon provision that has always been in this legislation. No. 1, that is not going to help workers very much to have low paying jobs.

No. 2, most of this kind of maintenance is done by public employees that are on the State payroll now. The additional cost of what they would do and the materials would merely be subtracted from what the State or the local community or the county pays out. We just replace it with this money and it might not produce any more jobs.

What kind of havoc would we do to the necessary infrastructure transportation improvements that this Nation needs?

As to not being able to use the funds, we have figures that indicate that under this bill for the project which these programs have always been intended, that somewhere like about $4 to $4½ billion of this money, almost all the increase, can be put to use within 90 days, not 120 days; so therefore, it is not necessary.

I believe that we would be making a total departure. We would not know where we are going, where the money is going to go, how effective it will be, what the people will be paid, how many jobs, if any, it will produce; and so although I am ready to support a major jobs producing bill in this lame duck session with the gentleman from California, this is not the amendment. This is not the bill. This is not the time.

I think we would be doing much more damage than good if we adopt the amendment. I urge its defeat.

Mr. SHUSTER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I have the greatest respect for the gentleman from California and, indeed, have empathy for what he is attempting to do here; however, I believe that perhaps inadvertently, but nevertheless this amendment, if adopted, would be one of most sweeping historic changes in the Federal highway program in the very history of the Federal highway program, because the very word maintenance itself is not a function of the Federal Government. It is a function of State governments.

Title XXIII, section 116, which the gentleman's amendment says notwithstanding section 116 of title XXIII, that particular section says, it shall be the duty of the State highway department to maintain or cause to maintain our Nation's highways.

So to make this fundamental change with an amendment here on the floor without any committee consideration would be sweeping, would change the fundamental character of our Federal highway program and at the same time would take billions of dollars away from real construction.

Last, and perhaps ironically, it may not create very many jobs at all because maintenance as a function of State government is performed by and large by State government employees, not by the private sector.

So for all those reasons, even though I understand and sympathize with what the gentleman is attempting to do, I believe that this amendment is much more far reaching than one perhaps might realize at first blush and I therefore vigorously urge the defeat of this amendment.

Mr. DUNN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment. I shall not take the entire 5 minutes, merely to point out that for a great majority of the States involved in high unemployment areas that the gentleman is concerned with in the next 90 days, it is literally impossible to do maintenance on highway programs because of the frost situation that would exist.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. PANETTA).

The question was taken; and on a division (demanded by Mr. PANETTA) there were—ayes 3, noes 14.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. GREGG

Mr. GREGG. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GREGG: At the end of title I, add the following new section:

STUDY OF METHANE CONVERSION FOR HIGHWAY FUEL USE

SEC. 155. the Secretary of Transportation shall study, out of any funds available to the Secretary of Transportation for research purposes, the potential for recovering methane which is released in the process of offshore oil drilling and converting such methane on a floating conversion plant located at the drilling site into methanol for use as a fuel for highway vehicles. Such study shall include, but need not be limited to, a determination of the quality and quantity of the methane which is released at offshore drilling sites at various locations and the costs involved in recovering such methane and converting it in the manner described in the preceding sentence. The Secretary shall also determine the permitting requirements which would apply to such floating conversion plants and the most effective way to implement those permitting requirements. The Secretary shall report to the Congress the results of the study under this section not later than one year after the date of enactment of this Act.

Mr. GREGG (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Hampshire?

There was no objection.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield?

Mr. GREGG. Yes, I yield to the gentleman from Pennsylvania.

Mr. SHUSTER. Mr. Chairman, we have examined this amendment on the minority side and find no problem with it and accept it.

Mr. HOWARD. Mr. Chairman, will the gentleman yield?

Mr. GREGG. Yes, I yield to the gentleman from New Jersey.

Mr. HOWARD. Mr. Chairman, we are happy to accept the amendment also. It has been discussed.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Hampshire (Mr. GREGG).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. STENHOLM

Mr. STENHOLM. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. STENHOLM: Page 81, strike out lines 15 and 16 and insert in lieu thereof the following:

SEC. 154. Section 113 of title 23, United States Code, is amended by adding at the end thereof the following new subsection:

"(d) The provisions of subsections (a) and (b) of this section shall not be applicable to funds obligated out of the highway trust fund, other than the mass transit account, after the date of enactment of this subsection and before October 1, 1986."

Mr. STENHOLM (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. STENHOLM. Mr. Chairman, I also ask unanimous consent that a second amendment that I have which deals with the exact same subject be considered en bloc with this amendment, for purposes of saving time.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. The Clerk will report the second amendment.

The Clerk read as follows:

Amendment offered by Mr. STENHOLM: Page 106, after line 8, insert the following new section:

LABOR STANDARDS

SEC. 315. Section 13 of the Urban Mass Transportation Act of 1964 is amended by redesignating subsection (c) (and any references thereto) as subsection (d) and by inserting after subsection (b) the following new subsection:

"(c) The provisions of subsections (a) and (b) of this section shall not be applicable to funds obligated out of the mass transit account of the highway trust fund after the date of enactment of this subsection and before October 1, 1986.".

Mr. STENHOLM (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. STENHOLM. Mr. Chairman, no one can argue with the merits of the legislation that we have been considering this afternoon, but we have heard just in the last few moments some argument concerning whether or not this is in fact a jobs bill, whether or not it is a transportation bill.

My amendment is to proceed in the direction of making this a jobs bill, or at least some small semblance of a jobs bill.

The question we might ask is, what is an effective way to get people back to work? The question has been raised and the country looks to the Congress for an answer.

My amendments will deal with creating jobs (20,000 to 32,000 by some conservative estimates) at zero cost to the Federal Treasury.

The legislation we are considering today is designed to stimulate jobs through highway infrastructure projects.

□ 1910

Such is a legitimate responsibility for us to undertake; that is the rebuilding of needed roads, highways, and bridges, to keep America moving and working. Both sides of the aisle are prepared to see this necessary legislation get through both Houses, and the President is waiting to sign this measure into law.

None of the current proposals include ways to increase the number of jobs for the same amount of Federal investment. The way to increase employment is the waiver of the Davis-Bacon Act from all construction work funded under these programs. For many well-documented reasons the act tends to inflate construction wages and inhibits the use of untrained or unskilled workers, many of whom have the most need for jobs. By waiving Davis-Bacon, more jobs will be created for those traditionally limited in the working force.

Waiving Davis-Bacon will not take us back to a time when a worker's standard of living was unprotected. The Federal Government initially undertook the Davis-Bacon Act to make these needed protections.

The time has arrived to review this language and ask if the Government has achieved its purpose in protecting a worker's standard of living. The way to conscientious reform is to see the wavier of Davis-Bacon and the Surface Transportation Assistant Act will accomplish this purpose. This is a labor issue only in that more workers will be put back on the job. Is it not appropriate to ask labor interests to assist in reforming the system and help create more jobs?

Reams of documentation have been available to show the savings attributed to the waiver of Davis-Bacon. The 1979 GAO study documents those savings. The General Accounting Office states that other labor laws passed since 1931 make Davis-Bacon unnecessary. Their report is entitled, "The Davis-Bacon Act Should Be Repealed." Once again, this is not a labor issue, except that federally funded projects will have more individuals employed because Davis-Bacon is repealed. The original intent, to protect local contractors from unfair competition during the depression, is no longer valid. In today's economy, consumers, workers, and taxpayers would benefit from waiver of the Davis-Bacon provisions in surface transportation programs.

Martin Feldstein has advised the administration that the imposition of the gas tax may actually increase unemployment and estimated that the net effect will be the loss of 20,000 jobs. The waiver of Davis-Bacon would restore a sense of fiscal responsibility to the surface transportation program and remove the doubts about the number of new jobs that are to become available.

Mr. Chairman, I ask you today to make a bold move toward increasing the number of jobs under Federal surface transportation programs. I applaud the unanimity of opinion, and I appeal to your sense of fairness and compassion to do that which is best for all workers, consumers, and taxpayers.

It just makes more sense at this point in time for us to increase by whichever figures one may want to use 20,000 to 30,000 additional jobs which can be created by the passage of this amendment.

I ask for your support.

Mr. STANGELAND. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, we in Congress are faced with the problem of putting Americans back to work. This bill we have before us today, H.R. 6211, the Surface Transportation Act, is directed at putting people back on the work force.

In this bill is the highway user fee for repair of our Nation's infrastructure and if this passes it is estimated to create some 320,000 jobs. But we do not have to be satisfied with this.

We can create an additional 25,000 jobs through this same Federal investment if the Davis-Bacon requirements were waived from these programs.

Studies published by the General Accounting Office and the Council of Economic Advisers have determined that the Davis-Bacon Act increases the cost of Federal and federally assisted construction projects by at least 10 percent.

Applying this estimate to the number of jobs to be generated through programs to which Davis-Bacon applies, thousands of more jobs clearly could be provided to the unemployed and unskilled if the inflationary and restrictive practices of Davis-Bacon were waived.

This does not mean that we will be asking people to work on construction for a minimum wage. These wages will be negotiated and the workers will be under union contract. But the waiver of the Davis-Bacon will put a stop to some inflated costs but it will still assure the worker a fair wage, a wage that our unemployed need and will accept.

I have joined Congressman STENHOLM in cosponsoring this amendment. We are asking Congress to allow a waiver of this act, the Davis-Bacon, that would require payment of prevailing wages to workers on these federally funded and assisted construction projects. For many well-documented reasons, the act tends to inflate all construction wages and, as a result, unnecessarily increases construction costs.

It is as simple as this, the more the construction costs—the less jobs we can create.

Congressman STENHOLM and I are asking that you realize the importance and urgency of producing jobs for the unemployed. And then, ask yourself this question—why should we not create more jobs for the same amount of money. We can do this if Congress passes the Stenholm-Stangeland amendment which would waive the Davis-Bacon law as it applies to this act.

Mr. ANDERSON. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, the gentleman's amendment is completely inconsistent with the longstanding practice and intent of Congress. In fact, practically every federally assisted construction program requires the payment of the prevailing wage rates in the locality as predetermined by the Secretary of Labor.

For 51 years, the Davis-Bacon Act has protected both local contractors and construction workers engaged on federally assisted projects from unfair competition by outside contractors who fail to observe the labor standards maintained generally in the area.

When this happens, responsible contractors, employees, and the community in general, suffer from this unfair competition to which the Federal Government is a party. The low wages of these workers from outside the local area undercut the wage rates and undercut the living standards of building and construction workers and their families in the local community.

It should be clearly understood that the inclusion of prevailing wage provisions, as provided for in the Davis-Bacon Act of federally assisted projects does not increase wage rates in a community. The Davis-Bacon provisions are designed purely to protect local contractors and local building tradesmen in the area from the incursions and underbidding of the outside contractors. Thus the wage and living standards in the community are protected and contractors are placed on equal competitive terms.

I feel that local contractors and workers on these projects are entitled to the protection of the Davis-Bacon Act. As I have stated, virtually all Federal construction projects require the payment of the prevailing wage rate.

I urge the defeat of this amendment.

Mr. PHILIP M. CRANE. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

I think, Mr. Chairman, that there is a legitimate expression of concern in this bill for the derelict status of our highways, but on the other hand, I think we have to recognize that at a time when we are already suffering from confiscatory taxation and when we are suffering from unprecedentedly high budgets as well as budget deficits, that we have to be duly concerned about the impact of any of our actions on the overtaxed taxpayer/user, in this case, and as a result, it seems to me that the amendment introduced by the gentleman from Texas is totally supportable by these criteria.

A HUD study in 1976 indicated that Davis-Bacon adds to Federal construction projects anywhere from 5 to 15 percent, and if we take a 10-percent figure, which splits the difference between these HUD estimates, then we are talking about somewhere between $5 and $6 billion that could be saved to the taxpayer and put to constructive use in other ways if we waived the requirement for the application of Davis-Bacon in this instance.

In addition to that, there have been other studies indicating that Davis-Bacon has had a negative effect on employment, most especially on minority employment. As a result, if we are concerned about having a peripheral fringe benefit of this legislation resulting in expanded employment, then again I think it dictates waiving the Davis-Bacon application and giving many, most especially the minorities who are being hurt at this time worse than anyone else in the economy, the opportunity for job opportunities that otherwise most assuredly will be denied by Davis-Bacon.

□ 1920

So, Mr. Chairman, I would urge our colleagues to support the amendment introduced by the gentleman from Texas. It is supportable upon all economic as well as humanitarian grounds.

Mr. PEYSER. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I would like at the outset to ask my friend from Texas a very simple question on this amendment, and that is, does the President support the amendment that the gentleman has offered at this time? Does he know?

Mr. STENHOLM. I do not know.

Mr. PEYSER. Does the Secretary of Labor support this amendment?

Mr. STENHOLM. I do not know.

Mr. PEYSER. So they have not been involved in any way?

Mr. STENHOLM. This bill is before the Congress at this time. My concern is our colleagues in this body, as to whether or not we wish to—in fact want to—put 20,000 to 32,000 additional Americans back to work under the basic premise of the amendment that I have offered, and that is my total concern.

Mr. PEYSER. The reason for my question was obviously to find out whether the executive branch was supporting this, and I gather, obviously, they are by their omission of speaking on this issue, are not supporting it, however, I think it is important that everybody recognize that what we are seeing now, is an attempt to use the whole issue of unemployment and the tragedy facing millions of Americans today, as another device, to end Davis-Bacon.

Over the years I have been here I have repeatedly seen this effort made, and it was not made in this vehicle of highways and work of this nature, nor was it made at times of tremendously high unemployment. We are dealing with a very basic philosophical issue here as to whether labor, working men and women should be protected as they have traditionally been, and incidentally as it has been stated by every President that I have had the opportunity of serving under, starting with President Nixon, President Ford, President Carter, and President Reagan. They believe that Davis-Bacon is a necessary protection for the workers of this country. That is really the issue.

Now, I must admit that the administration, in a back-door way, tried 6 months ago by regulation to make many drastic changes in Davis-Bacon, and when they made that effort, which would have stripped a great many of the privileges, and frankly, the rights, that labor had under Davis-Bacon. The building trades went to the Supreme Court where an injunction was issued against the Labor Department preventing them from taking this action.

Now, I do not think that we here in this Congress are about to let this situation come up under the guise of helping the unemployed in this country, to strip labor of a much-needed protection; the working men and women, obviously in the building trades, who need this kind of protection, and it benefits all of us in the kind of quality and the kind of work that is done on our roads and our highways—all of the work in the infrastructure in this country that is protected under Davis-Bacon.

So I would ask, Mr. Chairman, that we recognize this amendment for what it is, as another attempt over the years, who will use any vehicle possible to bring it to the floor to try to strip it, because obviously if we take it out of this bill it would be logical that it ought to come out of any area of construction that the Federal Government is in. I urge the Members to defeat the amendment. I am convinced that we will defeat it as we have all other attempts.

Mr. WALKER. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I think we ought to take a look at what we are supposedly doing in the bill that is before us. Supposedly, the bill before us is to do two things: It is to create more roads and it is to create more jobs. Well then, if that is what this bill is all about, then who wants the language that exists in the committee bill with regard to Davis-Bacon? Do the States and municipalities who are to provide us with more roads want it? Well, no, because under the provisions of this language in the bill, they do not get more roads; they get less roads.

Do the unemployed want this language, the people who are going to have a chance at more jobs? No; because under this language there would not be more jobs; there would be less jobs. That is not only questionable in terms of where this bill is going, but it seems to me that is outright cruel at a time when we are saying to the American people that it is necessary to provide jobs, and truly it is.

So, who does want this language? Who benefits from this language? Only one major group, the big labor unions. In my mind, this is purely and simply a political payoff for what has just happened in the elections; purely and simply, because they are the only ones who get any benefit out of this, and most of the people who are going

to benefit are people who already have jobs, who are going to receive the increased wages that this bill would permit.

Well, if we adopt the amendment offered by the gentleman from Texas, it seems to me that then we get to where we supposedly want to be; we get more roads; we get as much as 10 to 20 percent more roads, and that is not based upon figures I have come up with. It is based upon figures the GAO has reported. The General Accounting Office has said what the problem is—that for the same amount of money you get less activity. So, we get more roads out of it.

We get more jobs out of it, perhaps 10 to 20 percent more people will go to work if we adopt this amendment. How many people is that? The gentleman makes very modest claims in saying 20,000 to 25,000 or perhaps as many as 32,000. It could be as many as 50,000 people who will get jobs as a result of this amendment.

The American people, it seems to me, when they look at the vote on this amendment, are going to be able to judge quite clearly who is really serious about providing jobs. They can watch to find out whether or not we are going to adopt the committee language, which limits the number of jobs by 50,000, or adopt this amendment, which increases the number of jobs by 50,000. The special interests who say they are looking at this whole bill are more interested in protecting their own perks than they are in creating jobs, Oh, they made a political issue out of jobs and ran around the country talking about jobs, but the fact is they are more interested in protecting their own perks than in creating work opportunities.

Listen to the arguments that have been given us in favor of keeping this language in the bill. Members heard from the gentleman from California that the reason we should do this is because we have always done it this way. The gentleman from New York told us purely and simply that we ought to protect the labor unions; that that is the purpose of Davis-Bacon and its priorities are larger than providing jobs.

I think that the prime priority that we ought to have is the provision of jobs, and we should not be doing what we have always done because what we have always done is limit jobs. In these times of crisis it seems to me that we ought to stop denying jobs and begin putting people back to work. It is time that we do better than we have done in the past, and I support the amendment of the gentleman from Texas.

Mr. PEYSER. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I will be glad to yield.

Mr. PEYSER. Mr. Chairman, in the first place I would like to correct something. I believe it is correct in the record. I never mentioned protecting labor unions at any time in my talk. I did talk of working men and women, but I think one thing the gentleman said is of importance. He said this was really just going to the people who already have jobs——

Mr. WALKER. I said give them larger salaries.

Mr. PEYSER. Larger salaries. The truth is, in the building trades, in the construction trades, in the highway areas, they are running 34 to 40 percent unemployment today, well above the national average, triple.

Mr. WALKER. The gentleman has made my point for me. Why not then put those people back to work with a provision that would allow the creation of more jobs?

Mr. PEYSER. Mr. Chairman——

Mr. WALKER. I am reclaiming my time. It seems to me that if we have an opportunity to use the money in this bill to create more jobs, we can bring down that unemployment by a significantly greater amount, and that is exactly what this amendment is all about.

I would urge, based upon what the gentleman has just said, that we support the gentleman from Texas.

Mr. WOLF. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment which would restrict Davis-Bacon wage rate requirements for highway and bridge repair programs funded through this legislation and the highway trust fund.

I believe this is an important amendment to insure that the highway bill and the gas tax revenue to support it accomplish their intended purpose: that is, to rebuild this Nation's deteriorating infrastructure while simultaneously expanding jobs.

If we allow Davis-Bacon to be extended to these projects, we will effectively reduce the number of jobs which could be created and inflate the cost of the projects. According to the General Accounting Office, if Davis-Bacon were waived, this legislation would be strengthened to increase jobs conservatively estimated by 10 percent.

It is clear that Davis-Bacon provisions increase construction costs. After a GAO study last year found that costs for Metro construction in the Washington area would increase by about $149 million because of the prevailing wage rate established by Davis-Bacon, I introduced legislation to exempt Metro from Davis-Bacon Act requirements, which dictate that the highest prevailing wage rate be paid on Government construction projects.

We have an opportunity with this amendment to provide jobs for Americans. I urge my colleagues to join me in restricting Davis-Bacon Act provisions in this legislation to make the greatest possible use of our limited resources.

□ 1930

The CHAIRMAN. The question is on the amendments offered by the gentleman from Texas (Mr. STENHOLM).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. STENHOLM. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 174, noes 223, not voting 36, as follows:

□ 1950

Mrs. HECKLER changed her vote from "aye" to "no."

Mr. ROBERTS of South Dakota and Mrs. ROUKEMA changed their votes from "no" to "aye."

So the amendments were rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. ROEMER

Mr. ROEMER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ROEMER: On page 81, strike lines 14 through 16.

Mr. ROEMER. Mr. Chairman, we have been discussing at some point today, as we have in the past, the Davis-Bacon provisions that affect these and other bills. I have got an attempt at what I call middle ground on that point.

In the current law of this land, on highway construction, under current and existing law, Davis-Bacon applies under the funds out of the highway trust fund under the following language:

The Secretary . . . employed by contractors or subcontracts on the initial constuction work performed on highway projects.

Initial construction.

That meant that items of maintenance and repair were not included under the Davis-Bacon provision. That has been the law of the land for a number of years.

In our committee, without debate, the current law was changed. Because of the time shortage, the bill when brought over, had a number of changes proposed by the chairman and others who worked hard on this bill, and I compliment them for that.

One of the changes that they made was to section 154, which says that the word "initial" would be stricken from current law, which in my mind gave the opportunity for Davis-Bacon, not to be cut back, but to be expanded to those items in the history of the highway trust fund that were never intended to be under the Davis-Bacon provisions.

What my amendment does is not restrict or expand Davis-Bacon. It makes sure that the bill that comes out of this House has the same language in regard "initial" highway construction.

Our chairman and others removed the word "initial." With my amendment, I put the word "initial" back.

Now, some would say and have already made on this floor the point that Davis-Bacon ought not apply in any manner to the highway trust fund. That if it is jobs that we want, we ought to strip away the protection for skilled labors. This House has already, by a vote taken minutes ago, decided not to do that. I stand with that commitment.

My amendment would only make sure that the statute is not changed in any direction, up or down, vis-a-vis Davis-Bacon. But the word "initial" highway construction be maintained in and under the law.

Mr. HOWARD. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, we on the Committee on Public Works and Transportation appreciate the work of the gentleman from Louisiana (Mr. ROEMER), who is not only a valuable member of the committee, but always accurate in what he says, and I believe that this is the exception that proves the rule.

We are in disagreement here as to whether or not his amendment will weaken Davis-Bacon and change what has been the practice or whether it will remain the same.

I believe that I can speak to the intent of the original amendment that put Davis-Bacon in the highway legislation in the sixties, because I was the author of the amendment that put it in that legislation.

That intent was to have it in all construction, and in the law construction is listed as a certain type of work, and certain parts of the 3-R program are construction.

Now, the practice has been as the intent has always been that the 3-R program is covered by Davis-Bacon, it always has been.

Late in the Carter administration, in looking at the word "initial" they determined that they may be able to weaken Davis-Bacon by having "initial" rather than "construction" be the operative word, and this administration has taken that up, and the Federal Highway Administrator, Mr. Barnhart, has indicated that he will change the practice, weaken Davis-Bacon, not have it apply to 3-R as it always has, as it always had been intended to be and put that in the Federal Register.

What is in the legislation today clears that up. The language we put in in the committee merely clarifies the legal argument and says Davis-Bacon shall apply to 3-R as it has always applied to 3-R, and it does not expand it at all.

If this amendment is defeated, the Davis-Bacon provision will continue as it has in the past, not be added to any kind of program.

If the amendment is agreed to, then we will be voting as though we want to kill Davis-Bacon.

So we have, basically, the same kind of vote as before except if there are people who did not want to kill Davis-Bacon but maybe just have it continue as it has in the past, then they would oppose this. Those who are in support of Davis-Bacon will oppose this.

So what we are having here is a decision as to whether we are going to weaken it, as the amendment does, or whether it will continue the same as before, as the committee language does.

Mr. ROEMER. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I yield to the gentleman from Louisiana.

Mr. ROEMER. I thank the gentleman for yielding.

I just want to clarify a point of fact, and that is the law currently reads "initial construction"; is that correct?

Mr. HOWARD. That is right.

Mr. ROEMER. So the gentleman's amendment, that because of the pressing of time, we did not debate in committee or subcommittee, makes a change in the law.

Mr. HOWARD. No, no. Makes a change in the wording so that there will be no change in the law.

Mr. ROEMER. Laws are made up of words. And if you strike the word "initial" you strike to the heart of maintenance and repair in the program.

Mr. HOWARD. I know what the results will be. I am not going to argue about what goes into the law because the gentleman is Harvard educated and I am just a poor little sixth grade teacher from New Jersey. So I do not know much about that. But I know what I meant when I put the amendment in.

All the administrations from then on know what we meant, because they followed that. And all we want to do is continue that practice, and that practice will not be continued, Davis-Bacon will be reduced in its effects if this amendment carries.

So those of my colleagues who want to cut down Davis-Bacon would vote "yes." Those who want to maintain it as it has been, will vote "no"; the same vote roughly we just had. And we are probably going to have another one after this. So I think if we get at it, we will be doing ourselves a service.

□ 2000

Mr. McEWEN. Mr. Chairman, I move to strike the requisite number of words. I rise in support of the amendment.

Mr. Chairman, I rise with a certain amount of trepidation because of my strong admiration and respect for the chairman of our committee. However, I do find it somewhat disturbing that a provision has been added to the substitute at the last minute which appears to expand significantly the applicability of Davis-Bacon wage rate determinations beyond initial construction to include resurfacing, restoration and rehabilitation.

I would like to just take a moment of the time of the House to point out a section of legislative history taking us back to when this section was enacted in 1968.

The chairman of our committee, the gentleman from New Jersey (Mr. HOWARD) proposed to delete on the floor by amendment, very similar action that we are facing just now, to delete the term "initial" from section 113 of chapter 23 of the United States Code and in the process expand the application of Davis-Bacon to cover the primary, secondary, and urban systems as well as the interstate system originally covered under section 113. The attempt to delete that term "initial" was met with strong opposition by then Representative Cramer, the ranking member of the committee.

On the floor of the House, Mr. Cramer stated that he opposed that amendment because it would have the effect of including under Davis-Bacon the previously excluded construction work "that if performed after the highway is built, such as reconstruction, major repairs, possibly some maintenance functions, and other small improvement or betterment projects."

Mr. Cramer noted that "initial" was specifically written into the basic law for the purpose of limiting the application of Davis-Bacon "to the actual first construction of a highway, not its upkeep."

Mr. Cramer asked Mr. HOWARD why he proposed deleting the term "initial" and Mr. HOWARD replied that his proposal was drafted to apply to the Davis-Bacon Act in a general manner to the ABC highway program.

Mr. Cramer offered a substitute amendment for the purpose of retaining the term "initial" while still expanding the coverage of the Davis-Bacon Act to the noninterstate Federal-aid systems. His amendment was accepted by Mr. Kluczynski, as chairman of the subcommittee, and Mr. HOWARD, whose own proposal was therefore withdrawn. The amendment as proposed by Mr. Cramer was passed by the House and was identical to the provision subsequently adopted by Congress.

Now, I believe that this measure has not been subjected to the full hearings which an issue of this sensitivity would seem to require, nor was it voted upon in the Public Works and Transportation Committee, or its Surface Transportation Subcommittee, upon which I serve.

If there is a problem, then it must be remedied by legislation. The case has not been made here.

I suggest that the best course for us is to accept this amendment to restore the language of the existing law and to proceed in a more deliberate manner to address this issue.

Allow me to conclude by reemphasizing again my tremendous respect for our chairman, my appreciation for his performance in the House and in our committee and for his dedication to major transportation issues; but the fact is that we are about to do something that has been attempted for now some 14 years successively and yet has not been successful. Unless all of us pay strict attention we will do something tonight that the Congress has not chosen to accomplish in some 14 years.

Mr. ROEMER. Mr. Chairman, will the gentleman yield?

Mr. McEWEN. I am glad to yield to the gentleman from Louisiana.

Mr. ROEMER. Mr. Chairman, the chairman and I and others disagree directly on these words. The chairman makes the point that deletion of the word "initial" makes no difference. It does as the law is practiced. It does as ruled by the Carter administration when it said that section 113 by its terms is limited to initial construction and the 3-R program is designed to improve and restore the usability of the existing roads, et cetera.

There is a difference of opinion here. It is not idle games. It is not an attempt to eliminate Davis-Bacon or to restrict it. It is an attempt to hold the law where it ought to be.

This bill suffers, if anything, from too hasty action and changes made, quietly done because of the necessity of time, that make big impacts on the highway trust fund.

Let us not allow this change to stand.

Mr. McEWEN. Mr. Chairman, I thank the gentleman.

Mr. HOWARD. Mr. Chairman, will the gentleman yield?

Mr. McEWEN. I am glad to yield to the chairman.

Mr. HOWARD. The gentleman is a most valuable member of the committee. I appreciate his presence and debate on the committee almost every time.

Mr. McEWEN. I thank the gentleman.

Mr. HOWARD. I would like to ask the gentleman, should there be a two-lane highway in existence that had been built perhaps in the 1940's and that highway is going to undergo a change to become a four-lane or six-lane divided highway, would Davis-Bacon apply if the gentleman's amendment is adopted?

Mr. McEWEN. It is my understanding that it certainly would, yes.

Mr. HOWARD. It would not apply; it would not be, as the gentleman says, if we put the key word "initial" in there, it would not, because it would not be the initial construction on that.

Our point is that it has always applied and comes under construction and so what will happen if this amendment is passed will be a major change on what is covered by Davis-Bacon.

Mr. McEWEN. I think the gentleman recognizes that if it would go from a two-lane highway to a four-lane highway, that you would have to construct a four-lane highway.

Mr. HOWARD. The Federal Highway Administrator will declare that is not an initial construction and Davis-Bacon does not apply. He has already said that.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

(By unanimous consent, Mr. McEWEN was allowed to proceed for 2 additional minutes.)

Mr. CLAUSEN. Mr. Chairman, will the gentleman yield?

Mr. McEWEN. I yield to the distinguished ranking member.

Mr. CLAUSEN. Mr. Chairman, in response to the example propounded by the chairman, I am of the opinion that it would qualify under the reconstruction criteria which has been applied by the administration. It does not impact on the reconstruction as well as the initial construction.

Mr. McEWEN. I thank the gentleman for his contribution.

Mr. HOWARD. Mr. Chairman, if the gentleman will yield further, reconstruction is not initial construction, so that would wipe it out. That is why we have the language of the amendment.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. McEWEN. I am glad to yield to the gentleman from Georgia.

Mr. LEVITAS. Mr. Chairman, I thank my colleague for yielding.

In the remarks of my colleague from Ohio, he suggested that there needs to be further study of the entire Davis-Bacon matter, including this issue.

I would like to remind my colleague on the committee that as a result of a request made by the committee, the Subcommittee on Investigation and Oversight has already begun preparations for a major investigation, a major study of application of the entire Davis-Bacon legislation.

Mr. McEWEN. That is correct.

Mr. LEVITAS. So that we will once and for all have an objective look at whether or not the rules of Davis-Bacon should be modified or changed or repealed or continued or expanded.

So I can assure the gentleman that as a result of a request from the committee, that process is now underway and I hope will be completed objectively within the next several months.

Mr. McEWEN. I appreciate the gentleman's contribution and understanding of the need for us not to change the law at this point.

Mr. ROEMER. Mr. Chairman, will the gentleman yield just for a point of information as a member of the Investigation Oversight Committee.

Mr. McEWEN. I yield to the gentleman from Louisiana.

Mr. ROEMER. We do look forward to that kind of investigation.

Would the gentleman agree that the current law reads "initial construction"? That is my point, current law.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield further?

Mr. McEWEN. I yield to the gentleman from Georgia.

Mr. LEVITAS. Mr. Chairman, I thank the gentleman for yielding.

I have not done the study of this provision that the gentleman from Louisiana or the gentleman from Ohio has, but one of the reasons I voted against the last amendment was because I did not want the current law to be changed in any particular until we have completed our study. I think in order to be consistent, I will have to support the gentleman in his position.

Mr. SHAW. Mr. Chairman, I move to strike the requisite number of words. I rise in support of the amendment. I shall not take my 5 minutes, however.

We have at this time in this country over 12 million Americans out of work. There is 10.8 percent of our population who wants to work and cannot.

We have a bill that will contribute something to eliminate this.

We also have an infrastructure in the form of bridges and streets throughout this country that are deteriorating to the point where if we allow them to deteriorate more, we are going to drastically further put a negative effect upon the economy of the United States. While we are here tonight discussing a bill in a lameduck session that will do a little bit to cure the unemployment problems in this country and fixing the streets in this country, we are also debating whether we want to amend the laws of this country so that we are going to further expand Davis-Bacon into an area that it does not exist in tonight.

Now, I cannot argue the history of this thing and whether this was changed in the Carter administration or wherever. I do not know; but all I know is that tonight it is simply not right to those of us who are depending upon the transportation structure of this country to get bogged down in a senseless discussion about whether or not we are going to require the work to be done just by union labor and therefore restrict what we can do and whether we are going to restrict those who can go back to work under this bill to being those who are carrying union cards. To me that is unconscionable.

We should not change the law. Even though I was on the losing side of the prior amendment that would have eliminated Davis-Bacon, I did so only so it would put more people back to work

I do not believe that we should do anything short of passing the amendment of the gentleman from Louisiana, which I think is a very sober approach to a very difficult problem, and that is getting about the work of reconstructing the roads of this country and putting some of the people back to work.

Mr. ERLENBORN. Mr. Chairman, I move to strike the requisite number of words. I rise in support of the amendment.

□ 2010

Mr. Chairman, when the gentleman from Ohio spoke, he initiated his remarks with praise for the gentleman from New Jersey, the chairman of the committee, which I would adopt as my own.

However, I would say he missed one appellation that he could have used for the gentleman from New Jersey, and that is "tenacious," because he then told us how the gentleman from New Jersey in 1968 had offered this amendment to strike the word "initial." He failed at that time, and now 14 years later he is trying to accomplish what he failed to do then.

The fact is, the law today—and for years—has applied Davis-Bacon to the initial construction of these highways. The law for years has applied only to initial construction. The gentleman from New Jersey is now trying to change the law by striking the word "initial."

We have already passed on the question as to whether we are going to change Davis-Bacon in the direction of removing its application under this bill, and we have decided not to. If we are going to be at all fair with the people who are looking to this to have their highways improved, be fair to the people who expect to have jobs under the funds made available through this legislation, we will defeat this amendment and leave the law as it is today.

The gentleman from New Jersey may be tenacious, but I do not think we ought to let him win tonight what he did not win then.

Mr. WALKER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I take this time principally to ask a couple of questions of the gentleman from Louisiana (Mr. ROEMER) whose amendment this is.

First of all, is it not true that most of the intent, much of the money that is in this bill, is aimed at the reconstruction and rebuilding of roads so that a large bulk of the jobs and numbers of miles that would be repaved and redone would be in the area to which the gentleman's amendment speaks?

So that, in fact, if the gentleman is correct and we would apply Davis-Bacon in a way in which it has never been applied before, we would be limiting the jobs precisely in the area in which this bill seeks to expand jobs.

Mr. ROEMER. Mr. Chairman, would the gentleman yield further to me?

Mr. WALKER. I would be glad to yield to the gentleman from Louisiana.

Mr. ROEMER. Yes, at a time when jobs are at least a portion of the momentum for this legislation.

As you know, I voted against the amendment offered by my good friend, the gentleman from Texas (Mr. STENHOLM), a minute ago. The chairman, myself, and others on the committee have worked closely together, I thought with a common goal; that is,

to make no radical changes under the law, but to make sure that the money fairly collected was fairly distributed for jobs on highways. That is why I object to the change in the bill by the gentleman from New Jersey (Mr. HOWARD). That is what I am trying to amend to go back to original law.

Mr. WALKER. Mr. Chairman, let me see if I can understand a bit about where the gentleman thinks the difference lies.

The gentleman from New Jersey gave us an example here a little bit ago, a rather wild example, taking a two-lane road and making it into a four-lane road. It seems to me, though, that what the gentleman is saying is that if you take that same two-lane road and you want to put down some new macadam on it and rebuild it some, under the law as it is now written you would not apply Davis-Bacon to that particular kind of project.

However, if the gentleman's amendment is not adopted and we take the committee bill as such, that particular two-lane road might have Davis-Bacon now applied to it where it has never had it in the past. Is that correct? Is that my understanding?

Mr. ROEMER. If the gentleman will yield further, the danger now is not from the diminution of Davis-Bacon; it is from the expansion of same, because current practice allows for maintenance and certain types of repair to remove itself from the burden of Davis-Bacon.

With the changes given to us by the chairman of the committee, that pressure would not be there. All would be a fair game. Every dollar, every penny, every allocation of this bill would be under the burden of Davis-Bacon. It is a major change in the law.

Mr. WALKER. If I further understand what the gentleman is saying, the law right now has the word "initial" in it; is that correct?

Mr. ROEMER. That is correct.

Mr. WALKER. So, in other words, the argument being propounded by those who do not favor the gentleman's amendment is that by changing the law, we are really not changing the law. Somehow the logic of that escapes me, but we are making a change in the law unless we adopt the amendment offered by the gentleman; is that not correct?

Mr. ROEMER. If the gentleman will yield further, Mr. Chairman, the fear on the last amendment was that we would send a signal that there would be no Davis-Bacon application. There was a very close vote. The fear on this one is that Davis-Bacon would apply to everything.

I voted against the last amendment, and for that same reason I offer this amendment: Keep the law as it is.

Mr. WALKER. I thank the gentleman.

Mr. MINETA. Mr. Chairman, I move to strike the requisite number of words.

Mr. HOWARD. Mr. Chairman, will the gentleman yield?

Mr. MINETA. I yield to the chairman of our committee, the gentleman from New Jersey.

Mr. HOWARD. I thank the gentleman for yielding.

Mr. Chairman, I want to address two points so that there will not be confusion about the statements made by the gentleman from Pennsylvania.

The gentleman asked the question that if his amendment did not pass, then the effect would be that in the future Davis-Bacon would apply where it has not applied before. The gentleman from Louisiana said that that is correct.

The gentleman is mistaken, because Davis-Bacon has applied all the way through. If his amendment is not adopted, then there will be no change. If his amendment is adopted, then what the Federal Highway Administrator put in the Federal Register would change that operation. So that is one thing.

Another point: The gentleman mentioned that if there is an existing highway and you replace it, it is not initial, so it should not apply. However, I am sure the gentleman knows that there is a definition of what is construction and that has to do with the thickness of the repaving. The law states that if it is over 1½ inches in thickness, then it is construction and it is not maintenance, so it should apply. So that is a second misstatement that we heard.

We just want to make sure everyone here who votes on this has the opportunity to know what they are voting on. So if you want to weaken Davis-Bacon, vote for the amendment; if you want to keep its application, if not its words, but the application the same, then vote no.

I thank the gentleman from California for yielding.

Mr. MINETA. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Louisiana (Mr. ROEMER).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. ROEMER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 191, noes 194, not voting 48, as follows:

[Roll No. 417]

□ 2030

Mr. ROSE changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

Mr. NELSON. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I take this time for the purpose of engaging in a colloquy with the chairman of the subcommittee, and I would like to address this question to him:

Does the committee amendment language contain language that strongly urges the States to raise the legal drinking age to 21 years?

As part of that question, I would point out that this recommendation has been endorsed by the Secretary of Transportation and the Secretary of Health and Human Services and is anticipated to be included in the final recommendations of the President's Commission on Drunken Driving when they issue their final report.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. NELSON. Indeed I yield to the subcommittee chairman.

Mr. ANDERSON. Mr. Chairman, the answer is, yes, we do strongly urge States to raise their legal drinking age to 21.

More and more information has been surfacing that substantiates the fact that young people are a disproportionate number of the fatalities in accidents involving drunken driving. In a study done by the National Highway Traffic Safety Administration, the statistics showed that in 8 States that raised the drinking age to 21, the fatalities of the 18- to 21-year-olds resulting from alcohol-related highway accidents decreased by 28 percent! By raising the drinking age to 21 in each State, we could help to save these young lives—and the lives of their collision victims.

Mr. NELSON. Mr. Chairman, I would like to commend the gentleman for his foresight in including this strong language in the amendment to urge the States, many of which presently have a legal drinking age below 21 years, to raise that drinking age nationwide to 21 years.

Mr. LEVITAS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, first of all I will take this occasion to join with many other members of the committee in expressing admiration and commending the chairman of the subcommittee, the gentleman from Califoria (Mr. ANDERSON), the ranking minority member of the subcommittee, the gentleman from Pennsylvania (Mr. SHUSTER), the chairman of the committee, the gentleman from New Jersey (Mr. HOWARD), and the gentleman from California (Mr. CLAUSEN) for the outstanding job they have done in bringing this extremely important bill to the floor.

Mr. Chairman, there is an expression that says, "clothes make the man," or I guess these days we say, "clothes make the person." The relevance that that little expression has to this legislation today is, I think, worth noting.

On several occasions during the last 4 or 5 years, during the administrations of the last two Presidents, efforts were made to pass legislation very

Mr. LEVITAS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, first of all I will take this occasion to join with many other members of the committee in expressing admiration and commending the chairman of the subcommittee, the gentleman from Califoria (Mr. ANDERSON), the ranking minority member of the subcommittee, the gentleman from Pennsylvania (Mr. SHUSTER), the chairman of the committee, the gentleman from New Jersey (Mr. HOWARD), and the gentleman from California (Mr. CLAUSEN) for the outstanding job they have done in bringing this extremely important bill to the floor.

Mr. Chairman, there is an expression that says, "clothes make the man," or I guess these days we say, "clothes make the person." The relevance that that little expression has to this legislation today is, I think, worth noting.

On several occasions during the last 4 or 5 years, during the administrations of the last two Presidents, efforts were made to pass legislation very similar to that which we are considering today. Those efforts were not only unsuccessful but were overwhelmingly defeated. The Members of this body rejected a gasoline tax, the Members of this body rejected a highway improvement bill. They did not want to have anything to do with it. Even though it may have been needed, nevertheless that was the position that was taken, Mr. Chairman

But we have now dressed the person in some different clothes. It is no longer a gasoline tax; it is a user fee. It is no longer a highway bill, it is an infrastructure improvement program. And no longer is it simply to build highways with a user fee; it is a jobs bill.

So we have taken essentially the same piece of legislation, which may have been needed for quite some time and because we have dressed it in some new clothes and made it no longer a tax but a user fee, no longer a highway bill but an infrastructure improvement program and, above all, a jobs bill, we are now going to see, in my judgment, many Members of this body support this legislation and pass it tonight as a result of the hard work done by many members of the leadership of this committee.

□ 2040

There is one particular provision of the bill that I think is particularly noteworthy, Mr. Chairman, that I would like to make some observations about and ascertain whether the chairman of the subcommittee concurs in my views. That relates to the 3-R program and the safety significance of the 3-R program.

Mr. Chairman, as chairman of the subcommittee that held 4 days of oversight hearings on the subject of standards for resurfacing, restoration, and rehabilitation (3-R) of roads other than freeways, I would like to emphasize that section 112 in H.R. 7360 makes it clear that Federal aid projects constructed in accordance with these standards will comply with the intent of Congress. It is intended that the Secretary of Transportation, in approving or adopting standards or exceptions to standards for these projects, shall not approve variations that will differ with the existing congressionally stated objectives of preserving and extending the service life of highways and enhancing highway safety.

This section's effect will be to place appropriate safety emphasis on 3-R standards. It will overturn any feature

of the Federal Highway Administration's final rule on these standards, implementing instructions to its field offices or standards developed by individual States as a result of this guidance, which are based on the premise that 3-R projects have safety as a secondary or optional objective or that safety need not be enhanced.

The study authorized in the section is proposed in an effort to seek research data for evaluating the safety cost-effectiveness of current highway geometric design criteria, and how they would apply to the development of more appropriate 3-R standards.

Mr. Chairman, in effect, the committee in this legislation will say to the Federal Highway Administration that life enhancement of the project and safety must continue to be primary considerations, not secondary considerations.

I am sure that the chairman of the subcommittee will agree with that evaluation of the section.

Mr. ANDERSON. I agree with the interpretation suggested by my friend, the gentleman from Georgia.

AMENDMENT OFFERED BY MR. WEISS

Mr. WEISS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WEISS:

In section 118(a) of the amendment, strike out paragraph (2) of section 118(b) of title 23, United States Code, as proposed to be inserted, and insert in lieu thereof the following:

"(2) Except as otherwise provided in this subsection, sums apportioned for the Interstate System in any State shall remain available for expenditure in that State for the Interstate System until the end of the fiscal year for which authorized. Sums not obligated within the time period prescribed by the preceding sentence must be made available by the Secretary to any other State applying for such funds for the Interstate System, if the Secretary determines that the State has obligated all of its apportionments other than an amount which, by itself, is insufficient to pay the Federal share of the cost of a project on the Interstate System which has been submitted by such State to the Secretary for approval, and the applicant is willing and able to (A) obligate the funds within one year of the date the funds are made available; (B) apply them on a ready-to-commence project; and (C) in the case of construction work, begin work within ninety days of obligation. Sums made available under this paragraph shall remain available until expended.

Mr. WEISS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. WEISS. Mr. Chairman, at the outset let me apologize to my colleagues for the shape of my voice. I just will not be able to project over any of the background noise.

I want at the outset to express my admiration for both the chairman of the full committee, the gentleman from New Jersey (Mr. HOWARD) and the chairman of the subcommittee, the gentleman from California (Mr. ANDERSON) and, indeed, the ranking members and the members of the committee for being among the most progressive Members of this body as far as public transportation is concerned. Indeed, earlier this afternoon I heard a statement from the gentleman from California (Mr. ANDERSON) with which I totally associate myself as to the need to provide additional and continued funding for operating expenses for public transportation.

The amendment I offer is not intended in any way to denigrate their work. What it seeks to do is correct what I think may be an unintended consequence of a provision of this bill by deleting that section.

The purpose of the amendment is to delete the provision of the bill that redirects interstate highway discretionary funds to the high cost interstate projects.

Let me expand on that. The legislation says that after the apportioned funds to the States have been all made and there are moneys which are not used by particular States for their projects, when those moneys are returned to the Secretary of the Department of Transportation, together with an additional $300 million which is provided for in this legislation, rather than having the moneys redistributed on the basis of merit, on the basis of need, on the basis of length of time in preparation. The money under the provisions of this legislation would have to go to the most expensive, the most costly projects.

That, Mr. Chairman, I think will encourage not a reasoned expenditure of moneys. It will encourage States and localities to build up, to put all kinds of frills on their projects so that in fact they will come in as high cost highway projects.

At a time when we need all of the money that we can get for public transportation purposes, to put an incentive on frills, on high cost highways, just does not make any sense. It flies in the face of everything that this Congress and this administration have been trying to do during the course of these last couple of years.

I happen to think as well that the people who offered that amendment which is included in the legislation are misguided if they believe that they have the high cost project in their district and they are going to come in for the lion's share of the money. The supreme boondoggle of all boondoggles happens to be located in my district.

What I am arguing is not to have this body give a top priority to that project simply because of its outrageously high cost. I have a 4.2-mile stretch of interstate highway in my district which is calculated under current cost estimates to come in at $2.8 billion, the most expensive highway in the history of mankind.

Before the construction is completed the projections are that that 4-mile stretch of highway will probably cost over $4 billion. That is $1 billion a mile.

So let no one in this body think that because they have high costs priority built into this bill that their project is going to come in as the high cost project. My project has you beat to pieces.

What I am urging is that we delete the high cost priority from this legislation and allow the Secretary of Transportation to continue to make this determination on the basis of the merits, on the basis of the needs, and on the basis of the length of time in the pipeline.

The provision I seek to delete creates an incentive to make highway projects as costly as possible, rewarding potential waste on State and local levels. But perhaps more crucial is that it makes highway construction projects appear more attractive to localities than "trading in" highways for mass transit and road repairs by offering assurances that, no matter how high the cost of a particular interstate, the Federal Government will foot the bill. The law gives no such assurances to localities which opt to "trade in."

We have all heard cries in Congress, in the media, and from the Reagan administration about the need to repair our Nation's decaying infrastructure. However, giving priority to high cost interstate highways promotes new construction at the expense of true infrastructure repair.

The legislation before us contains no new controls on how revenues derived from the gas tax increase will be spent. It offers absolutely no way of compelling States and cities to stop deferring maintenance costs in favor of new highways. Hopefully, my amendment will sway some localities to allocate new highway money to road repair and mass transit.

Mr. ANDERSON. Mr. Chairman, I must strongly and emphatically oppose the amendment offered by the gentleman from New York (Mr. WEISS).

There are various interstate projects left in the interstate cost estimate. We certainly have a goal to complete them all.

So that these projects might be completed, hopefully by 1991, the bill before us establishes an interstate discretionary fund and instructs the Secretary of Transportation to consider when he distributes the funds, the ability of a State to fund the project out of its normal apportionments.

Why should discretionary funds, that is those given to a State above and beyond its normal apportionments, why should discretionary funds be given to a State that can fund its interstate out of its regular allotment? Let them build that freeway out of those apportionments.

Discretionary funds should go to those States with more costly projects that otherwise will be delayed for years, because let us remember the costly segments must be built sooner or later and by providing an infusion of additional funds to build these roads today we are preventing the eventual costs of the projects from escalating even more.

□ 2050

Now I know the gentleman from New York recognizes the manner in which interstate projects escalate in price, because the other amendment he has circulated addresses that problem. H.R. 6211 tries to prevent costly delays in the completion of Interstate Systems. The gentleman's amendment will only result in escalating costs and delays in completing this system of national importance.

Mr. CLAUSEN. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. I yield to the gentleman from California.

Mr. CLAUSEN. I thank the gentleman for yielding.

Mr. Chairman, I rise to support the position that has been taken by the chairman of the subcommittee and in opposition to the amendment. What really is at stake here is whether or not we are actually going to be able to complete the Interstate System itself. That is the bottom line.

The administration supports the retention of the discretionary funds and it is a very important tool in our process of completing the Interstate System.

Mr. ANDERSON. We are about 96 percent completed with the Interstate. The problem is some of that which has not been completed are those gaps that are the more costly ones. They are in various parts of the country and they should be finished.

I think it is the priority of most of us to complete the Interstate System as soon as possible.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. WEISS).

The question was taken; and the chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. WEISS. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 21, noes 329, not voting 83, as follows:

□ 2100

Mr. FINDLEY changed his vote from "aye" to "no."

Mr. TAUKE changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WALKER: On page 81, after line 16, add the following: "However, none of the provisions of this section shall be used to limit or in the opinion of the Secretary have the effect of limiting legitimate job opportunities for any individual.".

Mr. PAUL. Mr. Chairman, will the gentleman yield?

Mr. WALKER. Mr. Chairman, I yield to the gentleman from Texas.

Mr. PAUL. Mr. Chairman, I rise in opposition to H.R. 6211, the Surface Transportation Act of 1982.

I recognize the fact that the Nation's highways and bridges are in need of repair, but such repairs should

be financed by genuine "user fees," or out of general revenues. We should not be increasing taxes again during a recession.

H.R. 6211, which contains the infamous gas tax increase, is an ill-conceived, short-term response to the long-term problem of high unemployment. This is but another attempt to shore-up an ailing segment of the economy, without addressing the underlying economic problems. Creating a maximum of 320,000 jobs in a nation with 10.8 percent unemployment would be as effective as giving a sugar pill to a cancer patient.

The rhetoric surrounding this "make-work" bill has led to misconceptions about its future impact. The measures proposed in H.R. 6211 would not alleviate the unemployment problem. Although this bill would create some jobs in the highway construction business, jobs would be lost in other sectors. The tourist industry would suffer, since people would travel less. The American automotive industry would lose sales as people shifted to foreign cars that were more fuel efficient. The trucking industry, which faces increased fuel costs and higher excise taxes, would attempt to pass these costs on to the consumer.

It is an economic principle that governments cannot create wealth, they can merely transfer it. The money used to create these jobs would come at the expense of jobs in other sectors. Even the Chairman of the President's Council of Economic Advisers recognizes this economic reality. Martin Feldstein has stated that this tax increase "may actually increase unemployment during the first year or two."

I must take issue with the claims that this bill would create 320,000 new jobs. Even if jobs would not be lost in other sectors, this is an incredibly optimistic estimate. OMB has found that public works projects are an expensive means of job creation—from $69,320 for each job created. Using OMB's estimates, it would cost over $22 billion just to fund the creation of 320,000 new jobs. Yet proponents of the tax increase claim they can create these jobs and finance other construction costs without using general revenues.

Just as this bill would not create additional jobs, it would not institute a user fee. Tolls are user fees; they are paid on location by those actually using the road. A Federal gas tax, however, is arbitrarily collected and redistributed. The Ways and Means Committee admits that due to the apportionment formulas, certain States will not receive as much money back as they pay in.

In addition, the gas tax is not a true user fee, since one-fifth of the money collected would go to subsidize mass transit renovations. Those who must use the highways would be forced to subsidize those who are able to use mass transit systems.

Having dispensed with the rhetoric, we are left with the obvious: this is simply another tax increase for the overburdened American taxpayer. This increase will fall hardest on the unemployed and those with low incomes. Many in Congress have cried out against the benefits to the rich of the income tax cuts. Yet proponents of this bill are strangely silent about its adverse effects on the poor. The $30 per year this would exact from the average driver will be felt most by those the bill is supposedly designed to aid.

As Members of Congress, we cannot continue pillaging the American people to finance a Federal budget that is running out of control. An objective assessment of the past 20 years shows that simply increasing taxes will not provide for a balanced Federal budget. Personal tax liabilities have risen sharply during this period, yet so have annual budget deficits and the national debt.

The American people made it clear in 1980 that they were tired of high taxes. Since that time, the Nation's economic program has undergone such radical shifts that no one is certain of the current policy. It is not a question of "stay the course," or "alter the course." There simply is no course.

Congress is grasping at the first available program without examining its full impact. Once again, we are proposing to interfere in the workings of the free market. Such interference in the past has created more problems than it has solved. Now we are planning to shuffle money around within the economy in the naive hope that this will cure the Nation's economic ills. We must defeat H.R. 6211 so that the American people will not be forced to endure the consequences of congressional shortsightedness.

Mr. WALKER. Mr. Chairman, I wanted the Clerk to read the amendment in full so that Members would understand the language, and let me read it again so that Members do understand what they are going to be voting on in this language.

The language says this:

However, none of the provisions of this section shall be used to limit or in the opinion of the Secretary have the effect of limiting legitimate job opportunities for any individual.

That is it.

□ 2110

That is it. This is a job opportunities amendment. It goes to that section of the bill that refers to Davis-Bacon.

We have discussed Davis-Bacon here before and we have taken a couple of actions on it. We decided that Davis-Bacon should stay in the whole bill. In fact, on one of the votes we have decided that Davis-Bacon should be expanded over what it has been in the past.

having done that, I think it is extremely important that we speak to the issue that a number of us raised earlier on the floor; that is, that the potential is in that particular decision for limiting the number of jobs that can be created in this bill. All this amendment seeks to do is to assure that that language does not do that; that, in fact, we make certain that the Secretary, in his interpretation of the Davis-Bacon provisions, the expanded Davis-Bacon provisions, administer the law in a way that does not limit job opportunities.

Jobs are supposed to be the highest priority of this body, and no program and no set of regulations is more important to the American people than doing something about jobs. At a time when there are 12 million Americans officially classified as unemployed, the very last position the Federal Government should be in is that of denying legitimate job opportunities to people who are willing to work.

Furthermore, it is crucial that we stop nibbling at the margins of the unemployment problem and focus on the root cause of that problem. People need jobs, they want to work, and in my opinion it is a crime that we should impose a major obstacle to their obtaining gainful employment with some provisions that the Federal Government itself enacts.

What this amendment does is assure that we are not erecting those kinds of obstacles as we administer the law in this particular bill. As we administer this expanded Davis-Bacon coverage, we should not be in the process of limiting job opportunities.

Supposedly what we are doing in this bill is creating more jobs. If we adopt this amendment that I am talking about here, what we will get is what we supposedly want, and that is more jobs, because we will force the interpretation of this bill to assure that in these times of crisis we stop denying jobs and we actually put people to work.

So I would urge the Members of this body, even if you voted against the two previous amendments relating to Davis-Bacon, you will endorse this particular amendment which seeks to do what I think all of us want to do, what we have all been telling our constitutents we want to do: Let us have the Federal Government administered in a way that creates jobs, does not hinder jobs.

This amendment, and I will read the language again so that you will know that you are voting only on something that relates to job opportunties, says:

However, none of the provisions of this section shall be used to limit or in the opinion of the Secretary have the effect of limit-

ing legitimate job opportunities for any individual.

Nothing could be clearer. If you vote for this amendment you are voting for job opportunities; if you vote against the amendment, you are seeking to deny the job opportunities, as has been done in too many of the administrative decisions in the past.

Mr. STRATTON. Mr. Chairman, will the gentleman yield to me?

Mr. WALKER. I would yield to the gentleman from New York.

Mr. STRATTON. I thank the gentleman for yielding.

Mr. Chairman, do I understand the gentleman from Pennsylvania (Mr. WALKER) to say the lower the pay the better the job opportunities are? Are we seeking to try to pay out as little in this program as possible?

Mr. WALKER. I think it would relate to what the prevailing wage rate of a particular area is.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. WALKER) has expired.

(By unanimous consent, Mr. WALKER was allowed to proceed for 1 additional minute.)

Mr. WALKER. We certainly do not want to pay below prevailing wages, but the fact is, the Department of Labor prevailing wage tends in some cases to be double what the overall prevailing wage is in the area. We can create more jobs if we pay the prevailing wage.

I do not know where Otsego County is in New York.

Mr. STRATTON. Mr. Chairman, if the gentleman will yield further, that used to be in my district.

Mr. WALKER. Very well. The gentleman might be interested. The General Accounting Office, in taking a look there at some job rebuilding program found that a bulldozer operator was paid under the Davis-Bacon Act $10.40 an hour; whereas, the prevailing wage rate in the area at that time was $4.75, which means that one additional person could have been hired if they had just stuck to the prevailing wage, at what we were paying Federal Government wages.

So, in fact, it does have the effect of limiting job opportunities. All I am saying is that we should not be limiting job opportunities. That is true in a number of other categories, I might say to the gentleman.

Mr. STRATTON. Mr. Chairman, if the gentleman will yield further, the gentleman would not insist would he that we ought to get as cheap a proposal as possible? Does not the gentleman want quality workmanship, quality performers, from quality contractors, when our bridges are being repaired. Otherwise, the bridges will fall down again, will they not?

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. WALKER) has again expired.

(By unanimous consent, Mr. WALKER was allowed to proceed for 2 additional minutes.)

Mr. WALKER. I will say to the gentleman that the emphasis that we should have as our top priority in this country today is the creation of jobs. Anything which stands in the way of creation of jobs, it seems to me, is going against what the American people said very clearly in the mandate in November was their top priority.

All this gentleman is seeking to do is assure that we meet the mandate; that we do what the American people told us to do. I do not think we can take any kind of perk that we might establish through Federal legislation and put that as a priority over and above job opportunities.

My amendment says only that job opportunities should be the standard by which we measure the performance of this program, and I would hope the Members would adopt an amendment aimed at creating better job opportunities.

Mr. HOWARD. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. HOWARD. Mr. Chairman, the amendment reads:

However, none of the provisions of this section shall be used to limit, or in the opinion of the Secretary have the effect of limiting legitimate job opportunities for any individual.

That means that the Secretary of Transportation, on his own, may waive, eliminate the Davis-Bacon Act totally for all or any part of this legislation.

It will provide more jobs. The Secretary then would have the right to provide twice as many jobs at half the price, 4 times as many jobs at one-fourth the price, 10 times as many jobs at one-tenth the price.

I believe this is the most outrageous of any of the amendments on Davis-Bacon and think it ought to be defeated. I urge that it be defeated.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. WALKER).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. WALKER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 149, noes 217, not voting 67, as follows:

□ 2130

Mr. MARTIN of New York and Mr. RALPH M. HALL changed their votes from "aye" to "no."

So the amendment was rejected.

The result of the vote was announced as above recorded.

Mr. MICHEL. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I will be very brief. I would like to engage the gentleman from California (Mr. CLAUSEN) in a brief colloquy. Would he be willing to have an exchange with the gentleman from Illinois on a matter which he considers to be of some importance?

Mr. CLAUSEN. I would be delighted to have an exchange with the minority leader.

Mr. MICHEL. Mr. Chairman, this bill, as I understand it, would eliminate funding for the priority primary program. This program has been a critical source of funds for highway projects in Illinois, including one in my district—the Peoria North Bypass—and we would suffer a severe adverse impact should this program suddenly be brought to a halt.

We prepared an amendment to be offered by the gentlewoman from Illinois (Mrs. MARTIN) which would authorize continued funding for these projects under a 4-year demonstration program to complete usable segments of larger planned routes. This demonstration project proposed would substantially reduce the Federal commitment needed to complete those projects and would also have the benefit of not extending the priority primary program itself.

Rather than going the amendment route, however, I would be willing to accept the gentleman's assurances that he would work in conference to achieve a solution along this line so that we can complete these projects.

Would the gentleman be willing to provide such assurances?

Mr. CLAUSEN. Mr. Chairman, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from California.

Mr. CLAUSEN. Mr. Chairman, we have proposed elimination of the priority primary program because the total ultimate cost would have exceeded $3 billion. I understand the gentleman's concern and will continue to explore avenues of compromise.

Mr. MICHEL. Mr. Chairman, that would certainly help those of us who have this concern. Given that assurance, it is my understanding that the members would do their best in the conference to accomplish that, and the gentlewoman from Illinois (Mrs. MARTIN) will not offer her amendment. That would at least eliminate one of the seven or so amendments pending at the desk.

Mr. Chairman, I thank the gentleman for his response.

Mr. HOWARD. Mr. Chairman, I ask unanimous consent that the debate on the remaining amendments and all amendments thereto to the first four titles of this legislation, namely, the Committee on Public Works and Transportation titles, be limited to 10 minutes each, 5 minutes in favor and 5 minutes in opposition.

The CHAIRMAN. Does the gentleman request first that the remaining titles be considered as read?

Mr. HOWARD. Mr. Chairman, I make that unanimous consent request also.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

Mr. GAYDOS. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

AMENDMENT OFFERED BY MR. WEISS

Mr. WEISS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WEISS: Strike out subsection (c) of section 107 of the amendment and redesignate subsections (d), (e), (f), and (g) of such section 107 as subsections (c), (d), (e), and (f), respectively.

□ 2140

Mr. WEISS. Mr. Chairman, the purpose of this amendment is to reinstate the so-called inflation escalator for interstate transfer funding.

Under the interstate transfer program States and cities can trade in interstate funds in exchange for mass transit improvements and road repairs. Under current law transfer appropriations are modified periodically to reflect the highway construction cost estimate. As such they tend to accelerate with inflation.

Interstate highway funds are afforded the same treatment. A provision in H.R. 7360, the bill before us, would place a ceiling on transfer project costs at 1983 levels but not on highway funds. As a result, cities already owed trade-in money, and there are some 26 of them, could stand to lose tens of millions of dollars and cities considering trading in interstate links would be encouraged instead to build highways, the cost of which would increase with inflation.

The inflation escalator, insures that States receive full and sufficient funding for trade-in projects since Congress is forced to spread out trade-in appropriations over many years.

It is essential to provide a balanced option for localities which must choose between highway construction and infrastructure repair. The interstate transfer program, the trade-in program provides an effective vehicle in allotting funds to where they are most needed, our existing roads, subways and buses.

Without the passage of this amendment, 26 cities which are already owed trade-in funds around this country could stand to lose tens, perhaps hundreds of millions of dollars. These cities, including many of the Nation's largest, applied for trade-in funds assuming they would increase with inflation. In midcourse this bill now wants to go back on its commitment, costing these cities vital repair money and in the process discouraging other cities from trading in highway projects for mass transit improvements and road repairs.

Clearly funding under the interstate transfer section of this legislation must be permitted to increase with inflation to help insure that funds are going where they are truly needed, to repair our Nation's crumbling infrastructure.

I urge my colleagues to support this amendment in order to provide fair treatment both for public transit as well as for highways.

Mr. ANDERSON. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, this amendment does reimpose the inflation escalator, perhaps better known as the Abzug amendment for the interstate transfer program.

The Abzug amendment has actually had the effect of giving States that traded in, say, a $300 million project, many times that amount over the years, and the Federal Government

may still owe them over the $300 million that they initially traded in. There have been many such cases documented.

Our bill, H.R. 6211, does indeed eliminate the inflation-escalator provision. In so doing it restores sense and order to the interstate transfer program.

Mr. CLAUSEN. Mr. Chairman, I move to strike the requisite number of words and rise in opposition to the amendment.

Also I concur in the remarks made by the gentleman from California (Mr. ANDERSON), chairman of the subcommittee. The interstate transfer has been on the books since 1973. The ability to let project costs escalate has been literally an inducement to localities for delaying a decision on building or withdrawing interstate segments. The net effect has been that they put the projects back as costs increase.

The bill caps this escalator provision effective in 1983, the deadline for the interstate withdrawals.

These localities which deferred decisions have in our judgment waited long enough. The cost escalator should no longer serve as an incentive to delay. We need to get on with the completion of the interstate system and if they cannot meet the local project sponsorship responsibilities those funds ought to be allocated elsewhere.

Therefore the amendment ought to be rejected.

Mr. CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. WEISS).

The amendment was rejected.

Mr. HOWARD. Mr. Chairman, I ask unanimous consent that all four titles of public works section of this legislation be considered as read, printed in the RECORD and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Titles II, III, and IV read as follows:

TITLE II

SHORT TITLE

SEC. 201. This title may be cited as the "Highway Safety Act of 1982".

HIGHWAY SAFETY AUTHORIZATIONS

SEC. 202. The following sums are hereby authorized to be appropriated:

(1) For bridge replacement and rehabilitation under section 144 of title 23, United States Code, out of the Highway Trust Fund, $1,500,000,000 (reduced by the amount authorized by section 5(a)(1) of the Federal-Aid Highway Act of 1982) for the fiscal year ending September 30, 1983, $1,600,000,000 for the fiscal year ending September 30, 1984, $1,700,000,000 for the fiscal year ending September 30, 1985, $2,100,000,000 for the fiscal year ending September 30, 1986.

(2) For projects for elimination of hazards under section 152 of title 23, United States Code, out of the Highway Trust Fund, $200,000,000 (reduced by the amount authorized by section 5(a)(2) of the Federal-Aid Highway Act of 1982) for the fiscal year ending September 30, 1983, $200,000,000 for the fiscal year ending September 30, 1984, $200,000,000 for the fiscal year ending September 30, 1985, and $200,000,000 for the fiscal year ending September 30, 1986.

HIGHWAY SAFETY

SEC. 203. (a)(1) There is hereby authorized to be appropriated for carrying out section 402 of title 23, United States Code (relating to highway safety programs), by the National Highway Traffic Safety Administration, out of the Highway Trust Fund, $100,000,000 per fiscal year for each of the fiscal years ending September 30, 1985, and September 30, 1986.

(2) Out of the funds authorized to be appropriated under paragraph (1) of this subsection for each of the fiscal years ending September 30, 1985, and September 30, 1986, not less than $20,000,000 per fiscal year shall be obligated under section 402 of title 23, United States Code, for the purpose of enforcing the fifty-five-miles-per-hour speed limit established by section 154 of such title.

(3) Each State shall expend each fiscal year not less than 2 per centum of the amount apportioned to it for such fiscal year of the sums authorized by paragraph (1) of this subsection, for programs to encourage the use of safety belts by drivers of, and passengers in, motor vehicles.

(b)(1) Notwithstanding any other provision of law, the total of all obligations for highway safety programs carried out by the National Highway Traffic Safety Administration under section 402 of title 23, United States Code, shall not exceed $100,000,000 per fiscal year for each of the fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986, and the total of all obligations for highway safety programs carried out by the Federal Highway Administration under section 402 of title 23, United States Code, shall not exceed $10,000,000, per fiscal year for each of such fiscal years.

(2) Section 1107(b) of the Omnibus Budget Reconciliation Act of 1981 is amended by striking out "$100,000,000, per fiscal year for each of the fiscal years ending September 30, 1982, September 30, 1983, and September 30, 1984," and inserting in lieu thereof "$100,000,000 for the fiscal year ending September 30, 1982," and by striking out "$10,000,000, per fiscal year for each of such fiscal years" and inserting in lieu thereof "$10,000,000 for such fiscal year".

(c) Section 202 of the Highway Safety Act of 1978 is amended as follows:

(1) Paragraph (2) is amended by striking out "and September 30, 1984." and inserting in lieu thereof "September 30, 1984, September 30, 1985, and September 30, 1986.".

(2) Paragraph (3) is amended by striking out "and September 30, 1984." and inserting in lieu thereof "September 30, 1984, September 30, 1985, and September 30, 1986.".

(3) Paragraph (5) is amended by striking out "and September 30, 1984." and inserting in lieu thereof "September 30, 1984, September 30, 1985, and September 30, 1986.".

(d) Of the funds authorized to be appropriated by section 202(3) of the Highway Safety Act of 1978 for any fiscal year ending before October 1, 1982, which have not been obligated for expenditure before the date of enactment of this Act, $9,600,000 shall not be available for obligation, and shall no longer be authorized, on and after such date of enactment.

MAXIMUM SPEED LIMIT

SEC. 204. Section 154(a) of title 23, United States Code, is amended by inserting immediately after the first sentence the following new sentence: "The Secretary of Transportation shall not approve any project under section 106 in any State whose laws do not constitute a substantial deterrent to violations of the maximum speed limit on public highways within its jurisdiction.".

RAIL-HIGHWAY CROSSINGS

SEC. 205. The first sentence of subsection (b) of section 203 of the Highway Safety Act of 1973 (Public Law 93-87), as amended, is amended by inserting "and" after "1979," and by striking out "and September 30, 1982" and all that follows through the period at the end of such sentence and inserting in lieu thereof "September 30, 1982, September 30, 1933, September 30, 1984, September 30, 1985, and September 30, 1986.".

PUBLIC INFORMATION

SEC. 206. Section 209 of the Highway Safety Act of 1978 is amended by striking out ", acting through the Administrator of the Federal Highway Administration," each place it appears, in subsection (g) by striking out "Federal Highway Administration to" and inserting in lieu thereof "Secretary of Transportation to", and by adding at the end of such section the following new subsection:

"(i) All provisions of chapter 1 of title 23, United States Code, that are applicable to Federal-aid primary highway funds, other than provisions relating to the apportionment formula and provisions limiting the expenditure of such funds to the Federal-aid systems, shall apply to the funds authorized to be appropriated to carry out this section, except as determined by the Secretary to be inconsistent with this section.".

SAFETY PERFORMANCE REPORTS

SEC. 207. The Secretary of Transportation shall prepare, publish, and submit to Congress not later than December 31 of each calendar year beginning after December 31, 1982, a report on the highway safety performance of each State in the preceding calendar year. Such report shall provide data on highway fatalities and injuries and motor vehicle accidents involving fatalities and injuries and travel in urban areas of each State for each system of highways and in rural areas of such State for each system of highways. Such report shall be in such form and contain such other information on highway accidents as will permit an evaluation and comparison of highway safety performance of the States. For purposes of this section (1) the systems of highways in a State are the Federal-aid primary system, the Federal-aid secondary system, the Federal-aid urban system, and the Interstate System (as such terms are defined in section 101 of title 23, United States Code) and the other highways in such State which are not on the Federal-aid system, and (2) the terms "State", "rural areas", and "urban area" have the meaning such terms have under such section 101.

ANNUAL APPORTIONMENT FORMULA

SEC. 208. The sixth sentence of section 402(c) of title 23, United States Code, is amended by striking out ", except that the apportionments to the Virgin Islands, Guam, and American Samoa shall not be less than one-third of 1 per centum of the total apportionment".

MINIMUM DRINKING AGE

SEC. 209. The Congress strongly encourages each State to prohibit the sale of alcoholic beverages to persons who are less than 21 years of age.

TITLE III

SHORT TITLE

SEC. 301. This title may be cited as the "Federal Public Transportation Act of 1982".

AUTHORIZATIONS OF APPROPRIATIONS

SEC. 302. (a) The Urban Mass Transportation Act of 1964 is amended by striking out sections 21 and 22 ad inserting in lieu thereof the following new section:

"AUTHORIZATIONS OF APPROPRIATIONS

"SEC. 21. (a)(1) There is hereby authorized to be appropriated to carry out the provisions of sections 3, 4(i), 8, 9, 16(b), and 18 of this Act not to exceed $3,710,000,000 for the fiscal year ending September 30, 1983, $3,910,000,000 for the fiscal year ending September 30, 1984, $4,120,000,000 for the fiscal year ending September 30, 1985, and $4,350,000,000 for the fiscal year ending September 30, 1986.

"(2) In each fiscal year, 25 per centum of the sums authorized to be appropriated under this subsection shall be available from the transit account of the Highway Trust Fund only to carry out sections 3, 4(i), 8, and 16(b) of this Act. Notwithstanding any other provision of law, approval by the Secretary of a grant under any such section shall be deemed a contractual obligation of the United States for payment of the Federal share of the cost of the project.

"(3) In each fiscal year, 2.93 per centum of the amount appropriated from the general fund of the Treasury under this subsection for such fiscal year shall be available to carry out section 18 of this Act and shall remain available until expended.

"(b) There is hereby authorized to be appropriated to carry out sections 6, 10, 11(a), 12(a), and 20 of this Act not to exceed $90,000,000 per fiscal year for each of fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986. Sums appropriated pursuant to this subsection for financing projects funded under section 6 of this Act shall remain available until expended.".

(b) Section 4(c)(3)(A) of such Act is amended by inserting "and" after "September 30, 1981;" and by striking out "; and $1,580,000,000 for the fiscal year ending September 30, 1983".

(c) Section 4(f) of such Act is amended by striking out "18, 21, and 22," and inserting in lieu thereof "and 18,".

BLOCK GRANTS

SEC. 303. (a) The Urban Mass Transportation Act of 1964 is amended by inserting immediately after section 8 the following new section:

"BLOCK GRANTS

"SEC. 9. (a)(1) Of the amount appropriated from the general fund of the Treasury to carry out section 21(a) of this Act, 8.73 per centum shall be available for expenditure under this section in each fiscal year only in urbanized areas with a population of less than 200,000.

"(2) Of the amount appropriated from the general fund of the Treasury to carry out section 21(a) of this Act, 88.34 per centum shall be available for expenditure under this section in each fiscal year only in urbanized areas with a population of 200,000 or more.

"(b)(1) Funds available under subsection (a)(1) of this section shall be apportioned on the basis of a formula under which urbanized areas of less than 200,000 population or parts thereof shall be entitled to receive an amount equal to the sum of—

"(A) one-half of the total amount so apportioned multiplied by the ratio which the population of such urbanized area or part thereof, as designated by the Bureau of Census, bears to the total population of all such urbanized areas in all the States as shown by the latest available Federal census; and

"(B) one-half of the total amount so apportioned multiplied by a ratio for that urbanized area determined on the basis of population weighted by a factor of density, as determined by the Secretary.

As used in this paragraph and paragraph (2)(A)(ii) of this subsection, the term 'density' means the number of inhabitants per square mile.

"(2) Of the funds available under subsection (a)(2) of this section—

"(A) 50.64 per centum of the amount appropriated to carry out section 21(a) of this Act shall be apportioned among urbanized areas of 200,000 population or more as follows:

"(i) 25 per centum of the total amount so apportioned multiplied by the ratio which the population of such an urbanized area or part thereof, as designated by the Bureau of the Census, bears to the total population of all such urbanized areas in all the States as shown by the latest available Federal census;

"(ii) 25 per centum of the total amount so apportioned multiplied by a ratio for that urbanized area determined on the basis of population weighted by a factor of density, as determined by the Secretary; and

"(iii) 50 per centum of the amount so apportioned multiplied by the ratio which the number of bus revenue vehicle miles directly serving such urbanized area, as determined by the Secretary, bears to the total number of all bus revenue vehicle miles directly serving all such urbanized areas;

"(B) 28.6 per centum of the amount appropriated to carry out section 21(a) of this Act shall be apportioned among urbanized areas of 200,000 population or more as follows:

"(i) 70 per centum of the amount so apportioned multiplied by the ratio which the number of fixed guideway revenue vehicle miles directly serving the urbanized area, as determined by the Secretary, bears to the total number of all fixed guideway revenue vehicle miles directly serving all such urbanized areas; and

"(ii) 30 per centum of the amount so apportioned multiplied by the ratio which the number of fixed guideway route miles directly serving the urbanized area, as determined by the Secretary, bears to the total number of all fixed guideway route miles directly serving all such urbanized areas;

"(C) 6.5 per centum of the amount appropriated to carry out section 21(a) of this Act shall be apportioned among urbanized areas of 200,000 population or more as follows: in the ratio that the number of bus passenger miles traveled multiplied by the number of bus passenger miles traveled for each dollar of operating cost in each such urbanized area bears to the sum of the number of bus passenger miles traveled multiplied by the number of bus passenger miles traveled for each dollar of operating cost in all such urbanized areas; and

"(D) 2.6 per centum of the amount appropriated to carry out section 21(a) of this Act shall be apportioned among urbanized areas of 200,000 population or more as follows: in the ratio that the number of fixed guideway vehicle passenger miles traveled multiplied by the number of fixed guideway vehicle passenger miles traveled for each dollar of operating cost in each such urbanized area bears to the sum of the number of fixed guideway vehicle passenger miles traveled multiplied by the number of fixed guideway vehicle passenger miles traveled for each dollar of operating cost in all such urbanized areas.

For the purposes of this paragraph, bus and fixed guideway revenue vehicle miles which a public body provides itself or under contract which directly serve an urbanized area with a population of 200,000 or more but are provided outside of such urbanized area, and passengers served thereby, shall be included in the apportionments under this paragraph. Any such fixed guideway revenue vehicle miles provided in a State adjacent to the State or States in which such urbanized area is located, and passengers served thereby, shall be attributed to the public body in the adjacent State which contracts, directly or indirectly, for such service as if the public body were an urbanized area with a population of 200,000 or more.

"(c)(1) Sums apportioned by subsection (b)(1) of this section shall be made available to the Governor in accordance with section 5(b)(2) of this Act.

"(2) Sums apportioned by subsection (b)(2) of this section shall be made available to designated recipients in accordance with section 5(b)(1) of this Act.

"(d) The Federal share and the non-Federal share of any project under this section shall be determined in accordance with section 5(e) of this Act, except as otherwise provided in subsection (h) of this section.

"(e)(1) The provisions of sections 3(e), 3(f), 3(g), 5(k)(3), 8, 12(c), 13, 16, and 19 shall apply to this section and to every grant made under this section. No other condition, limitation, or other provision of this Act, other than as provided in this section, shall be applicable to this section and to grants made under this section.

"(2) Every person receiving a grant (including any person receiving funds from a Governor under this section) shall submit to the Secretary annually a certification that such person—

"(A) has or will have the legal, financial, and technical capacity to carry out the proposed program of projects;

"(B) has or will have satisfactory continuing control, through operation or lease or otherwise, over the use of the facilities and equipment, and will maintain such facilities and equipment in operational order;

"(C) has or will have a competitive process to procure professional services, facilities, and equipment;

"(D) will comply with the provisions of section 401 of the Surface Transportation Assistance Act of 1978;

"(E) has conducted public hearings (or has afforded the opportunity for such hearings) and that these hearings included (or were scheduled to include) consideration of the economic and social effects of such program of projects, its impact on the environment, and its consistency with the goals and objectives of such urban planning as has been promulgated by the urbanized area or part thereof;

"(F) will comply with requirements of section 5(m) of this Act;

"(G) will give the rate required by section 5(m) of this Act to any person presenting a medicare card duly issued to that person pursuant to title II or title XVIII of the Social Security Act.

"(f)(1) No grant shall be made under this section to any person unless the Secretary has accepted a certification for that fiscal year by that person submitted pursuant to subsection (e) of this section.

"(2) Acceptance by the Secretary of a certification under this section may be rescinded by the Secretary at any time, if, in his opinion, it is necessary to do so.

"(g)(1) The Secretary shall not make any grant under this section unless the applicant for the grant and any person or organization to receive benefits directly from that grant are subject to a reporting system and a uniform system of accounts and records prescribed in accordance with section 15(a) of this Act.

"(2) Every person receiving a grant under this section shall submit to the Secretary annually an independent audit of grant expenditures. On the basis of such audit the Secretary shall determine whether the grant agreement has been complied with. The Secretary is authorized to make adjustments in grants made or to be made under this section, including but not limited to withholding or reducing a grant.

"(h)(1) Grants made under this section may be expended for construction, or for operating assistance in accordance with paragraph (2) of this subsection.

"(2)(A) In any fiscal year for which funds are authorized to carry out this section, any recipient of such funds located in an urbanized area designated as such based upon the 1970 decennial census may obligate such funds for operating assistance only in an amount not to exceed the amount of Federal funds such recipient was apportioned under sections 5(a)(1)(A), 5(a)(2)(A), and 5(a)(3)(A), or allocated from such an apportionment for operating assistance for fiscal year 1982. Any recipient of funds under this section located in such an urbanized area who had total maintenance expenditures in fiscal year 1982 in an amount more than twice the amount of Federal funds such recipient was apportioned under sections 5(a)(1)(A), 5(a)(2)(A), and 5(a)(3)(A) or allocated from such an apportionment for fiscal year 1982 must expend any funds under this section, other than for construction, only for maintenance. Any recipient of funds under this section in such an urbanized area who had total maintenance expenditures in fiscal year 1982 less than twice the amount of Federal funds such recipient was apportioned under sections 5(a)(1)(A), 5(a)(2)(A), and 5(a)(3)(A), or allocated from such an apportionment in fiscal year 1982 who elects to expend funds under this section for other than construction purposes must expend such funds only for maintenance until the expenditures equal an amount equal to at least one-half of the total expenditure by such recipient for maintenance in fiscal year 1982. Any recipient of funds under this section located in an urbanized area designated for the first time as such based upon the 1980 decennial census shall give priority in the expenditure of such funds for operating assistance to maintenance purposes.

"(B) If in any fiscal year a recipient of funds subject to a limitation under the first three sentences of subparagraph (A) of this paragraph on the use of such funds for operating assistance (including maintenance), uses for construction any part of the funds available to such recipient for operating assistance (including maintenance), the Federal share of such construction project payable from such funds for such fiscal year shall be 95 per centum of the cost of such project. If in any fiscal year such a recipient uses all funds available to it under this section for construction, the Federal share of the cost of each construction project payable from that part of the funds under this section which are available without limitation under this paragraph, and from funds under section 3 of this Act, for such fiscal year shall be 90 per centum. If in any fiscal year such a recipient uses more than 50 per centum but less than 100 per centum of the funds under this section subject to a limitation on their use for operating assistance (including maintenance), for construction, the Federal share of the cost of each construction project payable from that part of the funds under this section which are available without limitation under this paragraph, and payable from funds under section 3 of this Act, for such fiscal year shall be 85 per centum.

"(i) Sums apportioned under this section shall be available for obligation for a period of three years following the close of the fiscal year for which sums are apportioned. Any amounts so apportioned remaining unobligated at the end of such period shall be added to the amount available for apportionment under this section for the succeeding fiscal year.".

(b) Section 3(a)(1)(B) of the Urban Mass Transportation Act of 1964 is amended by inserting immediately after "section (5)(a)(4)" the following: "and section 9".

(c) The second sentence of section 4(a) of the Urban Mass Transportation Act of 1964 is amended by striking out "The" and inserting in lieu thereof the following: "Except as otherwise provided in section 9(h)(2)(B), the".

(d) Section 3(a)(2)(A) of the Urban Mass Transportation Act of 1964 is amended by striking out "and" at the end of clause (i), by striking out the period at the end of clause (ii) and inserting in lieu thereof "; and", and by adding at the end thereof the following:

"(iii) sufficient capability to maintain the facilities and equipment.".

(e)(1) No urbanized area shall receive an amount under section 9 of the Urban Mass Transportation Act of 1964 for the fiscal year ending September 30, 1983, which is less than the amount such urbanized area received under section 5 of such Act for the fiscal year ending September 30, 1982.

(2) There is authorized to be appropriated to the Secretary of Transportation to make payments under this subsection not to exceed $2,000,000 per fiscal year for each of the fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986.

LETTER OF INTENT

SEC. 304. (a) Section 3(a)(4) of the Urban Mass Transportation Act of 1964 is amended by inserting immediately after the first sentence thereof the following: "At least thirty days prior to the issuance of a letter of intent under this paragraph, the Secretary shall notify, in writing, the Committee on Public Works and Transportation of the House of Representatives, and the Committee on Banking, Housing, and Urban Affairs of the Senate, of the proposed issuance of such letter of intent.".

(b) Section 3(a)(4) of the Urban Mass Transportation Act of 1964 is amended by striking out "in section 4(c)" and inserting in lieu thereof the following: "to carry out section 3".

RESEARCH AND TRAINING GRANTS

SEC. 305. (a) Section 4(d) of the Urban Mass Transportation Act of 1964 is amended by striking out "and September 30, 1982" and inserting in lieu thereof "September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986".

(b) Section 11(b)(5) of the Urban Mass Transportation Act of 1964 is amended to read as follows:

"(5) As a condition to project approval, the amount of the Federal grant must be equally matched from other than Federal funds.".

COMPETITIVE PROCUREMENT

SEC. 306. Paragraph (2) of subsection (b) of section 12 of the Urban Mass Transportation Act of 1964 is amended to read as follows:

"(2) In lieu of requiring that contracts for the acquisition of rolling stock be awarded based on consideration of performance, standardization, life-cycle costs and other factors, or on the basis of lowest initial capital cost, such contracts may be awarded based on a competitive procurement process. The Secretary of Transportation shall report to Congress within a year of enactment of the Federal Public Transportation Act of 1982 on any legislative or administrative revisions required to ensure that procurement procedures are fair and competitive.".

DEFINITION OF FIXED GUIDEWAY

SEC. 307. Section 12(c)(2) of the Urban Mass Transportation Act of 1964 is amended by inserting "or rails" immediately after "separate right-of-way" and by striking out the semicolon at the end of such paragraph (2) and inserting in lieu thereof a comma and the following: "and also means a public transportation facility which uses a fixed catenary system and utilizes a right-of-way usable by other forms of transportation;".

ADVERTISING FOR BIDS

SEC. 308. Section 12 of the Urban Mass Transportation Act of 1964 is amended by striking out subsection (g).

PERFORMANCE REPORTS

SEC. 309. (a) The Secretary of Transportation shall report to Congress in January of 1984 and in January of every second year thereafter his estimates of the current performance and condition of public mass transportation systems together with recommendations for any necessary administrative or legislative revisions.

(b) In reporting to Congress pursuant to this section, the Secretary shall prepare a comprehensive assessment of public transportation facilities in the United States. The Secretary shall also assess future needs for such facilities and estimate future capital requirements and operation and maintenance requirements for one-, five-, and ten-year periods at specified levels of service.

CONSTRUCTION CONDITION

SEC. 310. The Secretary of Transportation shall only make available Federal financial assistance to the Metropolitan Atlanta Rapid Transit Authority for the construction of the proposed fixed rail line from Doraville, Georgia, to the Atlanta Hartsfield International Airport on the condition that the portion of such line extending north from Lenox Station to Doraville and the portion of such line extending south from Lakewood Station to the Atlanta Hartsfield

International Airport will be constructed simultaneously in usable segments so that revenue passenger service to Doraville and such airport shall commence at approximately the same time. This section shall apply until priorities different from those set forth in the preceding sentence are adopted after September 30, 1983, by a valid act of the Georgia General Assembly and by a valid resolution of the Board of the Metropolitan Atlanta Rapid Transit Authority.

LOAN REPAYMENT

SEC. 311. (a) The Massachusetts Bay Transportation Authority shall have no obligation to repay the United States 80 per centum of the principal and the interest owed on the following loans entered into with the Secretary of Transportation under the Urban Mass Transportation Act of 1964 for the acquisition of rights-of-way: the loan numbered MA03-9001 entered into on January 26, 1973, and the loan numbered MA23-9010 entered into on December 20, 1976.

(b)(1) The Secretary of Transportation may convert the remaining 20 per centum of the principal and interest owed on the loans described in subsection (a) to grants under the conditions set forth in paragraph (2).

(2) In lieu of the local matching share otherwise required, the grant agreement may provide that State or local funds shall be committed to public transportation projects in the urbanized area, on a schedule acceptable to the Secretary of Transportation, in an amount equal to the local share that would have been required had the amount of principal and interest forgiven under subsection (a) been the Federal share of a capital grant made when the original loan was made. The State or local funds contributed under the terms of the preceding sentence shall be made available for capital projects eligible for funding under section 3(a) of the Urban Mass Transportation Act of 1964 and may not be used to satisfy the local matching requirements for any other grant project.

ADVANCE ACQUISITION OF RIGHTS-OF-WAY

SEC. 312. Section 3(a)(1)(A) of the Urban Mass Transportation Act of 1964 is amended by striking out "and" the second place it appears and by inserting immediately before the semicolon at the end thereof the following: ", and the acquisition of rights-of-way, and relocation, for fixed guideway corridor development for projects in advanced stages of any such detailed alternatives analyses or preliminary engineering".

FEASIBILITY STUDY

SEC. 313. (a) The Secretary of Transportation shall make a grant to the Massachusetts Bay Transportation Authority to conduct a feasibility study to examine the possibility of replacing either one or all three of the existing electric trolley bus lines (and thereby eliminating the overhead power lines) in Cambridge, Massachusetts, with the more advanced and equally environmentally sound electric bus technology that is being developed in the State of California for the Santa Barbara transit system.

(b) Notwithstanding section 21(a)(2) of the Urban Mass Transportation Act of 1964, of the amount made available by such section 21(a)(2) for the fiscal year ending September 30, 1983, $500,000 shall be available only to carry out this section and such amount shall remain available until expended.

STUDY OF LONG-TERM LEVERAGE FINANCING

SEC. 314. The Secretary of Transportation shall conduct a study on the possibility of providing an assured flow of Federal funds under long-term contracts with local or State transit authorities for use in leveraging further capital assistance from State or local government or private sector sources. The study shall include estimates of how much additional revenues could be raised by local transit authorities through such a mechanism, how much additional rail mileage or capital construction could be financed, which local jurisdictions might make use of such a provision, and what kinds of matching requirements could be employed. In conducting the study, the Secretary shall consider other Federal program areas where this type of financing arrangement has been used, and any examples of similar arrangements at the State or local level. Within four months of the date of enactment of this Act, the Secretary shall submit to the Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on Public Works and Transportation of the House a report of such study, including recommendations on how this type of financing arrangement might be implemented.

TITLE IV

BUY AMERICA

SEC. 401. (a) Section 401 of the Surface Transportation Assistance Act of 1978 is amended by adding at the end thereof the following new subsections:

"(c) For purposes of this section, in calculating components' costs in order to meet the 'substantially all' requirement, labor costs involved in final assembly should not be included in the calculation.

"(d) The Secretary of Transportation shall not impose any limitation or condition on assistance provided under this Act, the Urban Mass Transportation Act of 1964, or title 23, United States Code, which restricts any State from imposing more stringent requirements than this section on the use of articles, materials, and supplies mined, produced, or manufactured in foreign countries in projects carried out with such assistance or restricts any recipient of such assistance from complying with such State-imposed requirements, provided that these State requirements do not conflict with the exceptions specified in subsection (b).".

(b) Section 401(b)(4) of the Surface Transportation Assistance Act of 1978 is amended by striking out "10 per centum" and inserting in lieu thereof "20 per centum".

AMENDMENT OFFERED BY MR. NAPIER

Mr. NAPIER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. NAPIER: After section 154, insert the following:

FEASIBILITY STUDY

SEC. 155. The Secretary of Transportation shall conduct a study to determine the feasibility and costs of designating and constructing approximately 69 miles of highway in the State of South Carolina extending from Interstate Route I-95 in Florence, South Carolina, or at any other such point from Interstate Route I-95 within the boundaries of South Carolina, southeasterly to United States Route 17 in Myrtle Beach, South Carolina, as a route on the National System of Interstate and Defense Highways, or the Primary System, or recommend other alternatives. Such study shall consider emergency evacuations, commercial and tourist traffic, and other appropriate factors. The Secretary shall complete such study and submit a report on the results of such study to the Congress not later than one year after the date of enactment of this Act. There is authorized to be appropriated to carry out this section cut of the Highway Trust Fund not to exceed $500,000 for the fiscal year ending September 30, 1983.

Mr. NAPIER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. CLAUSEN. Mr. Chairman, will the gentleman yield?

Mr. NAPIER. I am happy to yield to the gentleman from California.

Mr. CLAUSEN. We on the minority side have reviewed the gentleman's amendment. We discussed this in depth and we are prepared to accept it.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. NAPIER. I yield to the gentleman from California (Mr. ANDERSON).

Mr. ANDERSON. Mr. Chairman, we have had the opportunity to look over the gentleman's amendment and we have no objection to it. We accept it.

Mr. NAPIER. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Carolina (Mr. NAPIER).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. EDGAR

Mr. EDGAR. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. EDGAR: At the end of Section 303, add the following new subsection:

"(e) Notwithstanding any other provision of this Act, the Secretary will apportion to designated recipients the full amount of funds authorized under this section for use for operating assistance in fiscal year 1983 within 30 days of enactment of this Act."

Mr. EDGAR. Mr. Chairman, I have talked to both sides on this particular amendment. I think it is a technical amendment and there should not be much debate.

Since the new block grants for transit will not take effect until April 1, it is likely to be as late as July before regulations are promulgated, data are collected, and funds actually apportioned to public transit systems.

Such a delay in apportionment of the operating assistance portion of the block grants will place transit operators in cash flow difficulty.

Since most States' fiscal years do not start until July 1, operators are likely to face 6 months with no State or Federal operating aid. For example, the SEPTA system in the Philadelphia metropolitan area which operates transit service in the Philadelphia

area will run out of funds for the operation of its commuter rail system in January if its full amount of Federal operating aid is not made available in that month.

This technical amendment directing the Secretary to apportion operating funds up to the cap level within 30 days of enactment of the bill would alleviate the cash flow problem without expending any additional funds.

Since under the committee bill operating aid is capped at the fiscal 1982 level the Secretary could release operating funds without waiting for the development of a formula apportionment under the new block grant.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. EDGAR. I yield to the gentleman from California.

□ 2150

Mr. ANDERSON. We have looked over the gentleman's amendment and we will accept the amendment.

Mr. EDGAR. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. EDGAR).

The amendment was agreed to.

Mr. LOTT. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I do so to engage in a short colloquy with the ranking member of the committee.

The Fort Bayou Bridge in Ocean Springs, Miss., and the Moss Point-Escatawpa Bridge in Jackson County, Miss., are in terrible condition and are in desperate need of replacement. These bridges meet the requirements under the program in the Federal-Aid Highway Improvement Act.

Therefore, I would ask the gentleman from California (Mr. CLAUSEN) whether these bridges would receive priority consideration under the discretionary bridge program. The projects will require $10.3 million for the Fort Bayou Bridge and $27 million for the Moss Point-Escatawpa Bridge.

Mr. CLAUSEN. Mr. Chairman, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from California.

Mr. CLAUSEN. I do concur in the need for the replacement of the bridges. Because they do meet the program requirements, I concur in the gentleman's request that they receive priority consideration under the discretionary bridge program.

Mr. LOTT. I thank the gentleman.

AMENDMENT OFFERED BY MR. APPLEGATE

Mr. APPLEGATE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. APPLEGATE: Strike section 401 and insert:

SEC. 401. (a) Notwithstanding any other provision of law, the Secretary of Transportation shall not obligate any funds authorized to be appropriated by this Act or by any Act amended by this Act or, after the date of enactment of this Act, any funds authorized to be appropriated to carry out this Act, title 23, United States Code, the Urban Mass Transportation Act of 1964, on the Surface Transportation Assistance Act of 1978 and administered by the Department of Transportation, unless steel, cement, and manufactured products used in such project are produced in the United States.

(b) The provisions of subsection (a) of this section shall not apply where the Secretary determines that such products are not produced in the United States in sufficient and reasonably available quantities and of a satisfactory quality.

(c) As an exception to subsection (a), for the procurement of bus and other rolling stock under the Urban Mass Transportation Act of 1964, the manufactured products which go into the vehicles may be of foreign origin to the extent of 50 percent of the cost of all components of the vehicles. Final assembly of the vehicles must take place in the United States.

(d) For purposes of this section, in calculating components' costs, labor costs involved in final assembly shall not be included in the calculation.

(e) The Secretary of Transportation shall not impose any limitation or condition on assistance provided under this Act, the Urban Mass Transportation Act of 1964, the Surface Transportation Assistance Act of 1978, or title 23, United States Code, which restricts any State from imposing more stringent requirements than this section on the use of articles, materials, and supplies mined, produced, or manufactured in foreign countries in projects carried out with such assistance or restricts any recipient of such assistance from complying with such State imposed requirements.

Mr. APPLEGATE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. APPLEGATE. Mr. Chairman, the purpose of my amendment is simple. It is to make sure that all of the revenues generated by the increase in the Federal gasoline tax that this House will pass today will be spent in America on American goods and services. It is a strong Buy America clause, yes; but considering the latest official unemployment figure of 10.8 percent, and the fact that increased imports are a prime cause of these high unemployment rates, I believe it is imperative that strong action be taken to correct what has been a blatant inequity of trade laws.

As an example of the current situation, let us look at the domestic steel imports. Imports account for nearly 25 percent of the apparent supply of basic or carbon steel, and 45 percent of specialty steel. The carbon industry is operating at a 33 percent capacity while specialty steel is even less, some at 20 percent capacity. There are over 160,000 steelworkers currently on a layoff status with another 50,000 on short work weeks and these figures are continuing to increase. Let us keep in mind, too, that these unemployment figures can be translated into budget figures, with each percentage point of unemployment causing an increase of $25 billion in the Federal deficit. If we do not pass this amendment, we will only serve to worsen our own unemployment crisis and allow the present decline of our American steel industry to continue. Certainly those of you who argue the free trade philosophy can not be so blind as to not see the blatant differences in our trade laws and those of our foreign trading partners. For example, the openness of our ports as compared to the nearly closed door they offer us. Further, the general acceptance of many foreign product lines in this country as compared to a strong reluctance to permit American made goods to be sold in foreign countries. These foreign countries realize, perhaps better than some of us, what will happen if their trading doors are opened. We will flood their markets, increase our employment, and their security will be threatened.

I realize that many, if not most of our foreign trading partners are hurting also, and that some of our actions would not necessarily help their particular situation, I regret this, but equality must be established.

As for retaliation, why must the United States, which is supposedly the most powerful economic giant of the world, begin to quiver and be brought to its knees simply for asking for equality and for what is right.

It is important to realize that out of every $1,000 of domestic procurement, $552 are returned to State, local, and Federal Government in the form of taxes on profits, incomes, and social security. If we buy foreign products, nothing is returned to us.

The American people, too, agree that certain action must be taken to stem the import tide. In a recent survey, pollster Lou Harris found that by a 62 to 35 percent majority, the people believed that some type of import restraint legislation must be enacted.

Ladies and gentlemen, we need to guarantee that the revenues from the 5 cents/gallon tax increase will be spent on American goods and services. I believe my buy American amendment will insure that the jobs we are creating today will remain among the taxpayers who will be financing this program. The economy and the people of this country need the support of this Congress.

Mr. GEJDENSON. Mr. Chairman, will the gentleman yield?

Mr. APPLEGATE. I yield to the gentleman from Connecticut.

Mr. GEJDENSON. I thank the gentleman for yielding.

I asked the gentleman to yield to engage him in a colloquy with regard

to subsection C of the gentleman's proposed amendment.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. APPLEGATE) has expired.

(At the request of Mr. GEJDENSON and by unanimous consent, Mr. APPLEGATE was allowed to proceed for 3 additional minutes.)

Mr. GEJDENSON. Mr. Chairman, it is my understanding that subsection C of the gentleman's proposed amendment merely codifies existing law and regulation with respect to procurement of buses and other rolling stock under the Urban Mass Transportation Act of 1964 as amended by the Surface Transportation Act of 1978. In other words, the restrictions of subsection A of the gentleman's amendment do not apply to the procurement of buses and other rolling stock.

Mr. APPLEGATE. It is my understanding that is correct.

Mr. GEJDENSON. I thank the gentleman.

Ms. MIKULSKI. Mr. Chairman, will the gentleman yield?

Mr. APPLEGATE. I yield to the gentlewoman from Maryland.

Ms. MIKULSKI. I thank the gentleman for yielding.

I would like to just rise and associate myself with the remarks on the amendment offered by the gentleman.

As the Secretary of the Steel Caucus, I know the terrible problem being faced by our steelworkers. Forty-eight percent of the unemployed steelworkers in my district will have their benefits run out in the next 2 weeks. I feel that instead of the Christmas present of a pink slip to the American steel industry and to the suppliers of our transportation network, we ought to give them a Buy American amendment and make a real Christmas present. And I am happy to support the gentleman in his efforts.

Ms. OAKAR. Mr. Chairman, will the gentleman yield?

Mr. APPLEGATE. I yield to the gentlewoman from Ohio.

Ms. OAKAR. I thank the gentleman for yielding.

I am very proud of the gentleman for introducing this amendment. Would it not be unbelievable if we had passed a bill of this magnitude that would tax the American people an extra nickel on a gallon of gasoline, and did not really have every job that is made available by this bill presented for our American workers, particularly those who are the hardest hit, which happens to be in the steel and interrelated areas.

It would be unbelievable to have a bill of this magnitude that did not in fact produce American jobs.

And so I think the gentleman's amendment is not only in order, but it is absolutely logical. And I would hope that no one would vote against something so obvious. The American worker wants above all else—fairness. Our trade laws are not fair—as a result we cannot always compete adequately. Therefore this amendment is not only necessary, but very important.

Mr. APPLEGATE. I thank the gentlewoman.

I would just add to that, that I think it ought to be pointed out that in the third quarter, steel companies lost more than $1 billion in steel operations, and for the year the steel industries in this country expect their losses to exceed $3 billion. And that amounts to many jobs.

□ 2200

Mr. WILLIAMS of Ohio. Mr. Chairman, will the gentleman yield?

Mr. APPLEGATE. Yes, to the gentleman from Youngstown.

Mr. WILLIAMS of Ohio. Mr. Chairman, I, too, want to compliment the gentleman on his amendment and maybe share with the members of this committee the fact that I believe the real enemy of American industry and of the American industrial community is the foreign import, no longer should we fight each other—labor, management, and Government. We must attack the enemy and the culprit that has put our people out of work and that is the foreign import.

The CHAIRMAN. The time for the gentleman from Ohio has expired.

(At the request of Mr. HOWARD, and by unanimous consent, Mr. WILLIAMS of Ohio was permitted to proceed for 3 additional minutes.)

Mr. HOWARD. Mr. Chairman, will the gentleman yield?

Mr. APPLEGATE. Yes. I yield to my chairman.

Mr. HOWARD. I thank the gentleman for yielding.

I have a hunch the gentleman's amendment is going to pass. There are just two points I would like to bring up, small ones that do concern me. One has to do with, in the legislation that we have we had added, a provision on the differential of price that would force Buy America, where it had been a 10-percent differential, that was made 20 percent.

The other thing that bothers me about the amendment is the fact that there has always been a provision that would permit the Secretary to be able to waive a Buy America provision if it is felt that it is not in the best interest of the United States.

This amendment would not permit this waiver or any condition that anyone in either the Defense Department or the White House or the State Department or the Congress might feel is not in the best interest of the United States and would not permit the Secretary to act in the best interests of the United States of America. I just think that is a big thing. If this should go to conference, I would hope that we would be able to provide some kind of a situation where we would be able to act in the best interests of the United States, but that is taken out of the bill by this amendment. I just want the gentleman to be aware of that.

Mr. APPLEGATE. I thank my chairman.

Mr. FRENZEL. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I strongly oppose title IV of H.R. 6211 which establishes "Buy America" preferences for projects funded under this act, title 23 of the United States Code and the Urban Mass Transportation Act of 1964. In addition, the title provides that the Secretary of Transportation cannot interfere with more stringent "Buy America" requirements imposed by the States, and raises from 10 to 20 percent the amount of additional costs a project can incur as a result of domestic sourcing before the "Buy America" provisions can be waived.

As bad as the existing title IV provisions are, the Applegate amendment is worse. It would provide a total ban on the use of imported goods for all highway, bridge and mass transit projects, except for the procurement of bus and other rolling stock where at least 50 percent domestic content would be permitted. The requirement in existing law that "Buy America" preferences not increase the overall cost of a project by more than 10 percent would be totally eliminated as I understand the amendment.

There seems to be a widespread, and I believe mistaken, notion that these Buy America provisions create jobs. These amendments, in effect, close our borders, signal our trading partners to do the same and threaten the economic viability, and the employment, of our export industries. Between 1977 and 1980, four out of five of all new manufacturing—I repeat, manufacturing—jobs were created in export industries. By passing this amendment we are saying we are willing to jeopardize these manufacturing jobs in order to throw up a wall of protection around the jobs associated with these highway, bridge and mass transit projects.

Title IV, and any amendment which seeks to provide more restrictions or to broaden the coverage of such severe restraints, is contrary to all past efforts by this Congress and the administration to reduce the need for protectionism in our own country, to exert as much Federal influence as is possible and feasible to see that the States do not establish their own trade barriers and to persuade foreign governments to remove protectionist trade barriers that hurt U.S. exports.

"Buy America" provisions such as the one contained in this bill undermine our efforts to achieve greater access to foreign government procurement markets. Under the existing

Government Procurement Code, to which the United States is a party, it has been estimated that procurement opportunities valued at more than $25 billion have been created for U.S. exporters.

The United States continues to be in the forefront in trying to encourage more open competitive bidding in foreign markets as well as our own. If successful, it will provide substantial economic opportunities for American business. However, we cannot have it both ways. We cannot close down procurement opportunities in this country and expect to have similar foreign procurement made available to us. By passing more strict buy America rules we support an entrenched attitude about international competition that can only disadvantage us in the long run.

Mr. Chairman, we cannot ourselves be protectionist and at the same time demand that trade barriers to U.S. exports be removed. We do not expand employment in this country by trading off jobs in one sector for jobs in another. We cannot expect to improve our economic situation by removing cost controls on such a broad range of projects.

The administration strongly opposes these buy America provisions. They have already been contacted by industries who will be adversely affected and may have to lay off workers if the provisions remain in this bill.

I urge my colleagues to reject this title and any amendment that seeks to make it more restrictive.

Mr. OBERSTAR. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, we are asking the American people to accept a substantial increase in their tax burden under the bill for the purpose of improving the Nation's highways, replacing some of the 100,000 bridges that are declared dangerous, too dangerous, some of them, to drive on, and for the additional purpose of creating some 320,000 direct jobs in the construction field.

In return for the tax increase, we ought to be assuring that the materials to be purchased under this legislation will create additional American jobs in the materials supply sector of the economy.

Now, concern was expressed just a moment ago by my distinguished colleague from Minnesota, who spoke from deep sincerity, about Members who are "pushed to the ragged edge" by this bill. There are thousands of Americans who are pushed to the ragged edge of unemployment by the current economic conditions, closed down steel mills, shut down iron ore mines, people who are out of work, and who want jobs.

Free trade does not necessarily mean fair trade. We will hear from the free traders who are concerned about retaliation from our trading partners. My friends, they have struck already, a preemptive. Ask an American steelmaker who has tried to sell one lousy foot of rail to the Chemins de Fer National de France. You cannot see American steel rail in France because they will not let it in and you cannot see American steel in Japan because they will not let it in.

I know a little something about trade with the European common market. I did my graduate studies at the College of Europe in Belgium during the time of the formation of the Common Market. I traveled through the European coal and steel community countries and I have great admiration for the ingenious way in which Europe raised itself by its bootstraps after the devastation of World War II and recreated its coal and steel communities with enormous subsidies. They rebuilt with concern for their workers, created with government subsidies a new steel industry enormously competitive to the United States. Since then they continued to protect that industry in every respect, including keeping out competitive American steel.

Now, with the help of those earlier subsidies as well as recent billion dollar subsidies and ingenious nontariff barriers, they are invading our domestic market and taking jobs away from American workers.

□ 2210

In Duluth, Minn., stretching over the waters of Lake Superior to Superior, Wis., a $60 million interstate bridge is under construction; 100,000 tons of steel are going into that bridge. The bid on the center arch span for 10,000 tons of steel was $7 million. It was won by a Japanese firm.

Under that bridge will go the iron ore, some day we hope, when our mines are producing again, from northern Minnesota to the steel mills of the lower lake ports. That iron ore will pass under a Japanese steel bridge.

The steelworkers in northern Minnesota, the iron ore production workers, are not very happy about that. They have lost jobs to Japanese steel.

We are not trying to keep foreign goods out of the United States.

The CHAIRMAN. The time of the gentleman from Minnesota (Mr. OBERSTAR) has expired.

(By unanimous consent, Mr. OBERSTAR was allowed to proceed for 2 additional minutes.)

Mr. OBERSTAR. We are not trying to keep foreign goods out of the United States. We are trying to fire a shot across the bow and let our trading partners know that if they want to trade: "Trade fair. Open your markets to American goods. Let American workers earn their keep. Trade fairly. Play with us on the same playing field according to the Marquis of Queensberry rules and not your own self-protective rules."

Unless this House adopts this amendment, we are going to continue to let foreign steel steal American jobs.

I urge your support for the amendment.

Mr. GAYDOS. Mr. Chairman, I move to strike the requisite number of words and rise in support of the amendment.

I think it is absolutely imperative that the Members here have the benefit of some the items I am about to put in the RECORD at this time.

I would like to start off first in answering the question of what is the effect of the "Buy American" amendment. I think it is a simple question, and the answer is very revealing.

In a report to the Congress in 1978, the Congressional Research Service observed that for every $1,000 of domestic procurement, $552 are returned to the Government in the form of corporate profits taxes, social security tax payments, personal income taxes, State sales taxes, and taxes on unincorporated nonfarm business income. The exact breakout is as follows:

Corporate profits taxes	$53
Taxes on unincorporated nonfarm business income	12
Social security tax payments	161
Personal income taxes on wages, salaries, rent and interest	306
State sales taxes	20
Total taxes per $1,000 domestic procurement	552

If $1,000 is expended on the procurement of a foreign good or service, nothing is returned to this Government.

Now, we have several analysts and businessmen who recently appeared in some of our national publications. I think these, too, should be part of the RECORD and should be there for the information of our colleagues in order to enable everybody here to vote, hopefully, intelligently, and informed, and to add it to their information.

Monetary expert C. Fred Bergsten, quoted in the April 26, 1982, Forbes magazine:

For the first time in history, trade balance is a major cause of a recession.

William L. Givens, chairman of Twain Braxton International, Boston, writing in the November 22, 1982, Business week:

The effect of this process (of Japanese industry targeting) has been the progressive erosion of our industrial base.

We must recognize that free trade, while a laudable concept, is hopelessly inadequate as a trade policy.

Richard Nenneman, senior vice president of the Girard Bank, Philadelphia, writing in the November 26, 1982, Christian Science Monitor:

This business cycle is different from the seven others since World War Two. The U.S. is adjusting to two phenomena unique to this period—the need to share production of many goods once considered almost proprietary . . . and to deal with the serious financial problems of . . . the developing world.

Theodore White, author and political historian, who wrote in the July 5, 1982, U.S. News & World Report:

As for industry, when I travel through the Midwest, I see the automobile and steel manufacturers being undermined by government directed cartels from abroad.

Stanley Modic, editor of Industry Week, in a June 14, 1982, editorial:

America sits as the largest, most open market, all but inviting other nations to flood it . . . developed and undeveloped alike are building their economies and solving their unemployment . . . at the expense of the U.S. economy.

The bottom line is jobs. Industry Week estimates that auto imports alone last year deprived 433,000 Americans of work.

These are just examples of what is being said throughout the country.

One-fifth of the proposed tax is marked for mass transit. Will subway cars be bought with portions of this $4 billion? Most likely. Well, two recent big subway deals went to foreign governments that are on the stalk, internationally.

New York City bought Canadian subway cars last summer. The Canadian bid was best because 20 percent of the cost of each car—$167,000 on each car—was subsidized by the Canadian Government, according to our Commerce Department.

Meanwhile, the remaining American-based manufacturer, the Budd Co. in Mr. BONIOR's district, had a good bid but not 9.7 percent financing. Budd lost a $659 million deal and the workers lost the work.

Furthermore, the Canadian Government—which is serious about buying Canadian—easily could raise its subsidy to 21 or 25 percent or to whatever it takes for them to get the job. Keeping their workers at work is in their political interest, and they know it, and practice it.

In the other subway deal, New York City spent $274 million on Japanese cars. The bid offered a 12.5-percent loan from the Government of Japan. The record shows that they are strong in Japan on the idea of buying Japan—by custom if not law.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. GAYDOS) has expired.

(By unanimous consent, Mr. GAYDOS was allowed to proceed for 1 additional minute.)

Mr. GAYDOS. Mr. Chairman, I want to conclude by saying that there has been a question as to what the importance of this amendment is. Is it important?

Let me say this: Admittedly, in the best of circles, and I do not care which committee you are dealing with and I do not care who you are talking to, the conclusion is very, very clear: This country lacks a national steel policy and I suggest with all the sincerity I can muster here in this late evening that maybe, just maybe, this amendment, this "Buy American" amendment, might be the beginning, hopefully, the impetus of our now starting to head toward hopefully and accomplishing in the near future some kind of a national steel policy.

When my good friend, the gentleman from Minnesota (Mr. FRENZEL) suggested that we have just negotiated an agreement, some of the facts were not listed. Those are that the American steel industry as a whole spent literally hundreds of millions of dollars over the last 4 or 5 years.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. GAYDOS) has again expired.

(By unanimous consent, Mr. GAYDOS was allowed to proceed for 30 additional seconds.)

Mr. GAYDOS. Mr. Chairman, I conclude by pointing out to my colleagues that the American steel industry has spent literally millions of dollars in pursuing this nebulous end of trying to find relief, trying to find relief from the 1974 Trade Act, the 1979 Trade Act, trying to get some relief from that Trade Act.

It is expensive to pursue and to bring cases before the International Trade Commission and also to proceed with them thoroughly internationally to a just conclusion.

I suggest to my colleagues this is the time.

Mr. MILLER of California. Mr. Chairman, will the gentleman yield to me?

Mr. GAYDOS. I yield to the gentleman from California.

Mr. MILLER of California. I thank the gentleman for yielding.

Mr. Chairman, I rise in support of the gentleman's amendment and the gentleman's position.

Mr. GAYDOS. I thank the gentleman.

I ask for a "yes" vote on the amendment.

□ 2220

AMENDMENT OFFERED BY MR. LELAND TO THE AMENDMENT OFFERED BY MR. APPLEGATE

Mr. LELAND. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. LELAND to the amendment offered by Mr. APPLEGATE: Strike out subsection (c) of the amendment and insert in lieu thereof the following:

(c) As an exception to subsection (a), for the procurement of buses, other rolling stock, and support equipment (including train control, communication, and traction power equipment) under the Urban Mass Transportation Act of 1964, the manufactured products which go into such vehicles or equipment may be of foreign origin for the extent of 50 percent of the cost of all components of the vehicles or equipment. Final assembly of the vehicles must take place in the United States.

Mr. LELAND (during the reading). Mr. Chairman, I ask unanimous consent that the amendment to the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. LELAND. Mr. Chairman, I offer an amendment which would clarify the application of the pending amendment to mass transit rail support equipment. I have talked to the gentleman from Ohio who offered the original amendment, and he has agreed with me that the amendment to his amendment is acceptable.

The amendment would amend subsection (c) to add rail support equipment, including train control, communication and traction power equipment to buses and other rolling stock which under the amendment of the gentleman from Ohio would remain subject to the less than 50-percent foreign limitation in existing law. This would still require these items to include at least 50-percent domestic content, but would retain the flexibility of existing law to avoid unnecessary cost escalation.

Mr. Chairman, I have long been a strong supporter of responsible legislation to encourage greater use of domestic products. As a matter of fact, I think that in my history here in the Congress I have voted for all buy-American pieces of legislation.

I believe that the narrow modification that I am offering strikes a reasonable balance between the legislative interests of local transit authorities facing rising costs and the need to put Americans back to work. This amendment would relate only to mass transit, and would only affect the enumerated types of support equipment. It would not affect the use of structural steel, supports, cement, or other similar major items.

I ask that the Committee support the amendment.

Mr. FRENZEL. Mr. Chairman, will the gentleman yield?

Mr. LELAND. I yield.

Mr. FRENZEL. Mr. Chairman, would the gentleman mind telling us what company this bails out?

Mr. LELAND. This gentleman from Texas does not try to bail out any company. However, I am trying to act in the best interests of our development in Houston, Tex., where we are having an extreme problem getting startup productivity for the transit system in Houston.

Mr. FRENZEL. The gentleman has expanded an exemption within the Applegate amendment, and I just won-

dered; the existing exemption, as I understand it, was put in there for a particular company making motorbuses, and I wondered if the gentleman's expansion of that refers to another particular company.

Mr. LELAND. I think the gentleman is trying to imply something that is not correct. I have absolutely not talked to any special interest in this matter. I care about the interests of the city of Houston, the district I represent, and I am trying to help them get started with a mass transit system that would be adequate to transport the people of the city of Houston.

Mr. FRENZEL. I thank the gentleman for his explanation.

Mr. CLAUSEN. Mr. Chairman, will the gentleman yield?

Mr. LELAND. I yield.

Mr. CLAUSEN. Mr. Chairman, could the gentleman tell me whether or not the established law which was made permanent would in fact cover the gentleman's situation now?

Mr. LELAND. The established law does, but I suggest that I support the gentleman's amendment in its original form with certain exceptions because I feel it will indeed, if in fact we passed this amendment as originally drawn, it would hurt our movement in the city of Houston to try to develop a transit system.

Mr. CLAUSEN. I think it is important that the record be set straight, that there is in fact incorporated in the permanent law a buy-American provision, and it was incorporated, made permanent in the 3-month extension legislation we passed just prior to the election recess. I think it is important that the record be set straight so that everyone will understand that there is in fact now a buy-American provision in law.

Mr. LELAND. I understand.

Mr. ARCHER. Mr. Chairman, will the gentleman yield?

Mr. LELAND. I yield to my colleague from Texas.

Mr. ARCHER. Mr. Chairman, is it true that the gentleman is merely trying to include those items which he mentioned in the same fashion in which they are covered under current law?

Mr. LELAND. Absolutely.

Mr. ARCHER. Rather than have it extended to be 100 percent buy American, which would significantly raise the cost of implementing new mass transit systems, and in some instances make it prohibitive, where we could not go forward.

Mr. LELAND. That is correct, and I thank the gentleman from Texas for clarifying that.

Mr. APPLEGATE. Mr. Chairman, will the gentleman yield?

Mr. LELAND. I yield to the gentleman from Ohio.

Mr. APPLEGATE. Mr. Chairman, I have discussed the amendment with the gentleman from Texas. It does not adversely affect my amendment. In fact, it makes it a little better amendment, and I agree to the amendment and ask the House to agree to it.

Mr. LELAND. I thank the gentleman.

Mr. MURPHY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I have followed the debate closely this evening and heard many of my colleagues say that we are trying to do what is in the best interest of the United States. We are talking about using tax dollars of U.S. citizens to pay U.S. contractors to buy from U.S. suppliers, who in turn employ U.S. workers, who then in turn pay taxes to the U.S. Government. Is not that in the best interests of the United States, to see that our workers are employed to support this Government, who would commence a massive building program?

I cannot imagine the Japanese Diet debating whether or not the Japanese Government would begin a massive public works program and insist that they buy their materials and goods from the United States. They would not, my friends. Nor would any other government in this world.

I have heard some of my colleagues state that if the buy American proposal does pass, they will oppose the measure. Are they thinking in the best interests of the United States? I think not. We are not talking about private investment dollars, buying on the world market, whether it be free trade or fair trade. We are talking about American taxpayer dollars, which this body is charged to raise and to expand.

Buy American does not mean a lack of competitive bidding as some opponents have stated. There are many producers and suppliers of steel, cement, asphalt, wire, lumber and other products right here in the United States. Competition would flourish among domestic suppliers and producers.

This amendment would protect those American taxpayers by saying that their tax dollars would be expended in this country to pay our workers and our laborers, and buy from our suppliers.

I would like to answer the gentleman on the other side who alleges we are only interested in "bailing out" American businesses and industry. I would like to inform the gentleman that my interest is in "bailing out" the people of the United States who are suffering from record unemployment.

Mr. KINDNESS. Mr. Chairman, will the gentleman yield?

Mr. MURPHY. I yield to the gentleman from Ohio.

Mr. KINDNESS. Mr. Chairman, I thank the gentleman for yielding. I think he has put his finger on the argument here so well that we ought to pause for just a moment to realize that this is not a free trade issue. I support the amendment of the gentleman from Ohio (Mr. APPLEGATE), although at the same time I like to think we could progress in terms of free trade in the world, but we are talking about governmental policy having to do, as the gentleman from Pennsylvania so well stated it, with the use of tax dollars extracted from American workers to be spent here in the United States. That is the issue. It is not free trade that is involved at all. It is governmental procurement policy.

Wherever you go throughout the world, you find that the attitudes and policies of governments are more conservative with respect to trade along the lines that are proposed by the amendment of the gentleman from Ohio. I do not see why we should lag so far behind. I think we ought to be sending something of a message to the administration that opposes this amendment that they are not doing enough to keep trade indeed free and fair in this world.

I thank the gentleman for yielding, and I support the amendment.

Mr. MURPHY. I thank the gentleman.

Mr. GIBBONS. Mr. Chairman, I move to strike the requisite number of words, and I rise to oppose the amendment.

Mr. Chairman, nothing is harder than opposing the free lunch, and certainly nothing is harder than opposing the free lunch if it is wrapped in the American flag, so I have taken on for myself quite a task, and I understand. I will try to limit myself to the 5 minutes we are supposed to speak in.

Let us find out where we are. There is already in this legislation, on the books, a buy-American provision.

□ 2230

It is one of the toughest buy American or buy national provisions in the world. The committee has modified that further to increase the 10 percent to 20 percent, making it really the toughest buy American or buy national provisions in the world. And now we have the free lunch wrapped in the American flag which is waved before us.

It looks very attractive, but it is very deceptive. I am not going to talk about trade. I am not going to defend any of our trading partners. That is ridiculous. I feel as badly about them as other Members do, perhaps worse, because I know so much about them.

But let me tell the Members what we have done for the steel industry. And this is a steel industry initiative. We on the Democratic side offered them the finest depreciation schedule imaginable, but they were not sensible enough to take it. We have had in the

almost 20 years that I have been in Congress a policy of trying to exclude foreign steel, and it has worked, but not in the way one would think it has worked.

We have had the Mills' proposals which informally kept steel out. We had the trigger price mechanism, which was another price fixing mechanism that keeps steel out at a competitive price. And what has been the result of it?

While the price of everything in America doubled, the price of steel tripled. Steel wages, starting after World War II, began to escalate faster than all American industrial wages, and now steel wages are 70 percent higher than all industrial wages in the United States. In fact, steel wages are the highest wages in the world, and yet it takes about twice as many man hours of labor to produce a ton of steel in the United States as it does in Japan. It is not that the Japanese worker is that great, but the Japanese management got off its rear ends and ran the business and got productivity up.

So we have had a protective steel market, and all we have gotten is very inefficient production and very high prices, and we have priced our steel out of the world market. In fact, we have priced it out of the American market.

One reason why automobiles are so expensive is because the cotton-picking steel is so expensive. The reason why nuts, bolts and screws are so expensive is because steel is so expensive, and the reason why steel is so expensive is because we have excluded the industry from market place competition management has gotten lousy and the labor has gotten more expensive. And we wonder why.

Now we are going to wrap this free lunch in the American flag and say that this save us. It will not. It will bankrupt us as nation. All we are doing with this little piece of aggression against all the other Americans in this country is transferring jobs within America.

There is only a limited amount of money in this bill, and if we are going to spend more of it on steel, we are going to spend less of it on everything else. We are either going to build fewer road or we are going to have less other disposable income.

Mr. GAYDOS. Mr. Chairman, will the gentleman yield to me?

Mr. GIBBONS. Mr. Chairman, this amendment will not produce one American job. All it will do is send a signal to steel labor and steel management that "you go right on, fellows. The price can keep on going up."

Now, if we do that, if we can wrap it in the American flag, maybe we can sell it to our constituencies, but I will tell the Members that it is sorry econimic policy, it is sorry politics, and I want no part of it.

Mr. GAYDOS. Mr. Chairman, will the gentleman yield to me?

Mr. GIBBONS. Mr. Chairman, I yield back the balance of my time.

Mr. FRENZEL. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Leland amendment.

Mr. Chairman, the Leland amendment, as was discussed in the colloquy between myself and its author, expands the one exception in what is an otherwise absolute, impenetrable Buy American provision. It is so tough that it would turn our trading partners, who would like to close their markets, green with envy.

What the Leland amendment shows us is that the Applegate language, is too strict. If Mr. LELAND constituents were to buy a transit system for the city of Houston, they could not live under the terms of the Applegate amendment.

So the Applegate amendment has to be expanded. But why should we let the city of Houston alone be able to afford the best transit system it can have? Why do we not allow the taxpayers of the United States to build our Interstate Road System in the most effective and efficient way possible?

It has been said by one of the speakers that the net long-term effect of the Applegate amendment is increased revenues. I am going to quote to you from a letter from Alice Rivlin to the Honorable DANIEL ROSTENKOWSKI. In the second to the last paragraph of that letter it says:

> Therefore, although the net long-term effect that the amendment will have on revenues is unclear, its direct and most proximate effect is likely to be a reduction in tariff revenues.

Now, another speaker said the bottom line is jobs. That is partly true. The bottom line is subsidized jobs, jobs subsidized by the driving people of this country.

Protest cases are expensive at the ICC—to expensive for the largest steel companies in the world who would not even push them forward but were, rather, inclined to negotiate for restrictions on imports.

We are protecting the taxpayers? Yes, we are protecting them by spending more of their gasoline tax money to buy the same amount or a lesser amount of miles of road.

I think the Leland amendment absolutely exposes the impossible restrictions that the Applegate amendment lays upon us.

Mr. Chairman, the gentleman from Florida (Mr. GIBBONS) has shown us our duty tonight. I am not sure we are going to accept his challenge. I hope that we do. The amendment offered by the gentleman from Texas (Mr. LELAND) should be adopted and that offered by the gentleman from Ohio (Mr. APPLEGATE) should be defeated.

Mr. WEAVER. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. GAYDOS. Mr. Chairman, will the gentleman yield?

Mr. WEAVER. I yield to the gentleman from Pennsylvania.

Mr. GAYDOS. Mr. Chairman, I will not take the full 5 minutes of the gentleman, and I mean what I say. But I do want to say something which I think is important.

When someone gets up, as my good friend and colleague, the gentleman from Florida, and starts wrapping the American flag around things, we start questioning his motives. I never mentioned the American flag, but I would rather wrap the American flag around me than the Japanese flag or the flag of some other foreign country. When someone talks about the flag, that is the flag of my preference.

Let me, hopefully, make one point very clear to my colleagues. The American steel industry has been crucified. It has been accused of bad management, bad labor overcosts, overpriced labor.

We have had men before the Steel Caucus repetitively coming before us, men of integrity, men of well-known reputations, and they have testified as one to the effect that the American steel industry under present conditions will compete with the Japanese, with the British, or with West Germany, anyone we can name. They will compete if we are just so kind as to establish an American national steel policy and cut out the subsidies. That is not me speaking; that is the testimony of all the experts of this country.

I am surprised at the gentleman from Florida. He should know those things. I want this RECORD to show that the American steel industry is not an industry that has been fat and lazy and nonproductive. It has been jawboned to death over the last 30 years about keeping its prices down. It has always been the steel industry that has been accused of raising its prices, and that is the first place the Government goes to jawbone to reduce prices.

People do not invest in the steel industry if it is not competitive for if it is not making a profit. The last 25 years show very clearly that in the steel industry they were making 5 to 6 percent corporate profits while other corporations in this country were averaging 18 to 20 percent. I say to the Members, "You answer those potatoes."

Mr. Chairman, I do not want to take the full 5 minutes, because perhaps the gentleman from Oregon wishes to yield to other Members.

Mr. WEAVER. Mr. Chairman, I would be delighted to yield to the gentlewoman from New Jersey (Mrs. FENWICK), if she wishes me to.

Mrs. FENWICK. Mr. Chairman, I can get my own time, but I thank the gentleman from Oregon.

The CHAIRMAN. The Chair recognizes the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I think we should pause here and consider what we are doing. We should listen very carefully to a man of vision and principle, our colleague, the gentleman from Florida (Mr. GIBBONS), a man who knows the subject worldwide.

□ 2240

I do not think we can close our eyes to a few facts. In our steel industry, the best plant we have, as I understand it, makes 550 tons per man per year. The best Japanese steel mill makes 850 tons per man per year.

A bridge over the St. Lawrence had $7 million worth of steel but for a $42 million bridge, built over the Mississippi, the steel came from a Japanese mill, structural and sheet steel came down by gravity into the hull of a ship; it came across the Pacific, burning oil that Japan does not produce, through the canal, paying a toll on every ton. They landed a $42 million contract to build that bridge over the Mississippi at one-third less than any bid from an American steel company.

We have tried to help our steel industry and the gentleman from Florida has outlined some of the efforts. What do steel companies do when they have money? They buy oil companies.

We are going to have to begin to face the facts. We cannot ask our people continuously to pay more and more and more when other places are producing the material for less.

Further, one more word of caution. We are at a watershed. We are either going to try to make international agreements work in the interests of a fair and free trade or we are going to give up the whole thing and plunge into protectionism not just in one industry but in one after another after another.

We are at a watershed. I, too, have felt tremendous impatience with the United States, wondering why we could not get even-stephen.

If it takes 10 months to land an American car in Tokyo, I used to ask, why not 10 months to land one in San Francisco?

I think I was shortsighted and uneducated because the answer is not there. We cannot have dog eat dog and begger your neighbor. We must try to have an orderly world.

The only hope is to come to some sound agreements with teeth in them so that we can see that they work. We must make the effort. We cannot continue to shelter a noncompetitive industry at the cost of our own public. We have to make our industries more productive and encourage those that can produce in fair and free competition.

Mr. BAILEY of Pennsylvania. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I serve on the Trade Subcommittee of the House Ways and Means Committee. I have listened to the debate and I have read about it in the newspapers.

This Nation has some very difficult choices to make. The issue is not whether or not we have a steel industry that has difficulties.

Quite frankly, every capital intensive industry in the United States of America that requires long-term capital investment is in trouble. This Nation offers itself to the world as that great leader and example of free enterprise where the role and function of government should be limited to allow for investment in business environments that will provide us most efficiently with those goods and services we need. But we are in competition with a modern form of state capitalism as practiced in Europe and in Asia that is going to deny this Nation the kind of basic feedstock industries it needs to protect itself economically and in the defense area while at the same time we bear the burden almost unilaterally in some ways of a free world defense requirement.

There is a world oversupply of steel. It is not because American managers and American labor is inefficient. It is because the U.S. Government, as a matter of policy, fostered the export of capital and the establishment of those basic industries abroad as a matter of policy since the Second World War.

This Nation is disserviced by dishonest references to the quality of her business leadership and the productivity of her workers because it deters the proper attention that needs to be paid to a lack of industrial policy in this country which is the root cause of the reason why we are headed into this poor capacity area with all of our basic industries.

Steel, mining, transportation, all of them have basic problems.

You have a world steel industry which is protected abroad. It is subsidized. Its marketing is directed. We have got to learn to deal with those kinds of problems.

We have a choice to make. We use our basic economic power, we use our basic good sense and good will, we use our leadership to try to encourage some kind of standard, some comparable standard of free enterprise and government role so that our businessmen can compete abroad fairly. But it is improper to deny protections and recognition for what our industries and labor face here at home while we write trade policy and tax policy that in effect opens the door and robs us of that kind of favorable investment environment the gentleman from Pennsylvania (Mr. GAYDOS) very properly pointed out.

Trade is a growing area. Those businesses will respond to the kind of legal and tax and environmental policies that we compose for them so that they will make those long-term investments we need.

It is our responsibility as a government to confront our Nation's challenges with insight and courage. If we fail to properly coordinate the policy conflicts between domestic economic demands and the implications that our trade policies have for them, we shall lose grasp of the commonsense and balance that has heretofore enabled us to politically support viable trade policy—we shall degenerate into irrational protectionist or knee jerk free trade policies that will only create ever increasing economic instability in an increasingly unstable international political environment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. LELAND) to the amendment offered by the gentleman from Ohio (Mr. APPLEGATE).

The amendment to the amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. APPLEGATE), as amended.

The question was taken; and the Chairman being in doubt, the Committee divided, and there were—ayes 54, noes 46.

So the amendment, as amended, was agreed to.

Mr. HOWARD. Mr. Chairman, I ask unanimous consent that all amendments and amendments thereto to the four titles of the public works section of the bill be limited to 10 minutes, 5 minutes in support and 5 minutes in opposition.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

Mr. GOODLING. Mr. Chairman, reserving the right to object, I have been sitting here for 6 hours waiting for the second, third, particularly the second section of this bill to open. It finally did open and now I have been sitting here and I wanted to make a 1-minute comment. I would like to reserve my right to make that 1-minute comment.

Mr. HOWARD. Mr. Chairman, will the gentleman yield under his reservation?

Mr. GOODLING. I yield to the gentleman from New Jersey.

□ 2250

Mr. HOWARD. Mr. Chairman, may I inquire as to how many amendments there are at the desk—excluding the

Ways and Means Committee amendment?

The CHAIRMAN. The Chair would advise the gentleman there are three amendments pending at the desk.

Mr. HOWARD. Mr. Chairman, I withdraw my unanimous-consent request.

The CHAIRMAN. The gentleman withdraws his unanimous-consent request.

Mr. GOODLING. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in support of section 209, the Nelson section of this legislation. This section states that it is the sense of the Congress that it strongly encourage the States to raise the minimum drinking age to 21.

I wholeheartedly endorse a unified drinking age, and only last week introduced House Concurrent Resolution 429, which likewise expresses the sense of the Congress that the age for drinking and purchasing all alcoholic beverages should be raised to 21 in those 35 States and the District of Columbia where the drinking age is now less than 21. My distinguished colleague from Pennsylvania, Senator SPECTER, has sponsored the companion resolution (S. Con. Res. 129). This resolution has been endorsed by the National Transportation Safety Board and by the National Safety Council.

December 12-18 has been designated as "National Drunk and Drugged Driving Awareness Week," a timely event in lieu of the upcoming holiday season. All of us in Congress and in statehouses across the country lately have been forced to take significant steps to increase penalties for driving while under the influence of alcohol. But, a related and equally serious matter that is drawing more attention is the need to raise the legal drinking age in the States that still allow persons under the age of 21 to purchase and consume alcohol.

Did you know that almost 60 percent of fatally injured teenage drivers had alcohol in their blood? Did you know that the life expectancy in America has improved over that past 75 years for every age group except one—15- to 24-year-olds—and did you know that the leading single cause of death for this age group was drunk driving?

We in Congress with this amendment have an opportunity to make our voices heard about this national disgrace. I feel very strongly about this matter, and I know that others in this Chamber do as well. Today, most State laws are a hodge-podge of jurisdictional incongruities, and we as U.S. Members of Congress should actively encourage the States to look at the problems associated with differing drinking ages seriously. First of all, a standard age of 21 would reduce the general availability of alcohol to teenagers, a move which has been proven to reduce the disciplinary problems of the high school youth and prevent 13- and 14-year-olds from easy access to alcohol. Second, a unified drinking age would correct an undesirable situation in which access to alcohol by teenagers is only a matter of motoring across the State line. A standard age of 21 would prevent young people from driving over State borders to procure alcohol and then return, possibly intoxicated, to their home State.

Recently, Transportation Secretary Drew Lewis and Health and Human Services Secretary Richard S. Schweiker endorsed a unified approach to the drinking age. This idea is being studied by the President's National Commission on Drunk Driving, which reports on December 13.

Let us send a message to the National Commission and to the legislatures of our home States. Let us take the first step to unifying the drinking age. Let us end this national tragedy. Let us save these young lives.

Thank you.

H. CON. RES. 429

Whereas of the twenty-five thousand persons who die each year in drunk driving accidents, five thousand are teenagers and almost thirty-five per centum are between the ages of sixteen and twenty-four;

Whereas almost sixty per centum of fatally injured teenage drivers had alcohol in their blood;

Whereas life expectancy in America has improved over the past seventy-five years for every age group except one—fifteen to twenty-four year olds—and whereas the leading single cause of death for this age group is drunk driving;

Whereas available data shows a direct correlation between minimum drinking age and alcohol-related accidents in the eighteen to twenty-one year old age group;

Whereas numerous empirical investigations have shown significant increases in motor vehicle crash involvement among young drivers after reductions in the drinking age;

Whereas as the result of this emerging research, a number of States raised the drinking age in the late 1970's and early 1980's; and

Whereas the National Transportation Safety Board has urged that the legal minimum age for drinking and purchasing alcohol be raised to twenty-one nationwide in an effort to cut the highway death toll from drunken driving: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that the age for drinking and purchasing all alcoholic beverages should be raised to twenty-one in those thirty-five States and the District of Columbia where the drinking age is now less than twenty-one.

Mr. HOWARD. Mr. Chairman, I ask unanimous consent that debate on all amendments and amendments thereto to the first four titles of this bill be limited to 10 minutes, 5 minutes in support, 5 minutes in opposition.

The CHAIRMAN. On each amendment?

Mr. HOWARD. On each amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

AMENDMENT OFFERED BY MR. ECKART

Mr. ECKART. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ECKART: At the end of section 120 of the amendment add the following:

(d) Section 120 of title 23, United States Code, is further amended by adding at the end thereof the following new subsection:

"(k) Notwithstanding any other provision of this section, the amount of non-Federal funds payable on account of any project approved by the Secretary under section 106(a) of this title and constructed in any labor suplus area, as determined by the Secretary of labor, shall be reduced by 25 per centum.".

Mr. ECKART (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. ECKART Mr. Chairman, this piece of legislation has been talked about as a bill to protect our infrastructure, as a bill designed to create jobs, indeed as a bill designed to place the principle of the users' fee for important public works projects to be funded on a pay-as-you-go basis.

Mr. Chairman, the amendment that I seek to offer to this legislation would state that the amount of the local match that municipalities, counties or States would have to raise in order to qualify for the Federal share of funds under this legislation would be reduced by 25 percent if the project that was to be undertaken would be located in a labor surplus area as defined by the Department of Labor.

A labor surplus area of course is an area in which has occurred unemployment levels in excess of 20 percent above the national average. Clearly the provision of this amendment would do several things.

First, many of our levels of local government, particularly those which have acute levels of unemployment, are desperately strapped for the funds needed to meet their match. Many States have returned hundreds of millions of dollars because they were unable to raise the local funds necessary to go forward.

These strapped local government levels are much in need of the incentives that this bill envisions, but many do not have the local financing capability to meet the match.

The adoption of this amendment will make the targeted funds more available to projects in areas of high unemployment, relieve the tremendous strain on local government, and

not in any way diminish the contributions of the Federal Government to this important program.

Second, there is no Federal fiscal impact with this legislation. It just changes the method by which local government raises its funds and directs that the program will be spent in areas where there is high unemployment.

Third, it addresses the donor-donee State problem by shifting to local government an opportunity to raise the funds or not to raise the funds to meet the threshold in a more amicable way to take into account the pecularities of local financing.

And lastly, it will increase the leverage at the local level for targeting projects, important projects that are already on the board, already have been approved, but have not been able to go forward because of the lack of local funds in areas of high unemployment.

There are almost 1,100 labor surplus areas in the United States. Forty-six of our States have them to some degree or other. If the Members are concerned about unemployment, if the Members are concerned with providing some assistance in this bill to areas of high unemployment, then I urge my colleagues to look closely at my amendment.

Mr. PEASE. Mr. Chairman, will the gentleman yield?

Mr. ECKART. I yield to the gentleman from Ohio.

Mr. PEASE. I thank the gentleman for yielding.

Mr. Chairman, I rise in support of the very fine amendment offered by my colleague from Ohio. As a Member representing a district which has four counties which have long been labor-surplus areas, and which desperately need the employment which this additional highway work would bring, I can think of no better way this evening that we can help districts like mine than to adopt the amendment of the gentleman from Ohio.

I commend the gentleman for offering it.

Mr. MITCHELL of Maryland. Mr. Chairman, will the gentleman yield?

Mr. ECKART. I yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. I thank the gentleman for yielding.

Mr. Chairman, I too want to commend the gentleman for offering the amendment. In all that we are doing here on the floor, you can say this is not a jobs bill or it is just a tax bill, but what we are aiming at is trying to help those areas that have the highest rates of unemployment. That just makes good sense.

I commend the gentleman for pointing out where the problem is and offering a solution and urge the support of the gentleman's amendment.

Mr. WILLIAMS of Ohio. Mr. Chairman, will the gentleman yield?

Mr. ECKART. I yield to the gentleman from Ohio.

Mr. WILLIAMS of Ohio. I thank the gentleman for yielding.

I rise in strong support of the gentleman's amendment. As the gentleman knows, we serve in neighboring districts. I represent, regrettably the area with the highest unemployment in the Nation. I compliment the gentleman on his amendment and urge my colleagues to support it.

Mr. ECKART. I thank the gentleman for his contribution.

In conclusion, let me indicate I believe this legislation, whether it is a tax bill or an infrastructure bill or a jobs bill, would be better served by adoption of this amendment. We would in fact maintain the same kind of projects that are already on the board; we would in no way diminish the number of jobs that are created.

We would in fact target those jobs and projects into the areas of the greatest need and still fulfill the targeted intent of this bill of preserving our infrastructure, rebuilding our highways and bridges, and giving the opportunity to tens of thousands Americans who so deeply need work and are looking to this bill for some relief in areas of unemployment.

Mr. ANDERSON of California. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

Mr. Chairman, I think all of us hear the message from the gentleman from Ohio. But I think he makes a mistake in what he is actually doing. He is reducing the local match by 25 percent.

Now, if a project is a $100 million job, and the Federal Government is putting up 75 percent, and the local agencies put up 25 percent, he would reduce that 25 percent by 25 percent which means he is cutting down the number of jobs by probably 6¼ percent.

Now, we do not need to do this to help the States come up with their match. We took care of that in the amendment that was adopted earlier, offered by the gentleman from New Jersey (Mr. HOWARD) when we said that if a Governor of a State feels it cannot match the money, that we will waive it for the first year and have them pay it after the second year. If they do not pay it after the second year, we will reduce the State's apportionment to recover 50 percent the third year, and the balance the fourth.

What we are doing on ths amendment is actually cutting the total amount of money by 25 percent of whatever the State match is. You are just cutting the project that much. And if you cut the project by 5 percent, you are probably going to cut down the number of jobs by 5 percent.

Mr. CLAUSEN. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON of California. I yield to the gentleman from California.

Mr. CLAUSEN. I thank the gentleman for yielding.

I think the distinguished chairman makes an excellent point. I would remind our colleagues that in the basic legislation itself there has been a very substantial increase in the overall funding commitment.

In addition, this amendment would alter the approach in existing law whereby the variations in Federal share have been based on transportation priorities.

□ 2300

Also, the amendment has the potential of injecting a new factor subject to the discretion of a Cabinet department. There could be variations and distortions as well as a loss of predictability.

We already amended this bill to address the Federal matching issue, and we dealt with the fund distribution issue from a donor-donee standpoint.

So the amendment would complicate the bill accordingly. Therefore, I am inclined to supoport the position of the chairman in opposition to the amendment.

Mr. EDGAR. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, if the author of the amendment would rise for a moment, I would like to just have a colloquy with the gentleman.

I happen to think that the gentleman's concept and his idea is a good one. I think what the gentleman is trying to do is to attempt to help write into this legislation some jobs legislation. I just want to be clear that the suggestion of the gentleman is that it be 25 percent of the local match, not the 25 percent local match, and that means that if it was 90–10, it would be 25 percent of the 10 percent that the local would have to put up; is that not correct?

Mr. ECKART. That is correct. In that instance, the local's match would be reduced by 2 percent, so the local government would be able to acquire the 90 percent of the fund by raising only 8 percent; in effect enabling more local governments to qualify for more Federal funds.

Mr. EDGAR. I just want to be clear on that. I have some problems in accepting the amendment for myself, simply because of some other intentions that we are trying to put together in this highway, bridge, and public transit bill and what it does to some of the formulas. I think cost-sharing is very important; but I think the gentleman raises an important question for all of us to consider. As we develop jobs legislation, how do we target jobs

legislation into areas of economic distress?

I think that the guidelines that the gentleman is suggesting are good ones. I am not certain that this is the right legislation to put it on, but I think the gentleman's amendment is a positive contribution to the debate.

I would hope as we develop jobs legislation that we will look at the gentleman's amendment and the amendment of the gentleman from California, Mr. LEON PANETTA, and look at ways in which we can target jobs to the structurally unemployed, those that lack skills.

I thank the gentleman for his concern for that group of people in areas of economic distress that have the greatest need.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. ECKART).

The question was taken; and on a division (demanded by Mr. ECKART) there were—ayes 12, noes 41.

So the amendment was rejected.

AMENDMENTS OFFERED BY MR. SKEEN

Mr. SKEEN. Mr. Chairman, I offer two amendments, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from New Mexico?

There was no objection.

The Clerk read as follows:

Amendments offered by Mr. SKEEN: On page 83, strike lines 1 through 7, and redesignate the succeeding subsections accordingly.

On page 85, strike lines 3 through 10, and redesignate the succeeding sections accordingly.

Mr. SKEEN (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Mexico?

There was no objection.

Mr. SKEEN. Mr. Chairman, I want to begin by apologizing to the body for the attempt earlier to have the words and music of this song played at the wrong dance hall; but now some 4 hours later that we are in the right section, I would like to explain quickly exactly what these two amendments do.

Mr. Chairman, one of these amendments strikes the committee amendment to the Surface Transportation Act of 1982, which bars the Secretary of Transportation from approving highway projects in "any State whose laws do not constitute a substantial deterrent to violations" of the speed limit. And the other strikes the committees amendment which authorize the appropriations of $20 million in fiscal year 1984 and fiscal year 1985 for "enforcing the 55-mile-per-hour speed limit."

Mr. Chairman, to pass the highway bill with these provisions as now written is inherently wrong. Who are we to tell State governments what laws are a substantial deterrent to violations and which laws are not. For the Federal Government to tell State governments what laws to pass is totally foreign to the constitutional guarantee that the States shall retain sovereignty in areas not specifically delegated to the Congress. And the fact that the Federal Government now enforces the so-called national speed limit by threatening to withhold highway funds unless the law is followed means very simply that our Government is engaged in blackmail.

Mr. Chairman, this language is vague and obviously discretionary. This sort of thinking seems to pervade the minds of those people who have not taken the trouble to question whether the 55-mile-per-hour speed limit experiment has worked. It is certainly not clear to me that it has worked. It is certainly not clear to the Reagan administration that the experiment has worked. So that is why I stand here today, and that is why my colleague from Illinois (Mr. DAN CRANE) has introduced legislation, and that is why there will continue to be legislation aimed at ending this experiment.

But regardless of the merit of this experiment, there can be no logical reason to add another layer of Federal Government blackmail to the ones already imposed in connection with the 55-mile-per-hour speed experiment. We can and must take steps to insure that our States are not required to bend further under the provisions of the Federal Government as frantic efforts are made to make this experiment work. Mr. Chairman, I urge the adoption of my amendments.

Mr. HOWARD. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, in the mid-seventies during the first energy crisis, Congress passed what is called the Federal 55-mile-an-hour speed limit. This was done mainly at that time for the purpose of being able to save gasoline and to cut down on the use of it at a time when we had an energy problem. We still have an energy problem. We will have an energy problem for many years to come.

It was thought also as a spotlight to this that there might be some saving of lives involved in it. What does the record show? The record shows that with the limited adherence that there is across this country to the 55-mile-an-hour speed limit, and it is limited, what we have seen since the passage of this legislation is on the high speed highways where we have previously had an average speed of 67 miles an hour, it is down to an average speed of 61 miles an hour; but what has that limited adherence done? Has it saved fuel? It has. Every single day it shows a savings of 200,000 barrels or 8,400,000 gallons of gasoline; so it has served that purpose.

On the side, what has it done to safety? It has done to safety this: Almost 10,000 lives a year have been saved. Over 50,000 American citizens are alive today who would not be alive today if we had not passed that.

Besides that, each year due to this law, we have 90,000 fewer paralyzing back injuries with all that that costs in monetary and personal anguish for individuals and their relatives and families.

Besides that, we have a 70-percent decline in severe head injuries. The AMA stated a few years ago that the 55-mile-an-hour speed limit is the major reason for the reduction of epilepsy in this country. Epilepsy, which is latent in all of us, is brought about by traumatic head injuries. We have seen that the 55-mile-an-hour speed limit is the reason for this.

In the States that have lax enforcement, as of a couple years ago the last figures we saw, like Wyoming, have the highest death rate in the Nation on the highways.

□ 2310

States with strong enforcement, such as my own State of New Jersey, have the lowest death rate. The people approve of this. The reason we have the language about substantial compliance is this: We have to have the Governor certify that he is "enforcing the law." We have in some of our States legislation where they did not eliminate 55, but from 55 miles an hour to 70 miles an hour they say that no one may be fined more than $5.

That is enforcement?

They also say that up to 70 miles an hour the person is not even charged with a moving violation for speeding. The only charge that can be made is the charge of not saving fuel. That is why we have this in there.

So I think it would be disastrous, with the people supporting this, for the 90,000 Americans who would not have severe, paralyzing back injuries, for the 70-percent decline in head injuries, for the almost 10,000 lives per year that can be saved.

I urge the committee to vote down both of these amendments en bloc and I yield back the balance of my time.

The CHAIRMAN. The question is on the amendments offered by the gentleman from New Mexico (Mr. SKEEN).

The amendments were rejected.

Mr. JONES of Oklahoma. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I take this time in order to enter into a brief colloquy with the distinguished subcommittee chairman on the subject of highway safety programs.

Mr. Chairman, I rise to bring to your attention the urgent need for continued financing of highway safety programs. Each year more than 55,000 Americans die in motor vehicle-related accidents. The cost to society of these deaths is estimated at over $20 billion annually. Currently we have authorized the National Highway Traffic Safety Administration to spend $131 million in 1983 and 1984 on highway safety programs, and a further $25 million in 1983 and $50 million in 1984, on incentive grants to the States to combat drunk driving. Furthermore, the Federal Highway Administration is authorized to spend $13 million in 1983 and $23 million in 1984 and 1985, on its highway safety programs. These programs are designed to educate the American driver about the hazards and horrible results of automobile accidents. I know all my colleagues are aware of the increasing public outcry against drunk driving, and I am sure you will agree that we can do more to combat the senseless killings and injuries which occur daily on our Nation's highways. It is my hope that a portion of this tax will be used to increase efforts to prevent highway deaths, through increased spending on the NHTSA and FHA programs.

I am not satisfied that we are doing enough in highway safety at this point. I would like to see some indication from this body that the administration should put some of these funds into highway safety and prevention.

Mr. Chairman, I would ask the distinguished subcommittee chairman for his views.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield to me?

Mr. JONES of Oklahoma. I yield to the gentleman from California.

Mr. ANDERSON. I thank the gentleman for yielding.

Mr. Chairman, I completely agree with the sentiments of the gentleman from Oklahoma. I assure him and all the members that we will carefully consider the levels of funding of the NHTSA and FHA programs when we take up the DOT authorization, with an eye toward increasing highway safety and reducing the cost to society of highway injuries and deaths.

Mr. JONES of Oklahoma. I thank the gentleman.

Mr. HOWARD. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman and Members of the Committee: This is to thank you for your patience. This is, overall, I believe, an excellent bill, a 4-year, $71-billion piece of legislation that is going to help the economy, going to help highway safety all across this country.

But before we leave this and go on to the Ways and Means Committee section, our Committee on Public Works and Transportation, the committee I joined 18 years ago, found that it was an effective, cooperative committee mainly because of the personnel on the committee, the members, and staff.

This piece of legislation, which I believe is landmark legislation, is the result of one of our members who served on this committee for more than the 18 years that I have been a Member of this body, a most cooperative productive Member who has never made an enemy on the committee or off the committee; a Member whose friendship we all cherish, whose expertise and dedication we all admire, whose presence we will all miss.

I refer to our friend, the ranking minority member of the full committee who is participating in this as his last legislative act of his congressional career, the gentleman from California, DON CLAUSEN.

DON, you have been wonderful. We all appreciate it. This bill is for you.

Mr. MINETA. Mr. Chairman, I move to strike the requisite number of words.

I do so, Mr. Chairman, for the purpose of entering into a colloquy with the distinguished chairman of the Subcommittee on Surface Transportation of the Committee on Public Works and Transportation.

As the leadership of the House Committee on Public Works and Transportation is aware, I have suggested, during the committee's deliberations, an amendment to this highway legislation restoring to the District of Columbia the one-half percent minimum apportionment for its primary system that it received under Federal highways laws until 1973. As a matter of basic equity, it would seem only fair to me, therefore, for the one-half percent to be restored to the District.

The highways and bridges in the Nation's Capital are in a critical state of disrepair. The primary highways in the District are particularly in need of work. I would urge as a matter of fairness that an effort be made to let the District go ahead with its program to perform this work.

Since the bill introduced by the Senate Committee on Environment and Public Works has this one-half percent restoration provision in it, I would ask that the chairman and the committee leadership give every consideration to agreeing to this provision.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. MINETA. I would be more than pleased to yield to my subcommittee chairman.

Mr. ANDERSON. I thank the gentleman for yielding.

Mr. Chairman, I understand the Member's concern on this matter, and the issue of fairness to the District, and will make every effort to favorably consider this matter in conference.

Mr. MINETA. I thank the distinguished chairman for his assurance that he will consider this matter.

AMENDMENT OFFERED BY MR. ROSTENKOWKI

Mr. ROSTENKOWSKI. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ROSTENKOWSKI:

TITLE V—HIGHWAY REVENUE ACT OF 1982

Subtitle A—Short Title; Table of Contents; Amendment of 1954 Code

SEC. 501. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This title may be cited as the "Highway Revenue Act of 1982".

(b) TABLE OF CONTENTS.—

TITLE V—HIGHWAY REVENUE ACT OF 1982

Subtitle A—Short Title; Table of Contents; Amendment of 1954 Code

Sec. 501. Short title; table of contents.
Sec. 502. Amendment of 1954 Code.

Subtitle B—Tax Changes

Sec. 511. Motor fuel taxes.
Sec. 512. Excise tax on heavy trucks.
Sec. 513. Heavy truck use tax.
Sec. 514. Taxes on heavy truck tires.
Sec. 515. Repeal of tax on lubricating oil.
Sec. 516. Period taxes and exemptions in effect.
Sec. 517. Treatment of certain motor carrier operating authorities acquired by taxpayers other than corporations.

Subtitle C—Floor Stock Provisions

Sec. 521. Floor Stocks taxes.
Sec. 522. Floor stocks refunds.
Sec. 523. Definitions and special rules.

Subtitle D—Highway Trust Fund; Mass Transit Account

Sec. 531. 4-year extension of Highway Trust Fund; codification of Trust Fund in Internal Revenue Code of 1954; establishment of Mass Transit Account.

SEC. 502. AMENDMENT OF 1954 CODE

Except as otherwise expressly provided therein, whenever in subtitle B an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

Subtitle B—Tax Changes

SEC. 511. MOTOR FUEL TAXES

(a) TAXES ON GASOLINE, DIESEL FUEL, AND SPECIAL MOTOR FUELS INCREASED FROM 4 CENTS A GALLON TO 9 CENTS A GALLON.—

(1) GASOLINE TAX.—Subsection (a) of section 4081 (relating to tax on gasoline) is amended by striking out "4 cents a gallon" and inserting in lieu thereof "9 cents a gallon".

(2) DIESEL FUEL AND SPECIAL MOTOR FUELS.—Section 4041 (relating to tax on diesel fuel and special motor fuels) is amended by striking out subsections (a) and (b) and inserting in lieu thereof the following:

"(a) DIESEL FUEL AND SPECIAL MOTOR FUELS.—

"(1) DIESEL FUEL.—There is hereby imposed a tax of 9 cents a gallon on any liquid (other than any product taxable under section 4081)—

"(A) sold by any person to an owner, lessee, or other operator of a diesel-powered

highway vehicle for use as a fuel in such vehicle, or

"(B) used by any person as a fuel in a diesel-powered highway vehicle unless there was a taxable sale of such liquid under subparagraph (A).

"(2) SPECIAL MOTOR FUELS.—There is hereby imposed a tax of 9 cents a gallon on benzol, benzene, naphtha, liquefied petroleum gas, casing head and natural gasoline, or any other liquid (other than kerosene, gas oil, or fuel oil, or any product taxable under section 4081 or paragraph (1) of this subsection)—

"(A) sold by any person to an owner, lessee, or other operator of a motor vehicle or mototboat for use as a fuel in such motor vehicle or motorboat, or

"(B) used by any person as a fuel in a motor vehicle or motorboat unless there was a taxable sale of such liquid under subparagraph (A)."

(b) EXEMPTION FOR METHANOL AND ETHANOL FUELS.—

(1) IN GENERAL.—Section 4041 is amended by adding at the end of the subsection (b) inserted by subsection (c) of this section the following new paragraph:

"(2) QUALIFIED METHANOL AND ETHANOL FUEL.—

"(A) IN GENERAL.—No tax shall be imposed by subsection (a) on any qualified methanol or ethanol fuel.

"(B) QUALIFIED METHANOL OR ETHANOL FUEL.—The term 'qualified methanol or ethanol fuel' means any liquid at least 85 percent of which consists of methanol, ethanol, or other alcohol produced from a substance other than petroleum.

"(C) TERMINATION.—On and after October 1, 1988, subparagraph (A) shall not apply."

(2) COORDINATION WITH CREDIT.—Subsection (c) of section 44F (relating to coordination of credit for alcohol used as a fuel with exemption from excise tax) is amended by striking out "section 4041(k) or 4081(c)" and inserting in lieu thereof "subsection (b)(2) or (k) of section 4041 or section 4081(c)".

(c) EXEMPTION FOR OFF-HIGHWAY BUSINESS USE.—

(1) GASOLINE.—Subsection (a) of section 6421 (relating to nonhighway use of gasoline) is amended by striking out the first sentence and inserting in lieu thereof the following: "Except as provided in subsection (i), if gasoline is used in an off-highway business use, the Secretary shall pay (without interest) to the ultimate purchaser of such gasoline an amount equal to the amount determined by multiplying the number of gallons so used by the rate at which tax was imposed on such gasoline under section 4081."

(2) DIESEL FUEL AND SPECIAL MOTOR FUELS.—Section 4041 is amended by inserting after subsection (a) the following new subsection:

"(b) EXEMPTION FOR OFF-HIGHWAY BUSINESS USE; EXEMPTION FOR QUALIFIED METHANOL AND ETHANOL FUEL.—

"(1) EXEMPTION FOR OFF-HIGHWAY BUSINESS USE.—

"(A) IN GENERAL.—No tax shall be imposed by subsection (a) on liquids sold for use or used in an off-highway business use.

"(B) TAX WHERE OTHER USE.—If a liquid on which no tax was imposed by reason of subparagraph (A) is used otherwise than in an off-highway business use, a tax shall be imposed by paragraph (1)(B) or (2)(B) of subsection (a) (whichever is appropriate).

"(C) OFF-HIGHWAY BUSINESS USE DEFINED.—For purposes of this subsection, the term 'off-highway business use' has the meaning given to such term by section 6421(d)(2)."

(3) CLERICAL AMENDMENTS.—

(A) Subparagraphs (A) and (B) of section 6421(d)(2) are each amended by striking out "qualified business use" and inserting in lieu thereof "off-highway business use".

(B) The heading for paragraph (2) of section 6421(d) is amended by striking out "QUALIFIED" and inserting in lieu thereof "OFF-HIGHWAY".

(d) RATES OF TAX FOR GASOHOL.—

(1) AMENDMENTS OF SECTION 4081.—

(A) IN GENERAL.—Paragraph (1) of section 4081(c) (relating to gasoline mixed with alcohol) is amended by striking out "no tax shall be imposed by this section on the sale of any gasoline" and inserting in lieu thereof "subsection (a) shall be applied by substituting '5 cents' for '9 cents' in the case of the sale of any gasoline".

(B) TREATMENT OF LATER SEPARATION.—

(i) Paragraph (2) of section 4081(c) is amended by striking out "tax was not imposed by reason of this subsection" and inserting in lieu thereof "tax was imposed under subsection (a) at the rate of 5 cents a gallon by reason of this subsection".

(ii) Paragraph (2) of section 4081(c) is amended by adding at the end thereof the following new sentence: "The amount of tax imposed on any sale of such gasoline by such person shall be 4 cents a gallon."

(C) TERMINATION.—Paragraph (4) of section 4081(c) is amended by striking out "December 31, 1992" and inserting in lieu thereof "September 30, 1988".

(2) AMENDMENT OF SECTION 4041.—Subsection (k) of section 4041 (relating to fuels containing alcohol) is amended to read as follows:

"(k) FUELS CONTAINING ALCOHOL.—

"(1) IN GENERAL.—Under regulations prescribed by the Secretary, in the case of the sale or use of any liquid fuel at least 10 percent of which consists of alcohol (as defined in section 4081(c)(3))—

"(A) subsection (a) shall be applied by substituting '5 cents' for '9 cents' each place it appears, and

"(B) no tax shall be imposed by subsection (c).

"(2) LATER SEPARATION.—If any person separates the liquid fuel from a mixture of the liquid fuel and alcohol to which paragraph (1) applied, such separation shall be treated as a sale of the liquid fuel. Any tax imposed on such sale shall be reduced by the amount (if any) of the tax imposed on the sale of such mixture.

"(3) TERMINATION.—Paragraph (1) shall not apply to any sale or use after September 30, 1988."

(3) TERMINATION OF INCOME TAX CREDIT.—Paragraph (1) of section 44E(f) (relating to termination of credit for alcohol used as a fuel) is amended by striking out "December 31, 1992" and inserting in lieu thereof "September 30, 1988".

(4) AMENDMENTS OF SECTION 6427.—Subsection (f) of section 6427 is amended to read as follows:

"(f) GASOLINE USED TO PRODUCE CERTAIN ALCOHOL FUELS.—

"(1) IN GENERAL.—Except as provided in subsection (i), if any gasoline on which a tax imposed by section 4081 at the rate of 9 cents a gallon is used by any person in producing a mixture described in section 4081(c) which is sold or used in such person's trade or business, the Secretary shall pay (without interest) to such person an amount equal to the amount determined at the rate of 4 cents a gallon. The preceding sentence shall not apply with respect to any mixture sold or used after September 30, 1988.

"(2) COORDINATION WITH OTHER REPAYMENT PROVISIONS.—No amount shall be payable under paragraph (1) with respect to any gasoline with respect to which an amount is payable under subsection (d) or (e) of this section or under section 6420 or 6421."

(e) USE IN CERTAIN TAXICABS.—

(1) IN GENERAL.—Paragraph (1) of section 6427(e) (relating to use in certain taxicabs) is amended by striking out "an amount equal to the aggregate amount of the tax imposed on such gasoline or fuel" and inserting in lieu thereof "an amount determined at the rate of 4 cents a gallon".

(2) EXTENSION OF REPAYMENT.—Paragraph (3) of section 6427(e) (relating to termination) is amended by striking out "December 31, 1982" and inserting in lieu thereof "September 30, 1984".

(3) STUDY.—The Secretary of the Treasury or his delegate shall conduct a study of the exemption from fuels tax provided to taxicabs by section 6427(e) of the Internal Revenue Code of 1954. Not later than January 1, 1984, the Secretary shall transmit a report on the study conducted under the preceding sentence to the Congress, together with such recommendations as he may deem advisable.

(f) REFUND OF MOTOR FUEL TAXES TO AERIAL AND OTHER APPLICATORS OF AGRICULTURAL SUBSTANCES.—Paragraph (4) of section 6420(c) (defining use on a farm for farming purposes) is amended to read as follows:

"(4) CERTAIN FARMING USE OTHER THAN BY OWNER, ETC.—In applying paragraph (3)(A) to a use on a farm for any purpose described in paragraph (3)(A) by any person other than the owner, tenant, or operator of such farm—

"(A) the owner, tenant, or operator of such farm shall be treated as the user and ultimate purchaser of the gasoline, except that

"(B) if—

"(i) the person so using the gasoline is an aerial or other applicator of fertilizers or other substances and is the ultimate purchaser of the gasoline, and

"(ii) the person described in subparagraph (A) waives (at such time and in such form and manner as the Secretary shall prescribe) his right to be treated as the user and ultimate purchaser of the gasoline,

then subparagraph (A) of this paragraph shall not apply and the aerial or other applicator shall be treated as having used such gasoline on a farm for farming purposes."

(g) TECHNICAL AND CONFORMING AMENDMENTS.—

(1) GASOLINE USED IN NONCOMMERICAL AVIATION.—Paragraph (3) of section 4041(c) (relating to noncommerical aviation) is amended to read as follows:

"(3) RATE OF TAX.—The rate of tax imposed by paragraph (2) on any gasoline in the excess of 12 cents a gallon over the rate at which tax was imposed on such gasoline under section 4081."

(2) CONFORMING AMENDMENTS.—

(A) Paragraph (2) of section 6416(b) is amended by striking out "section 4041(a)(1) or (b) (1)" and inserting in lieu thereof "paragraph (1) (A) of (2) (A) of section 4041 (a)".

(B) Subsection (a) of section 6427 is amended by striking out "section 4041(a), (b) or (c)" and inserting in lieu thereof "section 4041(a) or (c)"

(C) Paragraph (1) of section 6427 (b) is amended by striking out "subsection (a) or (b) of section 4041" each place it appears

and inserting in lieu thereof "subsection (a) of section 4041".

(D) Subsection (c) of section 6427 is amended by striking out "section 4941(a), (b) or (c)" and inserting in lieu thereof "section 4041(a) or (c)".

(h) EFFECTIVE DATE.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall take effect on April 1, 1983.

(2) FOR SUBSECTION (e) (2).—The amendment made by subsection (e) (2) shall take effect on January 1, 1983.

SEC. 52. EXCISE TAX ON HEAVY TRUCKS.

(a) CHANGES IN EXISTING MANUFACTURERS EXCISE TAX.—

(1) INCREASE IN THRESHOLD WEIGHTS.—Paragraph (2) of section 4061(a) (relating to exclusion for light-duty trucks, etc.) is amended to read as follows:

"(2) EXCLUSION FOR TRUCKS WITH GROSS VEHICLE WEIGHT OF 33,000 POUNDS OR LESS, AND CERTAIN TRAILERS.—

"(A) The tax imposed by paragraph (1) shall not apply to automobile truck chassis and automobile truck bodies, suitable for use with a vehicle which has a gross vehicle weight of 33,000 pounds or less (as determined under regulations prescribed by the Secretary).

"(B) Tax imposed by paragraph (1) shall not apply to truck trailer and semitrailer chassis and bodies, suitable for use with a trailer or semitrailer which has a gross vehicle weight of 26,000 pounds or less (as determined under regulations prescribed by the Secretary)."

(2) REPEAL OF TAX ON PARTS AND ACCESSORIES, TERMINATION OF TAX IMPOSED AT MANUFACTURERS LEVEL.—Section 4061 is amended by adding at the end thereof the following new subsection:

(c) TERMINATION.—

"(1) TAX ON PARTS AND ACCESSORIES.—On and after the day after the date of the enactment of this subsection, the tax imposed by subsection (b) shall not apply.

"(2) TAX ON TRUCKS.—On and after April 1, 1983, the tax imposed by subsection (a) shall not apply."

"(3) EXEMPTION OF CERTAIN RAIL TRAILERS AND VANS.—Subsection (a) of section 4063 (relating to exemptions for specified articles) is amended by adding at the end thereof the following new paragraph:

"(8) RAIL TRAILERS AND RAIL VANS.—The tax imposed under section 4061 shall not apply in the case of—

"(A) any chassis or body of a trailer or semitrailer which includes as an integral part one or more rail axles and is designed primarily for use on a railroad, and

"(B) any parts or accessories designed primarily for use on or in connection with an article described in subparagraph (A).

For purposes of this paragraph, a piggyback trailer or semitrailer shall not be treated as designed primarily for use on a railroad."

(4) EFFECTIVE DATE.—The amendments made by this subsection shall take effect on the day after the date of the enactment of this Act.

(b) IMPOSITION OF RETAIL TAX ON SALE OF HEAVY TRUCKS AND TRAILERS.—

(1) In General.—Chapter 31 is amended by adding at the end thereof the following new subchapter:

"Subchapter B—Heavy Trucks and Trailers

"Sec. 4051. Imposition of tax on heavy trucks and trailers sold at retail.

"Sec. 4052. Definitions and special rules.

"Sec. 4053. Exemptions.

"SEC. 4051. IMPOSITION OF TAX ON HEAVY TRUCKS AND TRAILERS SOLD AT RETAIL

"(a) IMPOSITION OF TAX.—

"(1) IN GENERAL.—There is hereby imposed on the first retail sale of the following articles (including in each case parts or accessories sold on or in connection therewith or with the sale thereof) a tax of 12 percent of the amount for which the article is so sold:

"(A) Automobile truck chassis.

"(B) Automobile truck bodies.

"(C) Truck trailer and semitrailer chassis.

"(D) Truck trailer and semitrailer bodies.

"(E) Tractors of the kind chiefly used for highway transportation in combination with a trailer or semitrailer.

"(2) EXCLUSION FOR TRUCKS WEIGHING 33,000 POUNDS OR LESS.—The tax imposed by paragraph (1) shall not apply to automobile truck chassis and automobile truck bodies, suitable for use with a vehicle which has a gross vehicle weight of 33,000 pounds or less (as determined under regulations prescribed by the Secretary).

"(3) EXCLUSION FOR TRAILERS WEIGHING 26,000 POUNDS OR LESS.—The tax imposed by paragraph (1) shall not apply to truck trailer and semitrailer chassis and bodies, suitable for use with a trailer or semitrailer which has a gross vehicle weight of 26,000 pounds or less (as determined under regulations prescribed by the Secretary).

"(4) SALE OF TRUCKS, ETC., TREATED AS SALE OF CHASSIS AND BODY.—For purposes of this subsection, a sale of an automobile truck or truck trailer or semitrailer shall be considered to be a sale of a chassis and of a body described in paragraph (1).

"(b) SEPARATE PURCHASE OF TRUCK OR TRAILER AND PARTS AND ACCESSORIES THEREFOR.—Under regulations prescribed by the Secretary—

"(1) IN GENERAL.—If the owner, lessee, or operator of a vehicle taxable under subsection (a) installs, not later than the date 6 months after the date he placed such vehicle in service, any part or accessory on such vehicle, there is hereby imposed on such installation a tax equal to 12 percent of the price of such part or accessory and its installation.

"(2) EXCEPTIONS.—Paragraph (1) shall not apply if—

"(A) the vehicle taxable under subsection (a) is a vehicle which is fully equipped for service,

"(B) the part or accessory installed is a replacement, or

"(C) the aggregate price of the parts and accessories (and their installation) described in paragraph (1) does not exceed $200 (or such other amount or amounts as the Secretary may by regulations prescribe).

"(c) TERMINATION.—On and after October 1, 1988, the taxes imposed by this section shall not apply.

"(d) TRANSITIONAL RULE.—In the case of any article taxable under subsection (a) on which tax was paid under section 4061(a), subsection (a) shall be applied by substituting '2 percent' for '12 percent'.

"SEC. 4052. DEFINITIONS AND SPECIAL RULES.

"(a) FIRST RETAIL SALE.—For purposes of this subchapter—

"(1) IN GENERAL.—The term 'first retail sale' means the first sale, for a purpose other than for resale, after manufacture, production, or importation.

"(2) LEASES CONSIDERED AS SALES.—Rules similar to the rules of section 4217 shall apply.

"(3) USE TREATED AS SALE.—

"(A) IN GENERAL.—If any person uses an article taxable under section 4051 before the first retail sale of such article, then such person shall be liable for tax under section 4051 in the same manner as if such article were sold at retail by him.

"(B) EXEMPTION FOR USE IN FURTHER MANUFACTURE.—Subparagraph (A) shall not apply to use of an article as material in the manufacture or production of, or as a component part of, another article taxable under section 4051 to be manufactured or produced by him.

"(C) COMPUTATION OF TAX.—In the case of any person made liable for tax by subparagraph (A), the tax shall be computed on the price at which similar articles are sold at retail in the ordinary course of trade, as determined by the Secretary.

"(b) DETERMINATION OF PRICE.—

"(1) IN GENERAL.—In determining price for purposes of this subchapter—

"(A) there shall be included any charge incident to placing the article in condition ready for use,

"(B) there shall be excluded—

"(i) the amount of the tax imposed by this subchapter,

"(ii) if stated as a separate charge, the amount of any retail sales tax imposed by any State or political subdivision thereof or the District of Columbia, whether the liability for such tax is imposed on the vendor or vendee, and

"(iii) the fair market value (including any tax imposed by section 4071) at retail of any tires (not including any metal rim or rim base), and

"(C) the price shall be determined without regard to any trade-in.

"(2) SALES NOT AT ARM'S LENGTH.—In the case of any article sold (otherwise than through an arm's-length transaction) at less than the fair market price, the tax under this subchapter shall be computed on the price for which similar articles are sold at retail in the ordinary course of trade, as determined by the Secretary.

"(c) CERTAIN COMBINATIONS NOT TREATED AS FURTHER MANUFACTURE.—For purposes of this subchapter (other than subsection (a)(3)(B), a person shall not be treated as engaged in the manufacture of any article merely by reason of combining such article with an item described in section 4063(d).

"(d) CERTAIN OTHER RULES MADE APPLICABLE.—Under regulations prescribed by the Secretary, rules similar to the rules of—

"(1) subsections (c) and (d) of section 4216 (relating to partial payments), and

"(2) section 4222 (relating to registration), shall apply for purposes of this subchapter.

"SEC. 4053. EXEMPTIONS.

"(a) EXEMPTION OF SPECIFIED ARTICLES.—No tax shall be imposed under section 4051 on any article specified in subsection (a) of section 4063.

"(b) CERTAIN EXEMPTIONS MADE APPLICABLE.—The exemptions provided by section 4221 (a) are hereby extended to the tax imposed by section 4051."

(2) TECHNICAL AND CONFORMING AMENDMENTS.—

(A) Chapter 31 is amended by striking out the chapter heading and inserting in lieu thereof the following:

"Chapter 31—RETAIL EXCISE TAXES

"Subchapter A. Special fuels.

"Subchapter B. Heavy trucks and trailers.

"Subchapter A—Special Fuels".

(B) The table of chapters for subtitle D is amended by striking out the item relating to

chapter 31 and inserting in lieu thereof the following new item:

"Chapter 31. RETAIL EXCISE TAXES.".

(C) Paragraph (2) of section 6416(b), as amended by this Act, is amended by inserting "or under section 4051" after "section 4041(a)".

(D) Paragraph (1) of section 6416(a) is amended by striking out "chapter 31 (special fuels)" and inserting in lieu thereof "chapter 31 (relating to retail excise taxes)".

(3) EFFECTIVE DATE.—The amendments made by this subsection shall take effect on April 1, 1983.

SEC. 513. HEAVY TRUCK USE TAX.

(a) INCREASE IN RATE OF TAX.—Subsection (a) of section 4481 (relating to imposition of tax) is amended to read as follows:

"(a) IMPOSITION OF TAX.—A tax hereby imposed on the use of any highway motor vehicle which (together with the semitrailers and trailers customarily used in connection with highway motor vehicles of the same type as such highway motor vehicle) has a taxable gross weight of at least 33,000 pounds at the rate specified in the following table:

"Taxable gross weight		Rate of tax
At least	But less than	
33,000 pounds	55,000 pounds	$60 a year, plus $20 for each 1,000 pounds or fraction thereof in excess of 33,000 pounds.
55,000 pounds	80,000 pounds	$500 a year, plus $60 for each 1,000 pounds or fraction thereof in excess of 55,000 pounds.
80,000 pounds or more		$2,000 a year."

(b) EXEMPTION WHERE TRUCK USED FOR LESS THAN 2,500 MILES ON PUBLIC HIGHWAYS.—Section 4483 (relating to exemptions from highway use tax) is amended by adding after subsection (c) thereof the following new subsection:

"(d) EXEMPTION FOR TRUCKS USED FOR LESS THAN 2,500 MILES ON PUBLIC HIGHWAYS.—

"(1) SUSPENSION OF TAX.—

"(A) IN GENERAL.—If—

"(i) it is reasonable to expect that the use of any highway motor vehicle on public highways during any taxable period will be less than 2,500 miles, and

"(ii) the owner of such vehicle furnishes such information as the Secretary may by forms or regulations require with respect to the expected use of such vehicle,

then the collection of the tax imposed by section 4481 with respect to the use of such vehicle shall be suspended during the taxable period.

"(B) SUSPENSION CEASES TO APPLY WHERE USE EXCEEDS 2,500 MILES.—Subparagraph (A) shall cease to apply with respect to any highway motor vehicle whenever the use of such vehicle on public highways during the taxable period exceeds 2,500 miles.

"(2) EXEMPTION.—If—

"(A) the collection of the tax imposed by section 4481 with respect to any highway motor vehicle is suspended under paragraph (1),

"(B) such vehicle is not used during the taxable period on public highways for more than 2,500 miles, and

"(C) except as otherwise provided in regulations, the owner of such vehicle furnishes such information as the Secretary may require with respect to the use of such vehicle during the taxable period,

then no tax shall be imposed by section 4481 on the use of such vehicle for the taxable period.

"(3) REFUND WHERE TAX PAID AND VEHICLE NOT USED FOR MORE THAN 2,500 MILES.—If—

"(A) the tax imposed by section 4481 is paid with respect to any highway motor vehicle for any taxable period, and

"(B) the requirements of subparagraphs (B) and (C) of paragraph (2) are met with respect to such taxable period,

the amount of such tax shall be credited or refunded (without interest) to the person who paid such tax.

"(4) RELIEF FROM LIABILITY FOR TAX UNDER CERTAIN CIRCUMSTANCES WHERE TRUCK IS TRANSFERRED.—Under regulations prescribed by the Secretary, the owner of a highway motor vehicle with respect to which the collection of the tax imposed by section 4481 is suspended under paragraph (1) shall not be liable for the tax imposed by section 4481 (and the new owner shall be liable for such tax) with respect to such vehicle if—

"(A) such vehicle is transferred to a new owner,

"(B) such suspension is in effect at the time of such transfer, and

"(C) the old owner furnishes such information as the Secretary by forms and regulations requires with respect to the transfer of such vehicle.

"(5) OWNER DEFINED.—For purposes of this subsection, the term 'owner' means, with respect to any highway motor vehicle, the person described in section 4481(b)."

(c) CLARIFICATION OF TRAILERS CUSTOMARILY USED IN CONNECTION WITH HIGHWAY MOTOR VEHICLES.—

(1) Subsection (c) of section 4482 is amended by adding at the end thereof the following new paragraph:

"(5) CUSTOMARY USE.—A semitrailer or trailer shall be treated as customarily used in connection with a highway motor vehicle if such vehicle is equipped to tow such semitrailer or trailer."

(2) The heading for subsection (c) of section 4482 is amended by inserting "AND SPECIAL RULE" after "DEFINITIONS".

"(d) SPECIAL RULE FOR TAXABLE PERIOD IN WHICH TERMINATION DATE OCCURS.—Section 4482 is amended by adding at the end thereof the following new subsection:

"(d) SPECIAL RULE FOR TAXABLE PERIOD IN WHICH TERMINATION DATE OCCURS.—In the case of the taxable period which ends on September 30, 1988, the amount of the tax imposed by section 4481 with respect to any highway motor vehicle shall be determined by reducing each dollar amount in the table contained in section 4481(a) by 75 percent."

(e) EFFECTIVE DATE.—

(1) IN GENERAL.—Except as otherwise provided in this subsection, the amendments made by this section shall take effect on January 1, 1984.

(2) SHORT TAXABLE PERIODS.—For purposes of subchapter D of chapter 36 of the Internal Revenue Code of 1954—

(A) the period beginning on July 1, 1983, and ending on December 31, 1983, and

(B) the period beginning on January 1, 1984, and ending on June 30, 1984,

shall each be treated as a taxable period.

(3) TRANSITIONAL RULE FOR FIRST SHORT PERIOD.—In the case of the taxable period beginning on July 1, 1983, the tax imposed by section 4481(a) of such code with respect to the use of any highway motor vehicle shall be determined by substituting "$1.50 for such period" for "$3.00 a year" in such section 4481(a).

(4) TRANSITIONAL RULE FOR SECOND SHORT PERIOD.—In the case of the taxable period beginning on January 1, 1984—

(A) the amount of the tax imposed by section 4481(a) of such Code (as amended by this section) on the use of any highway motor vehicle shall be determined by cutting in half each dollar amount in the table contained in such section 4481(a), and

(B) subsection (d) of section 4483 of such Code (as amended by subsection (b)) shall be applied by substituting "1,250" for "2,500" each place it appears.

(5) COORDINATION WITH INSTALLMENT PAYMENT OF TAX.—

(A) The Secretary of the Treasury or his delegate shall by forms or regulation provide for appropriate adjustments in the application of section 6156 of such Code with respect to the taxable periods referred to in paragraph (2).

(B) For purposes of subparagraph (A)—

(i) there shall be substituted for the table appearing in section 6156(a) of such Code the following table:

"If liability is incurred in—	The number of installments shall be—
July, August, September, January, February, or March.	2", and

(ii) in lieu of subsection (e) of such section 6156, this paragraph shall not apply to any liability for tax incurred in October, November, December, April, May, or June.

(f) STUDY OF ALTERNATIVES TO TAX ON USE OF HEAVY TRUCKS—

(1) IN GENERAL.—The Secretary of Transportation (in consultation with the Secretary of the Treasury) shall conduct a study of—

(A) alternatives to the tax on heavy vehicles imposed by section 4481(a) of the Internal Revenue Code of 1954, and

(B) plans for improving the collecting and enforcement of such tax and alternatives to such tax.

(2) ALTERNATIVES INCLUDED.—The alternatives studied under paragraph (1) shall include taxes based either singly or in suitable combinations on vehicle size or configuration; vehicle weight, both registered and actual operating weight; and distance traveled. Plans for improving tax collection and enforcement shall, to the extent practical, provide for Federal and State cooperation in such activities.

(3) CONSULTATION WITH STATE OFFICIALS AND OTHER AFFECTED PARTIES.—The study required under subsection (a) shall be conducted in consultation with State officials, motor carriers, and other affected parties.

(4) REPORT.—Not later than January 1, 1985, the Secretary of Transportation shall submit to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate a report on the study conducted under paragraph (1) together with such recommendations as he may deem advisable.

SEC. 514. TAXES ON HEAVY TRUCK TIRES.

(a) GENERAL RULE.—Subsection (a) of section 4071 (relating to imposition and rate of tax on tires and tubes) is amended to read as follows:

"(a) IMPOSITION AND RATE OF TAX.—There is hereby imposed on the following articles, if wholly or in part made of rubber, sold by the manufacturer, producer, or importer a tax at the following rates:

"(1) Any tire of the type used on highway vehicles which weighs more than 100 pounds, 25 cents a pound.

"(2) Tread rubber, 25 cents a pound".

(b) EXEMPTION FOR TREAD RUBBER USED IN RECAPPING OR RETREADING TIRES WEIGHING 100 POUNDS OR LESS.—

(1) Subsection (c) of section 4073 (relating to exemption from tax on tread rubber in certain cases) is amended to read as follows:

"(c) EXEMPTION FROM TAX ON TREAD RUBBER IN CERTAIN CASES.—Under regulations prescribed by the Secretary, the tax imposed by section 4071(a)(2) shall not apply to tread rubber used by the manufacturer, producer, or importer (or sold by the manufacturer, producer, or importer for use) otherwise than in the recapping or retreading of any tire which (after recapping or retreading)—

"(1) is of the type used on highway vehicles, and

"(2) weighs more than 100 pounds.".

(2) Clause (i) of section 6416(b)(2)(G) (relating to specified uses and resales) is amended to read as follows:

"(i) used or sold for use otherwise than in the recapping or retreading of any tire which (after recapping or retreading)—

"(I) is of the type used on highway vehicles (as defined in section 4072(c)), and

"(II) weighs more than 100 pounds,".

(3) Subsection (d) of section 4222 (relating to registration in the case of certain other exemptions) is amended by inserting "4073(c)," after "4064(b)(1)(C),".

(c) TECHNICAL AND CLERICAL AMENDMENTS.—

(1) The first sentence of section 4071(b) is amended by striking out "or inner tube" and by striking out "or tube" each place it appears.

(2) Subsection (e) of section 4071 is amended—

(A) by striking out "or inner tubes (other than bicycle tires and inner tubes)", and

(B) by striking out "and inner tubes" in paragraphs (1) and (2).

(3) Subsection (b) of section 4218 is amended—

(A) by striking out "or inner tube", and

(B) by striking out "Except as provided in subsection (d), if" and inserting in lieu thereof "If".

(4)(A) The heading for part II of subchapter A of chapter 32 is amended by striking out "AND TUBES".

(B) The table of parts for subchapter A of chapter 32 is amended by striking out "and tubes" in the item relating to part II.

(5) The heading for subsection (b) of section 4218 is amended by striking out "and Tubes".

(6)(A) Section 4218 is amended by striking out subsection (d) and by redesignating subsection (e) as subsection (d).

(B) Subsection (a) of section 4218 is amended by striking out "(b), (c), or (d)" and inserting in lieu thereof "(b) or (c)".

(7)(A) Paragraph (2) of section 4221(e) is amended—

(i) by striking out "or inner tube" each place it appears; and

(ii) by striking out "or tube" each place it appears.

(B) The heading for paragraph (2) of section 4221(e) is amended by striking out "and tubes".

(8) Subsection (e) of section 4221 is amended by striking out paragraph (4) and by redesignating paragraphs (5) and (6) as paragraphs (3) and (4), respectively.

(9)(A) Subparagraph (A) of section 4221(e)(3), as redesignated by paragraph (8), is amended to read as follows:

"(A) the tax imposed by paragraph (1) of section 4071(a) shall not apply in the case of tires sold for use by the purchaser on or in connection with a qualified bus, and"

(B) Subparagraph (B) of section 4221(e)(3), as redesignated by paragraph (8), is amended by striking out "paragraph (4)" and inserting in lieu thereof "paragraph (2)".

(C) The heading for paragraph (3) of section 4221(e) as redesignated by paragraph (8), is amended by striking out ", tubes,".

(10)(A) Paragraph (1) of section 6412(a) is amended—

(i) by striking out "tubes," in the heading,

(ii) by striking out "4071(a)(1), (3), or (4)" and inserting in lieu thereof "4071(a)(1) or (2)", and

(iii) by striking out the last sentence.

(B) Subparagraph (A) of section 6412(a)(2) is amended by striking out "section 4071(a)(4)" and inserting in lieu thereof "section 4071(a)(2)".

(11) Subparagraph (G) of section 6416(b)(2) is amended by striking out "section 4071(a)(4)" and inserting in lieu thereof "section 4071(a)(2)".

(12) Subparagraph (L) of section 6416(b)(2) is amended to read as follows:

"(L) in the case of any tire taxable under paragraph (1) of section 4071(a), sold to any person for use as described in section 4221(e)(3)(A);".

(13) Subparagraph (M) of section 6416(b)(2) is amended by striking out "paragraph (4)" and inserting in lieu thereof "paragraph (2)".

(14)(A) Subparagraph (C) of section 6416(b)(3) is amended by striking out "or inner tube".

(B) Subparagraph (D) of section 6416(b)(3) is amended by striking out "section 4071(a)(4)" and inserting in lieu thereof "section 4071(a)(2)".

(C) Paragraph (3) of section 6416(b) is amended by striking out subparagraph (E), by adding "or" at the end of subparagraph (D), and by redesignating subparagraph (F) as subparagraph (E).

(15)(A) Subparagraph (A) of section 6416(b)(4) is amended by striking out "section 4071(a)(4)" and inserting in lieu thereof "section 4071(a)(2)".

(B) Paragraph (4) of section 6416(b) is amended by striking out "or inner tube" each place it appears.

(C) The heading for paragraph (4) of section 6416(b) is amended by striking out ", inner tubes".

(16)(A) Subsection (c) of section 6416 is amended—

(i) by striking out "OR INNER TUBES" in the heading, and

(ii) by striking out "or inner tubes" in the text.

(B) Paragraphs (1) and (2) of subsection (c) of section 6416 are amended to read as follows:

"(1) if such tires were taxable under section 4071 (relating to tax on tires), the purchase price (less the part of such price attributable to the metal rim or rim base); or

"(2) if such tires were taxable under section 4218 (relating to use by manufacturer, producer, or importer), the price (less the part of such price attributable to the metal rim or rim base) at which such or similar tires are sold, in the ordinary course of trade, by manufacturers, producers, or importers thereof, as determined by the Secretary."

(17) Subsection (b) of section 9502 is amended by inserting "and" at the end of paragraph (1), by striking out "; and" at the end of paragraph (2) and inserting in lieu thereof a period, and by striking out paragraph (3).

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to articles sold on or after January 1, 1984.

SEC. 515. REPEAL OF TAX ON LUBRICATING OIL.

(a) GENERAL RULE.—Subpart B of part III of subchapter A of chapter 32 (relating to tax on lubricating oil) is hereby repealed.

(b) TECHNICAL AMENDMENTS.—

(1) Subsection (c) of section 4221 is amended by striking out "4083, or 4093" and inserting in lieu thereof "or 4083".

(2) Subsection (d) of section 4222 is amended by striking out "4093,".

(3) (A) Section 6206 is amended by striking out "4091 (with respect to payments under section 6424)," and by striking out "6424," each place it appears in the heading and the text.

(B) The table of sections for subchapter A of chapter 63 is amended by striking out "6424," in the item relating to section 6206.

(4) Paragraph (2) of section 6416(b) is amended—

(A) by striking out subparagraph (N),

(B) by striking out the next to the last sentence,

(C) by inserting "or" at the end of subparagraph (L), and

(D) by striking out "; or" at the end of subparagraph (M) and inserting in lieu thereof a period.

(5) Section 6424 (relating to lubricating oil used for certain nontaxable purposes) is hereby repealed.

(6) (A) Subsection (a) of section 39 is amended by striking out paragraph (3), by redesignating paragraph (4) as paragraph (3), and by inserting "and" at the end of paragraph (2).

(B) Subsection (b) of section 39 is amended—

(i) by striking out "section 6421, 6424, or 6427" and inserting in lieu thereof "section 6421 or 6427", and

(ii) by striking out "section 6421(i), 6424(f), or 6427(i)" and inserting in lieu thereof "section 6421(i) or 6427(i)".

(C) The heading for section 39 is amended by striking out ", special rules, and lubricating oil" and inserting in lieu thereof "and special fuels".

(D) The table of sections for subpart A of part IV of subchapter A of chapter 1 is amended by striking out ", special fuels, and lubricating oil" in the item relating to section 39 and inserting in lieu thereof "and special fuels".

(E) Sections 874(a) and 6201(a)(4) are each amended by striking out ", special fuels, and lubricating oil" and inserting in lieu thereof "and special fuels".

(F) Paragraph (2) of section 882(c) is amended by striking out "and lubricating oil".

(7) Subparagraph (C) of section 6421(d)(2) is amended by striking out ", special motor fuels, and lubricating oil" and inserting in lieu thereof "and special motor fuels".

(8) Section 4101 is amended by striking out "or section 4091".

(9) Section 4102 is amended by striking out "or lubricating oils".

(10) Paragraph (9) of section 6504 is amended by striking out "6424 (relating to lubricating oil used for certain nontaxable purposes)," and by striking out "6424,".

(11)(A) Subsection (a) of section 6675 is amended by striking out "6424 (relating to lubricating oil used for certain nontaxble purposes),".

(B) Paragraph (1) of section 6675(b) is amended by striking out "6424,".

(C) The heading for section 6675 is amended by striking out "OR LUBRICATING OIL".

(D) The table of sections for subchapter B of chapter 68 is amended by striking out "or

lubricating oil" in the item relating to section 6675.

(12) Sections 7210, 7603, 7604, 7605, 7609(c)(1), and 7610(c) are each amended by striking out "6424(d)(2)," each place it appears.

(13) The table of subpart for part III of subchapter A of chapter 32 is amended by striking out the item relating to subpart B.

(14) The table of sections for subchapter B of chapter 65 is amended by striking out the item relating to section 6424.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to articles sold after the date of the enactment of this Act.

SEC. 516. PERIOD TAXES AND EXEMPTIONS IN EFFECT.

(a) PERIOD TAXES IN EFFECT.—

(1) SPECIAL FUELS TAX.—

(A) Subsection (a) of section 4041 (as amended by this Act) is amended by adding at the end thereof the following new paragraph:

"(3) TERMINATION.—On and after October 1, 1988, the taxes imposed by this subsection shall not apply."

(B) Subsection (e) of section 4041 is hereby repealed.

(2) TIRES AND TREAD RUBBER.—Subsection (d) of section 4071 is amended to read as follows:

"(d) TERMINATION.—On and after October 1, 1988, the taxes imposed by subsection (a) shall not apply."

(3) GASOLINE.—Subsection (b) of section 4081 is amended to read as follows:

"(b) TERMINATION.—On and after October 1, 1988, the taxes imposed by this section shall not apply."

(4) HIGHWAY USE TAX.—Sections 4481(e) and 4482(c)(4) are each amended by striking out "1984" each place it appears and inserting in lieu thereof "1988".

(5) FLOOR STOCKS TAXES.—Paragraph (1) of section 6412(a) (relating to floor stocks refunds) is amended—

(A) by striking out "1985" each place it appears and inserting in lieu thereof "1989" and

(B) by striking out "1984" each place it appears and inserting in lieu thereof "1988".

(6) OTHER PROVISIONS.—Paragraph (2) of section 6156(e) (relating to installment payments of tax on use of highway motor vehicles) and subsection (h) of section 6421 (relating to tax on gasoline used for certain nonhighway purposes or by local transit systems) are each amended by striking out "1984" and inserting in lieu thereof "1988".

(b) TERMINATION OF EXEMPTIONS.—

(1)(A) Subsection (f) of section 4041 is amended by adding at the end thereof the following new paragraph:

"(3) TERMINATION.—On and after October 1, 1988, paragraph (1) shall not apply."

(B) Subsection (g) of section 4041 is amended by adding at the end thereof the following new sentence: "Paragraphs (2) and (4) shall not apply on and after October 1, 1988."

(2) Subsection (a) of section 4221 (relating to certain tax resales) is amended by adding at the end thereof the following new sentence: "In the case of taxes imposed by section 4051, 4071, or 4081, paragraphs (4) and (5) shall not apply on and after October 1, 1988."

(3) Section 4483 (relating to exemption for highway use tax) is amended by adding after subsection (d) thereof the following new subsection:

"(e) TERMINATION OF EXEMPTIONS.—Subsections (a) and (c) shall not apply on and after October 1, 1988."

(4) Section 6420 (relating to gasoline used on farms) is amended by redesignating subsection (h) as subsection (i) and by inserting after subsection (g) the following new subsection:

"(h) TERMINATION.—This section shall apply only with respect to gasoline purchased before October 1, 1988."

(5) Section 6427 is amended by redesignating subsection (k) as subsection (l) and by inserting after subsection (j) the following new subsection:

"(k) TERMINATION OF SUBSECTIONS (a), (b), (c), AND (d).—Subsections (a), (b), (c), and (d) shall only apply with respect to fuels purchased before October 1, 1988."

SEC. 517. TREATMENT OF CERTAIN MOTOR CARRIER OPERATING AUTHORITIES ACQUIRED BY TAXPAYERS OTHER THAN CORPORATIONS.

(a) GENERAL RULE.—Paragraph (2) of section 266(c) of the Economic Recovery Tax Act of 1981 (relating to stock acquisitions of motor carrier operating authorities) is amended by redesignating subparagraph (B) as subparagraph (C) and by inserting after subparagraph (A) the following new subparagraph:

"(B) TREATMENT OF CERTAIN NONCORPORATE TAXPAYERS.—Under regulations prescribed by the Secretary of the Treasury or his delegate, and at the election of the holder of the authority, in any case in which—

"(i) a noncorporate taxpayer or group of noncorporate taxpayers on or before July 1, 1980, acquired in one purchase stock in a corporation which held, directly or indirectly, any motor carrier operating authority at the time of such acquisition, and

"(ii) the acquisition referred to in clause (i) would have satisfied the requirements of subparagraph (A) if the stock had been acquired by a corporation,

then, for purposes of subparagraphs (A) and (C), the noncorporate taxpayer or group of noncorporate taxpayers referred to in clause (i) shall be treated as a corporation. The preceding sentence shall apply only if such noncorporate taxpayer (or group of noncorporate taxpayers) on July 1, 1980, held stock constituting control (within the meaning of section 368(c) of the Internal Revenue Code of 1954) of the corporation holding (directly or indirectly) the motor carrier operating authority."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to taxable years ending after July 30, 1980.

Subtitle C—Floor Stock Provisions

SEC. 521. FLOOR STOCKS TAXES.

(a) 1983 TAX ON GASOLINE.—On gasoline subject to tax under section 4081 which, on April 1, 1983, is held by a dealer for sale, there is hereby imposed a floor stocks tax at the rate of 5 cents a gallon.

(b) 1984 TAX ON TIRES AND TREAD RUBBER.—On any article which would be subject to tax under paragraph (1) or (2) of section 4071(a) if sold by the manufacturer, producer, or importer on or after January 1, 1984, which on January 1, 1984, is held by a dealer and has not been used and is intended for sale, there shall be imposed a floor stocks tax equal to—

(1) in the case of an article taxable under paragraph (1) of section 4071(a), 15.25 cents a pound, and

(2) in the case of an article taxable under paragraph (2) of section 4071(a), 20 cents a pound.

In the case of tread rubber, the tax imposed by this subsection shall not apply in the case of any person if such person establishes, to the satisfaction of the Secretary of the Treasury or his delegate, that all tread rubber held by him on January 1, 1984, will be used otherwise than in the recapping or retreading of tires which are of the type used on highway vehicles (as defined in section 4072(c)) and which weigh more than 100 pounds.

(c) OVERPAYMENT OF FLOOR STOCKS TAXES.—Section 6416 shall apply in respect of the floor stocks taxes imposed by this section, so as to entitle, subject to all provisions of section 6416, any person paying such floor stocks taxes to a credit or refund thereof for any of the reasons specified in section 6416.

(d) DUE DATE OF TAXES.—The taxes imposed by this section shall be paid at such time after—

(1) May 15, 1983, in the case of the tax imposed by subsection (a), or

(2) February 15, 1984, in the case of the tax imposed by subsection (b), as may be prescribed by the Secretary of the Treasury or his delegate.

(e) TRANSFER OF FLOOR STOCKS TAXES TO HIGHWAY TRUST FUND.—For purposes of determining the amount transferred to the Highway Trust Fund for any period, the taxes imposed by this section shall be treated as if they were imposed by section 4081 or 4071 of the Internal Revenue Code of 1954, whichever is appropriate.

SEC. 522. FLOOR STOCKS REFUNDS.

(a) GENERAL RULE.—

(1) IN GENERAL.—Where, before the day after the date of the enactment of this Act, any tax-repealed article has been sold by the manufacturer, producer, or importer and on such day is held by a dealer and has not been used and is intended for sale, there shall be credited or refunded (without interest) to the manufacturer, producer, or importer an amount equal to the tax paid by such manufacturer, producer, or importer on his sale of the article if—

(A) claim for such credit or refund is filed with the Secretary of the Treasury or his delegate before October 1, 1983, based on a request submitted to the manufacturer, producer, or importer before July 1, 1983, by the dealer who held the article in respect of which the credit or refund is claimed, and

(B) on or before October 1, 1983, reimbursement has been made to the dealer by the manufacturer, producer, or importer in an amount equal to the tax paid on the article or written consent has been obtained from the dealer to allowance of the credit or refund.

(2) LIMITATION ON ELIGIBILITY FOR CREDIT OR REFUND.—No manufacturer, producer, or importer shall be entitled to credit or refund under paragraph (1) unless he has in his possession such evidence of the inventories with respect to which the credit or refund is claimed as may be required by regulations prescribed by the Secretary of the Treasury or his delegate under this subsection.

(3) OTHER LAWS APPLICABLE.—All provisions of law, including penalties, applicable with respect to the taxes imposed by section 4061, 4071, or 4091 (whichever is appropriate) shall, insofar as applicable and not inconsistent with paragraphs (1) and (2) of this subsection, apply in respect of the credits and refunds provided for in paragraph (1) to the same extent as if the credits or refunds constituted overpayments of the tax.

(b) REFUNDS WITH RESPECT TO CERTAIN CONSUMER PURCHASES OF TRUCKS AND TRAILERS.—

(1) IN GENERAL.—Except as otherwise provided in paragraph (2), where after December 2, 1982, and before the day after the date of the enactment of this Act, a tax-repealed article on which tax was imposed by section 4061(a) has been sold to an ultimate purchaser, there shall be credited or refunded (without interest) to the manufacturer, producer, or importer of such article an amount equal to the tax paid by such manufacturer, producer, or importer on his sale of the article.

(2) LIMITATION OF ELIGIBILITY FOR CREDIT OR REFUND.—No manufacturer, producer, or importer shall be entitled to a credit or refund under paragraph (1) with respect to an article unless—

(A) he has in his possession such evidence of the sale of the article to an ultimate purchaser, and of the reimbursement of the tax to such purchaser, as may be required by regulations prescribed by the Secretary of the Treasury or his delegate under this subsection.

(B) claim for such credit or refund is filed with the Secretary of the Treasury or his delegate before October 1, 1983, based on information submitted to the manufacturer, producer, or importer before July 1, 1983 by the person who sold the article (in respect of which the credit or refund is claimed) to the ultimate purchaser, and

(C) on or before October 1, 1983, reimbursement has been made to the ultimate purchaser in an amount equal to the tax paid on the article.

(3) OTHER LAWS APPLICABLE.—All provisions of law, including penalties, applicable with respect to the taxes imposed by section 4061(a) shall, insofar as applicable and not inconsistent with paragraph (1) or (2) of this subsection, apply in respect of the credits and refunds provided for in paragraph (1) to the same extent as if the credits or refunds constituted overpayments of the tax.

(c) CERTAIN USES BY MANUFACTURER, ETC.—In the case of any article which was subject to the tax imposed by section 4061(a) (as in effect on the day before the date of the enactment of this Act), any tax paid by reason of section 4218(a) (relating to use by manufacturer or importer considered sale) with respect to a tax-repealed article shall be deemed to be an overpayment of such tax if tax was imposed on such article after December 2, 1982, by reason of section 4218(a).

(d) TRANSFER OF FLOOR STOCKS REFUNDS FROM HIGHWAY TRUST FUND.—The Secretary of the Treasury shall pay from time to time from the Highway Trust Fund into the general fund of the Treasury amounts equivalent to the floor stocks refunds made under this section.

SEC. 523. DEFINITIONS AND SPECIAL RULE.

(a) IN GENERAL.—For purposes of this subtitle—

(1) The term "dealer" includes a wholesaler, jobber, distributor, or retailer.

(2) An article shall be considered as "held by a dealer" if title thereto has passed to such dealer (whether or not delivery to him has been made) and if for purposes of consumption title to such article or possession thereof has not at any time been transferred to any person other than a dealer.

(3) The term "tax-repealed article" means any article on which a tax was imposed by section 4061(a), 4061(b), or section 4091 as in effect on the day before the date of the enactment of this Act, and which will not be subject to tax under section 4061(a), 4061(b), or 4091 as in effect on the day after the date of the enactment of this Act.

(4) Except as otherwise expressly provided herein, any reference in this subtitle to a section or other provision shall be treated as a reference to a section or other provision of the Internal Revenue Code of 1954.

(b) 1984 EXTENSION OF FLOOR STOCKS REFUND TO TIRES.—

(1) IN GENERAL.—In the case of an article on which a tax was imposed by section 4071(a) as in effect on December 31, 1983, and which will not be subject to tax under such section as in effect on January 1, 1984, such article shall be treated as a tax-repealed article for purposes of subsection (a) of section 522.

(2) ALLOWANCE OF REFUND.—In the case of a tax-repealed article to which paragraph (1) applies, subsection (a) of section 522 shall be applied by treating December 31, 1983, as the date of the enactment of this Act.

Subtitle D—Highway Trust Fund; Mass Transit Account

SEC. 531. 4-YEAR EXTENSION OF HIGHWAY TRUST FUND; CODIFICATION OF TRUST FUND IN INTERNAL REVENUE CODE OF 1954; ESTABLISHMENT OF MASS TRANSIT ACCOUNT.

(a) GENERAL RULE.—Subchapter A of chapter 98 of the Internal Revenue Code of 1954 (relating to Trust Fund Code) is amended by adding at the end thereof the following new section:

"SEC. 9503. HIGHWAY TRUST FUND.

"(a) CREATION OF TRUST FUND.—There is established in the Treasury of the United States a trust fund to be known as the 'Highway Trust Fund', consisting of such amounts as may be appropriated or credited to the Highway Trust Fund as provided in this section or section 9602(b).

"(b) TRANSFER TO HIGHWAY TRUST FUND OF AMOUNTS EQUIVALENT TO CERTAIN TAXES.—

"(1) IN GENERAL.—There are hereby appropriated to the Highway Trust Fund amounts equivalent to the taxes received in the Treasury before October 1, 1988, under the following provisions—

"(A) section 4041 (relating to taxes on diesel fuels and special motor fuels),

"(B) section 4051 (relating to retail tax on heavy trucks and trailers),

"(C) section 4061 (relating to tax on trucks and truck parts),

"(D) section 4071 (relating to tax on tires and tread rubber),

"(E) section 4081 (relating to tax on gasoline),

"(F) section 4091 (relating to tax on lubricating oil), and

"(G) section 4481 (relating to tax on use of certain vehicles).

"(2) LIABILITIES INCURRED BEFORE OCTOBER 1, 1988.—There are hereby appropriated to the Highway Trust Fund amounts equivalent to the taxes which are received in the Treasury after September 30, 1988, and before July 1, 1989, and which are attributable to liability for tax incurred before October 1, 1988, under the provisions described in paragraph (1).

"(3) ADJUSTMENTS FOR AVIATION USES.—The amounts described in paragraphs (1) and (2) with respect to any period shall (before the application of this subsection) be reduced by appropriate amounts to reflect any amounts transferred to the Airport and Airway Trust Fund under section 9502(b) with respect to such period.

"(c) EXPENDITURES FROM HIGHWAY TRUST FUND.—

"(1) FEDERAL-AID HIGHWAY PROGRAM.—Except as provided in subsection (e), amounts in the Highway Trust Fund shall be available, as provided by appropriation Acts, for making expenditures before October 1, 1988, to meet those obligations of the United States heretofore or hereafter incurred which are—

"(A) authorized by law to be paid out of the Highway Trust Fund established by section 209 of the Highway Revenue Act of 1956,

"(B) authorized to be paid out of the Highway Trust Fund under title I or II of the Surface Transportation Assistance Act of 1982, or

"(C) hereafter authorized by a law which does not authorize the expenditure out of the Highway Trust Fund of any amount for a general purpose not covered by subparagraph (A) or (B) as in effect on December 31, 1982.

"(2) TRANSFERS FROM HIGHWAY TRUST FUND FOR CERTAIN REPAYMENTS AND CREDITS.—

"(A) IN GENERAL.—The Secretary shall pay from time to time from the Highway Trust Fund into the general fund of the Treasury amounts equivalent to—

"(i) the amounts paid before July 1, 1989, under—

"(I) section 6420 (relating to amounts paid in respect of gasoline used on farms),

"(II) section 6421 (relating to amounts paid in respect of gasoline used for certain nonhighway purposes or by local transit systems),

"(III) section 6424 (relating to amounts paid in respect of lubricating oil used for certain nontaxable purposes), and

"(IV) section 6427 (relating to fuels not used for taxable purposes),

on the basis of claims filed for periods ending before October 1, 1988, and

"(ii) the credits allowed under section 39 (relating to credit for certain uses of gasoline, special funds, and lubricating oil) with respect to gasoline, special fuels, and lubricating oil used before October 1, 1988.

"(B) TRANSFERS BASED ON ESTIMATES.—Transfers under subparagraph (A) shall be made on the basis of estimates by the Secretary, and proper adjustments shall be made in amounts susequently transferred to the extent prior estimates were in excess or less than the amounts required to be transferred.

"(C) EXCEPTION FOR USE IN AIRCRAFT AND MOTORBOATS.—This paragraph shall not apply to amounts estimated by the Secretary as attributable to use of gasoline and special fuels in motorboats or in aircrft.

"(3) 1988 FLOOR STOCKS REFUNDS.—The Secretary shall pay from time to time from the Highway Trust Fund into the general fund of the Treasury amounts equivalent to the floor stocks refunds made before July 1, 1989, under section 6412(a).

"(4) TRANSFERS FROM THE TRUST FUND FOR MOTORBOAT FUEL TAXES.—

"(A) TRANSFER TO NATIONAL RECREATIONAL BOATING SAFETY AND FACILITIES IMPROVEMENT FUND.—

"(i) IN GENERAL.—The Secretary shall pay from time to time from the Highway Trust Fund into the National Recreational Boating Safety and Facilities Improvement Fund established by section 202 of the Recreational Boating Fund Act amounts (as determined by him) equivalent to the motorboat fuel taxes received on or after October 1, 1980, and before October 1, 1988.

"(ii) LIMITATIONS.—

"(I) LIMIT ON TRANSFERS DURING ANY FISCAL YEAR.—The aggregate amount transferred under this subparagraph during any fiscal year shall not exceed $45,000,000.

"(II) LIMIT ON AMOUNT IN FUND.—No amount shall be transferred under this sub-

paragraph if the Secretary determines that such transfer would result in increasing the amount in the National Recreational Boating Safety and Facilities Improvement Fund to a sum in excess of $45,000,000.

"(B) EXCESS FUNDS TRANSFERRED TO LAND AND WATER CONSERVATION FUND.—Any amount received in the Highway Trust Fund which is attributable to motorboat fuel taxes and which is not transferred from the Highway Trust Fund under subparagraph (A) shall be transferred by the Secretary from the Highway Trust Fund into the land and water conservation fund provided for in title I of the Land and Water Conservation Fund Act of 1965.

"(C) MOTORBOAT FUEL TAXES.—For purposes of this paragraph, the term 'motorboat fuel taxes' means the taxes under section 4041(a)(2) with respect to special motor fuels used as fuel in motorboats and under section 4081 with respect to gasoline used as fuel in motorboats.

"(d) ADJUSTMENTS OF APPORTIONMENTS.—

"(1) ESTIMATES OF UNFUNDED HIGHWAY AUTHORIZATIONS AND NET HIGHWAY RECEIPTS.—The Secretary of the Treasury, not less frequently than once in each calendar quarter after consultation with the Secretary of Transportation, shall estimate—

"(A) the amount which would (but for this subsection) be the unfunded highway authorizations at the close of the fiscal year, and

"(B) the net highway receipts for the 24-month period beginning at the close of such fiscal year.

"(2) PROCEDURE WHERE THERE IS EXCESS UNFUNDED HIGHWAY AUTHORIZATIONS.—If the Secretary of the Treasury determines for any fiscal year that the amount described in paragraph (1)(A) exceeds the amount described in paragraph (1)(B)—

"(A) he shall so advise the Secretary of Transportation, and

"(B) he shall further advise the Secretary of Transportation as to the amount of such excess.

"(3) ADJUSTMENT OF APPORTIONMENTS WHERE UNFUNDED AUTHORIZATIONS EXCEED 2 YEARS' RECEIPTS—

"(A) DETERMINATION OF PERCENTAGE.—If, before any apportionment to the States is made, in the most recent estimate made by the Secretary of the Treasury there is an excess referred to in paragraph (2)(B), the Secretary of Transportation shall determine the percentage which—

"(i) the excess referred to in paragraph (2)(B), is of

"(ii) the amount authorized to be appropriated from the Trust Fund for the fiscal year for apportionment to the States.

If, but for this sentence, the most recent estimate would be one which was made on a date which will be more than 3 months before the date of the apportionment, the Secretary of the Treasury shall make a new estimate under paragraph (1) for the appropriate fiscal year.

"(B) ADJUSTMENT OF APPORTIONMENTS.—If the Secretary of Transportation determines a percentage under subparagraph (A) for purposes of any apportionment, notwithstanding any other provision of law, the Secretary of Transportation shall apportion to the States (in lieu of the amount which, but for the provisions of this subsection, would be so apportioned) the amount obtained by reducing the amount authorized to be so apportioned by such percentage.

"(4) APPORTIONMENT OF AMOUNTS PREVIOUSLY WITHHELD FROM APPORTIONMENT.—If, after funds have been withheld from apportionment under paragraph (3)(B), the Secretary of the Treasury determines that the amount described in paragraph (1)(A) does not exceed the amount described in paragraph (1)(B) or that the excess described in paragraph (1)(B) is less than the amount previously determined, he shall so advise the Secretary of Transportation. The Secretary of Transportation shall apportion to the States such portion of the funds so withheld from apportionment as the Secretary of the Treasury has advised him may be so apportioned without causing the amount described in paragraph (1)(A) to exceed the amount described in paragraph (1)(B). Any funds apportioned pursuant to the preceding sentence shall remain available for the period for which they would be available if such apportionment took effect with the fiscal year in which they are apportioned pursuant to the preceding sentence.

"(5) DEFINITIONS.—For purposes of this subsection—

"(A) UNFUNDED HIGHWAY AUTHORIZATIONS.—The term 'unfunded highway authorizations' means, at any time, the excess (if any) of—

"(i) the total potential unpaid commitments at such time as a result of the apportionment to the States of the amounts authorized to be appropriated from the Highway Trust Fund, over

"(ii) the amount available in the Highway Trust Fund at such time to defray such commitments (after all other unpaid commitments at such time which are payable from the Highway Trust Fund have been defrayed).

"(B) NET HIGHWAY RECEIPTS.—The term 'net highway receipts' means with respect to any period, the excess of—

"(i) the receipts (including interest) of the Highway Trust Fund during such period, over

"(ii) the amounts to be transferred during such period from such Fund under subsection (c) (other than paragraph (1) thereof).

"(6) REPORTS.—Any estimate under paragraph (1) and any determination under paragraph (2) shall be reported by the Secretary of the Treasury to the Committee on Ways and Means of the House of Representatives, the Committee on Finance of the Senate, the Committees on the Budget of both Houses, the Committee on Public Works and Transportation of the House of Representatives, and the Committee on Environment and Public Works of the Senate.

"(e) ESTABLISHMENT OF MASS TRANSIT ACCOUNT.—

"(1) CREATION OF ACCOUNT.—There is established in the Highway Trust Fund a separate account to be known as the 'Mass Transit Account' consisting of such amounts as may be transferred or credited to the Mass Transit Account as provided in this subsection or section 9602(b).

"(2) TRANSFER TO MASS TRANSIT ACCOUNT.—The Secretary of the Treasury shall transfer to the Mass Transit Account one-ninth of the amounts appropriated to the Highway Trust Fund under subsection (b) which are attributable to taxes under sections 4041 and 4081 imposed after March 31, 1983.

"(3) EXPENDITURES FROM ACCOUNT.—Amounts in the Mass Transit Account shall be available, as provided by appropriation Acts, for making capital expenditures before October 1, 1988 (including capital expenditures for new projects) under section 3 of the Urban Mass Transportation Act of 1964.

"(4) LIMITATION.—Rules similar to the rules of subsection (d) shall apply to the Mass Transit Account except that subsection (d)(1) shall be applied by substituting '12-month' for '24-month'."

(b) REPEAL OF SECTION 209 OF THE HIGHWAY REVENUE ACT OF 1956.—Section 209 of the Highway Revenue Act of 1956 (other than subsection (b) thereof) is hereby repealed.

(c) CONFORMING AMENDMENTS TO LAND AND WATER CONSERVATION FUND.—Subsection (b) of section 201 of the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 4601-11) is amended—

(1) by striking out "1985" each place it appears and inserting in lieu thereof "1989"; and

(2) by striking out "1984" and inserting in lieu thereof "1988".

(d) CLERICAL AMENDMENT.—The table of sections for subchapter A of chapter 98 of such Code is amended by adding at the end thereof the following new item:

"Sec. 9503. Highway Trust Fund."

(e) EFFECTIVE DATE; SAVING PROVISION.—

(1) IN GENERAL.—The amendments made by this section shall take effect on January 1, 1983.

(2) NEW HIGHWAY TRUST FUND TREATED AS CONTINUATION OF OLD.—The Highway Trust Fund established by the amendments made by this section shall be treated for all purposes of law as the continuation of the Highway Trust Fund established by section 209 of the Highway Revenue Act of 1956. Any reference in any law to the Highway Trust Fund established by such section 209 shall be deemed to include (wherever appropriate) a reference to the Highway Trust Fund established by the amendments made by this section.

Mr. ROSTENKOWSKI (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The CHAIRMAN. Pursuant to House Resolution 620, the gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 1 hour, and the gentleman from New York (Mr. CONABLE) will be recognized for 1 hour.

The Chair recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

Mr. ROSTENKOWSKI. Mr. Chairman, I am offering an amendment, approved by the Committee on Ways and Means on December 2, 1982, as the revenue title to H.R. 6211, the Surface Transportation Assistance Act of 1982.

H.R. 6211 provides authorizations for highway programs at increased levels for the period fiscal year 1983 through fiscal year 1986. Accordingly, the amendment of the Committee on Ways and Means provides a revenue title which finances the higher spending levels proposed in H.R. 6211 by increasing net excise tax receipts from highway user taxes and extending the highway trust fund through fiscal year 1988. This revenue title is a product of bipartisan effort, and enjoys the strong support of the administration.

At this point, Mr. Chairman, I will insert in the RECORD, correspondence from the Secretary of the Treasury and the Secretary of Transportation strongly endorsing our committee amendment.

THE SECRETARY OF THE TREASURY,
Washington, D.C., December 6, 1982.

DEAR MEMBER OF CONGRESS: The House Ways and Means Committee has approved legislation to increase and restructure the excise taxes currently dedicated to the Highway Trust Fund. The Administration supports this bill and urges its adoption by the House.

The Ways and Means Committee legislation would increase highway user taxes to finance increased Federal funding for needed investments in highway maintenance, highway construction, and mass transit. It is appropriate that these vitally needed programs continue to be financed by taxes on highway users. Reliance on user taxes to finance particular Federal programs, such as highways and airports, is fair because costs of the program are then paid by the beneficiaries of the service rather than by the general taxpaying public.

The Ways and Means Committee legislation would also restructure the highway excise taxes to increase the share of the tax burden paid by heavy vehicles and reduce the share of highway taxes paid by light trucks. This restructuring will bring the tax shares paid by different user groups more closely in line with the costs they impose on the highway system. The trucking industry as a whole will benefit from this legislation because of the improvements in the highway system it will finance and because of the provisions in the legislation to increase truck weight limits.

The legislation also contains significant provisions to improve the administration of the highway excise taxes and to reduce taxpayer compliance burdens. The truck parts tax, a source of considerable taxpayer burden, will be eliminated, the truck sales tax will be removed from most trucks, and enforcement of the heavy vehicle use tax will be improved.

For these reasons, we strongly support the bill and urge bipartisan support for it in the House.

With best wishes,
Sincerely,

DONALD T. REGAN.

THE SECRETARY OF TRANSPORTATION,
Washington, D.C., December 3, 1982.

DEAR MEMBER OF CONGRESS: I urge your support for the revenue portions of the legislation approved Thursday by the Ways and Means Committee. That legislation, which increases highway user fees and extends the Highway Trust Fund, is expected to come to the floor of the House on Monday as the revenue title of H.R. 6211. While the Administration has major problems with the authorization provisions for highways and transit, which we will seek to resolve during Congressional deliberation on those provisions, we strongly endorse the revenue title.

This revenue title is essential legislation. We have a rare opportunity to enact legislation that has been too long delayed. I know you have heard from the many special interests on this issue, but there is an overriding public interest at stake. To defer action will be too costly—both to the users of our highway system and to the system itself.

Without the additional revenues this title provides, we will face a serious and immediate shortfall in the funds needed to complete the interstate system and halt the creeping deterioration of our existing roads, bridges and transit systems. Unless we meet those pressing needs, we will face the far higher costs of future replacement and reconstruction.

The Ways and Means Committee has reported a revenue title that is even-handed and fair to all concerned. The five cent per gallon increase in motor fuel represents the first increase in highway user fees in 23 years. It is not a general tax, and will not affect the budget deficit. The Committee's revenue title reduces the highway use taxes that we originally proposed for the heaviest trucks, and delays the effective date for some of those taxes until January 1984. The total package of increases will generate the revenues needed to replenish the Highway Trust Fund and finance a growing agenda of Interstate, primary and bridge repair projects and mass transit capital improvements.

The revenue title achieves the Administration's objective of having heavy trucks pay a greater share of their responsibility for highway costs. At the same time, the improved highways and the increased truck size and weight limits that are part of this legislation will provide truckers productivity gains that will more than offset any increase in user fee taxes. Attached is a fact sheet explaining these issues in more detail.

Favorable action now will enable the states to proceed early in the new year with the nearly $6 billion worth of road and bridge projects awaiting funding. For states without adequate matching funds, we have agreed to consider a proposal allowing them to pay a smaller share initially, the balance to be repaid later.

We believe the revenue title before the House contains the provisions necessary to put the nation's highway construction and rehabilitation programs on a sound financial footing. Our objective is the protection and preservation of a transportation infrastructure that is too valuable to neglect.

We may not again have the opportunity now before us. Let's not lose it, or defer to a later day legislation that is needed now. When the Committee's bill comes to the floor, I respectfully ask your strong support for the revenue title as reported by the Ways and Means Committee.

Sincerely,

DREW LEWIS.

HIGHWAY ISSUES AFFECTING TRUCKERS

The issue. Are the truckers getting a fair deal in the package of legislative changes affecting truckers in the 5-cent highway bill?

Answer. Yes.

The facts. Up to now other drivers have been subsidizing the operators of large trucks.

A three year study of cost responsibilities for Federal-aid highway programs, recently completed by the Federal Highway Administration, concluded that under the existing highway user charge structure: combination trucks heavier than 75,000 lbs. gross vehicle weight (GVW) are paying only about 60 percent of their fair share of the costs, single-unit trucks, as a group, are overpaying their fair share of the costs by nearly 90 percent.

Though disputed by the trucking community, these results are broadly supported and confirmed by the analyses and professional judgments of: the Congressional Budget Office; the American Association of State Highway and Transportation Officials (AASHTO); individual state transportation and highway departments; a consensus of the highway engineering and design community, both practicing and theoretical; and practitioners employing the latest design practices in the U.S., Canada and Europe.

Correcting the inequities in the existing user fee system is important for two reasons: It is only fair that the users of the system pay those costs for which they are responsible. A fundamental requirement of the free market system is that prices must accurately reflect the costs of goods and services for the system to work most efficiently, and the existing structure does not do this.

THE COMPROMISE PROPOSAL RECOMMENDED AND APPROVED BY THE WAYS AND MEANS COMMITTEE

The user fees reported out by the House Ways and Means Committee strike a reasonable compromise between the Administration's proposed changes and the concerns expressed by the trucking community arising out of the current economic difficulties. The principal results which the compromise user fee would accomplish are: increasing the contribution of combination trucks greater than 75,000 lbs. GVW to 77 percent of their share of the costs (increased from the nearly 60 percent they now pay, but reduced from the 86 percent which the Administration requested), reducing the amount that single-unit trucks overpay to 18 percent of their share.

BENEFITS TO TRUCKERS

Question. Won't these changes devastate the trucking industry?

Answer. Absolutely not. In fact, the Administration package, as modified by Ways and Means, contains many benefits for truckers.

Cost.—We estimate that the new user fee increases will amount to less than one-half of one percent of the annual operating costs of the trucking industry.

Productivity.—The Administration bill will dramatically raise the productivity of truckers. The completion of the Interstate system will be accelerated, bridges will be made stronger, and roads will be repaired. The Administration bill also guarantees that larger and heavier trucks will be able to use the Interstate in every state. The estimate of benefits to truckers from allowing larger and heavier trucks alone is $4 billion per year.

Safety.—The Administration bill proposes a $150 million state safety grant program. This program will provide funds to the states for enforcement of commercial motor vehicle safety standards. This will help keep unsafe trucks off the roads to the benefit of other truckers.

Tax structure.—As modified by Ways and Means, truckers would be relieved of $308 million of taxes per year on truck parts. This benefit will help small truckers and large truckers alike. Another concern of the trucking industry was addressed when Ways and Means decided to postpone the effective date of new use taxes from July 1, 1983, to January 1, 1984. The Ways and Means version also drops the maximum heavy vehicle use tax from the Administration's proposed $2,700 per year to $2,000 per year. Overall, the Ways and Means' proposal represents a reasonable compromise.

In providing these tax changes and the extension of the highway trust fund, the committee has changed the distribution of the tax burden by shifting a larger share of the heaviest trucks on the highways and reducing

the share paid by lighter trucks. These shifts are consistent with the highway cost allocation study submitted to Congress by the Department of Transportation in May of this year and were strongly urged by the administration.

SUMMARY OF THE REVENUE TITLE

The Ways and Means Committee's revenue title extends the highway trust fund for 4 years past its present expiration date, through fiscal year 1988, and creates a mass transit account in the trust fund for capital expenditures that will rebuild and expand urban mass transit systems.

The revenue sources for the highway trust fund presently are scheduled to terminate or revert to lower rates on October 1, 1984. The Ways and Means Committee amendment increases, repeals, or modifies these provisions and raises the current annual trust fund revenues by an estimated $2.2 billion in fiscal year 1983, $5.2 billion in 1984, and $5.6 billion in fiscal year 1985. After considering the effects on income tax receipts resulting from the deductibility of these excise taxes by businesses, net budget receipts will increase by an estimated $1.7 billion in fiscal year 1983, $3.9 billion in fiscal year 1984, and $4.2 billion in fiscal year 1985.

I now want to briefly describe the major provisions of the revenue title.

FUEL TAXES

The excise tax on gasoline, diesel, and special motor fuels that are used in automobiles and trucks is increased from 4 cents a gallon to 9 cents a gallon, effective April 1, 1983.

The motorboat fuel tax is also increased to 9 cents a gallon. Revenues from this tax bill continue to be deposited in the land and water conservation fund, and the transfer to the boating safety fund will increase from $20 million to $45 million through fiscal year 1988.

The fuel tax exemptions in present law for State and local governments, intercity, school and local buses, nonprofit educational institutions, farming, and nonhighway business uses, are increased to 9 cents a gallon. The current 4 cents a gallon exemption for taxicabs will continue at that level through September 30, 1984. The present gasohol exemption remains at 4 cents a gallon. A new 9-cent-a-gallon exemption is provided for alcohol fuels, chiefly methanol and ethanol, that are made from substances other than petroleum.

TIRE TAXES

Except for the tax on heavy duty truck tires, the present excise taxes on tires are repealed. The excise tax on new tires that weigh more than 100 pounds is increased from 9.75 cents a pound to 25 cents a pound. Similarly, the 5 cents a pound tax on rubber used for retreading tires heavier than 100 pounds also is raised to 25 cents a pound. The excise taxes on nonhighway tires and on innertubes are repealed. The tax on aircraft tires is also repealed. These changes are effective on January 1, 1984.

LUBRICATING OIL

The 6-cents-a-gallon tax on lubricating oil is repealed on the day after the date of enactment.

TRUCK RELATED TAXES

Truck-related taxes are simplified and restructured to reallocate a larger share of the cost burden for the highway system to heavy trucks and to reduce the relative burden on light trucks. The tax on truck parts and accessories is repealed, as of the day after enactment. The tax on new trucks and trailers will increase from 10 percent to 12 percent on April 1, 1983. At that time, the truck and trailer excise tax will become a retail tax. The truck tax will apply to trucks over 33,000 pounds and trailers over 26,000 pounds compared to 10,000 pounds under present law. These higher exemption levels for trucks and trailers go into effect on the day after enactment, and refunds of excise taxes paid after December 2 will be provided.

HEAVY-VEHICLE USE TAX

The heavy-vehicle use tax is the principal means for redistributing a larger burden on the highway costs to the heaviest trucks. The present tax is $3 per 1,000 pounds for trucks weighing more than 26,000 pounds. In its place, the Ways and Means Committee amendment provides a graduated tax that begins at 33,000 pounds. Trucks below that weight level will pay no tax. At 33,000 pounds, trucks will pay $60. Trucks weighing 55,000 pounds will pay $500. The maximum annual use tax of $2,000 will apply to heavy trucks over 80,000 pounds. The new schedule will become effective on January 1, 1984.

TERMINATION OF TAXES

All the highway user excise taxes, as well as exemptions from the taxes, expire on October 1, 1988.

TRUST FUNDS

HIGHWAY TRUST FUND

The highway trust fund is extended for 4 years, through September 30, 1988. The taxes that will be deposited into the trust fund, and the authority to spend from the trust fund, expire after that date.

The statutory authority for the trust fund is transferred to the Internal Revenue Code. Authority to spend from the trust fund is provided for general expenditure purposes which are authorized by law as of December 31, 1982.

The antideficit provisions of the present Byrd amendment are modified and clarified. As a result, unfunded authorizations may not exceed 2 years of anticipated trust fund receipts. Authority for repayable advances from the Treasury is repealed.

TRANSIT ACCOUNT

One cent a gallon of the fuel taxes is to be deposited in a separate account in the highway trust fund. This revenue may be used only for mass transit capital expenditures, including new starts, that are authorized in section 3 of the Urban Mass Transit Act as amended by H.R. 6211 and subsequent acts of Congress. This account is limited to unfunded authorizations in anticipation of only 1 year's revenues. Repayable advances are not permitted.

CONCLUSION

H.R. 6211 and the Ways and Means Committee's revenue title accomplish many important objectives. The Committee on Ways and Means worked hard to complete this major legislation in a short period of time. This has been an admirable demonstration of how Congress can meet its responsibilities thoughtfully and quickly.

The Ways and Means Committee revenue title extends the highway trust fund, adds a transit account, and provides the financing for a needed, higher level of outlays. In providing this financing, the committee both simplified the highway excise tax structure and shifted a greater portion of the cost burden to heavy highway vehicles and large trucks and trailers, as recommended by the administration.

I am well aware that tax increases, however meritorious, are not popular. However, I want to emphasize that these highway user taxes have not been increased for several decades. The gas tax has remained at 4 cents per gallon since 1959. The heavy truck use tax has not been increased since 1961. Further, many of the changes made in the Ways and Means Committee amendment will simplify the highway excise tax structure for those that must pay and collect these taxes. Nuisance taxes are repealed and all the major truck taxes are restructured to apply only to heavy trucks.

Finally, these changes have been strongly urged by the administration and are fully supported by studies prepared by the Departments of Transportation and Treasury on how to more fairly distribute the tax burden among highway users and to simplify the highway excise tax structure.

Some will argue today that the increased tax burden on heavy trucks under the Ways and Means Committee amendment is excessive. In response, I would observe that the Department of Transportation's cost allocation study found the heaviest trucks underpaying their fair share today by 40 percent. Under the committee amendment, these trucks will still underpay by over 20 percent. Nevertheless, in recognition of the fact that the tax dollar increase involved for some trucks may be particularly burdensome in today's economy, the commit-

tee agreed to reduce the level of the heavy truck use tax recommended by the administration, and also delayed the effective date of this tax increase until January 1, 1984.

Mr. Chairman, I have today filed a committee report on H.R. 7368, a bill introduced earlier today by the Honorable BARBER CONABLE, ranking minority member of the committee, and myself, which embodies the text of the Ways and Means Committee amendment now pending before the House. It is the intention of the Ways and Means Committee that this committee report on H.R. 7368 constitute the official legislative history of the Ways and Means Committee amendment.

Mr. Chairman, the Ways and Means Committee's revenue title strikes a reasonable balance and deserves the support of the House. I urge its adoption.

□ 2330

The CHAIRMAN. The Chair now recognizes the gentleman from New York (Mr. CONABLE).

Mr. CONABLE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I am going to, in some degree, repeat some of the points of information made by the distinguished chairman of the committee, because we do not have many requests for time, but this is a terribly important piece of legislation and I want to be sure the Members understand it. I will try to be as brief as I can.

Mr. Chairman, I support the revenue title of H.R. 6211. It was reported out of the Committee on Ways and Means by voice vote—a rare occurrence in major legislation and expressive of the leadership of both the distinguished chairman of the committee, the gentleman from Illinois, and adroit spokesmen from the administration, notably the innovative Secretary of Transportation. It also represents what I believe to be a reasonable and equitable response to an obvious need: Financing the restoration of our country's traffic arteries.

The measure clearly is controversial. Any legislation which raises taxes, whatever the purpose, is likely to be. Much of the trucking industry, for example, is unhappy with it, in large part because it shifts the user tax burden more to heavy vehicles—a step which is consistent with findings of a highway cost allocation study requested by the Committee on Ways and Means several years ago.

That study, by the Department of Transportation, showed that the weightiest vehicles do not pay a road user share commensurate with the damage they do to the Nation's highways. In particular, the study disclosed that heavy combination trucks underpay their "cost responsibility" by about 50 percent, on average, while single unit trucks, excluding pickups and vans, overpay their "cost responsibility" by about 100 percent. The legislation before us today makes a substantial adjustment in this regard. In so doing, it endears itself to some segments of the transportation sector and alienates others.

It must be acknowledged that this legislation taxes work. Most Americans go to their job in automobiles, despite great progress in mass transit, and a small part of total mileage in this country is discretionary today. Thus, the gasoline tax in this package does represent a tax on work.

To the extent that money consumed by a higher gas tax will not be spent in other sectors of our economy, this measure also can be seen as a negative macroeconomic factor.

Despite these "downside" aspects, the legislation has a positive force which should be dominant. Its potential drawbacks should be offset to a substantial degree by its tangible benefits—an improved and safer highway-and-bridge network, plus several hundred thousand jobs in a basic industry now suffering a 23-percent unemployment rate.

Specifically, this revenue title provides what we are assured will be adequate funding for the increased road authorizations contained in H.R. 6211 for the next 4 years. Highway excise taxes, as well as all exemptions, are terminated at the end of fiscal 1988.

The legislation increases taxes on gasoline, diesel fuel, and certain special fuels from 4 cents per gallon to 9 cents per gallon, effective April 1, 1983. Revenues equal to 1 cent of this increase are earmarked for a new mass transit account within the highway trust fund, the provisions of which are transferred to the trust fund portion of the Internal Revenue Code.

The mass transit revenue will be available for capital expenditures, including new starts, which promises to be a particular boon to troubled urban systems.

Although most users will have to absorb the higher taxes at the pumps, there are exemptions to take into account extraordinary needs and a general desire to lower reliance on traditional fossil fuels. Examples: A full exemption of 9 cents per gallon is given for off-highway business users who now enjoy a 2-cents-per-gallon exemption, for users of alcohol fuels which are not derived from petroleum, for State and local government users, and for agricultural users. Full exemptions also go to nonprofit educational groups and buses—not only school buses but both local and intercity buses. Gasohol users and qualified taxicab operators will continue to get a 4-cents-per-gallon exemption, but will pay the added levy.

The taxi exemption terminates September 30, 1984. In the meantime, the executive branch will conduct a study on the merits of that specific relief.

Present law provides that the taxes collected on motorboat fuels be assigned to the land and water conservation fund, except for $20 million, which goes to the recreational boating safety and facilities improvement fund. The new revenue provisions continue that general practice, and extend the boat safety fund through the life of the tax and increase the amount that fund receives to $45 million.

Of special interest to smaller vehicles producers and users, the revenue title repeals existing taxes on inner tubes, laminated tires and nonhighway tires and increases the highway tire tax from 9.75 cents per pound to 25 cents per pound, but only for tires weighing more that 100 pounds. Commensurately, the tax on tread rubber is also placed at 25 cents per pound, when it is used on tires weighing over 100 pounds.

The very controversial 8 percent excise taxes on truck parts and accessories would be ended, under this revenue title, on the day after enactment. This levy was seen as an administrative nuisance and not a major revenue producer.

The revenue title would increase, from 10 to 12 percent, the taxes on new trucks and trailers, and would shift the imposition of these taxes from manufacturing to retail level. The measure also would increase the weight threshold for tax purposes from 10,000 pounds to 33,000 pounds for trucks, and to 26,000 pounds for trailers. Repeal of the parts tax and the increase in weight thresholds would become effective the day after enactment, but the conversion from manufacturing to retail levies would be effective April 1 next year.

One of the most widely discussed facets of this legislation is its adjustment of the so-called use tax, consistent with the cost allocation finding. Existing law imposes a flat $3 per 1,000 pounds on trucks weighing more than 26,000 pounds.

The new schedule, which is based on a sliding scale, would provide: For vehicles under 33,000 pounds, no tax; for those up to 55,000 pounds, $60 plus $20 for each 1,000 pounds over 33,000; for those up to 80,000 pounds, $500 plus $60 per 1,000 pounds over 55,000; and for vehicles weighing over 80,000 pounds, $2,000. This represents a very substantial increase for heavier vehicles, but it is important to keep in mind that a drastic alteration is warranted according to the cost allocation study, and that trucks which travel fewer than 2,500 miles per tax period will be exempt from the tax.

Mr. Chairman, I do not hold out this piece of legislation as any kind of a cure-all, for what we euphemistically call our Nation's infrastructure, for our ailing economy, or for our unemployment problem. But I do think it is appropriate to the times.

The idea behind this package is not new. It was brought forward many months ago by our able Secretary of Transportation, and since then has been examined and adopted by others. Whereas it commanded slim support at the outset, it now has widespread backing, particularly where it counts, both in the White House and here on the Hill. In effect, events have caught up with it.

In short, Mr. Chairman, this revenue title represents an idea whose time apparently has come, and I urge my colleagues to join me in approving it today.

□ 2340

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 3 minutes to the gentleman from South Carolina (Mr. HOLLAND).

Mr. HOLLAND. I thank my chairman for yielding me this time because I rise in opposition to this section of the bill.

No matter what the President said, this is the 125-percent tax increase part of this legislation.

I have been watching all week for President Reagan to come on television and urge my constituents to get on the telephone and send me the telegrams urging me to vote for this like he did the Kemp-Roth package. But I have not seen that.

But, you know, the President does not have to do this in this instance. He has the leadership of this House to do it for him.

I think this tax, to put it like a lot of my liberal friends put it, is about the most regressive attack on the poor and middle-class of this country that I have seen in 8 years in Congress. The burden is going to fall and I would say to my rural friends on you and your constituents to pay 20 percent of this 125 percent tax increase to build subways in the bigger cities of this country.

I know the big cities have problems. But that takes it away from being a user's tax, does it not? If they want a user's tax for subways they should tax subway tickets so those of us who do not have any mass transit but maybe like in my district a couple of school buses, we are sort of paying up as a user for things we are not going to be using.

I talked about New Jersey over in the committee the other day and I tried to tell my friends, like the gentleman from New Jersey (Mr. GUARINI) that we do not have these toll roads down there in my part of the country to extract money from the innocent tourist passing through. So we think we are paying more into the trust fund than we are getting out regardless of some of these computer printouts.

I do not want to take much time because I know it is late. I just tried to put back a letter that I got from one of my constituents and I want to read to the House what my constituent had to say about what has been going on lately in the Congress.

DEAR MR. HOLLAND: I read where Congress is talking about raising taxes again. About the only pleasure a poor man has left is to smoke a cigarette or drink a beer and ride in his pickup truck.

You all have figured out how to tax all of these things with Reagan's help. I guess a poor man is just out of luck these days.

P.S.—I am afraid to say I like women. You all might figure out how to tax that, too.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 5 minutes to the gentleman from Wisconsin (Mr. REUSS).

Mr. REUSS. Mr. Chairman, while we need to rehabilitate our Nation's highways and bridges—and we must find the money to do it—the arguments against imposing a 5-cent increase in the gasoline tax are overwhelming. We should defeat the tax increase and instead fund the needed highway and bridge improvements by placing a $700 per taxpayer cap on the July 1983 income tax cut.

With unemployment now up to 10.8 percent, the gasoline tax increase would take $5.5 billion yearly from the pockets of the very consumers who are being counted on to generate an economic recovery. This is not a job-creation bill, it is a job-elimination bill. According to CEA Chairman Martin Feldstein, the cut in consumer spending that will result from the gas tax will cost our economy dearly in jobs in 1983. The 12 million Americans currently unemployed would be joined by thousands more if the gas tax is enacted.

Many of the private forecasters agree. In the December 1982 forecast of Data Resources, Inc., it is stated:

The President and the Congress agree on a public works program to be financed out of a higher gasoline tax. While the country has a need for a new round of investment in roads and bridges, the initial impact of this program is certain to be perverse. The gasoline tax, as presently proposed, would begin to withdraw $5 billion of purchasing power on January 1, 1983. But the federal outlays to be financed out of these taxes would not occur for many months. Indeed, since the grants to the states are on a reimbursement basis, little federal money would be paid out in the first year. Thus, this particular program will, in a small way, worsen the recession.

Moreover, the gasoline tax is unfair. It falls most heavily on low- and middle-income wage-earners, while imposing only an insignificant burden on the well-to-do. Lower income families spend a larger fraction of their annual incomes on gasoline than do those at the top of the scale and will be most hurt by the new tax. According to the Labor Department, the bottom half of all families in the United States receive about 22 percent of all income but consume about 31 percent of all gasoline. By contrast, the top 7 percent of families receive 22 percent of the Nations income but consume only 11 percent of the gasoline. And, although $30 is the estimated annual "average" cost of the tax, it will actually be much larger for those who must drive to work each day or use their car for other essential purposes.

The burden will be worst for those families with incomes of $15,000 per year or less. The proposed gasoline tax increases would completely wipe out the income tax reduction they are scheduled to receive on July 1, 1983.

Of course, we need to rehabilitate our Nation's highways and bridges. But we should not fund the proposal with a tax which costs thousands of jobs. Instead, we should transfer to the highway trust fund from general revenues an annual amount equal to the revenues that would have been raised by the 5-cent increase in the gasoline tax, and fund this by imposing a $700 per taxpayer cap on the personal income tax cut currently scheduled for July 1983. The cap when fully effective will yield $7 billion in new revenues, more than enough to fund the $5.5 billion highway program. The cap, furthermore, will not eliminate jobs, since its revenue gain will much more closely match the timing of increased spending on highways and bridges.

The cap also would be equitable. The burden will be borne not by low- and middle-income taxpayers who must drive to work, but by those with annual incomes of $45,000 and up. Under our proposal, taxpayers who make less than $45,000 will receive the full tax cut for 1983. While the $700 cap will reduce the tax cut for the well to do, these taxpayers received a great benefit in 1982 when the top rate was cut in one stroke from 70 to 50 percent, 35 percent of the 1982 tax cut, and the top rate on capital gains was reduced from 28 to 20 percent.

By replacing the 5-cent-per-gallon tax increase on gasoline with a $700 cap on the July 1983 income tax cut, we can rebuild our highways without further damaging our economy. If the House votes down the gas tax, legislation can be introduced that would fund the highway and bridge program through a $700 cap on the July 1983 tax cut.

□ 2350

Mr. CONABLE. Mr. Chairman, I yield 7 minutes to the distinguished gentleman from Minnesota (Mr. FRENZEL.)

Mr. FRENZEL. Mr. Chairman, the description of the bill as given by the

distinguished chairman and the distinguished ranking member of the Committee on Ways and Means is in my judgment accurate. I think also accurate is their combined statement which indicates the need for the preservation and enhancement of our important Interstate Highway System, and the rest of our transportation arteries.

I think no one would say that the need does not exist.

That of course takes us to the way in which we are going to finance the general attention to that particular need.

During the consideration of the Committee on Ways and Means, it is my judgment that insufficient attention was given to the testimony of trucking interests. We heard 5 minutes I think from the American Trucking Association. I do not remember hearing from any people who would be independent truckers, or cattle haulers, or all of the other trucking interests that might be involved.

I think that the 5-cent gas tax is something which all of us and probably all of them would be willing to support.

The increases in tire taxes for trucking companies will be in the neighborhood of 250 percent may also be stomached. Perhaps even the excise tax increase from 10 to 12 percent on new equipment is something that could be stood.

However, like the gentleman from South Carolina (Mr. HOLLAND), I am positively aghast at the percentage increase in the highway use tax. For heavier weighted trucks, which runs around 800 percent for the standard combination in use in my area, which would be licensed for about 70,000 pounds, the cost of a use tax would go from $210 to around $1,900, which is an increase of slightly more than 800 percent.

For the heaviest weighted trucks, those of over 80,000 pounds, that increase goes from $240 to $2,000, and would have under the original bill presented by the administration soared to $2,700.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from New York.

Mr. CONABLE. I thank the gentleman for yielding.

I do want to point out to my colleagues while what the gentleman from Minnesota is saying is correct, the proposal has been substantially compromised below that suggested by the administration by the Committee on Ways and Means.

Also that it falls far short of what the study conducted over the past several years has indicated should be the proportionate cost of heavy trucks in terms of the damage they do to the roads.

And so I want my colleagues to understand that we have already compromised with both the study and the administration proposal.

Mr. FRENZEL. I thank the gentleman for his contribution.

I would say that we did compromise. We compromised from a 1,100-percent increase down to an 800-percent increase, which is probably going to not be terribly thrilling news to the operators who, as I understand it right now, are operating on razor slim margins or perhaps at least in my area many of them operating on negative ratios at this time.

It is true that studies have been completed. It is also true that studies have been subjected to various interpretations, some of them sustaining the position of the Department of Transportation and some of them not sustaining that decision.

Certainly I have seen no overwhelming evidence of the exact percentage that is contributed by trucks and that contributed by cars. I think we have a lot of work to do yet in that regard.

Nevertheless, it seems to me that an 800-percent increase by anyone's standards is a pretty tall order.

Finally, Mr. Chairman, I express my great disappointment at the "Buy American" protectionist amendment attached to this bill—when the Committee on Public Works was operating under its section at the time. I think that and the excess taxes on trucks have changed my position from one of enthusiasm for this bill to one of a large question mark.

Mr. Chairman, until the gentleman from Wisconsin spoke, I was wondering how I could rationalize a vote for this bill with what I considered to be two crippling features. He has shown me that our alternative is to finance the road system through user taxes or to finance it through general taxation on the general taxpayers of this country who may or may not use that road system at any particular time. He has indicated that he is nervous about the number of jobs to be created.

I think under the program the same will be created no matter how you finance it. And therefore, I think he has shown me that I have but one opportunity, one alternative, and that is to vote for the bill that is before us rather than to see our road repairs and improvement completed at the expense of the general taxpayer.

However, Mr. Chairman, I would expect that this bill in the two particulars I have concentrated will be improved as the legislative process wends its way through the other body. I certainly hope so, because my affirmative vote tonight does not indicate an affirmative vote on the conference report unless there is some repair.

Mr. Chairman, I urge an affirmative vote on this bill.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from New York.

Mr. CONABLE. Mr. Chairman, I think it is important also to emphasize once again that the effective date of the user tax is postponed until January 1, 1984, a wonderful opportunity for the trucking industry to discuss it with us all next year.

Mr. FRENZEL. I thank the gentleman for his contribution.

As the gentleman said on the gallows, a 5-minute reprieve is better than none at all.

Mr. ROSTENKOWSKI. Mr. Chairman, I want to thank the gentleman from Minnesota for his ringing endorsement of the legislation.

I yield such time as he may consume to the gentleman from Oregon (Mr. AUCOIN).

Mr. AUCOIN. Mr. Chairman, I support the stated aim of this bill. To help put millions of Americans who do not have a job today, or even a hope of a job, back to work. To rebuild this country's transportation and industrial infrastructure. To set forth a multiyear authorization for critical highway and mass transit programs that is long overdue.

But this bill, as drafted, is seriously flawed. I disagree with a whole host of its provisions. And I resent the manner in which it has been pushed through Congress. Last May, after the President restated his strong opposition to any increase in the gas tax, most people considered the chances of passage of H.R. 6211 to be nonexistent. It was put on a back burner. Up until the day of the election the President still opposed a gas tax increase. Now we are told that this is not a gas tax increase—it's a "user fee", and lo and behold with unemployment increasing by leaps and bounds—the President supports it.

Last week the Ways and Means Committee held a hearing one day, marked up the next, the bill got a rule and here we are today voting on a measure which will have far-reaching implications for cities and States all over this country without the majority of my colleagues knowing exactly what this bill proposes to do.

I recognize, and I commend my colleagues, Mr. HOWARD and Mr. ROSTENKOWKI, for the work they have done in trying to get a gas tax proposal through all the hurdles this administration has put up over the last 2 years.

I also realize the pressing need to do something now, in 3 short weeks, to address unemployment levels of tragic proportions and the needs of this country's transportation systems.

I have grave concerns about many of the provisions of this bill and I plan to press for several critical changes when

the House and Senate go to conference on this bill. I want the record to reflect my deep concern over these provisions.

The bill tends to promote the construction and completion of unneeded legs of the Interstate System, and it gives a higher funding priority to segments on the basis that they are more expensive—it costs more to complete them, so they get more funds. I'll push to see that the conferees make changes by eliminating or adjusting the formulas as they are now set forth to reflect other variables such as the need for the projects and whether or not they are already under construction.

In addition, by proposing to allocate both interstate transfer and mass transit funds on a contract authority/formula basis and by leaving it up to the discretion of the Secretary, Congress loses its ability to exercise its authority and judgment as to the most efficient and effective use of highway and transit dollars. What it really does is allow Dave Stockman or whoever happens to be sitting at OMB to decide "go or no go" on State and local projects all over this country—without congressional approval.

I don't know about the rest of my colleagues, but Dave Stockman and I don't exactly see eye to eye. He proposed a 20-percent cut in transit funding in fiscal year 1981, a 12-percent cut for fiscal year 1982, and no new rail starts "until the economy improves." The Banfield light rail project in my home district would be dead if Dave Stockman had had his way. And given this administration's track record on the economy, I'm in no mood to wait for it to improve before going ahead with necessary projects that will provide jobs for at least 200,000 of the unemployed construction workers in this country.

This bill also continues and greatly expands the use of multiyear contract authorizations for funding highway and mass transit programs which I believe is dangerous and unnecessary. The expanded use of multiyear authorizations makes the Federal budget even more uncontrollable than it is now. Just because a program is financed by a user fee and ends up in a trust fund does not mean that it should escape congressional review and oversight.

I also oppose terminating the escalation provisions in the interstate transfer program although I fully understand and agree with the committee's attempt to get this program under control. Coupled with an extension of the deadline for localities, however, this provision ends up penalizing those States, like Oregon, that withdrew projects early in good faith that their purchasing power would not erode due to a stretched-out funding schedule.

Placing the interstate transfer highway funds under the same State obligational ceiling as other highway programs pits urban interests against rural interests in those States which participate in this program, so I will also push for removing the interstate transfer program from any one State's overall obligation ceiling. Small States like Oregon will not be able to take enough away from general maintenance throughout the State to make up for the obligational authority needs of major projects funded from the interstate transfer program.

Among other concerns I have, the abrupt change in Federal/State matching ratios for both capital and operating expenses is going to wreak havoc on local transportation agencies. In the State of Oregon, we could be facing a $900 million deficit. In Portland, the local transit authority has suffered close to a 10-percent drop in its payroll tax revenue which it uses for operating assistance because so many Oregonians are out of work. I fail to see the workability, or the logic, of any plan which asks local jurisdictions to jump from having to fund 20 percent of a Federal project to having to fund 50 percent—especially during these economic times. Localities which already have letters of intent or full funding contracts should be allowed to participate in these programs under the terms of their current contracts.

In summary, I was prepared to support a bill that repaired the economic "infrastructure" of the country and created jobs. But this bill pours the new gas tax revenues out in a way that does not accelerate needed new jobs; it revamps and warps the current transportation delivery system, it strips back congressional review and program oversight and I can't justify the raising of gasoline taxes to pay for all this.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield such time as he may consume to the gentleman from Kentucky (Mr. HUBBARD).

Mr. HUBBARD. Mr. Chairman, I rise in opposition to the Ways and Means Committee amendment to the Surface Transportation Assistance Act of 1982, H.R. 6211, and ask unanimous consent to revise and extend my remarks.

My constituents in western Kentucky do not want tax increases. They want reductions in Government spending. This legislation with its 5-cents-per-gallon gasoline tax increase and highway tax proposals represents another attempt to raise revenues by imposing additional tax burdens on the backs of our already overburdened taxpayers, including those of the trucking industry.

My constituents in western Kentucky believe they will not equitably benefit from the revenues raised by these tax increases. The revenues generated will most likely be forwarded to large cities across the United States. I believe highway construction and repair could be funded by cutting spending in other areas—like foreign aid—not by increasing taxes.

Therefore, I request that my colleagues oppose and vote against this H.R. 6211, the Surface Transportation Assistance Act of 1982.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield such time as he may consume to the gentleman from Missouri (Mr. GEPHARDT).

Mr. GEPHARDT. Mr. Chairman, I commend the chairman of the Committee on Ways and Means on the work done by the committee on the bill.

Mr. Chairman, I am pleased to note that the committee has made clear in its report on this measure that a fair share of revenues allocated to the newly created mass transit account should be spent on cost effective new rail construction.

in the St. Louis area, plans are underway for a new light rail system involving an innovative approach that will substantially lower the cost. Under this proposal, right of way on existing track, including existing tunnels under the downtown business district and bridges across the Mississippi River to East St. Louis, would be granted for a light rail system linking the heart of downtown St. Louis to the airport, the close-in suburbs, and the Illinois side of the region. By making use of extensive infrastructure, a system which was originally estimated to cost over $400 million would now run about one-third of that amount, or some $135 million. It seems to me the proposed St. Louis light rail system is exactly the type of cost-effective construction envisioned by the committee. The large local capital contribution represented by the use of existing infrastructure will triple the value of the Federal expenditures.

So, I ask the gentlemen if he would agree that the proposed St. Louis system is an example of the new starts envisioned by the committee.

Mr. ROSTENKOWSKI. The gentleman is correct. I am familiar with the St. Louis project and the constructive use of existing facilities it proposes. It is my understanding this is the type of new construction that would be eligible for financing out of mass transit account and should be given preference.

Mr. Chairman, I yield such time as he may consume to the gentleman from Missouri (Mr. YOUNG).

Mr. YOUNG of Missouri. Mr. Chairman, I rise in support of the Surface Transportation Assistance Act of 1982 and urge its immediate passage. This legislation will provide the needed authorizations and revenues to rebuild the Nation's highways and bridges, as

well as the public transportation systems.

Mr. Chairman, I am in support of the language that has been included in the report that has accompanied the revenue title of the highway bill where a fair share of the revenues apportioned to the mass transit account of the highway trust fund be spent on innovative and cost-effective light rail construction.

Over the past 6 years, the St. Louis Metropolitan Area has been developing a low-cost approach to establishing a modern, urban light rail transit system. The proposed project for St. Louis was selected after careful review of alternative projects and corridors. The project will use existing rights-of-way and existing infrastructure such as the historic Eads Bridge and its adjacent tunnel through downtown St. Louis. The estimated cost of the St. Louis light rail is $135 million, which is far below the original proposal.

The project presents a significant potential for linking economic development priorities in the St. Louis region, as well as several cultural centers. The light rail service will substantially improve traffic and transit service throughout the region. The existing bus service will feed directly into the proposed light rail line. Traffic congestion and downtown parking will be reduced to a large extent.

A recently completed transportation planning study sponsored by the Urban Mass Transit Administration indicated that the proposed project would have substantial ridership and compare favorably to all other light rail lines operating or under construction in the United States.

Mr. Chairman, it is my understanding that the St. Louis light rail project is exactly the kind of project that was the intent of the committee in the report language. It is also my understanding that this project should receive high priority and be given preference by the Urban Mass Transit Administration, as well as be eligible for Federal funds as a new rail start under the language provided in the report.

Mr. Chairman, would you agree that the St. Louis light rail project is the kind of project that was intended by the committee as a cost-effective and innovative new start?

Mr. ROSTENKOWSKI. Yes; it is my understanding the gentleman is correct.

Mr. YOUNG of Missouri. I thank the gentleman.

□ 2400

Mr. CONABLE. Mr. Chairman, I yield 4 minutes to the gentleman from South Carolina (Mr. HARTNETT).

Mr. HARTNETT. Mr. Chairman, I thank the distinguished ranking Member for yielding me some time.

Mr. Chairman, Abraham Lincoln, I think, once said that you do not build up your own house by tearing down the house of another. You do not jeopardize 9 million jobs in the trucking industry with the hopes of curing our unemployment ills with 320,000 new jobs.

What we are doing here is increasing the user tax on large truckers from $210 to over $2,000 and that just is not fair.

What we are saying is that if large trucks did not use our highways at all, then they would not deteriorate at all, that the elements and the smaller trucks and other vehicles would not cause any deterioration to our roads at all, that it is all done by the large truckers.

What we are saying is that we should not charge anybody excessive excise taxes but large truckers.

You know, they do not do anything for the economy. They do not provide jobs in the trucking industry. They do not pay taxes now. They do not provide what little bit of fuel taxes we are getting.

Now, you know, we Americans are funny. We say to ourselves, look at what we have done in the way of conservation. Look at the mileage that our automobiles get.

Now, we do not send the Arabs that money for oil anymore. Instead, we send it to the Japanese for their automobiles.

Mr. Chairman, we are going to kill the goose that lays the golden egg if we effectively pass this user tax onto the large truckers. We are adding, as one trucking firm in my district said, about $3,200 overall increase to an 80,000 pound truck. To a man that has 125 trucks, that is a $450,000 increase on his business.

Pass it on, you say. Everything that you have in this building or in your office or in your home arrived by truck. From the pencil that you write notes with to the typewriter or the copy machine which you use or the desk at which you sit, it all came by truck, large trucks probably at some point. If you pass that tax on to that large trucker, he is going to pass it on to that pencil or that desk or that copy machine or that piece of paper or the pair of shoes you have on your feet; which means that consumer prices are going up, which means that inflation is going up.

Mr. Chairman, if you want to pass a user tax, pass a 6-cent or a 7-cent-a-gallon tax on fuel, but do not adversely treat a trucker that provides employment, that pays taxes now, that is trying to operate profitably.

You know, we talk about creating a climate in which small business can operate to provide jobs so that we do not have to create jobs on the Government payroll for people who are unemployed, and yet when someone tries to operate a business profitably, we figure all the devious ways we can to take money away from that businessman in the form of taxes.

Well, I will tell you, you are going to create a large unemployment percentage in the trucking industry if you pass this user tax, because it is not the little truckers that provide employment. It is the big truckers. It is not the little truckers that give us the bulk of our fuel tax from trucking fuel, it is the big truckers.

I am telling you this, that if you heard about the proverbial goose that laid the golden egg and you want to wring its neck, that is what you are doing with this user tax bill that you are trying to pass now on to large truckers.

They are not the only ones that deteriorate our roads and our bridges and our highways.

I urge you to think twice before you vote in favor of this bill.

I thank the ranking member for giving me this time.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 3 minutes to the gentleman from Florida (Mr. GIBBONS).

Mr. GIBBONS. Mr. Chairman, I had not really wanted to speak now and I will be brief.

The last argument sounds attractive on its face, but there are some flaws in it I think that should be pointed out.

This is a balanced package of benefits and costs. The truckers not only get a tax, they also get wider trucks, longer trucks, heavier trucks, and tandem trucks. Without the user tax, they cannot get that. The President will not sign the bill. The Ways and Means Committee probably would not pass it and I do not think you would want to do it either when you stop to think about it.

Now, about the gentleman's argument that we are just hitting the trucks, that is not so. This study, and it was conducted under three administrations, under the Ford administration, under the Carter administration, and under the Reagan administration, has been going on for a number of years at the direction of the Congress with input from the Congress on it, not only the respective committees, but the Congressional Budget Office. It has been a wide-open test. Everybody has had a chance to look at, it criticize it. If you go to the last page of that green sheet that is on all these desks here, you will see a cost-benefit ratio of what this study concluded, an open study, a critical study; everyone had a chance to criticize it and you will find that the heavier trucks are still not paying their fair share.

Now, they do not do all the damage to the highways, but they do a large portion of the damage to the highways. No one suggests that they do it all.

There are perhaps 1,000 different ways you could work this out. This fol-

lows the traditional way. We have had a user tax for a long time, but the heavier trucks got a substantial benefit or subsidy before. They are still getting a subsidy. It is just not as great a subsidy.

In total, this is a balanced package. There are benefits in it for the industry and there is cost-sharing in there for the industry.

This report and study that I refer to was made public back in May of this year. I doubt that any one of you heard from anybody that was interested in it more than 2 days ago or 3 days ago.

Certainly the industry has got to protest. Nobody wants more taxes and I do not want any more on them; but there is a responsibility for us to share the burden and the benefits equitably and this package does it.

Mr. CONABLE. Mr. Chairman, I yield 1 minute to the gentleman from Louisiana (Mr. MOORE).

Mr. MOORE. Mr. Chairman, unfortunatley I rise in opposition to H.R. 6211 due to the measure's deficiency in design and function of title V as written by the Committee on Ways and Means to impose some $5.5 billion annually in new taxes upon the American people.

I do not oppose the other provisions in the bill as the Nation's Interstate Highway System needs and deserves fiscal attention to complete remaining sections and upgrade existing highways and bridges already in disrepair or deteriorating rapidly. I do seriously question the method in this bill to pay for it. The tax provisions of this proposal are flawed both in concept and design for several reasons.

At the outset, we were told the nickel increase in the excise tax on motor fuels is a user fee and not a tax. A tax by any other name is a tax and this user fee is a tax and an unwise method of raising taxes at that. DOT testimony before the National Tax Association-Tax Institute of America in 1979 stated that the fuel tax paid by private automobiles is hardly a user charge at all, but rather a general excise tax. Eighty-five percent of American households have at least one car or pickup truck, therefore, their paying 4 cent a gallon fuel tax is only barely distinguishable from the Nation as a whole. There is not really a separate and distinct group compensating the taxpayer-at-large for the cost of the highway program, as they are one in the same. By comparison, in 1980 only 79 percent of American households paid Federal income tax.

It is not only a tax increase, but title V is regressive in structure, will likely result in little, if any, improvement in the Nation's unemployment rate, and invades a tax area normally reserved for State revenue collection and State gas tax increases.

This nickel increase in motor fuel tax is regressive because gasoline purchases account for a higher percentage of the income of low-income families than for high-income families. A Congressional Budget Office study released in June 1981 found that households with less than $7,400 in annual income spend an average of 8.2 percent of income on gasoline, while households with an income of $36,900 or more spend 3.7 percent. As the motor fuels tax is imposed at a flat rate of 4 cents per gallon, it is regressive in the same proportion as gasoline cost distribution as a percentage of income. Further, this study found it is most regressive in the South which is the region in which the State and congressional district I am privileged to represent is located.

Increasing the tax by another nickel just increases the dimension of an existing regressive tax structure and increases disproportionately the tax burden on lower income taxpayers. This conclusion is corroborated by a study of a Rand Corp. analysis by James P. Stucker prepared under a grant from the National Science Foundation. We have already increased regressive excise taxes this year on cigarettes and telephones, and I am very concerned at this continuing trend.

Much dispute has centered on the question of employment change as a result of the bill. Some assume perhaps as many as 320,000 new jobs would be directly or indirectly attributed to this bill. Martin S. Feldstein, Chairman of the Council of Economic Advisers, has reportedly cautioned against such a rosy outlook. He was quoted most recently on November 29, 1982, before the Washington Press Club as saying this proposal may actually increase unemployment during the first year or two and produce a net loss of 20,000 jobs. His argument states the increase in transportation construction jobs would be more than offset by a decline in jobs in industries that produce goods and services that consumers would otherwise buy with the $5.5 billion they will now pay to the Federal Government in increased gasoline taxes. Comments from Bruce Bartlett, staff member of the Joint Economic Committee, in the Wall Street Journal on November 30, 1982, agree that there will be no net jobs created and further points out that the nickel increase may simply accelerate the purchase of smaller, more fuel-efficient foreign cars, just as the OPEC oil price increase did, further damaging the hard-hit U.S. auto industry. I am led to believe, according to press accounts, there are similar studies and results at the Treasury Department and OMB, which I have requested but have been denied.

Attention must also be given to the question of the nickel increase on the basis of use of gasoline excise taxes by States for their own revenue base to pay for State obligations. This is a form of sales tax and has been widely recognized by States as such. All but two States impose an excise tax on gasoline.

Last year 22 States enacted increases in their gas tax structures and a total of 40 State legislatures had bills before them for this purpose. The Highway Users Federation found this to be a record. Bills to increase gas taxes have been introduced in at least 18 States this year, 6 of which passed gas tax increases in 1981. A total of six States passed legislation so far this year to increase State excise taxes on gasoline. Clearly, States are looking to this revenue base for their own purposes and their historic ability to use it is seriously eroded by title V of H.R. 6211. We must leave to the States some sources of revenues and not compete with them if possible, lest we in combination and without coordination overtax a particular commodity or disproportionately utilize a particular revenue-raising device.

In 1980, I came to the conclusion that President Carter's 10-cent-per-gallon tax increase was bad tax policy and led successful floor efforts to defeat it. I find no reason to reverse my conclusion simply because we are now asked to pass a tax of half that amount.

Therefore, although the highways do need additional financing, this tax is not the proper, best, or fairest ways and means to raise the revenue. Unfortunately this body has not considered any of the many possible alternative revenue-raising devices that would not be regressive or compete with the States' efforts to raise revenue. The fast track this legislation has taken indicates no interest in proper tax policy or alternatives, just revenue results as quickly as possible.

The tax bill was introduced on Tuesday, November 30; the hearing was on Wednesday, December 1; the markup and passage of the bill out of the Committee on Ways and Means on a voice vote having refused my request for a recorded vote occurred on Thursday, December 2; a rule granted by the Rules Committee on Friday, December 3; and now the measure is up for debate and final passage on Monday, December 6,

This is a rather incredulous procedure for a major tax bill insuring the taxpayers of insufficient consideration of the tax by their elected Representatives.

Mr. Chairman, title V of this bill imposes a new tax at a time and in a manner the Nation does not need or deserve. H.R. 6211 should be defeated.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. MINETA).

Mr. MINETA. Mr. Chairman, as a member of the House Public Works and Transportation Committee, I am pleased to reiterate my longstanding support for the legislation which levies a 5-cent-per-gallon user fee on gasoline. This legislation establishes the first regular and predictable stream of revenue for transit construction and repair, and it will provide substantial benefits to the citizens of this Nation.

In California, we now have 24,000 miles of deficient roads and about 5,500 substandard bridges, and we have been the victims of an inefficient administration ban on all new transit projects. Each year, Californians spend $6.9 billion—$100 each—in added driving costs because we drive over deficient road surfaces.

In Santa Clara County, the 5-cent user fee will particularly benefit us as a funding mechanism for the Guadalupe Corridor Light Rail Transit System, the San Jose Transit Mall, and the San Jose Intermodal Terminal. When funded, these projects and all of the highway projects aided by the gas user fee will shift workers from depressed construction industries into a realm where there is an overwhelming demand for work.

More importantly, projects funded by this user fee will help the entire economy. Both those who use mass transit systems and those who use roads will benefit from the mass transit projects, as these projects provide travel alternatives which reduce traffic congestion, operating costs, and congestion on highways. Similarly, not only drivers, but all consumers will benefit from the swifter, less expensive truck and automobile travel which will result from the repair of our State's roads and bridges.

The projects which will be funded by the gasoline user fee will improve the conditions and performance of our highways, increase productivity, and save Americans money. Thus, the surface transportation bill represents farsighted policy, and I am proud to endorse it.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield such time as he may consume to the gentleman from Alabama (Mr. NICHOLS).

Mr. NICHOLS. Mr. Chairman, the legislation we consider today is championed as a step toward assisting in putting people back to work and certainly no one could argue the need in the face of the highest unemployment this Nation has experienced since the Great Depression. The unemployment rate in the State which I represent and the hardship associated with unemployment are of the gravest concern to me. Now, Mr. Chairman, coming from a State where the unemployment rate currently exceeds 15 percent, it might be expected that I would be in support of this gasoline tax and were I fully convinced that a great number of individuals in my congressional district and in my State would go back on the employment rolls, I would be more inclined to consider supporting this legislation. But I am not convinced of that, Mr. Chairman, and neither am I convinced that my State of Alabama will receive its equitable share of the moneys raised by this increase in the gasoline tax.

For the past week now I have been trying to get someone to tell me how my State will share in the overall $5 billion which H.R. 6211 is expected to bring in through additional taxation. I have not been able to obtain these figures. However, in going through the Atlanta airport last Friday afternoon, I noted in heavy headlines on the front page of the Atlanta evening paper that the Atlanta Intercity Transportation System, better known as MARTA, is expected to receive in that one city alone some $32 million should this legislation pass.

But there is still another concern that I have in that included in this bill I find a sort of "carrot and stick" approach aimed, I would suppose, to secure the support of the large trucking companies across the Nation. The provision, as I understand it, would specifically permit by law on our interstate system from California to Maine and from Key West to the Canadian border the large major truck lines to operate their large trailers in tandem, and this should give some concern to each and every American who utilizes the Nation's highways. Frankly, I would have some concern in driving in the darkest of the night in all sorts of weather behind an 18 wheeler which is pulling a second trailer in tandem. Certainly, I would not want to pass such a rig on a rainy night and I believe there is very definitely an unsafe situation embodied in that practice.

Finally, Mr. Chairman, I will tell you there is a great deal of concern in the trucking industry as well as with all other industries which use trucks to haul our Nation's goods because of the unreasonably large increases in the Federal taxes, particularly the user fees assessed to each of these trucks.

There are those who will argue that these increased taxes will only be passed on to the consumers in the form of higher transportation charges. That would be a callous argument. The burden of our economic recovery should not fall on the backs of the consumers. They have already suffered enough from high Federal taxes.

At the same time, the transportation industry should not be expected to absorb this increased tax liability. Independent, small, and medium size trucking firms are already operating on only the smallest profit margins as a result of the deregulation of that industry. Additional unreasonable expenses will cause many of these firms already working to stay in operation to simply go out of business. This Congress hardly wants to be responsible for adding to our unemployment rolls, but that is what these revenue provisions will do.

Mr. Chairman, in many ways I am supportive of the intent of the legislation in that the Nation certainly needs to improve it's highways and bridges and had the bill come to the floor with a rule so that much needed changes could be made in spelling out the exact apportionment of the legislation together with effecting needed changes in the tax structure, then I would have no doubt been in support of its passage. Unfortunately, there is no opportunity under the closed rule and it is, therefore, my intention to oppose passage of H.R. 6211.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 3 minutes to the gentleman from New York (Mr. OTTINGER).

Mr. OTTINGER. Mr. Chairman, I thank the gentleman for yielding.

I have joined with the chairman of the Joint Economic Committee, the gentleman from Wisconsin (Mr. REUSS) in seeking to defeat this tax, with the hope that we could substitute a cap on the tax reduction that is due to go into effect in July 1983, which would raise, as the gentleman indicated, more revenue and would do so without costing jobs.

I join him in support of a program such as that presented here to repair our infrastructure. Certainly that is very badly needed.

I sympathize with the gentleman from Illinois when he says that the tax on gasoline has been at the same rate for some time and perhaps deserves reconsideration; but I feel very strongly that now is just not the time to do that at a time when our economy is teetering on the brink of collapse, at a time when we have the greatest unemployment since the Great Depression is not the time for converting a program which could create many jobs. It has been cited that it would create perhaps 200,000 or 300,000 jobs, with an offset that will result in our losing more jobs than the public works aspect of this creates. It just does not make sense.

The chairman of the President's Economic Advisers indicates that that will be the result.

In the Wall Street Journal just on November 30 it said:

> Perhaps most important, the gasoline tax boost will have negative effects on employment that no one has taken into account. It is certainly not going to do any good for the hard-hit U.S. auto industry. It may simply accelerate the purchase of smaller, more fuel-efficient foreign cars just as the OPEC oil price increase did.
>
> And even if we assume that as many jobs are created as are destroyed—a very questionable assumption—the tax is likely to be implemented first, meaning that the job-de-

stroying effect on the tax will occur before the job-creating effect of the public works spending.

□ 2410

The tax is also unfair. We have just recently alleviated the wealthy people in this country, wealthy corporations of this country, of a large measure in paying their fair share of the tax burden.

Now we go to a tax whose primary burden is going to be on low- and middle-income people. There was a study that was done recently by the Rand Corp., financed by the National Science Foundation, written up in a magazine called Public Policy by James W. Stucker. It makes a detailed analysis of households. It finds that a tax on gasoline would fall much harder on poor and middle-income families than those that are better off.

The CHAIRMAN. The time of the gentleman from New York (Mr. OTTINGER) has expired.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 1 additional minute to the gentleman from New York (Mr. OTTINGER).

Mr. OTTINGER. Forty percent of the gasoline taxes are paid by families with incomes of less than $5,000 per year, and 85 percent is paid by those with incomes of less than $10,000 a year. The poorer families and the working families tend to drive more.

While the average cost of this may be $30 per year per person, the person who has to drive to and from work is going to have to pay several hundred dollars. Indeed, this study finds that most of the low- and middle-income people have second-hand cars, and they tend to have older cars which consume a great deal more gasoline.

So this study finds that the preponderance of the burden would be on low- and middle-income families.

In constrast, the cap on the income tax reduction would give the full income tax reduction to everybody making less than $45,000 a year, would give $700 to everybody, and would be a much fairer tax, and I would hope this tax would be defeated.

Mr. CONABLE. Mr. Chairman, I yield such time as he may consume to the gentleman from Ohio (Mr. OXLEY).

Mr. OXLEY. Mr. Chairman, I rise in opposition to H.R. 6211, the Surface Transportation Act, primarily because of the impact this bill would have on the small, family run, owner-operated trucking firms in my State of Ohio. When the bill was originally proposed by the administration, I wholeheartedly supported the concept of a 5-cent-per-gallon fee. I also endorsed the targeted projects for the projected revenues created by the user fee. I also endorsed the targeted projects for the projected revenues created by the user fee. However, as many of my colleagues have noted after studying the details of the bill, the measure contains a death blow to most of the smaller trucking firms across the country.

There is no doubt that America's highways and bridges are in desperate need of repair. However, funding these repair projects by specifically penalizing smaller family run trucking firms smacks of competitive discrimination within the trucking industry.

The burden of this user fee would be borne by the small trucking companies, which, by the way, are predominant in Ohio, and would literally put most of the smaller companies out of business. Currently, most of the trucking firms in Ohio are suffering because of the dismal economy coupled with the adverse effects of deregulation. In fact, one of my local firms in Lima, Ohio, is losing at least $15,000 every morning, just by opening its doors. The effect of an additional tax on these trucking firms would spell the kiss of death to their businesses.

Let me point out a few additional facts which bear out my opposition. First, the unemployment rate among union drivers in Ohio ranks among the highest in the country at 38 percent. If one takes into account the number of nonunion drivers and their corresponding unemployment, that figure most certainly skyrockets.

Second, the profit margin of short-haul, intrastate haulers is currently less than one-half of 1 percent. That is substantially down from the 4- to 5-percent profit margin enjoyed by the trucking industry before deregulation. By asking the small trucking firms to absorb a substantial tax burden per truck, in addition to those taxes already paid into the highway trust fund, the certain result will be thousands of displaced trucking jobs.

Third, the additional taxes spell increased operating costs for the small trucking firms by at least 4 percent. That impact is probably representative of the truckload freight industry, where the profit margin is about 1 percent. The obvious consequence of this added tax is that a large number of companies such as Ohio's will be literally taxed out of existance, or else freight rates will have to be increased, with the full effect of the cost passed along to shippers and eventually consumers.

Finally, with respect to the jobs creation portion of the bill, it must be remembered that the creation of thousands of construction jobs on bridges and highways will be offset by the huge amounts of unemployed trucking industry personnel.

I would urge my colleagues to defeat this measure.

Mr. CONABLE. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. SHUMWAY).

Mr. SHUMWAY. Mr. Chairman, I rise in opposition to H.R. 7360, the Surface Transportation Act of 1982. I have given this matter a great deal of thought and realize that credible arguments can be made in favor of some kind of action. As a former county supervisor, I am well aware of the need to repair and reconstruct certain roads and bridges. However, the legislation before us today is not the correct answer. H.R. 7360 would unfairly and unjustifiably raise taxes, and futhermore, this bill would not even accomplish the objectives that its proponents have identified.

Raising the gas tax to finance highway programs is the wrong approach for two reasons. First, contrary to it popular image, H.R. 7360 violates the user-fee concept, thereby unfairly distributing the costs of this bill. For example, under revenue disbursement formulas contained in the highway programs, at least 10 States, including my own State of California, receive substantially few dollars in benefits than the amount they pay into the highway trust fund. Or viewed from a different angle, it is estimated that about 1 driving mile in 4 is driven off the Interstate System, thus penalizing these nonusers who are still required to pay a gas tax. Finally, there is no justification whatsoever from a user-fee perspective to use 20 percent of the new highway trust fund moneys for public transit assistance. It seems ludicrous to me that a highway commuter in Stockton, Calif., should be required to subsidize the electric subway in New York City.

No matter how proponents attempt to disguise the fact, the gas tax proposal is what it seems to be—a substantial increase in Federal taxes. It is estimated that the average driver will spend an additional $30 annually as a result of the 5-cents-per-gallon increase. This is money that would otherwise be saved and invested, or spent in the private sector. At a time when Federal taxes, as a percentage of GNP, are at their highest level since World War II, it makes little sense to enact a tax bill of this magnitude when the economy is only now showing signs of recovery. Although such signs exist—interest rates, for instance, are declining rapidly—corporate liquidity is at its lowest level in 40 years, before-tax profits are down 30 percent from last year, and business failures are running at their highest rate in 50 years. Simply stated, increasing taxes at a time of 10.8 percent unemployment runs contrary to all economic logic.

Those who would argue that this legislation creates jobs have not fully considered the impact of this bill. For every dollar that the consumer pays in higher gas taxes, less money will be made available for consumer demand in the private market. In fact, Martin

Feldstein, Chairman of the Council of Economic Advisers, has calculated that raising the gas tax could cost as many as 20,000 more jobs than it creates. The business of government has never been to create jobs, but especially not when it does so at the expense of jobs in the private sector.

Not only is it wrong to call H.R. 7360 a jobs program, this bill's emphasis is not even focused on what has been identified as its major justification; the need to repair and reconstruct our Nation's highway system. Approximately two-thirds of the money generated by the gas tax would go to build new roads and complete missing segments of the Interstate System. Only one-third is to go to all forms of upgrading.

Mr. Chairman, instead of supporting this ill-conceived legislation, I would urge my colleagues to encourage reliance on the private sector, and secondarily, on State and local governments, to meet the needs of our transportation infrastructure, Privately financed and operated toll roads would mean better upkeep at less cost. A 1978 study by the National Transportaton Policy Study Committee, as reported by the Council for a Competitive Economy, concluded that "by and large, toll roads are better maintained than other roads."

State and local governments should also assume more responsibility for the construction and maintenance of roads, bridges, and public transit. Road conditions vary widely from State to State and merit selective repair. Some States have been responding to their individual needs with innovative ideas. For example, I have learned that Wisconsin and Pennsylvania are considering toll options, contracting out segment construction, and other market-oriented financing schemes. With this kind of progress being made on redefining the traditional Federal/State highway relationship, it seems to me the wrong time to pass another multiyear highway bill that commits the Federal Government to new financial responsibilities in this area.

In sum, this bill is an inappropriate response to a problem that largely needs to be addressed outside of the Federal arena. I therefore strongly urge my colleagues to join me in opposition to H.R. 7360.

● Mr. CHENEY. Mr. Chairman, I rise in opposition to the proposed 5-cent-per-gallon increase in the gasoline tax, because I am convinced that such a tax increase could wipe out more jobs than it would create.

Such an eventuality was first suggested several days ago by the President's Chief Economic Adviser, Martin Feldstein, and a number of conversations I have had since with constituents in my State of Wyoming convince me of the validity of Mr. Feldstein's warning that the higher tax may worsen unemployment, instead of reducing it.

There are many businesses in Wyoming and across the country, including many small trucking interests which serve rural communities, that are in very bad shape because of the recession. They are barely hanging in there, and for them, the gasoline tax increase could be the straw that broke the camel's back. It very likely would drive them out of business, and we could end up destroying more jobs than would be created by the highway constructon which the tax increase is supposed to generate.

Many people are confident that our economy will soon begin a strong recovery, and I am among those who believe better days are ahead. But right now, a lot of people are still in trouble. This is not a good time to impose a tax increase of this magnitude.

I would be the first to agree that our highways and bridges are in need of repair, and that it is appropriate that such repairs be financed by user fees. I commend Secretary of Transportation Drew Lewis for putting together a very good program to bring about those repairs. But I cannot go along with the timing, which would more than double user fees at a time when our economy can least stand it.●

● Mr. BEREUTER. Mr. Chairman, I wish to voice my intentions regarding final passage of this bill so that there will be no misunderstanding regarding my vote on it.

I support a 5-cent gas tax. I have traveled the highways of my State. I believe they represent one of our country's greatest assets. They carry truckers, tourists, people, agricultural products. They are immeasurably important to our economy and our way of life.

I cast my vote in favor of this bill with several reservations, however, and I want to lay them out very clearly for my colleagues. I want to go on record as being inclined to oppose this bill in its postconference form if these imperfections are not mitigated to some substantial degree in the other body or in conference.

My first objection is the elimination of the one-half of 1 percent minimum allocation provision, which is unfair to rural States and unfair to those States which have completed their interstate construction.

Second, I am concerned that this bill has shifted too much of the financing burden onto heavy truckers. In my State of Nebraska, even profitable trucking firms do not net the $2,000 to $3,000 per truck which this bill would impose in user fees. They would have no choice but to pass the tax along to the end user, and in Nebraska the end user is agriculture—the stockman, farmer or meat packer who needs heavy truck transportation but have in most instances, no place to pass on those costs without losing markets. Especially in those rural areas where the railroads have abandoned service to grain shipppers in our small communities, the only alternative has become an increased reliance upon the trucking industry to meet the needs of agriculture.

A third area of concern is in the 4R formula factors. These factors have a long-term effect on our State highway budgets and even shifts which appear to be small will have a significant net effect in the outyear. The usual version in the other body for the 4R formula is a more equitable one for low population density States than is the one in the House version.

Finally, I am concerned that this bill provides only for a 4-cent exemption ıor gasohol rather than a full exemption as we have in present law. As the young alcohol fuel industry begins to become a viable and self-supporting enterprise, it is essential that the Congress not act counterproductively on an industry that has the potential to consume mass quantities of agricultural products.●

● Ms. FERRARO. Mr. Chairman, I rise in support of H.R. 6211, the Surface Transportation Act of 1982.

This bill addresses two of our most pressing domestic problems—unemployment and our crumbling transportation system. Its approach is direct and logical—to put the unemployed to work repairing roads and bridges and improving public transit.

The need for the bill is great. Unemployment nationally is 10.8 percent, with 12 million Americans out of work. In the construction industry, the rate is 23 percent. It has become clear that the key to economic recovery is to put people back to work.

As for our transportation system, the problems are becoming all too familiar. Twenty percent of the Interstate System, some 8,000 miles, is beyond its design life and needs repair. For too long, we have neglected our roads and bridges. The failure to perform needed maintenance over the years now threatens the smooth flow of people and commerce. The broad bipartisan support for this legislation reflects the growing awareness that we cannot afford to wait any longer to stop the steady deterioration.

In the transit area, the bill continues Federal support for urban mass transportation. Over 4 years, $16.5 billion is provided in transit aid. In an important breakthrough, a public transportation trust fund is established as a separate account within the highway trust fund. Approximately $1.1 billion of the annual revenue from the Federal gas tax will be used for mass transit. Thus, for the first time, mass transit is assured a reliable source of funds.

Revenues for both the highway and transit portions of the bill are provided by a 5-cent-a-gallon increase in the Federal gasoline tax. Currently, the tax is 4 percent a gallon. It has not been changed since 1959.

Part of the reason proper maintenance has not been performed on our roads and bridges is the failure of revenues from the gas tax to keep pace with the needs of the system, especially the rising costs of construction and repairs. As a result, the trust fund has been drawn down steadily.

In 1959, when the gasoline tax was set at 4 percent, a gallon of gasoline cost about a quarter. Today, the tax is still 4 percent, even though gasoline costs $1.25. The nickel increase provided in this bill is a moderate and reasonable approach to pay for needed road repairs.

There is substantial controversy over the bill's increases in user fees for the trucking industry. In raising the funds needed to pay for rebuilding our highways, we need to try to spread the burden fairly, so that there is a reasonable relationship between the damage done to our roads by a certain class of vehicles and the share of taxes paid by that class.

The changes in this bill help make that relationship more fair. In the past drivers of small trucks have borne more than their share of repair costs, to the benefit of heavy truck operators. A recent 3-year study concluded that while heavy trucks are paying only 60 percent of their share compare to the damage they do, smaller trucks pay 90 percent more than their share.

This bill improves the distribution of costs, though heavy trucks still are subsidized. Even with the new taxes and fees, they will still pay only 77 percent of the costs they might be expected to bear.

There is some concern in the trucking industry that this increase may impose too great a burden on already hard-pressed truckers. I am, of course, concerned that this program, which is designed to create jobs for construction workers, not wind up costing jobs for truckers.

To balance any possible adverse affects of the increased user fees, the bill gives truckers several new advantages. First, the bill increases the maximum weight and length of trucks permitted on the interstate. Estimates of benefits to truckers from this change alone are $4 billion a year.

Second, the improvements to the highways and bridges will help productivity in the industry. Highways strewn with potholes and bridges that sway with the wind force delays in transport time that increase costs to trucking companies. Completing the Interstate System and repairing other highways and bridges will help restore economic health to the industry.

To begin the improvements, over the next 4 years this bill provides $16 billion for the Interstate System, $10.4 billion for resurfacing and rehabilitation of the interstate, $8.8 billion for the primary road system, $6.9 billion for bridge repair, and $3.2 billion for urban roads. In addition to increased funding levels, the bill makes other changes that will help States deal with their problems.

My own State of New York will benefit from overdue formula changes in two areas. Under current law, no State can receive more than 8 percent of Federal bridge repair funds. Because we have so many bridges needing repairs, that cap keeps New York from getting its full share of funds. This bill increases the cap to 10 percent, which means an additional $148 million for New York.

The second change involves the primary road program, where the new formula makes urban population more important. This change also increases New York's aid by about $150 million over 4 years.

In addition to these changes, the bill continues Federal operating assistance for transit systems. The Reagan administration favors eliminating operating aid, and I am pleased the committee has chosen to continue to recognize the importance of our Nation's subways to the economic health of our cities.

Even with the $16.6 billion the bill provides for transit aid, many cities still face serious funding problems. An amendment I sponsored to this bill could provide needed help. The amendment calls for a study of having the Department of Transportation enter into long-term agreements with local transit authorities to assure a steady flow of annual aid. The local agency could then use the funds as leverage to raise more money by issuing bonds.

This plan has already been used successfully in New York. Adopting a similar approach at the Federal level would give local transit authorities a big boost without increasing Federal spending.

The last issue I would like to discuss is the provision prohibiting discrimination on the basis of sex in employment in Federal highway programs. Women have made progress in recent years in getting a larger share of highway construction jobs. As a matter of simple fairness, we should prohibit discrimination in Federal programs.

But the need to bar sex-based discrimination is made even greater by the job-creating purpose of this bill.

We have all come to understand that unemployment is as serious a problem for women as for men. No longer do women work for pin money. Women working today are frequently single parents, solely responsible for supporting their families. Other women must work to keep their families above the poverty line. As economic pressures on women grow, we must insure that women with the ability and the interest are not denied job opportunity because of discrimination.

The legislation we have before us is not perfect. It will not provide a job for every unemployed American, nor will it take care of all that is wrong with our roads. But it is a strong start at dealing with both problems. It deserves our support.●

Mr. CONABLE. Mr. Chairman, I yield back the balance of my time.

Mr. ROSTENKOWSKI. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. ROSTENKOWSKI).

The question was taken; and the Chairman announced that he was in doubt.

Mr. REUSS. Mr. Chairman, I demand a recorded vote, and pending that I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. One-hundred twenty-seven Members are present, a quorum.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Wisconsin (Mr. REUSS) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 236, noes 169, not voting 28, as follows:

[Roll No. 420]

□ 2430

The Clerk announced the following pairs:

On this vote:

Mr. Lantos for, with Mr. Mottl against.

Mr. Rosenthal for, with Mr. Bevill against.

Mr. MARTINEZ changed his vote from "no" to "aye."

So the amendment was agreed to.

The CHAIRMAN. The question is on the amendment in the nature of a substitute, as amended.

The amendment in the nature of a substitute as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker, having resumed the chair, Mr. NATCHER, Chairman of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 6211) to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes, pursuant to House Resolution 620, he reported the bill back to the House with an amendment by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and the third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. CLAUSEN

Mr. CLAUSEN. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill in its present form?

Mr. CLAUSEN. In its present form, yes, Mr. Speaker, I am.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. CLAUSEN moves to recommit the bill, H.R. 6211, as amended, to the Committee on Public Works and Transportation with instructions to report forthwith with an amendment: On page 106 of the committee substitute (H.R. 7360) on line 3 after "Within" delete the word "four" and insert "six".

The SPEAKER. The gentleman from California (Mr. CLAUSEN) is recognized for 5 minutes in support of his motion to recommit.

Mr. CLAUSEN. Mr. Speaker, Although I generally support the bill, I feel that the time allotted for the study provided for by section 314 is insufficient. This study is an important one and should be done right. I, therefore, urge my colleagues to join with me in lengthening the time allotted the Secretary of Transportation to study leverage financing from 4 to 6 months. Should this correction be made, I then feel that I would be in a position to support the legislation.

I urge my colleagues to join with me in support of the motion to recommit.

Mr. HOWARD. Mr. Speaker, will the gentleman yield?

Mr. CLAUSEN. I yield to the chairman of the committee.

Mr. HOWARD. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I would like to say that I agree with the gentleman from California (Mr. CLAUSEN). I think 4 months is an outrageously short time for this study. I believe that we should have the 6 months, as is contained in the gentleman's recommital motion. We support that provision.

Mr. CLAUSEN. Mr. Speaker, I move the previous question on the motion to recommit.

The previous question was ordered.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was agreed to.

The SPEAKER. The Chair recognizes the gentleman from New Jersey (Mr. HOWARD).

Mr. HOWARD. Mr. Speaker, pursuant to the instructions of the House, I report the bill, H.R. 6211, back to the House with an amendment.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amendment: On page 106 of the committee substitute (H.R. 7360) on line 3 after "Within" delete the word "four" and insert "six".

The SPEAKER. The question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

RECORDED VOTE

Mr. HARTNETT. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 262, noes 143, not voting 28 as follows:

[Roll No. 421]

□ 2450

The Clerk announced the following pairs:

On this vote:

Mr. Lantos for, with Mr. Mottl against.

Mr. Rosenthal for, with Mr. Bevill against.

Mr. VOLKMER changed his vote from "no" to "aye."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ANDERSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 6211, just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

AUTHORIZING CLERK TO MAKE TECHNICAL CORRECTIONS IN ENROLLMENT OF H.R. 6211

Mr. ANDERSON. Mr. Speaker, I ask unanimous consent that the Clerk be authorized to make technical corrections in the enrollment of the bill, H.R. 6211.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

TRIBUTE TO HON. BUD SHUSTER

(Mr. CLAUSEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CLAUSEN. Mr. Speaker, I would like to take just a moment to address the House, to bring to the attention of the Members the fact that our distinguished colleague, the gentleman from Pennsylvania (Mr. SHUSTER), who is the ranking minority member on the subcommittee and was here earlier today during the course of the presentation of the legislation, was actually ordered by his doctor to leave the Chambers so that he could get more in the way of rest, having had to recover from an automobile accident.

I only wanted to make the point that if ever there was a gentleman who made the extra effort, went that extra mile on behalf of his own legislative responsibilities, it was BUD SHUSTER of Pennsylvania.

I think this is a real tribute, the legislation having passed with the kind of vote that it did. It is truly a great tribute to the gentleman from Pennsylvania.

IN PRAISE OF HON. BUD SHUSTER

(Mr. HOWARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HOWARD. Mr. Speaker, I wish to thank the gentleman for his remarks and to tell the Members of the House that BUD SHUSTER had been working on this legislation for literally years. We know he had a very severe accident just before election, had two operations since that time. But even during the final deliberations on this bill, was part of the meetings and negotiations to put this legislation together, by telephone from his hospital bed. We are very, very happy to see

him with us for the short time he was able to stay today.

I wish to agree with the gentleman from California that in many, many ways this is to a good measure the Shuster bill, as well as the Public Works and the House of Representatives bill.

I wish to thank the gentleman for bringing that to the attention of the Members.

THE WEATHERIZATION AND EMPLOYMENT ACT OF 1982

(Mr. OTTINGER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.

Mr. OTTINGER. Mr. Speaker, today I am introducing the Weatherization and Employment Act of 1982. This bill has two purposes. First, it would expand the existing low-income weatherization program at the Department of Energy and would authorize sufficient funding to weatherize the remaining 12 million low-income homes in the Nation that have yet to receive this assistance. Second, the bill would provide significant new employment opportunities. In addition to the jobs created by the expanded program, job training would be offered to prepare weatherization workers to enter the energy conservation industry and related construction and maintenance fields.

Of the 14 million low-income households in the Nation, the DOE weatherization program has already weatherized close to 2 million homes. The results of this program have been impressive, both in terms of energy savings for the Nation and income savings for low-income people. According to a 1981 study by the Consumer Energy Council, weatherization results in savings to low-income households of 27 percent in their fuel bills, or 4 percent of their average annual income. This figure is significant because low-income households spend a larger proportion of their income on energy than other income groups—often as high as 40 percent. Because they have little disposal income, they usually cannot afford to make the improvements in their homes that are needed to reduce energy needs beyond the economies they have already achieved through reduced comfort.

In addition, the low-income weatherization program delivers energy at a cost per barrel of oil equivalent which makes it a cheaper way to expand the Nation's energy resources than any other form of energy production. According to the Consumer Energy Council, the low-income weatherization program has "produced" saved energy at less than half the cost the resident would pay for oil, electricity, or natural gas.

The potential for employment in the weatherization industry is particularly impressive. The conservation industry is a labor-intensive industry, particularly as compared to other forms of energy production. Estimates based on figures from the Bureau of Labor Statistics indicate that this program will create over 61,000 jobs in the first year and produce 280,000 additional work years over the life of the program investment. These additional job opportunities are attributable to the employment created when low-income households respend their energy savings in other sectors of the economy. This expanded weatherization program could save 135,000,000 barrels of oil equivalent, which translates into a savings of $6.1 billion that low-income households would otherwise be obligated to pay on fuel bills. At this level of savings the amount spent on the program would be easily repaid in a few years through reduced financial assistance for fuel assistance to the poor.

This program would cost a total of $14.85 billion over the next 11 years, starting with a $500 million authorization level in fiscal year 1983 and scaling up to an annual level of $1.5 billion. In addition, the bill would create a performance fund, composed of 10 percent of the total funding, that would permit the Secretary of Energy to reward those States that have demonstrated excellent performance in terms of the quantity of houses weatherized or the quality of their weatherization programs.

Under the bill, priority would be given to employing workers who have been unemployed for at least 17 weeks, which was the average duration of the unemployed American worker in October 1982.

The bill would also make several changes to increase the effectiveness of the existing program, including permitting efficient replacement heating systems to be eligible for weatherization assistance, providing information to homeowners about the maintenance of weatherization measures and providing information about the weatherization of multifamily buildings.

Mr. Speaker, it is hard for me to think of a program that has as many benefits for the Nation's economy as an expanded weatherization program. Despite the Reagan administration's repeated attempts to kill the weatherization program, this Congress has steadfastly restored funding showing strong support of the most important of our energy conservation programs. At a time when we are trying to put our Nation back to work, I propose that we expand this proven, successful program to train our unemployed citizens to enter a new and promising industry. Simultaneously, we will contribute to the energy savings of our low-income citizens and reduce the dollars that this Nation is sending out of the country for energy expenditures.

□ 0100

A TRIBUTE TO THE HONORABLE BO GINN, FIRST DISTRICT OF GEORGIA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. LEVITAS) is recognized for 60 minutes.

GENERAL LEAVE

Mr. LEVITAS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks in connection with this special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. LEVITAS. Mr. Speaker, the occasion of this special order which I have asked for and taken is to honor a colleague of ours who will not be returning next year, Congressman Bo GINN of Georgia. Bo GINN is one of the most decent human beings I have ever had the pleasure of knowing. He is a true gentleman, a loyal American, and someone who has made a difference for his community and his State and has made this institution a better place for his being here.

Mr. Speaker, the retirement of Bo GINN from the Congress is a time of personal sadness for me, because Bo is a good friend and a valued colleague. But my sadness is tempered by the fact that I know he will always remain a good friend to me personally, and he will always remain a powerful advocate for the people of his beloved State of Georgia and this Nation.

All of us know that when we leave the Congress, there will be a time when this legislative body will pause to take our measure. Our colleagues and our constituents and others will look back over our careers, and they will remember.

Mr. Speaker, it is my own hope that when I leave the Congress, I will do so having earned, as Bo GINN has earned, the respect and the admiration and the good will of all those I have worked with.

To the people of his First District and all of Georgia, Bo has typified the high traditions of public service to our State. He is a man who took the time to learn how the Congress works as an institution, and he is a man who took the time to help make it work better.

If you have had the honor of serving with Bo on a committee, as I did for 4 years, you had the honor of learning some special skills that are in all too short a supply in our midst today.

Bo has chaired three subcommittees during his 10 years of service—the Subcommittee on Public Buildings and

Grounds and the Subcommittee on Investigations and Oversight of the Committee on Public Works and Transportation, and for the past 2 years, the Subcommittee on Military Construction of the Committee on Appropriations.

I have seen the talent of being a good chairman raised to something of an art form by Bo. He has wielded his gavel with thoughtfulness, good humor, and with the respect for all of his colleagues, both senior and junior, Democrat and Republican. But most of all, he was serious and effective in doing the business of the people.

Bo earned his chairmanship of the Military Construction Subcommittee by his hard work and by an unchallenged vote by his colleagues in the Democratic Caucus. He proved himself worthy of our confidence.

His tenure as chairman coincided with a great growth in defense needs, and his subcommittee budget has doubled to more than $7 billion during his subcommittee service. But at the same time he was earning his reputation as an effective advocate for national defense, he and his fellow subcommittee members found areas of wise spending reductions.

During both years when he presided over the subcommittee budget, reductions of more than 10 percent were made in the budget request without impairing defense requirements.

That is quite an accomplishment, but no more than another characteristic of Bo's service. He has removed partisan politics from the deliberations of his subcommittee, and he has harnessed the energies of Democrats and Republicans alike in putting their best work together for the good of the American people. I know that my colleagues on the other side of the aisle will echo this evaluation.

Bo has been a leader in our midst. He has always been one who will step forward to take on a tough job, but one who will be quick to emphasize the role of those who helped him on every occasion when he has won a battle.

And Bo has another characteristic that is even more rare these days—he has not been affected by his positions of influence. He has lived by a maxim that he always preached to his staff—"the bigger you get in Washington, the smaller you get at home."

By that he means that the more impressed we might become with our own authority and power in Washington, the more in danger we are forgetting those good citizens who sent us to this city to render service to the people.

A great many elected officials make a pledge to themselves when they come to Washington that they will never forget where they came from. But too often that is a promise not kept. Bo GINN has shown us how to keep that promise, and how always to remain worthy of the confidence of our constituencies.

Mr. Speaker, Bo's decision to retire from Congress and seek the office of Governor of our State was a very dramatic decision in the political life of Georgia. It was a decision that raised a recurring question put to Bo over more than a year and a half of campaigning.

The question was why he would give up a very safe seat in the Congress and the prestige and power of his leadership roles in exchange for the gamble of a difficult statewide campaign. That is a good question for us to point to today, because it comes with an answer that tells us something very fine about the character of Bo GINN.

I personally could not think of a more difficult time to serve as Governor in any of these United States because of the problems of the economy and diminishing public resources. But for Bo, I think the very difficulty of the challenge set him on the quest for the office.

He knew that he could make a contribution to our State as its chief executive, and that was as far as the question had to go. He saw a challenge in public service, and it was a challenge that he knew he could not ignore.

He led the ticket in a crowded field of excellent Democratic candidates, and lost his race in a runoff election with about 46 percent of the vote. He ran a strong race, and one in which he can justly take pride. And he is at peace with his decision to run because he knew that his quest was a worthy one.

The greatest testimony to Bo's accomplishments and his ability is reflected in part by the vote of that election. I am referring to the fact that Bo carried the counties of his own congressional district by some of the largest victory margins we have seen in a contemporary Georgia election. The people who know Bo the best gave him their unqualified support.

That is a testament more powerful that any words we can speak today. Bo GINN is a man who never forgot who sent him to Washington, and those good people and thousands of other Georgians did not and will not forget him.

I look forward to always having the benefit of his advice and counsel. He has brought honor to this body, and it is an honor to be his friend.

Mr. Speaker, I add to my remarks a brief summary of Congressman GINN's outstanding record of congressional service:

SUMMARY OF CONGRESSIONAL SERVICE—U.S. REPRESENTATIVE BO GINN

Congressman Bo Ginn has achieved a ten-year record of distinction in both the Congress and in service to the people of his First Congressional District and the nation.

As Chairman of the Subcommittee on Military Construction and as a member of the Subcommittee on Defense of the Committee on Appropriations, he has earned a reputation as an effective steward of the taxpayers' dollars.

As the Representative of the First District, he has earned the consistent loyalty and support of his constituents. Since winning election in 1972, Mr. Ginn has been opposed only twice, and he defeated his first challenger by a 90 percent margin and his second by 99 percent.

In 1981, the Georgia Municipal Association presented Mr. Ginn with its coveted "Key Citizen" award for outstanding service to local governments, and later on the same day the Georgia Association of Broadcasters named him "Georgian of the Year."

These and other honors reflect his achievements in a professional life devoted totally to public service.

Mr. Ginn was born 48 years ago in Calhoun County, Georgia, on a small family farm. His first interest was in baseball, but the prospect of a professional career was shattered when, as a teenager, he was stricken by crippling polio and was told he would never walk again. Long months of surgery and therapy at the Warm Springs Foundation eventually brought him out of his wheelchair and led him to resolve to enter the arena of public service.

After graduation from Abraham Baldwin Agricultural College and from Georgia Southern College in 1956, Mr. Ginn married his college sweetheart, Gloria Averitt, and worked for two years as a high school teacher. The Ginns then moved to Millen, Georgia, where Mr. Ginn became Assistant Manager and Director of Member Relations for Planters Electric Membership Corporation.

He served in Millen as president of the Jenkins County Jaycees and was named the Most Outstanding Jaycee President in the First District. He served as Chairman of the local March of Dimes and Red Cross drives. He was an active member in the Millen Baptist Church, which he still attends, and has served there as a Sunday School superintendent and has been elected a deacon.

In 1961, Mr. Ginn came to Washington to serve as Administrative Assistant to U.S. Representative Elliott Hagan. In 1967, he moved to the U.S. Senate as Administrative Assistant to U.S. Senator Herman E. Talmadge, a position he held until he resigned to return to Georgia to seek and win election to Congress in 1972.

Mr. Ginn served for six years as a member of the Committee on Public Works and Transportation and the Committee on the Merchant Marine and Fisheries. He was Chairman of the Subcommittee on Public Buildings and Grounds and later chaired the Subcommittee on Investigations and Review of the Committee on Public Works. He concentrated his efforts on the Committee in the areas of transportation, economic development and water pollution control.

As a freshman member of the Public Works Committee, he was active in helping to enact federal legislation to establish a national program for rail transit systems, and Mr. Ginn worked successfully to include the City of Atlanta in the system.

In addition, Mr. Ginn was a co-author and conferee on amendments to the Federal Water Pollution Control Act, which provided the primary thrust to begin the ongoing clean-up of the nation's rivers and streams.

As Chairman of the Subcommittee on Investigations and Review, he conducted a series of nationally acclaimed hearings on

the problems of pollution of the nation's waterways by toxic waste. The hearings were the foundation for landmark legislation to begin correcting the problem.

He was the author of legislation which initially cleared the way to allow states to accelerate construction of their interstate highways through advance funding by the sale of state bonds. The State of Georgia used this system to complete its interstate system five years ahead of schedule and at a savings to the taxpayers of $75 million.

Mr. Ginn was also the author of the Public Building Cooperative Act, which among other provisions, has helped efforts to revitalize downtown areas through the restoration and renovation of unused buildings to meet federal office needs. The bill also improved access to buildings by handicapped citizens.

In 1979, Mr. Ginn was chosen by his colleagues to serve on the House Committee on Appropriations, and he was subsequently elected by the Democratic Caucus of the Subcommittee on Military Construction.

Mr. Ginn's chairmanship came at a time when an increased emphasis on defense needs more than doubled the subcommittee's budget to a total of over $7 billion. In addition to his effectiveness in bolstering American military strength, Mr. Ginn led his subcommittee to find areas of savings that brought about reductions in the military construction budget request by more than ten percent for two successive years.

During his tenure as Chairman, Mr. Ginn initiated the subcommittee's first hearings into the quality of life of men and women serving in the military. For the first time, enlisted personnel and women were called on to testify before a congressional committee about the problems facing persons serving in the senior and junior enlisted ranks.

Mr. Ginn's concern about the growing problems of family life in the military and the impact those problems were having on military preparedness led him to recommend a major new initiative to improve living conditions for personnel. As a result, Congress has in the past two years appropriated $100 million for design work for 30,000 new housing units for single men and women in the military. The subcommittee has also expanded family housing programs and for the first time funded child care centers and family service centers on military installations.

Mr. Ginn also led his subcommittee in a new effort to require our allies to put more of their own funding into American military construction projects undertaken in their countries. This work has led to a major increase in such support by the Japanese, and additional efforts are anticipated by NATO allies.

Other work under his leadership included reform of military construction planning and design procedures, improving military medical facilities, and new opportunities for American contractors to bid on construction projects overseas.

In all cases, the appropriations bills reported by his subcommittee have won virtually unanimous support by the Congress and earned strong praise from both Democratic and Republican leaders.

Mr. Ginn has also been recognized for a variety of leadership roles in other legislative area.

In environmental affairs, he has earned national recognition for his work to preserve the natural beauty of wilderness lands. He has authored and won enactment of wilderness legislation for more land than almost any other member of Congress from the southeast. He has authored legislation which secured wilderness designation for the Okefenokee National Wildlife Refuge, and the Blackbeard Island and Wolf Island National Wildlife Refuges.

He is also the author of legislation giving wilderness status to the largest of Georgia's Golden Islands, the Cumberland Island National Seashore. The Cumberland bill is the only wilderness bill signed into law thus far under President Reagan, and it was enacted by the House within 30 days of its introduction.

Mr. Ginn also played the key role in securing federal funding to establish the 4,715 acre Amicalola River Corridor in north Georgia, thus preserving and protecting for public recreational use one of the most beautiful sections of mountain area river land in the southeast.

In addition to his Washington activities, Mr. Ginn has won strong recognition for his careful attention to constituent services and for his close involvement in assisting in community problems in his District.

In seeking election in 1972, Mr. Ginn vowed to maintain a 90 percent voting attendance average or resign. He has maintained a cumulative attendance average of well over 90 percent while at the same time returning to Georgia virtually every weekend and during every Congressional recess for ten years to maintain close contact with his constituents. He has made more than 4,000 public appearances in his district and has never traveled outside the United States during his ten years of service.

Mr. Ginn announced his decision in 1981 to retire from Congress this year to fulfill his lifelong ambition to seek the office of Governor of Georgia. He led the field of Democratic candidates in a hotly contested election and was defeated in a runoff election with 46 percent of the vote.

Mr. Ginn and his wife have three children: Kacy, Julie and Bryan.

Mr. Speaker, I yield to my good friend, the gentleman from Georgia (Mr. BARNARD).

Mr. BARNARD. Mr. Speaker, I thank my colleague for yielding. I would certainly like to associate myself with the gentleman's comments. Tonight as we come to pay tribute to Bo GINN, we can say that Bo GINN epitomizes what the word statesman means, the word friend and the word Congressman. I am delighted tonight to be here to pay tribute to his service to the Congress, his service to his country, and his service to the State.

Mr. Speaker, in a small town in my district, there is a man who is not the mayor, not the city administrator, not the high school principal—yet he is so experienced in the workings of the world that nearly everyone in town comes to him for advice.

My colleague in the Congress, Bo GINN, has always impressed me as that kind of man. Bo has been an opinion leader of the "small town" that is Congress. In the course of a day, he hears from fellow Congressmen, staffers, constituents. But the calls also come from the leaders of Congress, military top brass, the movers and shakers of business—all seeking out Bo's opinion. Each person gets the same respectful hearing, the same thoughtful and reasoned response. And Bo's advice comes back later, translated by many people into words and actions that shape our country's course.

Bo GINN has been a hard-working and effective member of the Appropriations Committee. His list of contributions to Georgia is a lengthy one—military installations, especially King's Bay; water projects; the MARTA system in Atlanta; and the new airport that reinforces Atlanta's stature as a crucial transportation hub.

Bo has enjoyed a well-deserved reputation for getting things done. Yet at the same time, he has maintained a sense of integrity, placing the well-being of the country above purely parochial or party interests.

Bo GINN now takes his place among the historic Georgia politicians, the likes of Carl Vinson and Richard Russell.

We in Congress have many that we do business with, but few we can call "friend." Bo GINN has been a friend in the true sense of that word, and for me, his leaving marks not only a professional loss, but a personal one as well.

Mr. LEVITAS. Mr. Speaker, I yield to the gentleman from Colorado (Mr. KRAMER).

Mr. KRAMER. Mr. Speaker, I thank the gentleman from Georgia for yielding.

During my time in the Congress, I have appreciated working with Bo GINN.

Mr. GINN has chaired one of the most important defense committees in the Congress, the Subcommittee on Military Construction of the House Appropriations Committee. The activities of this committee represent a solid commitment to future fighting strength, a commitment that moves from abstractions to realities. It is committees like his that translate the funds appropriated by Congress into the training grounds, the warehouses, the barracks, runways, and depots that American forces simply must have to operate and fight.

During his time as chairman of that committee, Mr. GINN has served with fairness, competence, and integrity. I came to respect these qualities during my own testimony before his committee on several occasions regarding critical facilities in my own State. I appreciated his judgment and his willingness to fight for what he believed in.

I wish him the best for the future. He has served our Nation and its Armed Forces well during his time in the Congress. I am glad to have known him and to have worked with him here.

Mr. ANDERSON. Mr. Speaker, I am honored to join with my colleagues in

paying tribute to one of this Chamber's most distinguished Members, the Honorable Bo GINN.

For the past decade Bo has represented Georgia's First Congressional District with the highest level of legislative ability and statesmanlike dignity. Bo's popularity both at home and on this floor is proof of his outstanding performance as a Member of the House of Representatives.

As chairman of the Subcommittee on Military Construction and as a member of the Subcommittee on Defense of the Committee on Appropriations, Bo has demonstrated his keen ability time and again to address the problems which face this Nation.

It should be noted that Bo's election to chair the Military Construction Subcommittee came at a time when we reevaluated our need in this area and his working budget was more than doubled to well over $7 billion. At the same time, however, Bo also recognized that each of the programs within his jurisdiction should be thoroughly reviewed for their cost effectiveness.

I think that Bo will best be remembered for his many contributions in improving the quality of life for our enlisted men and women and their families. Because of his efforts Congress has appropriated over $100 million the past 2 years for design work for 30,000 new housing units for single men and women in the military. Also, his hard work has brought about the expenditure of funds, for the first time, devoted to child care centers and family service centers on military installations.

Prior to his current committee assignment, I had the privilege of serving with Bo on both the Public Works and Transportation and Merchant Marine and Fisheries Committees. As we all know, it is in committee where we truly see the effectiveness of our colleagues and, it was here where I began a very good working relationship with Bo. I can personally attest to the outstanding job he has done both for his constituents, as well as the Nation.

As chairman of the Public Buildings and Grounds and the Investigations and Review Subcommittees, I saw, firsthand, Bo's ability to comprehend the many issues we confronted as well as his capable leadership in striking workable compromises with those interested in the development of a particular measure. Bo's triumphs in the areas of transportation, economic development, and water pollution control are many and his many contributions will be remembered for years to come.

It was with mixed feelings in which I reacted to the news this past year that Bo had decided to retire from the House and seek the office of Governor of Georgia. As we all know, Bo could have again been overwhelmingly reelected by his constituents, and thus continue to play an active role in the House's proceedings. Although Bo will not be us when the 98th Congress convenes in January, you can be sure that his presence will be remembered.

My wife, Lee, joins me in saying a sad farewell to Bo GINN, and we wish him, and his wife, Gloria, and their three children, Kacy, Julie, and Bryan, all the best in their future endeavors.

□ 0110

Mr. LEVITAS. Mr. Speaker, at this time I yield to the gentleman from Alabama (Mr. FLIPPO).

Mr. FLIPPO. Mr. Speaker, I thank the gentleman for yielding.

I am grateful for the opportunity to say that it has been a great pleasure for me to know and to work with Bo GINN.

As the great State of Georgia is known for its many products, including beautiful women, Vidalia onions, and uncommonly good Congressmen, Bo GINN is certainly representative of that and deserving of this title of an uncommonly good Congressman.

He always gave me the impression that he recognized and handled his responsibilities to the people of Georgia, the people of this Nation, and to his colleagues about as well as any man that I have ever met.

It has been a pleasure to know him. I have benefited greatly from his counsel and look forward to continuing to work with him in the future.

Mr. LEVITAS. Mr. Speaker, at this time I yield to the gentleman from Georgia (Mr. MCDONALD).

Mr. MCDONALD. I thank the gentleman for yielding.

Mr. Speaker, today we are paying tribute to yet another departing Georgia Member, Bo GINN. Bo has longer service up here than his record as a Representative might indicate. Bo served as administrative assistant to Elliot Hagen from 1961 to 1966, himself a very distinguished Member of Congress. After that, he served as administrative assistant to Senator Talmadge from 1967 to 1971. Bo is distinguished by those he served, plus his own service. We will miss his kind of experience, which taken together with the loss of JACK BRINKLEY, subtracts 21 years experience from the Georgia delegation. Of course, his latest endeavor of running for the Governorship was nothing to be ashamed of and he came close to achieving that goal, also.

Bo's service will also be sorely missed on the subcommittee of the House Appropriations Committee—the Subcommittee on Military Construction, which he chaired and the Subcommittee on Defense. In those spots, Bo was a rock in taking stands to keep America strong and free. We will all miss that strong service and that ready smile. I do not know his future plans, but I sincerely hope they include visits to the Georgia delegation and the House of Representatives on a frequent basis.

Bo, we wish you Godspeed.

Mr. LEVITAS. Mr. Speaker, at this time I yield to the gentleman from Oklahoma (Mr. WATKINS).

Mr. WATKINS. I thank the gentleman for yielding.

Mr. Speaker, I join with the speaker in the well and our many other friends and colleagues to pay tribute to our distinguished colleague from the First District of Georgia, Bo GINN.

Mr. Speaker, it is a privilege to rise today to pay tribute to the distinguished gentleman from Georgia, my good friend and colleague, the Honorable Bo GINN.

Representing the First Congressional District of Georgia, Bo GINN has worked extremely hard to serve his constituents, State, and Nation well. While he began his career on Capitol Hill as a staff member in both the House and Senate, he won election to the House in 1972 and has been reelected without difficulty ever since. He is now a member of the House Appropriations Committee, where he serves on the Defense Subcommittee and as the chairman of the Military Construction Subcommittee. His leadership as subcommittee chairman has been outstanding.

During his 10 years of service in the House of Representatives, Bo GINN has proven extremely dedicated to the service of the people of the First Congressional District of Georgia, his State, and Nation. It was due to his dedication to be of even greater service to the State of Georgia that he decided to seek the office of Governor. Unfortunately, that move halted all hope temporarily for Bo GINN to be a public servant. Bo, most of us realize that if your decision had been to not run for Governor but seek reelection to the House, you could have continued your distinguished career in the Congress for the remainder of your life.

I join my colleagues in wishing Bo GINN every success in his future endeavors. He will not soon be forgotten by those of us who have served with him in the Halls of Congress.

Mr. LEVITAS. Mr. Speaker, at this time I yield to the gentleman from Kentucky (Mr. HUBBARD).

Mr. HUBBARD. I thank the gentleman very much for yielding.

Mr. Speaker, I congratulate the gentleman and the Georgia delegation for taking this special order in honor of our good friend and colleague, Congressman Bo GINN.

Yes, this Congressman from the First District of Kentucky expresses appreciation to the Congressman from the First District of Georgia.

In 1979, I, too, ran for Governor of my home State, but was fortunate enough to run in an off year election and could be reelected to Congress. We wish that could have been the way Bo GINN could have handled it. Bo GINN could have easily been reelected to Congress; that is for sure.

My wife and daughters and I had the privilege of visiting in Brunswick, St. Simon's Island, Jekyll Island, and Savannah, Ga., all in Bo's district. We know by repeated visits to that area that the people there think of Bo GINN with admiration, affection, and appreciation.

Yes, he has been described by other colleagues as a friend, a man of integrity and fairness, and one we sorely will miss.

Bo, as we said recently about our good friend and colleague, JACK BRINKLEY, as you and JACK leave this body, Georgia loses two real giants from the Congress. We wish you, Bo, Gloria Ginn, and the other members of your family God's richest blessings.

Mr. LEVITAS. Mr. Speaker, at this time I yield to my colleague, the gentleman from California (Mr. FAZIO).

Mr. FAZIO. I appreciate the gentleman yielding to me.

Mr. Speaker, I have been privileged to serve with two true gentlemen from Georgia during the 4 years I have had to serve my constituency in the House of Representatives. I was negligent the other day in not being present on the floor to pay tribute to my good friend and colleague, Mr. BRINKLEY, who served the people of my district, my State, and my Nation so well as chairman of the Subcommittee on Military Installations and Facilities of the Committee on Armed Services.

I feel somewhat, at this hour of the night, inadequate to express my appreciation to him and to the gentleman we honor during this special order, the other gentleman from Georgia, Mr. GINN, who I think really epitomized the kind of friendship and mutual trust and service that colleagues provide each other when we are at our best here in the House.

Mr. GINN traveled to my district, he understood my personal needs, and he worked closely with me and my staff to try to attain some solution to them. In the process, I got to know him.

I am pleased that his is not the first time that I have been up at 1:15 with him. I wish there had been more opportunities in the past, and certainly I am very sad that there will not be as many in the future as I would have liked. But I would like to simply say that I consider Mr. GINN to be a national Democrat, not because of a voting record that would so indicate, but because he had a perspective that crossed the entire spectrum of this body.

He understood people, he understood regions, he understood human beings. That kind of sensitivity is what caused him to get that overwhelming vote that Mr. LEVITAS mentioned in his district. That is what stands us all in good stead as we look to the future.

I am sure that kind of confidence, that kind of trust that the people of the First District showed in him will be the kind of underpinning, the kind of foundation that will make his future even more successful than his past. He is a man who I think will be sorely missed in this body, as all of us who knew him certainly understand.

I am glad I was able to make a friend in Bo GINN, and I look forward to maintaining that friendship in the years ahead.

Mr. LEVITAS. Mr. Speaker, at this time I yield to the gentleman from Colorado (Mr. KOGOVSEK).

Mr. KOGOVSEK. Mr. Speaker, I wish to commend the gentleman from Georgia for offering us this opportunity tonight to pay our respects to Congressman Bo GINN.

I want to very briefly say, and certainly not as eloquently as the preceding speaker, of the generosity of Congressman GINN. I just want to remember very briefly this evening an occasion a couple of summers ago where Congressman GINN came out to southeastern Colorado in the heat of the summer to help alleviate some of the fears of the constituents that I had in southeastern Colorado about that time concerning a takeover by the Department of the Army of approximately 242,000 acres of private grazing land.

□ 0120

I think that was a memorable occasion when Bo GINN was out in the middle of the Plains meeting with a group of ranchers one afternoon. I think the renewed trust that Congressman GINN gave to that handful of ranchers, renewed trust in Congress, I think is something I will always remember and something that that group of ranchers would remember because there was a person in a position of authority, who had the generosity with his own time to come out and somewhat alleviate the fears and some of the problems that those ranchers had at that time concerning the Army.

I think because of that kind of generosity, because of that kind of leadership, because of the fact that Congressman GINN was willing to make that kind of a trip for a Congressman he had not known that well, speaks well not only for the Congress and himself, for the gentleman from Georgia, but certainly gives Congress the kind of name I think we have not had in the past.

I wanted to take this brief moment tonight to thank the gentleman from Georgia, Congressman GINN, for his generosity at that time, and once again to say that he gave my constituency a renewed trust in Congress. This United States is a better place because of the gentleman from Georgia.

Mr. LEVITAS. Mr. Speaker, I am happy to yield to my colleague from Texas (Mr. SAM B. HALL, JR.).

Mr. SAM B. HALL, JR. Bo GINN is one of my closest and dearest friends. From the day I took the oath of office here in the House, Bo GINN and his family have been treasured friends to me and my family. We have visited back and forth in each other's homes and enjoyed the camraderie and hospitality that acrues from such a strong and abiding friendship.

Bo GINN is well known in my part of Texas. He has done some hunting in east Texas, but I refrain from discussing this side of Bo's many talents in that he may feel the need to reciprocate. But regardless of Bo's talent as an outdoorsman I can report that his son, Bryan, who is known far and wide as Bo Bo, puts us all to shame when it comes to handling a 12-gage.

When Bo GINN decided to leave the House and enter the Democratic primary for the Governorship of Georgia, it was the realization of a dream he has harbored for as long as he can remember. He came close—mighty close—but it just was not to be. In all my years of politics and watching elections, including my own, I can only say that his unsuccessful primary runoff caused me great consternation and sorrow. I hope he will try again. Bo GINN is a young man and certainly one of the most able people in public life I have ever had the privilege of meeting.

The people of the First Congressional District of Georgia would have returned Bo GINN to the House for as long as he wanted to offer for reelection. His service in their behalf has been exemplary. The city of Savannah in just the past few years has grown into a major port city with a tremnendous influx of manufacturing in and around the metropolitan area. Bo stood in the forefront of this development. His name is synonymous with jobs and productivity. In short, we can search this body over and not find a Member as dedicated—and successful in that dedication—to his constituency than Bo GINN.

The work he has done on the House Public Works and Transportation Committee is without parallel in the benefit brought to a congressional district. His service on House Appropriations has been greeted with applause by friend and admiration by foe. Look at the most successful defenders of national defense in and out of the Congress in recent years and when you choose them, the name Bo GINN will be right up at the top of the list.

It is going to be difficult to return in January and not have Bo GINN as a

Member of the 98th Congress. Many of us have come to rely heavily on his wisdom and counsel and the void is going to be difficult to fill. Ask members of the Appropriations Committee, and regardless of their particular philosophy, they will tell you that Bo GINN does his homework, that he is persuasive and effective. He works and he works hard, as hard as anyone, and his constituency has benefited. More important, the country has benefited.

To Bo, his lovely wife, Gloria, and to his wonderful children, Kacy, Julie, and Bo Bo, I can only say that our friendship will continue and it will continue to grow in the years ahead. To Bo himself I can only say thank you for all the help and advice you have given me along the way. I just hope to have the opportunity to serve with you in an official capacity again.

Bo GINN is a great patriot. The State of Georgia can take the greatest possible pride in his service to the Nation. We need more like him.

Mr. LEVITAS. Mr. Speaker, I am happy to yield to my colleague from Georgia (Mr. HATCHER).

Mr. HATCHER. Mr. Speaker, I would like to associate myself with the remarks of the gentleman from Georgia (Mr. LEVITAS) in paying tribute to Bo GINN. On a personal note, let me say that in my freshman term in Congress I have relied very heavily on the advice of Congressman GINN, and hope that I will have the benefit of that in the future.

Mr. Speaker, I take this time to join with my colleagues from Georgia and other Members of the House in recognizing and paying tribute to Congressman Bo GINN.

Congressman GINN will be leaving this body in January, but not before he has left his indelible mark on the U.S. House of Representatives. For Congressman GINN is a true product of the Hill. As a legislative aide and later Congressman, he mastered the kinds of legislative skills that resulted in his being appointed chairman of the Military Construction Subcommittee after having served only 2 years on Appropriations.

And as a subcommittee chairman, Congressman GINN practiced the economy of time as well as the economy of the dollar in reporting his exacting legislation in a timely manner.

In 1981, as Georgia's only freshman, I relied heavily on the advice of Congressman GINN. I treasure his counsel that will be just as important in the coming years as it was in those first uncertain weeks that all freshmen experience.

But while Congressman GINN is certainly a product of the Hill, and this Chamber in particular, he is no less a product of south Georgia. And the people of south Georgia, the people with whom he shares his roots, have always been Congressman GINN's first concern.

Confident that Congressman GINN will always have an active hand in affairs on the Hill, I bid him best wishes for a bright future.

Mr. LEVITAS. Mr. Speaker, I will be happy to yield to our beloved, revered, and distinguished dean of the Georgia delegation (Mr. BRINKLEY).

Mr. BRINKLEY. Mr. Speaker, following a Jefferson-Jackson Day dinner in Georgia a few years ago, I overheard a man say to the group who was with him that Bo GINN was the finest Congressman of them all. While there may be mild dissent on that score outside of Savannah, I would not be surprised that a vote in the House of Representatives would show Bo GINN to be the second finest Congressman of all, which tells us a lot about this good man.

In Bo's recent campaign for Governor, I introduced him to some of my friends in Columbus as a man we could be proud of. I told them that my wish was for them to know Bo GINN as I knew him—as a man of character and conviction and commonsense. Well, I am sure Bo came in first in terms of the ballots of congressional families who did know him best.

The highest tribute which can be paid to a man is for friends and neighbors to give freely of their time and effort. There was an abundance of such people around Bo GINN.

It was mainly so because Bo met the Edmund Burke test, when he stated the following in 1774:

> Certainly, Gentlemen, it ought to be the happiness and glory of a representative to live in the strictest union, the closest correspondence, and the most unreserved communication with his constituents. Their wishes ought to have great weight with him; their opinions high respect; their business unremitted attention. It is his duty to sacrifice his repose, his pleasure, his satisfactions, to theirs—and above all, ever, and in all cases, to prefer their interest to his own.
>
> But his unbiased opinion, his mature judgment, his enlightened conscience, he ought not to sacrifice to you, to any man, or to any set of men living. These he does not derive from your pleasure, no, nor from the law and the Constitution. They are a trust from Providence, for the abuse of which he is deeply answerable. Your representative owes you, not his industry only, but his judgment; and he betrays, instead of serving you, if he sacrifices it to your opinion.

It was also because Bo was independent. Oh, he listened to the voices that sent him. He appreciated them. But he voted on the basis of merit and constitutionality.

He tried to make the most responsible decision that he could based upon the facts. That way he satisfied his conscience and best served his district and country.

Bo is a moderate which may be defined as a man of commonsense with an open mind. Of course a moderate is too liberal for the conservative and too conservative for the liberal, but Bo has been truly a nondoctrinaire.

The two of us did not have any problem with President Carter's postcard registration proposal; we were openminded about President Carter's SALT II proposal; and we represented our districts in Washington and not Washington in our districts. We were mindful of Senator Russell's affirmation to the effect that he did not come to Washington to leave Georgia, but that he came to Washington to serve Georgia.

I have spoken these words about my dear friend and colleague, Bo GINN, but as one who is leaving this institution for which I have the highest respect, I can honestly say that the same philosophy seems to guide each and every Representative in this body.

□ 0130

Mr. LEVITAS. Mr. Speaker, I thank my good friend, the gentleman from Georgia (Mr. BRINKLEY), the dean of our delegation, for those eloquent and moving words, and I thank the other Members of this body who have joined with us tonight in paying tribute to a dear friend and a great Congressman, one of the true leaders of this Nation.

Over and beyond that, I guess the thing that on a personal basis most of us are going to miss—not that we will never see it again or have the pleasure of coming under its glow, just that we will not have enough of it—is the opportunity in the morning of seeing that ready smile, the opportunity to have him available for his advice and counsel and comfort when it is needed and to be a friend.

So, Mr. Speaker, tonight we say to our dear friend and colleague, Bo GINN, Godspeed in all you do.

● Mr. WHITTEN. Mr. Speaker, I rise today to add my praise to the outstanding service provided by my honorable colleague, Bo GINN. As chairman of the House Appropriations Committee, I have been privileged to serve with Bo GINN and watch his rise from a member of the committee to the distinguished chairman of the Military Construction Subcommittee.

Two years ago Bo GINN became chairman of the Military Construction Subcommittee at a time of increased interest in spending levels for military construction. He has overseen the Defense Department's massive buildup in defense construction spending. More than $15 billion in appropriations in the United States and abroad have been proposed in the past 2 years. His chairmanship has brought about an intense review of defense construction spending and has resulted in more than $1 billion in savings to the American public. At the same time, he has carefully assured that the defense of the Nation has been maintained.

I believe that Bo GINN will be remembered as the chairman who looked out for the people in the military. He insisted on better facilities for both living and working. He recognized that keeping good people in the military through better quality of life facilities results in a better military and—in the long run—is an essential factor in the improvement of overall readiness.

Bo GINN has also shown his ability to produce comprehensive and fair legislation. Both bills that he has brought to the House floor have had overwhelming approval and have been sent to the President with only minor changes in either the House or the Senate.

In conclusion, I am sorry that Bo GINN will not be here next year to serve on this committee and lend his wide range of talents to the appropriations process. The country will be without a concerned legislator, and this committee will be without an aggressive and diligent subcommittee chairman.

To Bo and his family we wish the very best in his new undertakings.●

● Mr. JENKINS. Mr. Speaker, it is always a pleasure to salute a colleague for a job will done. However, in this particular instance, I feel a personal sadness, for I shall miss my good friend, Bo GINN, as he leaves the Congress of the United States.

It has been my privilege to serve in this body with Mr. GINN. I have seen firsthand his devotion to his duty and his dedication to the people of this country. He has been tireless in this work on behalf of those whom he represents, lending his abilities and influence to all matters affecting his district and the State.

While I could list at great length the accomplishments of Congressman GINN, the legislator, his legislative victories will be part of the public record. Those of us who know him well will remember the small, personal things that he has done for those who have called upon him for help, both his constituents and his colleagues.

Bo GINN is a public servant in the highest and best sense. I know that he will continue to serve the people of Georgia and of this Nation, for it is second nature to him to lend a hand when called upon.

Those of us who have served beside him will miss his helping hand, and wish him well.●

● Mr. FOWLER. Mr. Speaker, throughout his 10 years in this body, Bo GINN has been an outstanding public servant and an exceptional spokesman for the State of Georgia.

He has been invaluable to me personally as a friend, counselor and ally in making the legislative process work effectively for the people of my district and the entire State of Georgia.

His colleagues on the Appropriations Committee know they are losing a superb legislator and a thoughtful leader, and we will hear much more in that vein from them today. I want to take a few moments to reflect with you on what Bo GINN has meant to me and to the city of Atlanta.

I can tell you that I will miss him sorely. Apart from my personal friendship with Bo, I have always been impressed with his genuine interest and concern on behalf of the city of Atlanta and all of the people of the Metropolitan Atlanta area. More than any other congressional colleague from outside the metro area, Bo has consistently recognized the fact that the well-being and prosperity of Atlanta is crucial to all of Georgia.

When MARTA was fighting in 1974 to be included in the priority funding category for Federal assistance, Atlanta was dropped from the list of eligible cities in the subcommittee draft of authorizing legislation prepared for the House Committee on Public Works and Transportation. Because MARTA had not technically begun construction at that time, its opponents had argued that it should not share in the major new construction program Congress was creating to help those cities with rail systems already being built. Congressman GINN, who was Georgia's only member of the committee, fought and won a tough battle in committee to overturn the earlier decision and list Atlanta as one of nine cities in the Nation eligible for this crucial funding.

The bill was passed by the House, and though legislation to specifically designate cities by name was modified before being signed into law, Bo's work had established MARTA in the legislative history of the new Mass Transportation Act and was the basis for the city's subsequent designation for priority construction funding. As a result, Atlanta has received more than $1 billion in Federal funds for MARTA.

MARTA has been able to advance its construction timetable by many years through the use of "letters of no prejudice" from the U.S. Department of Transportation which make it possible to finance construction with MARTA money and then be reimbursed later by Federal funds. In 1979, the Transportation Subcommittee of the House Committee on Appropriations issued appropriations report language which prohibited future letters of no prejudice because of their abuse in some cases. Congressman GINN personally helped to persuade the subcommittee chairman, Congressman BOB DUNCAN, to exempt MARTA from that provision as a special case so that MARTA could continue advance construction. We have a letter of no prejudice in effect now for the Art Center-to-Lenox and West End-to-Lakewood lines for $437.3 million. Without Bo's help, this line and other construction would have been slowed drastically or perhaps never completed at all due to inflation.

In 1976, Bo led the efforts in the House to defeat a plan by Snow Belt Congressmen which would have cut Georgia's share of national funding for water pollution control. He succeeded in winning an agreement by House conferees that has brought more than $60 million in additional funding for waste water treatment facility construction in Atlanta.

In 1978, Bo joined me in my efforts on the House floor to remove the last remaining Federal obstacle to allowing Georgia and Atlanta to make our own plans for the Great Park proposed for the I-485 corridor. At my request, he met with the chairman of the House Surface Transportation Subcommittee to persuade the chairman to reverse an earlier position and to support my effort to remove the payback requirement for a canceled segment of the Interstate Highway System for I-485. This modification in the Surface Transportation Act of 1978 was crucial to allowing plans for the Great Park to be prepared.

Last spring Atlanta was engaged in a major competition for selection as the site for the annual convention of the National Association of Homebuilders. The convention is one of the largest and most prized in the Nation, and the selection competition came at a time when the city was still suffering from the tragic killings of our children and other reports of crime. As the competition came down to the wire, the city was allowed one final presentation to the 1,000-member board of directors of the association, and Bo agreed to make the presentation on behalf of the Georgia congressional delegation. He made an appeal for the selection of Atlanta on behalf of the people throughout the State, and Atlanta won the selection. The convention will come to the city 3 years in succession and generate some $300 million in economic activity in Georgia and $13 million in local and State tax revenues.

One of our largest Federal employers in the Atlanta area is the U.S. Army Forces Command (Forscom) headquarters at Fort McPherson. With 2,000 employees and a $177 million annual economic impact in Atlanta, other cities have sought to have it moved from Fort McPherson on the grounds that its World War II-vintage "temporary" buildings have deteriorated to the point that Forscom operations have been hurt. Such action would eventually lead to the likely closing of Fort McPherson altogether. Working at the request of the Atlanta Chamber of Commerce, Bo last year secured $1 million in planning and design appropriations for a new facili-

ty to house Forscom at Fort McPherson. This means that the Army will proceed with the new construction, and the danger of the closing of Fort McPherson will be ended.

One of the "growing pains" we have suffered at the Hartsfield Atlanta International Airport is an inadequate number of U.S. Customs Service and Immigration and Naturalization Service personnel to process incoming international passengers. Because this restraint hurts our international trade, Bo worked with Atlanta-area Congressmen and held a meeting in his office with the Under Treasury Secretary in 1979 to appeal for additional personnel. Six more agents have been designated for the airport, and efforts are continuing to get more.

Atlanta's water supply has been a matter of great concern to us in terms of the city's immediate future as well as long-range planning. Bo has been a leader in recognizing the importance of this issue throughout the State, and in our area has supported appropriations for both the Metropolitan Atlanta area and the South Metropolitan Atlanta region water resources management studies by the Army Corps of Engineers. These studies provide the basis for our work to meet the metro area's water needs.

In 1979, when I was fighting on the House floor to save the Southern Crescent passenger train service to Atlanta, Bo was among my most active supporters. He has also lead continuing efforts to bring new rail service to Atlanta by establishing additional service along the old Nancy Hanks route through our city and on to central and coastal Georgia.

Construction of the Richard B. Russell Federal Building was vital to insure the continuation of Altanta's role as the regional headquarters for the Federal Government. As a member of the House Committee on Public Works and Transportation, Bo was the leader in securing approval of the committee resolution which authorized the final construction program for the building. He also coordinated work to secure the appropriation of $54 million in construction funding and came to Atlanta to testify in support of the building at a field hearing. The Russell Building is a very important part of the major new construction to enhance our downtown area.

A major hurdle in completing the major land acquisition for the Chattahoochee River National Recreation Area was securing a $14 million appropriation in the fiscal year 1982 Interior appropriations bill. The lack of support of this project by the Appropriations Subcommittee chairman, the Honorable Sidney Yates, resulted in this funding being left out of the House version of the bill. As a member of the Appropriations Committee and former member of the Interior Subcommittee, Bo prevailed upon Mr. YATES to change his position, and the funding was provided in a House-Senate conference committee.

Bo has been a consistent supporter in my work on such projects as Justice Department funding to help solve the Atlanta child slaying cases, public works construction in Atlanta through the Local Public Works and Development Act, airport development, and many other important projects and issues over the years.

Bo GINN is a proven friend to the people of the Atlanta area and a great servant of his State and Nation. He demonstrated time and again through both word and deed his effectiveness as a representative for the State of Georgia and his commitment to sound principles of good government. We will miss him. I will miss him especially.●

● Mr. BOLAND. Mr. Speaker, I want to thank the gentleman from Georgia (Mr. LEVITAS) for taking this time to allow us to pay tribute to Bo GINN.

I have had the pleasure of working with Bo since he joined the Appropriations Committee. He has been an effective and hard-working member of the committee and has done a particularly fine job as chairman of the Military Construction Subcommittee. He has been a strong and consistent advocate of improving the living conditions and compensation of our servicemen and servicewomen, and his efforts have borne fruit in the form of increased retention rates in the Armed Forces. He is a respected member of the Appropriations Committee and his counsel will be missed during the committee's deliberations in the 98th Congress.

Mr. Speaker, the people of the First District of Georgia have been well served by Bo GINN's work in Congress. I want to wish him all the best as he turns his attention toward new endeavors.●

● Mr. ADDABBO. Mr. Speaker, I am proud to join my colleagues today in paying tribute to our good friend and colleague, Bo GINN, who will be retiring at the end of this Congress.

I have had the pleasure of serving with Bo for the past 10 years, and most recently, with him on the Defense Subcommittee of the Appropriations Committee. I have always been impressed with his legislative achievements, especially his efforts on behalf of our military personnel. Bo, as chairman of the Subcommittee on Military Construction, initiated the first subcommittee hearings into the quality of life of men and women serving in our Armed Forces. These hearings led to major new initiatives to improve living conditions; including expanded family housing programs, funded child care centers, and improved military medical facilities.

Bo's work in environmental affairs has been no less notable; as a member of the Public Works Committee, he was a coauthor and conferee on amendments to the Water Pollution Control Act, aimed at cleaning up the Nation's rivers and streams. Bo also authorized much wilderness legislation aimed at preserving the natural beauty of our wilderness lands.

But Bo's most important contribution has been to his constituents, the residents of the First Congressional District of Georgia. He has always remained in close touch with the people who elected him, and has worked tirelessly on community problems.

Bo will be greatly missed by his constituents, this institution, and by the Nation. I join my colleagues in wishing him well in all his future endeavors.●

● Mr. LOEFFLER. Mr. Speaker, with deep respect—indeed with deep affection—I join my colleagues today in honoring a distinguished American and friend, the Honorable Bo GINN.

It has been a privilege to serve with the distinguished gentleman from Georgia in this 97th Congress on the Military Construction Subcommittee of the House Appropriations Committee. As our chairman, he has consistently displayed great sensitivity to those of us who work with him and to those who come before the subcommittee to press their case. It is a tribute to him that military construction appropriations bills have merited almost unanimous support from the House.

Bo's achievements as chairman truly reflect his compassionate interest in people and his strong concern for spending wisely and well in defense of our Nation. Our chairman is also to be commended for bringing to the subcommittee the idea that we should hear from those who use the facilities we construct. This concern for the quality of military life will result in more reenlistments and better preparedness.

Thank you, Mr. Chairman, for all your efforts in behalf of our country. We shall miss you. Godspeed, my friend.●

● Mr. BENNETT. Mr. Speaker. I rise in honor of Congressman Bo GINN who did not run for reelection to the House this year and who will leave a tremendous vacancy in our body as we all know.

Bo occupies a piece of geography just north of the congressional district that I represent in Florida. His area in Georgia includes the Kings Bay Submarine Base and other Federal installations and activities in which we share an interest, in our efforts to have a strong national defense. These things have brought me particularly close to Congressman GINN in the years he has served here in Washington and I will personally greatly miss him, as will all of the Members of Congress. He has done an outstanding job

for his country and for his district and we wish him and his family every happiness in the years ahead.●

● Mr. COELHO. Mr. Speaker, the conclusion of the 97th Congress will bring to an end the illustrious and exemplary congressional career of our colleague, Bo GINN. I am privileged to join others in honoring this outstanding public servant who has served his Georgian constituents and the people of our Nation in an absolutely superior manner.

Throughout his 10-year tenure, Bo has proven himself to be a man possessed with personal warmth, unquestionable integrity, and strong leadership qualities that have always characterized his work in the House. He has always shown the highest level of competence and legislative ability, largely through his distinguished service on the Public Works and Transportation Committee and the Appropriations Committee. In his role as chairman of the Subcommittee on Military Construction, he has been most effective in bolstering American military strength as well as reform of military construction planning and design procedures, and initiated programs to improve the quality of life for men and women in the military. Such tremendous efforts and accomplishments will certainly be long remembered.

Bo's impressive record of legislative achievement is one of which he and his constituents should be rightly proud. He has earned my admiration and respect, and I am certain that this feeling is shared by every Member of the House. In closing, I extend my respected colleague, Bo GINN, my regards and best wishes for his continued success in his future endeavors.●

● Mr. HEFNER. Mr. Speaker, I rise today to join with many of this body to pay tribute to my colleague and friend, Bo GINN. Bo is leaving this House at the end of this session, and I commend the gentleman from Georgia (Mr. LEVITAS), for arranging this special order in Bo's behalf.

When I came to Congress in 1974, Bo was one of the first Members I met, and I am proud to say that he has been my fast friend ever since. We served on the Public Works and Transportation Committee together, and even in these early days, I learned a great deal from Bo about how one serves a district, a State, and a Nation all at the same time. We serve together now on the Appropriations Committee, as a member of the Defense Subcommittee, and as chairman of the Military Construction Subcommittee, Bo has afforded a level of leadership equaled by very few.

I believe that when Bo leaves the Congress, he will leave behind a legacy of effective and accomplished service, service that is exhibited in the First District in modern military facilities, finer Federal buildings, better water and sewer lines in his towns and cities, and better transportation systems throughout the State of Georgia. Many children of the First District are going to college because of Bo GINN, veterans have gotten the medical help they need and deserve, senior citizens have received endless assistance and the knowledge exists within his constituency that Bo GINN is a man who listens and with whom their opinions matter.

Bo has served with such personal integrity as to be an example to us all. He has been tough and effective, he has worked diligently and hard to accomplish his ends; and he has always done so without compromise or malice. I believe that when Bo GINN leaves the Congress, he will leave a record of service—a record his successor will have to work hard to meet. But more than this, I believe that Bo GINN will leave with a reputation as one of the finest and most honorable men to have ever served in this great Capitol.

He is my friend, and I owe him a great debt of thanks for the many times he has worked with me, helped me, advised me. He leaves here with my best wishes for a future of accomplishment as great or better than he has known thus far, and he leaves behind a Congress that is better and stronger and more noble because of his service.●

● Mr. MAZZOLI. Mr. Speaker, along with my colleagues, I would like to express my thanks and appreciation to Congressman Bo GINN for his work in the House. The First District of Georgia has been well represented through the efforts of this hard working, industrious Congressman, and he will be missed. I wish Bo the very best in his future endeavors.●

● Mr. ROE. Mr. Speaker, I am most pleased to join in this well deserved salute today to my good friend Bo GINN, who is leaving the House of Representatives after 10 years of outstanding service to the people of Georgia and the Nation.

Bo GINN is widely recognized by his colleagues as one of the most effective members of this august body. During the years we served together on the Public Works Committee, Bo demonstrated a unique devotion to his work that won the admiration of all those who worked with him.

That same drive later won him the important chairmanship of the Appropriation Committee's Military Construction Subcommittee. And what a break for the American serviceman that was. Bo immediately began a full scale investigation into the shoddy housing conditions given our enlisted men and started the drive that resulted in military pay hikes to help our servicemen live decent lives.

In my current role as chairman of the Water Resources Subcommittee, Bo and I have had several discussions about his strong interest in the port of Savannah and the amount of money the Federal Government should spend on widening it.

Mr. Speaker, let me tell you this straight out; the people of the First District of Georgia have a forceful voice for their interests in Bo GINN. It is a voice that will be sorely missed over the next 2 years. But, Mr. Speaker, I have a strong feeling deep in my heart that it will not be too long before we hear that voice on this floor again.●

● Mr. MATSUI. Mr. Speaker, I join my colleagues today to honor a Member of this House who is retiring after 10 years of distinguished service to our Nation. Representative Bo GINN will be returning to his home State of Georgia to devote his considerable energies to his family and to personal pursuits. We shall miss this dedicated public servant.

During my tenure in Congress, I have watched Bo exercise his prodigious abilities as a legislator and developed immense respect for this man's talents. The record of achievement that he has amassed spans the gamut of subjects from promotion of rail transit systems to cleanup of our waterways contaminated by toxic waste to improvement of military medical facilities. Bo's legislative accomplishments have enhanced the lives of our citizens by seeking compassionate, reasonable solutions to seemingly insoluable problems.

In addition, the leadership he has demonstrated as chairman of the Appropriations Subcommittee on Military Construction directly translated into a higher quality of life for the men and women serving in the Armed Forces. Bo spearheaded a major new initiative to provide adequate military housing units for single men and women as well as families. He was responsible for funding child care centers and family service centers on military installations for the first time. Bo's foresight will insure that military personnel enjoy a life commensurate with their service to our country.

Bo has represented the interests of the First Congressional District of Georgia with skill and intelligence. It is with sadness that we wish him farewell and with fondness that we wish him a productive and healthy retirement.●

● Mr. PANETTA. Mr. Speaker, I want to join my colleagues in paying tribute to Bo GINN. It has been a great pleasure working with Bo over the past several years. He has been an excellent colleague and has done an outstanding job representing his constituents and carrying out the work of the House of Representatives. We will miss him, and I know the people of Georgia will miss his representation as well.

I am sure my colleagues join me in expressing hope that Bo will not abandon public life entirely upon leaving the House. He has a great deal to contribute to the welfare of his State and of the Nation. In the meantime, though, we all wish him well in whatever pursuit he chooses in the future.●

● Mr. AKAKA. Mr. Speaker, I want to take this opportunity to join my colleagues in recognition of the outstanding accomplishments of Congressman Bo GINN. In his 10 years of service in the House, he has been an effective spokesman in the areas of transportation, economic development, water pollution control, and our Nation's military strength and preparedness.

Mr. GINN won election to the House in 1972. As a freshman member of the Public Works Committee, he was active in establishing a national program for rail transit systems. The inclusion of the city of Atlanta in this system is directly attributable to Mr. GINN's efforts. He was the author of legislation which allows States to accelerate construction of their interstate highways through advance funding by the sale of State bonds. The State of Georgia proved this system practical by completing its Interstate System 5 years ahead of schedule and at a savings of $75 million to the taxpayers.

Through his work to preserve the natural beauty of wilderness lands, Mr. GINN has earned national recognition in environmental affairs. He has authored and won enactment of wilderness legislation for more land than almost any other Member of Congress from the Southeast. His legislation secured wilderness designations for the Okefenokee National Wildlife Refuge, the Blackbeard Island and Wolf Island National Wildlife Refuges, and the Cumberland National Seashore, the largest of Georgia's Golden Islands. Mr. GINN also played the key role in securing Federal funding to preserve and protect one of the most beautiful sections of mountain area river land in the Southeast for public recreational use by establishing the Amicalola River corridor in north Georgia.

Mr. GINN's concern for cleaning up the Nation's rivers and streams is evidenced by his efforts to amend the Federal Water Pollution Control Act in order to begin that task. In addition, concern for the problems of pollution of the Nation's waterways by toxic waste led him, as chairman of the Subcommittee on Investigations and Review, to conduct a series of nationally acclaimed hearings on the subject. The hearings were the foundation for landmark legislation to correct the problem.

In 1979, Mr. GINN was chosen by his colleagues to serve on the House Committee on Appropriations, and he was subsequently selected by the Democratic Caucus as chairman of the Subcommittee on Military Construction. While chairman, Mr. GINN initiated the subcommittee's first hearings into the quality of life of men and women serving in the military. His perception of the growing problems of family life in the military and the impact those problems were having on military preparedness led him to recommend a major new initiative to improve living conditions for personnel. As a result, Congress has, in the past 2 years, appropriated $100 million for design work for 30,000 new housing units for single men and women in the military. Family housing programs and, for the first time, funded child care centers and family service centers on military installations also resulted from the subcommittee's efforts. Mr. GINN also led his subcommittee in a new effort to require our allies to put more of their own funding into American military construction projects undertaken in their countries. Mr. GINN's subcommittee work has led to a major increase in such support by the Japanese, and additional efforts are anticipated by NATO allies.

Even though his Washington activities have taken much of his time, Mr. GINN has won strong recognition for his careful attention to constituent services and for his close involvement in assisting in community problems in his district. In seeking election in 1972, Mr. GINN vowed to maintain a 90-percent voting attendance average or to resign. He has kept his vow by maintaining a cumulative attendance average of well over 90 percent, while at the same time returning to Georgia virtually every weekend and during every congressional recess for 10 years to maintain close contact with his constitutents. This record of service has earned the loyalty and support of his constituents. Since winning election in 1972, Mr. GINN has been opposed only twice. He defeated this first challenger by a 90-percent margin and his second by 99 percent.

Mr. GINN's service to the people of Georgia and to the Nation as a whole are a tribute to this courage, dedication and strong sense of duty. His presence will be sorely missed in the House.●

● Mr. O'BRIEN. Mr. Speaker, Bo GINN and I came to Congress together in 1973. In the 10 years since then Bo has been a good friend and an effective legislator.

Bo and I came to know each other especially well through our service together on the Appropriations Committee. Bo has ably discharged the responsibilities of the chairmanship of our Military Construction Subcommittee. In doing so, Bo has pursued the national security interests of the United States without a trace of partisanship, which is in the best traditions of that important subcommittee.

As a friend, Bo has shown that the pressures of office need not preclude the practices of a gentleman and in Bo's case, a true southern gentleman.

Serving with Bo has been a pleasure and an honor. I know I speak for all Members when I say Bo GINN will be missed very much.●

● Mr. FUQUA. Mr. Speaker, I am proud to add my voice to those of other colleagues who are today honoring Congressman Bo GINN for his 10 years of able service to this House.

During the 10 years Bo GINN and I have served together I have come to know him not only as a competent, effective legislator, but as a good friend.

Our friendship was almost inevitable given the similarity of our backgrounds; we both grew up in rural Southern towns even, coincidentally, in Calhoun County although one was in Florida and the other in Georgia, we both took our degrees in agriculture, and we are the same age.

Bo GINN's effectiveness as a Congressman started the day he was sworn into office, reflecting the outstanding service he provided and experience he gained as administrative assistant to former Congressman Elliott Hagen and then to Senator Herman Talmadge, for a combined total of 10 years.

That service and experience has been reflected in his outstanding record on the Committee on Public Works and Transportation, the Committee on Merchant Marine and Fisheries, and the Committee on Appropriations on which he served as chairman of the Subcommittee on Military Construction.

Though his legislative accomplishments are many, Bo GINN has left an indelible mark on legislation to help restore downtown America through the renovation of unused buildings to meet Federal office needs, legislation to improve the Nation's water quality, and legislation to improve the quality of life for men and women serving in our Armed Forces.

While maintaining a rigorous legislative schedule, Bo GINN never lost sight of the needs of his constituents. Seldom did a weekend or recess pass that Bo GINN did not return to the First District of Georgia to maintain his close relationship with those who elected him.

His attention to casework involving constituents set a standard that most Congressmen would envy.

Bo GINN, at 48 years of age, has accomplished more than most individuals do in a lifetime.

And with half a lifetime still ahead, I am sure Bo GINN will continue to build on the already admirable record he has established.●

● Mr. LEATH of Texas. Mr. Speaker, I rise today to pay my respects and my gratitude to a fine Member of Con-

gress and a dear friend. Along with our other colleague from Georgia, JACK BRINKLEY, the departure of Bo GINN will leave a great void in our lives. We are grateful, however, to have served with Bo, and we rejoice for his more relaxed future. Bo has done a superb job for the First Congressional District of Georgia. When he came to Congress in 1973, he had never before served in any elective capacity, yet he knew the system well. His service has been marked by competence, diligence, and dedication. Like other respected Members of the Georgia delegation, Bo is quiet, he does his homework, works hard, shuns the limelight, and gets the job done. He is a winner in every respect, and a man of his word—qualities that are invaluable here.

Working with Bo has been a constant pleasure. No matter how pressures have mounted, he has never lost the good humor that sustains us all. It is not easy to be tough, to make unpleasant decisions, or even to explain the complexities of the legislation Bo has developed. Yet, he is the expert's expert and never appears to show strain. Every one of us appreciated his professionalism but, even more, we appreciate his kindness and unfailing courtesy. It is good to have this opportunity to express how much we admire him and to wish him Godspeed as his life takes a new direction. Bo, you have been one of our great resources. We will miss you.●

● Mr. WINN. Mr. Speaker, the House of Representatives will miss Congressman Bo GINN. He has served his five terms in the House with distinction and integrity and has injected a degree of personal warmth that keeps us from taking ourselves too seriously.

Bo is very representative of Members of Congress from the South; that is, he is very personable and, most importantly, very effective. He combines a strong concern for the First District of Georgia with a solid overview of our country as a whole. He balances his constituents' interests with national interests well and we all know that can be difficult sometimes. But Bo realizes, as we all do, that his constituents' interests are often the same as America's and votes accordingly.

His work on the Appropriations Committee has been commendable. In these times of budget restraint, he has been in the middle of the storm by serving on the Defense and Military Construction Subcommittees. From all accounts, he performed admirably as chairman of Military Construction which is an especially important subcommittee in light of the unprecedented Soviet military buildup in recent years.

Bo is a well-respected, well-liked Congressman—both here in Washington and back home in Georgia. I wish him the best of luck in his future endeavors.●

● Mr. SKELTON. Mr. Speaker, it is hard for me to imagine Congress next year without Bo GINN. In the years we have served in Congress together, I come to respect him immensely for his professionalism, his integrity, his intelligence, and his leadership. Moreover, I have come to value his personal friendship.

Mr. Speaker, Congressman Bo GINN is a master of the legislative art. He understands that it is accommodation and compromise, not partisanship and confrontation, that makes for successful legislation. Consider this, Mr. Speaker: To date, this Congress has enacted only two fiscal year 1983 appropriation bills. It is no surprise that one of those bills is the military construction appropriation bill, drafted by the subcommittee so ably chaired by Congressman Bo GINN. Consider also that in putting together this vital measure Chairman GINN not only had to meet the needs of our national defense, and provide for the well-being of the young men and women who serve in our Armed Forces, but he also tried to satisfy the concerns of 535 Members of the House and Senate. Bo GINN's handling of this measure, in committee and on the House floor, was, as usual, masterful.

Mr. Speaker, no Member of Congress has represented his district and his State better than Bo GINN. The people of Georgia have benefited in many ways from his public service. But, in his work here, Bo has not ignored the national interest. His contribution to our national security, and his efforts to preserve the natural beauty of wilderness lands, have earned him recognition throughout the land.

Mr. Speaker, this body will miss Bo GINN. He has been a friend and an inspiration to us all. It is my fervant hope that his considerable talents will remain available to us in whatever way he might see fit. I wish him well in his future endeavors, and I know he will always be welcome in these Halls.●

● Mr. HUGHES. Mr. Speaker, I am pleased to join in this salute to our colleague, Bo GINN, for his outstanding service to the House of Representatives.

Although my opportunites to work with Bo were, unfortunately, infrequent, they were always a genuine pleasure, and a true learning experience in efficient and effective lawmaking. Since 1972, Georgia's First District has benefited from his exceptional talent for getting things done. From his years on the Public Works Committee—where his dedication to improving the Port of Savannah began—to his present position as chairman of the Appropriations Committee on Military Construction—where he has worked tirelessly to better living conditions for our Nation's enlisted men—he has demonstrated a profound concern for his constitutents and his country.

The House of Representatives will be poorer for the loss of Bo's legislative ability and personal warmth. In bidding him farewell, I extend my sincere gratitude for his fine work and best wishes for his continued success and happiness.●

● Mr. HUTTO. Mr. Speaker, it is a privilege to join with my colleagues to commend Congressman Bo GINN for his outstanding service to his Georgia constituency and to the people of our great Nation. He will be sorely missed for the leadership he provided in the House Appropriations Committee.

As chairman of the Appropriations Subcommittee on Military Construction, Bo GINN was at the leading edge of the efforts to improve the living and recreational needs of military members and their dependents throughout the world. His insight and concern for the welfare of the military member caused him to be "up front" on vital people-related programs, which led to improved morale and effectiveness of our defense forces. As a result of his dedicated efforts, the military service provides a better quality of life, and a great deal of thanks is due him.

Recently, when Bo GINN made an outstanding race for the governorship of Georgia, I tried to do a little campaigning for him during my layovers at the Atlanta Airport. I suspect that other Members might have done likewise because he is held in such high esteem by those who know him and work with him. I am grateful for the assistance and wise counsel Bo has given me in my 4 years in Congress. Bo GINN indeed has been a friend and we shall all miss him.

Bo GINN's contributions to his district, his State, and our great Nation are many and I am pleased to join in the praise and thanksgiving for one with whom I have had the high privilege and honor of serving, I wish Bo Godspeed in all his future endeavors and much happiness for him and his family.●

● Mr. CONTE. Mr. Speaker, I am pleased to be able to take part in this special order today for my good friend and colleague, Bo GINN, of Georgia. It has been a pleasure to serve with him over the past 10 years.

As the chairman of the Military Construction Subcommittee of the Committee on Appropriations, Bo has had a tremendous opportunity to help the people of his district. Because of the substantial number of military bases in his district, he has had a unique opportunity to help his people, who appreciatively sent him back to the Congress for five terms.

The fact that Bo has moved quietly up the Appropriations Committee leadership ladder attests to the respect with which he is held, both by his colleagues in the House as a whole, and his colleagues on the committee. I can tell you that I have enjoyed working with him over the years.

Bo had been given the difficult task of representing a very divergent district. The First District of Georgia, encompassing Savannah and several counties inland from there, has a combination of the rural South with the expanding and growing Southeast. New jobs, growth, and investment are a part of this area of this country, and with it comes new people and a new type of constituent. In the 10 years that Bo served in this body, he had to remain representative of all these people, and the impressive victories with which he was always reelected shows that he served his people well.

Ultimately, that is why we are all here—to serve our people, and serve them well. Bo did that, and we will all miss him at the end of this Congress. In whatever he does, I know that all my colleagues join me in wishing him well, and the best of luck in his future endeavors.

Thank you, Mr. Speaker.●

● Mr. NELSON. Mr. Speaker, one of my greatest pleasures of serving in the U.S. House of Representatives is the privilege of working alongside some of our Nation's most dedicated and honorable men. As we near the close of another session, one leader especially comes to mind as a great contributor of integrity and guidance to this institution—my good friend, Bo GINN.

It is an honor to pay tribute to Bo today for his dedication to this country and to his many friends and constituents in the State of Georgia. His valuable efforts as a freshman on the Public Works Committee have led to the passage of legislation to revitalize our Nation's rail system. His concern for the future of our environment was evidenced by his coauthorship of the Federal Water Pollution Control Act. He has developed this Nation's awareness of a looming toxic waste problem through a series of widely acclaimed public hearings. And as chairman of the Appropriations Subcommittee on military construction, he has worked to insure our Nation's security.

These successes only highlight Bo's distinguished legislative record, earned through dedication and a genuine desire to help make America even better.

While his presence in the Congress will surely be missed in the years ahead, Bo GINN's accomplishments will long be remembered.

Thank you Bo, for your many years of fine service to this Nation and for your personal friendship. God bless you always.●

● Mr. ANNUNZIO. Mr. Speaker, I am proud to join my colleagues in paying tribute to the Honorable Bo GINN, who has been a dedicated Member of the House of Representatives ably representing his constituents in the First District of Georgia for the last 10 years.

Before becoming a Member of the House, Bo was a high school teacher, and later pursued a career in business. He came to Washington in 1961, and was the administrative assistant to Senator Herman E. Talmadge until he returned to Georgia in 1971.

Elected to Congress in 1972, Bo GINN has served with distinction as chairman of the Subcommittee on Military Construction of the House Appropriations Committee, and as a member of the Subcommittee on Defense of the House Appropriations Committee. He is respected in the House of Representatives not only for his expertise, but also for his hard work, independence, and integrity.

Bo will surely be missed in the House of Representatives by all who have had the opportunity of knowing him. He is a Congressman of outstanding ability, who has provided exemplary service to his constituents and to our Nation.

I extend to my colleague, Bo GINN, my best wishes for success in all of his future endeavors.●

● Mr. REGULA. Mr. Speaker, I rise today to honor my colleague from Georgia, the Honorable Bo GINN.

It has been my privilege to serve with Bo on the Military Construction Subcommittee.

Bo took his role on this subcommittee very seriously, exercising careful and deliberate consideration of every expenditure of taxpayers' money for military construction. He served well not only the people of Georgia, but the people of the United States in overseeing priority decisions on these expenditures.

As chairman, Bo GINN had to balance the needs of our service personnel, the security of our Nation and allies, the readiness of our military force, the maintenance of our existing military hardware, and the construction of new military facilities, housing, and schools all over the world. This was not an easy task, but one that Bo GINN performed with intelligence, insight, and skill, while always exercising compassionate concern for the condition of our military forces.

Bo GINN has been an exemplary chairman. He possessed keen sensitivity to the critical quality-of-life needs of America's service men and women—in this country and overseas. He has been responsible for initiating and conducting special hearings on quality of life in the military—hearings where enlisted personnel testified from firsthand points of view about the needs and concerns of American service men and women.

Bo's talent as a caring and sensitive leader will be missed. I extend to him my heartfelt appreciation and respect for his leadership on our subcommittee, and for his friendship. I hope he will continue his outstanding service to the people of this Nation.●

● Mr. SENSENBRENNER. Mr. Speaker, I would like to take this opportunity to recognize a distinguished colleague of mine in the House—Congressman Bo GINN.

Congressman GINN has served the First Congressional District of Georgia and the Nation with devotion for 10 years. During his tenure in the House, Bo GINN has earned a reputation as a prudent and responsible steward of taxpayers' dollars.

Representative GINN has served with distinction as chairman of the Subcommittee on Military Construction, as well as a member of the Subcommittee on Defense of the House Appropriations Committee. Earlier in his career, Congressman GINN served for 6 years as a member of the Committee on Public Works and Transportation and the Committee on the Merchant Marine and Fisheries. He has worked wholeheartedly during his stay in Congress to preserve the environment, bolster U.S. military strength, and provide for improvements in the Nation's transportation system.

As chairman of the Subcommittee on Military Construction of the House Appropriations Committee, Congressman GINN has worked to improve the quality of life of the Armed Services enlisted personnel. He has also determined to require our allies to share some of the costs of allied military construction. In all his endeavors on the subcommittee, Congressman GINN has been remarkably successful in gaining the acceptance of Congress. In all cases, bills reported from the subcommittee have won virtually unanimous bipartisan support in the House.

Mr. GINN has remained a strong representative of the people of the First District of Georgia, and he has been rewarded with several honors. In 1981, the Georgia Municipal Association presented Bo GINN with its "Key Citizen" award, and on the same day he was awarded the "Georgian of the Year" honor by the Georgia Association of Broadcasters.

As Congressman GINN retires after this session of Congress, I would like to join with my fellow Members of the House in thanking him for his dedicated service and wishing him the best of luck in the future.●

WHAT IS PROGRESS?

The SPEAKER pro tempore. Under a previous order of the House, the gen-

tleman from Texas (Mr. COLLINS) is recognized for 30 minutes.

● Mr. COLLINS of Texas. Mr. Speaker, as I leave Congress after eight terms, I have been asked why my district continues its strong economic growth. Serving as a Republican where the liberal Democrats have controlled Congress all of the last 26 years, I am asked where we stand.

We have the greatest economic area in the country. I am mighty proud of the friendly cities in my district, which include Irving, Farmers Branch, Carrollton, Addison, Richardson, Plano, and Lewisville. Within these areas we have the strongest economic momentum in America today. Since I have been in Congress for eight terms, I have had an opportunity to see my area grow and develop.

And people ask why does the Third District of Texas grow and develop? The biggest reason is that we do not call on the Federal Government for all their subsidized programs. We basically depend on the Federal Government for their primary services which are national defense, highways, water, social security and other essential national programs.

But we have built our community based on self-reliance, not on special Washington subsidies. We have built jobs and business on strength. The State of Texas requires by constitutional law that the State have a balanced budget. The second thing that the constitution requires is that the legislature meet for 4 months once every 2 years and they go home, so we do not have a continuous Texas Legislature in session.

In Texas, we have momentum because we have the right-to-work law. States that have the right-to-work law, which gives people an opportunity to work, have led in progress, and our State moves forward.

In Texas we have no State income tax, on individuals or on business. Because business knows it will be treated fairly it builds and expands. The greatest need in America is to have good jobs that pay a good wage today and provide a good future for tomorrow. My prime concern as a Congressman has always been to see that we have an energetic economic base with business operating profitably. We want business to succeed, because when business moves forward, we all are moving forward with it.

As I finish my term of service in Congress, my greatest satisfaction is to see my community with diversified and successful business. So many in Congress have worried about what the Government could do for their district. I have always worried about what the Third District of Texas could do for themselves. And in our area, in the greater Dallas Metroplex, where we still believe in God and family and country, we have built the greatest spirit and dynamic growth in any part of America.●

SOLVING THE FARM EMERGENCY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. FINDLEY) is recognized for 5 minutes.

● Mr. FINDLEY. Mr. Speaker, the administration should be congratulated on its decision to use the payment-in-kind principle on a large scale to reduce surplus grain stocks.

I hope the Government will move swiftly and put the plan in motion in the next few weeks so that it can be functioning fully by spring. It would be a serious mistake to delay until the new Congress has time to act.

Indeed, my own experience leads me to believe the program can be put into effect without additional legislation. But if legislation is needed, the steps should be taken this month—before adjournment of this Congress.

What is the PIK principle? Simply put, it utilizes existing Government holdings of grain to compensate farmers for idling grain acres.

Under it, a farmer gets paid in Government-owned grain for agreeing to idle his grain acres for the year. No money changes hands. The farmer is paid not in dollar value of grain, but in grain equivalent to the yield he would normally get. He would be paid in bushels or tons.

I have been recommending this type approach since I came to Congress in 1961, and during one of the last meetings of the House Committee on Agriculture prior to this year's election, I urged administration officials to move swiftly with a payment-in-kind program.

My own recommendation is that the Government contract to idle entire farms, not just a percentage of each farm. A farmer who normally produces only wheat would shut down his entire wheat acreage for the year, putting it to uses that would maintain—or build—soil value and minimize erosion. In exchange, he would get title to a specific number of bushels of Government-held wheat. He would get control of the wheat at his normal harvesttime, and at that time would dispose of the wheat in his normal manner. The same would apply to producers of corn and soybeans.

I urge whole-farm retirement for two main reasons: First, taking an entire operating unit out of production is the best way to reduce production. When only a percentage of a farm is taken out, the least productive acreage are always the first to go. Sometimes fertilizer is heaped on the remaining acres and this, too, reduces the effectiveness of the program. Second, whole-farm retirement is easier to administer. It involves fewer individual farmers and fewer administrative details.

The Government, of course, would have to limit carefully the number of farms idled in a particular township or county. Otherwise, the effect on supporting services—like fertilizer and equipment dealers—would be devastating.

The plan is a sound answer to the farm emergency now unfolding. It will reduce substantially existing surplus grain stocks that are costly for the taxpayers to maintain. It will reduce substantially new production of these grain. It will accomplish these goals without new budget outlays.

In a word it uses burdensome grain stocks to bring about new adjustment in production. It permits the market system to function. Farmers who idle their land could even play the futures markets with their contract grain if they wish.

It gets farmers out of a very deep yawning chasm, and gets results much faster than the costly programs now on stream. If the Government pushes this approach aggressively it will end the surplus strains by this time next year, bolster farm prices, and relieve taxpayers of spending billions to handle excess grain production.

It is one of those rare Federal programs that is self-ending. As soon as surplus stocks are used up, the program obviously must end.●

ORDERING COINS BY MAIL: HOLIDAY SHOPPERS BEWARE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, the old cliche "you can't judge a book by its cover" is as true for mail order coin advertisements as it is for novels. Regrettably, this seldom means that treasures can be found behind lackluster ads. On the contrary, fancy packaging is frequently used to camouflage the lemons—to pass off glorified tokens and pedestrian coins as rare collectors items.

Although this problem exists all year round, it seems to become more acute during this season when less than reputable coin merchants try to take advantage of the holiday shopper. Using a variety of outrageous advertising techniques, these opportunists seek to persuade the potential customer that worthless goods have real value, and hence would make marvelous gifts. While the methods may differ, the aim is always the same: to mislead the consumer into purchasing overpriced coins.

Trying to infer that the coins are being offered under the auspices of the U.S. Government is by far the most prevalent form of deception.

These private firms that deal in the sale of numismatic items know all too well that the American consumer likes buying coins from the Bureau of the Mint; people trust that the Government will not deceive them into buying coins that are not worth the money. Hence, these merchants do evrything in their power to take advantage of this trust.

For example, I recently saw a full-page color advertisement in the newspaper for something called the "200th Anniversary American Eagle." The merchants go out of their way to make you believe that these are official commemorative coins, struck to mark the bicentennial of the selection of the bald eagle as our national bird. The text of the ad states that "this is the first silver double eagle issued in United States history." Bold print announced the "Official First Day of Issue," while another prominent heading says "Authorized by Congress."

In addition, the very use of the terms "eagle" and "double eagle" are employed to infer Government sanction as these words normally refer to actual $10 and $20 American gold coins. The "coins" are undenominated, as were early American gold coins. The term "American eagle" is the name given to an undenominated bullion coin that has recently been proposed in legislation before this Congress.

As I am sure you have gathered, these "200th Anniversary American Eagles" have absolutely nothing to do with the U.S. Government. In fact, the repeated references to both the Government and Congress may violate Federal counterfeit statutes; at the very least, they show just how long some merchants will stoop to sell worthless tokens. These "American eagles" are simply privately struck medals, not legal tender coins.

This same type of misleading advertising is also used by private organizations that deal in the sale of real coins. Last month a local coin collector brought a very interesting packet of information to my attention. It contained a brochure and order blank for a supposedly rare Franklin-Liberty Bell half dollar. And once again, the seller made numerous references to the U.S. Government. For example, a photograph of the Capitol appears on the front cover of the brochure. The mailing envelope bears terms like "official notification," and a warning that reads "$500 reward for information leading to conviction of persons unlawfully tampering with, or interfering with, delivery of this official notification." Centered below the envelope seal is a picture of an American eagle with an "E Pluribus Unum" banner in his mouth.

Why the charade? The simple truth is that the Franklin-Liberty Bell half dollar being advertised for $25 can be purchased from a reputable dealer for about $7 or $8. The advertised price tag is nothing more than an exorbitant markup of approximately 300 percent. Numismatists tell me that the ad's claim that the coins have "a profit potential of 500 percent in 24 months" is sheer fantasy. The dealer is trying to convince the consumer to pay $25 for something worth less than one-third that amount, and then telling him that it will be worth $125 in "just 2 to 4 years from today." The coins would have to have a profit potential of at least 1,500 percent for that to be true. Clearly, only the seller stands to make a fortune on these coins.

Many of these opportunists take this pretense one step further by claiming that the offer is a "once in a lifetime deal." One recent advertisement for 1921 Morgan silver dollars said that the coins would be available for "3 days only" five times. The potential customer was warned that "any orders postmarked after midnight Thursday will be returned unopened." The marketers push the point that time is of the essence by reminding the consumer that there are "only 246 coins available." In fact, 87 million Morgan silver dollars were minted in 1921, and they are not particularly hard to come by. The advertised "special" price of only $49.50 is about double what the collector would pay if the coin was bought from a legitimate dealer.

"Shopping by mail" has been an integral part of the American retail industry ever since Sears, Roebuck issued its first catalog. Today, we can purchase everything from housewares and clothing to fine jewelry without leaving home. For those with restricted mobility, or just no time to shop, the mail-order business has been a lifesaver. Unfortunately, it has also served as a fertile ground for the manipulation of consumers by those interested in making a fast buck at the expense of others. These three examples of fraudulent coin advertising are, I am sorry to say, just the tip of the iceberg. I urge everyone to keep this in mind during the holiday shopping season. Let us not allow this blatant opportunism ruin a joyous occasion.●

LEAVE OF ABSENCE

(By unanimous consent, leave of absence was granted to:)

Mr. SKELTON (at the request of Mr. WRIGHT), for today, until December 9, on account of a death in the family.

Mr. SHUSTER (at the request of Mr. MICHEL), from 8 p.m. this evening and the balance of the week, on account of medical reasons.

Mr. ALEXANDER (at the request of Mr. WRIGHT), for today, on account of illness in the family.

Mr. CAMPBELL (at the request of Mr. MICHEL), from 5 p.m. until midnight, on account of a necessary absence.

Mr. BEVILL (at the request of Mr. WRIGHT), for today, on account of illness.

Mr. BAFALIS (at the request of Mr. MICHEL), for today and the balance of the week, on account of a death in the family.

Mr. LEHMAN (at the request of Mr. WRIGHT), for this week, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative programs and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. WHITTAKER) to revise and extend their remarks and include extraneous material:)

Mr. FINDLEY, for 5 minutes, today.

Mr. COLLINS of Texas, for 30 minutes, December 13.

Mr. COLLINS of Texas, for 30 minutes, December 14.

Mr. COLLINS of Texas, for 30 minutes, December 15.

Mr. HORTON, for 60 minutes, December 14.

(The following Members (at the request of Mr. HATCHER) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. MAZZOLI, for 5 minutes, today.

Mr. STOKES, for 60 minutes, on December 9.

Ms. FERRARO, for 60 minutes, on December 9.

Mr. SKELTON, for 60 minutes, on December 15.

Mr. ECKART, for 60 minutes, on December 15.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. RITTER, prior to the vote on House Resolution 620.

Mr. MICHEL, during general debate on H.R. 6211 in the Committee of the Whole today.

Mrs. BOGGS, immediately following the Simon amendment in the Committee of the Whole today.

(The following Members (at the request of Mr. WHITTAKER) and to include extraneous matter:)

Mr. BROOMFIELD in two instances.

Mr. BROWN of Ohio in two instances.

Mr. ARCHER.

Mr. LEWIS.

Mr. DERWINSKI in four instances.

Mr. SENSENBRENNER.

Mr. COLLINS of Texas.

Mr. WEBER of Ohio for December 9.

Mr. BAILEY of Missouri.

Mr. CORCORAN.

Mr. RUDD in two instances.

Mr. CHENEY.

Mr. BEREUTER.
(The following Members (at the request of Mr. HATCHER) and to include extraneous matter:)
Mr. HERTEL.
Mr. HOYER.
Mr. WEAVER.
Mr. DORGAN in two instances.
Mr. FARY.
Mr. ANDERSON in 10 instances.
Mr. FLORIO.
Mr. FOWLER.
Mrs. COLLINS of Illinois.
Mr. LEVITAS.
Mr. MATSUI.
Mr. GONZALEZ in 10 instances.
Mr. ROSENTHAL in 10 instances.
Mrs. BOUQUARD in five instances.
Mr. HAMILTON in 10 instances.
Mr. BROWN of California in 10 instances.
Mr. ANNUNZIO in six instances.
Mr. JONES of Tennessee in 10 instances.
Mr. BONER of Tennessee in five instances.
Mr. GARCIA.
Mr. MINETA.
Mr. CHAPPELL.
Mr. FOGLIETTA.
Mr. SHANNON.
Mr. LONG of Maryland.
Mr. GIBBONS.
Mr. OBERSTAR in two instances.
Mr. ASPIN.
Mr. FORD of Michigan.
Mr. HARKIN.
Mr. PANETTA.
Mr. EDGAR in two instances.
Mr. EDWARDS of California.

SENATE BILL, JOINT RESOLUTIONS AND A CONCURRENT RESOLUTION REFERRED

A bill, joint resolutions and a concurrent resolution of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 1340. An Act to provide for the use and distribution of Clallam judgment funds in docket numbered 134 before the Indian Claims Commission, and for other purposes; to the Committee on Interior and Insular Affairs.

S.J. Res. 258. Joint resolution to authorize and request the President to designate the month of December 1982 as "National Closed-Captioned Television Month"; to the Committee on Post Office and Civil Service; and

S.J. Res. 264. Joint resolution to designate the week of March 13, 1983, through March 19, 1983, as "National Children and Television Week"; to the Committee on Post Office and Civil Service.

S. Con. Res. 130. Concurrent resolution expressing the sense of the Congress that the advancement of science and technology in the communications and electronics industry is vital to the needs of the United States; to the Committees on Energy and Commerce, and Science and Technology.

ADJOURNMENT

Mr. HATCHER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 34 minutes a.m.), under its previous order, the House adjourned until today, Tuesday, December 7, 1982, at 1 p.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

5217. A communication from the President of the United States, transmitting proposed amendments to the request for appropriations for fiscal year 1983 (H. Doc. No. 97-262); to the Committee on Appropriations and ordered to be printed.

5218. A communication from the President of the United States, transmitting the proposed amendment to the fiscal year 1983 budget for the District of Columbia (H. Doc. No. 97-263); to the Committee on Appropriations and ordered to be printed.

5219. A letter from the Secretary of Defense transmitting six reports of violations of the Anti-Deficiency Act, pursuant to section 3679(i)(2) of the Revised Statutes, as amended; to the Committee on Appropriations.

5220. A letter from the Acting Secretary of State, transmitting a report, covering the month of November, on the manner in which the national interest of the United States has been served by the payments made by the Commodity Credit Corporation to the U.S. creditors on credits guaranteed by the CCC on which payments had not been received from the Polish People's Republic, pursuant to section 306 of Public Law 97-257; to the Committee on Appropriations.

5221. A letter from the Secretary of the Air Force, transmitting the required report for HARM (AGM-88A), pursuant to section 917(b)(2) of Public Law 97-86; to the Committee on Armed Services.

5222. A letter from the Chairman, U.S. Commission on Civil Rights, transmitting the Commission's report on unemployment and underemployment among blacks, Hispanics, and women, pursuant to section 104(c), Public Law 85-315; to the Committee on Education and Labor.

5223. A letter from the Assistant Secretary of Energy, transmitting the Department's final environmental impact statement for conversion to coal of the New England Power Co.'s Salem Harbor generating station, pursuant to section 165(b) of the Energy Policy and Conservation Act, as amended; to the Committee on Energy and Commerce.

5224. A letter from the Secretary of Health and Human Services, transmitting the 10th annual report of the National Heart, Lung, and Blood Advisory Council, pursuant to section 418(b)(2) of the Public Health Service Act, as amended; to the Committee on Energy and Commerce.

5225. A letter from the Secretary of Health and Human Services, transmitting the annual report of the National Cancer Advisory Board which describes the actions and deliberations for fiscal year 1982, pursuant to section 404(a)(7) of the Public Health Service Act; to the Committee on Energy and Commerce.

5226. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense articles to Greece (Transmittal No. 83-10), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

5227. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's intention to offer to sell certain defense articles to the Federal Republic of Germany (Transmittal No. 83-11), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

5228. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the proposed lease of certain defense articles to Turkey (Transmittal No. 1-83), pursuant to section 62(a) of the Arms Export Control Act; to the Committee on Foreign Affairs.

5229. A letter from the Director, Defense Security Assistance Agency, transmitting quarterly reports on foreign military sales of September 30, 1982, pursuant to section 36(a) of the Arms Export Control Act; to the Committee on Foreign Affairs.

5230. A letter from the Comptroller, State Department, transmitting the semiannual report on the activities of the international narcotics control program, pursuant to section 481(b)(2) of the Foreign Assistance Act of 1961, as amended; to the Committee on Foreign Affairs.

5231. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of a proposed commercial manufacturing license agreement for the production of certain military equipment for the Government of Taiwan (Transmittal No. MC-15-82), pursuant to section 36(d) of the Arms Export Control Act; to the Committee on Foreign Affairs.

5232. A letter from the Inspector General, Department of Health and Human Services, transmitting a quarterly report identifying any significant problems, abuses, or deficiencies, pursuant to section 204(b) of Public Law 94-505; to the Committee on Government Operations.

5233. A letter from the Secretary of Education, transmitting the semiannual report of the Department's Inspector General, covering the period ended September 30, 1982, pursuant to section 5(b) of Public Law 95-452; to the Committee on Government Operations.

5234. A letter from the Administrator, National Aeronautics and Space Administration, transmitting the semiannual report of the NASA Inspector General, covering the period ended September 30, 1982, pursuant to section 5(b) of Public Law 95-452; to the Committee on government Operations.

5235. A letter from the Administrator, Veterans' Administration, transmitting the semiannual report of the Veterans' Administration Inspector General, covering the period ended September 30, 1982, pursuant to section 5(b) of Public Law 95-452; to the Committee on Government Operations.

5236. A letter from the Director, Minerals Management Service, Department of the Interior, transmitting notice of the proposed refund of $87,718.13 to Shell Oil Co. and Amerada Hess Corp., for excess royalty payment, pursuant to section 10(b) of the Outer Continental Shelf Lands Act of 1953; to the Committee on Interior and Insular Affairs.

5237. A letter from the Director, Minerals Management Service, Department of the Interior, transmitting notice of the proposed refund of $26,530.74 to Shell Oil Co. and Cities Service Co., for excess royalty payment, pursuant to section 10(b) of the Outer

Continental Shelf Lands Act of 1953; to the Committee on Interior and Insular Affairs.

5238. A letter from the Assistant Secretary for Fish and Wildlife and Parks, Department of Interior, transmitting the list of areas on the Registry of Natural Landmarks and the areas of national significance included in the National Register of Historic Places, which exhibit known or anticipated damage or threats to the integrity of their resources, pursuant to section 8 of Public Law 94-458; to the Committee on Interior and Insular Affairs.

5239. A letter from the Chairman, Administrative Conference of the United States, transmitting the annual report on the activities of the Conference for the period ended December 31, 1981, pursuant to 5 U.S.C. 575; to the Committee on the Judiciary.

5240. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders suspending deportation under the authority of section 244(a)(1) of the Immigration and Nationality Act, together with a list of the persons involved, pursuant to section 244(c) of the act; to the Committee on the Judiciary.

5241. A letter from the Chief Judge, District of Columbia Circuit, U.S. Court of Appeals, transmitting notice of an order promulgated by the Court establishing procedures for handling bankruptcy and related matters upon expiration of the current and any subsequent stay granted by the Supreme Court in *Northern Pipeline Construction Co.* v. *Marathon Pipe Line Co.*, pursuant to 28 U.S.C. 332(d); to the Committee on the Judiciary.

5242. A letter from the Adjutant General, Military Order of the Purple Heart, transmitting the audit report of the organization as of June 30, 1982 and 1981, pursuant to section 3, of Public Law 88-504; to the Committee on the Judiciary.

5243. A letter from the Administrator, Panama Canal Commission, transmitting a report on an accident claim while the ship was in canal waters for $685,104.10 from the owners of the m/v *Ocean Ever*, pursuant to section 1415(b) of Public Law 96-70; to the Committee on Merchant Marine and Fisheries.

5244. A letter from the Deputy Assistant to the President for Management, transmitting a report on the total number of employees employed at any time during fiscal year 1982 in the White House Office, the Executive Residence at the White House, the Office of the Vice President, the Office of Policy Development (Domestic Policy Staff), and the Office of Administration, pursuant to 3 U.S.C. 113; to the Committee on Post Office and Civil Service.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ROSTENKOWSKI: Committee on Ways and Means. H.R. 7368. A bill to provide revenue for repair and rehabilitation of the Nation's highways and for mass transit capital expenditures, and for other purposes. (Rept. No. 97-945). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ROSTENKOWSKI (for himself and Mr. CONABLE):

H.R. 7368. A bill to provide revenue for repair and rehabilitation of the Nation's highways and for mass transit capital expenditures, and for other purposes; to the Committee on Ways and Means.

By Mr. MINETA:

H.R. 7369. A bill to provide for a capital budget within the budget of the U.S. Government, to provide budget process incentives for dedicated revenues, and to create a National Commission on the Rebuilding of America; jointly, to the Committees on Government Operations, Rules, Public Works and Transportation, and Energy and Commerce.

By Mr. BROOMFIELD:

H.R. 7370. A bill to prohibit any individual who has diplomatic immunity from the criminal jurisdiction of the United States from possessing a handgun without the approval of the Secretary of State; to the Committee on Foreign Affairs.

By Mr. SAM B. HALL, JR.:

H.R. 7371. A bill to amend the Diplomatic Relations Act to limit immunity from criminal prosecution for families of foreign diplomats; to the Committee on Foreign Affairs.

By Mr. OBERSTAR:

H.R. 7372. A bill to amend title II of the Social Security Act to exclude certain amounts in the computation of the offset against benefits which is presently provided in the case of spouses and surviving spouses receiving Government pensions; to the Committee on Ways and Means.

By Mr. OBERSTAR (for himself, Mr. EDGAR, Mr. HORTON, Mr. CONTE, Mr. FISH, Mr. ST GERMAIN, Mr. WALGREN, Ms. MIKULSKI, Ms. OAKAR, Mr. HARKIN, Mr. SEIBERLING, Mr. ECKART, Mr. CLINGER, Mr. BOLAND, Mr. BEDELL, Mr. WEBER of Ohio, Mr. ROTH, Mr. WORTLEY, Mr. MITCHELL of Maryland, Mr. VENTO, Mrs. MARTIN of Illinois, Mr. RINALDO, Mr. LONG of Maryland, Mr. HOYER, Mr. PEASE, Mrs. HECKLER, Mr. MCHUGH, Mrs. COLLINS of Illinois, and Mr. WINN):

H.R. 7373. A bill to provide a temporary means to correct imbalances in the natural gas market in order to restrain prices charged to natural gas users; to the Committee on Energy and Commerce.

By Mr. ZABLOCKI (for himself, Mr. BINGHAM, Mr. BROOMFIELD, and Mr. LAGOMARSINO) (by request):

H.R. 7374. A bill to facilitate the adjudication of certain claims of U.S. nationals against Iran, to authorize the recovery of costs incurred by the United States in connection with the arbitration of claims of U.S. nationals against Iran, and for other purposes; to the Committee on Foreign Affairs.

By Mr. GAYDOS:

H.R. 7375. A bill to freeze for fiscal year 1983 the rate of salary payable to Members of Congress; to the Committee on Post Office and Civil Service.

By Mr. OTTINGER:

H.R. 7376. A bill to amend the Energy Conservation in Existing Buildings Act of 1976 to provide for the weatherization of the remaining 12,000,000 eligible low-income houses throughout the United States, to create additional employment in weatherization-related industries, and for other purposes; to the Committee on Energy and Commerce.

By Mr. FUQUA:

H.J. Res. 627. Joint resolution to designate the year 1983 as the Bicentennial of Air and Space Flight; to the Committee on Post Office and Civil Service.

By Mr. BONKER (for himself, Mr. LEACH of Iowa, Mr. GEJDENSON, Mr. ROSENTHAL, Mrs. FENWICK, Mr. PORTER, Mr. PRITCHARD, and Mr. DYMALLY):

H. Con. Res. 433. Concurrent resolution condemning all forms of religious persecution and discrimination as a violation of human rights; to the Commmittee on Foreign Affairs.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 1491: Mr. BIAGGI.

H.R. 1493: Mr. BIAGGI.

H.R. 6239: Mr. HEFTEL, and Mr. NELLIGAN.

H.R. 6318: Mr. WYDEN.

H.R. 6527: Mr. DOWNEY.

H.R. 7051: Mr. EMERSON.

H.J. Res. 607: Mr. WASHINGTON.

H.J. Res. 619: Mr. SHAMANSKY, Mr. ROSENTHAL, Mr. DERWINSKI, Mr. ROE, Mr. FORD of Michigan, Mr. GILMAN, Mr. PEPPER, Mr. HYDE, Mr. HOPKINS, Mrs. HOLT, Ms. OAKAR, Mr. ENGLISH, Mr. ERDAHL, Mr. CARNEY, Mr. BROOKS, Mr. MARTIN of New York, Mr. ADDABBO, Mr. SEIBERLING, Mr. FAUNTROY, Mr. YATES, Mr. BARNES, Mr. FROST, Mr. DICKS, Mr. ANTHONY, Mr. MARRIOTT, Mr. DYSON, Mr. SCHEUER, Ms. MIKULSKI, Mr. WOLF, Mr. CORRADA, Mr. FOWLER, Mr. CORCORAN, Mr. MATSUI, Mr. MINETA, Mr. FOGLIETTA, Mr.

BROWN of California, Mr. LAFALCE, Mr. DAUB, Mr. CONTE, Mr. BROWN of Colorado, Mr. LAGOMARSINO, Mr. COELHO, Mr. WASHINGTON, Mr. WEISS, Mr. RATCHFORD, Mr. BEILENSON, Mr. GUARINI, Mr. HOWARD, Mr. CHENEY, Mr. SOLARZ, Mr. ANDERSON, Mr. HATCHER, Mr. SWIFT, Mr. DELLUMS, Mr. HUGHES, Mr. SIMON, Mr. MCDADE, Mr. EVANS of Indiana, Mr. FAZIO, Mr. GARCIA, Mr. WON PAT, Mr. JOHN L. BURTON, Mr. DYMALLY, Mr. FRANK, Mr. LANTOS, Mr. SMITH of New Jersey, Mr. WHITEHURST, Mr. WIRTH, Mr. HANSEN of Utah, Mr. GOODLING, Mr. PARRIS, Mr. SUNIA, Ms. FERRARO, Mr. WILSON, and Mr. TRIBLE.

H. Con Res. 236: Mr. WASHINGTON.

H. Con. Res. 392: Mr. SIMON.

H. Con. Res. 425: Mr. MONTGOMERY, Mr. DORNAN of California, Mr. FRANK, Mr. LEBOUTILLIER, Mr. SANTINI, Mr. ROE, Mr. YOUNG of Alaska, Mr. APPLEGATE, Mr. WINN, Mr. TAUZIN, Mr. OTTINGER, Mrs. SCHROEDER, Mr. OXLEY, Mr. RANGEL, Mr. HARTNETT, Mr. FAUNTROY, Mr. LAGOMARSINO, Mr. FAZIO, Mr. WASHINGTON, Mr. WILLIAMS of Montana, Mr. FISH, and Mrs. SNOWE.

PETITIONS, ETC.

Under clause 1 of rule XXII,

669. The SPEAKER presented a petition of the Board of Supervisors, Seneca County, N.Y., relative to an "Economic Marshall Plan"; which was referred to the Committee on Banking, Finance and Urban Affairs.

AMENDMENTS

Under clause 6 of rule XXIII, proposal amendments were submitted as follows:

H.R. 5133

By Mr. BROWN of Ohio:

—Page 8, line 3, strike out "For" and insert in lieu thereof "Except as provided in subsection (b)".

Page 8, insert after the table before line 11, the following:

"(b) SPECIAL RULE.—For each model year beginning after January 1, 1983, the minimum domestic content ratio for a vehicle manufacturer who began production in the United States between January 1, 1980, and December 31, 1982, shall not be less than the applicable minimun content ratio specified in the following table:

Model year 1984

Number of motor vehicles produced by the manufacturer and sold in the United States during such year:	*Minimum domestic content ratio:*
Not over 100,000	0 percent.
Over 100,000 but not over 900,000.	The number, expressed as a percentage, determined by dividing the number of vehicles sold by 90,000.
Over 900,000	30 percent.

Model year 1985

Number of motor vehicles produced by the manufacturer and sold in the United States during such year:	*Minimum domestic content ratio:*
Not over 100,000	0 percent.
Over 100,000 but not over 900,000.	The number, expressed as a percentage, determined by dividing the number of vehicles sold by 45,000.
Over 900,000	60 percent.

Each model year after model year 1985

Number of motor vehicles produced by the manufacturer and sold in the United States during such year:	*Minimum domestic content ratio:*
Not over 100,000	0 percent.
Over 100,000 but not over 900,000.	The number, expressed as a percentage, determined by dividing the number of vehicles sold by 30,000.
Over 900,000	90 percent.

Page 8, line 11, strike out "(b)" and insert "(c)".

H.R. 7145

By Mr. LEVITAS:

—Page 37, after line 6, insert the following section:

SEC. 505. None of the funds appropriated by this Act may be used to implement, administer, or enforce any regulation which has been disapproved pursuant to a resolution of disapproval duly adopted in accordance with the applicable law of the United States.

H.R. 7355

By Mr. JOHN L. BURTON:

—Page 73, line 17, add the following section:

SEC. 794. No funds appropriated under this Act for the MX missile shall be expended in violation of section 7 of Public Law 95-435.

—Page 26, line 25, add the following language:

No funds appropriated under this section for the MX missile shall be expended in violation of section 7 of Public Law 95-435.

By Mr. GARCIA:

—At the end of title VII (page 73, after line 16), insert the following new section:

SEC. 794. None of the funds appropriated by this Act may by used—

(1) to operate, maintain, or provide personnel support services for the dining room of the Secretary of Defense in the Pentagon;

(2) for the pay of enlisted members of the Armed Forces assigned to duty as personal aides to general and flag officers; or

(3) for the provision of veterinary care for pets of members of the Armed Forces or their dependents.

By Mr. MONTGOMERY:

—Page 3, line 23, strike out "$1,223,650,000" and insert in lieu thereof "$1,247,450,000".

—Page 5, line 25, strike out "$1,658,950,000" and insert in lieu thereof "$1,695,150,000".

By Mrs. ROUKEMA:

—At the end title IV (page 28, after line 13), add the following new paragraph:

LIMITATION ON TOTAL AVAILABLE FOR OBLIGATION

Notwithstanding the total of the amounts appropriated under this title, the total amount obligated under this title may not exceed $77,090,233,000. In making reductions in order to comply with this paragraph, no reduction may be made in amounts available for spare parts, repair parts, or ammunition.

By Mr. VENTO:

—Page 19, line 7, strike "$10,616,546,000" and insert in lieu thereof "$10,368,346,000.

H.R. 7357

By Mr. PERKINS:

—(1) Page 6, strike out line 4 and insert in lieu thereof the following new paragraph:

"(3) the person or entity, in the case of the hiring of an individual, must attest, under penalty of perjury and on or appended to such form, to the name and address of each other individual who (A) applied in writing (within 90 days before the hiring of the individual) for the position in which the individual was hired, and (B) was not hired for the position; and

Page 6, line 5, strike out "(3)" and insert in lieu thereof "(4)".

Page 6, line 6, strike out "(1) and (2)" and insert in lieu thereof "(1), (2), and (3)".

—(2) Page 7, at the end of line 3, add the following new sentence: "The person or entity shall also make the completed forms described in this subsection available to officials of the Department of Justice, the Civil Rights Commission, and the Equal Employment Opportunity Commission".

Page 7, line 21, before the comma insert the following: "and determining whether discrimination because of race or national origin has occurred".

—(3) Page 9, line 21, insert "either" after "Attorney General".

Page 9, line 24, insert before the comma the following "or has reason to believe that a person or entity is engaged in a pattern or practice of employment, recruitment, or referral in violation of subsection (a)(1)(B)".

Page 10, strike out lines 16 through 20 and insert in lieu thereof the following:

"(B) In the case of a person or entity which has previously been cited under subparagraph (A), which is determined to have violated subsection (a)(1)(B), and which—

"(i) has not previously been subject to a civil penalty under this subparagraph, the person or entity shall be subject to a civil penalty of $500 for each individual with respect to whom such violation occurred;

"(ii) has previously been subject to a civil penalty under this subparagraph, the person or entity shall be subject to a civil penalty of $1,000 for each individual with respect to whom such violation occurred; and

"(iii) has previously been subject to a civil penalty under this subparagraph in more than one instance, the person or entity shall be subject to a civil penalty of $1,500 for each individual with respect to whom such violation occurred.

—(4) Page 12, after line 23, insert the following new subsection:

"(e)(1) An individual alleging that a person or entity has denied the individual employment, or recruitment or referral for a fee for employment, in the United States because of the failure of the person or entity in good faith to meet the require-

ments of subsection (b) by failing to accept documentation tendered by the individual, is entitled to a hearing before an administrative law judge, in which the person or entity is entitled to notice and opportunity to appear and contest the allegations.

"(2) If the administrative law judge determines that the individual tendered documentation that, on its face, appears to be genuine and the person or entity had not acted in good faith in failing to accept documentation tendered in order to comply with the requirements to subsection (b), the judge may cause to be served on the person or entity an order to take such affirmative action, including the payment of back pay and the employment of the individual, as will place the individual in the same position as if the requirements of subsection (b) had been met in a timely manner. Such affirmative action shall not exceed the actual damages incurred as a result of the failure to meet such requirements, and the amount of any monetary damages so recovered shall be set off against any recovery under any other employment discrimination law arising out of such failure to meet such requirements.

"(3)(A) The hearing shall be conducted in accordance with the requirements of section 554 of title 5, United States Code and rules of the United States Immigration Board established under section 107. A party to the hearing may appeal an adverse determination to the United States Immigration Board in accordance with section 107 and, if such a timely appeal is taken, the order of the administrative law judge shall not become final until the Board has rendered a decision on the appeal.

"(B) A person or entity adversely affected by the determination after a hearing may, within 60 days after the date the final order is issued, fule a petition n the Court of Appeals for the appropriate circuit for review of the order.

"(C) The individual may file suit to enforce the order of an judge under this subsection in the United States district court for the district in which the person or entity resides or in which the event on which the order is based occurred. In such a suit, the suit shall be determined solely upon the administrative record upon which the order was made and the administrative law judge's findings of fact, if supported by substantial evidence on the records considered as a whole, shall be conclusive.".

Page 12, line 24, strike out "(e)" and insert in lieu thereof "(f)".

Page 13, lines 6 and 10, strike out "(f)" and "(g)(1)", respectively, and insert in lieu thereof "(g)" and "(h)(1)", respectively.

—(5) Page 27, line 22, insert "and the making of other orders" after "civil penalties".

—(6) Page 59, strike out line 8 and all that follows through page 67, line 11, and insert in lieu thereof the following:

H-2 WORKERS

SEC. 211. (a) Paragraph (15)(H) of section 101(a) (8 U.S.C. 1101(a)) is amended by inserting "(a) in agricultural labor or services included within the provisions of section 3(f) of the Fair Labor Standards Act of 1938 (29 U.S.C. 203(f)) or section 3121(g) of the Internal Revenue Code of 1954, or (b) in any other labor or services" after "temporary services or labor".

(b) Section 214 (8 U.S.C. 1184) is amended—

(1) by adding at the end of subsection (a) the following new sentences: "An alien may not be admitted to the United States as a nonimmigrant—

"(1) under section 101(a)(15)(H)(ii) for an aggregate period longer than eight months in any calendar year, except in the case of agricultural labor or services which the Secretary of Labor, before the date of the enactment of the Immigration Reform and Control Act of 1982, has recognized require a longer period;

"(2) under section 101(a)(15)(H)(ii)(a) unless the conditions described in subsection (c)(2)(B) have been met with respect to the employment of the alien; or

"(3) under section 101(a)(15)(H)(ii) if the alien was admitted to the United States as such a nonimmigrant within the previous five-year period and the alien during that period violated a term or condition of such previous admission.

The Attorney General shall provide for such endorsement of entry and exit documents of nonimmigrants described in section 101(a)(15)(H)(ii) as may be necessary to carry out this section and to provide notice for purposes of section 274A.",

(2) by inserting "(1)" after "(c)" in subsection (c), and

(3) by adding at the end of subsection (c)(1), as so redesignated, the following: "For purposes of this paragraph the term 'appropriate agencies of Government' means the Department of Labor.

"(2)(A)(i) A petition to import an alien as a nonimmigrant under section 101(a)(15)(H)(ii) may not be approved by the Attorney General unless the petitioner has applied to the Secretary of Labor for a certification that—

"(I) there are not sufficient qualified workers available in the United States to perform the labor or services involved in the petition, and

"(II) the employment of the alien in such labor or services will not adversely affect the wages and working conditions of workers in the United States similarly employed, and such certification has been issued.

"(ii) After the Attorney General has approved petitions in a fiscal year for a number of nonimmigrant workers classified under section 101(a)(15)(H)(ii) equal to the number of such workers for whom petitions were approved in fiscal year 1982, the Attorney General may not approve any additional such petitions for such workers in the fiscal year unless the Secretary of Labor has certified in writing to the Attorney General and to the Congress that there are sufficient funds and personnel available to adequately enforce the provisions of this subsection.

"(iii) The Secretary of Labor shall require by regulation, as a condition of issuing the certification, the payment of a fee to recover the reasonable costs of processing applications for certification. Such fees and all penalties collected pursuant to this subsection shall be applied toward reimbursement of the costs of processing applications for certifications under this subsection, of making determinations of violations of this subsection, and of assessing and collecting such penalties.

"(B) The Secretary of Labor shall ensure that the following conditions are met with respect to employment of a nonimmigrant worker under section 101(a)(15)(H)(ii)(a) and eligible individuals in the job opportunity for which a certification under subparagraph (A) is sought:

"(i) The employer will provide adequate and safe housing without charge to the worker.

"(ii) If the employment is not covered by State workers' compensation law, the employer will provide, at no cost to the worker, insurance covering injury and disease arising out of and in the course of the worker's employment which will provide benefits at least equal to those provided under the State workers' compensation law for comparable employment.

"(iii) The employer will provide, without cost to the worker, or reimburse the worker for the cost of all tools, supplies, and equipment required for the worker to perform the duties assigned.

"(iv) The employer will provide three meals a day or, where under prevailing practice or long-standing arrangement at the establishment workers prepare their meals, will furnish free, convenient, and safe cooking and kitchen facilities. Where the employer provides such meals, the job offer must state the reasonable cost to the worker of such meals.

"(v)(I) The employer will provide or pay for transportation and daily subsistence (consistent with clause (iv)) from the place from which the worker, without intervening employment, will come to work for the employer, to the place of employment.

"(II) The employer will provide safe and adequate transportation between the worker's living quarters and the employer's work site without cost to the worker.

"(vi) The employer guarantees to offer the worker employment for at least three-fourths of the workdays of the total period during which the work contract and all extensions thereof are in effect.

"(vii) The employer will keep accurate and adequate records with respect to the worker's earnings.

"(viii) The employer will furnish to the worker at or before each payday written statements including information on the worker's wages and deductions taken from wages.

"(ix)(I) The employer must pay a wage rate which will not adversely affect the wages and working conditions of similarly employed eligible individuals.

"(II) The employer must not discriminate in the wage rate paid between United States and foreign workers who are engaged in the same tasks.

"(III) If the worker will be paid on a piece rate basis, the price rate will be designed to produce average hourly earnings at least equal to the wage rate described in subclause (I) and will be based on a schedule, established and periodically published by the Secretary of Labor, containing the normal hourly piece rate of production of an average United States worker employed in the field of production of agricultural labor or services concerned.

"(x) The employer must provide for payment of wages not less frequently than biweekly or at such more frequent intervals as may be the prevailing practice in the employment area.

"(xi) If the cost of such transportation and subsistence described in clause (v)(I) is deducted from the wages of a worker, the worker shall be reimbursed the amount so deducted upon the worker's completion of 50 percent of the worker's contract period.

"(xii) The employer must provide the worker with a copy of the work contract between the employer and the employee, which contract shall contain all of the information pertaining to the requirements set forth in regulations issued under this paragraph.

In addition, the Secretary of Labor shall ensure that the employer shall pay each

nonimmigrant worker under section 101(a)(15)(H)(ii)(a), at the end of the contract period, an additional amount equal to the amount of taxes that the employer would have paid under the Federal Insurance Contributions Act and under Federal Unemployment Tax Act with respect to the employment of that worker if such employment were included in the definition of employment for purposes of the imposition of such taxes.

"(C)(i) The Secretary of Labor may not issue a certification under subparagraph (A) if a strike or other labor dispute involving a work stoppage or layoff of employees is in progress in the occupation and at the place the alien is to be employed. If, after such a certification is issued and during the period of the certification, such a strike or other labor dispute occurs, the certification shall be automatially suspended while such strike or labor dispute is in process.

"(ii) The Secretary of Labor may not issue a certification under subparagraph (A) with respect to an employer if the Secretary of Labor has determined, after notice and opportunity for a hearing, that the employer has not complied with the terms of a labor certification, or if the Secretary has assessed a civil penalty for failure to comply with such a term, that the employer has failed to pay the penalty. No employer may be denied certification under this clause for more than three years for any violation described in such a clause.

"(3)(A) In the case of an application for a labor certification for a nonimmigrant described in section 101(a)(15)(H)(ii)(a)—

"(i) the Secretary of Labor shall require that the application be filed at least 80 days before the first date the employer requires the labor or services of the alien;

"(ii) the employer shall be notified in writing promptly after the date of filing if the application does not meet the standards (other than that described in paragraph (2)(A)(i)(I)) for approval and if it does not, such notice shall include the reasons therefor and permit the employer an opportunity to resubmit promptly a modified application for approval; and

"(iii) the Secretary of Labor shall make, not later than 20 days before the date such labor or services are first required to be performed, the certification described in paragraph (2)(A)(i) if the employer has complied with criteria for certification, including criteria for a recruitment period of at least 60 days for eligible individuals as prescribed by the Secretary, and if the employer does not actually have, or has not been provided with referrals of, qualified eligible individuals who have indicated their availability to perform such labor or services on the terms and conditions of a job offer which meets the requirements of the Secretary, except that the terms of such a labor certification remain effective only if the employer continues to accept for employment, until 50 percent of the period of the work contract for which the certification was issued has elapsed, qualified eligible individuals who apply or are referred to the employer.

The failure to provide timely notice under clause (ii) does not preclude denial of an applications based on a standard described in that clause.

"(B) A petition to import an alien as an nonimmigrant described in section 101(a)(15)(H)(ii)(a), and an application for a labor certification with respect to such an alien, may be filed by an association representing agricultural producers which use agricultural labor or services. The filing of such a petition or application on a member's or user's behalf does not relieve the member or user of any liability under this subsection.

"(C)(i) The Secretary of Labor shall provide for an expedited procedure for the review of a denial of certification under paragraph (2)(A)(i).

"(ii) The Secretary of Labor shall expeditiously, but in no case later than 72 hours after the time a new determination is requested, make a new determination on the request for certification in the case of importing a nonimmigrant described in section 101(a)(15)(H)(ii)(a) if qualified eligible individuals are not actually available at the time such labor or services are required and a certification was denied in whole or in part because of the availability of qualified eligible individuals. If the employer asserts that any eligible individuals who have been referred are not qualified or available, the burden of proof is on the employer to establish that the individuals referred are not actually available or are not qualified because of employment-related reasons as shown by their job performance. In determining whether or not an individual referred is qualified, the individual's initial level of proficiency or productivity shall not be a basis for establishing that the individual is not qualified.

"(D) For purposes of this paragraph, the term 'eligible individual' means, with respect to employment, an individual who is not an unauthorized alien (as defined in section 274(a)(4)) with respect to that employment.

"(4) The Secretary of Labor, in consultation with the Attorney General, shall annually report to the Congress on the certifications provided under this subsection, the impact of aliens admitted pursuant to such certifications on labor conditions in the United States, and on compliance of employers and nonimmigrants with the terms and conditions of such nonimmigrants' admission to the United States.

"(5) There are authorized to be appropriated for each fiscal year, beginning with fiscal year 1983, $10,000,000 for the purposes (A) of recruiting domestic workers for temporary labor and services which might otherwise be performed by nonimmigrants described in section 101(a)(15)(H)(ii), and (B) of monitoring terms and conditions under which such nonimmigrants (and domestic workers employed by the same employers) are employed in the United States. The Secretary of Labor is authorized to take such actions, including imposing appropriate penalties and seeking appropriate injunctive relief and specific performance of contractual obligations, as may be necessary to assure employer compliance with terms and conditions of employment under this subsection.

"(6) There are authorized to be appropriated for each fiscal year, beginning with fiscal year 1983, such sums as may be necessary for the purpose of enabling the Secretary of Labor to make determinations and certifications under this subsection and under section 212(a)(14).

"(7) Any person aggrieved by a violation of this section or any regulation under this section with respect to aliens classified as nonimmigrant workers under section 101(a)(15)(H)(ii) may file suit in any district court of the United States having jurisdiction of the parties, without respect to the amount in controversy and without regard to the citizenship of the parties and without regard to exhaustion of any alternative administrative remedies.".

(c) The amendments made by this section apply to petitions and applications filed under section 214(c) of the Immigration and Nationality Act on or after the first day of the seventh month beginning after the date of the enactment of this Act (hereinafter in this section referred to as the "effective date").

(d) The Secretary of Labor, in consultation with the Attorney General, shall issue regulations implementing the amendments made by this section. Notwithstanding any other provision of law, final regulations implementing the amendments made by this section shall first be issued, on an interim or other basis, not later than the effective date.

(e) The Secretary of Labor, in consultation with the Attorney General, shall report to the Congress not later than 18 months after the effective date on recommendations for improvement in the temporary alien worker program amended by this section, including recommendations—

(1) improving the timeliness of decisions regarding admission of temporary foreign workers under the program,

(2) removing any current economic disincentives to hiring United States citizens or permanent resident aliens where temporary foreign workers have been requested, and

(3) improving the cooperation among government agencies, employers, employer associations, workers, unions, and other worker associations to end the dependence of any industry on a constant supply of temporary foreign workers.

(f) It is the sense of Congress that the President should establish an advisory commission which shall consult with the Government of Mexico and advise the Attorney General regarding the operation of the alien temporary worker program established under section 214(c) of the Immigration and Nationality Act.

—(7) Page 68, beginning on line 15, strike out "in a natural science, mathematics, computer science, or an engineering field".

—(8) Page 92, line 9, strike out "(3)(B)" and insert in lieu thereof "(3)".

Page 92, amend lines 10 through 15 to read as follows:

(2) The definitions and provisions of titles I through IV of Refugee Education Assistance Act of 1980 shall apply to payments under this subsection in the same manner as they apply to grants and payments under those titles, except that, in applying this paragraph, any reference in such titles to an "eligible participant" shall be deemed to be a reference to an "eligible legalized alien".

Page 92, strike out lines 16 through 21.

Page 92, line 22, strike out "(B) The" and insert in lieu thereof "(3) For purposes of this subsection, the".

EXTENSIONS OF REMARKS

ADDRESS BY ROBERT L. HARDESTY, CHAIRMAN OF THE BOARD OF GOVERNORS, U.S. POSTAL SERVICE

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. DERWINSKI. Mr. Speaker, I insert for the Members' attention an address by Robert L. Hardesty, Chairman of the Board of Governors of the U.S. Postal Service. His speech was delivered before the National Association of Postmasters at their annual convention held this year in Biloxi, Miss. Mr. Hardesty defends the continuation of the private express statutes which grant the Postal Service a partial monopoly over the delivery of letter mail and assures the American people of mail delivery throughout the Nation at uniform rates. As a member of the House Post Office and Civil Service Committee, I believe that Mr. Hardesty's remarks are worth pondering:

I bring you greetings from the Board of Governors of the United States Postal Service.

I am proud to be associated with you as we face the challenges and opportunities of the 1980's. To meet those challenges and make the most of those opportunities, the Postal Service, as an institution, must be strong and healthy.

Today I would like to talk with you about a threat to the strength and health of the Postal Service—a threat that could subvert its fundamental mission to serve all Americans. I refer to the current round of proposals to abolish the private express statutes. As you know, these statutes grant the Postal Service a partial monopoly over the delivery of letter mail, to assure the American people of mail delivery throughout the Nation at uniform rates.

A great debate is beginning in America about the future of these private express laws. This debate is taking place in the Congress, in the Executive Branch, among mailing groups, in the press, on university campuses. The debate is one the Postal Service must join with deadly earnest. As the key officals on the front line of the Postal Service, you must bring home to every community in America the significance of the postal monopoly to our citizens—and the frightening ramifications of eliminating it.

In a 1977 report, the Antitrust Division of the Department of Justice claimed that the private express statutes could no longer be justified and that they should be repealed "absent very compelling public policy reasons."

In 1981, the Heritage Foundation stated:

"The postal monopoly is based upon 19th Century concepts which are almost completely inappropriate to today's methods of communication. The postal monopoly * * * should probably be abolished entirely. * * * The long term future of the Postal Service should be reexamined. In a competitive age in which the telephone, not the post, provides essential communications, it is unclear why there should be a publicly owned and supported national document delivery company."

A few weeks ago, in testimony before the Joint Economic Committee of the Congress, James Miller, the Chairman of the Federal Trade Commission, challenged the Postal Service to demonstrate that it still deserves the postal monopoly.

I am here today to accept that challenge.

After years of association with the Postal Service—both before and after postal reorganization in 1971—it is my firm conviction that the private express statutes are essential to the public interest. Those statutes are critical if the Postal Service is to continue to provide universal letter delivery at uniform rates. As William Ford, the Chairman of the House Post Office and Civil Service Committee, has stated, the private express statutes are "the financial underpinning (that the Postal Service) needs to provide reliable service at reasonable rates to every corner of the nation."

Now, let's understand this:

The private express statutes do not exist to protect the Postal Service. They exist to protect the mailing public. Their abolition would be costly, chaotic and corrosive: costly to our taxpayers, chaotic to our systems of commerce and communications, and corrosive to the fabric of our democracy.

The Postal Service monopoly applies only to letter mail. In addition, traditional exemptions from the statutes permit a letter to be sent outside the Postal Service, if the sender uses his own carriers or if the carrier receives no compensation. And the Postal Service itself has suspended the statutes in particular instances. For example, time-sensitive mail may be carried outside the Postal Service.

The private express laws are an important part of our nation's history. They have existed in one form or another since the beginning of the American postal system in 1775. The Articles of Confederation expressly granted the Government a monopoly over the delivery of letters. Article 9 provided that:

"The United States in Congress assembled shall * * * have the sole and exclusive right and power of * * * establishing and regulating post-offices from one State to another, throughout all the United States, and exacting such postage on the papers passing thro' the same as may be requisite to defray the expenses of the said office."

The authority of the Congress over the provision of postal services was preserved in Article I of the Constitution, which provided that "The Congress shall have Power * * * To establish Post Offices and post Roads."

Our first national leaders recognized the importance of this expansion and the monopoly that made it possible. George Washington advocated expansion of the postal network as a means of increasing the bond between the frontier settlers and the East. "These settlers," he said, "are on a pivot and the touch of a feather would turn them away * * * Let us bind these people to us with a chain that can never be broken." The Postal Service provided strong links for that chain. And the expansion of the Postal Service to the frontiers of the South and West was funded largely with mail revenues derived from the Eastern cities.

These mail revenues also subsidized certain services critical to the development and preservation of our democracy. To assist the flow of information from members of Congress to the citizens they represented, these revenues subsidized the free delivery of franked correspondence to and from Federal officeholders.

To encourage the publication of local newspapers and help assure the vitality of a free press, these revenues made possible the free delivery of newspapers and news pamphlets within each county in America.

By the 1820's, as volume grew, private express companies began circumventing the rather loose postal monopoly laws then in existence. By the early 1840's, up to half of postal volume—undoubtedly the most profitable half—was being carried outside the postal system. Postal deficits grew so large that in 1845 the Congress revised the law to tighten the postal monopoly, and lowered postage rates. In passing the bill, the Congress indicated that the Government should provide service to all areas, even though such service might not be self-supporting. Loss from rural service were to be offset by revenues from more populous areas.

The Congress established a uniform rate for nationwide service. New services were introduced, such as free city delivery in 1863, and free rural delivery in 1896. These services, made possible by the postal monopoly, permitted the development of the mail order industry, which helped bring an ever increasing variety of consumer goods to rural America.

The history of our nation is marked by a series of very pragmatic contracts between the federal government and the American people, to bolster our national strength and promote the public welfare. The private express statutes are one of the most successful of these historic contracts. We, the people, agreed to give up a small measure of our individual commercial freedom to secure for ourselves and our country the far greater benefit of nationwide mail service, at uniform rates. If we now default on this historic contract, a small number of businesses might well profit, but the American people will surely lose.

The Postal Service is exactly what the word says—a service—not just a business to be dominated by the desire to take home a profit. Certainly, a private business can make a profit by delivering some mail at a lower price in certain easily accessible, densely populated areas. But the consequences for nationwide postal delivery would be disastrous. The universal postal system as we know it today would be destroyed.

Scores of private postal operators would spring up in populated areas to offer delivery services for local mail. As smart businessmen, these operators would limit themselves to high-volume, low-cost areas, like Wall Street, and similar downtown business districts. They simply would not bother to

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

deliver mail to high-cost areas such as rural America, less densely populated suburbs, and poor inner-city neighborhoods. They would also not be likely to offer postal consumers conveniences that we have come to rely on, such as window service. No wonder mail service by some of the private operators would be less expensive—they would only provide low-budget delivery service in high-profit areas.

The consequences for the Postal Service would be ominous. This "cream-skimming," as it is called, would take a considerable volume of mail away from the Postal Service. The cost of providing service to rural communities, center-city neighborhoods, and other high-cost areas would skyrocket due to the loss of the urban business volume. The Postal Service would either have to raise its rates dramatically, or more likely, look to the Congress for the lost revenue. The mailers or the taxpayers would be left to bear these costs. If the postal monopoly were eliminated today, and the taxpayers subsidized delivery in unprofitable areas, the cost of delivering mail to those areas would add $100 billion to the federal deficit by the mid-1990's.

But if the consequences for the Postal Service would be ominous, the consequences for the American consumer would be even worse. We would have a balkanized postal service—with many delivery systems and no uniformity. In addition to First and Second Class mail, we would have First and Second Class communities.

Who accepts the ultimate responsibility for the many services the public has come to expect?

For forwarding the mail when it has to go to another part of the country?

For protecting the privacy of the mail?

For protecting the public against fraud and false advertising?

For handling the huge volumes of foreign mail?

For assuring uniformity of service?

To force the American people to depend on the uncertain services of private carriers is to ask them to play russian roulette with their personal correspondence, their bills, and their financial transactions.

It also imposes upon them a crazy quilt system of rates that a genius couldn't keep in his head. If you think that the public has trouble with parcel post rates, just let people try to figure the cost of mailing a letter from New York to Louisville to a rural route outside of Paducah, Kentucky—via three different carriers, or two carriers plus the Postal Service.

Having a nationwide system is a clear benefit to the American public and to American business. It justifies a uniform rate for a First Class stamp, even if every mailer does not at all times take advantage of the nationwide feature of the system. In putting a First Class stamp on his letter, a mailer in New York City or Biloxi, Mississippi, or Honolulu, Hawaii, can reach anyone in the fifty states from the local mailbox on the nearby street corner. In a world without the private express statutes, the Postal Service simply could not offer such service to everyone at a relatively low uniform price.

Abolition of the private express statutes would have other damaging consequences. The Postal Service's nationwide network would be curtailed, if not abolished. The Federal Government would lose the one contact that most Americans have with the Government on a daily basis. There are over 30,000 post offices in this country, and the Postal Service, through its network of carriers, reaches every point in this land.

Without its nationwide reach, the Postal Service could not provide the Federal Government with such special assistance as selective service registration, or help the F.B.I. and other law enforcement agencies. Programs like "Carrier Alert," where postal carriers check daily on the elderly and handicapped, could not continue. This program has already saved dozens of lives because dedicated mail carriers noticed something wrong at the home of an elderly or handicapped citizen. I doubt whether many private companies, eager to earn a profit on their delivery service, would be interested in conducting such a program.

Other services Americans now take for granted would be likely casualties of a repeal of the private express statutes. The price of the First Class stamp covers the cost of forwarding mail in case the addressee has moved. The letter follows the individual until it reaches him. This service is possible under a universal system that can keep track of millions of Americans who change their residences annually. In a balkanized postal world it is not clear who would be responsible for forwarding mail or who would take mail from one local delivery system to another—and at what surcharge.

And how would international mail be handled? At a time of increasing interdependence, with international communications growing rapidly, predictable and regular communications among nations are essential. How would foreign postal systems deal with a variety of private postal operations in large cities?

And what about the privacy of mail without a postal monopoly? Today, when someone deposits a check, or letter, or contract in the mail, he is confident that it will not be subject to prying eyes while in the postal system. Indeed, by law, a search warrant issued by a Federal judge is generally required before a First Class letter may be opened. As a result, valuable documents and merchandise are placed in the postal system daily without a second thought that they will be open or stolen in transit. Simply put, the mail is safe, and it is private. In the brave new world of several postal systems, I would be less confident about the security and sanctity of any communication that I might send.

Other services would be in jeopardy. At present, Postal Inspectors help guard the public against mail fraud and false advertising. These frauds, often directed at the naive and the elderly, frequently involve sophisticated nationwide schemes. Enforcement of mail fraud and false representation laws would be virtually impossible if the unscrupulous could operate among many private mail services. Who would enforce these laws? The private companies would certainly not be interested in maintaining an investigative force that would lower profits. And what authority would any private investigative group have? To whom would any such private investigators be answerable?

It is said that abolition of the private express statutes will lead to competition in the delivery of mail, and that this will hold down postal rates. Competition, however, already exists and is having precisely that effect. The Postal Service is but one supplier of communication services in the fiercely competitive communications market. In that market, the Postal Service's share of all communications has declined from 70% in 1900 to less than 20% today. Of course, the telephone is our greatest competitor, and it is responsible in large part for our declining share of the communications market. On the horizon, an even more formidable competitor looms—electronic communications. As electronic mail and electronic fund transfers become more common and their costs decline, they will compete for a substantial portion of the business transaction service that we now provide.

These communications alternatives serve to hold down postal prices. They require that the Postal Service be as efficient as possible in providing its universal delivery. For if the Postal Service is to compete with electronic communication services, it must be able to provide mailers with a nationwide network that can reach all the people at the lowest price possible.

But we must take our message to the American people. We must remind each citizen what a universal postal system means to him and to her. That is why I have come to speak to you today—to urge you to take this message back to every community and every citizen in America.

When you return to your home, remind the citizens in the communities you serve what the Postal Service with its universal delivery system means to them.

It means that any American can send a letter to any part of the country no matter how far away, at a uniform rate.

It means that each American gets the same high delivery standards—whether poor or old, a wealthy businessman or a storeroom clerk, or whether he lives in Biloxi, Mississippi, Harlem in New York City, or at an Alaskan outpost.

It means that each American can send a private letter, knowing that privacy will be protected as a sacred right.

It means that wherever you live in this nation, there is a mail carrier who will deliver your letters to you.

It means that when you move to another street, or another city or another state, your important mail will follow you.

It means that you can trace a lost social security check, no matter where in the country you live.

If you remind your friends and customers what a universal postal system means to each of them, they will stand with you and with the Board of Governors of the U.S. Postal Service. They will join us in the fight to preserve the postal service that has meant so much to the commercial development of this great nation and the individual liberty of its citizens.●

THE RONALD McDONALD HOUSE OF NORTHWEST OHIO

HON. ED WEBER

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. WEBER of Ohio. Mr. Speaker, I want to bring to the attention of the House the grand opening today in Toledo of a novel and needed facility.

The Ronald McDonald House of Northwest Ohio—named for the clown figure made popular by McDonald's—opens at 3883 Monroe Street after nearly 2 years of work. It is centrally located to all nine hospitals in Toledo.

This facility is the 44th in the United States and the fifth in the State of Ohio. It will serve as a home away from home for parents and families of youngsters receiving hospital treatment for cancer and other serious illnesses.

Parents who accompany their children to hospitals want to remain close to their children. For them, motel rooms are both expensive and lonely.

The Ronald McDonald House, a renovated building with play areas, living rooms, and a common kitchen, will house up to 14 families at a time in pleasant, private bedrooms with private baths. Only small donations will be accepted from those able to pay and more than 700 families are expected to be served by the house in the coming year.

This worthwhile effort by Home Away from Home, Inc., comprised of doctors and hospital administrators, parents, McDonald's owner/operators, and other concerned individuals, well deserves the praise of the House.●

HON. JACK BRINKLEY

HON. F. JAMES SENSENBRENNER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. SENSENBRENNER. Mr. Speaker, I wish to take this opportunity to commend Congressman JACK BRINKELY, who has served the House of Representatives, and the Third District of Georgia with distinction since 1966.

Congressman BRINKLEY, who is the dean of the Georgia congressional delegation, has served the second longest of any representative from the Third District of Georgia since the Civil War.

In the House of Representatives, Congressman BRINKLEY is a member of the House Armed Services Committee and chairman of the Military Installations and Facilities Subcommittee. He also served as chairman of the Veterans' Housing Subcommittee and the Special Subcommittee on Civil Defense in previous Congresses. He has also served the House as the president of the House Prayer Breakfast Group from 1979 to 1980, and as Democratic zone whip for region VI for Georgia and South Carolina during the 96th Congress. Representative BRINKLEY's voting record for his tenure is well over 96 percent, and was an impressive 99.2 percent during 1981.

Congressman BRINKLEY has a distinguished nonpublic life as well. He is an honors graduate of Young Harris College, and received his law degree from the University of Georgia Law School. Representative BRINKLEY served as a USAF pilot for 5 years during the Korean war. He is married and has two sons, both hailing from Representative BRINKLEY's hometown of Columbus.

The devotion of Congressman BRINKLEY to his constituents and district is impressive. As mentioned, he has devoted his efforts in the House to military affairs, an important issue in his district. The Third District of Georgia contains both Robins Air Force Base and Fort Benning. Congressman BRINKLEY has served his district in the tradition of Georgia's legendary Armed Services Committee chairman—Carl Vinson. Representative BRINKLEY even finds time to occasionally show constitutents around the Capitol.

I join with the other Members of the House in paying tribute to this outstanding member of the Georgia delegation.●

TRIBUTE TO THE HONORABLE JACK BRINKLEY

HON. MARVIN LEATH

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. LEATH of Texas. Mr. Speaker, today, we have gathered to honor a colleague who has honored our institution for many years. When JACK BRINKLEY announced his intention to retire, many of his colleagues and constituents voiced the same reaction: What will we do without him?

Since 1967, JACK has been a true representative of his people and an esteemed Member of Congress. His ethics and dignity are hallmarks of his service. As one of his constituents told me, JACK is not interested in publicity or fame—he just does his job and goes home. There has never been any fanfare associated with JACK BRINKLEY. His style is quiet, and when he speaks, we all listen. We can depend on his judgment, expertise, and integrity. Those few of us who have served with him on both the Armed Services Committee and the Veterans' Affairs Committee have been doubly blessed and doubly graced. We have had more opportunities than most Members to work with JACK and learn from him. We can share with the people of the Third Congressional District of Georgia great pride and affection for this man.

Our best wishes go with you, JACK. Please do not forget us when you are back in the Georgia sunshine. You hold a special place in our hearts and minds and we will always be grateful for the good years we served together.●

TRIBUTE TO GASTON FREDERICK "COUNTRY" LEWIS

HON. CLARENCE J. BROWN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. BROWN of Ohio. Mr. Speaker, if our children are the hope of our Nation's future, and indeed they are, then surely the men and women who mold their characters are among our most precious resources.

This past Friday, such a man, Gaston Frederick "Country" Lewis, was among those honored at the Pigskin Club Banquet here in Washington.

Because the Lewises and the Browns have been friends for a number of years, I was pleased to have the opportunity to attend a reception in his honor the previous evening. Watching so many men and women pay tribute to this outstanding coach, it occurred to me that we seldom understand just how much impact one life can have.

Country's influence, in building the character of countless young men, spans across four decades and across an entire continent. A number of the men Country has coached over the years were on hand to pay tribute to him last week.

Washingtonian Frank Bolden, a 1939 graduate of Wilberforce, served as director of health, physical education, athletics and safety in the Washington, D.C. Public Schools. Another Washington native, Francho Gray, a 1958 Central State graduate, is a retired policeman and now a White House clerk.

Earl Duvall, who hails from New York City, a 1969 Central State graduate, is an assistant professor of physical education and swimming coach at Howard University. He was there because he had received his instruction from Dr. Vivian Lewis, Country's wife, who is an instructor in physical education at Central State.

No one knows how many lives have been enriched by these three men whose lives were enriched by the Lewises.

Walter G. Sellars, who serves on the Xenia School Board, as president of the Ohio School Board Association and as director of the Central State University Alumni Association, was one of Country's quarterbacks.

Lionel H. Newson, president of Central State University, illustrated the extent of a college coach's influence by wagering that no one could remember the names of the men who served as president of Ohio State University during Woody Hayes' tenure or the names of the men who served as president of Notre Dame in Knute Rockne's day.

Perhaps, he suggested, this is because the coach must prove himself each Saturday.

As a father and as one of Country's longtime friends, I am proud to know him and am delighted that the Pigskin Club chose to confer this well deserved recognition on him.

I would like to insert the Pigskin Club's citation at this point in the RECORD:

Gaston Frederick "Country" Lewis, born in Clinton County, Ohio, attended the elementary and secondary schools of Greene County, Ohio.

A graduate of Wilberforce University in 1926, with a B.S. in Education, he received an M.S. in Health, Physical Education and Recreation from the Ohio State University in 1938.

Upon graduation from Wilberforce, Lewis became Head Football, Basketball and Track Coach at Alabama State Teachers College, in Montgomery, Alabama, serving in this capacity from 1926 until 1934. In 1934, Lewis returned to Wilberforce as head football and basketball coach. With the exception of two years, he served as head coach in football at both Wilberforce and Central State (Ohio) until 1957. Coach Lewis also served as head basketball and track coach at both of the above institutions.

Lewis assumed the Athletic Directorship at Central State University in 1957, serving in this position until 1965. As Athletic Director, Lewis was responsible for greatly expanding the athletic program and facilities at Central State University.

"Country's" coaching career spanned four decades. During this time he compiled 151 wins, 70 losses and 19 ties in football. In basketball, his teams won several midwestern conference titles and continuously played one of the best brands of basketball games in the late twenties and early thirties, at a time when it was unheard of for most black college squads. His football teams both at Wilberforce and at Central State played in bowl games in New York, Chicago and San Franscisco. Among the more famous of these games was the annual Wilberforce-Tuskegee Football Game in Chicago's Soldier's Field. In his playing days, Lewis was a member of the celebrated "Green Wave" football and basketball teams of the early twenties.

Lewis has also served on the Olympic Track and Field Committee and as manager of the Track and Field Committee for the Pan American Games held in Winnipeg, Canada. He is a former member of the National Collegiate Athletic Association Track and Field Rules Committee, a consultant to the Area High School Football Coaches Association, a member of the Helms Athletic Directors Hall of Fame, and the United States Track Association.

Coach Lewis is married to Vivian F. Lewis, former Director of the Department of Health and Physical Education at Central State University. They have one son, Fred G. Lewis, and four grandchildren.●

THE RETIREMENT OF CONGRESSMAN ROBERT MOLLOHAN

HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. BENNETT. Mr. Speaker, on the occasion of the retirement of ROBERT MOLLOHAN as a Member of the House of Representatives, I want to express my sense of personal loss that he is leaving the House and my sense that in the many years he has served here he has done a truly outstanding job for the country and for his district and State. The fact that he is going to be succeeded in Congress by his fine young son, I am sure, is a matter of joy to him and his wife. BOB MOLLOHAN has served on the House Armed Services Committee with me for many years, and I have never known a more dedicated American than he. He works vigorously and enthusiastically for a strong national defense for our country and he leaves a great heritage here in the things that he has accomplished, not only in strengthening the overall defenses of our country, but also in seeing to it that the average man who is in the armed services is properly treated and recognized.

We will all deeply miss Congressman BOB MOLLOHAN but he should have no regrets in leaving because he leaves such a fine legacy of good things for our country and for the State which he so ably represented.●

DIPLOMATIC IMMUNITY: ANOTHER ABUSE?

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. BROOMFIELD. Mr. Speaker, I want to share with my colleagues the details of a tragic incident which occurred recently in this city.

On the evening of November 29, 1982, Antonio F. Azerado Da Silveira, Jr., the adopted son of the Brazilian Ambassador to the United States, was asked to leave a bar in downtown Washington. As he was being escorted to the door by the manager, he shouted "I'm with the Mafia," wielded two revolvers, and pulled the trigger of one of the weapons. Fortunately, the weapon misfired. Da Silveira then ran from the bar into an alley while being pursued by the manager and two other employees. After running for a distance, da Silveira turned and fired three shots which struck Ken Skeen on his hand, leg and abdomen. The two other pursuers subdued Da Silveira and recovered two operable handguns. Da Silveira, at first, refused to disclose his identity to the arresting officers. The felony charges filed against him were dropped when diplomatic immunity was invoked. His arrest was officially erased from the books at the local police station. He is now on his way back to Brazil.

I am certain that my colleagues will join me in expressing dismay at this incident. Far too many foreign diplomats in this country are literally getting away with murder in disregarding the laws of this Nation. Diplomatic immunity must not be a cloak for the wholesale and calculated abuse of America's laws. Many diplomats are violating both the spirit and the letter of our laws and are making fools out of all of us in the process. How many of us in this Chamber have read the all-too-frequent reports of diplomats smuggling drugs into America, refusing to pay rent, wrecking apartments, and parking illegally all over the city. Their reckless driving often left their victims either dead or without legal, or financial recourse.

Thankfully, the situation today is far less permissive than it was prior to 1978. In response to past abuses of diplomatic status by the diplomatic corps, this Congress changed America's law in 1978. The law was brought into line with rules spelled out by the Vienna Convention on Diplomatic Relations of 1961. Under the new statute, more than 10,000 diplomatic personnel and their families in the Washington area alone lost some measure of the complete immunity from civil and criminal prosecution they had enjoyed under a 1790 statute. Under the new law, for example, it is legal for an American citizen to file a lawsuit against a diplomat or the lowest ranking employee of an embassy. Foreign diplomats are now required to legally insure their vehicles. This is certainly a major step in the right direction.

This recent incident, however, and others like it, convince me that more work has to be done since diplomats are still regarded as the real abusers of the public repose. Abuses of America's law by the foreign diplomatic community must be stopped. Diplomatic immunity does not give the more than 20,000 diplomats stationed in this area the right to bear arms. American citizens cannot even carry weapons, without special permission, in their own country.

The Vienna Convention carefully stipulates that diplomats are obliged to respect local laws and regulations wherever they may be. There is no excuse for large numbers of diplomats from over 150 different nations to assume that diplomatic immunity gives them the right to brandish deadly weapons for any reason. This gives diplomatic immunity a bad name and attacks the basic concept of diplomacy. I am certain that the many dip-

lomatic personnel in the Washington area are law-abiding guests in our country. The few unfortunate exceptions have given the age-old concept of immunity a bad name. I believe that something must be done to rectify this embarrassing situation.

Today I am introducing legislation expressly forbidding foreign diplomats assigned to this country from carrying weapons of any type without the written permission of our Government. Legislation of this nature is long overdue. I am confident that many of my colleagues share my concern. I will ask for your support in this effort.●

UNITED STATES-SOVIET RELATIONS

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. DERWINSKI. Mr. Speaker, I insert into the RECORD a very thoughtful and timely editorial which appeared in the Noverber 29 Southtown Economist News, serving Cook County, Ill. The editorial analyzes the possible developments in the policy of the Soviet Union toward the United States as a result of accession into power of Yuri Andropov. I wish to include this editorial at this point as I believe it provides a valuable commentary on United States-Soviet relations:

The editorial referred to follows:

[From the Southtown Economist, Nov. 29, 1982]

NEW SOVIET CHIEF UNLIKELY TO ALTER PATH OF NATION

Will the Soviet Union and the United States ever understand each other?

International experts have already begun analyzing what the reign of Yuri V. Andropov will mean to the free world.

Does Andropov like Western music and clothes? Is he, former head of the secret police, really a closet liberal?

Such questions being discussed are nonsense. Countries act out of their historic needs.

Soon after Leonid Brezhnev's death, President Ronald Reagan announced the lifting of the ill-conceived sanctions against the Soviet gas pipeline.

Immediately upon taking office, Reagan implemented his get tough policy against the Soviet Union. It has gotten us nowhere, because in many ways we need the Russians as much as they need us.

Grain embargoes against the Soviet Union are fruitless. While their people may feel the impact of such sanctions until they can buy from Canada or Argentina, it is the farmers here that pay the price in lost sales.

Halting the sale of American equipment to Russia may have delayed the pipeline by a few weeks or months, but ultimately resulted in the loss of thousands of jobs in this country.

In essence, action we take against the Soviet Union appear to have unexpected boomerang effects. So we act out of our historical needs. We are the great agricultural producer and we need to sell grain. The Soviet Union acts the same way.

Much of our animosity against the Soviet Union is the result of Cold War rhetoric. This rhetoric has helped confuse the American public and led to a misunderstanding of the Russian mentality.

For instance, the communist takeover and obsessive behavior toward Germany, Poland, Hungary, Czechoslovakia and other Eastern European nations can never be completely understood in this country.

Russia is a land which has been invaded by enemy armies twice in the 20th Century and many times before that. Germany's brutal attacks against the nation killed millions of people and caused hardships beyond our comprehension.

So now the Soviet Union is determined that it will never again be invaded. It has taken over control of the countries surrounding it to act as a buffer against any such attack.

It does not matter to the Russians that their military might—and nuclear capability—make a war against it literally unthinkable.

This should be understandable to Americans since we have an almost equal defensive capability but are constantly worried about an assault by the Russians. But somehow, neither side allows this logic to penetrate international policy.

Well, some might say, we would never attack the Soviet Union. But we did invade the Soviet Union after World War I following the Russian Revolution. The Russians remember this.

Our fears of each other are so mirror-like that the glare keeps us from seeing the light.

The new fact in the world is that we and the Russians can now drop warheads on each other. Fifteen years ago they could not do that to us and 30 years ago we would not do that to them.

This is a new fact of life, but both sides seem to ignore it and continue to carry on policy as if a slip of state would not lead to mutual destruction.

This new fact is what needs to be put on the bargaining table at the disarmament conferences.

The Russians now have more to fear from the sky than from invading armies crossing Poland. In fact, no invading armies are going to get them across Poland because they have the power to drop from the sky also. But, they still act like the great threat is across land.

And we behave as if it was 1950 and the world jumped when we sneezed. We hope the pipeline nonsense taught us something.

It does not matter what Andropov's clothes closet looks like. Peace can come only by recognition on both sides that the destructive power we both already hold must be placed in check.●

AMERICAN TEENAGERS

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. COLLINS of Texas. Mr. Speaker, in reading the Washington Times, I saw an interesting story from the Associated Press on the commonsense of teenagers. A 13th annual survey of high achievers shows the views of the "Who's Who Among High School Students."

Only 4 percent said they used marihuana compared with 21 percent in 1970. Today 39 percent favored legalized abortion compared with 70 percent in 1970.

Fifty-five percent of the bright youngsters say Ronald Reagan is doing a good or excellent job with the economy. Thirty-three percent in the Associated Press-NBC News poll of American adults gave a favorable rating to President Reagan. This is most encouraging for the future to see that the bright youngsters in high school understand economics better than the average adult.●

HOPE FOR WELFARE FRAUD

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. FLORIO. Mr. Speaker, the issue of welfare fraud is one of continuing grave concern to the Nation's taxpayers who rightfully expect that moneys allocated to those unable to help themselves be spent prudently.

Particularly during this time of budget belt tightening, it is imperative that those who administer the public assistance programs be even more mindful of the need to uncover and prevent abuses.

Just as important is the need to devise new strategies to deal with welfare fraud in a fundamental way. For this reason I was pleased to read the recent series of articles published by the Courier-Post, a newspaper in my district, which explored the welfare fraud problem with a significant degree of depth.

An editorial published by the Courier-Post at the close of the series outlined some innovative ideas that should interest anyone seriously concerned about welfare cheating. I would like to recommend it for reading by my colleagues.

The editorial follows:

EASING INCOME RULES CAN REDUCE WELFARE FRAUD

Welfare has two faces, one bureaucratic, the other human. In six articles published last week, Courier-Post reporter Judy Petsonk examined both of them. She found the former growing more exasperated and the latter growing uglier.

Her research sustains the conclusion, among others, that welfare fraud must be attacked not only by more vigorous monitoring of the system but also by removing from it the economic penalties imposed on welfare recipients who try to improve their circumstances.

We will examine several of Ms. Petsonk's findings, but we turn to welfare fraud first because it is first to leap to mind whenever the "welfare problem" is discussed. Yet fraud is not pervasive, nor is the overtly criminal brand of it the most common. For every sophisticated scheme to file fraudulent claims, establish phony identities and

cash the resultant checks, scores of recipients beat the system for only a few bucks by accepting money from a relative or showing up for a free lunch at a church kitchen.

Illegal? Yes. Scandalous? No more so than the behavior of affluent people who have learned to manipulate an expense account or a tax return to their economic advantage. For the benefit of the middle class, the tax laws draw a distinction between tax avoidance, which is legal, and tax evasion, which is not. To the detriment of the poor, however, the welfare laws are unforgivingly rigid. Every attempt welfare recipients make to get a dollar ahead in the economy outside the welfare system carries an economic penalty inside the system. This situation ignores the one inescapable similarity between rich and poor, that is, that both act in their own economic interest.

In the last 10 years, the cost of living has more than doubled, but the monthly check for a family of four receiving welfare under Aid to Families with Dependent Children rose only 28 percent. The economic pressure on these families has intensified, and the incentive to devise ways to beat the system has increased.

The obvious remedy is to increase the level of aid, which for a family of four in New Jersey totals $414 per month in AFDC and $134 per month in food stamps. But an increase is out of the question because the Reagan administration has proposed that the states take on full responsibility for AFDC in return for the federal government's assuming responsibility for Medicaid. Serious discussion of benefit levels won't even begin until the shift is completed. Even then, states may be unable to come up with larger grants. Gov. Thomas Kean, in fact, specifically ruled out an increase in welfare grants in his budget message for 1983. The governor's position can be justified fiscally. By law, he must eliminate the projected deficit in the state budget. But, because welfare benefits, unlike virtually every other federal income maintenance program, are not indexed to inflation, New Jersey's inaction punishes its poor, including the one in seven of its children dependent on public assistance.

A more subtle remedy, cheaper but perhaps even more volatile politically than increasing welfare benefits, is to remove the penalties welfare recipients pay for outside work. As things stand, an industrious man on municipal welfare might build up a small appliance repair business, only to lose more than he makes if he reports his earnings. As a result, the system either encourages fraud or rewards dependence. It is neither advisable nor politically feasible to revive the complex guaranteed income or negative income tax schemes proposed in the 1960s and '70s, but modest adjustments in welfare regulations would enable recipients to earn outside income, if only enough to close the inflation gap opened in the last 10 years, without losing benefits. The change won't alter welfare's bureaucratic face enough to increase costs significantly, but it will improve its human face by adding a dash of hope.●

THE SCHOOL NURSE

HON. JAMES WEAVER

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. WEAVER. Mr. Speaker, I would like to take a moment to recognize a seldom praised professional: the school nurse. Having raised three daughters, I have been grateful to have trained health professionals available, full time, at their schools. It was always reassuring to know, when I sent my children off in the mornings, that there was someone at school specifically trained to handle health emergencies.

School nurses have increasingly played an active role in fostering better health awareness in our schools. With the persistent problems of improper nutrition and drug abuse, and the increasing sensitivity, in our society, to emotional problems, school nurses have begun to play an ever larger role in advocating healthy lifestyles and instructing our children in good health habits. This, combined with their traditional duties of administering diagnostic tests and assisting in immunization maintenance, has firmly established the school nurse as a vital element in our children's health care.

I would like to personally commend our Nation's school nurses and their organization, the National Association of School Nurses, Inc., for their dedicated work. They deserve our recognition, and your support.●

DAVID A. SCHOONOVER ELECTED NATIONAL SECRETARY-TREASURER OF DELTA NU ALPHA

HON. CLARENCE J. BROWN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. BROWN of Ohio. Mr. Speaker, Delta Nu Alpha (DNA), the national professional transportation fraternity, recently held its annual education conference in Milwaukee.

I am proud to note that one of my constituents, David A. Schoonover of Marion, Ohio, was elected national secretary-treasurer of the organization.

Delta Nu Alpha is an organization of some 10,000 transportation professionals from the United States, Canada, and Mexico, who have for the past 42 years devoted themselves to improving their knowledge and skills in all forms of transportation. The organization and its more than 200 local chapters are also active in community and school educational projects regarding the transportation industry and occupations. They are involved each year in the support of National Transportation Week publicizing transportation's role in commerce and industry and their personal lives. On many of the Nation's campuses, they support college chapters for students training for the transportation industry, and sponsor programs at the K-through-12 level dealing with such topics as modes of transportation and traffic safety.

David Schoonover has been very active in DNA during his membership. He is a member of the Marion, Ohio, Chapter No. 102 of DNA, of which he has served as both president and secretary. During his year as president, the chapter was judged "outstanding chapter of the year."

He also served as regional vice president for the area comprising western and southern Ohio and West Virginia, during which time the region was also named "region of the year." During the past year, he served as national membership chairman. During his term, the organization experienced more than 16 percent membership growth—its largest 1-year increase in the last decade.

He won the national secretary-treasurer post over two other candidates from Boston and Los Angeles. The election took place at the organization's 42nd annual meeting, which followed its recent National Education Conference at Milwaukee.

David Schoonover is employed as the assistant manager of production planning and shipping at Tecumseh Products. He is also chairman of the Marion County Regional Planning Commission and transportation chairman of the Marion Area Chamber of Commerce. He has also served on the Business Technology Advisory Committee of Marion Technical College and on the board of the Marion Cadets Drum and Bugle Corps.

He is also active in PTA and Cub Scout leadership. He resides with his wife, Maria, and his two children at 352 Merchant Avenue, Marion, Ohio.

I congratulate David A. Schoonover on his election as Delta Nu Alpha Secretary-Treasurer. I know that he will continue to serve the fraternity with competence and enthusiasm as he continues in the offices that should culminate in his election as national president in 4 more years.●

SCARCITY OF HOUSING FOR ELDERLY AND LOW-INCOME AMERICANS

HON. WYCHE FOWLER, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. FOWLER. Mr. Speaker, we are all aware of the need to exercise fiscal restraint in making our budget and spending decisions. But we must also be aware of the increasing shortage of housing stock suitable and available for the elderly and other fixed- and low-income citizens.

The administration's plan to replace the section 8 housing program with a voucher system and to drastically reduce funding for the section 202 pro-

gram ignores this desperate need. The critical nature of the housing stock shortage was brought home to me in an eloquent letter from one of my constitutents, and I want to share it with my colleagues in the House.

DEAR MR. FOWLER: I am concerned about the section 202 housing program and section 8 outlined in your spring 1982 newsletter and regret that I have not written sooner.

I am a member of a committee at First Presbyterian Church which, for a year before President Reagan's budget cuts were announced, considered various ways of helping to meet the housing needs of retirees whose apartment buildings are being converted to condominiums. During our studies we learned of various churches that were considering building programs. Unfortunately, when the plans of the present administration were announced, these initiatives were scrapped. Our committee did not yet have a plan, as we hoped to be more creative. Many of us do not like to see retirees segregated from other age groups; yet I am benefiting from section 202 and section 8 and know many persons who would be in desperate situations if it had not been for churches that have built apartment buildings for those of us on limited retirement.

Please, sir, will you do everything possible to continue both of these programs. The plan for issuing certificates or vouchers to those eligible for section 8 would not meet the need. Our committee at First Presbyterian interviewed several prominent real estate brokers and know of the scarcity of apartments that are reasonable. Also, many retirees do not have family members to help with the search. Many apartment managers will not accept retirees.

I am grateful to St. Phillips Cathedral for this lovely place to live. Please help others to have the same privilege.

Sincerely,

MILDRED E. TROTTER.●

THE RETIREMENT OF CONGRESSMAN JACK BRINKLEY

HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. BENNETT. Mr. Speaker, it will be a great loss to Congress and to the country to have JACK BRINKLEY retire from Congress as he is doing but he has earned the retirement that he seeks and it is understandable that he would wish to have more time with his family than his present duties in Congress allow. He has been an outstanding subcommittee chairman of the House Armed Services Committee. It has been a great pleasure to serve with him on that committee and to gain thereby his counsel and advice, and cooperative endeavors for the strengthening of our national defense and our country. It was no surprise to me when I learned he was coming to Congress that he would do an excellent job here because of his background of civic leadership, leadership in the legal profession, and service in the Georgia House or Represenatatives. His distinguished career in Congress is something that leaves everyone a rich legacy from him and all of us here in Congress will miss his warm friendship, cheerful manner, and constructive efforts for our country.●

THE KREMLIN'S WAR CRIMES

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. DERWINSKI. Mr. Speaker, "The Kremlin's War Crimes," is the subject of the lead editorial in today's, December 6, Chicago Tribune. The original outrage against imagined U.S. abuses of international law is not matched by any sign of public indignation against the terrorist crimes of the Soviet Union. One must wonder at the logic of those who have been carried away with emotion dating back to the Vietnam period. I wish to insert this very timely editorial as evidence of the double standard that seems to exist in the world's code of behavior.

The editorial follows:

[From The Chicago Tribune, Dec. 6, 1982]

THE KREMLIN'S WAR CRIMES

It is now certain that the Soviets are using ghoulish chemical agents called mycotoxins to kill Afghans, Laotians and Cambodians. They are doing it directly or through allies working under their supervision, and they are doing it in contravention of international law. This is atrocity; it is war crime. It is the sort of thing for which political leaders have been hanged.

Yet the world has taken little note of the crimes and has had little to say to the criminals. There have been no outraged resolutions of denunciation passed by the UN General Assembly and no protest marches outside Soviet embassies. Powerfully convincing evidence presented by the U.S. State Department has elicited international indifference. Only Canada, Britain and Thailand have protested publicly.

Imagine what would happen if U.S. forces were accused of atrocities a tenth as heinous as the ones the Soviets have committed in Afghanistan and Southeast Asia. The United Nations would go berserk; demonstrators would burn U.S. flags and smash embassy windows; Swedish peace groups would hold a ponderous war crimes trial; Uncle Sam effigies would hang from trees the world over.

The charge against the Kremlin is more than mere conjecture. Numerous accounts from eyewitnesses and survivors have been compiled, and they have been corroborated by such physical evidence as urine and tissue analysis and by information from captured Soviet soldiers in Afghanistan. The State Department has even obtained gas masks bearing traces of mycotoxins, one of them taken from a dead Soviet soldier.

The toxins are delivered by a variety of means, including artillery shells, bombs and spraying from helicopters or armored vehicles. The evidence indicates that at least 10,000 persons have perished in these "yellow rain" attacks, so called because of the yellow cloud that forms when the agent is released.

There is further evidence of still another Soviet agent which has the gruesome effect of softening human tissue and hastening the process of decomposition. It sounds like a kind of chemical neutron bomb that kills and gets rid of the evidence at the same time.

But where is the outrage? Where are the protesters who can rise to such a high state of moral righteousness over U.S. military activity that does not violate international law or abrogate solemn treaties?

Perhaps it is reasonable to expect a double standard to apply because the United States holds itself to a higher code of behavior than the Soviets. Our soldiers are not expected to gas helpless peasants, so America suffers greater criticism (from its own citizens, first of all) than the Soviets might expect.

But the Soviets, too, must be held to some standard. They have signed the treaties and accepted the laws. Yet they, who present themselves as the champions of revolution, use illegal gases against revolutionaries. The worker-peasant state murders workers and peasants and nobody even bothers to remark upon the irony.

What the State Department was presented is not just propaganda—it is an indictment of murderers. The killers must be convicted, at least in the eyes of world public opinion, if they cannot be brought to justice elsewhere.●

FRANK CANETTI, SR., HONORARY MAYOR OF SAN PEDRO, CALIF., 1982

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. ANDERSON. Mr. Speaker, it is with distinct pleasure that I rise and pay tribute to the honorary mayor of San Pedro, Calif., for 1982, the Honorable Frank John Canetti, Sr.

Born in the city which honored him, Frank was educated in the local public schools: The 15th Street School, and Dana Junior High. Upon graduating from San Pedro High School, he entered the U.S. Navy, where he served in the South Pacific. He was then sent to officer candidate school at the University of Redlands, and the University of Southern California. In 1946, he married Barbara Glenn, who would eventually serve as a teacher in the Palos Verdes School District for 20 years, and began to raise their family.

In 1961, he ventured into a successful career as an agent with the Standard Life Insurance Co. He has, since then, opened his own office and has qualified for the Leaders' Club every year, and the industry's Million Dollar Roundtable four times.

Taking an active interest in the growth and development of this three sons, Frank became involved in the Cub Scouts, later the Boy Scouts, and also began coaching and managing youth baseball and football teams. Frank continued his support of local sports programs by becoming president of the Rolling Hills Booster Club,

Palos Verdes Booster Club, and the Miraleste Booster Club—the three separate high schools his sons attended.

Despite the demands of his work, and his involvement with his sons' activities, Frank has managed to devote his time, talents and efforts to the improvement of the San Pedro community. He is presently serving on Councilwoman Flores' Community Affairs Committee and is a member of the San Pedro Chamber of Commerce. As a member of the San Pedro Peninsula Hospital Conches Club, he is a tireless fundraiser for the hospital. Maintaining ties to the fishing industry formed years before while working in his family's grocery business, he is presently on the San Pedro Fishermen's Fiesta Committee. At one time he served as chairman of the committee and was on the executive board which revived the Fishermen's Fiesta, a community event which had been discontinued for a number of years.

As if these activities were not enough to utilize his time, Frank is currently a member of the San Pedro Sea Lions, the Elks, and the Rolling Hills Covenant Church.

Frank's involvement in such a wide spectrum of activities has benefited many people in the San Pedro community. And, although his honorary title will be bestowed in 1983 upon another individual, we are fortunate that we will continue to benefit from his active community participation.

My wife, Lee, joins me in wishing Frank Canetti, Sr., his wife, Barbara, and their three sons. Frank, Jr., Christopher, and Bruce, continued happiness and the very best of all things in the future.●

REPORT ON OPTIONS FOR SOCIAL SECURITY REFORM MERITS CLOSE ATTENTION

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. BIAGGI. Mr. Speaker, I wish to bring to the attention of my colleagues a timely and thought-provoking report issued by the Community Council of Greater New York's Ad Hoc Committee on Social Security.

The ad hoc committee advances a number of viable options for reform, both for the short as well as long-term interest of the system. I believe that this report persuasively presents the case that reform can be achieved without cutting benefits to current beneficiaries. The report recommends a combination of better management of trust fund dollars, extension of interfund borrowing and several revenue enhancing measures which could bring immediate relief to hard-pressed trust fund dollars. It also advances new ideas, including the issuance of social security bonds similar to those provided under the Federal National Mortgate Association (Fannie Mae).

During the ongoing national debate on social security reform, it would be my hope that Members could review this report and give serious attention to the issues raised. More importantly, it would be my hope that members of the President's Commission of Social Security Reform could incorporate some of these recommendations in their final report to the President and Congress due on December 15 of this month. Due to the length of this report, I wish to insert the first of several installments I will be making during the course of this week.

The report referred to follows:

AN APPROACH TO THE SOCIAL SECURITY SYSTEM—CONFIDENCE NOT CRISIS

SUMMARY

The Social Security System is fundamental to the welfare of this country. It is of deep concern to all persons, present and future beneficiaries. The System is now contronted with a growing crisis in confidence, exaggerated by the political process. While the emergence of intermittent fiscal problems was foreseen by the architects of Social Security, the current problems are exacerbated by existing economic conditions. A National Commission on Social Security Reform has been appointed to address this situation and will shortly issue its recommendations. It is expected that legislative action will follow to implement these recommendations.

The Community Council of Greater New York has focused special attention on the Social Security program for the last five years. In response to the current debate on these issues, the Community Council convened a special Ad Hoc Committee on Social Security in July, 1982 to provide an independent citizen forum for the study of Social Security and the development of recommendations to meet the current situation.

The Committee was comprised of a distinguished group of representatives from private industry, labor, government, the academic community, and voluntary human services. It included spokespersons for retirees and persons still in the workforce. This diverse membership on the Committee was designed to reflect the broadest public interest.

Throughout its deliberations, the Ad Hoc Committee was assisted by a Technical Work Group composed of experts knowledgeable in various areas related to the financing and operation of Social Security.

The Committee met over a three month period and divided into three sub-committees on financing, benefits and entitlements and public education. A comprehensive examination was made of the best information available on all aspects of the Social Security System, including the review of original material prepared by the Technical Work Group. In addition, a presentation was made to the Committee by a member of the National Commission on Social Security staff.

The Social Security System is basically sound and essential to the welfare of the nation, to persons young and old.

Social Security is the primary source of income and purchasing power for millions of retirees, disabled persons and survivors. However, at the present time, Social Security is inadequate to meet the needs of many of its beneficiaries.[1] The most vulnerable aging, e.g. single persons, usually women, in the oldest age category, now have a level of income substantially below the poverty level.

Our economy is presently experiencing severe problems which are reflected in the Social Security System. The present shortfall in Social Security income in impacted by unemployment since Trust Funds' revenues are based on payrolls. Increasing employment among all age groups would improve directly the fiscal viability of the Social Security System. (Note: Every one percent increase in unemployment reduces the Social Security Trust Funds' income by $4-$4.5 billion .)

The System is faced with an immediate short-term financial problem. However, between 1990 and 2020, the System will be relatively sound. Following this period there may be a long-term difficulty in financing.

Steps must be taken to meet the short-term financing needs. These steps can occur without fundamentally altering the System.

Such steps should be consistent with the principles inherent in the design of the Social Security System. These include social adequacy and individual equity, universality, intergenerational contract, and economic interdependency with other retirement income systems.[2]

RECOMMENDATIONS

No reductions should be imposed on Social Security benefits to solve the short-term financing problems. Moreover, some recently cut benefits should be reinstated.

A number of financing options to meet short-term deficits, which do not alter the System, are available and should be taken during the immediate period.

No short-range solutions should be used to solve long-range problems. The short-range and long-range problems are distinct and should be addressed separately. Solutions for the long-term, (after 2020) will be complex and are difficult to project. Planning, to address these problems, must be ongoing and continued throughout the period of financial stability (1990-2020). However, decisions concerning the long-term planning (for the post 2020 years), should not be locked into place and legislated by Congress until more reliable demographic and fiscal data are available. There is sufficient time for thorough study before any long-term major adjustments in Social Security are made.

Immediate steps must be taken to reaffirm for the public the important role that the Social Security System plays in our society. This is necessary to ensure continuing confidence in the System.

It is our conclusion that every American citizen, both young old, benefits from the Social Security System. It is social insurance. The health of many of our public and private social and economic institutions depend on their ties to the System. With confidence in the integrity of Social Security and belief that permanent stability can be achieved in the System, we offer this report.

[1] "Social Security, It's Role in Providing Retirement Income," *New York City Department for the Aging, October 1982.*

[2] "Paper & Data, the United States Social Security System," p. 1, Community Council of Greater New York, 1982.

FINANCING RECOMMENDATIONS FOR IMMEDIATE ACTION

These recommendations should be viewed as a continuum of options to be used flexibly, as changing economic conditions necessitate.[3]

If all of our short-term recommendations were enacted, revenues would far exceed anticipated costs.

Measures regarding improved financial administration, interfund borrowing and revenue enhancement should be enacted immediately; they are designed to ensure that no basic reductions in entitlements will be made during the projected 1982-1990 financial shortfall.

The OASDI Trust Fund should maintain reserve funds in an amount which will be sufficient to meet cash flow needs, based on reasonable and prudent projections and sufficient to protect public confidence in the ability of Social Security to meet its obligations without interruption.

1. Improved financial administration

a. *Trust fund investments.*—Investments of Social Security Trust Funds should be made in a manner which earns maximum returns without unreasonable risks, as would be the case with any other institutional investor. Any loans to other government bodies, such as investments in low-yield Treasury notes undertaken for the purpose of reducing the general Treasury deficit should be prohibited. (Note: Investments are now producing greater interest rates than in previous years. However, the Social Security Trustees and Congress should be vigilant in overseeing future loans to make sure that the System does not return to poor investment practices.)

b. *Repayment of lost income.*—Income lost to the Social Security Trust Funds due to investment practices which secured below average returns from the U.S. Treasury should be reimbursed to the Social Security Trust Funds. If the funds had been invested to earn the maximum return on marketable U.S. government securities, it is estimated that the Trust Funds would have earned an additional $14.9 billion between 1961 and 1981.

c. *Credit uncashed checks.*—All uncashed Social Security checks should be credited back to the OASDI Trust Fund instead of to the general treasury, as is now the case. If applied retroactively, to the start of the program, this action would add $250 million to the Trust Fund and would save approximately $30 million yearly in the future.

2. Relationship of social security funds to other Government budgets and accounts

Social Security funds should once again be separated from General Revenue Funds of the Treasury. This would protect the integrity of the Funds which are often wrongly considered as part of the Federal budget. Better public understanding of the construction and content of the Federal budget will also result from this action.

3. Borrowing to support the fund[4]

a. *Interfund borrowing.*—Current interfund borrowing authority should be extended beyond the December 31, 1982 expiration date for as long as it is necessary to meet any cash flow need in the Trust Funds. Borrowing by the Trust Funds should be undertaken only if repayment is made at a rate required under prevailing law. The integrity of the separate funds should be maintained.

b. *Special bond issue.*—One way to take care of the OASDI shortfall from 1983 to 1990 would be to legislative the issuance of a special Social Security bond similar to "Fannie Mae" (Federal National Mortgage Association) certificates in small demoninations with an interest rate calculated to bring in sufficient funds to cover the need.

We estimate that an 8 to 12 year Bond Issue with competitive interest payments in the amount of approximately $10 billion per year, would be sufficient to cover the shortfall and the annual interest. These would be special bonds for Social Security purposes. While they would represent an obligation of the U.S. Treasury, they would not add to the general budget deficit.

c. *Borrowing from general revenues.*—The Trust Funds should be given standby authority to borrow from General Tax Revenues as necessary. Repayment of such loans should be accompanied by a reasonable interest charge, in accordance with general fiduciary principles.

Such borrowing should take place as a last resort in dealing with the short-term financing problem to avoid a hiatus in payment of benefits. If necessary, such borrowing would have only a marginal impact on the size of the federal deficit.

4. Additional revenue enhancement measures

a. *Universal coverage.*—Congress should mandate universal coverage under Social Security. Coverage should be extended to all public and private employees. Universal coverage would not only be financially sound, but would also be more socially equitable and acceptable than present coverage. In making this change in the Social Security System, present non-Social Security beneficiaries should not have pension entitlements cut. Re-entry should be mandated for all those governmental units and not-for-profit organizations which have already withdrawn from the System. Future withdrawals by governmental and non-profit agencies should be prohibited. The integrity of the Social Security System requires full participation. Universal coverage would produce an additional $11.1 billion in Trust Fund revenues in 1983, $16.3 billion more in 1984, and another $18.2 billion in 1985.

b. *Reform the payroll tax increase schedule.*—The increases in the Social Security payroll tax scheduled for 1985, 1986, and 1990 should be replaced by an annual payroll tax increase for each year from 1983 to 1990.

Year	Currently scheduled payroll tax rate for OASDHI combined	Proposed altered rate for OASDHI combined
1984	6.7	7.44
1985	7.05	7.56
1986	7.15	7.63
1987	7.15	7.65
1988	7.15	7.65
1989	7.15	7.65
1990	7.65	7.65

Employees should obtain a refundable income tax credit equal to the increase in their share of the tax beyond that prescribed by current law. This would avoid double taxation on this increase.

c. *Expand the employer's share of payroll subject to social security tax.*—The FICA rate should be applied to the entire payroll without regard to the legal wage taxable base in calculating the employer's share of the payroll tax.[5]

This action could generate aditional Social Security revenue of $9.6 billion in 1983, $10.5 billion in 1984 and $12 billion in 1985. It is estimated that in total this provision would generate an additional $100 billion in revenues between 1983 and 1990.[6]●

[3] All recommendations are based on the II-B projections (Intermediate-Pessimistic) on the condition of the Social Security Trust Funds, as developed for the Social Security Trustees Report. These projections use commonly accepted assumptions relating to several economic factors which influence Social Security revenues and benefit levels including unemployment, real GNP (Gross National Product), inflation, wage levels and interest rates.

[4] It should be noted that any borrowing option will shorten the time available to plan for long-term financing solutions since repayment of loans will be made during the "healthy period", 1990-2020.

[5] The wage base income limits now scheduled in law for purposes of calculating the employee's payroll tax should be maintained.

[6] Consideration might be given to making all or a greater part of the payroll tax increase payable by the employer.

Note.—If a specific Trust Fund ratio were to be desired (recommended ratios range from 8 to 25 percent), then higher payroll tax rates would be necessary.

SOCIAL SECURITY: THE PYRAMID GAME

HON. BILL ARCHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. ARCHER. Mr. Speaker, as the 97th Congress draws to a close, I am extremely dismayed at the fact that there has been no meaningful action taken by this body on social security. The political demagoguery that has completely confused most citizens, particularly with respect to the issue of their benefits, will have tragic consequences. I would like to share with my colleagues an excellent column which appeared in the November 22, 1982, issue of Newsweek.

SOCIAL SECURITY: THE PYRAMID GAME

(By Jane Bryant Quinn)

Social security was a Ponzi scheme right from the start. Each lucky participant has always been guaranteed more money out of the system than was ever contributed on his behalf.

A 65-year-old, retiring in January 1982, can expect retirement benefits worth almost three times the tax payments that he and his employers made, plus interest, according to a study headed by James R. Capra of the Federal Reserve Bank of New York. If he has a nonworking spouse, he'll get back five times his investment. And that doesn't count what he gets from Medicare or disability.

WINDFALL

The recent rise in social-security taxes is cutting back on this retirement windfall. A 1984 retiree can expect to receive social-security payments worth a little more than twice the amount that he and his employer put into the system, plus interest. By contrast, the first wave of baby-boom retirees, reaching 65 in 2010, will get back only 30 percent more than their investment. A young person just now entering the labor force can expect a bonus no larger than 20 percent. But he is still coming out ahead.

That's the system's fatal flaw. Social security is supposed to be self-financed—yet each recipient is taking out more than the value of what he and his employer put in.

Any good Ponzi scheme can be maintained as long as enough new people come into the game. Their fresh money pays off the older participants, while they themselves wait patiently for their own reward. Over the years, social security has expanded to include farmers, domestic workers, the military, the self-employed and many others not originally covered. The only major group still outside the system is the federal work force. If they join the game, their contributions will reduce the deficit until they themselves begin to retire. But once you've got everybody playing, the pyramid has got to fall—especially when the operator keeps raising the stakes. Over the years, Congress enlarged social security to include disability payments, student benefits and Medicare. In election year 1972, benefits rose 20 percent and were indexed automatically to price inflation. Between 1971 and 1981, average social security-awards (subtracting inflation) rose 65 percent, while real hourly earnings fell. Today older people are no more, and no less, poor than any other age group.

It has been clear for some time that the pyramid was starting to crumble. Several cuts in benefits, proposed under President Carter, passed into law under President Reagan. The 1982 budget phased out social security's student benefits, the $225 lumpsum death benefit in some cases, survivor benefits for parents of children 16 and 17 and the $122 minimum benefit, for an estimated saving of $3.4 billion in fiscal 1983. Carter cut back on maximum disability payments, and Reagan went to work on Medicare.

But those savings are a drop in the bucket for a system mailing out $13.2 billion a month. The retirement fund will borrow up to $11 billion from Medicare and disability, just to make it through next June. With more loans, the entire pyramid could stand until the end of 1984, after which the game is over. The battle now is over which taxpayers—or which generation—should pay the tab.

If Congress decides to raise social-security taxes or increase the retirement age, almost all of the tab will be paid by people retiring after the year 2000, reports the New York Fed. Today's retirees and near retirees will keep their big subsidies, at their children's expense.

If Congress freezes cost-of-living increases (COLA's) for a year or links them to wage increases, current retirees will pay more of the bill.

If Congress fixes COLA's at 60 percent of the rise in inflation or taxes social-security income in excess of your contributions (just as private pensions are currently taxed), the cost of bailing out the system is roughly shared among the generations.

If Congress leaves social security unchanged and finances its deficits with income taxes, the elderly as a group will take a growing protion of the federal budget, at the expense of everything else the government does. Already social security and Medicare are the government's largest single expense (an estimated $225 billion in 1983, followed by $221 billion for defense), accounting for 30 percent of federal outlays. Whatever happens, social security should solve its problems with its own money. The rest of the budget is in bad enough shape without taking on the retirement deficit, too.●

IN PRAISE OF VIETNAM VETERANS

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. BROOMFIELD. Mr. Speaker, I want to take this occasion to offer my personal thanks to the nearly 3 million American men and women who worked and fought in Vietnam. These loyal and patriotic citizens responded to their country's call. They willingly gave of themselves to serve their Nation's interest in the jungles of a far-off land. Many of these valiant Americans made the ultimate sacrifice.

It is fitting that the names of those who gave their lives are inscribed in the newly-dedicated Vietnam Veterans Memorial here in Washington. The impressive memorial and moving National Salute to Vietnam Veterans represent a long-delayed, but lasting tribute to those who deserve a place of honor in our Nation's history.

Over 250,000 Vietnam veterans gathered in Washington and participated in the belated 5-day-long National Salute to those who served in Vietnam.

I believe that the vigils, ceremonies, receptions and parade showed these men and women and all Americans that this country did not forget their sacrifice. It is regrettable that because of the controversial nature of the war, the United States failed to pay a tribute to these brave people until many years after the war ended.

I am gratified, however, that Congress recently passed legislation which provides these veterans with a wide range of services ranging from job training to extended educational benefits. This is the least we can do for those veterans who answered the Nation's call to duty. On Veterans' Day, the President made some very poignant comments regarding his personal feelings concerning this occasion. His remarks follow:

It is fitting that we pay tribute to Mr. Weeks on this day when we remember the sacifices of those who donned this country's uniform and did their part to protect our freedom and independence. Words alone cannot express our gratitude to the brave men and women who took on the task of protecting our country from foreign threats and aggression.

President Coolidge once said, "The nation which forgets its defenders will be itself forgotten." Nothing is more important to the soul of America than remembering and honoring those who gave of themselves so that we might enjoy the fruits of peace and liberty. And that is the spirit of this special day and of this coming Saturday, when the Nation will dedicate the Vietnam Veterans Memorial, a tribute that is long overdue.

For too long, America closed its heart to those who served us with valor. It's time that Vietnam veterans take their rightful place in our history along with other American heroes who put their lives on the line for their country. Certainly, mistakes were made. But the reality of Vietnam today—massive prisoner camps for torture and political indoctrination, hundreds of thousands of boat people sacrificing everything and risking a painful death to flee communist oppression—all this suggests that the cause for which our Vietnam veterans fought was an honorable one.

This Saturday, America will put behind us the ingratitude and injustice of the past. We'll move forward in the spriit of Abraham Lincoln, who in 1865 said: "Let us strive on to finish the work we are in, to bind up the nation's wounds, to care for him who shall have borne the battle and for his widow and his orphan, to do all which may achieve and cherish a just and lasting peace among ourselves and with all nations."

And although we'll be putting the divisiveness of Vietnam behind us, we will not forget those who are still unaccounted for. Today I renew my pledge to the families of those listed as missing in action that this Nation will work unceasingly until a full accounting is made. It's our sacred duty, and we will never forget them.

Along with Raymond Weeks, I may be one of the few people in this room who remembers when Veterans Day was called Armistice Day, commemorating the armistice that ended the First World War on the 11th hour of the 11th day of the 11th month of the year in 1918. And I might add, I not only remember when it was called that day, I guess we may be the only ones that were on the streets in the wild celebration of the first and actual Armistice Day when it was signed.

Armistice Day honored those who gave their lives in "the war to end all wars"—a day of hope that they had not given their lives in vain. But within a few years, and in spite of an impressive effort on the part of the Western democracies to limit arms and to outlaw war, aggressors rearmed and war came again. Ironically, Armistice Day, was made a legal holiday in the United States in 1938, just 1 year before a second and more terrible conflagration swept across Europe.

Winston Churchill labeled it the "unnecessary war," because he said there never was a war more easy to stop. And no man had more right to say that then Winston Churchill. He had fought the illusions that led to war, pleaded with his countrymen to recognize and arm against this expanding totalitarian war machine, pleaded with his countrymen to be strong and to have courage—not because he wanted war, but because this was the only way to preserve peace. Yet, for all this, Churchill was castigated as a warmonger.

Even after war broke out in Asia and in Europe, our own country was slow to take the steps necessary to defend itself. Warning us of the impending crisis, a young Harvard student, John Fitzgerald Kennedy, wrote a book titled "Why England Slept." His thoughtful study holds as true now, 42 years later, as when it was first published. After describing how a dictatorship with a controlled press and the power to silence political opposition can carry on a vigorous arms program, he noted, "In contrast, in a democracy, the cry of warmonger would discourage any politician who advocates a vigorous arms policy. This leaves armaments with few supporters. Among the reasons for England's failure to rearm in time," Kennedy wrote, "probably the most important was a firm and widely held conviction that armaments were one of the primary causes of

war." Well, the Western democracies didn't wake up till it was too late. It took Pearl Harbor to shake Americans from their complacency.

Today, in this era of much more dangerous weapons, it is even more important to remember that vigilance, not complacency, is the key to peace. This administration is committed to rebuilding our national defenses, which were permitted to erode during the last decade. We're now in the initial phases of that rebuilding, and we must continue to press forward in the years to come if we're to maintain a credible deterrent.

But let the world understand: Our purpose is not belligerency, but respect; not conflict, but deterrence; and not war, but peace. None of the wars that I have mentioned, or others before them, ever came about because this country was too strong. We shall never flag in our pursuit of a more peaceful world.

Our goal is peace—peace that's achieved through a stable balance of forces, a mutual reduction of weapons, and a better understanding between the Soviet Union, the United States, and all nations.

Earlier today, we received word of the death of Soviet President Brezhnev. And I want to read to you, if I might, the letter that I have sent this morning to Vasiliy Kuznetsov, First Deputy Chairman of the Presidium in Moscow.

Now, I've said for many years there are fundamental differences between the Soviet system and our own system here in the United States. But I believe our peoples, for all our differences, share a desire and a dedication to peace. On this day, dedicated to American veterans, we honor the brave men and women who have by their service preserved our liberty. Our parades are a celebration of freedom. Our banner is Old Glory, and we hold her high and proud. This is the legacy of the brave men and women that we honor today.

So let us go forth from here, having learned the lessons of history, confident in the strength of our system, and anxious to pursue every avenue toward peace. And on this Veterans Day, we will remember and be firm in our commitment to peace, and those who died in defense of our freedom will not have died in vain.

And, again, we thank the man who has made Armistice Day into this Veterans Day—Raymond Weeks. And thank you all for being here.●

NATIONAL ALZHEIMER'S DISEASE WEEK

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. HOYER. Mr. Speaker, a short time before we adjourned for the election recess the House adopted legislation authorizing the President to designate the week beginning November 21 as Alzheimer's Disease Week. I was happy to be among the more than 250 cosponsors of this legislation which was sponsored by the gentleman from California, Mr. LOWERY.

Mr. Speaker, Alzheimer's is a disease that only recently has become a part of public awareness, although it was first identified in 1906. Unfortunately, it is also a disease that is growing in the number afflicted by it. As medical science continues to triumph in conquering the diseases of the body, thus allowing people to live longer, we see that new diseases are coming to the fore. Among these is Alzheimer's, which attacks the brain.

Many Members may recall reading a moving series of articles in the Washington Post earlier this year which discussed the human side of Alzheimer's disease—the effect on the individual suffering from the disease and the equally devastating impact on the families of the sufferers. Husbands and wives observe their spouses deteriorating slowly from a phase of temporary forgetfulness to the point that the victims are unable to care for themselves at all. The victims become violent and belligerent, and have no recognition of their family and friends.

The tragedy of Alzheimer's disease is awesome from the human side, but it also has the potential to be devastating to the rest of society as well. As we all know, the number of people over the age of 65 is growing faster than any other segment of our population. It is estimated that in the next 50 years it will grow by 150 percent, from the current 25 million people to 65 million in the year 2030. At the same time, it is estimated that up to 15 percent of all people over the age of 65 suffer from Alzheimer's disease. Put these two facts together, the immense growth in the older segment of the population and the percentage of that population that may suffer from the disease, and we see the potential epidemic nature of this disease.

We know the current shortage of nursing home beds in many areas. Can we expect that this supply will expand to meet the need of Alzheimer victims? Furthermore, can we afford in strictly monetary terms to pay for these nursing home costs? In 1980 the cost of nursing home care for Alzheimer's disease victims was more than $20 billion. It will shoot up to $30 billion in 1990. The thought of what the cost could be in 2030 is staggering. Medicare does not cover these costs under current law; the alternative is for families to expend all of their resources until the victim qualifies for Medicaid. Without development of methods to retard or reverse the symptoms of Alzheimer's disease, we face an ever growing epidemic crisis in both human and financial terms.

Real progress in Alzheimer's research has been slow, but there are hopeful signs regarding our understanding of what causes the disease. We must continue to support this research and continue to bring attention to this insidious disease. I am glad that the Congress and the President took action to designate the week of November 21 as National Alzheimer's Disease Week. I hope we will continue to help in this effort in the future.●

PROSPECTS FOR PEACE AND STABILITY IN THE WORLD

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. DERWINSKI. Mr. Speaker, Ambassador W. Tapley Bennett, Jr., the U.S. Permanent Representative to the North Atlantic Treaty Organization (NATO) recently delivered a very stirring address before the Cincinnati (Ohio) Council on World Affairs. Ambassador Bennett's leadership in improving the role of NATO and in promoting the United States commitment toward defending freedom in the world, deserves special commendation. As I believe that his remarks will be of great interest to the Members, I am pleased to insert into the RECORD this very pertinent address on the prospects for peace and stability in the world.

THE NORTH ATLANTIC ALLIANCE CRUCIAL ISSUES IN WORKING FOR PEACE IN FREEDOM

(By Ambassador W. Tapley Bennett, Jr.)

INTRODUCTION

It is a great honor and pleasure for me to be your guest at today's program of the Cincinnati Council of World Affairs. Your Council's good work and the degree of support which it receives from this community is known far and wide. This continuing effort to ensure that the people of this city and region are adequately informed on the crucial world issues of our day has the high respect of all of us. Private citizen organizations such as yours hold as essential role in public education in our democracy. Further, your role helps maintain and strengthen the vital and ongoing dialogue between Americans and our allies in the North Atlantic Treaty Organization, which for more than 30 years now has held central place in United States foreign policy.

AN ALLIANCE IN DISARRAY?

The Atlantic Alliance was 33 years old this year. It is perhaps getting as much attention now as at any time in its history. Concerned observers can be heard to ask whether the alliance has outlived its time, lost its relevance in safeguarding our way of life through its strategy of deterrence. Many wonder if allies are not devoting more effort to family squabbles than to warding off the very real dangers that loom over us all. The current commentary on NATO is such that one may well question how many citizens of the 16 member countries still have a clear notion of why the alliance was formed, what it is about today or why they should be ready to make sacrifice on its behalf.

Questions and doubts like these are not precisely framed. Much media glare and headline crescendo is directed at NATO for the wrong reasons. We should be careful to distinguish between problems in the realms of public perception on the one hand and, on the other, actual differences among allies on how to deal with specific problems.

Let us be clear, too, about what is the real work of NATO. Since its foundation as a defensive alliance in 1949, NATO's central purpose has not changed or wavered—the maintenance of peace in freedom through deterrence—through the marshalling of sufficient strength to deter an expansionist Soviet Union bent on imperial domination and now projecting its military power on a global scale. For more than a generation now, whatever the disturbances and armed conflict in other parts of the world, our deterrent policies have kept the peace in the heartland of Western Europe and the North Atlantic Area. In these days of so-called peace demonstrations, it it NATO that has proved itself the effective peace movement of our time.

We are an organization of sovereign equals. NATO is no lockstep alliance, marching to a single drumbeat. We are allied out of sovereign will, not out of compulsion as in the Soviet empire, with its Warsaw Pact directed by the iron dictates of Moscow. We must expect diversity. So long as the member nations of NATO are subject to popular choice at home and not to the autocratic fiat of rulers immune to the views of their citizens, so long will there be public scrutiny and debate. We do not always sing in complete unison in the West, but for more than three decades now we have managed a consistent harmony.

Today we have our differences to be sure—some of them serious ones: Pipelines, steel imports, grain embargoes, the proper allocation of national resources for defense, for example. Some of our differences of perception and approach are dictated by the simple facts of geography. The resident of Berlin or of a village 10 miles from the border of Czechoslovakia may feel himself more immediately threatened than a citizen of the Ohio valley, although in truth both are under the same strategic gun.

But, as regards the essential nature of the threat which confronts the West, there is no dissension in allied councils. Recognition of the need for an adequate Western defense is our common denominator.

THE ROLE OF NUCLEAR WEAPONS

Central to current concerns and controversy is the role of nuclear weaponry in maintaining peace and western freedoms. This issue, with its moral as well as physical implications, has troubled policymakers ever since the ball of fire rose over Alamagordo in 1945 in the first nuclear explosion. It is a serious and complex subject. It deserves serious and objective attention It is a subject too easily oversimplify—too often given demagogic treatment. Today some are trading on fears of nuclear weapons. This is very much a factor in the so-called peace demonstrations in Europe. Fear is a bad counselor, and we must never let fear drive our conclusions.

The self-styled peace advocates have no monopoly on nuclear angst. We all share the dread of unleased nuclear force, perhaps none more than those decisionmakers in position to know fully its awesome and horrible potential. But since nuclear weapons cannot be uninvented, the question then becomes: How to balance the Eastern and Western nuclear weapons capabilities most effectively to help keep the peace.

In fact, we in the West have allowed ourselves to become too dependent on nuclear deterrence. In a recent sober appraisal of NATO strategy and objectives, General Bernard W. Rogers, former Chief of Staff of the United States Army and now serving as Supreme Allied Commander, Europe, said the following: "NATO has mortgaged its defense to the nuclear response, because our nations have not been prepared to pay the cost of a credible conventional capability. . . . our citizens need to understand the implications of NATO's low nuclear threshold if they are to support the sacrifices required for improving our security arrangements to the point where we would have a reasonable prospect of a successful conventional defense. . . .".

The defense of the West is based on a triad made up of conventional forces, nuclear forces in the European theater and the Intercontinental Strategic Nuclear Forces based in the United States. The Russians have historically developed huge land armies, and the Western alliance has always been inferior in these conventional forces. After all, it is not necessary for the defender to match tank for tank, gun for gun the forces of the prospective aggressor. And so long as the United States had unquestioned nuclear superiority, the West knew it could rely on this nuclear umbrella for its ultimate safety. Judicious United States and NATO policies used this nuclear force to deter aggression and guarantee the peace.

Our problem today is that, unfortunately, the United States no longer enjoys unquestioned nuclear superiority. We lost it year by year during our preoccupation with other parts of the world and the burdens we carried there—and during the period of détente in which, while the West was trying to reduce tensions and work out a better relationship with the East, the Soviet Union was relentlessly arming-arming-arming. In recent years the Soviet Union has consistently spent 13 or 14 percent of its GNP on arms, has created a blue ocean navy with worldwide reach, has upgraded the quality of its other forces and weapons. We did not listen well enough to Brezhnev in 1967: "Détente does not in the slightest abolish . . . the laws of class struggle."

Today the Soviet buildup continues relentlessly, and we in the West are having to play catchup ball. Among the NATO nations today there is full agreement that upgraded conventional forces and modernized intermediate-range and strategic nuclear systems are necessary to redress the situation resulting from decade-long growth in Soviet armaments.

And let me say a word to those who claim a corner on nuclear concern, who are demanding a freeze on nuclear armaments. That would leave this country and its allies in a position of inferiority and thus remove pressure on the Soviets to negotiate meaningful arms reductions. Those concerned citizens owe the rest of us the application of their energy and determination to the support of efforts to strengthen allied conventional defenses and thus take practical steps to diminish the nuclear burden which we all carry. It is not enough just to be against this or that defense program with pious-sounding phrases. Peace is not to be taken for granted. It takes work—hard, grinding work—to achieve a rational and effective defense for the protection of the values we all hold dear. To those who would spend the money elsewhere, I would point out that without the base of national security no other facet of national life can survive. If security is forfeited, then all else goes with it.

EFFORTS FOR DISARMAMENT

At the same time that the West is rebuilding its strength, the United States is engaged in serious negotiations with the Soviet Union on arms reductions. In Geneva the START talks are underway with respect to strategic nuclear weapons. Separate talks have been going on there since last November with respect to Soviet intermediate-range missiles which menace the territory of our Western European allies. In Vienna, western negotiators have proposed a treaty which would reduce and equalize the numbers of NATO and Warsaw Pact conventional forces in central Europe.

The United States is committed to real reductions in arms—not to arms talks merely for the sake of talk. President Reagan has proposed a deep-cut strategic arms agreement to the Soviets and called for an unprecedented zero-zero outcome on intermediate-range missiles. Under the zero-zero option NATO would forego the deployment of 572 ground-launched cruise and Pershing II missiles in Western Europe in exchange for the withdrawal of Soviet SS-20 and other missile systems which together account for more than 1,000 nuclear warheads already in place and blanketing all of Europe with an overwhelming nuclear threat. The U.S. proposals are fair, serious, and innovative approaches to achieving reduced levels of danger. They have the approval of our intensely concerned allies. They deserve full public support. And they call for a serious and positive response from Soviet negotiators.

In the West we are in the paradoxical situation that we must arm today in order to disarm tomorrow. If we are to be successful in achieving the arms reductions we all want, we are going to have to have counterbalancing military assets to barter in the negotiations. The Soviets are ahead today in some key categories of weapons, and they would be delighted to "freeze" their advantage. No one has put it more clearly than the Soviet negotiator in Geneva who recently said, "You must understand, we Soviets are neither idealists nor philanthropists."

It is not the practice of Soviet negotiators to give something for nothing. It was, for instance, only after NATO's decision in December 1979 to go forward with a program to place intermediate-range missiles in Western Europe to counter the Soviet SS-20 missiles that the Soviet Union finally agreed to come to the negotiating table. A freeze at this time would undermine our negotiators at Geneva. Let's not tie our negotiators' hands!

NO FIRST USE

Similarly, the recent proposal that the United States proclaim a policy of no first use of nuclear weapons goes very much against Western interests. In the first place, the starting point for a debate on alliance strategy must surely be on how we can most effectively prevent the outbreak of war while safeguarding our freedom. Would such a policy help to prevent war, or would it make it more likely?

Most experienced observers believe that such a Western policy would constitute an open invitation to Soviet conventional aggression, given the overwhelming preponderance of Soviet strength in conventional armaments. Many qualified authorities consider that it is the uncertainly in the Russian mind about a Western nuclear response—the risk that we would respond to a Soviet move with nuclear weapons—that has deterred Soviet aggression and has kept the peace.

Renunciation of our nuclear deterrence would require, as even its proponents recognize, a massive buildup of NATO's conventional forces—a buildup of a magnitude which up to now our electorates have not

shown themselves prepared to support, particularly in these times of widespread economic difficulties. Should NATO fail to achieve its conventional force goals, this would undermine the credibility of the proposal.

On the other hand, quite apart from the financial burden, the renunciation of a possible nuclear option would leave the choice of strategy to the Soviets. It would allow them to limit their risks, whether for a general attack on the West or for a more limited move such as against Berlin or the Turkish Straits. It would lower the threshold of military action, thus making war more, not less, likely. As we have seen in Afghanistan, Soviet willingness to move militarily when the risks appear low has increased in recent years.

If we are to talk about no first use, then why not talk about all weapons? As the foreign minister of Norway, one of the most peace-oriented countries in the world, pointed out recently in a speech in Oslo in which he opposed the no first use proposal, NATO has already disavowed being the first to use force of any kind. The Bonn declaration made by the heads of allied governments on last June 10 stated clearly that NATO will not use its weapons, either nuclear of conventional, unless in response to an attack. And to quote Secretary of Defense Weinberger, "Nuclear deterrence may be an unpopular notion, but there is no refuting the fact that it has worked."

THE NATURE OF THE THREAT

Whether Soviet policies derive from a master plan aimed at imposing their system on others world-wide, represent an opportunistic lunge at targets of opportunity or stem basically from the historic Russian paranoiac suspicion of all things beyond their borders need not concern us here. Even if the most beign interpretation were put on recent Soviet actions, however, one could wonder what was the danger for them in Afghanistan, that unforunate land bloodied by some 100,000 Soviet troops even as we meet here. One could wonder where was the danger from the Polish people seeking a more decent society while at the same time foreswearing challenge to Soviet imperial demands on their society.

We must look at Soviet capabilities. In the post-Vietnam decade, the United States abandoned conscription and wound down the levels of its defense expenditures and the size of its military establishment. In a time marked by Western efforts to reduce tensions, the Soviet Union outspent the United States by $130 billion on strategic forces alone. In this period the Soviets deployed 10 versons of 3 new intercontinental ballistic missiles, while the United States deployed no new nuclear systems and will not deploy any until the MX comes on line later in this decade. While the United States built no new ballistic missile submarines, the U.S.S.R. was sending 60 new or improved strategic submarines to sea. In a missile-installing program which continues despite President Brezhnev's declaration last spring of a unilateral moratorium, Soviet intermediate-range nuclear warheads capable of striking all of Europe now number more than 1,000. The West has no comparable capability and will not have any until the planned deployment in the mid-1980's—of the Pershing II and ground-launched cruise missile systems.

The Soviet Union has increased its advantage in conventional forces—for example, to 4 to 1 in tanks and 3 to 1 in artillery—far beyond any defensive needs. Soviet military forces have grown by one-third to 4.8 million men.

But, broad as the Soviet threat is, it is essentially one dimensional. Let us be clear about it—the Communist state is a colossal failure except in one area, an important area, the area of military power. There the Soviet Union has made itself a superpower—and a dangerous one, marked by the lack of any effective restraint on its totalitarian power to lash out suddenly if impelled by its enormous internal strains. We face a system with a moribund ideology, a huge country unable to feed itself, a government which has never evolved a legitimate means of succession to replace its dependence on murderous intrigues in dark Kremlin corridors to pass state power, the head of an alliance of dragooned and unreliable satellites.

Six and a half decades after a revolution that promised bread and freedom, the Soviet people enjoy neither. The Soviet system produces tanks and highly sophisticated weapons (regrettable with the aid of a great deal of western technology), but not food. It produces walls and refugees, not freedom. Indeed, who can doubt the outcome of truly free elections were it possible to hold them in states under the Kremlin's sway?

HOPE FOR THE FUTURE

I have no doubt the peoples of the Soviet Union and its clients states long for peace no less than do we in the West. We cannot compel the Soviets to be either idealists or philanthropists, but we can require that they be realists. We can do this—and we and the allies are doing this—by constructing necessary defenses even while we table negotiable and genuine arms reduction proposals. We and our allies in NATO do not seek confrontation.

The North Atlantic Alliance continues to do the job it was designed to do by farsighted statesmen a generation ago. Now a new generation looks at our structure of peace and some, along with some of the older generation, ask whether it is still adequate—whether we need basic changes of direction. Let me illustrate in closing with a story told by former Under Secretary of State George Ball:

A village in a valley had for decades been periodically devastated by floods until one day the villagers gathered resources and built a dam that for more than 30 years kept the village safe and dry. Then a new generation, disdaining the wisdom of their fathers, looked at the dam with abhorrence. It blotted out the sunset, they complained, and threatened the ecology. Who needed It? Since there had been no flood for 30 years, it was obvious that the dam was no longer required. So they held a rock festival, blew up the dam, and sank beneath the advancing waters."

NATO is democratic and pluralistic alliance of 16 nations of like-minded peoples who, in their democratic way, are united on the fundamental issues and sometimes divided on details. As President Reagan stated recently: "The fundamental values and shared interests which have always united us are, and will remain, much more important and enduring than the issues over which we differ from time to time."

NATO is an organization for peace. That is its abiding purpose—to maintain peace in freedom. Through its steadfast policy of deterrence, peace has been maintained in the Atlantic Community for the longest time in modern history; and the way has been held open for a truly remarkable rise in our standard of living on both sides of the ocean that unites us. The alliance has always enjoyed strong and bipartisan support in this country. It deserves and needs that public support today, so that it can go on safeguarding our peace in freedom.●

BAILEY OUTLINES FAVORABLE SUPREME COURT GUIDES ON SCHOOL PRAYER

HON. WENDELL BAILEY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. BAILEY of Missouri. Mr. Speaker, polls show that an overwhelming majority of Americans believe that voluntary prayer should be allowed in our public schools. I believe that an equally heavy high percentage of elected officials agree. One major hurdle is to understand what the Supreme Court has ruled permissible and not permissible. To this end, I offer the following summary of key U.S. Supreme Court decisions (and would note the grateful guidance and assistance of Mrs. Anne Neaman, National Coordinator of Citizens For God and Country).

U.S. SUPREME COURT FAVORABLE GUIDES ON SCHOOL PRAYERS, BIBLE, AND NEUTRALITY AS GUIDES IN GOVERNMENT ADMINISTRATION

A careful review of the key U.S. Supreme Court cases on Engel, 1962 and Abington, 1963 reveals that the Court did not rule out school prayers, but provided favorable guides in harmony with the First Amendment Establishment neutrality clause.

Unfavorable court decisions by the U.S. Supreme Court were due to deficient defenses of the specific cases, which failed to conform to those established church-state guides, which related to legislated prayers. According to the First Amendment Establishment Clause, "Congress shall *make no law* respecting the establishment of religion. . ." (Emphasis added). Obviously, a First Amendment violation occurs with the making of a law, while unlegislated prayers do not violate the Constitution, since "the authority of the school superintendent was not usurped." Abington, J. Brennan, (p. 56, 67). Engel and Abington, as many other cases in lower courts related to legislated prayers, only. By errors and disinformation strategies to secularize public school education, the Supreme Court decisions have been misrepresented, as those of lower courts to relate to all prayers, unlegislated as well. The following details clarify the fact that prayers are not forbidden by the Supreme Court, whether legislated or unlegislated; and that "separation of church and state," Art. 52, Soviet Constitution, an alien enemy doctrine, is unconstitutionally misapplied to the prayers cases and to the celebration of Christian, non-sectarian holidays, which are legal and official.

The unfavorable decisions in Engel and Abington ruled out legislated prayers. Engel, decision (p. 8 ftn) declared that the "case had nothing to do with the . . . love of country . . . and belief in God . . . patriotic and ceremonial exercises." Engel, decision, (p. 8) reaffirmed Christian law priori-

ty and Christian neutrality as guides to government administration:

"Who does not see that authority which can establish Christianity, in exclusion of all other religions, can with the same ease establish one Christian sect over another . . ."

The Court reasserted these guides to government by Christian neutrality with reassertions from Everson, J. Rutledge, stemming from Holy Trinity, 1892. Roemer, 1976 denounced "separation of church and state" as never required, and reaffirmed that "scrupulous neutrality" was. There is no doubt that "scrupulous neutrality" relates to Christian neutrality, since this nation has been identified as a Christian nation, Holy Trinity, 1892; *Zorach* v. *Clauson*, 1952; and *McGowan* v. *Maryland*, 1961. In fact Holy Trinity propounds the founding general Christian principles which structure the Constitution, Institutions, and laws.

"We are founded to legislate, propagate, and secure general Christian faith which is and always has been a part of our common law . . . Nothing be done to hurt Christianity . . . Bring infidels and savages unto human civility for a quiet and settled government . . . Enter into confederations to preserve and maintain the true Gospel of the Lord Jesus . . . The morality of the nation is deeply ingrafted upon Christian faith . . . We are a Christian people . . .

"Passing into view of American life, in law, business, customs and society, the same truth is recognized. This and many other matters which might be noticed add a volume of unofficial declaration to the mass of organic utterances that this is a Christian nation."

Where these founding Constitutional principles are excluded, confusion and misdirection result. Where they are included, it is simple to comprehend the Supreme Court decisions on school prayers, Bible, Christian ethics, which guide law and jurisprudence. By including the Holy Trinity values of the Constitution, it becomes clear, undebatable, that only Christian, non-sectarian, prayers, are permitted in public education. Undoubtedly, the purpose of founding a nation, specifically, a Christian nation, is to preserve the Christian culture, western civilization. Such culture depends upon an order in life which provides sufficient harmony to develop the necessary strength through unity. Without a moral order with stable values by authority higher than man and his shifting politics, corruption, and greed, how can the INTENT of the Constitution be realized for Justice, Tranquillity, and Blessings of Freedom?

Just as the flag flies over a public institution every day, similarly, the Bible and school prayers serve as a guidepost that the values which administer that institution are by founding Christian ethics, Biblical morality. There is no issue of "diversity" when the proper facts of Christian neutrality are presented, for whose culture but that of the United States of America are public, tax-funded schools supposed to propagate? Citizenship is in a Christian nation, entitled to a Christian administration. Diversity is by individual rights and private means, and since a Christian nation is obligated to encourage Christianity wherever possible, the obvious objections come from those propagating the alien enemy doctrines of international atheism, known in public education as unconstitution humanism-atheism.

The total favorable guides of the court include:

(1) Christian law priority and Christian neutrality as guides to government administration. Holy Trinity, 1892; Everson, 1947; Engel, 1963; Roemer, 1976; Sydell Stone, 1980.

(2) Patriotic and ceremonial exercises for love of country and belief in God. Engel, (p. 8, ftn), also, reaffirmed in Abington.

(3) Christian neutrality as defined in Engel, (p. 21) and Abington, (pp. 28, 32, 42, 55, 66, 72, 74) relates to "no favor or disfavor of any specific church or specific sect over another." Since the issue is chruch-and-state, not sanctuary, synagogue, temple and state, but church, the issue is within the Christian community, as propounded in Everson, 1947 (pp. 36, 40, 52, 53, 54 ftn, and p. 65) stemming from Holy Trinity. The Court further defined neutrality to include no secularism and no secular passivity; it is the duty of government to deter no-religion belief, and "the facilities of government cannot commit inhibition, handicap, hostility, jeopardy, impediment, oppression, offense, prohibition to Godly religion, religious principes" nor Christian faith, which is the apparent common law.

(4) Prayers for discipline, harmony, unity, promotion of authority; and the use of the Bible for moral order, do not violate the First Amendment. "Rigid limits on the mention of God (Christ) in the classroom are fraught with danger." Abington, (pp. 56, 57; 20, 27, 52, 55, 67).

(5) "Atheists do not interfere. There is nothing compatible. They go their own way." Engel, J. Douglas, (p. 12).

(6) The Superintendent's authority was not usurped. *Abington* (pp. 56, 57)

(7) Release time for student religious training off the school premises is permitted. *Abington*, (p. 47)

(8) *Legislated* prayers are permitted to uphold the moral order, a "civic" not "religious" objective, "Where secular means fail to meet secular ends." J. Brennen specifically declared that this reaffirmation applied to the *Abington* case. (The unfavorable cases involved ignorance or political profits with deficient defenses, leaving the Court no alternative but to rule *legislated* prayers out, while providing guides on how prayers and Bible can be in harmony with First Amendment neutrality, legislated or unlegislated.)

(9) Parents rights were declared undebatable and sovereign to educate youth in accordance with the parent's station in life. *Abington* (pp. 32, 49, 57, 64). Many other historic Supreme Court cases identified parents' rights as part of the religious freedom of parents to "upbring, educate, and nurture their young" in accordance with the rights of conscience, and a moral environment by Christian ethics as guaranteed by the Constitution.

(10) The Commandments and the Bible are permitted in curriculum for history, literature, comparative religions, and ETHICS. *Sydell Stone*, 1980, (p. 3). Biblical ethics, of course, are Christian ethics.

(11) "Scrupulous neutrality," clarified in earlier cases as Christian neutrality, and *not* separation, was required. *Roemer*, (p. 7), 1976.

The U.S. Supreme Court has remained consistent from *Holy Trinity*, 1892 throughout history to *Sydell Stone*, 1980 that Christian ethics guide government. Many lower courts, however, have failed to uphold these Supreme Court guides, because of incompetent defending attorneys or political manipulations, and unconstitutional threats of legal risks to local School Boards. Principals manipulate local committees to report to the Board, "Parents do not want prayers."

Aside from the Supreme Court favorable guides, Federal law, Title 36, U.S.C. 172 one nation under God, declares in its legislative history that this law was passed to address the "rabid communism," the prevailing nationwide outcries against invading "corrupt coalitions." Everson, reciting Madison, (p. 40, ftn).

"Diversity and student comfort" are disguises for the "rabid communism"—since the vast majority of the nation are of Christian faith, and the Constitution is based on Christianity, forbidding secularism and secular passivity. Institutions which fly the flag, administer by Christian ethics, corresponding to the five-pointed, Christian star, in the flag and Constitution.

Public officials are compelled to fulfill their Oath to Defend against all enemies, foreign and domestic. The Code of Ethics for Public Officials compels service through "conscience and Constitution, and reporting of corruption." Art. IV, Sec. 4 "Guarantee(s) a Republican form of government, and secure against invasions," as defined by Title 18, U.S. Criminal Code Sec. 241-242 and Title 42, Sec. 1983, 1984, 1985, and 1986, denial of others rights and privileges, and interference with official performance. Officials who exchange their obligation to serve within the scope of the U.S. Constitution, "acting beyond official duties"—Ultra Vires, can be sued personally, for shifting loyalty to the anti-Christian, Soviet Constitution.

The issue of prayers involves more than the right of Free Exercise, and the duty of Christian neutrality for moral order guaranteed by the Constitution. It is an issue of whose Constitution will be served, U.S. Constitution, Christian law priority, Christian neutrality? Or, will it be the U.S.S.R. Constitution, Annex, A, Art. 1, 25, 52, 169, "centralized education, communistic morality, classless society, worldwide atheism, separation of church and state, workers of all nations, unite." The issue of school prayers is an issue of the threat to national security and the loss of Human Rights, fundamental, God-given, and inalienable as recognized by the First Amendment Christian ethics. As a Rabbi testified before the House Judiciary Committee, 1980, School prayers, "Had Christianity prevailed in Germany, no holocaust could have occurred."

The issue of school prayers has been related to shifting school curriculum from Christian ethics to Soviet "communistic morality, propagate worldwide atheism, separation of church and state."

The issue of prayers has been followed by throttling and denial of the celebration of the non-sectarian Christian holidays identified in tradition, common law, case procedence law, and public law as official, legal holidays.

Not only educational institutions, but all branches of government have been infiltrated to expel the U.S. Constitution, Christian ethics in government. Even the National Park Services have conformed, in the District of Columbia, to accommodate the anti-Christian movement, with the six-pointed star of David on the Christmas Tree with the laughable justification that is is a mere "electronic decoration." Indifference to public complaints, treated with intent, involves not only support to shift Christians out of the New Testament into the Old Testament, and then into international atheism; but by such actions, there is a further violation of secular passivity, as well as secularism—both declared unconstitutional, Abington, (p. 28), reaffirming from earlier cases, stemming from *Holy Trinity*. The

Constitution, based on the values of Holy Trinity, forbids hostility, jeopardy—"Nothing be done to hurt Christianity, which is and always has been a part of common law."

The U.S. Congress, Office of the Architect, responsible for the decorating of the Christmas Tree on the Capitol grounds involved similar Constitutional violation. According to the personnel in charge of the decoration, the tree is decorated, as in the past 18 years, with a four-pointed star. The office of the Solicitor justified this as a need to consider "wind convection pressures" in the interest of pedestrian safety. He justified the six-pointed star on the Ellipse as carrying a double Holy Trinity, a Christian message. The Office of the Solicitor justified this as a need to consider "wind convection pressures" in the interest of pedestrian safety. He justified the six-ponted star on the Ellipse as carrying a double Holy Trinity, a Christian message. He justified the refusal to use the five-pointed star, because it is in the flag, and that would make the Tree "secular."

A correction was presented by private interest exposing the error which indentifies with performance of official duties in Ultra Vires—performance beyond the scope of the U.S. Constitution—and thereby personally accountable to legal liabilities. Though the Solicitor offered corrective consideration, the signficance is alarming that public personnel should arrogantly advocate "separation of church and state" to justify why the Christmas Tree for the U.S. Capitol has four-pointed star—secular—instead of the five-pointed traditional Christian, Star of Bethlehem. It is more alarming that public personnel with greater arrogance should declare to inquiring interests that the four-pointed star represents the People's Tree (code for communism).

Not only informed Christians, but informed Torah, Old Testament, Jews are concerned, since for the Torah believers the anti-Christian movement identified with the story in Germany. According to the Jewish Guardian, New York, 1976, Torah Jews are directed in the interest of their religious and ethnic security: "International atheism is contrary to the supremacy of the Torah. It is anti-Semitic. Do not fight the government in whose country you reside."

According to Jewish psychiatrists, equally concerned, "Living is snuggest where Christianity prevails."

According to Holy Trinity, Christian law priority, and Christian neutrality as guides in government are not "personal sayings. . . Passing into view of American life, in law, business, customs and society, the same truth is recognized. This and many other matters which might be noticed add a volume of unofficial declaration to the mass of organic utterances that this is a Christian nation."●

USO ITALIAN-AMERICAN FESTIVAL

HON. SAM GIBBONS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. GIBBONS. Mr. Speaker, I would like to take this opportunity to give testimony to a significant USO-sponsored event in Tampa, Fla. From March 25 through March 27, 1983, the first annual USO Italian-American Festival will celebrate Italian heritage, culture, customs, and traditions. Some of the scheduled activities will feature an Italian street bazaar highlighting Italian craftsmen, an old-fashioned spaghetti dinner and a celebrity-studded USO show.

Funds raised from this extravaganza will support USO services in Bari, Brindisi, Catania, Genoa, Naples, Livorno, Messina, Palermo, Taranto, Taromina, Trieste, Venice, and Rome, Italy and for USO service programs in Tampa, Fla. USO is a voluntary, civilian, congressionally chartered organization devoted solely to meeting the needs of American servicemen and women, and their families. It is a noble part of the American tradition of neighbor helping neighbor—volunteers joining together to give their time and talents to meet the human needs of the U.S. military population which could not be served as effectively by Government agencies.

The first annual USO Italian-American Festival in Tampa, Fla., is yet one important way by which USO could realize its vital mission of service to American military citizens.●

JOHN J. BUSWICK

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. LONG of Maryland. Mr. Speaker, on November 11 our Nation celebrated Veterans Day in recognition of the millions of men and women who have served in our Armed Forces to insure the freedom that we enjoy today.

However, I wish to take a moment today to recognize the contributions of one of my constituents, Mr. John J. Buswick a veteran of World War I.

At the age of 25, John J. Buswick enlisted in the Army during World War I and fought with American forces in France and Germany. During a battle in Belgium, Private Buswick was injured by poison gas. Despite his incapacity, private Buswick continued to fight. In April 1919 he received an honorable discharge and returned to private life in Baltimore.

Mr. Buswick is now 90 years old and has participated in Veterans Day celebration ceremonies since his days as a private in World War I.

Mr. Buswick represents the millions of men and women who have unselfishly served our Nation. I know that my colleagues in the House join me in praising this fine American.●

IMMIGRATION REFORM AND UNITED STATES AND MEXICAN STABILITY

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. GARCIA. Mr. Speaker, the President's trip through Central and South America is evidence of the growing awareness of the importance of that region to the United States. While our security and prosperity are not contingent on the prosperity of Latin America, we are greatly effected by disturbances in the region—both political and economic.

Argentina and Brazil are having a difficult time remaining economically solvent. Their economies are running in the red, and their future stability depends, to a large extent, on their ability to meet their debt requirements.

But it is Mexico that is going through the most severe economic crisis in this hemisphere. It owes upward of $80 billion to foreign creditors. Much of that is owed to U.S. financial institutions. Yet, Mexico has a great deal of oil reserves, making its potential wealth promising. This oil wealth also makes Mexico even more important to the United States.

The point is clear, Mexican stability is of concern to the United States. To a certain extent that stability is contingent on money sent back to Mexico from immigrants working in the United States. Also, Mexico has always used the safety valve of immigration to the United States to control its astronomically high unemployment and underemployment rates.

I am not implying that the United States must have a lax immigration policy to help Mexico with its unemployment and balance-of-payment problems. Our own problems are primary. Our jobless rate and national debt are out of hand, we must help ourselves first.

But it has become apparent that we are directly effected by what goes on in Mexico and throughout Latin America. We cannot afford to let Mexico go bankrupt; it will only make things much worse for us at home. Look at the crisis that the recent drop in the peso caused for U.S. border towns.

If we pass a restrictive, one-dimensional immigration law, it could have disastrous effects on an economy such as Mexico's, and consequently, it will backfire on our own economy.

H.R. 6514, the Immigration Reform and Control Act of 1982, does not take into consideration the foreign policy side of immigration reform. That is why it is an incomplete bill. If we do not revise and extend our immigration

policy to include foreign policy questions, we are only hurting ourselves.

I am putting an October 12 article from the Washington Post in the RECORD that touches on this problem. I hope my colleagues find it useful.

AMERICAN'S SOFT UNDERBELLY

(By Joseph Kraft)

SAN DIEGO.—Mexico presents a trickier challenge to this country than Russia, China, Japan and all of Europe. For those distant nations can be deterred or fenced out. But Mexico transmits its disorders directly into the American bloodstream.

That point emerged in the meeting here last week between President Reagan and president-elect Miguel de la Madrid. For the setting here along the border emphasized how much Mexican problems create baffling troubles for the United States.

The financial problem is not front and center. Mexico is $80 billion in the red to foreign creditors, and lacks the money to pay either interest or principal. Much of the debt is owed to American banks, which would go bust if Mexico defaulted.

To prevent such a catastrophe Washington has organized emergency loans from this country and several international institutions. A moratorium on debt payment is in effect while Mexico negotiaties a recovery package with the International Monetary Fund. President de la Madrid, in a chat at a reception given after his official meeting, said he expected an accord with the IMF to be reached by the outgoing president, Jose Lopez Portillo, before his term expires on Dec. 1. If so, new financing will become available and the danger of immediate collapse will be averted.

But in return for IMF support, Mexico will be obliged to accept an austerity program that cuts back government spending and limits economic growth—perhaps to zero. The incoming president acknowledged that the burden of enforcing the program would fall on his shoulders. That obliges him to bear down on several spots that are already raw points in Mexican-American relations.

Illegal immigration for one. Several million Mexicans have come to this country illegally to find jobs. The financial pinch south of the border has stimulated an even larger flow, which is evident in the number of arrests by the border police just south of here. The austerity program is bound in cause a greater increase over the next few years.

But the United States has not yet figured out how to square the demand for Mexican labor with immigration law. And so a problems that defies solution is simply going to grow worse.

Energy is a second sore spot. The huge stores of oil and gas recently discovered in Mexico represent for the United States a supply far more secure than any available in Africa or the Middle East. So this country has been pushing Mexico to expand output rapidly.

But rapid development of oil stimulates inflation and gives increase to corruption. And it does almost nothing to solve the most pressing Mexican problem—jobs. Thus by pushing for more energy production, the United States contributes to further immigration, and fosters more of the irresponsibility that led to the present financial crisis.

Commerce represents a third sore spot. Mexico is a bug buyer of American goods and services, especially along the border. But the present financial crisis has already caused stagnation in many border areas. Sale of retail items to Mexicans is almost flat. So is the market in housing. And the austerity program will further diminish the Mexican appetite for American products.

The more so as the incoming president seems to intend a basic restructuring of the economy. He wants to make Mexico competitive in international markets. That means weaning business away from the pervasive corruption that makes Mexico an extremely inefficient producer. But American interests—it should never be forgotten—also batten on corruption in Mexico.

Managing all these difficulties simultaneously would try any leader. De la Madrid at least understands the problems. He is an economist, versed in government and banking. At the reception after the meeting with Reagan, he observed that Mexico could best meet its responsibilities to the United States by solving its own problems. He evinced no trace of the anti-Americanism so pervasive in Mexican politics.

But the incoming president has undoubted weaknesses also. He is a technocrat, not a figure from the heart of Mexico's political powerhouse, the Party of Revolutionary Institutions, or PRI. He lacks the flair and the commanding presence that enabled Lopez Portillo to run the show.

So a reasonable bet is that this country's hard times with Mexico are far from over. For years to come the United States will be vulnerable to the many troubles now bred in what is more and more becoming America's soft underbelly.●

H.R. 7359

HON. CARDISS COLLINS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mrs. COLLINS of Illinois. Mr. Speaker, I am alarmed by the pain, grief, and suffering criminal tampering with over-the-counter drugs and other products has caused throughout the United States.

These well-publicized crimes have incited copycat activities, as we witnessed in the Tylenol situation. Targets have included over-the-counter drugs ranging from mouthwash, eyewash, and pain relievers to food products such as pies, candies, fruit drinks, and hot dogs.

Our society is by no means risk free, and legislation cannot make it so. The new tamper-proof regulations may work against capsule tampering, but the problem may just surface again elsewhere. I feel severe punishment should be given to individuals who knowingly adulterate a product with the intent or possibility of harming or killing another human being.

On Friday, December 3, 1982, I introduced legislation which addresses this problem. This measure, H.R. 7359, amends title 18 of the United States Code to include punishment for individuals who knowingly adulterate a substance with the probable knowledge of harming or killing another person or damaging the reputation of a business.

Specifically, the provision states:

That whoever knowingly adulterates a food, drug or cosmetic with knowledge that such food, drug or cosmetic will be ingested, inhaled or used by any person and who causes any person to die as a result of ingesting, inhaling or using such food, drug or cosmetic shall be fined (not to exceed $250,000), imprisoned for a term not less than 20 years or life, or both.

The measure also focuses on the penalty for an individual who tampers with a product which results in severe mental or physical injury to the victim of the tampering. The penalty for such an action shall be a fine (not to exceed $100,000) and imprisonment for a term not to exceed 10 years, or both.

These penalties will apply not only where the intent of the perpetrator is to actually cause harm to another but also where the intent is committing such an act may be to damage the reputation of another's business.

I urge my colleagues to join me in cosponsoring this measure, which if enacted into law, will provide proper penalties for those who intentionally try to harm others for their own sadistic enjoyment.

A text of the legislation follows:

H.R. 7359

A bill to amend title 18 of the United States Code to make unlawful the adulteration of food, drugs, and cosmetics carried out for the purpose of causing death or injury

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That chapter 51 of title 18, United States Code, is amended by adding at the end thereof the following new section:

"§ 1118. Adulteration of food, drugs, and cosmetics

"(a) Whoever adulterates or causes to be adulterated a food, drug, or cosmetic in interstate commerce—

"(1) for the purpose of killing any individual who ingests, inhales, or uses such food, drug, or cosmetic; or

"(2) with knowledge that it is possible that such food, drug, or cosmetic will be ingested, inhaled, or used by such individual and will cause the death of such individual;

and who causes any individual to die as a result of ingesting, inhaling, or using such food, drug, or cosmetic shall be fined not to exceed $250,000, imprisoned for a term of years not less than 20 years or for life, or both.

"(b) Whoever adulterates or causes to be adulterated a food, drug, or cosmetic in interstate commerce—

"(1) for the purpose of causing death or severe mental or physical injury to any individual who ingests, inhales, or uses such food, drug, or cosmetic;

"(2) with knowledge that it is possible that such food, drug, or cosmetic will be ingested, inhaled, or used by any individual and will cause the death of or such injury to such person; or

"(3) for the purpose of causing injury to the business reputation of any person;

shall be fined not to exceed $100,000, imprisoned for a term of years not to exceed 10 years, or both.

"(c) For purposes of this section—

"(1) a food, drug, or cosmetic is adulterated if such food, drug, or cosmetic is deemed to be adulterated under section 402, 501, or 601, respectively, of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 342, 351, 361);

"(2) the term 'cosmetic' shall have the meaning given it in section 201(i) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(i));

"(3) the term 'drug' shall have the meaning given it in section 201(g)(1) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(g)(1);

"(4) the term 'food' shall have the meaning given it in section 201(f) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(f)); and

"(5) the term 'interstate commerce' shall have the meaning given it in section 201(b) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(b)).".

SEC. 2. The table of sections for chapter 51 of title 18, United States Code, is amended by adding at the end thereof the following new item:

"1118. Adulteration of food, drugs, and cosmetics.".●

CONSERVATIVE SUPPORT FOR THE CLINCH RIVER BREEDER REACTOR

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. RUDD. Mr. Speaker, a massive campaign to stop the Clinch River breeder reactor project has been launched by the opponents of nuclear power development and U.S. energy growth and independence. This is predictable. However, what has especially concerned me is the number of conservative organizations and spokesmen who have become allies with the proponents of the stop Clinch River movement. Current economic projections concerning American electrical energy needs over the next 25 years clearly indicate the need for the continued development of this near-inexhaustible nuclear power source. Perhaps nearsightedness may be contorting the viewpoint of some of my colleagues, and for this reason I recommend the reading of some statements by Mr. Daniel J. Popeo, founder of the Washington Legal Foundation:

STATEMENT OF DANIEL J. POPEO, FOUNDER, WASHINGTON LEGAL FOUNDATION

Logic and the preponderance of the evidence dictates that the sound conservative position is to support the completion of the Clinch River Breeder Reactor. Here, are some of the reasons why:

If the United States is to maintain even a modest annual growth rate of 3 percent, we will have to double our electric power capacity in 25 years. Breeder reactor technology, an essentially inexhaustible source of energy, is needed to help supply this increased capacity if we are to have economic growth without relying upon foreign energy sources.

As the International Energy Agency recently warned, a new oil crisis may hit by mid-1980's that would deal a "devastating blow" to the U.S. and other industrial nations. Such a prospect makes any effort to kill the Clinch River Breeder and thus cripple a readily available U.S. energy option the equivalent of committing national suicide.

President Reagan is firmly committed to breeder reactor technology and the "completion of the Clinch River Breeder Reactor." He states that Clinch River is "essential to ensure our preparedness for longer-term nuclear power needs."

President Jimmy Carter, beginning weeks after his inauguration in 1977, attempted to kill the project and succeeded in stalling construction work on Clinch River for more than four years. This short-sighted move is largely responsible for driving the cost of CRBR from some $1.7 billion (when the contracts were let in 1974) to the current estimated figure of $3.6 billion.

The Soviet Union, France, Japan, and other nations are moving ahead of the United States in breeder technology. How can conservatives, or even liberals for that matter, force the nation to withdraw from this competition at the expense of America's continued growth?

The total cost of the Clinch River research and development project (now said to be $3.6 billion by the Energy Department) is dwarfed by the drain on taxpayers caused by the annual cost of such social welfare programs as food stamps. For example, food stamp handouts cost somewhere in the neighborhood of $11 billion in 1982 which is more than fifty times the amount spent on Clinch River in the same year. Furthermore, Clinch River dollars provide jobs, not handouts.

Contrary to environmentalist misstatements, the Clinch River Breeder Design is technologically up to date and contains features, such as its heterogeneous core, which have attracted the attention of German, British and other foreign breeder experts. Repeated assessments by the General Accounting Office, most recently supported by their July, 1982 report, have concluded that among "a wide range of knowledgeable industry, government and private individuals, no one we talked with was able to provide us with any specific facts indicating that components or design features were obsolete."

After years of bureaucratic and regulatory delays, work has begun at the Clinch River site. Some 3,500 workers are already employed in 29 states and the District of Columbia, the plant design is 96 percent complete and about $900 million worth of components have been delivered or are on order. If cancelled now, the cost to the taxpayers would be $1.4 billion with nothing to show for it.

According to a respected member of the other body, "the opponents of the Clinch River Breeder Reactor have come up with false and phony rigged figures and then repeat them." Among other things, the revenues from CRBR are liberally estimated at more than $20 billion payable to the government over the 30 year life of the plant. This figure, developed by the Appropriation Committee, estimates 2 percent real growth in electricity prices.

Many question why private utilities have not contributed more money to this plant. I would simply point out that the electric utilities, companies that are closely regulated by government, are limited in their financial ability to invest in a long-term research and development project.

Professor Hans Bethe, a Nobel Prize Laureate, says that "once the breeder or a similar type of reactor is in place, the uranium in the U.S. will last for tens of thousands of years, at an affordable price. An inexhaustible energy source is as good as a renewable one."

Finally, halting the Clinch River project now, just as construction is finally beginning would be tragic and would place our country's economic future in the hands of the radical environmentalists and others who oppose economic growth. The G.A.O. put it best in its most recent report. Failure to construct Clinch River, it said, would "foreclose on the long-term future of a major energy option—nuclear fission . . ."

More is at stake than simply the Clinch River Project.

We have all worked too hard and fought too many battles to allow the left-wing to use the Clinch River issue to break our ranks as well as encourage us to abandon our principles.●

WHAT DOES THE FUTURE HOLD FOR THE SOVIET JEWS?

HON. THOMAS M. FOGLIETTA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. FOGLIETTA. Mr. Speaker, recently, an op-ed column by Theodore R. Mann appeared in the Jewish Exponent, a weekly Philadelphia newspaper. Mr. Mann, who I am proud to say is a constituent of the First Congressional District of Pennsylvania, serves as chairman of the National Conference on Soviet Jewry. Mr. Mann's thoughts on what the future may hold for Soviet Jews provide cogent commentary on a very important topic that must be on our minds as we pursue relations with the new Soviet Government under Yuri Andropov. It is for that reason that I am entering them into the RECORD today.

[From the Jewish Exponent, November 19, 1982]

WHAT DOES FUTURE HOLD FOR THE SOVIET JEWS?

(By Theodore R. Mann)

Concerned with the fate of the Soviet Union's two-and-a-half million Jews, we are asking ourselves some hard questions this week. Will Jewish emigration be permitted to resume under the new regime of Yuri Andropov? Will the condition of Soviet Jews worsen or improve?

It is a critical moment. Twenty percent of the entire world Jewish population resides in the Soviet Union. The change in leadership therefore will affect not only Soviet Jews but the entire Jewish community.

Some say that the situation cannot get much worse than it is. Emigration, after all, has already virtually stopped—only 168 Jews were let out last month. But that is not so. The situation can get much worse.

All dissident movements in the Soviet Union, except one, were decimated over the past decade by the KGB. Yuri Andropov was the head of the KGB. Jewish dissidents were the single exception. While they have been severely harassed, they have been allowed to survive. Most probably, this was because the Soviets believed that their fate was of special importance to the United

States government. Presumably Andropov joined in that decision to make an exception in the case of the Jews. At least one hopes so.

On the other hand, it is not hard to describe how the Soviet Jewish condition could be made infinitely better: Anatoly Shcharansky and the other Jewish prisoners could be released from their jails; the thousands of refuseniks could be allowed to emigrate; a decision could be taken to permit Jewish emigration to Israel at the 1979 rate of 50,000 per year, or even much higher: state-sponsored anti-Semitism and harassment of all activities which give substance to Jewish identity could stop.

Our most optimistic goals can only be reached through a process of negotiation, either between the Soviets and the Israelis, which cannot occur as long as there are no diplomatic relations between them, or between the United States and the Soviet Union, which cannot occur in any meaningful way unless and until relations between the two superpowers begin to thaw.

It would seem to be in the Soviet interest to resume diplomatic relations with Israel. They could thereby gain for themselves a role in Middle East negotiations. The United States has managed to develop and maintain sufficient credibility with most Mideast nations to play a significant role in the evolving political situation in that region. One would think that the Soviets would like to achieve the same status. Nevertheless, they have not done so in the past 15 years, and it is hard to believe that Andropov's ascension to power will make the essential difference.

The more realistic opportunity is that the change of leadership in the Soviet Union might lead to a thaw in U.S.-USSR relations. Jews are let out of the Soviet Union for the same reason that Jewish dissidents have been permitted to exist there: Soviet leaders believe that the safety of Soviet Jews and their right to emigrate are demanded by an American Jewish community influential enough to make the subject important to American governmental leaders.

Jews have been permitted to leave, therefore, in order to induce better relations with the United States or in order to reward better relations with the United States. At this moment, and for the past two-and-a-half years, East-West relations have been so bad that there has been nothing to reward. And in light of the other very difficult items on the Soviet-American agenda, there is nothing to induce. The Soviets are not likely to believe that if emigration levels are raised, the United States will bend on such critical issues as Poland the arms race and Afghanistan.

In other words, the immediate fate of Soviet Jews is tied to the relationships between the two superpowers. For that reason, the most pertinent questions we must ask ourselves are questions like will Andropov seek a period of calmer relations with the United States in order to enable him to concentrate on curing a very ailing Soviet economy? Which will he regard a greater risk to the regime—the injection of some profit motive into the economy, as the Hungarians have successfully done, or a continuing decline in Soviet productivity? Does he believe that in an arms race with the United States, the Soviets have any chance at all of winning, even if other areas of the economy are sacrificed?

The Reagan Administration has tried to demonstrate to the Soviets for two years now that they cannot over the long term compete with us in the production of both guns and butter; that the American productive capacity is simply too great. One would think, logically, that after two years, the Soviets should be ready, even anxious, to press hard for arms limitations accords.

It is clear now that even if the Reagan defense budget is trimmed somewhat in order to lower a dangerously high deficit, the net result will still be an America with a much more substantial defense budget during the rest of this decade than existed in the 1970s. This does not even take into account the great and growing technological gap between the two superpowers and the resulting superiority of American weapons—as evidenced by the relative performance of those weapons in the recent Middle East war.

The Reagan Administration's demonstration of America's will and productive capacity may well cause the new leader of the Soviet Union, anxious to address the very real economic problems in that society, to seek a new kind of accommodation with the United States, a detente without Soviet adventurism. One hopes that the Reagan Administration itself will be equally anxious to reach such an accommodation.

The appointment of George Shultz as secretary of state—less ideological and more practical than the President—will make that more likely. Should that occur, the opportunities for achieving a real amelioration of the Soviet-Jewish condition could improve dramatically.●

POLITICAL PAC-MAN

HON. JAMES M. SHANNON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. SHANNON. Mr. Speaker, the people of America understand the growing influence of political action committees, and they do not like what they see. The December 13, 1982 issue of the New Republic contains an article that describes how unduly powerful these organizations have become. No wonder that a recent Roper poll showed that, by a 2.5-to-1 margin, the American public considers PAC's undesirable.

Those who want some substantive understanding of how PAC's are gaining undue influence should read Mark Green's article, which is called Political Pac-Man. It illustrates in very concrete terms the ways in which PAC's are undermining the very processes which keep our country strong.

Green's article shows that the growing concern over PAC's is bipartisan. And well it should be, since the legitimacy of each Member of Congress is diminished any time there is even the perception that votes in this body are up for sale.

I strongly recommend this piece to all my colleagues, and request that the following excerpts be inserted in the RECORD.

The article follows:

[From the New Republic, Dec. 13, 1982]

ON THE HILL, ALL THE VOTES MONEY CAN BUY: POLITICAL PAC-MAN

(By Mark Green)

(Mark Green is the president of the Democracy Project, a progressive policy institute. He is the author of Winning Back America (Bantam) and of the fourth edition of Who Runs Congress? (Dell), to be published next year. Mr. Green would like to thank Michael Waldman for his research assistance on this article)

"I'm scared," says Representative Barber Conable, the eight-term Republican from upstate New York. "I'm scared," he softly repeats, anxiously pacing around his high-ceiling office in the Cannon House Office Building. "These new PACs not only buy incumbents, but affect legislation. It's the same crummy business as judges putting the arm on lawyers who appear before them to finance their next campaign."

James Shannon, a 30-year-old Massachusetts Democrat and member of the Ways and Means Committee, has his office down the hall. "During the tax bill," he says, "lobbyists asked me to help their cause because 'it will be good for the party,' which meant that business PACs would contribute money to the Democratic Party if Democrats cooperated. One lobbyist who saw me in my office said of a client, 'He makes good PAC contributions to the party.' At this point I exploded, saying, 'I'm tired of hearing appeals based on money.' And you know what he said? 'You think I like this any more than you do?' "

The most absorbing topic of conversation in Congress these days is the rise of Political Action Committees. PACs are groups of like-minded people with an internal means of communication—corporations, trade associations, labor unions, interest groups—who raise funds to give to Congressional candidates. In a kind of financial arms race, candidates from both parties aggressively solicit funds from PACs—who in turn solicit votes from members of Congress. It is this link between PAC contributions to candidates and PAC lobbying of Congressmen that has led people like California Representative Leon Panetta to charge that "Congress is literally being bought and sold by PAC contributions." Yet an annoyed Bernadette Budde, for twelve years with the Business Industry PAC, heatedly disagrees. She expressed the widely held view of PAC managers: "No one has ever shown me one body—not one—who has sold his vote for a contribution."

Admissions of vote buying, which is a felony, are usually as rare as cherry blossoms in November. But for the first time, members of Congress are talking in interviews about specific (if often anonymous) instances when a colleague admitted that a PAC gift procured a vote, or tried to:

In the mid-1970s, a labor union that gave Panetta a $1,500 contribution asked for support of pending "cargo preference legislation." When Panetta asked about the substance of the bill, he was told, "I don't have to tell you anything substantively—we gave you money. We support the bill, and we expect you to." Panetta kicked the lobbyist out of his office, and voted no.

Republican Representative Claudine Schneider of Rhode Island tried to persuade a Republican colleague to oppose more funding for the Clinch River Breeder Reactor. He declined, explaining, "Yes, but Westinghouse is a big contributor of mine."

Another Republican Representative, Jim Leach of Iowa, tells how he once suggested

to an urban Democrat with no dairy constituency that it would be wisest for him to oppose a dairy price support measure, and was told, "Yeah, but their PAC gave me money. I have to support them."

According to one PAC manager, a certain liberal Democratic Representative, unsure how to vote on the recent Reagan tax increase, was told by a business PAC that if he supported the bill, "the slate would be wiped clean" between them. The Democrat voted for the bill, for reasons having nothing to do with the business lobby. Yet when the PAC sent him a $500 check, he angrily returned it, telling the PAC manager, "It was like leaving a 20¢ tip." The PAC then doubled the contribution, which the Congressman accepted.

When Representative Dan Glickman of Kansas asked a colleague earlier this year to join him in opposing a measure that would forbid the F.T.C. regulating auto dealers, he was told, "I'm committed. I got a $10,000 check from the National Automobile Dealers Association. I can't change my vote now." (In a separate incident, the Iowa Beef PAC began a letter asking for Glickman's support on a bill by noting, "As we trust you will recall, the Political Action Committee of Iowa Beef Processors, Inc., has heretofore supported your candidacy. . . ." Glickman sent back their $250, and then voted for the measure, as he had originally intended to.)

Retiring Representative Millicent Fenwick recalls, "I wasn't down here but two months [in 1974], at a dinner for Alvin Toffler, when I sat down next to a reformer in Congress and asked if he'd be overriding a President Ford veto. He said, 'Are you kidding? I took $58,000 from labor and they want it.' "

Representative Mike Synar, Democrat of Oklahoma, says, "I go out on the floor and say to a member, 'I need your help on this bill,' and often he will say, 'I can't do that, I got $5,000 from a special interest.' So I no longer lobby Congressmen. I lobby the lobbyists to lobby the Congressmen."

PAC managers deny that their purpose is to buy votes. "We feel a $5,000 contribution in no way can be construed as an influence on a candidate," says Frank McCarthy of the National Automobile Dealers Association, which contributed over $1 million to candidates in two-thirds of all federal races this year. "My own strong personal opinion is we haven't changed one vote." Other PAC managers add that PACs on both sides of issues often cancel themselves out, and that money rewards past votes but doesn't buy future ones. In response to the argument that PACs cancel each other out, Senator Bob Dole of Kansas remarked, "Poor people don't make campaign contributions. You might get a different result if there were a Poor PAC up here." And on an array of economic issues, such as those involving used cars, oil and gas, dairy price supports, housing, maritime and trucking policy, funeral homes, and antitrust exemptions, specific economic interests have PACs while the consuming public does not.

Economic interests have been contributing significantly to Congressional campaigns for decades. Robert Caro's new biography of L.B.J., The Years of Lyndon Johnson (Knopf) describes in colorful detail how the young Congressman successfully wooed Southwest oilmen in the 1940s. But today's PAC phenomenon dwarfs past special-interest giving. PACs gave $8.5 million to Congressional candidates in the 1972 election cycle, $12.5 million in 1974, $35 million in 1978, and $55 million in 1980. F.E.C. data indicate that all PAC giving is running about 50 percent ahead of the record race of 1979–1980, and will likely exceed $80 million, a ten-fold increase in one decade. Corporate PACs have enjoyed the greatest growth of all, nearly doubling their contributions in only one election cycle—from $9.8 million in 1978 to $19.2 million in 1980. By 1982 business PACs generally (corporate and trade associations) were out-spending labor union PACs nearly 3 to 1. And there is plenty of room for growth: 40 percent of Fortune's 500 largest industrial corporations have not yet even established a PAC.

Unless a candidate is personally wealthy, it is hard to reject PAC money. This causes some wear and tear on candidates with consciences—not because PAC money invariably buys votes, but because it's human nature for anyone, members of Congress included, to want to help those who help you. Richard Bolling of Missouri, the brainy House veteran retiring this year after 17 terms, says, "If you had two phone calls at once, and your secretary said one was a constituent, the other a PAC that gave you $10,000 last election, which phone would you pick up?" Barney Frank sees the matter in simple behavioral terms: "We are the only human beings in the world who are expected to take thousands of dollars from perfect strangers on important matters and not be affected by it."

Adding insult to injury is the way candidates have to seek PAC funds. Many business PACs require a candidate either to submit to a personal interview or answer a questionnaire, and it doesn't take a genius to calculate the cost of a wrong answer. When the National Education Association asks, "Please explain your position on the following: a.) Tax credits for tuition paid to private . . . schools," it's what one Republican Senator in an interview called "the $10,000 question," which he answered incorrectly. Randall Moorhead, of the Realtors PAC survey, says, "Sometimes candidates call me and plead with me to give them the correct answers so they can fill out the questionnaire to our satisfaction."

Consequently, many candidates surrender to the temptation to pander to PAC prejudices. Even a modernate, thoughtful Republican like New York's Benjamin Gilman, who was redistricted into a successful race with his Democratic colleague Peter Peyser, wrote to PACs saying, "I am fighting for my political life against an ultra-liberal Democratic Congressman. . . . Can I count on you for commitment to the free enterprise system, to America, and to my reelection?" Kent Jones, who lost to Democratic Representative Byron Dorgan in North Dakota, wrote to the pharmacists' PAC: "The opponent is best known for his vigorous efforts to win substantial tax settlements against large corporations and has capitalized on the image of being a 'champion of the people,' fighting 'Big Business'. . . ." Then there was Republican John Beuchner, challenging Tim Wirth in Colorado, whose standard solicitation letter left little to the imagination. After asking for funds, he concluded, "What do you stand to gain? You stand to gain my support of probusiness legislation once I am elected."

There is little if any talk in Congress now about changing the rules of the campaign finance game in the 98th Congress. At the same time, many members believed both that change will require a scandal and that, in the words of Representative Tim Wirth, "PACs are a scandal waiting to happen." People ranging from Fred Wertheimer to Kevin Philips, conservative author and commentator, predict a public backlash to PAC expenditures if present trends continue—trends such as the tripling of campaign expenditures in ten years, the doubling of corporate PAC spending in two, and the growing share of campaign fund-raising accounted for by PACs; Ed Roeder's newly published PACs Americana calculates that PACs accounted for an average of 43 percent of the campaign treasuries of incumbents in the past Congress. Already in a recent Roper poll, the public thought that PACs were undesirable by a margin of 2.5 to 1.

If there is to be reform, what form might it take? There is a menu of alternatives available for the next generation of Congressional action:

Free TV and radio. In a report released in September, the Democracy Project detailed a "Voter Access Plan" to provide minimal guaranteed TV and radio time to all Congressional candidates in general elections at a cost of $21 million, or a dime per citizen, with funds raised by the same voluntary tax check-off that supports Presidential campaign funding. (For urban areas where there are many Congressional districts in one media market, a qualified candidate would have the option of "cashing in" the air time for an equivalent mailing.) Great Britain, France, West Germany, and Sweden, among other countries, routinely provide some free air time to candidates. Because this approach is inexpensive, involves voluntary taxpayer funding, and does not require more federal bureaucracy, it has the potential to attract bipartisan support and become the next major reform vehicle in Congress.

A PAC cap per candidate. The Obey-Railsback bill of the 97th Congress sought to limit the amount a House candidate could accept from all PACs to $70,000 per election cycle and to reduce the allowable PAC contribution from $5,000 and $5,000 (primary and general) to $3,000 and $3,000. Nearly 200 candidates got more than $70,000 from PACs in 1980. Supporter Jim Leach calls it "a kind of domestic Salt agreement between big business and big labor, an agreement which is likely to be disliked by each." A version of it passed the House 217 to 198 in 1979, but was not acted on by the Senate.

Public financing. First proposed by Teddy Roosevelt in 1907, public financing would assume some campaign costs, relieving part of the pressure on candidates to take special interest gifts. A version that passed the Senate and failed by 17 votes in the House in 1978 would have provided some $70,000 to general election candidates and put a cap of $180,000 on expenditures. Supporters argue that public financing has worked to clean up Presidential campaigns—so why not Congressional campaigns? Critics attack a system where taxpayers are forced to foot the bill for candidates they oppose, a complaint that recalls an exchange Republican Governor Goodwin Knight once had with Gracie Allen on the old Burns and Allen TV show. "Governor, do the Democrats have to pay part of your salary and office expenses?" "Why yes, Gracie." "Well, Governor, is that fair?" The most current public financing measure is the "Clean Campaign Act of 1982," introduced in October by Representative Obey. It would provide matching funds up to $90,000 for gifts of $100 or under and would impose an expenditure ceiling of $180,000. Although most Congressional observers have regarded the 1978 vote as public financing's high water mark, a

recent Business Week editorial in support of public financing may indicate the start of a rising tide.

A tax credit. At present $50 of the first $100 contributed to Congressional candidates is tax deductible, which helps only those wealthy enough to itemize. Instead, if all taxpayers were entitled to a tax credit of, say, $25, then thousands of individual citizens would contribute to favored candidates, since there is no cost to them. Although this approach is a form of public financing, since there is a consequent revenue loss, it has political appeal because it involves small subsidies to many small contributors rather than a large subsidy to a particular candidate. It is a "democratic" way of funding the campaigns of candidates who lack the wealth of Lewis Lehrman or the BUILD PAC.

Discounted TV/radio and mail. Candidates can now buy time on the electronic media at the "lowest unit charge" for commercial advertisers. Instead, the rates should be further discounted so stations don't lose money, but don't profit, either—a mild precondition, imposed every other October, for the granting of a lucrative public license. Similarly, just as nonprofit groups and political parties mail at reduced rates, so too should general election candidates be able to mail to their constituents at less than 20 cents a letter.

For those officials on the prowl for "new ideas," these approaches can suggest the substance, tactics, and strategy for successful PAC reform legislation. Substantively, a package of three complementary reforms has the best prospect of passage and impact; TV and radio time for general election candidates, a PAC cap per candidate, and tax credits to encourage small donors. Tactically, short of attaching these reforms to a debt-ceiling bill, the preferable legislative vehicle would be legislation affecting an array of Congressional-money matters, electoral and political. Such an overall measure might also increase the limits on individual contributions, indexing them to inflation, and increase Congressional pay, indexing it as well to some appropriate standard. These less desirable provisions might be needed to attract needed bipartisan support—and would be worth the benefit of slowing the PAC race in America.

Strategically, reformers might want to try to use the system against itself by creating their own independent bipartisan PAC—say, "A PAC to End All PAC's—in order to raise and spend funds for positive advertisements on behalf of candidates who support the reform package. Eventually, however, genuine change will depend on two major political preconditions. First, the volume of PAC giving and examples of money influencing votes must continue to grow exponentially—which is likely. Second, a Democratic Presidential candidate must make "stopping the special interest state" one of his campaign themes and then, once elected, must invest political capital in an effort to secure passage—which is problematical.

The public would surely be receptive. Already people are wondering why we had national elections in 1982 that cost $300 million, while the British held theirs in 1979 for $3 million—and why we're the only country on the planet considering itself a democracy that requires its candidates for federal office to raise a half-million dollars from people with specific economic interests in legislation. This process is a triple threat: it balkanizes the Congress so as to frustrate legislative majorities on behalf of PAC-less public interests; it discourages able citizens of modest means from running for federal office—the "silent casualties . . . defeated before they start" in Judge J. Skelly Wright's words; and it tempts most elected officials to genuflect to outside advocates with more money than merit. For in Washington today, Pac-Man is not a video game for kids. It is a cynical business affecting the behavior of adults who govern us, and it takes, not quarters, but $5,000 checks to play. This is not a game that democracy can win.●

DEVILS LAKE SIOUX LAND CONSOLIDATION BILL

HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. DORGAN of North Dakota. Mr. Speaker, I rise in strong support of S. 503, as amended, which will aid the Devils Lake Sioux Tribe—and all Indian tribes—in efforts to promote tribal land consolidation and economic development.

The bill contains provisions nearly identical to those in H.R. 6940, which I introduced at the unanimous request of the Devils Lake Sioux Tribal Council, to help the tribe merge and retain its tribal lands.

After extensive hearings on land consolidation problems, the Senate passed its version of S. 503 on August 20, 1982, while the House Interior Affairs Committee reported the bill with unanimous bipartisan support on September 30, 1982. The committee took the wise step of adding comprehensive land consolidation provisions to those which aid the Devils Lake Sioux Tribe in particular. I understand that the administration also supports the bill as amended by the House committee.

I want to commend Chairman UDALL and other members of the committee for their work and urge my colleagues to support this vitally needed bill.

Two major snags have hindered economic development on the Devils Lake Sioux Reservation. Since non-Indians own over three-fifths of the land within the reservation, this creates a checkerboard ownership effect and prevents the tribe from effectively managing its limited land. In addition, the tribe loses more and more land when it is inherited by a person who is not a tribal member. This erodes the tribal land base.

S. 503 seeks to solve these problems and to promote economic development on the reservation by giving the Secretary of the Interior—as the tribe's trustee—the right to consolidate and prevent the loss of tribal lands.

The bill includes many safeguards to protect the rights of the tribe, tribal members, and non-Indians alike. Any land sales or exchanges are limited to reservation land. The tribe must consent to all transactions. The bill also protects the rights of both member and nonmember heirs. Any money credited to the tribe from sales permitted in the bill must be held in a special account for land purchases only.

A key part of the bill clarifies who has legal jurisdiction on the reservation. By declaring the Devils Lake Sioux Reservation, the tribal homeland of the Devils Lake Sioux Tribe, the bill confirms in statute the operating views of tribal, State, and Federal Governments and prevents costly lawsuits.

I might underscore the fact that the bill does not appropriate any funds for tribal land purchases. Nor does the Devils Lake title affect any land outside the reservation boundaries. It simply intends to help the tribe better manage land within the historic reservation boundaries and thus improve the chances of tribal self-sufficiency.

In sum, the bill seeks to help the Devils Lake Sioux Tribe—and every tribe—become self-sufficient by strengthening its land base, without infringing upon anyone's rights.

The bill thus makes good sense and the House should pass it without delay.●

THE INSIDER TRADING SANCTIONS ACT OF 1982

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. ROSENTHAL. Mr. Speaker, last week I introduced legislation to strengthen the Security and Exchange Commission's authority to prosecute violators of the law prohibiting insider trading. "The Insider Trading Sanctions Act of 1982" would allow the SEC to seek civil penalties equal to three times the profit gained or losses avoided by insider traders and would increase criminal penalties. At present, the strongest civil penalty available to the SEC is limited to seeking simple repayment or disgorgement or profits. The maximum criminal fine is $10,000.

This means that a person who obtains material, nonpublic information about an upcoming takeover or some other event that will affect the stock price of a publicly traded company, can make enormous profits and, even if caught, frequently walk away by simply repaying his illegal profit. It is a gamble many are willing to take, especially since criminal sanctions are rarely sought by the Justice Department. Insider trading has serious adverse effects on individual investors and on the integrity of the securities markets. People with inside information benefit to the detriment of innocent people who lose money on these fixed situations. For every insider who profits, another investor without inside information is the loser. Per-

haps even more important, faith in the integrity and fairness of the market is undermined when all are not equal in access to information. The SEC is correctly interested in increasing penalties and in avidly pursuing violations of the laws against insider trading.

The Commerce, Consumer, and Monetary Affairs Subcommittee of the Committee on Government Operations, which I chair, has examined the insider trading phenomenon. In the takeover of Santa Fe International Corp. by Kuwait Petroleum Corp., a pattern of insider trading was quite evident. The SEC and the various stock exchanges conducted investigations and the SEC has filed several cases. In spite of severe obstacles to prosecution, such as substantial trading through secret Swiss accounts, the SEC has made progress in several of its cases. However, the SEC's law enforcement efforts are undermined because the relief obtained—simply having the wrongdoer agree to repay his wrongfully earned profit—is not a deterrent to future misconduct by others. In one case, a Federal judge in California has refused to accept a settlement solely requiring repayment of profits, even though the SEC claims it has no power to impose a greater civil penalty.

The bill I have introduced would also increase from $10,000 to $100,000 the maximum fine that may be imposed in criminal prosecutions under the Securities Exchange Act of 1934. This proposed increase in criminal fines, the first since the law was passed in 1934, is obviously necessary to impose a meaningful deterrent.

Mr. Speaker, I hope that favorable congressional action on this legislation will encourage the SEC and the Justice Department to pursue more vigorously criminal and civil remedies in insider trading and other "white collar crime" cases such as fraud by bank officers or directors. I am now submitting a section-by-section analysis of the bill and selected news articles detailing why the bill is needed. This legislation also has the full support of the SEC.

I urge my colleagues to support this bill.

The material follows:

ANALYSIS OF THE BILL BY SECTION

Section 1. The act may be cited as "The Insider Trading Sanctions Act of 1982." Although Section 3 of the Act provides a larger criminal fine for most violations of the Securities Exchange Act of 1934, the Act principally provides a significant new remedy for insider trading.

Section 2. The Act amends Section 21 of the Securities Exchange Act of 1934.

Paragraph (d) of Section 21 now allows the Securities and Exchange Commission to bring actions to enjoin violations of the federal securities laws. The Act creates an additional remedy for insider trading in secondary trading markets by providing that whenever it appears that certain transactions were illegal because they were effected by someone in possession of material nonpublic information, the Commission, in addition to seeking other remedies such as an injunction or disgorgement, may seek an order in a district court action requiring the violator, or anyone who aided and abetted the violation, to pay as a civil penalty an amount of money up to three times the profit gained or loss avoided as a result of the unlawful transaction. Such amount of money shall be payable into the Treasury of the United States.

If the person upon whom such penalty is imposed shall fail to pay such penalty within the time prescribed in the court's order, the Act expressly authorizes the Commission to refer the matter to the Attorney General, who may recover such penalty by action in the appropriate United States District Court. As with other civil orders entered as a result of an action brought by the Securities and Exchange Commission, the Commission may in its discretion seek to enforce an order under this section by appropriate proceedings.

The provisions of Section 27 relating to venue, service of process, and other matters in "actions to enforce a liability or duty created by this title" apply to actions under this paragraph.

This new remedy is available to the Securities and Exchange Commission regardless of whether or not the Commission has pursued other remedies available to it. The choice of which remedies to pursue remains in the discretion of the Commission.

The Act empowers the Commission to adopt rules or regulations that exempt any class or persons or transactions from the operation of the civil penalty provision.

Section 3. The Act increases from $10,000 to $100,000 the maximum criminal fine that may be imposed on persons, other than exchanges, who willfully violate the Securities Exchange Act of 1934 (other than section 30A) or willfully and knowingly make certain false statements. Section 3 neither changes the type of misconduct that may be punished nor creates any new defenses. This section of the Act is not limited to violations arising out of insider trading.

Section 4. The Act is to become effective immediately upon its enactment.

[From the Chicago Sun-Times, Oct. 18, 1982]

GET-TOUGH SEC A WELCOME SIGHT

(By Jerome Idaszak)

The Securities and Exchange Commission, which gets criticism at times and at times deserves it, should receive applause for delivering on its promises to crack down on insider trading.

SEC enforcement chief John Fedders told a meeting of layers at Northwestern University last spring that the headlines would soon demonstrate the SEC get-tough policy. And they have.

Earlier this month, a director of Santa Fe International Corp., without admitting or denying the charges, agreed to repay $287,750 that the SEC said he gained from buying options before Santa Fe's takeover by a Kuwait oil company in October, 1981. Another businessman earlier this year surrendered $424,000.

Also in the Santa Fe case, the SEC is going after an attorney and five relatives, saying they reaped $787,000 in profits. The lawyer for the group says his clients are innocent.

Lawyers, bankers, brokers and businessmen have been targets of 26 proceedings that the agency has filed since the new chairman and top staff took charge in 1980.

The SEC was created as part of the New Deal reform to restore confidence in the stock market. The era of the SEC as champion of the small investor is long gone, if indeed it ever existed. The agency's main role these days is to ensure the integrity of the system, and it goes after notable cases to make its point.

In the 1970s, Wall Street began to worry about individual investors shunning stocks. A bear market caused much of that, but securities leaders did worry about loss of confidence in the market was perceived as stacked in favor of "the house."

With suspicions of a big increase of insider trading abuse in recent years, the integrity of the system was being questioned. That's why the crackdown came. Fedders said the SEC wants to "raise the level of risk" for insiders who take the gamble that they won't get caught.

But it's only a first step. The biggest penalty the SEC can extract is repayment of profits. That's little more than a slap at someone who's willing to run a risk of making a half million or more.

It's not just the SEC that's hampered. The U.S. attorney's office in New York brought charges against a lawyer who reportedly made profits of $450,000 buying shares in nine different companies before takeover bids were announced.

The judge in that case sentenced the lawyer to a one-year suspended sentence and two years' probation. Prosecutors said the judge refrained from a harsher sentence because the lawyer's record indicated an emotional disorder was a major cause of the illegal actions.

While the SEC, then, can refer a case to the Justice Department for criminal charges, the charges are tougher to prove.

The problem is serious. One study says that stocks of companies that are takeover targets frequently rise a week before a public announcement. The potential rewards make the risk of detection worthwhile—one person charged with insider trading bought $3,000 worth of options that soared in value to $424,000 in two days.

Seeking to raise the ante for insiders, the SEC earlier this year sent Congress a request that civil penalties be triple the amount of profits gained or losses avoided by the inside trader. The agency also wants an increase in the maximum fine to $100,000 from $10,000.

It's unlikely those requests will get approved this year when Congress begins its post-election session Nov. 29. And even next year, the SEC request may be blocked by some who would argue that if the penalty is tripled, defendants who now choose to settle instead may choose to fight. Lawsuits take time, people and money. It would require more staff attorneys at the SEC.

So a debate over budget could stall the triple penalty. But it shouldn't. The need is for deterrence, and a slap on the wrist isn't enough.

Insider trading, like any crime, can never be wiped out. But if it's worth having an enforcement agency to chase crooks, then the agency should have a big club to use when it catches up with them.

The SEC should continue to push for the triple penalty. And Congress should go along.

[From the Wall Street Journal, Nov. 23, 1982]

SEC GOES AFTER SANTA FE INSIDERS, BUT LIGHT PENALTIES DRAW CRITICISM

(By Richard L. Hudson)

WASHINGTON.—Shortly after the stock market closed on Oct. 5, 1981, an announcement came clacking across the news wires: Kuwait Petroleum Co., the huge oil producer owned by the Kuwaiti government, had agreed to buy Santa Fe International Corp. for $2.5 billion in cash.

But the news was apparently old to some people. For more than a week, trading in Santa Fe stock had been booming. So had sales of seemingly worthless options—contracts to buy Santa Fe stock at prices far above the prevailing market price. Then the merger news brought a 140% jump in Santa Fe's stock price, and some of the options soared to $1,925 apiece from $37.50 a few days earlier.

The unusual trading "raised questions" in the minds of Securities and Exchange Commission investigators, recalls Theodore A. Levine, the agency's associate enforcement director. Had some of the buyers broken the law by buying securities with inside knowledge of the merger?

A small cadre of SEC investigators started trying to answer that question. Their work has developed into what the SEC calls its most productive insider-trading investigation ever. In four lawsuits, the SEC has charged certain Santa Fe insiders with illegally using advance knowledge of the merger to turn investments totaling less than $540,000 into trading profits of $8.5 million. The accused include one Santa Fe director and the personal accountant to another; a Kuwaiti businessman; and three Santa Fe employees, their relatives and friends. A number are contesting the charges. The SEC is continuing the investigation.

WE CAN CATCH ANYONE

When the Santa Fe acquisition agreement was announced, the SEC had already begun a campaign to crack down on insider trading. Now the diversity of the people charged in the Santa Fe suits demonstrates to the SEC "that we can catch anyone," says John Fedders, the agency's enforcement director.

But the Santa Fe case also illustrates the SEC's inability to extract stiff penalties in such situations. The agency lacks the legal power to fine or imprison traders on its own. It has been proposing court settlements with many of the Santa Fe traders that require them to pay back their trading profits, without admitting or denying guilt, and little more.

This policy prompted angry criticism from a federal judge, who last month rejected one such agreement. U.S. District Judge William Orrick Jr. in San Francisco said, "I think the commission is derelict in its duty" by proposing such lienient settlements.

"These are thieves we're talking about," the judge said at a court hearing. "The government is prosecuting people for stealing Social Security checks out of the mail, welfare frauds . . . and here these people come down and get a slap on the wrist. That isn't much in the way of deterrence."

The judge suggested tougher penalties, such as charging the traders for the cost of the SEC investigation or referring the civil case to the Justice Department for criminal prosecution. The SEC rejected the idea of pressing for a stiffer civil penalty, saying that fast settlements free its investigators for other cases. The agency noted that it hasn't yet been authorized to get much more from traders than a repayment pledge, though it is urging Congress to authorize civil penalties of up to three times the trading profits.

As for criminal penalties—fine or imprisonment—the Justice Department says it is "working closely with the SEC regarding several allegations of insider trading" in the Santa Fe case. But neither it nor the SEC will elaborate. Criminal indictments are rare in such cases. One reason is that criminal charges are harder to prove than the SEC's civil charges. Another reason, contends Ralph Ferrara, a former SEC general council, is that "U.S. attorneys are interested in economic crimes that deliver greater body counts than insider trading cases."

There haven't been any complaints of leniency, though, about the SEC's investigation of the Santa Fe case. Shortly after the agreement to purchase the Alhambra, Calif.-based Santa Fe was announced, a half dozen SEC investigators, led by Mr. Levine and his aide, John F. Hartigan, set off on the track of the traders.

The SEC had other reasons for being interested in the case besides suspicious trading. Two Pacific Stock Exchange market makers who had sold options to the traders were forced out of business by their losses, and the exchange was irate. Moreover, the merger caused a dispute in Congress, where there was concern about Kuwait's getting control of Santa Fe's oil drilling and defense work.

The investigators got early help from the Pacific exchange, which searched its trading records to help the agency identify the brokers and bankers involved in the trading. SEC subpoenas promptly went out seeking to learn the identities of the customers behind the trades. The first client to be charged, only three weeks after the merger announcement, was a customer of Merrill Lynch, Pierce, Fenner & Smith Inc.'s Kuwait office. Multimillionaire Faisal al Masoud al Fuhaid was accused by the SEC in federal court in New York of illegally making about $840,000 on his trades. He is contesting the SEC allegations in court.

Meanwhile, however, many of the trades had been executed through secret Swiss bank accounts. To deal with that obstacle, the agency took the unusual step of getting a federal court in New York to freeze more than $5 million in trading profits that the banks were holding for their clients. It also asked Swiss authorities to waive bank-secrecy laws. The Swiss are expected to cooperate, which could help the SEC bring new cases.

LOTS OF SUITS

In September, the SEC also obtained an agreement from Santa Fe director Darius Keaton to repay $278,000 in trading profits, without admitting or denying insider-trading charges. The SEC won't discuss publicly how it found out Mr. Keaton was a trader. But his attorney, Arnold Jacobs of the New York law firm of Shea & Gould, confirms that Mr. Keaton turned himself into the SEC last spring. Mr. Jacobs says his client is "a very honorable man" and never had any intention of illegally profiting from his stock purchase.

Separately, the SEC sued the personal accountant of another Santa Fe director, Stanley B. McDonald. It alleged in federal court in Seattle that the accountant, Gary L. Martin of Seattle, deduced a merger was afoot when Mr. McDonald asked him to calculate the tax liability in the event of a sudden capital gain. Using Mr. McDonald's figures, the accountant guessed the director was expecting a sharp rise in the value of his Santa Fe stockholdings and began buying options, the SEC charged. Mr. Martin is contesting the allegations.

Recently, the agency sued three Santa Fe employees who had helped the company prepare for the merger. One, Ronald A. Feole, is general counsel of a Santa Fe unit. The SEC alleged in federal court in Los Angeles that he passed on the merger news to two reatives and two former neighbors in cross-county telephone calls. They were also charged with illegally buying Santa Fe securities. The SEC announced yesterday that the two relatives had agreed to pay back their profits, without admitting or denying guilt.

Mr. Feole, who is contesting the charges against him, was so taken with the idea of buying Santa Fe securities that he placed orders with his Dallas broker from China, where he was traveling on business, the SEC alleged. He also touted purchases with coworkers telling them "if they failed to purchase Santa Fe call options they would miss a good investment opportunity," the SEC charged.●

TRIBUTE TO CLARICE BYRD

HON. BILL CHAPPELL, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. CHAPPELL. Mr. Speaker, I would like to pay tribute today to Mrs. John Dewey Byrd (Clarice), an outstanding citizen, whom I have had the privilege and honor of representing in this Chamber for the past 14 years. Clarice's dedicated service to her community and the Democratic Party is widely recognized by all those with whom she has been associated. For this reason, on November 13 the Democratic Women's Club of the New Smyrna Beach, Edgewater area paid a special tribute to Clarice for her tireless efforts on behalf of the Democratic Party. At that time, the Florida State legislative delegation from Volusia adopted a resolution honoring Clarice Byrd, "For her years of dedicated service to the Democratic Party and its candidates and officeholders."

Clarice has distinguished herself as a civic leader in the Volusia County community and has greatly assisted the city of Holly Hill as well as served as an adviser to Bethune Cookman College. In addition, Clarice has been the president of the Halifax Area Democratic Women's Club for five separate terms, served as a member of the Volusia County Executive Committee for many years, and participated in the Democratic Women's Club of Florida, Inc., as the Region II vice chairperson.

As a candidate who has personally witnessed her invaluable contributions on behalf of the Democratic Party and our country as a whole, I know firsthand of her years of dedication to our Nation's political process. She is an ex-

traordinary person and her accomplishments will be appreciated and well remembered for many years to come.●

NATURAL GAS CONTRACTS MUST BE RENEGOTIATED

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. CORCORAN. Mr. Speaker, especially now that we are entering the heating season, I am deeply troubled by the ever-increasing prices being experienced by natural gas ratepayers. It is interesting that despite the vast differences that exist among the people of this Nation, be they political, economic, or regional, there seems to be a strong consensus emerging that suggests fundamental changes in U.S. natural gas policy are urgently needed.

An article in the November 8, 1982, issue of Time accurately outlines the problems as well as some of the grim implications for gas consumers in this country. This article paints a rather grim, but realistic, picture of the problems gas consumers face in the months ahead. It also, however, suggests some corrective actions for the future.

One pipeline company that I feel has begun to take some steps in the right direction is the Natural Gas Pipeline Co. of America (NGPL). In a November 23 letter to its 49 distribution company customers, NGPL stated its recognition of the current concern about rising natural gas prices at a time of increasing supply and decreasing demand. Additionally, the letter outlines some of the steps NGPL is taking to address these concerns. Naturals' two major customers are Northern Illinois Gas and Peoples distribution companies in my home State of Illinois. Northern Illinois' service territory includes Chicago suburbs and Peoples' service territory includes the city of Chicago.

Mr. Speaker, these materials are representative of the resounding message Members of Congress, of both political parties, of every ideological persuasion, have been receiving regarding natural gas policy in the United States. As a member of the Energy and Commerce Subcommittee on Fossil and Synthetic Fuels, the communications I receive suggest that nobody is happy with the current state of affairs. Producers, pipelines, distribution companies, and consumers can all find something to legitimately complain about regarding U.S. gas policy. It is no secret that the present law has allowed pipelines to purchase and get "locked in" to high-cost imported products such as Canadian natural gas and Algerian liquefied natural gas (LNG). At the same time, other sources of cheaper, domestic gas are either underutilized or completely shut in. In my opinion, most of the present problems confronting us in this area can be directly or indirectly traced back to an ill-conceived regulatory scheme called the Natural Gas Policy Act of 1978. Particularly if the various segments of the natural gas industry are not going to renegotiate their contracts on a timely basis, then I believe the next Congress will have no choice but to legislatively deal with this natural gas policy gone haywire early next year.

Mr. Speaker, for the benefit of our colleagues, I would like to include in the RECORD the text of the November 8 Time article as well as the text of the November 23 NGPL letter to its distribution company customers.

[From Time magazine, Nov. 8, 1982]

GASFLATION—A COLD, COSTLY WINTER AHEAD

For many years Americans who heat their homes with natural gas have been a privileged class. While families who use fuel oil have cursed OPEC and watched helplessly as their heating costs reached crushing levels. Government price controls have kept gas bills comparatively modest. Last winter, heating with gas was about 50 percent cheaper than burning oil. The gap between the two fuels has been so great that since 1980 more than a million households have switched their money-munching oil boilers or furnaces to gas, a process that costs anywhere from several hundred dollars to a few thousand.

But now the energy price outlook is changing rapidly and dramatically. While oil costs are expected to be relatively stable this winter, the U.S. Department of Energy forecasts that gas prices will rise an average of 20 percent across the U.S. In some areas gas-price hikes may run as high as 40 percent. Mary Kurt, a home economics teacher in Toledo, is paying $77 a month for gas. That is 38 percent more than she was charged a year ago, even though she has stuffed the nooks and crannies of her home with insulation. Says she: "I can't think of much more to do except shut down the furance."

What infuriates gas customers is that the price increases seem unjustified and arbitrary. The hikes come at a time when gas supplies are plentiful and demand from industrial users has been reduced sharply by the recession. According to the most basic principles found in any economics textbook, gas prices should be going down, not up.

In the real world, however, gas costs are determined not by market forces but by abstruse and sometimes counterproductive Government regulations and by complex contracts between gas producers and the pipeline companies that supply the gas to local utilities. The origins of the current price explosion go back to the cold winter of 1976–77, when gas shortages forced many schools and factories to shut down temporarily. After that disaster, Congress decided to spur new production by passing the Natural Gas Policy Act of 1978, which called for the gradual phaseout, through 1984, of price controls on gas produced from new wells. The law set guidelines on how much the cost of gas could go up each year. Pipeline companies, eager to ensure future gas supplies, signed numerous long-term contracts with producers, in which it was often agreed that prices would rise. Now, even though gas is abundant, the pipelines are locked into those contracts.

To make matters worse, the regulations that have evolved from the Natural Gas Policy Act have discouraged producers from holding down their costs. The rules identify some 28 categories of gas, as well as price ceilings that vary widely. In general, the newer a gas well is and the deeper it is, the more money a producer can charge. Naturally, producers have an incentive to drill new and expensive deep wells rather than sell cheaper gas from existing fields.

The system has become so complicated that no one can be certain what would happen if controls were lifted immediately instead of being phased out. The Reagan Administration supports quick decontrol, but has not pressed the issue because of strong opposition in Congress and criticism from consumer-protection groups. The Washington-based Consumer Energy Council of America contends that faster decontrol would add $400 a year to the average gas bill. But Charles M. Butler III, the Reagan-appointed chairman of the Federal Energy Regulatory Commission, argues that if controls were removed and pipelines were allowed to renegotiate their long-term contracts, gas prices might acturally fall. He reasons that only the laws of supply and demand, rather than the laws of Congress can bring about the most rational gas prices.

NATURAL GAS PIPELINE CO.
OF AMERICA,
A MIDCON CORP. COMPANY,
Chicago, Ill., November 23, 1982.

DEAR—— ——: I am writing this letter to you to convey my continuing concern about the national problem of escalating cost of gas at the wellhead and the ultimate impact of this cost on you and your customers. As we enter the winter season all of us expect strong customer reaction. This reaction could cause potentially undesirable solutions imposed on the industry by regulators and legislators. At the same time, various segments of the industry will be advocating a variety of legislative solutions to this cost problem.

It is important for you to know the extent of the effort Natural has undertaken to mitigate rising gas costs. It is also important for you to know Natural's current position toward certain legislative and regulatory proposals. Therefore, I submit the following to you:

Natural is continuing its long standing efforts to obtain long-term gas supplies to take care of the needs of its traditional customers. We continue to exercise care and prudence with respect to the price and other conditions in gas purchase contracts. As you know, we continue to have one of the lowest, if not the very lowest, city gate prices of any pipeline serving large metropolitan areas.

We are extremely cognizant of the need to tailor our purchase policies to our markets. We have recently signed a rather large contract which contains pricing provisions which are responsive to market clearing prices. We will also continue to include "market out" clauses in our contracts. Although we anticipate some very attractive opportunities to purchase gas are expected to develop, we will continue to be very selective and will seek the best possible contractual terms.

Natural is not, and has not been, contracting for any significant amount of unregulated deep gas. At the present time, Natural is

purchasing less than 0.5 percent of its supply as Sec. 107 High Cost Gas. This gas comes primarily from contracts which include much larger volumes of regulated gas. This small volume of high cost gas places Natural in a unique position, however, we are reviewing the efficacy of exercising market out provisions in applicable contracts.

Natural's takes of Canadian gas have been cut to the minimum possible under existing contracts. We will continue to do this as long as we continue to experience excess deliverability and less expensive gas is available to us. The minimum takes are 75 percent of the annual contract quantities. This allows Natural to take at 100 percent in the winter and drop well below 75 percent (zero on some days) in the summer months.

We have recently had discussions with TransCanada Pipeline Company concerning 100 MMcf/D of new Canadian gas supply scheduled for delivery commencing November 1, 1984. This application is now before the Canadian authorities. We have expressed a strong concern over the Canadian border price as it affects this supply. We are concerned about the viability of this project under the present pricing provisions. TransCanada advises us that this is an issue that must be dealt with and is presently consulting its customers about this problem. In addition, this pricing question will probably be a subject of negotiations between the two governments. Canada's substantial gas reserves are important to Natural in the long run, and it is important that we keep this option of additional gas open as long as possible. We will not accept the authorization of this supply if the conditions of the sale are not satisfactory.

Natural has informed United Gas Pipe Line Company that it does not desire to continue purchasing gas from United after the expiration of its contract on December 31, 1982. The supply from United has escalated rapidly in price to the point that the current commodity rate is approximately $4.15 Mcf. Natural has not taken any gas from United in recent years, as a matter of fact, we have sold them gas. As a result of a tariff change effective October 1, 1982, we are now faced with a 66⅔ percent minimum take. Therefore, we have been purchasing at this volumetric level even though we have protested incorporation of this tariff provision. The necessary steps are being taken toward abandonment of this source of supply.

Natural is actively pursuing modification of our service agreement with Colorado Interstate Gas Company in an effort to reduce the 90 percent annual minimum commodity bill provision contained therein. CIG's rates have risen at a sharp rate and it is only prudent that we attempt to alter this onerous contractual provision. We have informed CIG that we will vigorously oppose their current rate settlement or institute the necessary actions under the Natural Gas Act in order to eliminate or substantially reduce this minimum bill provision.

Natural has notified all of its producer suppliers that it believes it is necessary to renegotiate all contracts that provide for gas prices to rise above market clearing price levels. While this is a long arduous task, appropriate actions have been initiated. Natural believes that this problem of indefinite price escalators is best handled in this manner, rather than attempting to have legislative action.

We have filed for substantive changes in our rate design which, if adopted, will enhance marketability to high volume users.

Natural has adopted a policy of transporting gas for others. This will result in more efficient use of the system and lower unit transportation costs to traditional customers.

Natural has spoken out repeatedly against proposals to decontrol "old gas"—gas from wells drilled before 1978. Deregulation would confer no benefit to our customers and would lead to higher prices. Such a move would penalize Natural who has been diligent in acquiring low-cost supplies.

Natural continues, however, to be faced with short run excess deliverability and substantial take-or-pay exposure. Our offsystem sales program has proven such time as one of our other actions begin to bear fruit. We continue to urge you to support our program and to bear with us as we attempt to deal with our current demand/supply imbalance which we believe is manageable and of relatively short term duration.

I am proud of Natural's past record. I promise you that we will continue to pursue every avenue possible to keep gas prices in line, responsive to your markets and to satisfy your long term needs for gas. We have enjoyed and appreciated your support in the past and we will work as closely as possible with your people. We welcome your comments and questions.

Sincerely yours,

GEORGE L. MORROW,
President.●

TEL-A-FRIEND "PHONES HOME"

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. BIAGGI. Mr. Speaker, reach out and touch someone, familiar words that bring to mind smiling faces of families and friends united across the miles by the mere ringing of the telephone. Last week I had the opportunity to learn just what those words meant when I participated in a new telephone reassurance program in my Congresssional District of the Bronx called Tel-A-Friend, a program launched in conjunction with National Home Health Care Week, a proposal which I cosponsored.

Tel-A-Friend, designed by the Visiting Nurse Service of New York, when fully in operation will reach an average of 150 homebound elderly men and women each week. It began last Monday, November 29, and I was given the high honor of placing the first phone call. Although this call had been publicized, it was so very gratifying and heartwarming to spend minutes chatting with Mrs. Mary Millon, a widow living alone and one of my constitutents. This call was followed by another to Ms. Katie Baker, also a constituent and also a very lovely lady. We chatted as though we had known each other for years, and talked about subjects of mutual interest and concern.

I am quite honored that the visiting nurse service selected me to open the program because as the ranking New York member of the House Select Committee on Aging, I have an intense and deep concern for the millions of elderly Americans in this country, and especially the nearly 1 million who live in New York City. Over 150,000 senior citizens live in my district, and unfortunately, many of them live alone. I am aware that certain problems face these elderly people, and feel confident knowing the Tel-A-Friend will be there to provide a welcome break to elderly homebound residents, who might be depressed or lonely. For some of these isolated people, a phone line is their link to the rest of the community; it is their lifeline.

Tel-A-Friend, this winter, will be manned by 10 to 12 volunteers most of whom are senior citizens themselves. They will place phone calls 5 days a week, from 9 a.m. to 1 p.m. I had the opportunity to meet some of the people who will be volunteering their time, and I was impressed with their sincerity and concern for the homebound. Their understanding, enthusiasm and active involvement will make Tel-A-Friend a great success.

Equally successful in her achievements is Miss Anne-Marie Thom, the executive director of the Visiting Nurse Service of New York, Inc. which is underwriting Tel-A-Friend as a community service. Although Miss Thom has recently announced her December 31 retirement, she will remain a vital figurehead within the organization. In the past 22 years, Miss Thom has seen the visiting nurse service grow from a solitary program to a huge multiservice expansion designed to reach millions. Miss Thom's departure comes at a time when the agency is celebrating its 1 millionth visit and the success of last year's million dollar donor program. I salute Miss Thom for her leadership which is directly responsible for the agency's success.

It has been my pleasure to share with you my experience at the Tel-A-Friend ceremonies last week. I urge all to join me in congratulating Miss Thom, the visiting nurse service and Tel-A-Friend for their important and outstanding contributions to the elderly community. Christmas will be merry for many because of them.●

ARMS CONTROL IN THE REAL WORLD

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. RUDD. Mr. Speaker, the emergence of the themes enunciated by the so-called nuclear freeze movement, especially in the 1982 elections, had both positive and negative sides to it.

The negative, and I think very dangerous, side was its tendency to per-

suade citizens to avoid certain inescapable facts that we face in the real world. The fact that we share this world with some powerful adversaries, namely the Soviet Union, which do not hold the same values we hold, and which certainly do not have the same views on the use of military might as we have. History plainly bears these differences as inescapable facts.

The more positive side to this debate on nuclear and arms control issues is the possibility that the American public can become more educated and better informed on the intricacies, and the real complexities, involved in the nuclear arms issue.

For this latter purpose, I submit the very timely and important article which appeared in a recent edition of the Armed Forces Journal concerning the debate on nuclear arms. It is entitled "Arms Control in the Real World," and I highly recommend my colleagues read this thought-provoking statement by Gen. Kelly Burke, former U.S. Air Force Deputy Chief of Staff for Research, Development, and Acquisition.

The article follows:

ARMS CONTROL IN THE REAL WORLD

(By Kelly H. Burke)

The great nuclear freeze debate—in all its manifestations—rages on in the United States as well as in many of the Western European countries. Regrettably, there is no discernible evidence of a comparable drive among the citizens of the only other nuclear superpower, the Soviet Union.

Unfortunately, for those who view debate as a mechanism to marshal facts and sharpen logic, the nuclear freeze controversy has seen precious little of either. Instead, the protagonists on both sides have, for the most part, offered a steady drumbeat of emotional rhetoric and *ad hominem* attacks against their opponents.

But leave it to Gov. Jerry Brown to reach new heights of hyperbole and new lows of campaign demagoguery. Brown, a Democrat, is presently locked in a hard-fought campaign for the seat of retiring Sen. S. I. Hayakawa. His Republican opponent is Pete Wilson, currently mayor of San Diego.

Brown's newest campaign gimmick is a television ad that seeks to translate the substantial emotional appeal of the nuclear freeze movement into votes. The ad opens with Ron Cey of the Los Angeles Dodgers baseball team saying. "I want to keep on playing baseball." He is followed by conductor Leonard Bernstein who wants "to go on making music." Then, actress Candice Bergen says, "I want to go on doing it all."

Next, the screen is filled with the unmistakable mushroom shape of the fiery nuclear explosion, and then a small boy saying plaintively, "I want to go on living."

The ad concludes with a shot of Brown, presumably projecing peacefulness and goodwill, while an announcer delivers the not-too-subtle appeal to the voters: "Pete Wilson opposes the nuclear arms freeze. Jerry Brown supports it. Vote for your life. Elect Jerry Brown to the US Senate."

Now that's really getting down to basics: "Vote for me and you live, vote for my opponent and you die."

Would that life were that simple and that the issues we face could be reduced to such simplistic formulations. But they can't be, and certainly the nuclear freeze question can't be boiled down to a pithy one-liner.

Nor does it seem likely that those who question the desirability or practicability of a nuclear freeze (whatever that means) are motivated by a belief that any nuclear war is apt to have a happy ending. It is equally unlikely, as some have suggested, that all supporters of the nuclear freeze movement are Communist sympathizers, if not outright card-carrying members of the Communist Party.

SECURITY IN A DISORDERLY WORLD

It's no bad thing that hundreds of thousands, perhaps millions, of people in this country are giving reasonably serious thought to the nuclear issue. All of us ought to view the prospect of nuclear war with absolute horror. All of us ought to regret the necessity of the large expenditures required to maintain the nuclear balance (but no more than we should deplore the much higher cost of the nonnuclear arsenals). Having done that, we then must carefully assess the few *real* alternatives that might provide us peace and security in this dangerous and disorderly world.

There is an old, shopworn axiom which holds that war is too important to be left to generals. Certainly that is true. But certainly the pursuit of peace is also important enough to warrant the time and attention of all of us.

A marvelously intelligent young Frenchman, Alexis de Tocqueville, visited our country in its infancy and recorded his observations in a book entitled *Democracy in America*, a book that has stood the test of time remarkably well.

With uncanny foresight, de Tocqueville predicted that a major problem, perhaps a fatal one in this democratic America, would be the difficulty in reconciling the inherent conflict between the peace-loving, anti-militaristic tendencies found in democratic people and the necessity to defend ourselves in a hostile world. History has proven de Tocqueville correct. That tension of which he wrote has been a consistent theme in America and is clearly evident now in the nuclear freeze debate.

Nuclear war and nuclear deterrents are not simple or pleasant subjects. Herman Kahn captured that thought nicely in the elegantly simple title of his early book on this subject, *Thinking about the Unthinkable.*

Even professional military officers often have great difficulty in grapling with the enormity and complexity of nuclear issues. That isn't to say that we shouldn't all try to think our way through this subject, only that we shouldn't expect to find simple and easy answers, and we should be highly skeptical of those who offer such answers ("vote for me and you live").

SWORDS INTO PLOWSHARES

In considering nuclear issues, it is useful to reflect on the world as it is. It is also useful to reflect on the world as we would wish it to be. But it is dangerous to confuse those two worlds.

A few millennia have passed since Isaiah prophesied a time when man would beat his swords into plowshares. It is a sad commentary on mankind that there has been little if any progress in the direction of Isaiah's vision. While all of us can lament that it is so, few, if any, can doubt man's continuing proclivity to settle disputes with violence. In such a world—regrettably the real world in which we live—force remains the final arbiter, and nuclear forces the absolute, the ultimate, arbiter.

Another unpleasant but inescapable fact about the real world is that we share it with a powerful and not-very-friendly competitor, the Soviet Union, a country that has shown an inordinate enthusiasm for acquiring military force and at least a cautious willingness to use that force in the pursuit of its political goals.

In such a world it would be a fundamental and perhaps fatal mistake for America to adopt any form of nuclear freeze that could lead it to a position of unambiguous nuclear inferiority. This is not to argue that on the day the Soviets calculate they're ahead by 10, 20, or even 100%, they will push the nuclear button and annihilate us. Given the complexity and unpredictability of nuclear exchange calculus, even a relatively small nuclear force has a reasonable prospect of deterring a much larger one.

But before airily dismissing the likelihood of nuclear war, it is well to reflect on the history of war. More often than not, wars begin in irrationality and confusion, frequently to divert attention from internal problems. Hence, our nuclear forces must be sized and shaped not just to deter war or nuclear war in relatively normal and placid times but in times of *extremis*, times when perhaps the Soviets are in danger of losing control over their people and their empire is crumbling. That is the correct test of the adequacy of our deterrent.

NUCLEAR BALANCE PERMEATES WORLD AFFAIRS

Even aside from deterrence of war, the nuclear balance is a dominant theme in another important context in this real world in which we live. Nuclear superiority, if attained by the Russians, can be and certainly would be converted to political leverage. The nuclear balance and the perceptions of that balance permeate world affairs today. That balance affects the behavior of not only the two superpowers but of the rest of the world as well.

To the extent that the Russians see themselves as ahead in this competition—and there is evidence that they do believe themselves somewhat ahead at this point—they will tend to be even more adventuresome and opportunistic than they have been in the past. The other side of that coin is, of course, that to the extent we see ourselves as behind in the nuclear balance, we will tend to be more timid and less willing to interpose ourselves between the Russians and their objectives, no matter how much we may deplore those objectives. This is the first and immediate danger of allowing any major imbalance to develop.

Damon Runyon, a great American philosopher who liked to masquerade as a writer, once wrote: "The race is not always to the swift not the battle to the strong, but that's the way to bet." Runyon would have looked very dubiously at nuclear freeze proposals that could lead to the Russians becoming stronger and swifter than us.

Maintaining the nuclear balance is important. Striving to reduce the level of weapons on both sides in a balanced way is also important. But even more important than simply reducing the overall numbers of weapons is to reduce specifically those weapons and those conditions that would add to instability in time of a confrontation between ourselves and the Soviets.

In particular, we should aspire to reduce, if not eliminate altogether, weapons that are at once highly threatening and highly vulnerable. That is, of course, a good de-

scription of silo-based missiles with multiple warheads. That is why the first goal of our strategic force planning should be to provide an adequately survivable basing system for the M-X missile, and the first goal of our arms control negotiations should be to reduce the number of 10-warheaded Soviet SS-18 missiles.

Commonly, the pursuit of a strategic arms control agreement is justified on three grounds: first, to reduce the cost of maintaining our nuclear forces; second, to reduce the consequences of a nuclear war, should one ensue; and, third, to reduce the probability of war.

There is a dangerous tendency to confuse the relative importance of these three goals when, in fact, the last—reducing the probability of war—is so transcendental as to completely overshadow the other two. It is easy to deplore the expenditures of large sums for these awful and awesome weapons, but it is well to remember that over the past decade or so we have spent on the order of one-half of 1% of our gross national product on strategic nuclear forces. To be fair, one-half of 1% of a $2.5-trillion GNP is still a tidy sum, but it is also obviously an affordable sum. If doubling that expenditure would measurably reduce the probability of war, it would be a bargain: if halving that expenditure would measurably *increase* the probability of war, it would be a terribly wrong way to economize.

It is also easy to favor reductions in the overall number of nuclear weapons with a view toward substantially lessening the consequences of war should it come. Unfortunately, in the real world, in which the Soviet Union is free to act in what it perceives as its own best interests, reductions of that magnitude do not appear attainable. Should we miraculously negotiate a treaty that reduced the nuclear inventories of both sides by 90%, the consequences of an exchange with the remaining 10% would still be calamitous beyond our ability to contemplate.

Nor are we free to concentrate only on lessening the probability of *nuclear* war. War was god-awfully horrible long before the atom was unleashed. The victims of Hiroshima and Nagasaki were no more dead than the victims of the nonnuclear attacks on London, Hanover, Tokyo, etc. A reduction in the probability of nuclear war, accompanied by a significant increase on the probability of conventional war, would be no bargain either.

Therefore, both our arms control effect and our nuclear force planning must, as a primary goal, seek to minimize the likelihood not just of nuclear war, but of *any* war. This requires a much closer integration of our force planning and our arms control planning than we've had in the past.

Indeed, much of the problem with both our arms control planning and our arms control negotiations has been a regrettable tendency by some to view the arms control process as a substitute for maintaining an adequate deterrent force. In a Congressional hearing on this subject a few years ago, Sen. William Cohen (R-ME) observed that the problem with SALT I was its role in putting arms control on hold—in effect, lulling the American people "to sleep" for several years, and that SALT II was dangerously capable of leading them into a permanent coma.

The nuclear freeze movement continues that same unfortunate tendency, a tendency to embrace wishful thinking and simplistic solutions instead of doing the hard thinking about the hard choices which exist in this real world. To borrow from Samuel Johnson, much of what propels the nuclear freeze movement is "a triumph of hope over experience." The danger is that in opting for the immediate and seductively appealing nuclear freeze proposals, we will lose patience and interest in those real, and terribly important, arms control negotiations now underway between ourselves and the Russians. That would be tragic.

No one who has done business with the Russians doubts that they are tough-minded, hard-nosed negotiators. They do have an interest, in many ways stronger than our own, in reducing nuclear armaments. But the oldest rule of diplomacy is that "peace treaties merely confirm the realities of the battlefield," and surely the realities of the current and projected military balance must dominate any arms control agreements we are able to negotiate with the Russians.

Negotiated arms control reductions *are* important, perhaps vitally so. If we are to succeed in negotiating the right kinds of arms control treaties—that provide a stable balance of forces—we must first convince the Russians that we are determined to match them at whatever higher level they insist upon. Once they truly believe that we are so committed, they have every reason to join with us in reducing the threat of war.

Unfortunately, this approach will necessarily require both time and money. But as another American philosopher, H. L. Mencken, who posed as a newspaperman, once said, "There's always an easy solution to every human problem—neat, plausible, and wrong." Nuclear issues are too important for such a solution.●

PEMBINA CHIPPEWA SETTLEMENT

HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. DORGAN of North Dakota. Mr. Speaker, I rise in strong support of H.R. 6416, which provides for the use and distribution of a judgment award to the Pembina Chippewa Indians.

The bill will settle land claims of Pembina Chippewa Indians, many of whom reside on the Turtle Mountain Band of Chippewa Indians Reservation in North Dakota.

The House Interior Committee reported the bill favorably September 30, 1982, as did the Senate Select Committee on October 1, 1982.

COURT OF CLAIM AWARD

The U.S. Court of Claims on March 18, 1980, issued a "partial judgment" of about $47 million to the "American Pembina Chippewa." The court made the award for the 1905 value of an aboriginal tract of some 8 million acres in today's north-central North Dakota. The Pembina Chippewa Indians had ceded this land to the Federal Government after negotiations with the McCumber Commission without receiving fair compensation for the land.

Distribution of this award may not resolve all issues in this complicated and protracted chapter of Federal-Indian relations. But it will vindicate the Pembina Chippewa Indians in their land claims against the United States and bring some monetary relief to designated Pembina descendants of the original Indian landholders. Much of these funds will form seed money for vital economic investments at various Pembina reservations.

More specifically, this distribution will fulfill article I of the 1904 executive agreement with the Turtle Mountain Band that "the friendly relations heretofore existing between the Turtle Mountain Band of Chippewa Indians and United States shall be forever maintained."

Distributing this award will further show that the Federal Government honors its treaties and agreements with American Indian tribes and responsibly executes its trust responsibility to these tribes.

Finally, the settlement will help clear the air of residual tension between native and other Americans. This is no small thing as Felix Cohen, famous Associate Solicitor for Indian Affairs, once noted:

> Our treatment of Indians, (perhaps) even more than our treatment of other minorities, reflects the rise and fall of our democratic faith.

NEED FOR LEGISLATION

To implement the court's decision, a series of events made it necessary to enact enabling legislation.

At the request of the Turtle Mountain Chippewa Tribal Council, I introduced H.R. 6416. Congressmen MARLENEE, WILLIAMS of Montana, and SABO joined me as cosponsors on behalf of Pembina Chippewa Indians in their respective States.

Since both the relevant House and Senate committees have acted favorably on this bill, I would urge my colleagues to do so as well.

Resolving the lingering land claims of the Pembina Chippewa Indians makes good sense and we should act without delay.●

SUMMARY OF EARLY WARNINGS ON SPENDING BILLS

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. ASPIN. Mr. Speaker, the following early warning on the Surface Transportation Assistance Act of 1982 and the Energy and Water Development Appropriation Act was prepared by the staff of the Budget Committee:

EARLY WARNING—HOUSE BUDGET COMMITTEE

H.R. 6211, SURFACE TRANSPORTATION ASSISTANCE ACT OF 1982

Staff analysis

Committee: Public Works and Transportation.

Subcommittee: Surface Transportation.

Chairman: Mr. Anderson (California).

Ranking minority member: Mr. Shuster (Pennsylvania).

Scheduled: Monday, December 6, 1982.

I. Description of bill

This bill provides or authorizes funding for highway construction and improvement and highway safety and authorizes appropriations for public mass transportation programs. It raises additional revenues for the highway trust fund. These amounts are in addition to the levels in the interim highway bill, Public Law 97-327.

II. Comparison with budget targets

Now that fiscal year 1983 has started, there are two budget targets to consider. The first is the aggregate ceiling on budget authority and outlays and floor under revenues that were specified in the First Budget Resolution for Fiscal Year 1983. Pursuant to section 7 of that resolution, the aggregates automatically become binding on October 1. Summary table B, below, shows that while the current level of budget authority, based on enacted law, is substantially under the budget resolution ceiling, the current level of outlays is over the ceiling and the current level of revenues is under the floor.

The second target is the 302 targets provided for the Public Works and Transportation Committee pursuant to the First Budget Resolution. These are the targets which the Budget Committee scorekeeping system uses as a measure of spending action. These are targets for discretionary spending, i.e., spending legislation this session, over which this committee has control. While the overall resolution ceiling has been breached by other bills, summary table C below shows that, with this bill, the committee would also exceed the 302 targets for discretionary spending that were provided in the first resolution. This is for three reasons:

(1) The committee has not enacted $370 million of user fees targetted in the Budget Resolution; (2) this bill provides $2,697 million more contract authority (budget authority) than targetted; and (3) this bill increases the obligation limitation, and thus the 1983 outlays, above the current legal limit.

[In millions of dollars]

	Budget authority	Outlays	Revenues
Summary table A, Comparison of action this session and this bill:			
1. Action this session	4,314	.....	.....
2. This bill (H.R. 97-6211)	3,695	535	+1,676
3. Total action this session	8,009	535	+1,676
Summary table B, Comparison with current level and ceilings:			
4. Budget resolution ceilings	822,390	769,818	665,900
5. Current level	806,948	775,026	663,635
6. Over (+)/Under (−)	−15,442	+5,208	−2,265
7. Impact of this bill	+3,695	+535	+1,676
8. Over (+)/Under (−)	−11,747	+5,743	−589
Summary table C, Comparison with 302 target for discretionary action:			
9. 302 targets	4,942	−370	NA
10. Current level	4,314	.....	NA
11. Over (+)/Under (−)	−628	+370	NA
12. Impact of this bill	+3,695	+535	NA
13. Over (+)/Under (−)	+3,067	+905	NA

IV. Possible future requirements

The budget resolution assumes enactment of user fees totalling $370 million within the jurisdiction of this committee. To date the Committee has not reported any user fee legislation.

V. Revenues

The Ways and Means Committee is expected to offer, under a closed rule, a revenue title (Title III) to the Public Works Committee amendment to H.R. 6211, The Surface Transportation Act of 1982, which would not only extend the present highway user taxes and trust fund, but would increase taxes on gasoline, diesel and special fuels from the current 4 cents per gallon to 9 cents per gallon effective April 1, 1983, through October 1, 1988. In addition, effective January 1, 1984, there will be an increase in the heavy vehicle use tax from a flat $3 per 1,000 pounds for trucks over 26,000 pounds to a graduated rate schedule which would go as high as $2,000 over 80,000 pounds.

Offsetting the revenue pickup from these revenue increasing provisions, the committee title would grant the following exceptions and reductions in current taxes after continuing State and local government, nonprofit educational groups, farm use and school, local and innercity transit buses exemptions: A full exemption for off-highway business use and alcohol fuels; taxicabs would continue to be exempt from the current 4 cents a gallon tax until September 30, 1984, but not from the increased tax. The present excise tax on laminated tires, innertubes, nonhighway tires, trucks, truck parts and lubricating oil is either repealed or reduced to pretrust fund levels and after September 30, 1984, will go back to general Treasury funds.

The largest offset is in the form of an average of 25 percent of gross revenues because of the interaction with the income tax, since higher excise tax payments will reduce corporate and business income tax payments.

The final net revenue figures are as follows:

Fiscal year:	*Millions*
1983	$1,676
1984	3,905
1985	4,196
1986	4,208
1987	4,256
1988	4,335

One final note: The Ways and Means title earmarks revenues equivalent to one cent of the fuel tax for a new mass transit account within the Highway Trust Fund, as proposed by the Public Works' amendment.

VI. Definitions of terms in the summary tables, section III

Line 1. Action this session. This is the direct spending action this session by the Public Works and Transportation Committee. It consists of the ADAP bill (Public Law 97-248) and the interim Highway bill (Public Law 97-327).

Line 2. This bill (H.R. 97-6211): This is the amount of budget authority and outlays that will result if the bill is enacted. It also portrays the revenue impact of this bill. This is the net impact on current level of enactment of this bill.

Line 3. Total action this session: Line 2 plus line 1.

Line 4. Budget resolution ceilings: These are the total amounts of budget authority, outlays, and revenues in the First Budget Resolution for Fiscal Year 1983.

Line 5. Current level: This is the official estimate of total fiscal year 1983 spending, and revenues, based only on existing law, including the continuing appropriations (Public Law 97-276).

Line 6. Over(+)/Under(−): Line 5 minus line 4.

Line 7. Impact of this bill: See line 2.

Line 8. Over(+)/Under(−): Line 6 plus line 7.

Line 9. 302 targets: The targets for discretionary action for this committee, set pursuant to the Budget Resolution for Fiscal Year 1983.

Line 10. Current level: This is the official estimate of total fiscal year 1983 spending for this committee, due to action this session, based only on existing law. (See line 1).

Line 11. Over(+)/Under(−): Line 10 minus line 9.

Line 12. Impact of this bill: See line 2.

Line 13. Over(+)/Under(−): Line 11 plus line 12. This compares the Public Works and Transportation Committee with its 302 targets.

H.R. 7145, ENERGY AND WATER DEVELOPMENT APPROPRIATION, FISCAL YEAR 1983

Staff analysis

Committee: Appropriations.

Subcommittee: Energy and Water.

Chairman: Mr. Bevill (Alabama).

Ranking minority member: Mr. Myers (Indiana).

Scheduled: Wednesday, December 8, 1982.

I. Description of bill

This bill provides $13,899 million in budget authority and $7,742 million in outlays for discretionary programs in the Department of Energy (including atomic weapons activities), the Army Corps of Engineers, the Bureau of Reclamation, the Nuclear Regulatory Commission, and the Appalachian Regional Commission, among others. Funding for these programs has already been provided in the Continuing Appropriations Act (Public Law 97-276). This regular appropriation will supersede and replace funds provided in the Continuing Appropriations Act. The effect of this bill, therefore, is to provide an increase to the current level of spending that is already provided by law, as shown in summary table A on the next page. Also, the bill appropriates revenues, estimated to total $120 million, which the budget resolution anticipated would have accrued to the miscellaneous receipts category of federal revenues in accordance with present law. This bill accordingly reduces the current level of revenues.

II. Comparison with budget targets

Now that fiscal year 1983 has started, there are two budget targets to consider. The first is the aggregate ceiling on budget authority and outlays and floor under revenues that were specified in the First Budget Resolution for fiscal year 1983. Pursuant to section 7 of that Resolution, the aggregates automatically become binding on October 1. Summary table B, below, shows that while the current level of budget authority, based on enacted law, is substantially under the budget resolution ceiling, the current level

of outlays is over the ceiling and the current level of revenues is under the floor.

The second target is the 302(b) target provided for this subcommittee when the Appropriations Committee subdivided its share of the First Budget Resolution's budget authority and outlays. These are the targets which the Budget Committee scorekeeping system uses as a measure of spending action. These targets are separated between discretionary spending, over which this subcommittee has control, and mandatory spending, over which it does not. While the overall resolution ceiling has been breached by other bills, summary table C below shows that, with this bill, the subcommittee would remain under the 302(b) targets for discretionary spending that were provided in the first resolution. This bill has no impact on the current level of mandatory spending.

III. Summary tables

[In millions of dollars]

	Budget authority	Outlays	Revenues
Summary table A: Comparison of continuing and regular appropriations, discretionary action [1]:			
1. Continuing appropriations (Public Law 97-276)	12,612	6,870	
2. This bill (H.R. 97-7145)	[2] 13,899	[2] 7,742	−120
3. Over (+)/Under (−)	+1,287	+872	−120
Summary table B, Comparison with current level and ceilings:			
4. Budget resolution ceilings	822,390	769,818	665,900
5. Current level	806,948	775,026	663,635
6. Over (+)/Under (−)	−15,442	+5,208	−2,265
7. Impact of this bill	+1,287	+872	−120
8. Over (+)/Under (−)	−14,155	+6,080	−2,385
Summary table C, Comparison with 302(b) Subdivisions, Discretionary Spending [1]:			
9. 302(b) targets	14,225	7,755	NA
10. Current level	12,612	6,870	NA
11. Over (+)/Under(−)	−1,613	−885	NA
12. Impact of this bill	+1,287	+872	NA
13. Over (+)/Under (−)	−326	−13	NA

[1] This bill does not affect the current level of mandatory spending.
[2] This figure does not include a reduction of $300 million in budget authority and outlays that is assumed by the appropriations Committee. It would occur, under the terms of this bill, upon the final enactment of the nuclear waste disposal bill.

IV. Possible future requirements

The budget resolution does not assume funding for any additional programs within the jurisdiction of this subcommittee.

V. Credit

The First Budget Resolution for Fiscal Year 1983 also contains targets for credit program amounts. As with budget authority and outlays, the Appropriations Committee is allocated amounts for credit program amounts and subdivides those amounts among subcommittees. The table below shows the additional credit assistance provided by this bill; credit assistance program levels already enacted, including action in the continuing appropriations resolution; and credit assistance programs not yet acted on. These amounts are then compared to the Appropriations Committee subdivisions.

	Direct loan obligations	Primary guarantee commitments	Secondary guarantee commitments
1. 1983 credit program limits already enacted	67		
2. Additional program limits in the bill	41		
3. Limits assumed in the budget resolution not acted on in the bill and other amounts not subject to annual limits			
4. Possible total for subcommittee	108		
5. Credit subdivisions	159		
6. Over (+)/Under (−) Subdivision	−51		

VI. Definitions of terms in the summary tables, section III

Line 1. Continuing appropriations (Public Law 97-276): This is the amount of discretionary budget authority and outlays provided by that law, for programs funded by this subcommittee, as estimated on a full-year basis pursuant to congressional scorekeeping rules and GAO intepretation.

Line 2. This bill (H.R. 97-7145): This is the amount of discretionary budget authority and outlays that will be provided to the agencies in questions if this bill is enacted—in that case it would supersede the continuing appropriations. It also portrays the revenue impact of this bill.

Line 3. Over(+)/Under(−): Line 2 minus line 1, which is the net impact on current level of this bill.

Line 4. Budget resolution ceilings: These are the total amounts of budget authority, outlays, and revenues in the First Budget Resolution for Fiscal Year 1983.

Line 5. Current level: This is the official estimate of total fiscal year 1983 spending, and revenues, based only on existing law, including the continuing appropriations (Public Law 97-276).

Line 6. Over(+)/Under(−): Line 5 minus line 4.

Line 7. Impact of this bill: See line 3.

Line 8. Over(+)/Under(−): Line 6 plus line 7.

Line 9. 302(b) targets: The targets for discretionary spending for this subcommittee, set by the Appropriations Committee pursuant to the Budget Act.

Line 10. Current level: This is the official estimate of total fiscal year 1983 discretionary spending for this subcommittee, based only on existing law, i.e., the continuing appropriations (Public Law 97-276).

Line 11. Over(+)/Under(−): Line 10 minus line 9.

Line 12. Impact of this bill: See line 3.

Line 13. Over(+)/Under(−): Line 11 plus line 12. This compares the reported bill (H.R. 97-7145) with its 302(b) targets.●

THE AMERICAN INFRASTRUCTURE

HON. NORMAN Y. MINETA
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. MINETA. Mr. Speaker, we hear a great deal about the problems of the crumbling American infrastructure these days, and with good reason. The only wonder is that it has taken so long for the message to sink in that we cannot continue to defer construction, rehabilitation, and maintenance expenditure in this country, year after year, and not ultimately pay the piper in the higher costs associated with crumbling highways, strained bridges, inadequate transit, growth limits imposed by inadequate waste water treatment facilities, airspace congestion and delay, and so on.

The infrastructure problems we face across this Nation are very real and of staggering proportions. Many economists estimate the outstanding bill for deferred capital investment at over $1 trillion, a sum as incomprehensible as it is unaffordable. Such an astronomical backlog did not happen by accident; it is the product of years of declining public investment in the very underpinnings of our society and of our economic viability.

Let me give some examples. From 1970 to 1981, the investment in highways by all levels of government fell by 26 percent in constant dollars. On a cents per mile basis, highway expenditures were cut in half between 1956 and 1981. Federal appropriations for waste water treatment facilities have declined 63 percent in constant dollars between 1975 and 1982. Appropriations for the federally owned airway system, vital to safe and efficient air transportation, declined 54 percent in constant dollars between 1972 and 1980.

Are these examples unrepresentative of our commitment to infrastructure generally? Unfortunately they are not. Economist estimate that the proportion of our GNP devoted to our infrastructure needs has declined by more than half between 1965 and 1980. And all levels of government have played a part in that declining commitment. The proportion of State and local budgets devoted to infrastructure has declined by 43 percent between 1960 and 1980, based on data from the Commerce Department's Bureau of Economic Analysis. Capital spending on infrastructure as a share of the total States' budget fell by almost half between 1960 and 1977.

The price of this declining commitment is evident all around us. Half of the communities in the United States cannot permit economic development or expansion because their water treatment and waste water treatment facilities are at or near capacity. A recent study showed that 40 percent of the drinking water in this country is below established standards for clean and safe water. The General Accounting Office has described drinking water contamination as "emerging as one of the most serious health and environmental problems facing our Nation during the 1980's."

The Nation's railroads are unfortunately a good example of the deterioration of our Nation's physical assets. As railroad track maintenance has too often been deferred, train speeds have had to be reduced to avoid derailments on deteriorating rails and roadbeds. The average running speed on our Na-

tion's once-great rail system has declined to an incredible 14 miles per hour.

Transit has fared no better, as maintenance and rehabilitation have often been the first victims of the annual budget squeeze. Two years ago we looked into this issue in some depth. Testimony showed that if we took a businesslike approach to the New York transit system, considering the replacement value and the useful life of its assets, we would be spending over $1 billion a year on capital replenishment. Instead, only one-fifth of that was being spent in recent years. That is symptomatic of our problems in transit.

In highways, one-fifth of our most modern system, the Interstate Highways, is already past its design life. About 45 percent of the Nation's bridges are considered structurally deficient or functionally obsolete by the U.S. Department of Transportation.

The full extent of deterioration in our vital infrastructure is beyond reckoning. But I think the more important questions are, how did we get into this predicament and what can we do about it?

I think the root problem has, more often than not, been in the public decisionmaking process itself. As the budget squeeze has tightened in recent years, politicians are under pressure to find ways of cutting expenditure without cutting services, or at least without appearing to cut services. In that bind, politicians from city councilmen to Presidents are prey to a constant temptation: the temptation to slide the necessary cuts over onto the capital side of the budget, where the benefits of that spending—and therefore the pain of the cut—are generally several years in the future. This gives the appearance, at least, that you can cut spending today without cutting services.

The tragedy is that for the sake of short-term appearances, we end up trifling with long-term investment in the basic infrastructure on which all economic vitality in this country ultimately depends.

Whether it is highways or transit or water works, what we are talking about is the same pattern of deferred maintenance and deferred reinvestment which too many of the railroads of this country used just to get by a few tough years. But they found that once you start slipping behind the curve of needed reinvestment, you get pulled into a vicious cycle, and it becomes nearly impossible to get out.

We now face the threat of more and more of our basic infrastructure systems following in the footsteps of the Penn Central.

Just recently, with the costs of years of disinvestment becoming more evident, there has been some movement to reverse the trend and to establish the kind of constant reinvestment necessary to sustain our infrastructure. Earlier this year the Congress adopted a major new multiyear authorization program to modernize and expand the Nation's airports and airways, all financed by increased user fees dedicated to these purposes. And it now appears that we may be about to do the same for highways and transit.

But welcome as these program-by-program initiatives are, we will not have gotten to the root of the problem until we also deal with the fundamental biases in the public decisionmaking process itself: the bias toward dealing with annual budget problems by deferring needed capital reinvestment.

Anyone familiar with the process by which the Congress makes budgetary decisions must recognize that there are powerful incentives favoring legislative proposals with short-term benefits and long-term costs over proposals with the opposite characteristics. Dealing with that problem is the most fundamental contribution we could make to our future infrastructure and economic vitality.

We need a budget process which makes it clear what the needed rate of capital reinvestment is and which flags our attention if we go below that level.

We need some budget process incentive for establishing the kind of dedicated revenues which can assure the consistent generation of revenues necessary to any stable program of capital reinvestment.

And we need to address in some unified forum the problems and find the solutions which are common threads running through all our infrastructure problems, so that the separate institutions responsible for each program need not solve these common problems each for themselves through duplicated effort.

I am therefore introducing today legislation which I believe will accomplish those needed reforms in the way we make decisions regarding our infrastructure: H.R. 7369, the Infrastructure Revitalization Act of 1982. The bill is divided into three titles, each with a somewhat different scope and purpose, but all working toward the same end.

Title I would establish a capital budget within the unified budget submitted by the President each January. It would establish two benchmarks against which we could measure our own capital spending, as well as the capital spending proposed by the President. One benchmark—(C) in section 102—would simply be the level of capital spending required each year to sustain our present level of infrastructure performance. The second benchmark—(D) in section 102—would be the higher level of capital spending required each year to accomplish the full level of cost-effective investment in our Nation's competitiveness and efficiency and to achieve already adopted standards for public safety, environmental protection, et cetera.

To illustrate, and somewhat oversimplify, the two benchmarks, the first benchmark would be the level of spending at which I would find as I drove my car to work, year after year, the same basic condition of roads, the same degree of traffic congestion—even with whatever changes may have occurrred in the number of cars in use—the same time to work, the same wear and tear on the car, et cetera. In other words, it is the "standstill" level of capital spending.

The second benchmark would be the level of spending at which cost-effective investment in these highways, with the costs of maintenance, rehabilitation, and new construction weighed against the full costs—in increased congestion, reduced efficiency, et cetera—of not making those investments. The second benchmark would also include the levels of spending necessary to achieve compliance with already adopted Federal standards. So it would be the level at which, as I drove to work year after year, I would find roads not just in a constant condition (even if that condition failed to meet safe design criteria and required structural standards), but in an improved condition. In other words, the second benchmark is the level of "sound and necessary" investment.

Title I would also require the President's budget to indicate how much of the proposed spending levels were capital investment-type spending, and to compare that capital investment with the two benchmark levels described above. In this way, it would be readily apparent what the long-term consequences of our short-term budget decisions were.

The basic division of proposed spending into capital investment-type spending and operating-type spending is similar to the division now made in the President's budget under special analysis D. This applies the infrastructure or capital investment concept in its broadest meaning, including not only physical assets, but also less-tangible forms of long-term benefits from short-term spending: education, and research and development, for example. The definition used in title I for capital investment type spending is similar, although not identical to that traditionally used in special analysis D.

In addition, other provisions in title I require clear indication of past trends in infrastructure investment; the respective roles of State, local, and Federal Government; the adequacy of maintenance of federally funded physical assets; and the amounts of revenues dedicated to capital investment purposes.

The capital budget required by title I would satisfy the main objectives of proposals dating back to the Hoover Commission in 1949, that the Federal Government should adopt the more business like approach to budgeting by having a capital budget. The Hoover Commission recommended that:

• • • The budget estimates of all operating departments and agencies of the Government should be divided into two primary categories—current operating expenditures and capital outlays.

The argument for capital budgets, and the reason most sizable businesses and State governments use them, is that a spending decision—which is often a decision to incur an added increment of debt—must be made in a very different light if it is of a capital nature, producing long-term benefits outweighing the intial cost, than if it is of a current operating nature. And that should be no less true for the Federal Government than it is for everyone else.

The capital budget required by title I does not, however, do those things which have provoked opposition to certain types of capital budgeting in the past. It does not take the capital investment programs off budget. All items which are now included in the unified budget would remain in the unified budget. Total budget figures would still reflect the total impact of Federal fiscal policy on the economy as a whole (at least to the extent they do so today).

And it would not do away with full funding or expensing, whereby most major capital projects are fully appropriated in the first year. Full funding has both its pros and its cons. While it does front end capital costs and therefore put them at a disadvantage in competing with operating costs, it also tends to insure stable commitment to completion of multiyear projects, even in the face of annualized decisionmaking. The capital budget proposed by title I would not in and of itself alter the current practice on full funding: The Congress would continue to make this decision on a program-by-program basis.

The Hoover Commission's recommendation of a capital budget was never adopted. Instead the executive branch beginning in 1951 gave us a pallid imitation of a capital budget: Special analysis D. Title I would build on special analysis D, turning it into a serious capital budget of real utility to the Congress and to the public in making difficult budget decisions.

Title II addresses one of the most frustrating catch-22's of the entire budget process. Nothing would be of greater assistance to the budget crisis we face than to increase reliance on dedicated user fees. Both the administration and the Budget Committee have advocated this approach. Yet the budget process itself provides powerful disincentives to raising those dedicated revenues. It does so because in the aggregate it looks at total revenues and at total expenditures and compares the two, but it tends to ignore the dedicated relationship between some of those revenues and some of those expenditures. Once the dedicated revenues are enacted, the process tends to take their existence as a given, but treats the expenditure side as a completely open question, subject to severe limitation even where dedicated revenues continue to flow in unabated.

We have had this problem in the aviation trust fund for much of the past decade. Dedicated revenues are enacted based on certain levels of need and authorized spending. But then in subsequent years the budget process considers those spending levels completely disembodied from the dedicated revenues on which they were based. The result is that budget resolutions and enforcement devices are easily used to cut the expenditure side while leaving the revenue side untouched. The close relationship originally intended by Congress when it enacted the dedicated revenues is lost.

This is not only detrimental to the programs and the taxpayers involved, it is also detrimental to the budget process itself, because this kind of experience is used to oppose new dedicated revenues which would ease the budget squeeze and would provide assured financing mechanisms for capital reinvestment. The argument against dedicated revenues it that the promises accompanying dedicated tax proposal are just a ruse: "Once you get the revenues, we will never see the spending you have promised." Until we deal with that concern, we will continue to face stiff opposition on user fees and other forms of dedicated revenue.

Title II would accomplish that by providing that programs supported by dedicated revenues would not be subject to the various enforcement devices of the budget process, if and only if the dedicated revenues provided by the Congress were fully adequate to cover the costs of the program. In other words, if you can raise the revenue, you can spend it. This would apply not only to existing dedicated revenue programs, but to such new dedicated revenue programs as the Congress might choose to enact, either of the contract authority type or the prior appropriation type.

This is basically, therefore, a "pay-as-you-go" proposal. The Congress would be assured that the programs involved would not contribute one dime to the deficit, since they would be required to be at least fully self-supporting.

It also does not take these programs "off-budget": Their anticipated revenues and expenditures would still be included in the unified budget. Even if the Congress subsequently decided to raise both revenues and expenditures, there would be no net impact on the aggregate deficit figure adopted in the budget resolution. And the proposed title II would not alter in any way the existing ability of the Congress to reduce annual obligation ceilings on these programs through the appropriations if we so chose. It would just mean that we would no longer be compelled to do so by the budget process.

Title II is not restricted in its potential application to any particular type of program: Any contract authority or prior appropriation program where the Congress might choose in the future to establish dedicated revenues could benefit from its provisions. But it has been the capital programs which have traditionally relied on dedicated revenues to the greatest extent, and I think the most important consequence of title II would be the reduction of powerful budget process incentives against the dedicated revenues we need to assure predictable financing mechanisms for capital reinvestment.

Title II of the bill would establish a National Commission on the Rebuilding of America.

Two of the key problems we face in addressing the Nation's infrastructure problems are that the problem is so enormous that it has been difficult to quantify and accurately assess, and that the responsibility for addressing these problems is distributed among many agencies, organizations, and congressional committees. Many of the issues that need to be addressed are common to the jurisdictions of each of those agencies, organizations, and committees, and it would be highly duplicative and inefficient to have these common tasks addressed individually all over town. The Commission would represent many of those same institutions and would give them a single forum in which to conduct the basic assessment of the scope of the problem, using consistent data and methodology, and in which to study and make recommendations on many of the common problems.

The Commission in modeled on the National Transportation Policy Study Commission and would not have any legislative authority. Its studies and report would be advisory to the executive branch and to the Congress. But it would be an important device for accomplishing much of the preliminary work necessary to the Congress in dealing with many of these infrastructure issues. The Commission is directed to complete its study and report in 1 year; 6 months later its authority automatically sunsets. We are not creating any new permanent entity or agency.

The Commission would consist of 23 members: 6 from the committees with relevant jurisdiction in the Senate, 6

from the committees with relevant jurisdiction in the House, 6 appointed by the President from the private sector, and 5 representing the major associations of State and local governments.

Its assignment is to assess the condition of infrastructure, trends in historic spending on infrastructure, needs for future spending, proper roles for State, local and Federal government and the private sector, the need for proper maintenance and efficient operations to assure an adequate return on capital investment how revenues can be raised most equitably and reliably, how needs can best be targeted, and the extent to which Federal tax policy, loan or loan guarantee programs, and research and development programs could assist or encourage other levels of government and the private sector to play a large role in solving our infrastructure problems.

These are broad issues running through virtually all of our infrastructure program areas. In many of these programs the Congress can and should move ahead quickly with legislation to expand our infrastructure commitment and to create needed jobs. Nothing in title III is intended to create an impression that we should not act in any of these areas until the Commission has completed its work. But for many of our infrastructure programs there simply is no consensus on how to resolve many of these difficult issues, and there is therefore little likelihood of near-term congressional action. And for all of the infrastructure programs, the issues being addressed by the Commission are enduring issues, on which the Commission's study and report would be useful at any time to the Congress in its continuing review and reauthorization of these programs.

The scope of infrastructure problems within the purview of the Commission would include publicly owned highways, bridges, transit systems, waterways, sewer systems and waste water treatment facilities, airports, and airways; railroads and ports whether publicly or privately owned, to the extent they are necessary for the common carriage; and municipal water supply treatment storage or distribution systems.

The costs of this temporary commission would be minimal and are, in fact, the only direct costs associated with the entire bill.

Mr. Speaker, if, as I believe, the present crisis in infrastructure is not just happenstance but is the product of fundamental biases against captial spending in the public decisionsmaking process, then we at this point not only have to enact significant improvements in the individual infrastructure programs, but we also need to correct the fundamental biases in the process which got us into this predicament. The bill I am introducing would do that, while preserving the unified budget, the congressional budget process, and the full prerogatives of the various committees of Congress. It is legislation which all Members concerned about the infrastructure problems in this country can support, and I urge them to do so.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, December 7, 1982, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

DECEMBER 8

9:00 a.m.
Commerce, Science, and Transportation
Business meeting, to consider pending calendar business.
235 Russell Building

Judiciary
To hold hearings on pending nominations.
2228 Dirksen Building

9:30 a.m.
Finance
To hold hearings on the nominations of Manuel H. Johnson, Jr., of Virginia, to be an Assistant Secretary of the Treasury, Enrique J. Leon, of New York, and Susan W. Liebeler, of California, both to be Members of the International Trade Commission.
2221 Dirksen Building

Labor and Human Resources
To hold hearings on the nominations of Betty H. Brake, of Oklahoma, to be Deputy Director of the ACTION Agency, and David L. Slate, of California, to be General Counsel of the Equal Employment Opportunity Commission.
4232 Dirksen Building

10:00 a.m.
Armed Services
To hold open and closed hearings on the MX missile and associated Presidential basing decisions.
1318 Dirksen Building

Commerce, Science, and Transportation
To hold hearings on the nomination of George W. Douglas, of Texas, to be a Federal Trade Commissioner.
235 Russell Building

Environmental and Public Works
Business meeting, to mark up S. 3043, authorizing funds through fiscal year 1987 for the Federal-aid highway program.
4200 Dirksen Building

Finance
Business meeting, to consider S. 3044, authorizing funds through fiscal year 1988 to improve the Nation's highway system, and to restructure the current taxes that go into the highway trust fund, the nominations of Manuel H. Johnson, Jr., of Virginia, to be an Assistant Secretary of the Treasury, Enrique J. Leon, of New York, and Susan W. Liebeler, of California, both to be Members of the International Trade Commission, and other pending calendar business.
2221 Dirksen Building

Rules and Administration
To hold hearings on computer and communication systems for the U.S. Senate.
301 Russell Building

Select on Intelligence
Closed briefing on intelligence matters.
S-407, Capitol

10:30 a.m.
Judiciary
Business meeting, to consider pending calendar business.
2228 Dirksen Building

2:00 p.m.
Small Business
Productivity and Competition Subcommittee
To hold oversight hearings on the economic problems facing small and independent businesses in the forests products industry.
6226 Dirksen Building

2:30 p.m.
Appropriations
Business meeting, to mark up the substance of H.R. 7356, appropriating funds for fiscal year 1983 for the Department of the Interior and related agencies programs.
1114 Dirksen Building

3:00 p.m.
Veterans Affairs
To hold hearings on the nomination of Harry N. Walters, of Virginia, to be Administrator of Veterans' Affairs.
412 Russell Building

DECEMBER 9

9:00 a.m.
Agriculture, Nutrition, and Forestry
Agricultural Production, Marketing, and Stabilization of Prices Subcommittee
To hold hearings on S. 3074, to increase minimum loan rates and require acreage limitation and paid land diversion programs for the 1983, 1984, and 1985 crops of wheat, feed grains, upland cotton, and rice, and to develop export markets for U.S. agricultural commodities, and related proposals.
324 Russell Building

9:30 a.m.
Labor and Human Resources
To hold hearings on the nominations of Wendy H. Borcherdt, of California, to be Deputy Under Secretary for Intergovernmental and Interagency Affairs,

Department of Education, Douglas A. Fenderson, of Minnesota, to be Director of the National Institute of Handicapped Research, Manuel J. Justiz, of New Mexico, to be Director of the National Institute of Education, Edward M. Elmendorf, of Vermont, to be Assistant Secretary for Postsecondary Education, Department of Education, pending nominations for the National Council on Educational Research, and pending nominations for the National Commission on Libraries and Information Science.

4232 Dirksen Building

Rules and Administration

Business meeting, to mark up S. Con. Res. 32 and H. Con. Res. 153, measures authorizing a bust or statue of Dr. Martin Luther King, Jr., to be placed in the U.S. Capitol, and to consider other pending legislative and administrative business.

301 Russell Building

9:45 a.m.

Appropriations

State, Justice, Commerce, the Judiciary and Related Agencies Subcommittee

To hold hearings on proposed budget revisions for fiscal year 1983 for the Department of Justice.

S-126, Capitol

10:00 a.m.

Environment and Public Works

Business meeting, to resume consideration of proposed amendments to S. 2432, authorizing funds for fiscal years 1983 and 1984 for programs of the Solid Waste Disposal Act and Resource Conservation and Recovery Act (pending on Senate calendar), and other pending business matters.

4200 Dirksen Building

Judiciary

Agency Administration Subcommittee

To hold oversight hearings on the implementation of the Equal Access to Justice Act (Public Law 96-481).

2228 Dirksen Building

Select on Intelligence

Closed briefing on intelligence matters.

S-407, Capitol

DECEMBER 10

9:30 a.m.

*Banking, Housing, and Urban Affairs

To hold oversight hearings on the report of banking regulators regarding the Penn Square National Bank in Oklahoma.

5302 Dirksen Building

Finance

Taxation and Debt Managment Subcommittee

To hold hearings on S. 2987, S. 2647, and S. 3064, miscellaneous tax proposals.

2221 Dirksen Building

10:00 a.m.

Commerce, Science, and Transportation

Surface Transportation Subcommittee

To hold oversight hearings on the implementation of the Household Goods Transportation Act (Public Law 96-454).

235 Russell Building

Energy and Natural Resources

Energy and Mineral Resources Subcommittee

To hold hearings on S. 2503, S. 2680, S. 2681, and S. 2824, bills providing for the reinstatement of certain oil and gas leases.

3110 Dirksen Building

Foreign Relations

East Asian and Pacific Affairs Subcommittee

To receive a briefing on Micronesian status negotiations.

4221 Dirksen Building

Judiciary

JUvenile Justice Subcommittee

To hold hearings on S. 2856, increasing the penalties for the sexual exploitation of children.

2228 Dirksen Building

2:00 p.m.

Judiciary

To hold hearings on pending nominations.

2228 Dirksen Building

DECEMBER 13

10:00 a.m.

Energy and Natural Resources

To hold hearings to review current conditions in the natural gas market, and related proposals to modify existing law.

3110 Dirksen Building

Governmental Affairs

Energy, Nuclear Proliferation and Government Processes Subcommittee

To hold hearings on government payments and the potential for fraud.

3302 Dirksen Building

Select on Intelligence

Closed briefing on intelligence matters.

S-407, Capitol

2:00 p.m.

Foreign Relations

Closed meeting, to consult with Administration officials on the intermediate nuclear forces negotiations (INF).

S-116, Capitol

3:00 p.m.

Foreign Relations

Closed meeting, to consult with Administration officials on the strategic arms reduction talks (START).

S-116, Capitol

DECEMBER 14

10:00 a.m.

Commerce, Science, and Transportation

Surface Transportation Subcommittee

To hold oversight hearings on the implementation of the Motor Carrier Act (Public Law 96-296).

235 Russell Building

Foreign Relations

To hold open and closed hearings on U.S. strategic doctrine.

4221 Dirksen Building

DECEMBER 15

9:30 a.m.

Governmental Affairs

Energy, Nuclear Proliferation and Government Processes Subcommittee

To hold hearings on Government debt collection procedures.

5302 Dirksen Building

Governmental Affairs

Oversight of Government Management Subcommittee

To hold oversight hearings on computer matching programs to detect fraud and mismanagement in Government programs.

3302 Dirksen Building

DECEMBER 16

9:30 a.m.

Governmental Affairs

Oversight of Government Management Subcommittee

To continue oversight hearings on computer matching programs to detect fraud and mismanagement in Government programs.

3302 Dirksen Building

Small Business

To hold oversight hearings on the small business investment companies (SBIC) program of the Small Business Administration.

424 Russell Building

10:00 a.m.

Foreign Relations

Closed meeting, to consult with an official of the Department of State on the threshold test ban and peaceful nuclear explosion treaties.

S-116, Capitol

Select on Intelligence

Budget Authorization Subcommittee

Closed meeting on budget matters relating to intelligence activities.

S-407, Capitol

JANUARY 12

9:30 a.m.

Labor and Human Resources

Employment and Productivity Subcommittee

To hold hearings to review Federal programs which create certain job opportunities.

4232 Dirksen Building

JANUARY 25

9:30 a.m.

Finance

To hold hearings on the Administration's assessment of the meeting of ministers to the General Agreement on Tariffs and Trade (GATT).

2221 Dirksen Building

CANCELLATIONS

DECEMBER 9

10:00 a.m.

Judiciary

Separation of Powers Subcommittee

To hold hearings on judicial leniency.

5110 Dirksen Building

HOUSE OF REPRESENTATIVES—*Tuesday, December 7, 1982*

The House met at 1 p.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

We thank You, O God, for all the glories of Your creation that give meaning and purpose in a weary world. We praise You that Your spirit speaks to us in ways that encourage us to do the right and speak the truth. We are thankful that You have raised up people who, through lives of goodness and grace, help to witness to Your love and to know a better world of mercy and of justice and of peace. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. WALKER. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Chair's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 314, nays 35, not voting 84, as follows:

[Roll No. 422]

So the Journal was approved.

The result of the vote was announced as above recorded.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, announced that the Senate had passed a joint resolution of the following title, in which the concurrence of the House is requested:

S.J. Res. 244. Joint resolution designating January 17, 1983, as "Public Employees' Appreciation Day."

PRIVATE CALENDAR

The SPEAKER. This is Private Calendar day. The Clerk will call the first individual bill on the Private Calendar.

REMEDIOS R. ALCUDIA, CHRISTOPHER, EZRA, VERMILLION, AND PERISTELLO ALCUDIA

The Clerk called the bill (H.R. 1547) for the relief of Remedios R. Alcudia, Christopher, Ezra, Vermillion, and Peristello Alcudia.

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

Mr. SENSENBRENNER. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

LASZLO REVESZ

The Clerk called the bill (H.R. 1352) for the relief of Laszlo Revesz.

Mr. SENSENBRENNER. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

JENNIFER FERRER

The Clerk called the bill (H.R. 1830) for the relief of Jennifer Ferrer.

Mr. SENSENBRENNER. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

MOHAMMAD ISMAIL KHAN, HASHMAT ISMAIL KHAN, AND MURAD ISMAIL KHAN

The Clerk called the bill (H.R. 2276) for the relief of Mohammad Ismail Khan, Hashmat Ismail Khan, and Murad Ismail Khan.

Mr. BLILEY. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

SIRAJ YOOSUF PATEL, FARIDA FATIMA SIRAJ PATEL, HUMAIRA SIRAJ PATEL, FAYSAL SIRAJ PATEL, AND FAHD SIRAJ PATEL

The Clerk called the bill (H.R. 2277) for the relief of Siraj Yoosuf Patel, Farida Fatima Siraj Patel, Humaira Siraj Patel, Faysal Siraj Patel, and Fahd Siraj Patel.

Mr. BLILEY. Mr Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

TESSIE AND ENRIQUE MARFORI

The Clerk called the Senate bill (S. 191) for the relief of Tessie and Enrique Marfori.

Mr. BLILEY. Mr. Speaker, I ask unanimous consent that the Senate bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

The SPEAKER. This concludes the call of the Private Calendar.

JOE POOL LAKE

Mr. ROE. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 7377) to designate the Lakeview Lake project, Mountain Creek, Tex., as the "Joe Pool Lake."

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

Mr. HAMMERSCHMIDT. Mr. Speaker, reserving the right to object, and I will not object, I yield to the gentleman from New Jersey (Mr. ROE) to explain his unanimous-consent request.

Mr. ROE. I thank the gentleman for yielding.

Mr. Speaker, H.R. 7377 would designate the Lakeview Lake project in Texas as the Joe Pool Lake in honor of former Congressman Pool.

The Lakeview Lake project was authorized by the River and Harbor Act of 1965 as part of the overall project for development of the Trinity River. The project which is now under construction and scheduled for completion in 1988 will serve the purposes of flood control, water supply, and recreation.

Located on Mountain Creek, a right bank tributary to the West Fork of the Trinity River in Dallas County, Tex., it will meet critical water supply and flood protection needs in the area.

Congressman Joe Pool was elected to the 88th Congress and served from January 3, 1963, until his death in Houston, Tex., on July 14, 1968. Prior to his service in the U.S. Congress, he served in the Texas State House of Representatives from 1953 until 1958. He was a forceful and effective advocate of water resources development in the Trinity River Basin and played a leading role in demonstrating the need for the Lakeview project and securing authorization and appropriations for its construction.

In view of Congressman Pool's contribution to water resources development both in the State of Texas and in the country as a whole, it is fitting and proper to name the Lakeview project in his honor.

Mr. WRIGHT. Mr. Speaker, will the gentleman from Arkansas yield to me at this time?

Mr. HAMMERSCHMIDT. Further reserving the right to object, Mr. Speaker, I yield to the distinguished majority leader.

Mr. WRIGHT. I thank the gentleman for yielding.

Mr. Speaker, the late Joe Pool, as some of us recall, served in this House from 1963 until 1968 when he was taken from us in an untimely death.

Joe Pool, during that time, was instrumental in the authorization of this reservoir project. He served effectively and well and was dedicated to water resource conservation in Texas and throughout the United States.

We think it appropriate that this reservoir be named in his honor.

Mr. HAMMERSCHMIDT. Mr. Speaker, I thank the gentlemen for their responses.

Mr. Speaker, I rise in support of the well-warranted legislation to rename Lakeview Lake in Texas after the late former Member, Joe Pool. I was pleased to serve with Congressman Pool from the time I entered Congress until his untimely death in July 1968. Congressman Pool served in the Texas House of Representatives prior to beginning his service in the U.S. House of Representatives in January 1963.

Joe Pool was a leader in the effort to develop the Lakeview project. This project, which is currently under construction on Mountain Creek, will provide flood control, recreation, and other important benefits. The dam will have an initial storage of more than 300,000 acre-feet and is of great importance to the citizens of Texas. Joe Pool began his work on this project even before coming to Congress. He personally took part in studies of the feasibility of this project and, while in Congress, was a key figure both in study efforts and in obtaining project funding. There has been local support for naming this project for former Congressman Joe Pool for many years. The project is now scheduled for completion in 1986 and I think it is most appropriate that the name change take place at this time so as to be an integral part of the project as completed.

Mr. Speaker, I withdraw my reservation of objection.

● Mr. HOWARD. Mr. Speaker, I rise in support of the bill.

Congressman Joe Pool, who served in this House from 1963 until his death in 1968, played a crucial part in obtaining the authorization for the Lakeview Lake project in Texas. In 1961, serving as a member on the National Democratic Natural Resources Advisory Committee, he prepared a flood control and water supply study which eventualy led to the approval of the Lakeview Lake project. After his election to Congress, he was a strong and effective supporter of the project.

The project, which is now under construction, will serve essential water supply and flood control needs in the Trinity Basin. It is entirely appropriate that this project be named in honor of the man who played such a meaningful and effective role in its conception, authorization, and funding.●

The SPEAKER. Is there objection to the request of the gentleman from New Jersey (Mr. ROE)?

There was no objection.

The Clerk read the bill, as follows:

H.R. 7377

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Lakeview Lake project, Mountain Creek, Texas, authorized by the River and Harbor Act of 1965, shall hereafter be known and designated as "Joe Pool Lake". Any reference in any law, map, regulation, document, record, or other paper of the United States to such lake shall be held to be a reference to the "Joe Pool Lake".

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ROE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the legislation just passed.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

CONTINUE FUNDING PLANNED PARENTHOOD AND FAMILY PLANNING PROGRAMS

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEYSER. Mr. Speaker, what are the real problems facing this country today? I guess if any of us were asked that we would say unemployment, the crisis in the business community, the problems in education, suffering under the dramatic cuts that have been made by this Congress, and a multitude of other things that are of real concern.

Yet, what is it that the administration appears to be addressing itself to at this time with the full support of the White House? They are addressing themselves to the problem of how to block planned parenthood and family planning programs from being available to use facilities and hospitals, to be able to help people who are desperately in need of help.

I do not think the administration is tuned in, Mr. Speaker, to the real concerns of this country. To waste the time and to hurt so many people by this outrageous action and attack on planned parenthood, I think, is inexcusable.

I wish the administration would try to revise its priorities.

A VOTE AGAINST MX IS A VICTORY FOR ALL OF US AND FOR WORLD PEACE

(Mr. MOFFETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOFFETT. Mr. Speaker, it will not be long now before this great body will have the opportunity to cast a vote, a vote for peace and sanity. When we vote against the Dense Pack MX proposal later today, it will not be a defeat for anybody or anything. It will not be a defeat for the President, as some have said. It will not be a defeat for the military. It will not be a defeat for our deterrent strength.

In fact, Mr. Speaker and colleagues, it will be a big victory for all of us and for world peace.

I urge my colleagues to vote against this missile.

LEGISLATION INTRODUCED TO FORCE LOWER IMPORTED NATURAL GAS PRICES

(Mr. CORCORAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CORCORAN. Mr. Speaker, we all know that natural gas prices are too high. But did you know that imported natural gas is a key source of the high prices Americans are paying for natural gas?

From Boston to San Francisco, American consumers are up in arms about high-priced imported gas from Canada, Mexico, and Algeria. We are familiar with countries dumping their products on our markets more cheaply than they are sold at home through Government subsidization. Well, this is an even better deal. Canada, Mexico, and Algeria are "dumping" their gas to us at prices much higher than their citizens pay for gas and even much higher than we pay the vast majority of our own producers for natural gas. And our consumers are forced to buy it while abundant supplies of cheaper domestic natural gas are shut in.

Ridiculous, is it not? Even the Alberta producers have urged the Canadian National Energy Board to drop the price, but the board has declined. After all, as long as we keep paying Canadians $4.94 while we pay our own producers of gas an average price of $2.50, why give up a good thing?

I am introducing legislation today that will end this ridiculous situation. In 6 months, the price of imported natural gas will come down or the gas will not come in. In any case, American natural gas consumers in the 24-plus States now receiving imported natural gas will benefit from lower gas prices.

It is a simple bill. We can do it now. I ask for your support.

FORTY-FIRST ANNIVERSARY OF PEARL HARBOR

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORNAN of California. Mr. Speaker, today is one of those dates in American history that will ring forever in our memories and our hearts. Precisely at this moment on the clock, 41 years ago, the warloads of Japan had their so-called peace negotiators and their ambassador here in Washington, D.C., present Secretary of State Cordell Hull a declaration of war long after the attack had begun on Pearl Harbor and all military installations on Oahu.

Why did the Japanese warlords attack the greatest power in the Western Hemisphere? Where did they get the gall to strike us? Of course they had slogans like "Asia for the Asians," and "The East Asia Coprosperity Plan," but the real reason was that they thought they could quickly crush us. That we were so weak that they could win a quick blitzkrieg war. In other words, we did not represent to the Japanese warlords in their perception a nation of resolve with credible deterrent.

Deterrent. That one word should be the key word at the core of the debate today on the "Peacekeeper MX" missile and its closely spaced basing plan called Dense Pack. It is deterrent and deterrent only that we should debate in this Chamber today. President Jimmy Carter wanted 200 of this follow-on missile to the Minuteman series. President Reagan recommends 100 as a sufficient deterrent to Soviet attack planning.

This CSB basing mode requires more discussion, understanding, and refinement, but no one has come up with a better basing mode—no one. Our military planners analyzed moving barges, moving trucks, moving trains on old rail lines, even dirigibles as basing modes. We have looked at literally every possible idea. So I ask my colleagues on this day, Pearl Harbor Day, the 41st anniversary of a sneak "first strike attack" for which we were horribly unprepared, that we think first and foremost about deterrence, deterrence, deterrence. Why? To keep the fragile peace we enjoy today in our God-blessed country.

WHICH PARTY WANTS JOBS FOR AMERICANS?

(Mr. WALKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, last evening we learned something I think disturbing about the job issue on which we have been focusing for so

long. We learned that one of the major parties represented in this House may not be fully committed to the idea of creating as many jobs as possible. I offered last night an amendment entitled "the job opportunity amendment." It was an idea to use the money we are spending for as many jobs as possible.

To give the Members some sense of perspective, if we have $100 to spend, I would say that what we should do is create 20 jobs at $5 an hour.

What we heard as the defense of the Democratic position on this floor last night was that they want to create 5 jobs at $20 an hour. I think it is far more important to have 20 people working at $12,000 a year than to have 5 people working at $36,000 a year. The Democrats' defense put them on the side of less jobs at more money per job.

I think that if this country wants jobs, enough jobs to put all Americans back to work, it is necessary to understand which party wants to put the most Americans back on the job.

REGULATORY REFORM LEGISLATION SUPPORTED

(Mr. KINDNESS asked and was given permission to address the House for 1 minute.)

Mr. KINDNESS. Mr. Speaker, I would like to join our colleague, the gentleman from Georgia (Mr. LEVITAS), in his comments upon the regulatory reform legislation which is due to be the subject of consideration before the Rules Committee on Thursday. The commitment of the Speaker of the House and the leadership with respect to consideration of that very important legislation is remembered well.

It is a matter of concern that the mechanics of the process are occurring at such a late date. Let us hope that there will not be insulation by those surrounding the leadership in staff positions, and so forth, so that the leadership will not be able to live up to that commitment. It is timely that the matter proceed very promptly, and I would urge that the commitment be kept, as did the gentleman from Georgia, so that this House may debate that very important legislation having to do with regulatory reform in the rulemaking process which affects our lives and businesses so very much.

ARE OUR DRUG PLANS ONLY A PLOY?

(Mr. GILMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous material.)

Mr. GILMAN. Mr. Speaker, on October 14, 1982, in an effort to wage war on drug trafficking, the President established 12 regional drug task forces—in addition to the ongoing south Florida task force—and a Presidential Commission on Organized Crime. The cost to underwrite these new regional drug task forces has been pegged at approximately $130 million. We are now receiving reports that the funds to underwrite these task forces would have to come from other law enforcement agencies.

Although I applaud the President for undertaking this new drug interdiction initiative, we must avoid playing a charade of creating new drug enforcement programs on the one hand, while failing to properly fund those law enforcement programs on the other hand. If we truly mean what we say about waging war on drug trafficking, then we must back up our well intended words with deeds by providing funds, personnel, equipment, and the resources needed by our drug law enforcement agencies to effectively perform their dangerous tasks.

Mr. Speaker, the President of Pakistan is currently in Washington to discuss a wide range of complex issues affecting both our nations, including the thorny problem of the massive heroin exports by Pakistan. But how can we ask that Government to intensify its efforts to help eradicate the illicit production of drugs in that Nation's northwest frontier if our Nation is not prepared to effectively interdict drug trafficking in this country?

An editorial appearing in today's New York Times, entitled, "Was the Drug Plan Only a Ploy?" questions the administation's preelection drug plan by asking: "Was this just another bold anticrime proposal surfacing in the thick of a campaign and destined to sink from sight after the votes were counted?"

I hope not. I hope that the administration's drug plan is not a ploy, that it truly intends to provide the funds, personnel, and equipment for the proposed regional crime task forces and not at the expense of our existing law enforcement agencies.

Mr. Speaker, in an effort to bring to my colleagues attention the possibility that these drug task forces might not properly be funded, I am inserting at this point in the RECORD the complete text of the New York Times editorial of December 7, 1982:

[From the New York Times, Dec. 7, 1982]

WAS THE DRUG PLAN ONLY A PLOY?

Just before the November elections, President Reagan announced a new plan to fight organized crime and drug trafficking. It called for adding 900 agents to the Federal Bureau of Investigation and the Drug Enforcement Administration and creating task forces to conduct major investigations in 12 cities.

The plan was impressive. The Administration seemed ready at last to go beyond rhetoric about crime. But funding remained a problem. Mr. Reagan said the $130 million could be found by cutting back other Justice Department programs.

That shaky commitment aroused skepticism. Was this just another bold anticrime proposal surfacing in the thick of a campaign and destined to sink from sight after the votes were counted?

The skeptics now seem vindicated. The Administration duly asked Congress to pare the needed funds from other budgets. But when this met opposition, the White House backed off. The Office of Management and Budget now says it cannot find enough money in other programs, and offers no alternative.

The Administration cannot be held serious about its plan if it will not help make the difficult financial choices. Not to fund the program, now that the election is over, turns an admirable plan into a cynical ploy. In the matter of crime-busing, that is disgraceful.

FORTY-FIRST ANNIVERSARY OF THE ATTACK ON PEARL HARBOR

(Mr. CLAUSEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CLAUSEN. Mr. Speaker, today is the 41st anniversary of the Japanese surprise attack on Pearl Harbor. As a former naval aviator and veteran of World War II, I will never forget that day on December 7, 1941, which President Roosevelt referred to as: "a day that will live in infamy."

I believe that this day should be a day of remembrance for the 2,400 citizens of the United States who were killed in action on that fateful morning. This was an attack which touched off a war effort in the Pacific that dramatically changed the balance of power in East Asia and the Pacific region for decades to follow.

I believe that this day should also be remembered and associated with an effort that took 44 months of battles at sea, in the air, and on scores of Pacific islands—at a cost of over 97,000 American lives—to end the war in the Pacific. This is a high price to pay for unpreparedness. This must be the lesson to all Americans—that peace goes well beyond the absence of war—it goes straight to the issue of a credible deterrent and a national commitment to peace through strength.

I would remind my colleagues of this lesson during their consideration of "Peacekeeper," a program designed to help protect this great Nation and the free world by providing a capable and effective deterrent.

Finally, Mr. Speaker, let us all remember that what has made this Nation great is the moral strength and character of our people and our ability to pull together in times of stress and pressure—to overcome adversity no matter what the odds are. This is the lesson which makes me proud to be an American.

PERSONAL EXPLANATION

(Mr. PORTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PORTER. Mr. Speaker, last week, on Wednesday, Thursday, and Friday, December 1, 2, and 3, I went to Brasilia, Brazil, as an official delegate to the Western Hemisphere Conference of Parliamentarians on Population and Development. I headed the delegation of the United States, was elected a vice president of the Conference and presided at one of its plenary sessions, and delivered to the Conference the greetings and good wishes of President Reagan.

Unfortunately, these official responsibilities in representing our country in Brazil, forced me to miss a number of recorded votes in the House. I wish to announce for the record how I would have voted on each rollcall, had I been able to be present:

Rollcall No. 400; "yes."
Rollcall No. 401; "yes."
Rollcall No. 402; "yes."
Rollcall No. 403; "no."
Rollcall No. 404; "yes."
Rollcall No. 405; "yes."
Rollcall No. 406; "yes."
Rollcall No. 407; "no."
Rollcall No. 408; "no."
Rollcall No. 409; "yes."
Rollcall No. 410; "no."
Rollcall No. 411; "no."
Rollcall No. 412; "yes."
Rollcall No. 413; "yes."

GENERAL LEAVE

Mr. ADDABBO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the bill (H.R. 7355) making appropriations for the Department of Defense for the fiscal year ending September 30, 1983, and for other purposes, and that I may be permitted to include tables and extraneous material in connection with the bill.

The SPEAKER pro tempore (Mr. BENNETT). Is there objection to the request of the gentleman from New York?

There was no objection.

DEPARTMENT OF DEFENSE APPROPRIATION BILL, 1983

Mr. ADDABBO. Mr. Speaker, pursuant to the unanimous-consent request granted December 2, 1982, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 7355) making appropriations for the Department of Defense for the fiscal year ending September 30, 1983, and for other purposes; and pending that motion, Mr. Speaker, I ask unanimous consent that general debate be limited to not to exceed 2 hours, the time to be equally divided and controlled by the gentleman from Alabama (Mr. EDWARDS) and myself.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York (Mr. ADDABBO).

The motion was agreed to.

□ 1345

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 7355, with Mr. ROSTENKOWSKI in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the unanimous-consent agreement, the gentleman from New York (Mr. ADDABBO) will be recognized for 1 hour, and the gentleman from Alabama (Mr. EDWARDS) will be recognized for 1 hour.

The Chair recognizes the gentleman from New York (Mr. ADDABBO).

Mr. ADDABBO. Mr. Chairman, I yield myself 14 minutes.

Mr. ADDABBO. Mr. Chairman, this year the administration submitted to the Congress the largest single military budget ever submitted to any legislative body during peacetime.

It is 85.6 percent above the fiscal year 1980 budget that was submitted just 36 months ago.

Measured in fiscal year 1983 constant dollars—the defense budget as submitted is $20 billion higher than the peak of the Vietnam war years; and it has been exceeded in total dollars only once since the end of World War II, and that was 1 year, 30 years ago, during the peak of the Korean war.

Mr. Chairman, the committee looked at estimates for defense in fiscal year 1983 totaling $249.6 billion, including military and civilian pay raise sums.

The bill being presented to the House at this time contains a total of $231.6 billion, including transfers of $520.1 million, a reduction of $18 billion from the President's request.

It is $25.9 billion more than the sums made available for the same purposes in fiscal year 1982.

The administration proposes spending almost $1.7 trillion for defense over the next 5 years beginning in fiscal year 1983.

It took Congress over 40 years to appropriate $2 trillion for defense and the Pentagon plans to spend almost that much in only 60 months.

With record-high deficits facing this country, estimated to range between $155 billion and $200 billion, it is my judgment this Nation cannot support a number of unneeded major weapon systems funded in this bill that will have significant outlay impact in fiscal year 1984 and thereafter. For example—the bill contains about $4.8 billion to fund 7 B-1B bombers; 100 B-1 bombers will cost $41 billion, or $410 million each, according to CBO estimates.

The bill contains about $3.5 billion in fiscal year 1983 for continued development and initial production of five MX ICBM missiles. The MX missile program will cost over $35 billion in Dense Pack deployment mode.

Depending on the Soviet response to MX, the administration proposes to additionally invest in antiballistic missile defense, deceptive basing, and deep underground basing, which will add many billions of dollars more to the MX program.

The bill contains $6.6 billion to construct two more nuclear-powered aircraft carriers in fiscal year 1983.

A minimum expenditure of nearly $84 billion in constant fiscal year 1983 dollars will be required over the next 30 years for initial investment and lifecycle cost of the two carriers, their airwings, their task force ships, and submarines, and support ships.

The aircraft carrier costs that I cited are conservative Navy estimates; they are not in then-year dollars. And for that amount, we are told the Navy will save the taxpayers $750 million. What a bargain.

These three systems, plus the C-5B and KC-10 aircraft programs funded in this bill, will cost nearly $100 billion in initial investment alone.

This country cannot afford to spend $100 billion to buy just five military systems over the next few years.

I support a strong national defense like everyone else in this House, but I do not think we have to fund every expensive military "toy" the admirals, generals, and contractors think we should have.

I do not think we need to build two more nuclear-powered aircraft carriers when we already have 13 carriers and another one under construction.

We need more Navy aircraft, missiles, surface ships, and submarines to adequately threaten the Soviet Navy, not provide the Soviets with expensive targets that large aircraft carriers represent.

I do not think we need to build 100 B-1B bombers at a cost of $410 million apiece when Congress decided to terminate the B-1 in 1977 in favor of building cruise missiles on B-52's through the 1990's until the advance technology bomber enters the inventory.

Nothing has changed since 1977. There is no new threat to cruise missiles.

This country cannot afford to build two new bombers. Mark my words. If the B-1 proceeds forward, the advance technology bomber will be terminated at a great loss to this country because it will compound and tax Soviet air defenses far more than the B-1 will.

I do not think this country can afford to develop and deploy an MX system at a cost of $35 billion to $50 billion that will abrogate the only two hard fought agreements we have achieved with the Soviets.

The MX is not mobile. A total of 100 missiles will be placed in 100 fixed silos. And new fixed silos are prohibited under SALT.

When the administration proposes a new ABM system to protect MX, it will effectively terminate the only treaty we have had with the Soviets.

And just as serious, these multibillion dollar systems will cause very important areas of our conventional forces to suffer for lack of sufficient funding.

Without doubt, our conventional forces will continue to suffer over the next few years because of these costly, unneeded systems that might be nice to have but are not necessary for our national defense.

And more importantly, I do not think we should fund multibillion dollar carriers, MX missiles, and B-1 bombers at the expense of our economy, and to the detriment of the needs of our cities, States, and the people of this great Nation.

And keep this in mind. If we do not do our work today on the B-1, the MX and the carrier, I feel that they will be acted on by the 98th Congress at great expense to the American taxpayer in the nature of costly termination costs in fiscal year 1984.

I recommend that you read my additional views on page 245 of the report. You will find that later on I shall offer amendments to delete funds for the second nuclear-powered aircraft carrier, for the MX missile, and all funds budgeted in fiscal year 1983 for the B-1 bomber. Deleting funds for these programs now does not preclude reconsideration of these weapons systems in the future.

On a more positive note, I am proud to point out that the Defense Subcommittee again this year took a number of initiatives to increase spending during fiscal year 1983 for our reserve components, which are continually underfunded. We have recommended over $500 million above the budget for additional weapons and other support for our Guard and Reserve Forces.

A word about the Pershing II missile. The full $111.3 million budgeted for continued development of the Pershing II missile is included in the bill.

The committee deleted without prejudice the $498.3 million budgeted for continued production of that missile until about 10 or 12 successful flights are accomplished, giving us confidence the missile works.

Remember that 21 Pershing II missiles were funded for production in fiscal 1982, allowing the administration to meet the initial deployment schedule in Europe of 16 Pershing missiles.

I want to compliment the members of the Defense Subcommittee for returning on November 15—during their district work period—to mark up this bill so that we might bring it to the floor today. They worked long hours in an effort to get a bill out of the House before sine die adjournment.

Our staff is to be commended for the long and tedious hours and months they worked in order to prepare the committee for markup and in writing the bill and report and having it printed in only 6 days after markup was completed. It is a record never before achieved.

We have initiated another first this year by including in this bill the military and civilian pay raise that became effective October 1, 1982. This initiative will preclude the necessity for a pay supplemental next spring.

With the $231.6 billion recommended in this bill, the Department has been placed on notice the committee does not expect to receive any supplemental for any purpose in 1983 unless it is in the nature of a "zero sum" type utilizing available funds.

I should remind the House that by far the majority of the thousands of line items in the defense budget are untouched. They are funded at the budget or the authorized levels.

We have been very careful not to cut into our readiness; therefore, the reductions recommended in operation and maintenance represent savings identified from revised fuel cost estimates—$1.2 billion—in energy conservation—$50 million—in excess industrial workload carryover estimates—$63.5 million—in underestimates of FMS administrative surcharge collections—$100 million—in civilian pay raise overestimates—$372 million—in the foreign currency fluctuation account—$1 billion—and in other nonreadiness areas.

With the few exceptions I have mentioned, I urge your support of the recommendations of the committee. I thank you for your attention, but before I defer to the gentleman from Alabama, the ranking minority member of the subcommittee, I shall submit a table and further additional highlights of the bill into the RECORD at this point.

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY

	Fiscal year—		House	House bill compared with enacted	House bill compared with estimates

MILITARY PERSONNEL

The committee recommendations for Active and Reserve personnel appropriations for fiscal year 1983 total $45,076,265,000. That is a reduction of $2,826,235,000 from the budget request, but an increase of $2,339,248,000 over fiscal year 1982 appropriations. Action on the fiscal year 1983 pay raise accounts for $1.9 billion, or about two-thirds, of the $2.8 billion reduction from the budget.

Committee action on the Department of Defense's budget revisions lowering force structure and permanent change of station requests accounts for another 20 percent of the reductions. The balance of the reduction largely stems from committee recommendations for enlistment and reenlistment bonuses and for certain proposed travel initiatives.

The budget requested $3,007,000,000 to cover an 8-percent pay raise for fiscal year 1983 for the military. Congressional action on the fiscal year 1983 budget resolution and reconciliation bill set military pay at 4 percent and called for a 50-percent absorption of that amount by all departments and agencies. The Appropriations Committee itself asked subcommittees to approve a more realistic 25 percent in absorption. The committee's reduction of $1,885,566,000 from the budget request for the pay raise reflects the policy of a 4-percent pay raise for the military and an absorption rate of 25 percent.

The committee has broken with the past by including the funds for the pay raise in the regular appropriation bill rather than waiting for the spring supplemental, which is the usual practice. This action was taken to give the Department the greatest opportunity to plan the administrative and management actions that will be necessary to achieve the 25-percent absorption. It is obvious that the efforts will require an intensive scrutiny of the military personnel accounts, and may well require reprogramings from other accounts. To be certain those reductions will be made, the committee is requiring the Department to submit its plan for achieving the 25-percent absorption promptly after enactment of this bill.

Committee actions on military personnel will fund an estimated active end strength of 2,127,444. Considering that 11,000 training and administration of Reservists [TARS] personnel were counted as active strength last year and are now counted as Reserves, the committee recommendation funds an active end strength increase of about 30,000 over fiscal year 1982. The Air Force, Navy, and Marine Corps are funded at the authorized levels, which represent substantial growth for the Navy and the Air Force. The Army is funded at just about the 1982 end strength levels, somewhat lower than the revision recommended by the Secretary of Defense. The committee reductions in end strength were not specific with regard to force structure.

The committee recommendations fund selected reserve strength at about 30,000 over fiscal year 1982, when the adjustment for TARS, mentioned above, is taken into account. This reduction is lower than authorized levels by 4,946, but fully 20,000 higher than the revised Department request.

The third general area that accounts for the committee's overall reduction is its recommendations on bonus programs and travel initiatives.

For enlistment and selective reenlistment bonuses, the committee recommends $616,154,000, a reduction of $147,680,000 from the request. In a word, recruiting and retention are at historically high rates, both in terms of quality and quantity. Authorized end strengths are lower than budgeted amounts, so requirements are down. Furthermore, powerful forces besides bonuses are at work to produce the glowing achievements in retention and recruiting. Department and other sources have cited the sluggish economy, the very significant pay raises of recent years, a growing sense that it is an honor to wear the uniform again, opportunities for education and training, and improved recruiting and advertising efforts, to mention a few of the major ones. The committee feels that its actions will help to bring about the selectivity it has been emphasizing for several years in these programs.

The committee also funded 25 percent of the budget request for several travel initiatives proposed in the fiscal year 1983 budget, including member mileage allowance, dependent mileage allowance, household goods weight allowance, and temporary lodging expense. It is the committee's long-held view that the Department transfer policies result in far too many moves that are disruptive and expensive to the taxpayers and to the individual member. It is the committee's intention to perform a comprehensive review of various permanent change of station initiations in connection with the fiscal year 1984 budget. The 25-percent funding recommended by the committee reflects its concern for the cost to individual members of current policies.

Last year the committee directed the Department to permit each service to establish the appropriate mix of active Guard/Reserve (AGR) and civilian technician strength. The committee also provided a number of guidelines for the services to follow in this activity. Since that time, the committee has received numerous complaints about the manner in which its directives are being carried out, and requested assistance from the General Accounting Office to review the issues being raised. As a result of its review this year, the committee recommendation establishes a floor strength at fiscal year 1982 levels for civilian technicians, and it directs the Secretary to use existing authority to exceed presonnel ceilings and hire the civilian positions the committee is funding. For the future, the committee requires each component to develop a plan for managing its full-time support personnel, and directs the Department to take the necessary steps to insure that future growth of full-time manning is determined on the basis of cost effectiveness consistent with readiness requirements.

Closely related to the civilian technician conversion issue is the committee's recommendation on full-time support. The committee had before it Department budget revisions lowering budgeted drill strength by 20,000 and $80 million, and for keeping full-time support at 1982 levels by lowering earlier budget requests by 4,946 end strength and $60 million. The committee rejected the 20,000 reduction in drill strength, but accepted the 4,946 reduction for full-time strength.

The committee anticipates budget requests for significant growth in full-time support in future years, and determined that the best course was to concur in the Department revision and take actions to insure that increases in full-time personnel do improve readiness in a cost-effective manner. The committee's review this year disclosed the need to enhance the relevance of cost effectiveness and readiness in selecting the type of full-time support personnel increase; the need to improve the management of CAPSTONE to insure that increases in full-time support results in improved training; the need to eliminate the wasteful practice of double slotting—listing full-time manning personnel in active duty positions comparable to those

held by drilling Reservists; and the need to insure that AGR and military technician personnel will mobilize and deploy with their units.

In other actions having to do with Reserve components, the committee removed the pay cap on civilian technicians putting them on the same footing as the other 200,000 Federal employees who are also members of a Reserve component; and the committee clarified its intent that full-time personnel in the Guard are under State control.

OPERATION AND MAINTENANCE (O&M)

The committee is recommending reductions totaling $4,192,987,000 from the O&M request of $71,087,451,000, or a reduction of less than 6 percent.

Because the O&M accounts fund our near-term military readiness, I want to assure my colleagues that the bill before you provides for higher readiness levels than included in the President's fiscal year 1983 budget but does so for $4.2 billion less than was requested.

Let me break the $4.2 billion reduction down for you.

The sum of $1,150 million was deleted because current fuel prices are significantly less than was projected in the budget. DOD buys so much fuel that for every 1 cent per gallon that fuel goes down in price, DOD saves about $75 million.

The sum of $1 billion was deleted because of the continued strength of the dollar overseas. When the budget was submitted last January, DOD was projecting that the strength of the dollar would start to decline. Since this has not happened, it means that DOD has requested more funding in the budget than it really needs to support its planned programs.

The sum of $125 million was deleted from the Army because slippages in the delivery of new weapons systems meant that O&M funds would not be requested to support the items not yet received.

The sum of $190 million was deleted simply as a result of an agreed upon change in the method of accounting for obligations in the Air Force depot maintenance program.

The sum of $100 million was deleted from the $1.3 billion DOD guesses that it requested for consultants and experts. The committee investigative staff found that DOD does not really know how much it spends and that very little control exists over these expenditures.

The sum of $100 million was deleted to reflect the savings which will result from increased reimbursement on administrative costs from foreign military sales customers.

The sum of $182 million was deleted because DOD had proposed a change in the budgeting procedures for buying industrial plant equipment. These costs will continue to be reflected in the procurement accounts where they have always been.

The sum of $64 million was deleted because our investigative staff and the GAO had found that DOD was requesting hundreds of millions of dollars for work in DOD industrial activities which could not even be performed during fiscal year 1983.

The sum of $333 million was deleted as a result of giveups by the Secretary of Defense or by the military services during the course of our budget review. The largest portion of this reduction is $249 million which the Secretary of Defense testified could be saved by accelerating the retirement dates for 22 ships which were beyond their normal life expectancy and were scheduled to be retired over the next few years anyway.

The sum of $372 million was deleted for the civilian pay increase which took effect on October 1, 1982—$186 million of this reduction is attributable to the fact that the budget projected a 5 percent civilian pay raise when the actual raise was only 4 percent. The remaining $186 million reduction requires DOD to absorb 25 percent of the cost of the pay raise. This is only half of the 50 percent absorption that was recommended in the budget resolution for the civilian agencies of the Federal Government.

The sum of $305 million was deleted based upon specific authorization reductions recommended by the Authorization Conference Committee, including such items as base operations, CINC readiness fund and Navy depot maintenance.

The remaining reduction of $272 million is the result of many separate smaller adjustments, the larger items of which include: Reduced reimbursements to GSA for space rental; overbudgeted unemployment and disability compensation costs; reduced claims reimbursements to the West German Government; increased emphasis on energy conservation; and savings in the CHAMPUS program.

Based upon the above list, I think it is clear that the proposed reductions do not impact adversely on readiness.

The recommendation does, however, include several increases which will directly improve the readiness posture of our Armed Forces. For example:

The sum of $44 million was added to continue the equipment and training upgrade presently underway in the Army Guard and Reserve.

The sum of $75 million was added to allow Navy pilots to fly 39,000 hours more than was included in the budget for tactical and antisubmarine warfare operations.

The sum of $150 million was added for improved maintenance on DOD owned real property. This is $285 million above the level recommended by the Secretary of Defense in our hearings.

The sum of $33 million was added to support improved Marine Corps and Marine Corps Reserve supply, equipment, and training readiness.

The sum of $50 million was added to reengine Air Guard tankers to improve their range and readiness capability.

In summary, the reductions being proposed were made judiciously to insure that our ever-improving readiness levels would not be harmed. In addition, it can clearly be seen that the increments to the budget being proposed will have a direct and immediate beneficial impact on readiness. Finally, the bill before us includes an increase of 6.2 percent over the fiscal year 1982 appropriated level, making it the largest recommended appropriation for O&M ever considered by the Congress.

PROCUREMENT

Mr. Chairman, the amended fiscal year 1983 procurement budget totals $89,616,914,000. The bill before the House recommends $81,273,205,000 in total funding, including $80,753,133,000 in new budget authority and $520,072,000 in prior year unobligated balances transferred forward to fiscal year 1983. The total amount recommended is a decrease of $8,343,709,000 below the fiscal year 1983 budget estimate and is $16,077,420,000 above the total amounts provided for fiscal year 1982, an increase of 25 percent. The table below summarizes the budget estimates and the committee's recommendations:

	Budget request	Committee recommended	Change from request
SUMMARY			
Army:			
Aircraft	2,745,914	2,514,900	−231,014
Missiles	2,846,600	2,287,600	−559,000

Total funding available	89,616,914	81,273,205	−8,343,709

ARMY

For Army procurement, the bill includes $15,515,513,000 in new obligational authority plus $198,200,000 in transfers, for a total of $15,713,713,000. This total represents an increase of $1,742,342,000, or 11 percent above fiscal year 1982. The bill includes the following: $810.3 million, including advance procurement, for 48 AH-64 Apache attack helicopters; $568.9 million, including advance procurement, for 96 UH60A Black Hawk helicopters; $261.3 million for the CH-47 helicopter modification program; $779.1 million for procurement of 376 Patriot surface-to-air missiles; $422.1 million, including advance procurement, for production of the multiple launch rocket system (MLRS) under a 5-year multiyear contract; $832.5 million, including advance procurement, for 600 Bradley fighting vehicles; $1,939.5 million, including transfers and advance procurement, for 855 M-1 main battle tanks; $511.5 million, including advance procurement, for procurement of the division air defense system (Divad); $2,075.4 million for tank, artillery, mortar, and other ammunition; $4,148.8 million for other procurement, including almost $1 billion for tactical trucks, and a wide variety of electronic, communication, and other support equipment.

NAVY

For Navy procurement, the bill includes $36,012,339,000 in new obligational authority, plus $35,000,000 in transfers of unobligated balances to fiscal year 1983, for a total funding availability of $36,047,339,000. This total represents an increase of $9,447,806,000 or 36 percent above fiscal year 1982.

The bill funds the following major Navy weapon systems:

Bill provides funds for 272 aircraft including 84 F/A-18, 24 F-14 fighter aircraft, 8 A-7E attack aircraft, and 21 AV-8B close air support aircraft.

Total appropriation recommended for Navy aircraft is $10.6 billion and represents a 16-percent increase over the fiscal year 1982 appropriation.

Total appropriation for Navy weapons is $3.6 billion which is an increase of nearly 13 percent over fiscal year 1982.

Includes 72 Trident missiles, 670 Sparrow missiles, 500 Sidewinder missiles, 144 Mark-48 torpedoes, 440 Mark-46 torpedoes, and 500 Captor mines.

Total appropriation for Navy shipbuilding is $15.9 billion for 14 ships and includes funds for a Trident D-5 ballistic missile submarine, 3 Aegis cruisers, 2 SSN-688 nuclear-powered attack submarines, 2 FFG-7 guided missile frigates and 2 nuclear-power aircraft carriers.

The total appropriation for other procurement, Navy is $3.8 billion which represents a 3-percent increase over fiscal year 1982.

The total appropriation for the Marine Corps procurement is $2 billion which represents an increase of 17 percent over fiscal year 1982.

AIR FORCE

For Air Force procurement, the bill includes $28,778,436,000 in new obligational authority and $286,872,000 in unobligated balances transferred forward to fiscal year 1983 for a total availability of $29,065,308,000. This total represents and increase of $5,166,977,000 or 22 percent above the amounts provided in fiscal year 1982.

Major items funded in Air Force procurement include: $3,868.1 million, including advance procurement, for 7 B-1 aircraft; $1,402.4 million, including advance procurement, for 39 F-15 aircraft; $1,934.9 million, including advance procurement, for 120 F-16's under a multiyear contract; $915 million, including transfers and advance procurement, for a multiyear procurement contract for KC-10A tanker/airlift aircraft; $850.0 million for C-5B intertheater airlift aircraft; $3,581.9 million for aircraft spares and repair parts; $988 million for the procurement of 5 MX missiles; $548.2 million for air launched cruise missiles; $1,287 million for continued procurement of four different satellite systems, plus space boosters and shuttle costs; and $5,537 million for a wide variety of equipment in the "Other Procurement, Air Force" account.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

For research, development, test, and evaluation [RDT&E], the bill provides a total of $22.1 billion, a reduction of $2.3 billion from the budget request. This recommended sum is an increase of $2.3 billion over the amount provided last year, and therefore represents an increase of 11.4 percent. It will be fully adequate for the RDT&E activities of the military departments and agencies in fiscal year 1983.

The RDT&E accounts include hundreds of line items, each of which received careful scrutiny in the course of examining the budget. The line items themselves comprise thousands of individual projects which span the full gamut of technology and weapons system developments.

Among the major programs funded in the bill are defense research sciences, $717 million; ballistic missile defense system technology, $377.3 million; Pershing II, $111.3 million; DDGX, $138.6 million; F/A-18, $109.2 million; space defense systems, $211.8 million; and advanced medium range air-to-air missile, $207.6 million.

I must point out that more than 11 percent of the total amount in the bill for the entire RDT&E program for all of the Department of Defense, some $2.5 billion, is for the MX. Further, $754 million, or 3.4 percent of the entire RDT&E amount, is for the B-1B bomber which its advocates claimed last year was already developed and ready for production.

Mr. Chairman, the first major amendment will probably be the MX amendment. The MX amendment will propose to delete the $988 million for procurement. It does not affect anything as a bargaining chip. It is $988 million which is premature. It would probably be added to the unexpended balances which now total $124.3 billion. These are moneys appropriated to the Defense Department which are still waiting to be spent. This $988 million would probably be added to that.

A second amendment will be offered to reduce the funding for the MX research and development. In this same bill, in which the administration has asked for $988 million for the production of the MX missile, they have also asked for $1.7 billion for research and development on that same missile.

How can we sign a contract, and procure missiles when we still need nearly twice as much money for research and development on the missile?

There is also money in the bill for the basing modes. There is $775 million for that in the bill. I will move to reduce that sum because Dense Pack is now the intended basing mode that was announced to this Congress.

So there will be two separate amendments as far as the MX is concerned. The first will be on the procurement; to cut out the waste and stop the Air Force from taking this money under a blank check without the Congress having any control over when they are going to spend it. And the second amendment will be to reduce funding on research and development for the basing modes and the missile itself.

Mr. PEYSER. Mr. Chairman, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from New York.

Mr. PEYSER. Mr. Chairman, I thank the gentleman for yielding.

I want to take this opportunity at the opening of the debate to thank the subcommittee chairman, the gentleman from New York (Mr. ADDABBO) for what has to be one of the most courageous stands that anyone has taken. As one individual member, he has led the way in this fight, which is really a fight, I believe, for the American people and represents how the

American people feel, particularly in the area of the deletion in terms of the MX missile money and the money for the B-1 bomber. In the face of tremendous opposition by the administration and by the Cabinet members, the gentleman has stood firm in his convictions.

I know that it has not been easy, and I want the gentleman to know that I really believe he is speaking for the American people and is going to be speaking for a majority of this Congress. I want to thank him for the job he has done.

Mr. ADDABBO. Mr. Chairman, I thank the gentleman from New York.

Mr. STRATTON. Mr. Chairman, will the gentleman yield to me?

Mr. ADDABBO. I yield to the gentleman from New York.

Mr. STRATTON. Mr. Chairman, the gentleman indicated that one of the amendments he was going to offer was an amendment that would eliminate $988 million for the MX. My question is this: I assume that the gentleman's amendment would be to strike out lines 13 through 25 on page 26; is that correct?

Mr. ADDABBO. Mr. Chairman, I do not have the bill before me, but it will be to reduce the sum of money that is in the bill for missile procurement.

Mr. STRATTON. By the $988 million?

Mr. ADDABBO. The gentleman is correct.

Mr. STRATTON. Mr. Chairman, a further question is this:

The section that contains this $988 million spells out the fact that those funds would not be obligated or expended for procurement of any missiles until after March 15, 1983, when the Congress has received a written timetable regarding the monthly production and delivery schedule, and so forth.

Does that not mean that the so-called Dense Pack basing mode which we have been told is the recommended system for utilizing the missile, is by no means set in concrete, and that we will not really know what the fired missile basing mode until the first of March 1983?

Mr. ADDABBO. That is essentially correct, and that is the reason I am moving to strike out the full $988 million. The language in the bill, regarding the March 15 date, says all we have to do is receive a timetable, and if that timetable says that the missile is going to be needed on January 1, 1986, which is the earliest time it could be had, they could hold that money or reprogram it or do whatever they want before that time.

We want control by the Congress, the people's House. On November 2, 1982, the people said the Congress should look at the defense bill and should look at each weapons system. That is what I am saying. Let the next Congress look at the entire program and see whether we should give them money for production. This would give them complete license after March 15 to commit us to a $25 billion to $40 billion program, which I think the next Congress should look at very carefully and not this Congress.

Mr. STRATTON. Mr. Chairman, if the gentleman will continue to yield to me, a number of Members of the House, I believe, are concerned about the so-called Dense Pack basing mode. They have problems with understanding fratricide, pindown, and all of these other things that are supposedly involved with what is known as Dense Pack. I wonder if the gentleman would agree with me that, as this legislation is formulated here in his bill, there is no Dense Pack included. Therefore, those who are worried about the fact that Dense Pack is a part of this arrangement need not be concerned with this aspect of it. Does he not agree?

Mr. ADDABBO. Mr. Chairman, Dense Pack is not included in this amendment, but later on, as the gentleman knows—sitting as the ranking member on the House Armed Services Committee—Dense Pack could be included under the research and development portion of this bill. We will move to the consideration of that when we get to it later. We will be debating the MX for quite some time later on this afternoon, and probably tomorrow.

Mr. DICKS. Mr. Chairman, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from Washington.

Mr. DICKS. Mr. Chairman, it is true that the production money is there in the procurement part of the bill, but implicit in that is the assumption that the administration has selected Dense Pack as the basing mode, so once the missiles are procured it is the Dense Pack system they intend to deploy, and they will put the missiles in the Dense Pack arrangement.

That is why Members are concerned, because they are questioning whether Dense Pack itself is a viable option, and, therefore, they want to deny the procurement money until we have a basing mode that is more credible than Dense Pack; is that not the fact?

Mr. ADDABBO. The gentleman is absolutely correct. That was the decision announced by the President on November 22. The Dense Pack is the mode announced for the MX.

Mr. DICKS. And there is more than $700 million in there for research and development on the basing mode, which one would assume would be the Dense Pack arrangement?

Mr. ADDABBO. That is correct.

Mr. DICKS. So Dense Pack is very much a part of this bill.

The CHAIRMAN. The time of the gentleman from New York (Mr. ADDABBO) has expired.

The Chair recognizes the gentleman from Alabama (Mr. EDWARDS).

□ 1400

Mr. EDWARDS of Alabama. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the bill we bring before you today is, as the Chairman has said, the largest in peacetime history.

But it also contains the largest reduction from the President's request in the last 22 years.

This is a bill, I believe, no one is pleased with. I do not think the President or Secretary Weinberger really like it. The Chairman has indicated he did not like it, and I am certainly uncomfortable with it.

Prior to this past couple of months I could not imagine myself ever standing in this well urging passage of a Defense bill which cut $18 billion from the President's request.

But here I am doing just that. I firmly believe this bill represents the best to be done this year.

We started out last February with a budget request of more than $249 billion. By the time we got a budget resolution, our target was lowered to $239 billion and the bill before you is $231 billion.

In February we started out with an outlay figure of $209 billion; in the budget resolution it went to $201 billion; and in this bill it is about $200 billion.

I must say at this point that the budget resolution figure did not do us any favors. The ratio of budget cuts to outlay cuts was so out of sync that it was impossible for us to reach both targets without doing violence to one of them.

I would plead with my friends on the Budget Committee to be more realistic in their calculations next year. I would ask them to keep in mind that Defense does not spend out at 80 percent the first year and that this year's target of $10 billion in budget authority cuts to $8 billion in outlay cuts simply could not be done.

The only accounts that spend out at that rate or greater are personnel and retirement at 99 percent and operations and maintenance at about 81 percent. All the others spend out at a lesser rate—general procurement at about 14 percent, shipbuilding at about 4 percent, and research and development at about 56 percent.

In order to reach $8 billion in outlay cuts for fiscal year 1983 we had to take, not $10 billion from budget authority, but $18 billion. And that means that we have already reduced 1984 outlays by $7.5 billion and 1985 outlays by $7 billion by virtue of this year's action. So we have built in credits for next year.

With this handicap, with the pressures of the deficit, and with no clear guidance from Congress until the end of June, we went to work on the 1983 bill, the product of which is before you today.

I want to compliment my chairman for bringing the subcommittee back here in mid-November, 2 weeks before Congress reconvened, to complete markup in order to have a bill ready for action this week. I have great respect for the subcommittee, for its dedication to the task and I want to thank the subcommittee staff for its hard work under rather trying circumstances.

Now it is essential that we act on this bill quickly; get it to the Senate and on to the President before we quit for the year. It is irresponsible, counterproductive and extremely wasteful, I believe, to have the Defense Department operating under a continuing resolution any longer.

Having said all that, I want to move on to a brief discussion of this bill, what is in it, and not in it, and a little of what approach we took in arriving at where we are.

In the personnel area, we cap pay raises at 4 percent and instruct the services to absorb one quarter of that. But we include pay in the bill rather than wait for a spring supplemental, which, incidentally, we did not get around to this year until September 10.

Asking the services to absorb a part of the pay raise without funding the remainder up front is to invite management chaos and waste. It is bad enough to have Defense rob various accounts for 11 months of the fiscal year in order to pay the agreed-upon military and civilian pay rates, but asking them to absorb a part of the raise when the year is just about over is simply bad management and we have avoided that by including pay increases in this bill.

The manpower levels are about 20,000 below those originally requested but are in line with adjustments made by the Department last May.

Considering the pay cap and absorption, manpower cuts and some other miscellaneous cuts, we have only provided for 1.2 percent real growth in personnel accounts. That is not enough, but in order to reach our budget resolution guidelines, it is the best we could do.

In retired pay, some recalculations this past summer reduced requirements by $375 million.

In the operations and maintenance account, I have some concern we have cut too deeply. We have allowed only 1.7 percent in real growth. We cut the President's request by more than 5 percent. This is the nuts and bolts of readiness. O&M is where ships and planes and tanks are repaired, where training is funded, and where fuel for flying and steaming hours is funded. Our basing structure is operated from O&M and repair parts are purchased.

But the fact is, we had to cut O&M and cut it deeply in order to attain those outlay cuts we were reaching for.

It is my hope that this is a 1-year phenomenon and that next year, providing our budget resolution targets are realistic, we can return once again to the policy of funding O&M at a prudent and manageable level in order to keep operational those systems we have in the field and to train those who use them.

We have tried to impose O&M cuts so as to impact as little as possible on readiness, but experience tells us we are not always successful in this critical area.

Procurement was cut almost 10 percent by the committee. The Pershing missile was zeroed pending a more successful testing program. The F-18 was reduced due to contract savings and we took steps to make certain no funding for the attack version is spent on procurement until we know more about its value as an attack aircraft. We denied funds for the mine countermeasures ship program, for the fleet oiler, and reduced funding for other ships. We funded the two nuclear carriers at the authorized level, and I am sure we will hear more about that as debate continues.

We funded the Army's modernization program for tanks, fighting vehicles and aircraft in order to enhance our conventional capabilities. We denied some questionable vehicle programs in the Army which fell out on our priority listings.

In the Air Force, we funded both the B-1 and MX at authorized levels, and those issues, too, will be heard from later.

Research and development funds were cut over 9 percent from the request with reductions spread across many programs. Major system R&D was funded as authorized.

In all, we have given the President about 6 percent real growth in this Defense budget authority, a far cry from the February request of 13 percent real growth.

Despite what I consider to be massive cuts in this bill, I still say to you it is a reasonably good bill, and I ask you to support it as presented.

Let me just sum up, Mr. Chairman, by reiterating a couple of points.

We will hear this afternoon and tomorrow that the defense budget was too high, that vis-a-vis domestic spending we are spending too much on defense and there will be efforts made to cut further in this bill.

We have reduced from 13 percent real growth down to about 6 percent real growth what the President asked for. We have reduced some $18 billion from the President's budget authority request and we have reduced over $8 billion in outlays for fiscal 1983 beyond what the President requested us to do.

So we have not been a spendthrift subcommittee. We do not come to you with a bill that is bloated out of proportion.

We do come to you with a bill I think which represents the reasonable efforts of members of this subcommittee to make cuts where proper and to try to leave programs in where they were needed. I believe in that sense we have succeeded and that we should not be embarrassed by the bill that we present or the totals that are involved or the programs that are in this bill for funding.

● Mr. McDADE. Mr. Chairman, I rise in support of H.R. 7355 making appropriations for the Department of Defense and to urge its approval by the full House.

This bill is very much a compromise bill. It is the product of an extraordinary week of work when the members of our subcommittee came back before this session to write it. We did so because we all believed it is in our national interest to pass a defense bill before adjourning this Congress. To do otherwise would have given the congressional seal of approval to waste, uncertainty, and confusion about our defense commitments. In a perfect environment we need to weigh those commitments against our real defense needs not against the nondefense items in the budget. However, the pressure to rebuild our Nation's defense is matched by our need to build a strong economy. We met at a time when the defense spending consensus seems to be evaporating under the clouds of economic uncertainty that grip our Nation. So we had to weigh budget decisions on defense in concert with our overall budget dilemma.

The result is that we have brought a bill that is $18 billion in budget authority below the original budget request of $249 billion. The bill before you today contains $231 billion in budget authority. These $18 billion in BA cuts amount to $8 billion in outlay cuts. These are painful reductions in many places. We have minimal growth in the personnel accounts. We have made a 5-percent cut in O&M, the heart of our readiness effort. These reductions will translate into fewer repairs, fewer steaming hours, less training, less spare parts, and other less visible but real obligations of national defense.

While we reduce procurement by 10 percent we still managed to fund most of the Army's modernization needs. We funded the construction of two new carriers and kept the Navy shipbuilding program growing apace. We also continued to fund the accelerated

aircraft and missile programs of the Air Force.

The committee wrestled long and hard with the elements of the strategic program and it has kept it intact. We have included full funding for the modernization of our strategic forces. I heartily concur with the committee's decision to withhold funding on the Pershing II missile system until the committee is satisfied that it has been tested successfully and is mission capable.

Mr. Chairman, there is about 6 percent real growth in this bill. I hope we will not reduce that growth any further. I will vote to reduce funding for the MX procurement as I did in subcommittee and full committee, not because I want to kill the program but because I believe we need the opportunity to review the basing mode and we need the opportunity to further develop and test this missile prior to going full speed ahead in procurement.

Mr. Chairman, this is a good bill. It may be the best we can get at this time. But it is critical that we get a bill now before we adjourn if our Nation is to have the planning and the program capability it needs to defend our people. I urge its support.●

Mr. ADDABBO. Mr. Chairman, I yield 3 minutes to the gentleman from Connecticut (Mr. RATCHFORD).

Mr. RATCHFORD. Mr. Chairman, I rise in support of the amendment offered by the gentleman from New York (Mr. ADDABBO). The time has come to stop second guessing the Soviets. The time has come to cease all posturing about what impact the outcome of this debate will have on the ongoing START talks in Geneva. Yes, Mr. Chariman, the time has come to assess the MX and the proposed Dense Pack basing mode on their own merits.

What impact will deployment of the MX have on the existing strategic balance? Can we afford a potential cost of $54 billion for the MX program at a time when budget deficits are approaching the $200 billion mark? And if deployed in the Dense Pack scheme, is the MX defensible? These are the questions that must be addressed in this debate.

As has been stated by a wide range of military experts in recents weeks, deployment of the MX system would prove most destabilizing to the existing strategic balance between the United States and the Soviet Union. This Nation has continually maintained that it would not pursue development of a first-strike capability, yet this is just what the MX would provide. With the high explosive yield and the extreme accuracy of the warheads mounted on each MX missile, it would be a potent first-strike threat to the land-based nuclear deterrent of the Soviets. In recognition of this prospect, the Soviets have already pledged immediate development of a similar weapon that will "in no way be inferior." I ask whether this kind of response can really be expected to enhance U.S. security?

Even if we were to assume that any Soviet response at this time is sheer rhetoric, there has been little disagreement with the claim of scientific panels assembled by Defense Secretary Weinberger that the Soviets could readily develop a system to effectively counter the proposed Dense Pack basing mode in the 1987 to 1990 period. At best, the MX system we contemplate here today would not become operational until 1986. Can we ask the American people to support further development and production of a system that will become obsolete shortly after deployment?

And what of the impact that a congressional go-ahead for the MX system would have on existing arms control agreements? Paul Warnke, our former chief SALT negotiator has said, "If Russia did what we now propose to do, we would clearly think of it as a violation of the strategic arms limitation talks agreements that prohibit new fixed missile launchers." Aside from abrogating our commitments under the SALT treaties, deployment of the MX would undercut the ABM Treaty as well—the most important and stabilizing arms control agreement to date.

As for the so-called bargaining chip argument, this is hardly sufficient grounds for supporting such a massive expenditure of funds for a system of questionable merit. In fact, it would seem that despite its own rhetoric, the administration has no intention of abandoning the MX at the negotiating table in Geneva. It seems to me that a far more prudent negotiating posture would be to not provide funds for procurement of the MX at this time as our negotiators explore the possibility of some tradeoff in the Soviet arsenal. Full production and deployment at all costs hardly constitutes a "bargaining chip" approach to negotiations.

Finally, and perhaps most significantly, the MX price tag is intolerable in light of record-high Federal budget deficits and the vast number of questions that remain at to the system's vulnerability and effectiveness. To deal with expected silo vulnerability, most military experts and scientists agree that it would be necessary to deploy an extensive ABM system, adding further to the excessive costs of the system. Examining estimates prepared by both the Air Force and the Union of Concerned Scientists, the full cost of the 100-missile Dense Pack system, warheads, and the ABM system will approach $54 billion by completion. Just the $4.5 billion that has already been spent on research and development for the MX far exceeds the entire operating budget of $3.1 billion for the State of Connecticut this year.

Yes, Mr. Chairman, far too many questions remain and the projected cost of the system cannot be justified by the "bargainning chip" argument alone. If this fall's elections told us anything, it is that the vast majority of Americans while favoring the achievement of a strong national defense, do want to see some restraint in military spending and do not want to jeopardize existing and future arms control agreements. I urge my colleagues to support the Addabbo amendment, if only to allow sufficient time for a full airing of the merits of the Dense Pack system and to explore other basing options or enhancement of our sea and air strategic capabilities.

□ 1415

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 5 minutes to the gentleman from New York (Mr. GREEN).

Mr. GREEN. Mr. Chairman, the defense appropriation bill before us starts us down a most dangerous path, dangerous to both the economic well-being and the future defense of our country.

It is dangerous to our economic well-being because it guarantees future large deficits, which threaten renewed double digit inflation and 20 percent plus interest rates.

It is dangerous to our defense because its uncritical funding of virtually every weapons system that any bureaucracy in the Pentagon ever imagined makes an unsustainable call on future resources for procurement and research and development. This in turn inevitably means future procurement stretchouts and resultant cost overruns, and stinting on readiness, our invariable responses in the past to pressures in defense budgeting.

Indeed, the ranking minority member of the defense appropriations subcommittee acknowledged before the full Appropriations Committee that the subcommittee had reluctantly been forced to reduce budget authority for readiness—the operations and maintenance function—by more than $3 billion in order to sustain the procurement and research and development levels called for by this bill. So even in fiscal year 1983 we shall be paying the price of a serious reduction in our conventional defense capabilities if we start down the path charted in this bill.

The danger of this bill is that, despite its unprecedented size, it makes still larger claims on our future resources. That is because many of the major procurements to which it commits us call for very small outlays in fiscal year 1983 but very large outlays in future years. Using the defense

function figures established by the first budget resolution, defense outlays will take a dramatic upturn in the coming years. The total outlays called for by the budget resolution in fiscal year 1983 are $212.8 billion, in fiscal year 1984, $242.1 billion, and in fiscal year 1985, $277.7 billion.

The reasons for those large increases in outlays are not hard to find. Let us look at just three of the bill's programs and their effects on outlays:

[Dollars in millions]

	Fiscal year—			
	1983	1984	1985	1986
MX Missile	$1,953	$3,916	$4,943	$4,115
B-1 Bomber	859	3,079	5,507	6,965
Nuclear aircraft carriers	165	790.2	1,237	1,239

In short, this bill commits us to numerous programs where this fiscal year we simply pay the penny ante, but in future years we must bet high stakes indeed.

Outlays, of course, are the stuff of which deficits are made. And the increases in defense outlays implicit in just this bill—$48.8 billion for fiscal year 1984 and another $23.8 billion for fiscal year 1985—are a major contributor to the excessive deficits that are predicted for those years even if the economy recovers smartly by then.

Those deficits in turn threaten a return to the high inflation, high interest rate economy from which we have paid each a high price to escape.

I recognize that the administration and some on my side of the aisle are talking of solving the problem with further cuts in the order of $30 billion a year in domestic spending above and beyond those made in 1981. And some on the other side of the aisle are talking of solving the problem with further masssive tax increases above and beyond those we made in 1982. But, looking realistically at where the 1982 election has left us, is either of those results probable? Plainly, the answer to that question is no.

So, if you support this bill as it now stands, you are inevitably telling your constituents that you are ready to return to double digit inflation and 20 percent plus interest rates.

As I have already indicated, I believe this bill is bad defense policy because its injudicious funding will inevitably lead to shortchanging readiness. Since this problem arises in its most acute form in the area of strategic nuclear weaponry, let me focus my attention there, though I feel that there are other important questionable procurement decisions in this bill, such as the F-18 and the two nuclear-powered aircraft carriers.

At the outset of this discussion, let me state that I strongly endorse the concept of having a redundancy of means to respond to a Soviet nuclear first strike, so that if they should achieve a technological breakthrough in one area, we still would have a credible deterrent. Indeed, the concept of three means of response strikes me as about right, though I see no reason why one has to be on land, one in the air, and one in or on the water other than to placate the Pentagon bureaucracies involved.

What in fact does this bill do in terms of strategic nuclear weaponry? It provides funds to: First, procuring the MX; second, upgrading our B-52's; third, producing the B-1's; fourth, developing the Stealth bombers; fifth, deploying air launched cruise missiles; sixth, completing development of sea launched cruise missiles; seventh, developing the next generation of cruise missiles, presumably embodying Stealth technology, which some press reports have indicated will be ready for procurement next spring; and eighth, continuing procurement of the Trident-class submarine and developing their D-5 missiles. One does not have to be a mathematical genius to know that that adds up to more than three.

The sad fact is that the administration and the Pentagon have simply failed in their responsibility to make some choices among this plethora of systems. Unless we now make the choices—and I for one believe the MX and the B-1 can be dropped with little loss in second strike capability—what are the consequences?

We all know. We have been down that road before. When the budget crunch hits, we will stretch out the procurements and we will cut operations and maintenance.

Stretched out procurements in turn mean cost overruns and an inadequate number of each weapon procured.

Reductions in operations and maintenance mean a deterioration in our ability to project conventional military force effectively. Pay and allowances are allowed to slip behind civilian standards, we lose trained technicians, and ships literally are unable to put to sea for lack of adequate personnel. Training is curtailed. Supplies of spare parts and ammunition shrink. Equipment procured at great cost is cannibalized to keep other units going. Dependents overseas are housed in disgraceful quarters. None of these are hypothetical events. They have all happened recently, and some are happening right now.

In short, in order to buy both a belt and suspenders in terms of nuclear weaponry, we risk being caught with our pants down if we have to engage in conventional combat.

You do not have to let that happen. You can make choices, you can reject weapons systems that are duplicative or ineffective.

Finally, if the amendments relating to individual weapons systems do not succeed in turning this bill around, I intend to offer an amendment to the general provisions that will reduce nonreadiness related procurement and R&D and divide the savings between improved readiness and a reduction of further deficits.

This bill, as it now stands, is disastrous for our economy and disastrous for our defense. I plead with you to set it right.

Mr. ADDABBO. Mr. Chairman, I yield 4 minutes to the gentleman from Connecticut (Mr. MOFFETT).

Mr. MOFFETT. Mr. Chairman, I would like to thank the distinguished chairman of the subcommittee not just for yielding me this time but for his work on this particular bill and the questioning of the military budget that he has done.

Some of us in this body have made a decision some time ago to move on and will not be part of the New Congress. I would like to convey some impressions that relate to the subject at hand. One is the impression, from the last 8 years, that this place is filled with more people who are decent people on both sides of the aisle than you find in most groups and institutions. It is filled with more people who want to do the right thing than you find in most groups and institutions. And yet it is also true that this great body is also a place that manifests and reflects the kind of intense and often extreme paranoia and insecurity that is a contributor to our involvement in what is, in my view, a very damaging arms race. We have allowed ourselves to fall victim to this kind of insecurity and paranoia; and at some point, in my view, we have to deal with it and confront this very real and damaging phenomenon, this very damaging inferiority complex that plagues us as people here and that certainly plagues the leadership in the Soviet Union and in other countries. It has something to do, I am afraid, with macho, and the more discussions that we have about it in this place—and men particularly are not inclined to have those discussions; they feel somewhat uncomfortable with them—the better off we are going to be in defense policy.

To defeat this particular weapon which will be most at issue here—the MX—will not be a defeat for the President or for the military or for those people in this body who have wanted it. It could be an important and a wondeful victory not for the Soviets but for all people on the Earth who feel a pressing need for world peace.

We must take some risks to achieve peace and to get us on the track toward peace. What greater risk could we be taking than the one we are taking now, with the casino-like, roulette-like approach to arms that both sides in the arms race are taking? I think if we keep trying to add one

more major weapon before we get serious about negotiations, we are playing, in fact, a dangerous kind of game of roulette, and there are some people, unfortunately, who do not want to have serious negotiations at all—again, on both sides.

I intend to work on the outside for these goals. I hope there is a growing number of people, particularly those who will be coming into this body, who intend to work and join those on the inside who have been working toward those goals, and my hope and prayer is that the people who have been asking questions about weapons systems like this will be joined not only by new Members on both sides of the aisle but by some of you who have not been as prone to ask these questions about the direction in which we are headed.

Mr. EDWARDS of California. Mr. Chairman, I take great pride in yielding as much time as he may need to the very able gentleman from Virginia (Mr. ROBINSON), a stalwart on the subcommittee and a man with whom I have had the pleasure of working with for many years.

Mr. ROBINSON. Mr. Chairman, I thank the ranking minority Member for those very flattering comments, and additionally I want to address my chairman, the gentleman from New York, and the staff of our Defense Subcommittee. I want to again express my appreciation for the unfailing courtesy and consideration with which I have always been treated and with which he always treats the minority, as a matter of fact. It is a pleasure to work with him. We do not agree all the time, by any means; but nevertheless we find an agreeable climate in our subcommittee when the time comes to consider those things that are of greatest significance to this great country of ours.

I am not going to impose myself on my colleagues very long this afternoon, and I will tell you why: All you have to do is glance around this floor and see how many people we have here to determine whether or not people have already made up their minds with regard to the significant items that are in this bill.

Now, this is the moment of truth, as far as this subcommittee is concerned. It is always the moment of truth when an appropriations subcommittee brings its bill to the floor. It is what we have been working for, for the whole year. And here we are, today, and we have a mere handful of people on the floor, which, as I say, demonstrates to me that the majority of the membership has already made up its mind with regard to what they are going to do as to the critical votes that are going to be cast this afternoon and perhaps tomorrow.

But I want to once again commend my friend, our chairman, the gentleman from New York, because we are here; we have a bill on the floor, a defense bill for fiscal year 1983. The chairman does not agree with a good many of the things that are in the bill. It would have been very easy for him to keep this bill off the floor at the present time, in this remaining session of this Congress, and take it up again next year in a time when the climate would have been more conducive, perhaps, to getting the items excluded that he cares to not favor with regard to this bill. But we are here, and it is a credit to the gentleman from New York that we are here because it is his determination to make that the bill comes up or does not.

Now, I think we have a good bill. The gentleman from Alabama has explained to you the extent to which cust have already been made, deep cuts, significant cuts, that are going to impact in a variety of areas. But the things that remain in this bill, I say to you are critical for our national defense. They are absolutely essential if we are going to provide the attitude that is necessary in international circles to prove that we mean business and that we are going to show that deterrent that is so necessary if we are going to bring the Soviets to the bargaining table.

And I want to assure you, my colleagues, that it is not in any extent, in the words of one of my colleagues who has preceded me here, a bill that is intended to placate Pentagon bureaucracies involved.

This is a bill that is brought up after a year's work on the part of this Defense Subcommittee, with the idea in mind of providing for the most important, the most significant areas for the defense of this country of ours, and I suggest to you that you give it your best attention because the safety and freedom of our country is involved.

Mr. ADDABBO. Mr. Chairman, I yield 5 minutes to the gentleman from Tennessee (Mr. GORE).

Mr. GORE. Mr. Chairman, I would like to compliment the members of the subcommittee and the full committee on both sides of the aisle for all of the hard work they have done on this bill. I have always supported the bills produced by this subcommittee. I wish to speak briefly on this occasion about a controversy which will receive a good deal more attention later this afternoon when the amendments introduced by the distinguished chairman of the subcommittee relating to the MX missile are introduced.

I want to oppose the Addabbo amendment to delete the research and development funds and testing funds for the MX missile, but I would like to support the Addabbo amendment to delete the production money for the MX missile so long as the administration continues its plans to deploy it in the Dense Pack deployment mode, and so long as the rationale supporting Dense Pack is as unclear and fuzzy as it presently is.

□ 1430

In my judgment, the latter amendment offered by the subcommittee chairman is going to carry this House today. And I think it would be unfortunate if the victory for that amendment was misinterpreted by anyone, because the Members of this House want to see a strong defense for this country and will insist upon one.

But counterforce weapons have been surrounded by misinterpretation, confusion, and fear since they were first created. Indeed, today as we meet here, the President has just warned that we will be imposing upon our country the risk of another Pearl Harbor if we do not approve Dense Pack.

We are meeting here the day after the Soviet Union's Defense Minister in a crude move, obviously intended to affect us, claimed that Dense Pack violates SALT arrangements still being honored by both countries, and that they will in any event match the MX.

I would say to my colleagues that we were not sent here to be pushed around by scare tactics, regardless of the source. Where strategic weapons are concerned, we are not defenseless today. The fact is this country is extremely strong. And the President does our country no service by constantly denigrating the quality of what we have now and what we are in the process of acquiring.

As for Minister Ustinov, he should be reminded that the dictum that "that which is not explicitly prohibited by treaty is permitted" is one which the Soviets have repeatedly exercised.

As for matching the MX, one can only say the world would be better off if the Soviet Union had done only that rather than deploying the far larger missiles that comprise the backbone of its strategic forces today.

The issue, Mr. Chairman, is whether the country is in such peril at this moment that we ought to proceed with the MX and the Dense Pack deployment mode and ignore the many uncertainties that continue to surround this deployment mode. I believe that there is no such peril so imminent as to require the rush to Dense Pack that is proposed.

So before we vote for MX deployment, we need to have considered carefully the technical merits and feasibility of the Dense Pack system, and we have not yet done so.

We need to consider the ultimate cost of maintaining MX if in order to secure it we have to build a ballistic missile defense system, and we have made no such consideration. We need to consider the effect of deploying a hard target killer like the MX on strategic stability and on the progress of

negotiations in Geneva. We need to consider the availability and merits of other alternative solutions to the problem. And we need to consider very carefully the opinions expressed by technical and military experts and indeed by many of our colleagues who are experts on this subject, some of whom will oppose the amendment, but who will privately say, "Now, this thing is not proven, it has not been worked out, and I have great reservations about it."

The Members all know that that is what we hear from so many of our colleagues. And we have not got the answers to those questions, so let us keep the research and development funds, let us keep the testing funds, let us keep the program. But let us stop this Dense Pack deployment mode by supporting the Addabbo amendment.

The CHAIRMAN. The Chair will make the observation that the gentleman from New York (Mr. ADDABBO) has 33 minutes remaining, and the gentleman from Alabama (Mr. EDWARDS) has 39 minutes remaining.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 6 minutes to the able gentleman from Florida (Mr. YOUNG), a member of our subcommittee, and one of the hard workers on our subcommittee.

Mr. YOUNG of Florida. Mr. Chairman, I thank the gentleman for yielding this time to me. I would like to call attention to our colleagues that it was just 41 years ago today that American forces were attacked at Pearl Harbor by a nation whose leaders were convinced that we had allowed our defenses to be degraded to the point that they could attack and attack successfully and eliminate us as a threat.

The world has seen us as a nation do the same thing in a recent decade. They have seen us allow our defenses to become degraded further, they have seen us watch while other nations advanced the buildup of their military machines, and they are wondering what might be in store for the future of freedom and the future of the United States as the guardian of freedom throughout the world.

I remember as a very young boy on that day in 1941 feeling very sad, very depressed, but believing that because I was an American everything was going to be OK. I knew that somebody somewhere was going to have taken care of everything and that my Nation was going to prevail, that we were going to be strong, that we were going to win out. And of course we did.

As I grew, and as other people my age grew, we just knew that because we were Americans we would always be in pretty good shape when it came to international confrontations.

Well, as I got older, got involved in the political process, came to Congress, all of a sudden I became acutely aware that the people that those kids back home believe are going to be able to pull something out of a magic hat, or those people who are going to take care of things for us should we ever need them, all of a sudden I realized that was us. Because as I read in the Constitution of the United States, I saw where the Congress of the United States was given the responsibility to provide for the common defense.

The Congress of the United States was given the responsibility to raise and pay for the armies, to raise and pay for the navies. That is what we are doing today. we are paying for the armies and the navies and the Air Force and the Marine Corps and all the associated and affiliate agencies that go along with providing for the Nation's defense.

Now, there are going to be some very legitimate differences of opinion today as to how we best meet this constitutional responsibility. There has been a lot of conversation about the MX. And I am satisfied that before the day is over, we will be so tired of hearing about MX and Dense Pack and closely spaced basing that we will wish we were back on the 5-cent-a-gallon gasoline increase from yesterday.

I would like to say something about missiles generally, if I might. If any one of my colleagues would go to a meeting of a civics class in a high school or to a service club or any kind of a group of Americans and discuss missiles, the Soviet Union versus the United States, and ask the question, and I have done this quite often, I have asked the question of my audiences, hypothetically: If the Soviet Union were to launch 1,000 ICBM's at the United States, how many of these 1,000 ICBM's could we stop before they got here?

And a lot of people will say, "Oh, 90 percent, 80 percent, 60 percent." And every once in a while someone comes up with the right answer—zero, none, because we do not have an antiballistic missile system. The Soviets do of course. But we do not.

Now, that creates a tremendous imbalance in my opinion that has long been ignored in this whole debate about intercontinental ballistic missiles.

The fact is if we were to ever fire a missile toward the Soviet Union, we are not exactly sure how many of them might get there, because the Soviets do have an antiballistic system.

On the other hand, should the Soviets launch at us, we have no ABM. So it is not questionable whether or not we would have a defense, because we do not.

Now, when you add that to the equation, you recognize that the parity that everyone talks about that we have now, or the near parity really is not a true and actual equation, because if we cannot get ours there but they can get theirs here, that makes for quite an imbalance in that strategic capability. And I think as we get into the conversation about intercontinental ballistic missiles and our ability to have a deterrent weapon, a weapon to convince the Soviets that it is not in their best interests to launch an attack against the United States or our interests, that we must take into account that lack of ability that we have to defend against their incoming missiles.

We will be talking about these issues for a long time today and probably as well tomorrow. We will get into more specifics.

Mr. Chairman, I want to say again as we do this, I recognize all of our colleagues have very legitimate concerns and different ideas and convictions as to how best we meet our constitutional responsibilities. On our subcommittee, I would like to say that I have a tremendous respect for the chairman of the subcommittee and for the ranking minority member of the subcommittee, and all of the members, although we may differ on occasion. Many long hours and long days are put into the business of this subcommittee, and the development of a defense appropriations bill that we feel that we can bring to this House and ask to be approved so that it does provide for the common defense so those people back home in our districts can feel safe, can believe that someone, somewhere is looking after their future security interests.

Mr. ADDABBO. Mr. Chairman, I yield 3 minutes to the gentleman from Oregon (Mr. AuCOIN).

Mr. AuCOIN. Mr. Chairman, there will be a number of ways of looking at the missile system the MX, when it comes up for a vote. I would hope that, first, my colleagues will remember the fundamental question of cost. We are, after all, dealing with what may be a $200 billion deficit this year.

Fiscal responsibility cannot be turned on and turned off like a faucet; turned on when it comes to the military and turned off when it comes to programs for the people of this country.

If my colleagues believe in fiscal responsibility, they have got to be consistent. They have got to look at questions like the MX and be just as fiscally responsible there. It is a bad program from that standpoint, a waste of money from that standpoint, and ought to be defeated on those grounds.

One of the other things that disturbs me when the Congress gets involved in these military debates is the "double speak" that we engage in. It is happening again on the MX question. It is Orwellian rhetoric: "war is peace," "the arms race is arms control." And now, the President has renamed the MX "Peacekeeper."

Mr. Speaker, if this weapon is a "Peacekeeper," then napalm is "funny foam" and the pentagon is "Fort Friendly."

It is not a peacekeeping move to fund the MX at a time like this. This is a destabilizing weapon. It is going to be one that will forego an opportunity for serious arms control. It probably will require the abrogation of the ABM treaty which is a highly successful treaty with the Soviet Union in which almost all experts recognize that there has been adherence, adherence by both sides.

I would hope my colleagues would think about that. I hope in all sincerity my colleagues would think about the grim and grave consequences of abrogating that treaty.

Finally, Mr. Speaker, a couple of Members have suggested today is the anniversary of Pearl Harbor. I think it is worth remembering that. Think back 41 years to what some military geniuses did at Pearl Harbor. They decided that the one way to make sure the planes would be safe is to cluster them on the runway at Pearl Harbor. And they got blown to smithereens.

That was the original Dense Pack. Today we have the new Dense Pack.

For sure, we should "Remember Pearl Harbor." And that is why the MX and Dense Pack must be defeated.

Mr. EDWARDS of Alabama. Mr. Chairman I yield 4 minutes to the gentleman from Ohio (Mr. REGULA).

Mr. REGULA. Mr. Chairman, I think that we need to be careful that we understand that there are several MX issues here.

First, do we want to abandon the system totally? And that was not implied in the chairman's amendments. Second, do we want to stop procurement of the MX? That was amendment No. 1 by the chairman. Third, do we want to stop research and development on the Dense Pack basing for the MX? Fourth, should U.S. defense policy continue to maintain the triad concept?

Had the chairman's amendments prevailed, we would have eliminated procurement, we would have eliminated RDT&E for the Dense Pack, and a portion of the research on the MX. However, the research account would still have contained $1.1 billion for research for the missile itself.

Mr. DICKS. Mr. Chairman, will the gentleman yield?

Mr. REGULA. I yield to the gentleman from Washington.

Mr. DICKS. I thank the gentleman for yielding.

I think the gentleman is almost correct. The chairman's second amendment as I recall, would reduce the amount for RDT&E on the basing mode, but it would not eliminate the money.

Mr. REGULA. It comes close to eliminating it.

Mr. DICKS. You would still have RDT&E money for both the basing mode and the missile.

Mr. REGULA. It was not clear in the amendment.

I think the gentleman makes a point that the amendment was not clear exactly what it did, and hopefully in the debate this afternoon on the amendments it will be very clear as to what is happening.

But I think the important point is that the chairman's committee amendments were not a complete abandonment of the MX.

□ 1445

It is abandonment temporarily of the basing R&D, most of it, and abandonment of procurement. In any event, I share Chairman ADDABBO's concerns with these issues too.

I offered two amendments which were accepted by the chairman and the ranking member in the committee. I just want to briefly mention those.

No. 1, all money for procurement and part of the money for research and development would have been fenced until March 15. I chose the March 15 date because it allows the new Congress sufficient time to address this issue. The original bill provided 30 legislative days or RDT&E on fencing and I do not think that is enough.

Second, my amendment requires the Secretary of Defense on or before March 1 to give us a timetable as to when the procurement, if it continues, will synchronize with the basing.

I think we should avoid temporary storage of missiles. We should not be procuring missiles unless we have completed action on the basing and that is a problem that the Congress will have to address.

The President has made his recommendation. As policymakers, it is our responsibility to respond. I do not want to see missiles procured that do not have a permanent home. As the ranking member on the Military Construction Appropriations Committee, I put together a schedule based on the latest projections of the Air Force. According to my schedule, the procurement would result in missiles being delivered anywhere from 6 to 24 months before the basing mode was completed.

I think it is important that we have the Secretary advise us by letter on or before March 1 as to exactly how this timetable would dovetail to avoid any procurement obligations without the basing being completed.

It is important as we go forward in this debate that we explore all these issues.

Mr. ADDABBO. Mr. Chairman, I yield 4 minutes to the gentleman from Minnesota (Mr. VENTO).

Mr. VENTO. Mr. Chairman, I believe the committee, that is, the Appropriation Subcommittee on Defense, especially the chairman, is to be congratulated on their attempt to reconcile our national security needs with the harsh realities of soaring deficits. In a real sense, they had an impossible job since they were working from budget requests, and an authorization which was based on the administration's rosy budget predictions of last spring.

With the reality of a $185 billion deficit facing them and us, the committee sought to check the obscene Pentagon rush to the cookie jar by inhibiting overhasty procurement of systems of unproven or doubtful utility and capability. In some cases, such as the Pershing II, the committee eliminated procurement funding. In other cases, such as the F/A-18, the committee provided language which seeks to prevent the Navy from buying an aircraft of no value. Unfortunately, in my judgment, the committee was not totally successful in either mode of action. In the denial of procurement moneys, we are still saddled with the preposterous scheme for the MX—something which I expect the full House to have something to say about. In the case of the F/A-18, the language is such that the Navy could well evade the restrictions.

Mr. ADDABBO. Will the gentleman yield?

Mr. VENTO. I would be happy to yield to the distinguished chairman.

Mr. ADDABBO. If the gentleman believes the bill language to be insufficiently precise, I will try to clarify our meaning and legislative intent.

Mr. VENTO. Mr. Chairman, I appreciate that. In the F/A-18 attack provisions, page 19, lines 17-24, I am concerned about the meaning of "scheduled" (line 20) where there appears to be nothing to prevent the Navy from reassigning an aircraft after it is built; that is, from a fighter schedule to an attack schedule. Second, because of the miasma which exists with respect to F/A-18 performance, I am concerned about what is meant by "the originally established attack mission requirements, goals, and specifications." (lines 23-24).

Mr. ADDABBO. I believe we can satisfy the gentleman's concerns. As far as the word "scheduled" is concerned, absent a certification as specified in lines 22-24, any contracts for the relevant aircraft must be accompanied by a statement to the Appropriations Committees as to the planned service use of the aircraft. Any change in such use toward re-equipment of Navy attack mission squadrons would be a reprograming which would require consent of the committees.

The "originally established attack mission requirements, goals and specifications" refer to all those (including thresholds) which were established in

the original development concept paper (DCP 141) of December 1975, as well as those first established in subsequent documents. The subcommittee would welcome the testimony of Mr. Myers, who at that time was the Director of Tactical Air Warfare. Each year the committee sets aside several days to hear public witnesses. Also, the surveys and investigations staff will be called upon to verify that the data on which the written certification was based and whether that data was obtained in operationally realistic conditions. I assure the gentleman that we do not approve of the downgrading of naval performance requirements in the face of an increasing Soviet capability.

Mr. VENTO. I thank the chairman for his statement. I trust that the Navy will pay attention to his words.

Mr. ADDABBO. I intend to make sure that they do.

Mr. VENTO. Again, I thank the chairman. Both he and I agree that the security of our country depends heavily on the Navy. On the grounds of the State capitol in St. Paul, the area I represent, is a memorial, the gun from U.S.S. *Ward* which 41 years ago today fired the first shot against the Japanese at Pearl Harbor. It was manned by reservists from the city which I now represent. We, in Congress, have a problem. We hear about defense needs from senior officers whose careers are at stake. On the other hand, our responsibilities are to those junior ranks and junior officers who have nothing to lose but their lives. I ask my colleagues to remember the gun crew of the *Ward* and to consider their responsibilities when voting on this bill.

Mr. ROBINSON. Mr. Chairman, I yield 3 minutes to the gentleman from California (Mr. DORNAN).

Mr. DORNAN of California. Mr. Chairman, in this period of general debate, those of us on our side of the aisle who support the "Peacekeeper" missile will try to find the right words to convince those 30 or 40 Republican Members who have not yet made up their minds about this important issue, or who are confused or afraid of the nuclear freeze phenomenon. This debate at this moment is still within the exact timeframe of the Pearl Harbor attack and we will be until a few minutes before 4 o'clock of that precise anniversary. What a day for Members to contemplate weakening our defense strength and our deterrent triad.

There was a very clever comparative reference made to the "Dense Packing" together of our planes on the runways at Pearl Harbor and what juicy targets that presented to the Japanese attacking dive bombers. True; and we went through the same problem 41 years ago tomorrow on December 8, 1941, when 20 or more B-17's and over 75 P-40 fighters were caught on the ground at Clark Field in the Philippines. But what a meaningless comparison. Of course, we were not planning on defending our aircraft. We were caught napping. Sometimes you deploy your forces, other times you pull them together for mutual defensive support. There was the Greek phalanx. There was the Roman turtle formation where men came together and overlapped their shields on the sides of the formation and over their heads to shield against the attacks of archers and the missiles of ancient history—arrows. It was one of the most effective military formations for attack or defense that ancient armies had devised. How about supportive fighter aircraft tactics. How about U-boat wolfpacks, strategic bomber formations over Nazi Germany, battle tank formations? The list goes on and on with examples on mutual "Dense Packing" for military offense or defense. But this is even more logical because it is for deterrent effect.

What we are talking about here today is the problem that we are going to give the Soviet Union military planners in the Kremlin to make them think twice about ever, ever hitting the United States. If I have learned anything in defense studies during my 6 years as a U.S. Congressman—including several trips to the Soviet Union, dozens of factfinding sorties over to the Pentagon, and as many CIA and DIA briefings on Capitol Hill as any Member of this House on either side of the aisle has ever had in a 6-year period—it is the following: and this is the one thing that I would choose to bequeath to my fellow Members as a deeply researched fact as I leave this great legislative House—"The Soviet Union never, never, ever, ever, ever, ever worries about the United States striking them first." Do you hear that? Not ever. They do not war game from fear of attack. They do not plan first strike against them. They do not ever think about it. They do not ever worry about it. I have never had an American admiral or general or any intelligence analyst at any level at the DIA or CIA ever confide to me that they have ever picked up the slightest vibration that the military and KGB leaders in the Soviet Union have ever expressed an attitude other than the following: That our country would never strike them first. Their defense planning is only how to counter what we might do if they were to hit us. This gives the Soviets the amazing advantage of planning only military offense and defense based on their initial offense.

We Americans basically plan one thing and one thing only—defense and offense designed to deter—deterrent, deterrent, deterrent—deterring a war, keeping the peace. That is our only goal.

Let us not get into inane games about this MX missile's new formal name, now that it is no longer an "x" or experimental system. Of course it should be named the Peacekeeper. The B-36 bomber, our principle deterrent when we had overwhelming superiority was called the Peacemaker. A very fitting nickname for a defense system that accomplished its purpose. The B-36 made peace and kept peace and yet never fired a gun from its many turrets or ever dropped a weapon from its bomb bays in anger at any foe. "Peacekeeper" is a fitting name for this MX missile and that is precisely the role it can fulfill unless shortsighted Members of this body foolishly begin the gutting of our triad. Do not simplify the planning of the Soviet Politburo. Defeat the Addabbo amendment and keep our adversaries off balance.

Mr. ADDABBO. Mr. Chairman, I yield 3 minutes to the gentleman from New York (Mr. ZEFERETTI).

Mr. ZEFERETTI. Mr. Chairman, I wish to commend my distinguished colleague from New York, Defense Subcommittee Chairman ADDABBO, and all of my colleagues on the Appropriations Committee, for providing additional funds in the Defense appropriations bill for the Navy to operate the E-2C surveillance aircraft supporting the law enforcement effort to interdict drug traffickers into the south Florida area. The highly sophisticated tracking capabilities of the E-2C have greatly aided the Customs Service and the Coast Guard to identify and interdict drug traffickers and others attempting to cross our borders for illegal purposes. This joint effort not only improves our law enforcement efforts, but also improves our national defense through a tightening of our borders. In fact, the task force operation in south Florida has proven so successful that this effort, including the use of the E-2C's, will continue indefinitely. In addition, the task force concept is being expanded to include 12 task forces throughout the United States. This will require additional resources.

The Navy cannot maintain the two E-2C's committed to the south Florida task force indefinitely. I had requested that your Defense Appropriations Subcommittee, Mr. Chairman, provide lead money in the 1983 defense budget toward the purchase of two E-2C aircraft to undertake the drug trafficking mission and to be part of the Navy's overall E-2C inventory for such other use as the Navy may be called upon to perform. However, the authorization levels for defense spending had already been approved. I would urge my distinguished colleague that his request be included in the defense budget for 1984. We must provide the

resources or we will never win the war against drugs and crime.

I yield to the gentleman from New York.

Mr. ADDABBO. I want to thank my good friend, the chairman of the Select Committee on Narcotics Abuse and Control, for his remarks and his contribution in supporting law enforcement efforts in fighting drug traffickers in the south Florida area and other areas of the country.

With respect to the bill before us, the committee has recommended an increase of 39,392 flying hours. The increase includes an additional 11,117 hours for the E-2C aircraft due to the significant workload increase from drug surveillance and interdiction now performed by the Navy in coastal areas.

Concerning the gentleman's request about the procurement of two E-2C aircraft to undertake the drug trafficking mission and to be a part of the Navy's overall E-2C inventory for fiscal year 1984, I will recommend to the committee that they give serious consideration to this matter provided authorization is made.

Mr. ZEFFRETTI. Again, I want to thank the chairman and the members of the committee. I look forward to working in any possible way that I can to help.

The CHAIRMAN. The Committee will rise informally in order that the House may receive a message.

MESSAGE FROM THE PRESIDENT

The SPEAKER pro tempore (Mr. FOWLER) assumed the chair.

The SPEAKER pro tempore. The Chair will receive a message.

SUNDRY MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Saunders, one of his secretaries.

The SPEAKER pro tempore. The Committee will resume its sitting.

DEPARTMENT OF DEFENSE APPROPRIATION BILL, 1983

The Committee resumed its sitting.

Mr. ROBINSON. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Iowa (Mr. LEACH).

Mr. LEACH of Iowa. Mr. Chairman, the most pernicious notion in modern politics is that the United States somehow faces a "window of vulnerability" with the Soviet Union and that our second strike capacity is grossly inadequate. As Dickens would have said, this is "humbug."

When we have the capacity to destroy the Soviet Union many times over, there is no such notion as inferiority. It is true that the Soviet Union does have certain conventional weapons advantages over U.S. forces and it is true that the Soviets have certain geographic advantages with regard to potential conflicts in some parts of the world; but as far as a second strike capacity is concerned today, the MX missile, however it is based, adds very little to our current overkill capability.

In fact, the greatest strength of the Dense Pack proposal is that it is so awesomely dumb that even Congress should recognize the need to reject it. The Maginot line mentality that drives the efforts to produce an invulnerable land-based system defies both commonsense and the lessons of history.

□ 1500

We need to look no further than how vulnerable the ships in battleship row in Pearl Harbor were 41 years ago today to see the folly of coupling an irresistible, concentrated target with a belief in our adversary's inability to get at it.

Finally, it should not be forgotten that both SALT I and SALT II prohibit the deployment of additional fixed ICBM launchers, and the President sensibly has agreed to comply with the latter treaty despite its incomprehensible lack of ratification.

Now the President advocates the violation of SALT, but there is a gross distinction between advocating and actually violating the provisions of an arms control treaty. No one should underestimate the destabilizing implications that putting irresponsible campaign rhetoric into practice could have at this time. The environment for future arms control negotiations will be changed forever, and there can be little doubt but that it will be irrevocably worsened.

This public works project for the cement industry should be rejected.

Mr. ADDABBO. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. JOHN L. BURTON).

Mr. JOHN L. BURTON. Mr. Speaker, first of all I would like to commend the subcommittee chairman, JOE ADDABBO, for what has been a long and sometimes lonely fight on this committee to bring some sense to the military spending in this country, and I hope that we are on the verge of a victory for the subcommittee chairman and for the people of this country.

To call this weapon, the MX, a peacekeeper, only a person that would think about taxing unemployment insurance would have the imagination to do that.

The only way that we can have peace in this world is to have nuclear disarmament, not to spend billions of American tax dollars on something like the MX missile. Missile experimental is what MX stands for, and certainly that is what it is. They have gone through I do not know how many different kinds of basing modes. I personally like Jimmy Carter's railway track the best because we know that Amtrack and Conrail were in trouble and there is a way they could have utilized some of these tracks around the country and made the trains run on time by putting the missiles on them.

Then, of course, the Soviet Union never would have known where the missiles were because trains never ran on time and nobody ever knew in the Northeast whether the trains would be stopping or not, and the Russians would have been thoroughly confused.

But I will have to join with my friend, the gentleman from Oregon, LES AUCOIN, in talking about Dense Pack. My good friend, the gentleman from Florida, C. W. (BILL) YOUNG, who talked about Pearl Harbor, that was the initial Dense Pack at Hickam Field, and we see what happened when the Japanese attacked us.

Certainly if the Albanians would attack the Dense Pack MX missile, we would have trouble there because they could wipe them out with one blow.

So I would really hope that my friends who believe in fiscal responsibility and are concerned about an ever-growing budget, ever-growing budget deficits, would take a look at the potential $200 billion tab.

The CHAIRMAN. The time of the gentleman from California (Mr. JOHN L. BURTON) has expired.

Mr. ADDABBO. Mr. Chairman, I yield 30 additional seconds to the gentleman from California.

Mr. JOHN L. BURTON. I thank the Speaker and the Chairman of the Committee of the Whole House on the State of the Union for the purpose of considering this bill, and I would like to close by saying that those who are concerned with balanced budgets and those who are concerned with deficits, we can save a potential $200 billion over the next few years without in any way deterring the national defense of this country.

In closing, again I would like to emphasize that the way toward keeping peace is the way to a nuclear arms freeze and not to the MX missile.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield myself 30 seconds.

Mr. Chairman, I want to say that the House is going to greatly miss the gentleman from California (Mr. JOHN L. BURTON). I do not know how we are going to spice up our defense bill in future years, but we appreciate the gentleman's comments and we will miss him around here and we will have to find someone else to take a good look at our defenses in the future.

Mr. ROBINSON. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from Louisiana (Mr. LIVINGSTON).

Mr. LIVINGSTON. Mr. Chairman, as I understand it, this motion to delete funds for the MX was barely defeated in subcommittee. It came up again for reconsideration in the full Committee on Appropriations, and by a very, very close vote, the closest, 26 to 26, it was barely defeated again.

So it is that the MX missile will be included for consideration in this defense bill. I would expect that people on both sides of the aisle feel that it is quite likely that the funds for the MX missile procurement may be deleted in this body. If that is to be, well, we will certainly stand to answer for whatever action we do take in this body later on, I suppose.

Perhaps it is in the best interest of the country to delete the funds, but I worry, because I do not think it is a decision that should be made glibly, nor lightly, nor in an atmosphere of joke or without the utmost consideration as to whether or not it is the right decision.

It seems to me there is one paramount proposition being put forward by those who favor the funding for the MX missile, and that is that the MX missile is to be the land-based replacement for the Minuteman missile, which has always served in recent years as the land-based portion of the triad defense system; that is, if we are to defend ourselves in future years, and if the triad defense system is to work, then the MX missile must take the place of the Minuteman missile and work in conjunction with the bombers, the B-1 bomber and the Trident submarine missiles at sea.

If it is not in place, then the triad may not be able to work, for if the experts, both civilian and military, are correct and the Minuteman missile system is obsolete, that whole leg of the triad system is gone.

I am glad to hear my liberal friends who say that we are going to be saving money by cutting it out. But, as I understand it, we are only going to be saving less than $1 billion, since that is all we are talking about in this bill: $1 billion out of a very, very large defense bill.

I am not an expert in ballistic missiles. I cannot tell you with any degree of certainty that the MX missile is the secret to maintaining our defenses or, at least, the land-based Triad leg; but if it is, and if we truly are tampering with the security of every man, woman and child in this Nation, then to treat this question lightly and in an atmosphere of jokes is doing an injustice to the entire Nation.

I ask all Members, all of the Members of this House, whichever way they vote, to weigh this question in a much more serious vein than has been displayed in recent speeches.

Mr. ADDABBO. Mr. Chairman, I yield myself 30 seconds.

Mr. Chairman, I would tell my friend that there is no need to really worry. We presently have the Minuteman-III, we have the Trident-II missile coming down the road, we have ALCM's, SLCM's, and bombers. We have so many other deterrents we really do not need this wasteful MX missile.

Mr. Chairman, I yield 3 minutes to the gentleman from Massachusetts (Mr. MARKEY).

Mr. MARKEY. Mr. Chairman, today the House will be making a critical decision on what might be called Reagatomics.

We all know how well Reaganomics has worked. The unemployment lines across the country tell that story.

Well, today the House decides on one of the key ingredients of Reagatomics—basing the MX in Dense Pack.

And if you think Reaganomics is a back-of-the-napkin economic policy, Reagatomics and Dense Pack do not even belong on the back of a matchbook cover.

Here is the latest Trojan horse the administration wants to slip through and you tell me if we should open up the gates.

The White House wants to spend, all told, more than $30 billion on a Dense Pack scheme:

That would not make us any more secure;

That depends on a fratricide theory the Air Force cannot even prove on the blackboard;

That will likely take the Soviets only a few years to overcome even if the fratricide theory proves true;

That will have us bending SALT II every which way so it will look like a pretzel;

That will probably have us do even more damage to the ABM Treaty; and

That will just keep both sides barreling down the arms race.

Mr. Chairman, Dense Pack is so bad, so unworkable, so wasteful, so unnecessary, it is going to give lemons a bad name.

If the Soviets foisted this Dense Pack scheme on us, you know darn well we would be yelling from the top of our lungs that they had violated the SALT II Treaty. And you know darn well that the White House would be screaming the loudest. And you also know that if the Soviets put forth Dense Pack we would be scrambling to find a way to defeat it.

So if you think the Soviets will roll over and play dead while we deploy Dense Pack, you are living in a fantasy world.

All across this country, people are standing up and demanding a halt to the nuclear arms race. More than one-fourth of the Nation's electorate voted on freeze referendums this November 2.

The message from the people is clear: They want the arms race halted. They do not want a basing scheme like Dense Pack, which ony heats up the arms race.

Mr. Chairman, the administration calls this scheme peacemaker.

I call it Ronald Reagan's Christmas turkey.

And I hope the House today will adopt the Addabbo amendment and reject this turkey before it is put on the table.

THE MX AND THE OVERALL U.S. NUCLEAR ARSENAL

The MX proponents want us to believe that the vulnerability of the land-based ICBM means the vulnerability of the entire triad. But this is not the case. Both sea-based weapons and bombers are still relatively immune to attack and they are likely to remain so for the time being. Thus, strategic stability and deterrence are not upset if only one part of the U.S. nuclear arsenal, carrying less than one-quarter of the total of nuclear warheads, could be hit by a Soviet attack. Moreover, one has to take into consideration that by the time the MX is completed, its effect on our retaliatory capacity will be minimal. As a recently issued report by the Congressional Budget Office emphasized: When all the bombers, missiles, and submarines in the administration's $180 billion program to build up the nuclear deterrent are active in 1996, "the contribution of the MX would range from 5 percent to about 13 percent."

TECHNICAL PROBLEMS WITH DENSE PACK

Dense Pack has so many technical unknowns it is hard to know where to begin. One point stands out in the Dense Pack debate, however. Even a number of people not normally considered doves on defense have raised questions about Dense Pack based on its technical unknowns. For example, Senator JACKSON has estimated that Dense Pack will assure missile survivability only for about 4 years. Colin S. Gray has stated that the Dense Pack basing mode "does not provide an enduring ICBM capability * * * You're talking at most about a matter of hours of survivability and that is being optimistic."

Two important questions should be asked about Dense Pack:

First, does Dense Pack really improve the survivability of the new ICBM systems?

Second, how long can the United States stay ahead of Soviet responses to Dense Pack?

As for survivability, the Pentagon's arguments in favor of Dense Pack are fatally flawed on several grounds:

First, if one believes that the Soviet Union can destroy 90 percent the U.S. Minuteman III missiles—though this is a highly dubious position—it is hard to believe why the Soviet Union may

not be able to destroy MX missiles in the Dense Pack basing mode.

Second, the key idea behind Dense Pack is to space the silos so close that a Soviet warhead about to detonate at one silo would be destroyed by the explosion of another Soviet warhead at an adjacent silo—fratricide. It is hard to believe now that the Dense Pack basing mode will enhance survivability of the MX missile since the Air Force in the past has favored the very opposite basing scheme; namely, improving survivability by dispersing silos as much as possible—for example, in multiple protective shelters. The Dense Pack "solution" therefore, seems to be a product of pressure to concoct some basing scheme rather than rational planning.

Third, even if arriving warheads would destroy succeeding ones, it cannot be excluded that the Soviet Union would develop a technique that enables it to detonate the attacking warheads more or less at about the same time.

Fourth, another Soviet option could be to avoid fratricide by using only a few extremely high-yield warheads that would destroy more than one MX silo each. Dr. Charles Townes, who directed the administration's two main MX studies, reportedly doubts that any silo can be hardened to the extent necessary to make Dense Pack meaningful. According to Richard Garwin, a consultant to U.S. administrations on defense matters for three decades, a Soviet weapon of about 5 megatons could disrupt other launch sites. The Soviets, reportedly, have tested a nuclear weapon of 60 megatons.

Fifth, another Soviet way of defeating Dense Pack could be to detonate weapons periodically above the Dense Pack field to create radiation, blast, et cetera, which would destroy U.S. missiles launched shortly after the Soviet detonations, thus "holding or pinning down" the missiles in their silos.

Sixth, another option to avoid fractricide would be the use of so-called Earth penetrator weapons that penetrate the ground before they explode, destroying all shelters. As to this scenario, the Pentagon's "MX Closely Spaced Basing" paper of July 20, 1982, admits that the Earth-penetrators "could not be made available before the next decade"—in other words, shortly after the full deployment of the MX.

Thus, the second question concerning the MX timetable becomes extremely relevant. Given delays in production and construction, given the expected Soviet countermeasures, we cannot help but conclude that the MX would only be survivable for a couple of years. In view of the economic, political, and environmental costs involved: This is too high a price for a questionable amount of security.

THE MX WILL ACCELERATE THE ARMS RACE

MX supporters claim that the MX will have a stabilizing effect—but this is just wishful thinking, not a convincing argument. First, our accumulation of first-strike weapons will only result in the Soviet Union racing ahead with theirs. The decision to build and to deploy MX in Dense Pack just leads to another spiral of the arms race. Soviet reactions to Dense Pack probably would include at least a silo hardening program, the development of larger yield weapons, as well as the development and deployment of new warheads, such as MARV's, with low yield and high accuracy. It is quite obvious—the nuclear arms race has always been that way—that the United States will then feel forced to react again. As far as the MX is concerned, this would mean that this weapon system will become obsolete sooner than its supporters wish or claim.

THE MX AND ARMS CONTROL: THE MX IS NOT A BARGAINING CHIP

The Reagan administration justifies building MX also as a potential bargaining chip to be used in the START negotiations with the Soviet Union in Geneva. This argument, too, cannot be taken seriously for several reasons:

First, except for the ABM treaty, which really limits the antiballistic missiles system of both superpowers, there is no evidence during the whole nuclear arms race that when a technology is developed, is planned to be deployed in the near future and has backers in the Congress, the administration and the industry, it will be slowed down or even canceled.

Second, many top administration officials have said that MX itself is not a bargaining chip and that the 100 MX missiles could be deployed under the reduced ceilings that the administration is proposing to the Soviet Union in its START package.

Third, if the administration were really serious about bargaining chips and arms reductions, the MX would not be needed. Weapons under development or already deployed, such as the Trident I and II missiles, the bombers and the variety of cruise missiles, are more than enough to serve as bargaining chips.

MX MAY ENDANGER THE ABM TREATY

If the administration is really serious about arms control and arms reductions, it should not pursue a policy that might not only require a missile defense system, but might also imply that the ABM treaty would have to be revised or even canceled. The ABM treaty is virtually the only treaty that has had a real impact on the defense policies of both superpowers. Though it has not stopped the nuclear arms race, it has put a lid on it in one major area, thus saving the expense of an arms race in defensive weapons systems. This achievement should not be put at jeopardy. The administration, however, has proposed changing the ABM treaty as one solution, if the Dense Pack would become vulnerable in the next decade. Needless to say, such a policy would also include more costs for a required ABM system. It would probably cost an additional $25 billion, thus doubling the price of the Dense Pack system.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 4 minutes to the gentleman from New York (Mr. KEMP).

Mr. KEMP. Mr. Chairman, this vote indeed, when it comes on the MX or Peacekeeper, is not—I repeat—not a vote on Dense Pack. That issue will be resolved as the Congress goes forward, as research and development moneys go forward, to determine whether or not closely spaced basing is technically feasible and reponsive to our strategic requirements. Indeed, that decision will be made later. The vote will come today on whether or not the Congress is going to support the attempt of the President and this bill to modernize the land based leg of our strategic deterrent which has kept the peace for more than 30 years. So, from the standpoint of suggesting that this vote will be on the Dense Pack system, that is not the truth. That will not be the vote. As I said before, the vote will be on whether or not we want to go forward toward making the basing decision upon which this leg of our strategic triad is predicated.

The goal of our national defense spending is to deter war and preserve our freedom. It is increasingly obvious that that goal cannot be met by just maintaining the status quo. Deterrence depends upon the quality of our strategic forces. My support of this legislation is now and has been in the past predicated upon the fact that deterrence will be enhanced and modernized by these defense programs. The political climate in the real world demands that we in the Congress support improvements to our strategic forces so that we can maintain that balance so essential to the peace of the Western world and to its democratic values.

In terms of priorities, there is no more urgent requirement than redressing the vulnerabilities of our strategic forces. Our strategic forces are the heart of America's deterrent, the highground of our defense and our ability to protect our allies. As Winston Churchill once said:

> It is certain that Europe would have been communized like Czechoslovakia . . . some time ago, but for the deterrent of the atomic bomb in the hands of the U.S.

In his 1961 message to Congress transmitting the Defense budget, President Kennedy explained that the strength of our strategic forces:

> Depends not only on the number of our missiles and bombers, but on their state of

readiness, their ability to survive attack, and the flexibility and sureness with which we can control them to achieve our national purpose and strategic objectives.

These basic requirements have not changed. What has changed since 1961 is the balance of strategic forces between the United States and the Soviet Union. During the early sixties, when our Nation was threatened by Soviet missile emplacements in Cuba, the United States enjoyed clear strategic superiority. With this knowledge, President Kennedy was able to counter the challenge confidently, and the missiles were withdrawn. Today, by most comparative indixes, the Soviet Union has achieved strategic superiority over the United States. A Soviet first strike utilizing only a small fraction of Soviet forces could destroy approximately 50 percent of our submarine force, 75 percent of our bomber force, and at least 95 percent of our ICBM's. We are rapidly reaching the point where we can no longer have confidence in the ability of our defenses to achieve our strategic objectives, to assure stability in a crisis, or to deter attack on the United States or our allies.

We are in this dangerous situation because during the SALT years, the United States has virtually stood still in strategic force modernization while the Soviet Union has pursued a determined program to achieve strategic superiority. Over the past decade, the Soviets have spent three times the American total on strategic offensive forces, and today spend three times the U.S. amount in the entire strategic realm.

During the Salt years, the Soviets produced over 70 Backfire bombers, and continue to produce Backfires at the rate of about two and one-half per month; and now there are not one but two follow-on Soviet bombers in production. The United States canceled production of the B-1 in 1977.

The Soviet developed the Delta 1, Delta 2, Delta 3, and Typhoon strategic submarines; the U.S. developed but one class, the Trident.

The Soviets produced 4 SLBM systems: the SSN-8, SSN-17, SSN-18, and SSN-20. The United States deployed two.

The Soviet Union has been deploying its highly mobile, MIRV'd long-range SS-20 missile at the rate of about one per week, while the U.S. theater nuclear force in Europe has not been modernized in years but rather has been reduced by 1,000 warheads over the past 2 years.

Finally, during, the SALT years, the Soviets developed four generations of ICBM's, the SS-16, SS-17, SS-18 and SS-19; while the United States shut down its only ICBM production line.

These facts are a matter of public record. The inescapable conclusion is that American restraint has been exploited by the Soviets, who have pushed their advantage through the dedication of enormous resources to their military buildup.

The change in regimes in the Soviet Union, coupled with ongoing negotiations on stratetic as well as theater nuclear weapons, requires that we approach the defense appropriations legislation with a very sober and responsible attitude. We can have a tremendous impact for good or for bad on those negotiations. President Reagan and his administration have set out on an unprecedented and difficult path to try to reduce the alarming number of nuclear weapons now in the world. If forces are modernized and negotiations are enhanced by what we do here today, the threat of nuclear war would be substantially reduced.

If the U.S. strategic force posture, however, is allowed to decay without improving its survivability, without modernization, the Soviets will not need to worry about questions of parity. It seems to me that it would be obvious, increasingly so, that their offensive forces would in time—in a very short time, unfortunately—face no credible opposition in the world. On the other hand, prudent and timely improvements to address the vulnerabilities of our strategic forces, and to modernize our capabilities, would insure deterrence and thereby peace. Moreover, only through strength can we ever hope to achieve stability and worthwhile arms control. We should therefore move ahead with procurement and production money now.

Second, a failure to provide procurement funds would seriously disrupt the momentum of the program to meet the scheduled initial operational capability in 1986. I have had this debate with my friend the gentleman from New York (Mr. ADDABBO), for whom I hold high regard.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 2 additional minutes to the gentleman from New York.

Mr. KEMP. It would be untimely because it would put off the date upon which we could have an initial deployment. The MX is not a paper missile. It has completed development tests and it is scheduled for its first complete test flight early in 1983, and we want the first 10 to be ready by 1986.

As pointed out by the President, negotiations with the Soviets have only been successful when we deal from a position of strength. That is not only the history of our relations with the Soviet Union; that is the history of negotiations throughout the world.

Soviet Defense Minister Dmitri Ustinov was prominently featured in morning papers today, threatening this Congress that if we decide to produce the MX, the Soviet Union would respond by developing a similar weapon that will "in no way be inferior" to the MX.

Such threats are a crude attempt at intimidation, and wholly lacking in credibility.

In the first place, the Soviets have been steadily modernizing their strategic forces—in part through stolen U.S. technology—over a period of unilateral U.S. restraint. The lesson here is, if we build, they build; and if we do not build, they build.

Second, the Soviets today are devoting some 18 percent of their GNP to their military buildup, and have given defense spending a priority above all else. The defense sector is unquestionably the first priority of Soviet industrial production, whatever economic difficulties may plague the U.S.S.R. Simply stated, the Soviet Union is already allocating the maximum possible to its military buildup: It has been racing while the United States has stood still. They really could not do much more than they are already doing.

Third, their current missile inventory dwarfs the proposed MX. The SS-18 is about twice the size of the MX. As explained in Soviet Military Power:

> Each warhead of the 10RV variants has a better than 50 percent chance of destroying a Minuteman silo. When used in pairs, against a single target, the warheads are even more destructive. The single RV versions of the SS-18, with their large destructive power and accuracy, are capable of destroying any known fixed target with high probability.

Finally, just last month, the Soviets flight-tested a new generation ICBM from their test center at Pletsesk, with characteristics in the same class as the MX. Since they already have sufficient ICBM's to take out our entire land-based force—with about two-thirds of their force in reserve—it is clear that this new generation ICBM has been developed with other targets in mind, and will be deployed or not irrespective of our decision on the MX.

I believe, Mr. Chairman, we would be surrendering our future and the future of our democratic world by our own hand if we approve the amendments to delete funding for the MX. Our allies and our citizens want us, as Mr. YOUNG pointed out earlier, to take those steps that will assure the peace and the survival of the freedom of this country and of our allies not only now but in the future. It would be terribly wrong, I think, to cancel this program. And make no doubt about it, we would be canceling the ability of our negotiators to be successful if we adopt the amendment that is to be offered this afternoon.

I suggest that we approach these deliberations today with an eye toward the success of those negotiations, and not their failure.

The cost of the MX is high, but so is the cost of peace and freedom. But, the loss of peace and freedom is far more costly.

Mr. ADDABBO. Mr. Chairman, I yield myself 1 minute.

I do not think we have such a good bargaining chip if we go ahead and build the missile for multibillions of dollars, and have no place to put it except possibly where it does not provide a deterrent. It is not a bargaining chip. It does not help national defense, but hurts our defenses because it takes money away from other needed programs.

Mr. GORE. Mr. Chairman, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from Tennessee.

Mr. GORE. Mr. Chairman, our distinguished colleague from New York made the statement that research and development had essentially been completed. Within my district just 2 weeks ago, where the second of five scheduled tests was held, the test resulted in a tragic explosion and fire. The last three of those five tests have now been put off, and they are planning to go prematurely to atmospheric testing. So, the development and research on this missile has not been completed, and there are all these signs of a hurry-up rush, rush, rush toward the Dense Pack, even though it has not been thought through.

Mr. ADDABBO. Mr. Chairman, I would also add that research and development of the missile could not be completed or they would not be asking for $1.7 billion in this bill for that purpose.

Mr. Chairman, I yield 4 minutes to the gentleman from New York (Mr. DOWNEY).

□ 1520

Mr. DOWNEY. Mr. Chairman, I thank the gentleman from New York (Mr. ADDABBO).

Mr. Chairman, all during this debate there is a series of military myths that I would like to dispel.

The first myth is the dangerous and misleading notion that the United States is somehow inferior to the Soviet Union in the area of nuclear weapons. There is no member of the Joint Chiefs of Staff, when the question is put to them, who would trade our arsenal for that of the Soviet Union's.

Arguably, the Soviets have some advantage, if we can call it that, in the number of missiles and throw-weight in their land-based missiles, but no one can credibly argue that the Soviet submarine force is the equal of ours or their bombers are the equal of ours. They clearly are not.

So this notion of superiority or inferiority is ridiculous. Both sides are fully capable of destroying one or the other. But, more importantly, it is inaccurate and misleading to the American people to leave them to think that their own country is in a position of inferiority when it is not.

Second is the myth that the Soviets will not negotiate. This is preposterous. The Soviets have been willing to negotiate arms control agreements since 1969 and continue to be and remain interested in negotiating.

Why? Very simply, they recognize the incredible and awesome power of the United States. They understand the damage that would occur to their country if they were involved in a nuclear war with us.

So whether or not we have the MX or the Dense Pack, whether we have research and development or procurement money, they are going to sit down at the table with us because it is in their interest to do so, as it is in our interest to negotiate with them.

Third is the myth of the bargaining chip. This carpet has been worn threadbare with Members walking down into this well and saying that all we need to do is build another missile and another plane and have an ABM system so we can have a bargaining chip to force the Soviets to the table.

A weapon system is a bargaining chip in its design phase. When it enters into the force, it is no longer a bargaining chip. It is a weapon system, and it brings us one inexorable step closer to nuclear war.

Last, we have this insane notion that we have to have the MX to respond to the Soviets' SS-18 heavy missile, and that we somehow must jeopardize Soviet land-based missiles in order to have peace in America.

Well, as the gentleman from California so eloquently pointed out, the Soviets are not worried about a first strike by the United States. So if they struck us first and attacked some of the land-based missile we have and we then decided to place in jeopardy their SS-18's, what rational Soviet leader would allow their missiles to be destroyed in their launching pads? No Soviet leader would do that.

That makes the MX the greatest hole-digger in the history of mankind.

I suggest to the Members that we be honest with the American people. The Soviets have been provocative and have expanded their arsenal and we need to respond to them, but we do not need to respond to them with a weapons system whose very premise for being is false, that there is going to be a first strike, and whose technical problems are so complete and thorough that there are these wrenching debates even inside the Pentagon as to whether or not the system will work.

Mr. Chairman, the time has come to stop the procurement and possibly to go ahead with the R&D so that it remains the potential bargaining chip—and if some Members buy that argument, they are welcome to it—and continue the process of negotiating. My colleague, the gentleman from Tennessee (Mr. GORE), has come up with one of the more outstanding ideas to come down the pike for some time. The idea is that we should be emphasizing elimination of first-strike capabilities on both sides.

The CHAIRMAN. The time of the gentleman from New York (Mr. DOWNEY) has expired.

Mr. ROBINSON. Mr. Chairman, I yield 5 minutes to our distinguished Republican leader, the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Chairman, recently I was reading from a biography of Gen. Douglas MacArthur.

When he was Chief of Staff of the Army during the 1930's, he came before the Congress time after time asking for adequate funds to modernize our forces.

But the need to balance the budget one of President Roosevelt's 1932 campaign promises, was seized upon by those in Congress at the time who felt it was politically wiser to cut defense spending than other spending.

They were well-meaning. They were patriotic. but they were tragically wrong.

That was 50 years ago.

We are told times have changed. But the hard facts of the defense of freedom and peace remain the same.

The defense of freedom and peace is always expensive. It is always a sacrifice. The money spent on weapons always could be used for nonmilitary programs. The military who ask for the weapons are always said to be feathering their own nests at taxpayers expense. It was ever thus.

It was that way in the age of the musket. It is that way in the age of the nuclear weapon.

In every age there are always well-meaning, patriotic people who say: "But we can defend freedom and peace just as well if we cut out this or that weapons system.

Today we hear that we can defend ourselves and still reject the B-1, the MX, the Trident, hi-tech airplanes, and large aircraft carriers. We are told we can build more, smaller, less sophisticated weapons or just fix up the old ones.

Maybe the critics are right. But suppose they are wrong?

We are told: Do not trust the military. They are always asking for too much.

Perhaps, but in the last 10 years they have not been getting it.

In the last 20 years the percentage of the budget spent on defense has gone from 45.9 percent in 1962 to 25.8 percent.

The money we are being asked to spend on the MX program, in fiscal year 1983, in terms of budget outlays,

is around 1 percent of the total budget.

But MX is not simply a budget question.

It is a military question. It is a strategic question. It is a foreign policy question.

It is an arms reduction question. Ambassador Rowney tells us that if we vote against the MX, hope for an arms reduction agreement with the Soviet Union may very well be lost.

If the current feeling grows that it is not only too costly but actually immoral to fund nuclear weapons, it is not going to make much difference how we vote today.

Maybe that is where this country is today. Maybe we are too weary or cynical or too self satisfied or too frightened to pay the price to defend ourselves. I hope and pray it is not so.

I do not believe it is so.

But I may be wrong. It is time to find out where we stand.

I hope Members will reject the amendment to delete the funds for proceeding with the production of the MX missile.

Mr. ADDABBO. Mr. Chairman, I yield such time as he may require to the gentleman from Georgia (Mr. FOWLER).

Mr. FOWLER. Mr. Chairman, 600 years ago a chronicler in the Italian town of Siena wrote:

> And no bells tolled and nobody wept no matter what his loss because almost everyone expected death * * *. And people said and believed, "This is the end of the world."

The writer was referring to the black plague which killed an estimated one-third of the population of Europe, or 20 million men, women, and children, during the 14th century.

The people of the Middle Ages were unable to understand the cause of their horror, or to treat or prevent the great epidemic. The perhaps natural reaction to this inestimable evil which was visited upon them, and which was evidently totally outside of their control, was to turn away and to block out thoughts of the tragedy. Of the major contemporary writers, Froissart refers to the plague only once and Chaucer gives little more attention to the greatest calamity of his era.

The great plague of the latter half of the 20th century is the threat of nuclear war, only today we must contemplate casualties ranging from a low of 20 million—in the extremely unlikely event of a limited nuclear conflict—to a high of 160 million in the United States alone. And those are just the immediate deaths. No one knows, or can know, what the long-term consequences would be but at least some reputable scientists believe that all-out nuclear war would lead to the extinction of all higher forms of life on Earth.

The thought is staggering, and the people of our era have shown the same reluctance to confront the awesome danger displayed by medieval Europeans toward the black plague.

Yet we have to confront it. The one major difference between the plague of the Middle Ages and that of our time is that they truly lacked the knowledge of the cause and cure of their malady, which were not to be discovered for another 500 years. We know all too well the reasons for our predicament: The existence of scientific discoveries unlocking the secret of the power of the atom and the absence of the moral and political will to prevent the diversion of that knowledge into the weapons of war.

As John F. Kennedy said at the United Nations in 1961:

> Unconditional war can no longer lead to unconditional victory. It can to longer serve to settle disputes. It can no longer be of concern to great powers alone. For a nuclear disaster, spread by winds and waters and fear, could well engulf the great and the small, the rich and the poor, the committed and the uncommitted alike. Mankind must put an end to war or war will put an end to mankind.

While there are some areas in conventional forces where we do need to improve our position vis-a-vis the Soviets, it is patently untrue that overall our strategic nuclear forces are inferior to those of the Soviet Union. The major reason for the existence of the myth of Soviet strategic superiority is that the United States and Soviet forces are different, owing to the differences in defense establishments and technological capabilities of the two sides. Thus, because the Soviets have placed a greater reliance on certain forces, such as large land-based ballistic missiles, figures can be found that show a Soviet lead in these individual aspects of nuclear weaponry. However, it is the overall balance that is important, not that each side has certain advantages in individual weapons systems.

The U.S.S.R. leads in intercontinental ballistic missiles (ICBM's) 1,398 to 1,052 and submarine-launched ballistic missiles (SLBM's) 950 to 520. The United States has a big edge in long-range bombers 376 to 145, and in total number of nuclear warheads 9,500 to 7,800.

The Soviet ICBM's carry more and larger warheads but the U.S. SLBM's carry more warheads and possess greater accuracy than their Soviet counterparts. The United States has a 5- to 10-year lead in the emerging technology of cruise missiles.

However, in addition to these raw numbers several other factors must be borne in mind in evaluating the strategic balance from the American perspective. While the United States converted all of its ICBM force, except the oldest element (the 52 Titans) from liquid propulsion to the more reliable solid propellants, 95 percent of the Soviet ICBM force is powered by liquid propulsion.

While the Soviet Union has 62 strategic submarines to our 32, because of maintenance and other problems they can keep only an average of 10 of these (with a total of 225 warheads) at sea at any one time compared to 16 U.S. strategic submarines (with 2,400 warheads) always on sea patrol. Furthermore, while U.S. surveillance capabilities allow us to routinely monitor the whereabouts of Soviet submarines, from all evidence that we have the Soviets have never successfully tracked a U.S. strategic submarine on normal sea patrol. Thus, the U.S. submarine force is far more survivable than the Soviet force.

None of this is to suggest that we possess a usable strategic superiority over the Soviets. Clearly their strategic arsenal is capable of inflicting a devastating blow to U.S. society. But neither are our strategic forces inferior to those of the U.S.S.R. We now possess the capability to destroy the Soviet Union as a functioning society, even after absorbing a full-scale first strike.

As has already been observed, United States and Soviet strategic forces are now essentially equal. However, mutual suspicions, the march of technology, and the sheer momentum of the nuclear arms buildup will continue to threaten this stability, in the absence of an agreement to stop the accumulation of evermore dangerous nuclear weapons.

The present time is a particularly crucial one in the history of humanity's efforts to check the nuclear danger. We are on the brink of a new and particularly threatening round in the arms race. A new generation of American and Soviet weapons are to be deployed which will place even more of a hair trigger on the nuclear button and will seriously undermine the verification of, and hence the prospects for, future arms control agreements.

Which brings us to the MX and the key issue before the House today.

THE MX

My opposition to the proposed MX system is not based primarily on cost, though in the outyears the Reagan program could be almost prohibitively expensive depending on the final basing mode, but rather on its strategic implications.

Unless I am badly mistaken, the primary purpose of our strategic nuclear forces is to deter aggression against ourselves, our interest, and our allies. With this in mind, the problems that do or will exist in the Triad stem not from insufficient numbers of warheads or too little firepower but from the perceived survivability of our missiles and bombers—that is, their ability to

ride out potential attack and to inflict unacceptable damage to any aggressor.

The major reason that defense planners have pushed for an MX program has been to improve the survivability of U.S. land-based missiles against potential Soviet attack. The Ford and Carter administrations had responded to the theoretical vulnerability of our land-based missiles by proposing that we develop a mobile MX missile that could be shuttled between a number of possible launch points.

Frankly, I had several major reservations about the Ford and Carter plans, including my belief that, in the absence of a ratified SALT II or successor treaty which limits the size of United States and Soviet nuclear arsenals, the Soviets would be able to field enough warheads to theoretically threaten our land-based missiles no matter how much launch points we provided for our missiles. For this reason, I question the wisdom of pouring vast sums of money into land-based strategic missile forces and favor instead the enhancement of our invulnerable—for the foreseeable future—strategic submarine forces.

The Reagan MX Dense Pack decision makes even less sense to me than the earlier proposals. Essentially, it adopts a strategy of providing for ICBM survivability that runs exactly opposite to the deception and dispersal theories of all previous administrations. It relies on heretofore unattainable silo hardnesses, ineffective Soviet countermeasures and the jeopardizing of U.S. compliance with the ABM treaty, SALT I and SALT II.

With regard to the plan to harden these fixed silos, if the Soviet ICBM's can attain the current and future accuracies attributed to them no amount of hardening will be sufficient because any silo would be vaporized by the fireball created when the incoming warhead detonates.

The technological arms control, and financial risks inherent in the MX system before the House today are large. And what is the payoff? CBO has concluded that after a Soviet attack the MX could provide as little as 5 percent of our retaliatory warheads; 5 percent.

What we can be sure of is that the current MX plan does not promote strategic stability, a characteristic that is vitally important given the fact that any nuclear exchange is more likely to be the result of accident or miscalculation rather than of rational, premeditated design.

In my opinion, the major negative consequence of the Reagan MX policy would be to place both American and Soviet policymakers on more of a "hair-trigger" when it comes to launching nuclear attacks: The Soviets because the MX will pose a significant threat to their land-based missile forces—which are a much bigger part of their total strategic forces than U.S. land-based missiles are of ours—and the Americans because to be able to use this new weapon we will have to be prepared to launch it before Soviet missiles can destroy it.

I can think of few more destabilizing armaments than a vulnerable, countersilo nuclear weapons system.

Ladies and gentlemen, I am no starry-eyed idealist and I have no illusions about the threat posed by the massive Soviet conventional arms buildup. I support the calls for improving NATO's conventional force readiness. Achieving stability in conventional forces, by pursuing both readiness improvements and conventional force reduction agreements, would lessen the chances for conventional war, which in our era would itself cause unprecedented death and destruction, and allow us to remove the hair-trigger from NATO's nuclear deterrent.

By itself, arms limitation is not enough. In addition to limiting numbers of weapons we must also seek to promote crisis stability so that we do not stumble into nuclear annihilation by accident or miscalculation.

With this in mind, I urge the President and our START negotiating team to give serious consideration to each of the following measures:

Update and expand the various United States-Soviet agreements for preventing nuclear war by accident, miscalculation, or miscommunication (Hot Line Agreement, Accident Measures Agreement, Prevention of Nuclear War Agreement).

Establish a joint United States-Soviet crisis control facility to monitor all nuclear weapons-related activities including missile tests, as suggested by several Members of Congress.

Negotiate a strong and verifiable antisatellite warfare treaty to head off weapons competition in this particularly destabilizing field because of its threat to the reconnaissance and communication satellites which provide the major breathing space for leaders in nuclear crisis.

Negotiate limitations on the operating areas for strategic submarines to prevent launchers from occupying the coastal waters of the other country because such positioning—with the short flightime to potential targets—changes the basic nature of the strategic submarines from being a stabilizing, deterrent force into a destabilizing, first-strike threat.

Given additional priority to U.S. nonproliferation effects by strengthening current controls on the export of nuclear weapons-related technologies and materials.

Reinvigorate the current round of mutual and balanced conventional force reduction negotiations in Vienna.

Without sufficient defense forces, of course, no arms control agreement could be trusted to insure our national security. But without mutual and verifiable arms control, which brings stability and some measure of limitation to nuclear competition, no amount of weaponry can insure our survival.

When he was accepting the Nobel Peace Prize in 1964 Martin Luther King, Jr. said "I refuse to accept the cynical notion that nation after nation must spiral down a militaristic stairway into the hell of nuclear destruction. I believe that unarmed truth * * * will have the final word in reality."

Are we up to the challenge posed by Dr. King, or will we sit helplessly by as did the doomed victims of the black plague of the middle ages?

I urge you to support the Addabbo amendment to stop the development of the militarily dubious, and economically costly MX missile system.

Mr. ADDABBO. Mr. Chairman, I yield 1 minute to the gentleman from New York (Mr. SCHUMER).

Mr. SCHUMER. Mr. Chairman, we have heard many arguments on both sides, arguments that were very erudite about the capabilities of the MX missile system. I think at the bottom line this is ultimately a question of priorities and no more.

My distinguished colleague, the minority leader, said that this is not a budget question; this is a military question and a foreign policy question. The gentleman is right. But, too, many of us believe that the questions of education funding and funding for food stamps and funding for needy and unemployed people were also more than budget questions. They were questions of human capital, they were questions of investment in America, and they were ultimately questions of our own defense. Which priority do we choose? The answer is up to us today.

The CHAIRMAN. The time of the gentleman from New York (Mr. SCHUMER) has expired.

Mr. ADDABBO. Mr. Chairman, I yield such time as he may consume to the gentleman from Washington (Mr. LOWRY).

Mr. LOWRY of Washington. Mr. Chairman, I rise in support of the amendment to be offered by the gentleman from New York (Mr ADDABBO).

Mr. Chairman, I would like to express my strong opposition to the Dense Pack basing mode for the MX missile, which President Reagan has proposed. I am seriously concerned by the technical questions about Dense Pack, but I am even more concerned by its effects on the arms control process and the Soviet decisionmaking process. We are not simply faced with a choice of a basing mode for a component of our strategic forces. We are about to decide whether or not to throw away the accomplishments of the arms control process and poison

the atmosphere for the negotiations which are now going on.

I oppose the MX missile because it is accurate enough to threaten Soviet land-based ICBM's with a first strike. This capability is of no use to us unless we wish to start a nuclear war, and it will create an incentive for the Soviets to launch their missiles in a crisis instead of acting with restraint. It will add to instability and can only increase the dangers of war through miscalculation or accident.

But the Dense Pack proposal itself has serious drawbacks. Although the official cost estimate is $26.4 billion, Defense Department officials have admitted that it could cost $40 billion or more by the time it is completed, with an additional 50 percent cost if we add more silos or a ballistic missile defense (BMD). Dense Pack may violate SALT I and SALT II, and lead to a violation of the ABM Treaty. In the absence of a nuclear arms reduction treaty, it is not in our interest to endanger these existing agreements.

Dense Pack would place 100 MX missiles in 100 shelters in a long, narrow rectangle of about 20 square miles at Warren Air Force Base in Wyoming. It would rely on fratricide, the radiation, blast, and debris from the explosions of the first attacking warheads would shield the MX missiles from following warheads. In theory, the Soviets could not time the explosions closely enough to avoid fratricide. But we have already been told of a dozen or more ways that Dense Pack might be defeated. There is also concern that the effects of fratricide might not last as long as projected. Consequently, we cannot in any way be sure that this untested theory is correct.

Defense Secretary Weinberger stated that Dense Pack would give our land-based missiles survivability well into the nineties. But it will not be completed until 1989. In any case, Dense Pack would become the primary Soviet target. An attack on it would create a huge amount of fallout and kill millions of Americans regardless of the method of attack or its success.

Even before Dense Pack is completed, we will be considering the addition of a ballistic missile defense (BMD) system. Under the 1972 ABM Treaty, and BMD system would have to be placed at Grand Forks, N. Dak., not in Wyoming. This and other problems could well destroy the ABM Treaty, which has prevented the waste of billions of dollars on ineffective BMD systems.

Dense Pack may also violate the SALT accords, as the Soviets have charged. SALT I and II prohibit construction of additional fixed ICBM launchers. Dense Pack supporters claim that it will use mobile launchers which are fixed in shelters. But the launchers will never actually be moved. It would be a tragic mistake for the United States to jeopardize these two agreements.

In his announcement of Dense Pack, President Reagan repeated several myths which give a wholly inaccurate impression of American strength. He stated that, "in virtually every measure of military power, the Soviet Union enjoys a decided advantage." The repetition of this false claim is not in our national interest, for it misleads the American people and our allies, and could lead to Soviet overconfidence and adventurism. Given the enormous nuclear arsenals of both superpowers, and the fact that each one could retaliate against an attack by the other, it is not possible for either nation to achieve a meaningful nuclear advantage.

Even so, we are ahead in many aspects of national defense. In May of this year, Gen. John Vessey, the Chairman of the Joint Chiefs of Staff, testified to Congress that he would not trade military forces with his Soviet counterpart. His predecessor, Gen. David Jones, has stated that "I have no doubt that we can deter the Soviets." In particular, our strategic nuclear triad is more diverse than the Soviet triad, and is less dependent on vulnerable land-based missiles.

Concerning the arms race, the President stated that "while the Soviet Union has raced, we have not." We have heard this claim before: During the debate on the nuclear weapons freeze, the State Department circulated a misleading and inaccurate document on the strategic balance. The administration has continually stated the myth that the United States did not improve its nuclear arsenal during the 1970's. At that time, I noted that we have upgraded and improved each branch of our nuclear triad.

Between 1970 and 1975 we built 550 MIRV'd Minuteman III missiles; throughout the 1970's we upgraded our ICBM force by hardening silos and adding guidance, command, and control systems; and since 1979 we have added 900 highly accurate MK-12A warheads to our Minuteman III arsenal.

For most of the 1970's, we converted submarines and armed them with 496 MIRV'd missiles. We added 192 Trident I missiles on 12 Poseidon submarines with over 1,500 warheads between 1978 and the present. We are now deploying the Trident submarine, with a greater range. During the decade of the 1970's, we put over 3,000 more warheads on submarines than did the Soviets.

Our B-52 bombers have been upgraded with new engines, nuclear hardening, offensive avionics, new electronic countermeasure equipment, new wing skin and other improvements. We have also added over 1,000 SRAM—short-range attack missiles—to our bomber fleet.

It should also be noted that we have deliberately used MIRV technology to add warheads to our stockpile without increasing the number of missiles. In his presentation, however, the President did not mention our substantial lead of over 1,000 warheads.

Finally, the President stated that "unless we demonstrate the will to rebuild our strength and restore the military balance, the Soviets, since they are so far ahead, have little incentive to negotiate with us." This is the old bargaining chip argument. The history of the arms race shows that weapons which are intended to force the other side to the negotiating table simply add more momentum to the arms race. Thus, one bargaining chip, the cruise missile, now threatens to add unverifiable momentum to the arms race. Our MIRV technology, which we refused to limit through negotiations in the early seventies, had been matched by the Soviets. If we proceed with Dense Pack, the same process will begin again, at great cost to our economy and our security.

Implicit in the argument for Dense Pack is that it will create a perception among the Soviet leadership and military planners that they cannot successfully destroy our land-based missiles in a preemptive strike. Let us leave aside the question of whether they would consider that capability to give them any military advantage, since our sea- and air-based strategic forces would still be there to retaliate. Is it really in our interests to create this perception at the cost of indicating that we do not care about the ABM Treaty, SALT I and SALT II? Does it add to our security to undermine the arms control process?

I am concerned by the Soviet Union's military activities and its strategic arsenal. But the United States is not weak: America has a tremendous capability to devastate the Russian people and their society. It is incorrect and irresponsible to pretend otherwise, to imply that we have stood still in nuclear systems while the Soviets have raced ahead, or to suggest that there is a clear margin of superiority in nuclear weapons.

Dense Pack has been presented to the Nation as a means of ending the arms race. It is not. It will continue the arms race and provide momentum for the development of new weapons just as every previous nuclear system has done. The arms race will end only with mutual, verifiable arms reduction agreements. Without such agreements, Dense Pack can only increase the dangers of nuclear war. I urge my colleagues to join me in support of arms control and national security and against Dense Pack.

Mr. ADDABBO. Mr. Chairman, I yield 3 minutes to the gentleman from California (Mr. DELLUMS).

Mr. DELLUMS. Mr. Chairman, when this bill is read for amendment, I plan to involve myself actively in the debate on deleting the B-1, the MX, the carriers, and other efforts to reduce this military budget. At this point in general debate I would like to make a few very brief remarks.

All of us have come back from campaigning where we have debated the critical issues of our time.

Mr. Chairman, I come back even more convinced that we must challenge the madness of this ever expanding military budget, and we must speak to the issue of world peace powerfully and profoundly for three reasons. This planet is indeed in danger, in danger from the potential of a nuclear holocaust. We are going beyond deterrence to a war-fighting capability, we are going beyond verifiability to nonverifiability and we are developing dangerous and exotic nuclear technology that over the next few years may very well take us beyond our capacity to bring the world back within the confines of an arms control environment.

□ 1530

We are also in danger because we are pursuing a foreign policy based on the madness of the cold war that has masqueraded as America's foreign policy for the last 40 years. The problems of the world are not military problems, Mr. Chairman. The problems of the world are social and political and economic and no huge military budget is going to address that reality.

Finally, we must pursue world peace and challenge the madness of this military budget because it indeed is expanding. When I first came to Congress the military budget was $73 billion. Ten years later, in fiscal 1981, the military budget was in excess of $173 billion. The next year it was $220-some-odd billion.

This year this committee, the authorizing committee, sent to the President of the United States a bill for $254.6 billion. It is anticipated that by fiscal year 1985 this military budget will exceed $325 billion and by 1987, $422 billion.

If we do not stop this madness it is conceivable that by the end of this decade we could be spending well in excess of a half trillion dollars per annum. We cannot spend between $3 trillion and $4.5 trillion in the 10 years up to 1990 and address the tragedy of human misery of people in this country. we have a responsibility to address that human misery.

I would also like to conclude by making this one final comment, Mr. Chairman. Peace is not simply the absence of nuclear weapons. It is also the absence of conditions on this planet that give rise to violence, hostility, and war.

Two-thirds of the world live in abject poverty and millions of human beings starve to death every year. If we want to reach out to people in the world and be competitive with the Soviet Union then we should compete over who can best address the human misery of people on this planet not who best can destroy life on this planet.

Mr. ADDABBO. Mr. Chairman, I yield 5 minutes to the gentleman from Washington (Mr. DICKS), a distinguished member of the subcommittee and coauthor of the MX amendment.

Mr. DICKS. I think this year our subcommittee has done an excellent job in reviewing the defense appropriation request of this administration. After a very thorough analysis of the budget and after an item by item critique our subcommittee has reduced overall spending for the Defense Department, in budget authority, by nearly $17.5 billion. I think that is a tribute to the chairman of this committee, to its members, and to its very professional staff that we have given this kind of analysis to the Defense Department's budget.

I know that much of the attention today is going to come on the amendment to be offered by my colleague from New York (Mr. ADDABBO) which I am glad to cosponsor, to delete funding for the MX missile procurement.

I think there are in this House many who are the very strongest supporters for defense spending who are saying to themselves today: "How can we go forward and procure a missile when we are not certain that we have a credible way to base it?"

Anyone would say to themselves: "How can we spend $1 billion of the American taxpayer's money on a missile when we are not certain we have a basing mode that can survive over just a few hours?"

Secretary Weinberger told the congressional leadership at the White House that 4 years after the IOC, the initial operating capability of MX, that the Soviets would have the technical capability to overcome Dense Pack. We are talking about spending $26.4 billion for 100 missiles, just one-half the size of the Carter MPS proposal.

In my judgment, when you look at the prospects for vulnerability of Dense Pack you have to also listen to what Mr. Weinberger has suggested. He says that Dense Pack may not be enough; we may then have to spend another $15 billion to $20 billion on a ballistic missile defense system.

That gets us to $46 billion. Then we may have to add more silos for deception. Then all of a sudden we have a $50 to $60 billion decision.

I say to my good friend from Illinois (Mr. MICHEL), the distinguished minority leader, whom I have great respect for, that no one is leaving this country defenseless. We are buying the Trident submarines which are invulnerable. We are purchasing the B-1 bomber and the advanced technology bomber. We are adding air-launched cruise missiles, all of which have strategic capability.

We are also listening to former Secretary of Defense Schlesinger who said:

> Even if the silo hardness design were actually achieved the Soviets have available to them measures to counter Dense Pack within a few years of initial deployment. Either earth penetrators or other innovations (not yet discussed in open literature) would permit silo destruction.

Secretary Brown said that MX in Dense Pack is vulnerable.

Dr. Richard Garwin talks about the ability of the Soviets to detonate RV's over Dense Pack and pin down our missiles.

Bill Perry, Under Secretary for Research and Development in the last administration, says Dense Pack within 1 year will be proclaimed technologically obsolete.

So what we are saying here today is let us not waste our money on a system that probably cannot survive, that is vulnerable. Let us invest our money in things that will produce real defense.

Let us go ahead with the Trident. Let us go ahead with the D-5 missile on the Trident submarine. Let us go ahead with the air-launched cruise missile and the B-1 and the ATB but let us hold up on a system that is inherently vulnerable to Soviet attack.

I think if we do that it will demonstrate to the American people that we have some judgment, that we have some commonsense. We are not killing this program for my friends who are strongly committed to defense. We are going to continue an R&D effort.

The budget carries with it $1.7 billion for R&D on the missile and $700 million for R&D on the basing mode. That is a lot of money to spend on something that we are not sure can survive.

So I think the Addabbo amendment is well thought out. It is not compromising our defense and deserves the support of this body.

● Mr. WYDEN. Mr. Chairman, I rise today to make an appeal for commonsense—and an appeal for our security.

President Kennedy said of our nuclear era: "in a spiraling arms race a nation's security may be shrinking even as its arms increase." At no time in our history has this been more true.

And yet today, Congress will vote on a $231.1 billion spending bill that makes a vain attempt to buy security and strength through increasing our nuclear arsenal with weapons systems of dubious military value—weapons that if deployed will make us less—not more—secure.

The biggest military boondoggle in this spending bill is the MX missile, deployed in the so-called Dense Pack basing scheme. As a defensive weapon, the MX in the Dense Pack basing mode is useless and will probably be obsolete by the time it is deployed. However, because of its speed, accuracy, and capability to hit hard targets in the Soviet Union, it appears to fit the bill perfectly for a first strike.

What is worse, the MX violates existing arms control agreements—the SALT II Treaty and potentially the SALT I Treaty—with devastating consequences for future arms control.

And to add insult to injury, the price tag on this destabilizing, useless and provocative weapons system is $36 billion.

The President contends that we need the MX for bargaining purposes—to enable the United States to negotiate from a position of strength. But the President has refused to lay the MX on the bargaining table.

I must ask my colleagues: Will America really be stronger if we permit the production and deployment of a whole new generation of nuclear weapons?

Will we be stronger if we continue to strangle all hopes for economic recovery by pouring billions into the MX at the very time our domestic resources are strained to their limit?

Will we be stronger if both sides continue this trend toward improved weapons technology—to the point where weapons speed and accuracy will pose so great a threat to each side that life on our planet will depend on a hair-trigger?

Spending $36 billion on the MX will not buy us security. It will not buy us strength. What it will buy us is disaster.

The bottom line is that continuing to build up our nuclear arsenal will only cause the Soviets to do the same—and fuel a nuclear arms race that no one can win. Only by putting a halt to this arms race and working to prevent the outbreak of nuclear war can we reduce the real threat to our national security.

I urge my colleagues to support the amendment offered by the gentleman from New York (Mr. ADDABBO) to delete funds for the MX.●

● Mr. LUJAN. Mr. Chairman, I have been a supporter of the Dallas Cowboys of the National Football League for a long time. I have been a fortunate fan for many years, fortunate because the team that I support has been a consistent winner. The method of their success is not a secret. They win with regularity because they have depth or in other words reserve strength. They repeatedly bring players off of the bench who are as trained and practiced as the players that they replace. And their bench is at full strength at all times. My point is, can we afford any less in the reserve strength of the U.S. Army?

The National Guard and Reserve unit readiness is the bench of our Nation's defenses. Currently, the National Guard alone is short 14,000 trained and practiced players from the Department of the Army stated requirement for full-time support personnel in the National Guard. This bill eliminates nearly 5,000 full-time military spaces and in effect reduces the depth and strength which the House Armed Services Committee recommended. Therefore, Mr. Chairman, I must support the amendments which will restore the $60 million and the 4,946 full-time military spaces to the ARNG and the U.S. Army Reserve. I would be merely disappointed if the Dallas Cowboys lost a game, but I hate to think of the consequences if the U.S. Army lost one.●

● Mr. SMITH of Oregon. Mr. Chairman, I rise in opposition to production funding for the MX missile. I have supported the administration's efforts to rebuild our defense and I am well aware of the need to continue rebuilding a strong, credible defense for this Nation; 10 years in the military including one combat tour in Vietnam did much to convince me of the importance a strong military plays in determining the survival of our freedom. Many years of fatherhood have also convinced me of the fact that I do not want my sons fighting in somebody else's jungle or desert any more than I want my family in a position of defending our home from aggression.

But let this vote against the MX be a signal—a true heartfelt signal from a combat veteran who would gladly fight again for his country—that those of us in Congress dedicated to a strong national defense cannot sell to the American people each and every ideal the Pentagon decides to wheel up the Hill.

We had the consensus of public opinion for a revitalized national defense, but it is rapidly eroding. In 1980, America was losing face around the globe. American hostages were taken in our Embassy in Teheran. Desert One was a fiasco. The Soviets marched into Afghanistan. America appeared powerless.

The 1980 elections brought a new confidence to this Nation and together we forged the national will essential to rebuilding our military forces. Now the erosion of that confidence is at hand and our freedom and very way of life are at stake.

It is clear to me—after classified briefings—that there is indeed a massive Soviet buildup. It cannot be ignored. Yet we continue to keep this photographic evidence and documented intelligence from the American public, when it is vital that Americans understand the need for updating our antiquated military hardware.

We have been crying wolf about the Soviet threat for 37 years, and now, when the Soviets are on the brink of becoming the strongest military superpower in the world, the American people are convinced we can do without the frills.

In many ways, they are absolutely right. Our depressed economy dictates that we be cost-conscious and selective in the weapons we buy for the defense of this Nation. No agency, including the Department of Defense, should be granted a blank check to spend as they please. Just a few months ago we saw an example of that in the approval of the $11 billion C-5 program that will send us deeper into the red without adding any significant improvement to the defense of America.

It is obvious that the modernization of many weapons systems have been delayed for too long. We do need to modernize our land-based leg of the Triad. But before we launch into revitalizing our defense structure for the good of this Nation, there must exist a consensus on behalf of the American people that it is necessary to do so and that the hardware we need is not just another expensive toy we can do without.

More importantly, we cannot reach that consensus without the help of the administration that must lobby America itself.

The United States has essentially stood still over the past decade, while the Soviet Union has proceeded in bolstering its military capability area in many areas far beyond ours. Americans deserve to know just how serious the Soviet threat is and our Government must play an active role in providing that knowledge, while prioritizing what weapons systems we can afford within the constraints of fiscal reality. We must make concerted efforts to release what classified intelligence we can depicting the Soviet buildup to every American in this land.

Vietnam taught us all a valuable lesson: Our Government will not be successful in any endeavor it undertakes—whether it be building a missile, winning a war, or placing a man on the Moon—if the will of the American people is not behind it.●

● Mr. COURTER. Mr. Chairman, I wish to be counted among those who recognize that deterrence is the single most important factor in determining the value of any military weapons program. It is ironic that on this day, December 7, we seem to ignore the higher, more dangerous price nations pay for unpreparedness. I believe the focus of our concern today should be on the issue of a credible deterrent and a national commitment to peace through strength.

Many reasonable points have been raised in criticism of the means of de-

ployment of this missile. However, the Addabbo amendment does not deal with the Dense Pack basing mode plan, but rather seeks to eliminate total funding of the missile itself. As a member of the House Armed Services Committee, I have problems with the basing plan as presented to Congress, and, in that regard, I would like to see further investigation of the Dense Pack scheme.

It is important to realize, however, that the fundamental question being debated today in this Chamber is not deployment, but the key role this weapon system plays in protecting our national security. The deletion of the MX system will leave our land-based Minuteman II and III missiles vulnerable to destruction by a Soviet first-strike attack by 1985. We need a survivable land-based strategic deterrent capable of responding to any Soviet aggression.

Equally important, I believe the amendment will deny the United States a valuable bargaining chip for the START talks in Geneva. Those concerned about insuring world peace and reducing nuclear arsenals should realize that by unilaterally reducing our defense, we have absolutely no leverage to bargain for real, meaningful reductions, and, at the same time, we give the Soviets the strategic edge. Thus, they have absolutely no incentive to seek an agreement which would compromise their strategic advantage.

In the meantime, the Soviets build and deploy, regardless of American actions. I hope that this vote does not signify a watershed where America's commitment to world peace and national security will be questioned by friend and foe alike.●

Mr. EDWARDS of Alabama. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, I find the debate so far a little disconcerting. The subcommittee started back in February of this year on its bill when the President's budget came over in late February. We have spent untold weeks and months of hearings, time spent marking up our bill and studying the testimony and preparing for it in the subcommittee and in the full committee and preparing to come here to the floor.

So help me goodness, Mr. Chairman, it sounds like what we have brought you today is the MX appropriation bill.

I want to reiterate to the Members of this House that we have some $231 billion worth of personnel, manpower, retirement, operation and maintenance, procurement, research and development, and many other things funded in this bill for the defense of this country.

We have cut some $18 billion from the President's original proposal of $249 billion. We have cut over $8 billion in outlays for fiscal year 1983. We have cut something over $14 billion in outlays for fiscal 1984 and 1985 because of the massive cuts that we have made this year.

We have explored from one end to the other the needs of the defense of this country, whether it be strategic or conventional. I would not stand here and argue to you that we have in fact brought you a perfect bill because we have not. But we have brought you the best that this committee has been able to put together in the system that makes this country work. That is the majority rule, and we come now to the floor where the majority once again will work its will.

But I would suggest again, Mr. Chairman, to lose sight of all of this and to zero in on the MX missile as somehow the be-all, end-all of this bill that we have brought you is to miss the point of what it is this committee has been struggling to do over the last 11 or 12 months.

So I would urge the Members of this body of course to spend time understanding the issues and the amendments that would be brought here today. Of course, do your best to dig into what is in this bill and in the committee report, but understand that there is a lot more that goes on in the defense of this country than just one missile system.

□ 1540

We have time very shortly to debate that missile system. We will have time to debate other amendments that will be offered. And that is fine. But do not lose sight of what we have tried to do. Do not lose sight of the fact that this is an all inclusive bill providing for the defense of this Nation.

I would like to close, Mr. Chairman, finally by again saying that while we disagree a lot, I wish to commend, as well as I know how, the chairman of our subcommittee, the gentleman from New York (Mr. ADDABBO), who has dealt fairly with us, who has stuck in their with us while we tried to work out this bill and make it something that we are proud of, and to commend the members of this subcommittee and staff for the work that they have done.

I urge the Members of the House to support this bill.

The CHAIRMAN. The gentleman from New York (Mr. ADDABBO) has 1 minute remaining.

Mr. ADDABBO. Mr. Chairman, I yield myself 1 minute.

Mr. Chairman, I thank the gentleman from Alabama (Mr. EDWARDS) for his kind remarks, and I thank him and all of the members of the subcommittee again for their cooperation.

I would also agree with the gentleman that the bill does contain more than just the MX. We have two other wasteful programs, the aircraft carrier and the B-1B, on which I will also be offering amendments at a later time.

But I would ask my colleagues to please listen to the debate on the various amendments, including the MX, the carrier, the B-1B and the other amendments, because they will be debated on both sides and a vote will be taken on each. We do not want to look at just defense spending; we want everyone to evaluate the need for these individual weapons systems.

The CHAIRMAN. All time has expired.

The Clerk will read.

The Clerk proceeded to read title I.

Mr. ADDABBO (during the reading). Mr. Chairman, I ask unanimous consent that title I be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN. Are there any points of order against title I? The Chair hears none.

AMENDMENTS OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Chairman, I offer amendments.

The portions of title I to which the amendments relate are as follows:

RESERVE PERSONNEL, ARMY

For pay, allowances, clothing, subsistence, gratuities, travel, and related expenses for personnel of the Army Reserve on active duty under sections 265, 3019, and 3033 of title 10, United States Code, or while serving on active duty under section 672(d) of title 10, United States Code, in connection with performing duty specified in section 678(a) of title 10, United States Code, or while undergoing reserve training, or while performing drills or equivalent duty or other duty, and for members of the Reserve Officers' Training Corps, and expenses authorized by section 2131 of title 10, United States Code, as authorized by law; $1,223,650,000.

NATIONAL GUARD PERSONNEL, ARMY

For pay, allowances, clothing, subsistence, gratuities, travel, and related expenses for personnel of the Army National Guard while on duty under sections 265, 3033, or 3496 of title 10 or section 708 of title 32, United States Code, or while serving on active duty under section 672(d) of title 10 or section 502(f) of title 32, United States Code, in connection with performing duty specified in section 678(a) of title 10, United States Code, or while undergoing training, or while performing drills or equivalent duty or other duty, and expenses authorized by section 2131 of title 10, United States Code, as authorized by law; $1,658,950,000.

The Clerk read as follows:

Amendments offered by Mr. ADDABBO: On page 3, line 23, strike "$1,223,650,000" and insert in lieu thereof, "$1,247,450,000".

On page 5, line 25, strike "$1,658,950,000" and insert in lieu thereof, "$1,695,150,000".

Mr. ADDABBO. Mr. Chairman, the purpose of my amendment is to restore $60 million for the full-time manning personnel for the Army National Guard and the U.S. Army Reserve. The committee has always been a very strong supporter of the Guard and the Reserve and, in fact, included

in this budget a net total of $517.4 million above the budget for our Reserve components.

The bill as reported also rejected reductions recommended by the Secretary of Defense of $80 million that would have reduced Reserve pay drill strength by 20,000.

In view of the fact that the total committee recommendation is holding at about a $17 billion reduction in the overall budget and that it is the committee's long-held conviction that a dollar spent on the Guard and Reserve is one of the best defense expenditures we can make, I am now recommending that we reject the Secretary's original recommendation and that we appropriate this $60 million for the Army Guard and Reserve.

Mr. MONTGOMERY. Mr. Chairman, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from Mississippi.

Mr. MONTGOMERY. Mr. Chairman, I rise in support of the bill, and I rise in support of the amendment. In fact, I have two amendments at the desk that are identical, and certainly I will not offer these amendments. But I would like to commend the chairman of the subcommittee and also the gentleman from Alabama (Mr. EDWARDS), plus the subcommittee and the full Committee on Appropriations for their work on the National Guard and Reserve. You have done an excellent job. This amendment gives us additional full-time manning technicians for the National Guard and Reserve. A number of additional missions, responsibilities, and better equipment has been turned over to the Guard and the Reserve. These technicians are needed to move the Army Guard and Army Reserve more toward readiness which is the bottom line for being prepared. Thanks to this House of Representatives, we have insisted that the regular military give better equipment to the National Guard and Reserve, give them incentives and give them missions, and they can do the job. This is an excellent amendment, and I certainly commend the gentleman for giving us the opportunity on this amendment. The Guard and the Reserve are ready and anxious to do their part in defense of this country.

Mr. ADDABBO. I thank the gentleman for his remarks.

Mr. EDWARDS of Alabama. Mr. Chairman, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from Alabama.

Mr. EDWARDS of Alabama. Mr. Chairman, I commend the gentleman for his amendment. Our side fully supports the amendment and urges its passage.

Mr. BAILEY of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from Pennsylvania.

Mr. BAILEY of Pennsylvania. I thank the gentleman for yielding.

Mr. Chairman, I also want to commend the gentleman from New York (Mr. ADDABBO) and recommend to my fellow Members of the House that the gentleman's amendment be accepted. It is an excellent idea.

Mr. DICKS. Mr. Chairman, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from Washington.

Mr. DICKS. There is some concern that this would somehow affect the direction the committee has given the Defense Department on the question of the civilian technician program. I just wanted to clarify that that is not the intention of the committee.

Mr. ADDABBO. This in no way affects our decision on the technician conversion part of the bill.

Mr. DICKS. I thank the gentleman for clarifying that.

The CHAIRMAN. The question is on the amendments offered by the gentleman from New York (Mr. ADDABBO).

The amendments were agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk concluded reading title II and proceeded to read title III.

Mr. ADDABBO (during the reading). Mr. Chairman, I ask unanimous consent that title III be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN. Are there any amendments to title III? If not, the Clerk will read.

The Clerk proceeded to read title IV.

Mr. ADDABBO (during the reading). Mr. Chairman, I ask unanimous consent that title IV be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. SOLOMON. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

The Clerk will read.

The Clerk continued to read title IV.

Mr. STRATTON. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would appreciate the attention of the chairman of the subcommittee for a brief colloquy.

Mr. Chairman, we on the House Armed Services Committee have noted that H.R. 7355 appropriates certain sums for items which appear not to have been authorized in the conference report on the fiscal 1983 Defense Authorization Act.

In most cases, these items are relatively minor, in terms of cost, but as the chairman is well aware, the law requires that no funds may be expended by the Department of Defense without a prior authorization.

I am well aware that some of these items appear to have resulted from oversights on the part of the authorizing committees, such as the failure, for example, to provide funds for the operation of an independent inspector general in the Department of Defense, or the success of the E2-C Navy aircraft, for example, in dealing with the drug traffic off the coast of Florida, where it had been originally assumed that ships and not aircraft would bear the brunt of the task, as the gentleman from New York (Mr. ZEFERETTI) observed a moment ago.

□ 1550

In order to bring these minor deviations into line with the provisions of the law, could the chairman of the Defense Appropriations Subcommittee assure us that before these sums could be expended or obligated, there should be a prior authorization in the form of a reprograming action such as was done a year ago? And also, I would like to ask the chairman of the subcommittee if he would be willing to establish closer liaison between the staff of his subcommittee and the staff of the House Armed Services Committee in an effort to avoid a recurrence of these items in the future.

Mr. ADDABBO. Mr. Chairman, will the gentleman yield?

Mr. STRATTON. I yield to the gentleman from New York.

Mr. ADDABBO. I thank the gentleman for yielding.

I do not agree the House Appropriations Committee violated funding levels in the Authorization Act in a number of instances. As far as I can determine, we are below all funding levels established in the Authorization Act except for a minor amount in aircraft procurement, Air Force. I will agreee with the gentleman from New York that certain sums for items which are relatively minor in terms of costs differ in a few instances with the allowances contained in the report language for each bill.

As we both know, the Comptroller General has held that report language does not carry the impact of law. I have made every effort to avoid such conflicts between the two committees during our markup.

As the gentleman has stated, we are talking about relatively minor sums and instances. I will assure the gentleman from New York that I shall establish closer liaison between our two staffs in order to avoid such problems in the future.

Mr. STRATTON. I thank the gentleman for his response.

Mr. ADDABBO (during the reading). Mr. Chairman, I ask unanimous consent that title IV be considered as

read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. SOLOMON. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. SOLOMON. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

□ 1610

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

Mr. ADDABBO. Mr. Chairman, I ask unanimous consent that title IV be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. PARRIS. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

The Clerk will read.

The Clerk read as follows:

AIRCRAFT PROCUREMENT, NAVY

For construction, procurement, production, modification, and modernization of aircraft, equipment including ordnance, spare parts, and accessories therefor; specialized equipment; expansion of public and private plants, including the land necessary therefor, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title as required by section 355, Revised Statutes, as amended; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; $10,616,546,000, of which $267,800,000 shall be available only for purchase of C-2 aircraft under a multiyear contract, to remain available for obligation until September 30, 1985: *Provided,* That none of the funds appropriated or made available pursuant to this paragraph for the F/A-18 aircraft program may be obligated or expended until the Secretary of the Navy submits to the Committees on Appropriations of the House of Representatives and the Senate a certified plan to incorporate a United States manufactured ejection seat system in F/A-18 aircraft purchased with fiscal year 1983 and future funds: *Provided further,* That none of the funds appropriated or made available pursuant to this paragraph for F/A-18 advance procurement may be obligated or expended for any of those aircraft scheduled to replace Navy attack mission aircraft squadrons until such time as the Secretary of Defense certifies, in writing, that the A-18 version of the aircraft meets the originally established attack mission requirements, goals, and specifications.

AMENDMENT OFFERED BY MR. VENTO

Mr. VENTO. Mr. Chairman, I offer an amendment to title IV.

The Clerk read as follows:

Amendment offered by Mr. VENTO: Page 19, line 7, strike "$10,616,546,000" and insert in lieu thereof "10,368,346,000".

Mr. VENTO. Mr. Chairman, my amendment is a very significant amendment in that it deletes the long-lead funding for the F/A-18 with the intent that the production of the aircraft will be terminated after completing the 1983 procurement.

Of course, this action will terminate production at 242 aircraft, sufficient to equip the Marine fighter squadrons.

Mr. Chairman, at this time I yield such time as he may consume to the distinguished chairman of the Subcommittee on Defense of the Committee on Appropriations, the gentleman from New York (Mr. ADDABBO).

Mr. ADDABBO. Mr. Chairman, I again ask unanimous consent that the balance of title IV be considered as read and open for amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. ADDABBO. Mr. Chairman, I thank the gentleman from Minnesota for yielding to me.

Mr. VENTO. Mr. Chairman, the F/A-18 is one of our largest weapons programs. It is twice the size of the B-1 program, and $14 billion more than the MX. In terms of dollars to be spent, there are $32 billion in this program. It is the largest program in the entire U.S. Government.

The F/A-18 was supposed to be a modest program originally costing approximately $13 billion. Now the cost of the program is closer to $40 billion, $39.7 billion. Despite the huge expenditure of money, the F/A 18 is a failure as a Navy attack aircraft. Both the Navy's own test pilots on November 4 and the Appropriations Committee's own survey and investigation staff on November 29, reached the same conclusion. In the words of the latter the findings of the operation evaluation validates the investigative staff report dated October 27, which concluded that the F/A-18 would denigrate the combat capability of the Navy.

Most of the deficiencies of the F/A-18 could be cured with time and money, but they cannot cure the totally inadequate range problem. The operation and evaluation test pilots reported that a realistic scenario and radius of the weapon was in the 250 nautical mile area, far below the Navy requirements of 550 nautical miles.

In less demanding scenarios, they were able to crank up a radius of 440 nautical miles, still over 100 miles short of the Navy requirement.

These tests, I have learned, were repeated this last weekend because there was some concern that the initial tests conducted were somehow biased against the F/A-18. What were the results?

On the first day, a plane came back to Patuxent Air Base with the warning lights flashing as regards fuel. On the second day, the plane had to make an emergency landing 220 nautical miles short of where it was supposed to land at Patuxent.

In short, the F/A-18 has flunked the test again. I would remind my colleagues that there is seldom an emergency airfield 230 miles from an aircraft carrier. The fact of the matter is, the range of this plane is going to move our carriers into positions where they are going to be much more vulnerable.

We have tried and tried, after 8 years of deciding, to go with this aircraft. We have about 40 of them, 40 fighters on line and ready to be used. None of them have been assigned yet, but they are on line.

A similar program, the F-15/F-16 program has nearly 700 fighters on line, serving in various modes.

I submit to my colleagues, the largest single appropriation measure that we have in terms of the defense budget is this procurement. 1,377 of these planes are supposed to be approved. Yet, 8 years after it has been approved, we simply do not have an attack version.

Are we ready to give up about half the carrying capacity, for instance, that might be attributed to the A-7 or the A-6 which might take the place of this plane in terms of what it can deliver, what it can lift? Are we ready to give up, in terms of the fighter version, as we have already given up a much less capable fighter for the type of dual role?

I think the dual-role concept in this instance has been tried, evaluated, and failed. This is one of the few instances where we can vote to save, on this particular amendment, a quarter of a billion dollars and not give up any fighting capacity.

This plane was situated in the first place because it was supposed to be that we were going to go with small-deck carriers. We have large-deck carriers today. We are going to be pushing more capable planes off the deck in order to enhance the use of the F/A-18.

For instance, some have suggested that the A-6 could serve as tankers. Is it not ironic that the plane we are dealing with in this particular in-

stance, a more capable plane, is going to serve as a tanker for a less capable plane to enhance its range?

Yet, they are talking about an addition of tanks to the plane, wing tanks, conformal tanks, doing other things, stretching out the body of the plane in order to achieve its goal.

I think, Members of this body, that we would do well to revisit this program and eliminate the attack version of this plane, to finish out the buy and to supply the Marine Corps with the fighter that they need. Maybe they do not desire it, but we built them and that is where they are probably going to be used.

We could reduce the total number of planes that we have. The Navy has a large number of planes.

What happens when we buy planes like this that are less capable is that we do not have the ability.

The CHAIRMAN. The time of the gentleman from Minnesota (Mr. VENTO) has expired.

(By unanimous consent, Mr. VENTO was allowed to proceed for 2 additional minutes.)

The question is: Are we going to buy more capable planes at more economic numbers such as the F-14 or the A-6's, or are we going to continue with the plane that has proven time and time again to be much more expensive?

The initial F-18 and F/A-18 were supposed to be a low-cost, low-option plane. What happened with it? Today the cost of this particular plane is as much as the F-14. If purchased in economical numbers, the F/A-18 costs 50 percent more than the A-6, which is more capable.

So we are on a large-deck carrier basis at this time. It cannot be explained away with only inflation. It cannot be explained away. A program that was supposed to cost less than $15 billion now is up to $40 billion. Assuming a doubling of the inflation rate in these 8 years, it would only bring us up to $30 billion. I submit to you.

□ 1620

So, the rest has been in terms of cost growth, in terms of adding different things to the plane, trying to make it do what it is incapable of doing. It is time for this body to take a stand. Here is a way that we can save a quarter of a billion dollars and not reduce any capability in terms of our Navy; provide them with more planes, provide them with a plane adequate to do the job it is expected to do. So, I appeal to my friends, Members of this body, to vote up this amendment.

I want to commend the committee for the work they have done in terms of certification, but I think the best certification is for them to come back to this Congress with a product that delivers; not a reduction in terms of specification which they have done historically with this plane, but to come back before this Congress, this deliberative body, and deliver a message. We can deliver that message by making them come back before us to deal with this particular product, an adequate product that is not going to cause us a lot of problems down the road.

We do not need this particular plane. I would hope that we would be able to take action in this body to demonstrate our fiscal conservatism in action, and not just in words.

The CHAIRMAN. During the time of the gentleman from Minnesota, consent was granted to waive the reading of the remainder of title IV.

Are there any points of order against the remainder of title IV, beginning on page 20, line 1?

The Chair hears none.

Mr. BENNETT. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, yesterday the Secretary of the Navy came to my office and urged that I oppose this amendment. Today, the CNO called me and urged me to oppose this amendment.

Simplistically stated, this plane is a bargain, not a turkey. It is a plane which will do most of the things it was designed to do. It costs more money than they had planned to have it cost, but it is still a good plane. Furthermore, it makes viable some of our carriers which are not big carriers. We do have some which are not big carriers, and this plane can be used both as a bomber and an attack plane.

It is true that it does not go as far as they would like to have it go. It is not perfect. It did not live up to all the things they wanted it to do. It is also true that the other planes which are competitive have had things added, and that caused those planes to go up in cost and this caused this plane to go up in cost, too, because technological advantages are desired to be put on all the planes.

So, all these planes are better planes than originally was contemplated. They do cost more money partly because of that.

But, the bottom line is that this plane is a cost-effective plane. It does a good job both as an attack plane and as a bomber, and it will fit some kinds of carriers which cannot take the other types of planes. So, it makes viable these expensive smaller carriers, makes them viable in the context we will have ahead of us and we will, therefore, have a greater carrier fleet.

I repeat, the Secretary of the Navy came to see me yesterday and spent almost an hour with me. The CNO called me from a distant city and urged me to take the well today to speak on behalf of the need for the FA-18. The Navy obviously greatly desires this plane as a sound buy for our defense needs.

Mr. MAVROULES. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I rise in opposition to the gentleman from Minnesota's amendment. In our zeal to cut back defense spending, it is incumbent upon us not to throw the baby out with the bath water.

The F/A-18 is just such a program, one that the Navy deems necessary in order to perform its mission effectively and economically.

There has been a lot of misinformation swirling around the hill with respect to the F/A-18.

Let us set a few things straight. The Secretary of the Navy remains steadfastly behind the F/A-18 program, calling the Hornet "a superb aircraft." He would ask you to consider the recent operational evaluation of the Hornet, about which there is a lot of confusion, in a proper context.

And I join him in making this request. Consider, for instance, other operational evaluations of other aircraft—The F-4, the A-6, the F-14, the F-15, or the F-16. All of these aircraft have had problems identified through this process, and subsequently corrected.

I submit to you that the F/A-18 is ahead of each of these other aircraft at a similar point of development or production, a fact to which Secretary Lehman will attest.

"We got what we paid for," he recently said.

A multimission combat aircraft, the Hornet is the only Navy aircraft that can shift from fighter to interceptor to attack roles, as the situation warrants. It has the high performance required to survive in target areas.

Its highly accurate weapons delivery capability means the pilot can do his job on one pass against highly defended targets.

Also, the Hornet has far higher reliability and lower maintenance requirements than any other aircraft in the Navy's inventory. That means, simply, that more of them will be available to fight in time of need than any other mix of carrier-based aircraft.

Mr. Chairman, thus far three of our allies have, after exhaustive tests of the most advanced aircraft in the world, chosen the F/A-18 as the primary tactical aircraft to meet their nation's defense requirements. But there are other reasons to vote against the Vento amendment and for the F/A-18.

The language in the appropriations bill addresses some of the gentleman's chief concerns but with none of the liabilities that would attend the gentleman's amendment.

The bill, as it now stands, recognizes the F/A-18's outstanding capabilities while, at the same time, recognizing that kinks still remain in the program that have to be ironed out.

In its infinite wisdom, the committee has in effect fenced off the $248.2 million appropriated until such time as the Defense Department can certify that the F/A-18 has met its attack mission requirements—a requirement that we have every confidence the F/A-18 will meet.

Mr. Chairman, I support the language now in the bill and would urge my colleagues to do the same.

The Vento amendment is simply not necessary at this time.

Mr. YOUNG of Florida. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, as we discuss aircraft programs, oftentimes we are constrained to ask ourselves why we do not build a multirole aircraft. Why do we have to have one airplane for this job, another airplane for that job, and another airplane for something else? The jobs, the roles, the missions are somewhat different.

This is an honest attempt to have a multirole aircraft; one that can be a fighter, one that can be an interceptor, one that can be an attack bomber, without too much difficulty in changing from one mode to the other.

The FA-18 does this job very well. The previous speaker made the comment about serious development problems in one aircraft. Most of our colleagues will recall the troubles the F-14 had during development, the tremendous cost overruns, the attempts to close down the F-14 line. Members today will tell you that the F-14 is one of the finest pieces of aircraft equipment that has ever been made. Certainly, the Libyans in the Gulf of Sidra found that out very rapidly when they encountered two of them there.

The FA-18 is attempting to be a multi-role aircraft. We recognize—as the subcommittee, we recognize the problem. I want to call the attention of our Members to the language in the bill that has been referred to on several occasions. We have taken into account that there are some development problems. On page 19 of the bill Members will find language that says:

. . . none of the funds appropriated or made available pursuant to this paragraph F/A-18 advance procurement may be obligated or expended for any of those aircraft scheduled to replace Navy attack mission aircraft squadrons until such time as the Secretary of Defense certifies, in writing, that the A-18 version of the aircraft meets the originally established attack mission requirements, goals, and specifications.

So, I think we have taken care of the problem that our distinguished colleague from Minnesota is attempting to call to our attention here, and I hope that we will just go ahead and provide the long leadtime funding for the FA-18. Let us defeat this amendment and keep that viable aircraft program underway.

□ 1630

Mr. STRATTON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I take part in this debate simply because the gentleman from Minnesota made many of these same arguments several months ago when the authorization bill was on the floor. The gentleman is very persistent. He has been an opponent of the F-18 for years, and obviously he is continuing that battle.

I suppose the reason for it is that in the last few months there have been a couple of newspaper reports that some of our Navy pilots who like to fly fighters did not think that the F/A-18 responded the way a fighter should. Of course, the F/A-18 is a switch hitter. It not only bats right handed but it bats left handed. It not only runs but it also blocks in the line. And when we have an aircraft with twin capabilities, obviously it does not have as much capability in one particular aspect as does some aircraft designed strictly as a fighter.

I remember when the authorization bill was up, the gentleman from Minnesota pointed out it was much more expensive than the F-16, and he was comparing it just a moment ago again with the F-16. But the F-16 is, of course, strictly an interceptor, fighter aircraft. It does not have the complicated electronics devices, it does not have the carrying capability that the F-18 has, and that is because the F-18 is designed for different missions.

The fact of the matter is that we ought not to rest the decision on what a few disgruntled aircraft fighter pilots think. Secretary of the Navy Lehman has said, as the gentleman from Florida and the gentleman from Massachusetts pointed out a moment ago, that the F/A-18 is doing its job. It is a good airplane, and it is doing the job the Navy wanted it to do. It costs just about two-thirds of what an F-14 costs and certainly, with the need for additional aircraft, this is the very kind of aircraft we need to meet not only the goals of the Navy but also the goals of the Marine Corps.

Mr. VENTO. Mr. Chairman, will the gentleman yield?

Mr. STRATTON. I am glad to yield to the gentleman from Minnesota.

Mr. VENTO. Mr. Chairman, the gentleman made a statement with respect to the cost. He said the cost was two-thirds of that of an F-14. To what cost is the gentleman referring? Is that the flyaway cost?

Mr. STRATTON. Mr. Chairman, I do not have the exact figures, but this is the statement of the Secretary of the Navy. The fact is that it is not as expensive as the first line fighter aircraft, and it is not intended to be. The F-14 is something on the order of $30 million, so the F-18 would apparently be somewhere around $20 million.

Mr. VENTO. Mr. Chairman, if the gentleman will yield, the information I have is that with the proper production levels, if they can be considered, the cost is only slightly higher. This is supposed, of course, to have been a much lower cost plane and a much lower cost program. Today it has soared to $40 billion, and that is admitted by everyone.

If the gentleman will continue to yield further, a little while back, when we made these arguments, it was argued that these figures were plucked out of the air someplace, but they were not. They were plucked out of the facts that have existed for some time.

Mr. STRATTON. Mr. Chairman, let me reclaim my time.

The fact that there has been a cost growth has been simply because the Navy liked the plane so much that it was loading more and more of its responsibilities on the F-18. The original idea was back in the days when the Air Force became enchanted with the F-16 and the Navy, therefore, wanted something like the F-16 but they wanted a Navy version, so they went to the F-18 and what was then conceived as a fighter in those days, as I recall. But they recognized it also had a capability as an attack plane.

The Marine Corps, for example, has used it as an attack plane, and that is why the cost has grown.

The CHAIRMAN. The time of the gentleman from New York (Mr. STRATTON) has expired.

Mr. VENTO. Mr. Chairman, I ask unanimous consent that the gentleman from New York (Mr. STRATTON) be allowed to proceed for 2 additional minutes.

The CHAIRMAN. The Chair will inquire does the gentleman from New York (Mr. STRATTON) seek additional time?

Mr. STRATTON. No, I do not seek further time, Mr. Chairman.

Mr. EMERSON. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, first, I wish to associate myself with the remarks of the gentleman from Florida (Mr. YOUNG).

Mr. RUDD. Mr. Chairman, will the gentleman yield?

Mr. EMERSON. I yield to the gentleman from Arizona.

Mr. RUDD. Mr. Chairman, I would like to say that I have flown this aircraft and I know what the Navy thinks of it. I just came back from a trip to Spain, where I talked to the Spanish Government and the fighter pilots who fly that plane and are looking forward to receiving that plane.

Mr. Chairman, I rise in opposition to the amendment to delete funding for the F-18. We will hear several assertions today on the cost and perform-

ance of this airplane, and as one who has flown this plane, I would like to make a few observations regarding its performance and its role in fleet air defense and power projection.

The critics claim that the F-18, which already has been flown some 6,200 hours by Navy and Marine Corps pilots, has failed crucial tests and experienced exorbitant cost growth. The crucial tests referred to are a series of tests conducted by the Navy called the OpeVal or mission operations evaluation. As with any developing weapon system, there will be problems. However, the most crucial problem cited by critics of the F-18 is the so-called failure to meet the mission range requirements set by the Navy. What the critics do not tell you is that the OpeVal test conditions did not meet the test assumptions the contractor was supposed to meet. Furthermore, the Navy itself is continuing evaluation for that very reason. Some of the test conditions which were different from the assumptions in aircraft specifications included: Smaller than specified auxiliary fuel tank: Failure to release fuel tank after emptying, causing drag and higher fuel consumption: Carrying less fuel than was optimal, and evaluating the performance in weather conditions that were not part of the assumed test variables. In short, the OpeVal planned to test an airplane under conditions that changed after the airplane was built.

Aside from this particular part of the test results, the critics somehow forget to mention the positive comments that were also part of the operations evaluation. What the Navy was seeking in the construction of the F-18 was an aircraft with flexibility: For use as fighter, interceptor, or attack aircraft: High performance in the target area; accurate weapons delivery; and reliability and low maintenance. The operations evaluation test confirmed these characteristics. The test concluded that the F-18, with better load and speed capability than the current fleet aircraft, was a superior performance aircraft: That it had the flexibility needed in fleet operations and excellent reliability. In most cases, the F-18 exceeded substantially program standards: Operational availability was 74 percent instead of the 68 percent required; reliability was 83 percent instead of the 70 percent required; operational reliability was 73 percent instead of the 60 percent required. Furthermore, in the attack mode, the F-18 with the same bomb load, has greater speed, acceleration, and significantly more maneuverability than either of its two possible alternatives. Clearly, the operational evaluation for the F-18 was not the "disaster" as some critics would have us believe.

On the issue of cost, one must also look beyond the simple fact of the growth of costs. Two-thirds of the cost growth are due to unanticipated inflation. However, the flyaway cost for the F-18, between $24-$24 million, is lower than the flyaway cost of either of the two planes talked about as substitutes. The A-6E or A-7 and the F-14.

In addition, the improved reliability of the F-18 significantly reduces its life-cycle cost, thus making it even more attractive than its possible alternatives. Finally, the F-18 has proved to be a solid competitor in the foreign sales market: Beating the F-16 in three major competitions and receiving orders of 137 planes from Canada, 75 to Australia, and 84 to Spain. Having talked to several members of the Spanish Air Force, I know that they are very excited about this aircraft and are watching with no little concern over what we do today.

What we have today is a reliable, flexible, and quality aircraft. It is being attacked, I suspect, because its procurement is one of the bigger ticket items in the defense budget, and not for any concrete performance deficiency. Deletion of the forward funding for the continuation of the Navy's planned acquisition of the 1,336 of these aircraft would put us in the position of having to spend more money on its alternatives; alternatives which cannot match the performance envelope of the F-18: And it would be a step backward. The F-18, simply put, is less expensive, better performing, more flexible, and more reliable than any of its alternatives. Deletion of the forward funding for this aircraft would only escalate the cost of the program: delay the introduction of this superior plane into the fleet and make this body come back a year from now to try to undo what has been done. I urge my colleagues to support the F-18 program and oppose any attempt to reduce or eliminate forward procurement for this aircraft.

Mr. EMERSON. Mr. Chairman, I rise in opposition to the amendment. I wish to associate myself with the thorough and eloquent remarks of the gentleman from Florida, (Mr. YOUNG). He has said it all and has made the case for the F-18.

● Mr. YOUNG of Missouri. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Minnesota.

As we debate this amendment, I think several points need to be brought out for the Members so that they can better understand this highly technological aircraft.

You will hear from the opponents of the F/A-18 Hornet that it is a too costly aircraft and can be replaced with a better alternative. However, the facts tell a different story. The costs of purchasing each F/A-18 have been decreasing and are expected to continue decreasing as the program matures and larger numbers of aircraft are produced annually. The 63 Hornets funded for fiscal year 1982, when inflation is taken into account, will have a significantly lower unit cost than F/A-18's funded in fiscal year 1981.

Second, the F/A-18 is far less espensive than the F-14, which is also being purchased by the U.S. Navy. In recent action, Congress authorized fiscal 1983 unit flyaway costs requested by the Navy for the F/A-18 of $25.1 million. This compared to $38 million for the F-14. Also, the Hornet is comparable in cost with the slower, less maneuverable, less survivable A-6.

While we are all concerned about the cost of our weapons systems, negotiations have taken place to control the cost of the F/A-18. In October, Navy Secretary John Lehaman and the plane's prime contractor agreed on a $22.5 million price tag per plane for the first 63 aircraft. This is a major decision by both parties to make a concerted effort to control the costs of the Hornet.

Critics have charged that a mix of A-6's and F-14's would be preferable to the Navy's current plan, which includes the F/A-18, due to their lower cost and improved capabilities. This is not the case. If you compare these alternative plans with our current mix of two squadrons of F/A-18's, two squadrons of F-14's, and one squadron of A-6's, you can easily see that it would reduce the Department's fighter and attack capabilities. It would also increase defense costs by an additional $10 to $16 billion over a 15-year life cycle period. There is no question that alternatives to the F/A-18 are less attractive and would be a step backward for the Navy.

We must also consider the impact this amendment would have on our allies. Mr. Chairman, thus far three allies of the United States have, after exhaustive studies of the most advanced aircraft in the world, chosen the F/A-18 aircraft as the primary tactical aircraft for their nation's future. Selection of the F/A-18 by Canada, Australia, and Spain demonstrates the extent to which these countries have bet their future survival on the performance of the F/A-18.

These countries chose the F/A-18 because of its capability, reliability, and maintainability, and state-of-the-art technology. Recently, Canadian pilots began training in the CF-18—a version of the F/A-18—and the first week of operations exceeded even their most optimistic predictions. Following is a part of the text from the commander of Canada's first CF-18 squadron, "this has been a great week for the 410 squardron and the new Air Force. We have an absolute winner on our hands and look forward to fully exploiting amazing potential of CF-18 in weeks and months ahead."

Mr. Chairman, recently a great deal of misinformation has been reported by the opponents of the Hornet from the Navy's operation and evaluation test (OpeVal) of the F/A-18. I would like to clear the air and present all the facts about this test. The OpeVal strike mission was, at best, questionably run. The specifications for the strike mission called for a standard day mission; the test was flown on a hot day. Also, the specifications called for carrier operations; the Hornet flew off a runway.

Another criticism of the Hornet by the operations and evaluation test was its range. The OpeVal used three 315-gallon auxiliary fuel tanks which were retained for reasons of economy. In wartime, such tanks would be jettisoned once their fuel was consumed, in order to reduce drag and improve range. The F/A-18's currently coming off the production line have three 330-gallon tanks. Regarding internal fuel, the Hornet that was tested had 10,400 pounds of fuel. This can be compared with 10,860 pounds of fuel that the F/A-18 currently carries. The combat radius deficiencies reported by the opponents are really not deficiencies at all, but only reflections of the equipment the OpeVal aircraft carried and the way they were flown. When the Hornet is flown to the requirements specified, you will see that it not only meets but exceeds its expectations.

Mr. Chairman, I would also like to refresh everyone's memory of the actions the House took last year in support of the F/A-18. By a vote of 101-316, the House defeated a similar amendment offered by the gentleman from Minnesota to terminate this program. The House spoke last year in support of the F/A-18 and I believe it should continue to support the Hornet.●

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota (Mr. VENTO).

The amendment was rejected.

AMENDMENT OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Chairman, I offer an amendment.

The portion of title IV to which the amendment relates as follows:

MISSILE PROCUREMENT, AIR FORCE

(INCLUDING TRANSFER OF FUNDS)

For construction, procurement, and modification of missiles, spacecraft, rockets, and related equipment, including spare parts and accessories therefor, ground handling equipment, and training devices; expansion of public and private plants, Government-owned equipment and installation thereof in such plants, erection of structures, and acquisition of land without regard to section 9774 of title 10, United States Code, for the foregoing purposes, and such lands and interests therein, may be acquired and construction prosecuted thereon prior to the approval of title as required by section 355, Revised Statutes, as amended; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes including rents and transportation of things; $5,669,700,000, of which $988,000,000 may not be obligated or expended for procurement of five MX missiles until March 15, 1983, following the presentation of a written timetable to the Congress by the Secretary of Defense on March 1, 1983, containing a monthly production and delivery schedule for the MX program including lead times for missiles and silos, the planned operational test and aging/surveillance schedule, and insuring that no missiles will be produced under a schedule that would require their temporary storage prior to the completion of their permanent basing silos, and in addition, $15,000,000 shall be derived by transfer from "Missile Procurement, Air Force, 1982/1984", to remain available for obligation until September 30, 1985.

The Clerk read as follows:

Amendment offered by Mr. ADDABBO: On page 26 of the bill, line 12, strike out "$5,669,700,000" and all that follows down to and including "silos," on line 22 and insert in lieu thereof "$4,681,700,000,".

The CHAIRMAN. The gentleman from New York (Mr. ADDABBO) is recognized for 5 minutes in support of his amendment.

Mr. ADDABBO. Mr. Chairman, I ask unanimous consent that all debate on this amendment and all amendments thereto not exceed 90 minutes, the time to be equally divided and controlled between myself and the gentleman from Alabama (Mr. EDWARDS).

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN. The gentleman from Alabama (Mr. EDWARDS) will have under his control 45 minutes, and the gentleman from New York (Mr. ADDABBO) will have under his control 45 minutes.

The Chair recognizes the gentleman from New York (Mr. ADDABBO).

Mr. ADDABBO. Mr. Chairman, I yield myself 4 minutes.

Mr. Chairman, this is the first MX amendment.

This amendment cuts out $988 million for production. There is in the bill $1.7 billion for research and development of the MX missile. There is in this bill $775 million for research and development on the basing modes.

I make that point because I ask, how can we in all good conscience tell the American people that we are going to give the Air Force almost $1 billion for something on which they need almost twice as much money to still do research and development? That is $1.7 billion in research and development for the MX missile. How can we, facing a possible $200 billion deficit this year, tell the American people that we are going to give the Air Force nearly $1 billion to procure five missiles when they still need over $1 billion to design the basing mode for the missile?

We have been told that the so-called Dense Pack for the MX will be located at Warren Air Force Base in Wyoming, but we were not told that the land for the silos is not Federal property. The land still must be bought, and there must be environmental impact statements made. At least 1 year or more will be required before we even have an approved site.

So how can we, in this time of high deficits, waste money by giving the Air Force a blank check to buy missiles for which they do not have a home? They do not yet know how they are going to deploy the missile. Is this a bargaining chip? This is too expensive a bargaining chip. If we wish to have a bargaining chip, we have the money in research and development, the $1.7 billion for research and development for the missile, and $775 million for research and development on the basing modes. This is too expensive a bargaining chip.

The missiles would take only about 2 years to produce. But they would have no home; they would be stored in a warehouse. Is that a bargaining chip?

The Arms Control Director for President Nixon and the Arms Control Director for President Carter have both written and stated that there can be no bargaining chip with this missile. This is a complete waste.

Mr. Chairman, if my amendment is not accepted, all we will be doing is giving the Air Force a blank check and add to the $124.3 billion of unexpended balances that the Defense Department has at the present time. We cannot afford it. This is a complete waste, and I ask support for my amendment.

I offer the following additional points with respect to the MX production request.

AMENDMENT ON MX PROCUREMENT FUNDS

Production of MX missiles is premature.

This amendment defers production.

It strikes fiscal year 1983 procurement funds.

This amendment does not kill the program.

Deferral of production is necessary.

Program schedules are in conflict.

At earliest, first Dense Pack silos would be ready in 4 years, in December 1986.

This 1986 date is highly optimistic.

Building missiles themselves will take only about 24 months.

If we start building missiles now, with fiscal year 1983 money, they will be ready 2 years before we have a place to put them.

It makes no sense to build homeless missiles that will then be stored in a warehouse.

Earliest possible need for missile production funds is next year, in fiscal year 1984.

In addition, other problems make MX schedule unrealistic.

First test flight will probably be slipped from January to late February or March.

Second stage motor, which exploded in a recent test, requires design changes.

Most of land required for Dense Pack is private or State owned. Acquiring land will take time.

By current law, specific design of Dense Pack cannot begin until after all National Environmental Policy Act requirements have been met.

These problems mean both missile production and silo construction dates will slip.

These problems make fiscal year 1983 production funds even more premature.

This amendment should be adopted even if Dense Pack had no problems. But there are many problems with Dense Pack.

Townes Panel report says the concept is still being developed, and cost, time and effectiveness estimates are not firm.

Dr. Townes wrote to Secretary Weinberger, according to the press:

Soviets may be able to attack Dense Pact effectively almost as soon as it is fully deployed.

Superhardening of silos may not be possible.

Many U.S. experts say Dense Pack violates SALT II.

Dense Pack will require a ballistic missile defense.

Probable abrogation of 1972 ABM treaty.

Added billions in cost.

These problems mean Congress should slow the program down.

Advocates will tell us not to slow down, because we need MX as a "bargaining chip".

What kind of "bargaining chip" is a missile we have no place to put?

What kind of "bargaining chip" is a Dense Pack that Pentagon's handpicked experts say can be easily countered?

What kind of "bargaining chip" is a system that leads to abrogating the only meaningful arms control agreement we have with the Soviets?

How can we afford a $35 billion "bargaining chip" with deficits of $200 billion, and a 10.8-percent unemployment rate?

Advocates will say deferral is a "siren song," luring us to further delay.

The lure is voting money for a Dense Pack which Congress has yet to carefully examine.

The lure is voting money for a Dense Pack which experts say may be easily countered.

The true siren song here is "just a few billions more."

This amendment makes simple commonsense.

Even MX advocates must agree the missile and silo schedules are out of step.

It is not reasonable to build missiles in advance of having a place to put them.

A "yes" vote avoids building homeless missiles, and gives Congress time for careful consideration of Dense Pack.

□ 1640

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 5 minutes to the gentleman from Alabama (Mr. DICKINSON).

Mr. DICKINSON. Mr. Chairman, I think we are probably overlooking the main think involved here. What we are looking at is not whether or not we need a missile system, because I think most of us agree that we do.

I think most of us are not aware of the fact, though, that the way the bill is written, without the Addabbo amendment, we are fencing the money. We are saying they are going ahead until March 15 and requiring of the Department of Defense to furnish full details on basing mode and everything else. So we will have a chance to look at what it is.

So if you vote today to keep the money in, to go forward with the research, development, long lead procurement, you are not committing to a basing mode.

Let me emphasize this. You are not committing to a basing mode, whether it be in the shape of a triangle, or long and narrow, or whether it is close spacing. We are not committing today to keep the money in here for any particular basing mode.

I think one thing that has escaped notice and it is unfortunate that it comes up in this timeframe because enough people have not had an opportunity to be briefed and be told what is involved, but the MX is not something that is isolated and set aside and has nothing to do with the rest of our strategic defense and deterrence. Our committee just returned, for instance, from Europe where we met with the North Atlantic Assembly, our counterparts in NATO. I am speaking now of the Armed Services Committee and not the Appropriations Committee. We went from there to Germany where we met with the Defense Minister of Germany and with the Foreign Minister of Germany.

They are very much concerned because, we have an agreement with our NATO allies that we will base the MX in the United States. This will ultimately take the place of Titan and Minuteman.

There will be an intertheater capability deployed inside of NATO. We are putting the GLCM, ground-launched cruise missile, in Great Britain, and the Pershing II will go into Germany. GLCM again will go to Italy. And this is all part of the whole.

If we send the signal that we are killing the MX missile, then these intermediate range weapons that we have an agreement on will not come about. The Pershing II is already in trouble, as you know. Money was taken out of the bill that we are debating today because we have had technical problems.

It was not for the political reasons, it was technical problems. But it is not being interpreted that way. The perception is not that with our allies in the NATO countries.

So they have agreed, as I said, to put GLCM in Great Britain, Pershing II in Germany, GLCM in Italy, if we go forward with our plan of putting the MX in the United States.

Now, if we take out the money and we say, and the perception will inevitably be that it is a political decision, not a technical decision, if we take out the money for the MX, whether it is for basing or whatever, then the perception is going to be, well, we are not living up to our part. We have already taken out the money for Pershing II and so the whole thing comes apart, the fabric becomes undone.

So let me urge my colleagues, do not take out the money at this point for the MX because it will be seen as undermining the entire agreement, and I am not exaggerating. I am telling you what the ministers of defense and the leading parliamentarians have told me.

Mr. CHAPPELL. Mr. Chairman, will the gentleman yield?

Mr. DICKINSON. I am very pleased to yield to the gentleman from Florida.

Mr. CHAPPELL. I would like to emphasize again with the gentleman the fact that there are no construction moneys in here for the basing of this missile.

Mr. DICKINSON. This is true.

Mr. CHAPPELL. All of the money in here has to do with the research and development.

Mr. DICKINSON. We are not committing to the basing mode.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. STRATTON).

Mr. STRATTON. Mr. Chairman, I do not know whether one can do justice to this complex subject in 2 minutes, but let me simply try to make a couple of points.

First of all, what we are doing with the MX is that we are trying to duplicate a capability which the Soviet Union has already achieved through the greater weight and yield of its missiles, and through an improved accuracy in recent years that is even beyond our own. They can now knock out some 90 percent of our land-based missile force with their missiles and still have plenty left over after that is done.

We have no comparable capability, and that is what is meant by the window of vulnerability which was not invented by Ronald Reagan, by the way. It was invented by the Carter administration, by Secretary Brown, and by Secretary Perry.

When one side has a capability that can knock out your primary deterrent force, and the other side does not have the same capability, that is a condition of grave instability.

The gentleman from Tennessee (Mr. GORE) who spoke here earlier under general debate, had an article in the Washington Post this morning and I commend him for it in which he said the nuclear freeze people were making a mistake to try to deny to the United States the achievement of the same kind of hard kill capability that the Soviets have against us.

Yet what we are trying to do with the MX is to remove this instability. If we refuse, with the Addabbo amendment, to duplicate this capability of the Soviet Union, then we are going to be in greater danger and we are going to increase rather than reduce the risk of war.

Most people who have been opposing the MX have come up here to excoriate Dense Pack. I am no lover of Dense Pack. I do not understand all of this fratricide and pindown and all of this other stuff. But what President Reagan has proposed is not the real Dense Pack. It is a "loose pack," 14 miles long and 1½ miles wide.

But the real point is that we ought to get on with producing the weapon itself, so as to demonstrate our desire to match this dangerous edge which the Soviets now hold over us.

Mr. ADDABBO. Mr. Chairman, I yield 4 minutes to the gentleman from Illinois (Mr. YATES).

Mr. YATES. Mr. Chairman, my friend, the gentleman from Alabama (Mr. EDWARDS), stated quite correctly during general debate that one would believe from the debate that the entire military budget consisted entirely of the MX missile program and that the MX missile program is a relatively small part of the entire military bill. That is true.

But is is also true that the MX program goes far beyond its relatively small place in the military budget. The MX has become a symbol, a symbol of the overcostliness of the Reagan military budget.

It has become a symbol of whether this Nation will stay the Reagan military course.

The MX missile has become a symbol of national protest to the continued buildup of the nuclear spiral.

It has become a symbol of all that is wrong with Reaganomics, of the overburdening of our national economy with the cost of paying for an uneconomic national program.

□ 1650

Every other national program is being held hostage to the military budget. And, Mr. Chairman, our national security does not depend only upon the number and upon the power of our weapons. It depends as well upon a strong, healthy, well educated, well trained, hard working American people.

That is why it is important that the amendment offered by the gentleman from New York (Mr. ADDABBO) be sustained. I shall support the amendment. I urge the House to do so as well.

Mr. ADDABBO. Mr. Chairman, I yield 4 minutes to the gentleman from California (Mr. DELLUMS).

Mr. JACOBS. Mr. Chairman, will the gentleman yield?

Mr. DELLUMS. I yield to the gentleman from Indiana.

Mr. JACOBS. Mr. Chairman, I regret that time is too limited in this debate for me to speak. But I am grateful for this opportunity to include my views in the RECORD.

As I sit here listening to the debate, I am amazed by the assertions of Soviet superiority in the military field.

On November 4, 1982, John Scali, a former Republican Federal official and now a correspondent for The ABC Television Network reported a CIA study of Soviet military strength. The CIA conclusions were published in April 1982. I have a copy of the study and this is what I heard Mr. Scali say about it on that November 4, ABC evening news program:

Here's what the report says about key Soviet arms. Missiles: Accuracy and stability of Soviet models are significantly behind all U.S. versions including the MX and those launched from submarines. Aircraft: Many Soviet planes are virtual copies of earlier U.S. models. The Soviets are seeking the newest data on engines in design of U.S. wide body jets to speed up the production of two new Soviet transports. Navy: The vast Soviet submarine fleet critically needs modern acoustic sensor technology to escape detection. Not only are their submarines vulnerable to detection the report says, but self-generated noises reduce their effectiveness significantly. Tactical battlefield weapons: The Soviet's latest tank, antitank and air defense weapons are faulty as demonstrated by Israeli successes against such systems in Lebanon.

The purpose of the report is to put everyone on guard against helping Moscow get hold of the latest Western industrial and defense secrets. But the information disclosed in this report might cause some in the new Congress to ask if we're so far ahead of the Russians militarily, do we need the multibillion dollar increase in defense spending that President Reagan insists is so vital?

JOHN SCALI,
ABC News,
WASHINGTON

Mr. Chairman, we spend a lot of money on the CIA for its intelligence. Now the question is whether we have the intelligence to understand that intelligence.

The missile gap of 1960 and the missile gap of 1982 were really intelligence gaps—of one kind or another. What a price we pay for ignorance.

Mr. DELLUMS. Mr. Chairman, I think that it is terribly important we debate the question of the MX missile in some comprehensive fashion. We talk about the missile and we say let us wait until we get a decision on the basing mode.

The President of the United States has indeed made a decision. So now it seems to me that we have a responsibility to address the reality of the entire system, whether or not we need it.

I believe that this world is in danger from the potential of a nuclear holocaust, in part because we are moving beyond deterrence to a war fighting capability, and the MX missile system is one such system that brings us closer to that brink of disaster. It is a system that is unnecessary, it is wasteful, it is expensive, it is dangerous.

To the missile itself; it is unnecessary for deterrence. It ushers in the potential of a new era of nuclear war fighting capability, and it certainly may bring us to the brink of disaster because it is a crisis destabilizing weapon system.

With respect to the basing mode, Mr. Chairman, we have rarely addressed the fact that there is no such animal as a survivable basing mode for the MX missile. A few months ago I gave you what I defined as a litany of lunacy that defined our efforts to bring about some kind of survivable basing mode, and let me read to the Members the list of 34 different efforts on the part of this country to bring about a survivable MX missile basing mode.

I would like my colleagues to understand how we get to Dense Pack. We started with a system called launch under attack. Then orbital based, shallow underwater missile, HYDRA, ORCA, ship-inland, ship-ocean, sea sitter, wide body jet, short takeoff and landing, vertical takeoff and landing, dirigible, midgetman, hard rock silo, hard tunnel, south side basing, sandy silo, commercial rail—that is interesting. Dedicated rail, off-road mobile, ground effect machine, euphemistically referred to as GEM, road mobile, road mobile—Minuteman—road mobile—new missile—covered trench, hybrid trench, dash to shelter—that means run like hell—mobile front end, pool, Minuteman/MPS, MX/MPS, continuous airborne aircraft, deep underground basing, ballistic missile defense, and now, Dense Pack.

Let us talk about it.

Dense Pack—speculative, unproven, clearly no panacea, it can be defeated by a variety of different scenarios.

As the gentleman said, we know very little about fratricide. A small number

of high yield weapons can defeat it. Underground solutions, pin-down, delayed sequential attack, a variety of different mechanisms.

Finally, it forces us to violate article 4 of our understandings with respect to the SALT II Treaty. It could make for the development of an ABM ballistic missile system that could cost us as much as $100 billion. it is in violation of the treaty that we are presently involved in unless we renegotiate those treaties.

So we come down to a missile that is not a mobile Minuteman 3. This is a system that produces a hard target time urgency low killer. This is a first strike counterforce weapon. It can and must be defeated.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 2 minutes to the gentleman from South Carolina (Mr. HARTNETT).

Mr. HARTNETT. Mr. Chairman, I thank the ranking minority member for yielding me this time.

There is nothing that I can add, Mr. Chairman, especially after hearing the more eloquent gentleman from California espouse his views in this vital part of our defense.

But I would say to my colleagues you have the greatest responsibility that you all have had in the last 2, 4, 8, 10 years maybe, to procure for this country and to produce the MX missile.

Probably a place that the Members might reflect upon that responsibility is right across the Potomac River here. It is called Arlington National Cemetery, if you want to go and look at the price those people paid.

We are all political prostitutes, I guess. We do what is necessary to get the votes. We do what is necessary to look good among our constituents.

I am telling the Members this. This is the greatest issue that is going to face this Congress in a long time. If we store them in barns in South Carolina and haylofts it makes little difference. If we do not have a state of the art missile, a state of the art defense system, we are going to have to have hundreds and hundreds of little Minuteman missiles and Pershing missiles and others.

If my colleagues want to give this country a true deterrent to nuclear war, to a nuclear holocaust, you give us the MX missile. If not, as surely as we made serious blunders before, we will now. And we will be promoting and condoning the possibility of a third global conflict without the deterrent factor of the MX missile.

Back a long time ago people like Patrick Henry, who were patriotic Americans, stood up in the court houses and the capitols in Williamsburg, Va., and said, "Give me liberty or give me death." And you are saying give my constituents green checks and do not give them any freedom at all—keep those Government checks coming. If we had a $200 billion surplus, there are few among us who would not vote for an MX.

The CHAIRMAN. The time of the gentleman from South Carolina (Mr. HARTNETT) has expired.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield an additional 30 seconds to the gentleman from South Carolina.

Mr. HARTNETT. Mr. Chairman, the choice is now between entitlement programs, social programs, and the protection of our freedoms. I challenge most of the Members on this side of the aisle to for once in your life do something politically courageous and not politically expedient and vote for the MX missile.

Mr. ADDABBO. Mr. Chairman, I yield myself 10 seconds.

I would ask the gentleman to remember that today is Pearl Harbor day. The concentration of so many naval vessels in that harbor was the 1941 equivalent of Dense Pack.

Mr. Chairman, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. COUGHLIN).

Mr. COUGHLIN. Mr. Chairman, I rise in support of the amendment to eliminate funds for the MX missile program. I do so as a former marine who is deeply committed to our national defense.

It should first be pointed out that the nearly $1 billion for MX procurement included in the defense appropriations bill is unnecessary in fiscal year 1983 since procurement will take only 2 years and the Dense Pack silos cannot be ready for them until 1986 at the earliest.

My concerns, however, run much deeper than the premature timing of this funding. I oppose the MX program for a combination of strategic and budgetary reasons. I am convinced that the MX is not needed to insure a credible U.S. nuclear deterrent and, at a time when budget deficit projections are in the $180 billion range, committing from $26 billion to $50 billion for a program that is not crucial to national security would be ruinously extravagant.

I do not take matters involving our national security lightly, Mr. Chairman.

I am concerned, however, that in our compulsion to match or outdo the Soviets in every aspect of nuclear weaponry, we have lost our perspective on nuclear strategic nuclear weapons have always been looked upon as a deterrent to war and not as an acceptable means of fighting or winning such a war since it would be difficult in any event to tell the winners from the losers in a nuclear exchange. Such weapons are a deterrent because they can inflict unacceptable damage on the Soviet Union or any other potential enemy.

The MX missile in the Dense Pack basing mode represents an extraordinarily grim, expensive, and arguably still vulnerable new generation of advanced land-based ICBM's. The critical question is: Without the MX, do we still maintain a credible nuclear deterrent that can inflict unacceptable damage upon an enemy? The answer seems clearly "Yes." If not, what are our Poseidon missiles for? What are our Trident missiles for? What are our B-52 and FB-111 strategic bombers for? What are our air-launched cruise missiles and our ground-launched cruise missiles for? How many redundant systems of destruction do we need?

In my judgment we are blindly wedded to the triad concept and land-based ICBM's. The Soviets have chosen to deploy 75 percent of their nuclear warheads on land-based ICBM's while the United States has deployed only 25 percent of our nuclear warheads on land, placing the remainder on mobile bases in the air and on essentially invulnerable submarines. We now have approximately 5,000 submarine-based nuclear warheads as well as more than 400 strategic bombers compared with about 1,500 Soviet sea-based warheads and 350 strategic bombers.

Both our sea and air-based missile programs are undergoing extensive modernization. The Trident II missile will have essentially the same capabilities as the MX. Development is proceeding on the cruise missile, the B-1B bomber and the radar-evading Stealth.

Soviet leaders surely know that our submarine-launched ballistic missiles and strategic bombers can inflict unacceptable devastation on their Nation. Why, then, do we need a new double-digit billion-dollar deterrent with a questionable basing mode that will drain funds away from other needs including our lagging conventional capabilities. The answer is that we do not need the MX. I urge that the amendment be adopted.

Mr. ADDABBO. Mr. Chairman, I yield 4 minutes to the gentleman from Oregon (Mr. AUCOIN).

Mr. AUCOIN. Mr. Chairman, I rise in strong support of the amendment offered by the chairman to the Defense Appropriations Subcommittee.

I think that we ought to be consistent. Every single Member of the House campaigned over the fall saying that he or she was for fiscal responsibility. You have your chance now, my friends.

We have before us a question. Are we going to spend billions of dollars on a missile that no one has come up with a good way of launching, or are we going to say, no, not until we figure out how to launch it, how to base it. And until then we are going to save the taxpayers the money, reduce the

deficit, help bring down interest rates and make this economy sound and stable again.

You cannot take budget cuts solely out of the hides of the people. You just cannot stand here and say that fiscal responsibility means we are going to be cutting back on food stamps. You just cannot stand here and say that we are going to cut out all the people programs.

What the message was in November was that fiscal responsibility ought to be across the board. And if the Pentagon has not figured out a good way of deploying a missile, then until they do so we ought not to be giving them the money to build it. And that is what the amendment of the gentleman from New York says. Funds for procurement of this missile will not go forward until the military can convince America they can figure out how to sensibly use the missile. I say they will never be able to do so.

We just heard a speaker say we could store this missile in barns! That we can build the missile and store it somewhere and somehow that would represent a message to the Russians that would in some way insure our liberties.

My God, does any Member of this House think the Russians are so stupid as to believe that we have got a bargaining chip on the table if we fund the procurement of this missile when we have not figured out how to deploy or base it? I thought these were the vaunted Russians, so smart and so tough, and so clever. And yet we are going to scare the Russians if we do not have a basing mode for this missile? This is ludicrous!

Window of vulnerability. How are we going to close the window of vulnerability with a missile in a Dense Pack basing mode?

The Russians only have to devise a means—and experts tell us it will take a couple of years to do so—to send in waves of missiles on a sequential basis to blow to smithereens the Dense Pack basing mode. If they do not do that, experts have told us they can take a couple of years to develop a penetration capability on their incoming missiles that will allow their missiles to penetrate the earth, then detonate and blow the Dense Pack mode to bits.

The MX, then, in Dense Pack is still vulnerable so all we will accomplish is a waste of money.

The people in this country came the closest to a national referendum in the history of this Republic on November 2, when they endorsed overwhelmingly the nuclear weapons freeze. And one of the weapons they had in mind was the MX.

□ 1700

It would be an unspeakable tragic if we allow the funding to go forward with the procurement of this missile when it would mean the abrogation of the ABM Treaty and the violations of the terms of the SALT II Treaty.

Do not do this, my colleagues. Pass this amendment.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 3 minutes to the gentleman from Texas (Mr. WHITE).

Mr. WHITE. I thank the gentleman for yielding.

Mr. Chairman, for 38 years our country has not been in a general war. The key to this deterrent, the key to our peace, has been the triad. It has been fundamental to our defense. Bombers, missiles, submarines. With this triad, any would-be attacker would be accepting unacceptable damage because of the differential timing the attacker could not demolish all three. But for a decade our defense has been eroding at the same time the Soviets have been building, hardening their silos, building their kilotonnage and their accuracy to the point where now our Minutemen are at risk and to the point that today it is estimated that we would only be able to knock out something like 15 percent of their missiles in an exchange, unless we can increase and improve the accuracy and penetration of our on-land missiles. If we do not procure the MX missile, in effect we would be abandoning one important leg of our triad. Regardless of the basing, we have to procure now in order to avoid the time lag in production in preparation for whenever we do get a basing, whether it be mobile or whatever it happens to be. We have not had a true land-based missile improvement for two decades.

Some critics say, "Just continue the R&D, and do not procure now." That has been the problem of our defenses over the years. In some important areas we have a paper defense. We research and research and develop without actually producing, contrary to the Soviet system which has research that produces, improves on what they produce, and then goes on to the next generation of weapons. The Soviets, have been developing their weapons systems to the point where they are a tremendous threat, and that is why today we are under threat. If we do not procure as we improve the MX, our retaliatory deterrent will be on paper and no guarantee of peace at all. The only way in our generation and for years to come that we can insure peace in this world is through the perception of strength. We do not want to send a signal abroad that we cannot modernize to defend ourselves and that we do not have the resolve to improve our missile systems so that we threaten their systems and throw off their timetable.

So I urge you to procure the MX missile now. March 15. There is a time lag in the bill, March 15, which gives us ample time to study the basing mode.

Mr. ADDABBO. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. GREEN).

Mr. GREEN. I thank my colleague, the gentleman from New York, for yielding time to me.

Mr. Chairman, I want to make the point that being against the MX is not being against defense. I for one support the Trident, I support the cruise missiles, I support the expenditure on the Stealth technology, and I support increased funding for nonnuclear forces. But I oppose the MX because I think it is simply a project that will not work, and it will not work very expensively.

Taken together with all of the other Pentagon demands on us, it will severely damage our ability to fund really vital defense functions, such as our readiness, our operations and maintenance.

Is there anyone who seriously believes that we want to strip billions of dollars more from lean social programs, as some in the White House are suggesting, for a missile that no one is sure how to deploy? Is there anyone who would look happily on enormous budget deficits and a return to years of inflation and 20-percent plus interest rates to have another expensive missile system on top of the some seven or eight ways that we are funding in this bill for retaliating after Soviet nuclear attacks?

Must we really buy the Pentagon a billion dollar question mark for Christmas? I think the answer is "no." I think you can be pro defense and buy us the defense we really need and still vote against the MX, and I therefore urge support of this amendment.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 5 minutes to the very able gentleman from Wyoming (Mr. CHENEY).

Mr. CHENEY. Mr. Chairman, I rise in opposition to the Addabbo amendment to delete funding for the MX. I have a particular interest and special responsibility on this matter, because, as most of you know, Wyoming has been selected by the President as his preferred site for basing the MX missile. Let me assure you at the outset, that the President's recommendation has not been received with a unanimous outpouring of enthusiasm in Wyoming. To say the least, it has generated considerable controversy. Nonetheless, after a great deal of thought, I decided to support the President's decision that we go forward with the MX and his decision to locate it at Warren Air Force Base in Wyoming.

I will not dwell today on the technical aspects of the debate. I am sure others will ably discuss those issues. But I do want to spend a few moments explaining why I believe we must go

forward with the missile and why I am willing to accept the responsibility of having it deployed in my State.

First of all, I think it is important to remember the time factor involved. We often talk as if the question is whether or not we will have the MX on line tomorrow—when the reality is that under the most optimistic scenario, it would not be completely deployed until the end of the decade, long after President Reagan and many in the Congress will have left office. The strategic capabilities and balance that we are debating here today is that of the 1990's, not the early 1980's. There is virtually nothing we can do to alter the strategic balance in the short run, but there is a great deal that we can do to provide for the Nation's defenses well into the next century, if we defeat the Addabbo amendment now before us.

The fact is, that the strategic systems available to the President today were conceived of and designed, and in some cases deployed by his predecessors some 15 to 20 to 25 years ago. We would be in great difficulty today if our predecessors had lacked the foresight to make the difficult choices and commit the necessary resources to the future security of the Nation. I only hope our successors will be able to say the same of us.

The MX is not an original concept of the Reagan administration. On the contrary, it is a system that has had the bipartisan support of Presidents and Congress, Republicans and Democrats, alike for nearly 10 years. Preliminary approval was granted during the Nixon administration, and the need for a new ICBM has been recognized by every administration since. All of our efforts to negotiate an arms limitation agreement with the Soviets have assumed that eventually the United States would develop and deploy a new ICBM—the MX. There has been a national consensus about the need to build a follow-on system for the Minuteman.

Obviously, there has been no such consensus on the question of how to deploy the MX in order to insure its survivability. We have progressed from the racetrack scheme, through multiple protective shelters, to interim basing in Minuteman silos, to Dense Pack. No matter what the outcome of today's debate, the basing question will not be resolved until next year. Although I am persuaded of the merits of closely spaced basing, I do not believe Congress will finally approve the basing proposal until there has been time for extensive hearings and debate on the matter. And I do not believe a lameduck session provides the best atmosphere for such a debate, but there should be no question about the importance of going forward with the research and development and procurement of the missile as well as further R&D on the basing mode.

Like all Americans, I wish we did not have to spend $26 billion for a new nuclear weapons system. But, unfortunately, we do not have that option at present. And it may well be that we will never have it in our lifetimes, that future generations will be faced with equally difficult choices about how to survive in an often hostile world.

All of us sincerely hope that we will be able to reduce the threat of nuclear war by entering into an arms limitation agreement with the Soviet Union. The nuclear freeze movement has generated widespread support in the United States and Europe, because of the intense concern a great many people feel at the possibility of a general nuclear war. And anyone who has given the subject any thought has to be concerned. But I cannot believe that we will be successful in achieving an agreement if we pursue a strategy of unilaterally deciding not to modernize our strategic forces.

At present, we have an understanding with our NATO allies that we will pursue a two track approach—that we will modernize our theatre nuclear forces by beginning deployment of the ground launched cruise missiles and the Pershing II in Europe, while simultaneously negotiating an arms reduction agreement with the Soviet Union. I believe such an approach is equally valid when considering strategic systems.

I am personally convinced that the Soviets will not enter into a meaningful arms limitation or arms reduction treaty unless they believe that to be in their self-interest. It has to be clear to them that an arms limitation treaty is more attractive than any other alternative. That will not be the case if they continue their arms modernization programs while we unilaterally decide not to pursue ours. Given existing trends, and forecasting future capabilities, if the United States fails to provide for up-to-date replacements of the three key elements of our strategic triad, the Trident, B-1 and MX systems, the Soviets can clearly anticipate achieving an unacceptable level of superiority in the not-too-distant future. If we really want them to limit armaments, then we must make it clear they have nothing to gain by refusing to negotiate.

If the United States decided not to deploy the MX, I would be deeply concerned that the Europeans would quite legitimately refuse to go forward with the deployment of the Pershing II and the GLCM. And at that point it would be clear to the Soviets that they have an alternative, more attractive to them, than limiting their military buildup by entering into an arms limitation or arms reduction treaty.

Thus, based on the need to provide the United States with the necessary strategic weapons to safeguard our interests into the next century, the need to respond to the growing Soviet threat, and the importance of persuading the Soviets that they have nothing to gain from refusing to enter into an arms limitation agreement, I firmly believe we must go forward with the MX, and defeat the Addabbo amendment.

But what of Wyoming, why should we be asked to shoulder the burden of having the MX deployed in our State? At first it seemed to me that I might be able to do what a great many others have done—voice their concern over the need for a new ICBM, but then work to see to it that it goes in someone else's district.

But all too often these days, we seem to have lost our ability to accept responsibility. Everybody wants to pass the buck. The voters believe in fiscal responsibility, as long as we cut someone else's subsidy. People like the modern conveniences of electricity as long as they do not build the powerplant in their neighborhood. And eveyone believes in a strong national defense, as long as the MX goes in some other State.

The fact is in Wyoming we have accepted a large share of the responsibility for a quarter of a century. We have had ICBM's, based at Warren Air Force Base since 1957 when the first Atlas missiles were deployed and at present there are 200 Minuteman III's deployed in the area around Cheyenne.

There are a lot of strong feelings about the wisdom of locating the MX at Cheyenne, but if the Congress ultimately approves the President's recommendation, I believe the people of Wyoming are prepared once again to contribute to the common good and support this essential effort to improve American's security.

I urge the defeat of the Addabbo amendment and the approval of the MX system.

□ 1710

Mr. ADDABBO. Mr. Chairman, I yield 2 minutes to the gentlewoman from Colorado (Mrs. SCHROEDER).

Mrs. SCHROEDER. Mr. Chairman, I yield to the gentleman from Michigan (Mr. WOLPE).

Mr. WOLPE. Mr. Chairman, I rise in support of the amendment to delete funds for procurement of the MX missile from the fiscal year 1983 appropriation.

I oppose the MX missile because I believe strongly that it is simply not in our national security interest. The MX missile is a first-strike weapon which will destabilize the current nuclear balance. By deploying MX missiles we not only may be violating the 1972 SALT agreement, but we may also be setting the stage to abrogate the anti-

ballistic missile agreement and protocol should we eventually have to produce such weapons to protect the MX. These agreements have been at the core of efforts to bring the nuclear arms race under control. The MX will undercut arms control efforts and the balance that now exists with the Soviet Union. The MX will likely spur the Soviets to produce their own first-strike weapons. The result will be less and not more security for the people of the United States.

Mr. Chairman, I also oppose the funding and deployment of the MX missile because it represents a callous misperception of our national priorities on the part of the Reagan administration. Very bluntly the MX program puts unneeded and controversial military hardware ahead of our Nation's crying human needs. This administration is prepared to spend between $35 and $50 billion or a weapons program with no assurance of achieving its objectives. To fund the MX and other expensive weapons systems the administration is apparently ready to incur deficits of over $200 billion with the unbearably high interest rates such deficits entail. Tragically, we hear the administration is preparing to make even more severe cuts in vital domestic health and social service programs rather than touch the sacred defense budget.

At a time when unemployment nationally has reached 10.8 and 17.2 percent in my home State of Michigan; when electricity and natural gas are being turned off in the homes of our poor and unemployed just as winter is setting in; when bankruptcies and business closings are at record levels—I believe such a policy is unconscionable.

Mr. Chairman, Christmas is only a few weeks away. Americans are busy preparing to celebrate the holiday with their families. This year millions of our citizens will have little if anything to spend on Christmas. Now is not the time to let the Pentagon go on a Christmas shopping spree for sophisticated weapons of dubious utility. I urge my colleagues to oppose the MX missile appropriation and restore a true sense of national priority to our economically ravaged country.

Mrs. SCHROEDER. Mr. Chairman, I rise in support of the Addabbo amendment to strike all funds for procurement of the MX missile in fiscal year 1983.

This amendment is well founded. It defers funding for the missile until a suitable basing mode, if any, can be found. Although I am skeptical of the MX missile itself, I am absolutely convinced that this latest administration basing scheme should be scrapped.

First, the dense pack basing mode is another in a long line of bad ideas on bad theories. The fratricide theory that says Soviet missiles will destroy each other before they destroy our missiles has never been tested, and can never be adequately tested. The MX worshipers, admitting this point, say the Soviet Union has no choice but to believe fratricide will work. Regardless of what choice the Russians have, we remain vulnerable. They will merely rely on their present arsenal or they will quickly design ways to overcome the theoretical deterrence. Either way we spend too much for too long and get very little in return.

Second, also untested is the superhardened silo counted on to withstand nuclear explosions above and around them. The Townes Panel, the handpicked MX advisory group to the Secretary of Defense, concluded in September that whether we can adequately strengthen our silos is uncertain. The Air Force has just begun to test whether it can harden the silos. Yet we are asked to cough up $988 million for procurement now with the weak promise that the Air Force will someday find a way. Let us not be fooled out of $1 billion now and billions later. This is one reason defense spending is so out of control.

Third, President Reagan wants the Dense Pack as one more chip to bring to the bargaining table. What he does not realize is that we already have that chip, the threat and the capability to produce the MX missile. What he does not realize is bargaining chips, once they are built, stay built. The cruise missile, a bargaining chip during the SALT talks, is still with us. Most importantly, if we agree to deploy the MX, there will be no bargaining table. The Russians will simply pack up and leave, only to return when they have more chips, namely a MX-counter weapon.

Fourth, there are better answers than Dense Pack. If Reagan truly wants strategic sufficiency (not advantage) while simultaneously pursuing economic security, he should quesiton the Triad notion. Land-based ballistic missiles are the most vulnerable leg of the Triad, and they invite retaliatory missiles to our heartland. Air and especially sea-based missiles are harder to find and destroy, requiring much time and expense by the Soviets to counter. Sea basing builds on our traditional maritime strength. We already rely on these two legs for 75 percent of our nuclear force. We should devote our entire nuclear force there, spending far less than the total $54 billion that we will spend into the 1990's on the land-based MX Dense Pack.

The best long-term answer is still negotiation. When the President announced his Dense Pack intention, he immediately followed it by a call for negotiations. The Soviets have already condemned his announcement and vowed to step up its efforts to match the MX threat. Dense Pack's possible violation of existing treaties and understandings also throws cold water on any meaningful progress in negotiations.

The American people have become involved in this MX debate as never before. The church community nationwide has become the voice of reason to get negotiations underway. The Freeze resolution ballot proposals that won in several States show that more and more people want to stop nuclear mania. They are telling the Government to negotiate with the Soviet Union from a position of parity and sufficiency, not strength and superiority. They are telling us to stop the MX missile. That is exactly what we should do.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 3 minutes to the gentleman from Texas (Mr. WILSON).

Mr. WILSON. Mr. Chairman, I think that there is one point that has not been sufficiently made here today and that is that at the present time the Soviet ICBM force is immune from attack. They are in refuge. They cannot be destroyed.

Our ICBM force is extremely vulnerable. That is the critical and central question here today and if our ICBM force can be destroyed and if they know that theirs cannot because theirs cannot be destroyed by submarine missiles, we do not have a reliable air attack, then why should the Soviets bargain when they are sitting in an absolute immune situation and we are sitting in an absolutely vulnerable situation.

The second thing is if we do not build a missile, we will have in effect forfeited one leg of the triad which will then allow the Soviet Union to concentrate all of their technology and all their resources on air defense and on antisubmarine warfare and when they break through one time there, then we are in serious and critical danger.

The third reason is, how can we possibly ask our allies who live so much closer to the Soviet Union than we do, how can we possibly ask them to deploy the Pershing II's that we expect them to deploy in 2 years when we ourselves do not have the will to build the land based deterrent, the only land based deterrent that the Soviets fear.

Furthermore, I would like to make the point, people say, "We don't know if it will work or not." That is right. We do not absolutely know if it will work or not, but we are not the only ones that do not absolutely know if it will work or not. The Soviet Union does not absolutely know whether it will work or not.

Mr. KEMP. Mr. Chairman, will the gentleman yield?

Mr. WILSON. I yield to the gentleman from New York.

Mr. KEMP. Mr. Chairman, the gentleman has made an extremely important contribution to the debate and that is, how can a negotiation proceed from the standpoint of unilaterally withdrawing one of the most important initiatives that we can make? What would be the impact upon our allies in Europe if, as the gentleman suggested, we are not willing to deploy a new land-based missile in the United States when we are asking them to deploy a new land based IRBM?

It seems to me it is impossible to expect the negotiations over theater nuclear weapons to go forward if the United States does not take the steps necessary to modernize its triad strategic forces.

Mr. WILSON. I completely agree with the gentleman. If I were a West German and the United States would refuse to have a land-based deterrent, I would certainly be concerned.

Mr. BEARD. Mr. Chairman, will the gentleman yield?

Mr. WILSON. I yield to the gentleman from Tennessee.

Mr. BEARD. Mr. Chairman, I commend the gentleman on his statement.

Let me just say how we would negotiate the START negotiations, the same way we did when we unilaterally canceled the B-1 bomber while trying to include three Backfire bombers being produced by the Soviet Union for months into the SALT II. When we unilaterally canceled the B-1, our negotiators went to the table. Senator TOWER over there asked the Soviet negotiator, "Look what we have done as a sign of our good faith. What are you going to do?"

The Soviet negotiator said——

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield an additional 30 seconds to the gentleman from Texas.

Mr. BEARD. The Soviet negotiator looked at our people and stated when asked, "What are you going to do about the Backfire bomber now that we have unilaterally canceled the B-1?"

The negotiator said, "We are neither pacifists nor philanthropists."

I think that is the message right there of what our negotiators will be dealing with in Geneva if we take this irresponsible action.

Mr. WILSON. I agree with the gentleman and if their forces are immune from attack and our forces are vulnerable to attack, why should they negotiate?

Mr. ADDABBO. Mr. Chairman, I yield 1 minute to the gentleman from Minnesota (Mr. VENTO).

Mr. VENTO. Mr. Chairman, I rise in strong support of the amendment to delete the funds for the MX missile. This is a weapons system which will not enhance our national security. It will not guarantee a stronger U.S. negotiating position with the Soviets.

Most importantly, the MX will not safeguard world peace. The MX will, however, escalate an already dangerous nuclear arms race. It will force a Soviet response and then a U.S. counter response.

These steps are all the result of a system of questionable value and extravagant costs.

Mr. Chairman, the people of Minnesota and the rest of the country are worried. They are worried about the course we are following, the course of an uncontrolled arms race. They are worried for themselves and their children. It is time to change the course and to lead the world along the course of peace.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 2 minutes to the gentleman from Indiana (Mr. HILLIS).

Mr. HILLIS. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from New York (Mr. ADDABBO).

While I certainly am not yet knowledgeable enough about the details of the President's proposed closely spaced basing scheme for the MX missile to give it an unqualified endorsement, I do not believe we should foreclose the option of going forward with the production of the missile during fiscal year 1983 should we ultimately reach a consensus to support the President's plan.

I believe the provision the committee has included in the bill that restricts the expenditure of funds on the MX until March 15 is the desirable alternative to a straight up or down vote on the MX at this time. Let us agree to fence the production funding until we have had an ample opportunity to fully and fairly deliberate the President's proposal. I do not believe many of us here today can honestly say we understand the closely spaced basing proposal sufficiently to either vote yes or no on its merits. The Armed Services Committee has held only one hearing on the closely spaced basing proposal and although I strongly believe that we need to modernize the land-based leg of the Triad, I am not prepared to fully support the proposal at this time. Likewise, however, I am not willing to reject it. I just do not know enough about it yet. I need more time to study it before making up my mind.

That is why I think the restrictive provision that is already in the bill makes so much sense. It gives us this time. It will allow our committees to thoroughly examine the proposal. If after close examination we find the system unworthy of our support, then so be it, the money will not be spent. On the other hand, if we find it supportable, we will have preserved the option to quickly go forward with production in 1983.

The action we ultimately take on the MX program will have a significant impact on our strategic deterrent posture, our foreign policy and the very sensitive START negotiations and the theater nuclear force modernization discussions. We must avoid being panicked here today into making an ill-advised and hasty decision to kill the fiscal year 1983 production funding for the MX.

I urge you to vote down this amendment. Let us give the President time to adequately make the case for the MX in the closely spaced basing mode. We owe him that opportunity.

□ 1720

Mr. ADDABBO. Mr. Chairman, I yield 3 minutes to the gentleman from Massachusetts (Mr. MARKEY).

Mr. MARKEY. I thank the gentleman for yielding this time to me.

Mr. Chairman, when one sits up there and listens to the comments by the gentleman from Texas or the gentleman from New York or the gentleman from Tennessee, one hears them speak as the President does in his television performances about our land-based missiles. But what they do, of course, is ignore a strategic decision made by the United States back in the 1960's, and that was to put 50 percent of all of our nuclear weapons out at sea in invulnerable submarines.

Now, think what you might about Adm. Hyman Rickover and what he has done over the past generation, but he did one terrific technical job in making sure that our submarines could not be detected, much less destroyed, by the Soviet Union. So while the Soviet Union was deciding to put 80 percent of its missiles on land and 10 to 15 percent at sea and in the air, in submarines and airplanes that were very much inferior to ours, we made a decision to put 25 percent on land, 25 percent in the air, and 50 percent at sea.

There is no way under any scenario that has the Soviet Union destroying all of our land-based missiles, all of our bombers, and all of our submarines that would be in port; that we still would not have 3,500 nuclear weapons at sea, 3,500 weapons.

In 1969, when we began negotiating SALT I, we had 2,400 weapons aimed at them; they had 1,600 aimed at us. The reason we began negotiating is that we realized there were only 200 cities in either country that had populations over 100,000.

In 1982, in a worst-case scenario, we still have 3,500 weapons aimed at them, 3,500 weapons. For that, we are going to destroy the American budget, we are going to vitiate the ABM Treaty, enter into a new round of the arms race, and are not going to offer one additional jot of security for the American security.

Does the House know what the definition of Dense Pack is? Dense Pack is

six generals sitting around the Pentagon trying to figure out what the window of vulnerability is.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. SHUMWAY).

Mr. SHUMWAY. I thank the gentleman for yielding to me.

Mr. Chairman, I rise in opposition to the amendment offered by Mr. ADDABBO. I do so only after having given the complex question of MX production a great deal of thought, and after having considered the compelling arguments on both sides of the issue. While not necessarily an easy decision, I have concluded that it is clearly in our best national interest to proceed with the MX at this time.

At the outset, I would like to clarify one common mispercention: Our vote today has nothing to do with Dense Pack or any other possible MX basing mode. The Addabbo amendment deals only with procurement funding; the appropriate congressional committees will have ample time to review the President's basing recommendation in the months ahead. Despite the legitimate uncertainties surrounding the establishment of a permanent basing mode, I feel that it is imperative that we continue with the initial production of the MX missile, as scheduled, in the interest of deterrence, national defense, and hopefully as a means of achieving genuine arms reductions.

Over the last two decades, this Nation has maintained a stable deterrent by means of a strong strategic triad consisting of land-based ICBM's, manned bombers, and submarine-launched ballistic missiles. While the policy of deterrence has stood the test of time, it is now apparent that we must make some changes in order to restore credibility and balance to the Triad. Unfortunately, over the past several years, the Soviets have deployed new land-based strategic missiles of such quality and quantity as to threaten the survivability of the land-based (ICBM) leg of the triad. It is this fundamental weakness in our overall defense capability that the MX, in the appropriate basing mode, is intended to rectify. The MX will provide us with a weapon of greater accuracy, increased payload, hard target kill capacity, and greater range than our present Minuteman force. In addition, it will maintain the diversity of forces, preventing a Soviet technological breakthrough against one leg of the triad from crippling overall U.S. deterrent capability. Failure to appropriate funds for production of the MX will only delay the start of the program and will inevitably increase ultimate costs.

It is, therefore, important that we not curtail MX funding. Such action, if supported by this body, will have a deleterious effect on the President's strategic modernization program and on the current strategic arms limitation talks. Both of these efforts are essential to our national security and, indeed, to the security of the free world. President Reagan is, in my view, correct in arguing that the MX is needed to influence the Soviets to actually negotiate in Geneva. History has shown that U.S. unilateral strategic arms reductions and limitations have not persuaded the Soviets toward similar action. However, initial U.S. discussions about building an antiballistic missile system helped bring about the ABM agreement. I firmly believe that there is a tactical value in proposing the MX and beginning to build it—the sooner the better. The MX will be the Soviets' only incentive to reduce, limit or dismantle their SS-18's—in all likelihood, the most destabilizing strategic weapon now in existence.

The development of the MX will not give the United States nuclear superiority, but it will weaken the Soviet counterforce advantage and will restore our capability to deter nuclear war. While I recognize the need for restraint and frugality in defense, I believe that international peace and stability can only be preserved if we maintain a strong and effective national defense. I appreciate the force of the argument that it is unnecessary to spend so much on war, in a time of peace, and in a time of hardship. But I do not believe that the first criterion of defense spending is social or economic. It is national security. If a weapon is demonstrated to be necessary, then it must be built. In my opinion, the MX is a necessary weapon. It is necessary to maintain a stable deterrent, to preserve the security of the free world, and to achieve successful arms reductions. I, therefore, strongly oppose the Addabbo amendment and respectfully urge that it be defeated.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield such time as he may consume to the gentleman from Colorado (Mr. KRAMER).

Mr. KRAMER. I thank the gentleman for yielding to me.

Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from New York (Mr. ADDABBO).

Today this Chamber faces one of the most significant votes it has made on choosing the American strategic future. The MX missile deployed in a Dense Pack mode may not be the ideal response we would like to see to a Soviet arms race that has been running out of control. Nevertheless, I believe that we must focus our attention on a number of broader strategic issues that have gotten lost in the turmoil of today's debate.

First, it is my firm belief that this Nation needs to look hard at not only the MX, but at the need for an entirely new strategic posture built around strategic active defenses and nonnuclear defensive technologies. We have all forgotten that we originally got into the indirect strategy called deterrence through retaliation only because some 30 years ago we decided that there was no way we could defend ourselves with a "direct" approach, using strategic defenses such as ABM's, air defenses, and space defenses. In short, we adopted a policy of deterrence because we thought that defense would not ever work.

Second, over the years, however, the costs of maintaining a force for nuclear retaliation have mounted higher and higher. As the Soviets continue to violate the spirit and the letter of the SALT agreements and continue their massive arms race in strategic offensive weapons, the United States, for reasons I have never found persuasive, decided to stop its efforts in building strategic defenses against Soviet weapons. For example, despite some brilliant technology development in nonnuclear space defenses in the period 1958–64, the technology for which was recently resurrected by Project High Frontier, the United States decided during the 1960's to literally throw away some extremely valuable defensive options and concentrate entirely on deterrence through nuclear retaliation. The adoption of MAD policies provided the rationalization for such a "nuclear emphasis."

This Nation's leaders should seriously consider offsetting the Soviet strategic effort not through attempts to produce more offensive weapons but by investing heavily in nonnuclear, nonretaliatory forces that can be deployed in space. According to recent analyses by a major aerospace firm and by a think tank with considerable experience in this area of space defenses, these nonnuclear systems in orbit could offer considerable performance against even major Soviet attacks.

We do not have an opportunity to change our strategic policy today. We are faced only with a choice between having a better offensive capability or not having one. I believe there must be an American counterforce capability equivalent to that possessed by the Soviet Union. The MX missile is the most rapid means we have available today to deploy such a counterforce capability, one that would permit our leaders to respond to a Soviet first strike by targeting surviving Soviet missiles and military installations.

I also believe that we might send a very dangerous signal to the Soviet Union by not approving the deployment of this missile. On the 41st anniversary of Pearl Harbor, we must not forget that a prime factor in the Japanese decision to go to war was their belief that the U.S. Congress was not united behind the military rebuilding

programs of the Roosevelt administration. Today, we may be creating the same kind of strategic miscalculation in the minds of the Soviet leadership. Let us not reward the Soviets for their arms racing. Let us not hypocritically call for arms talks with the Soviet Union—and then proceed to cut off our negotiators at the knees in Geneva by gutting this administration's strategic programs.

I support procurement of the MX and further consideration of the Dense Pack basing mode. Although we cannot guarantee that this is the most survivable basing mode, nevertheless, the uncertainties it creates in the minds of Soviet leaders translates into deterence, a deterence that will help preserve the peace until we change our policy from one of mutual armed destruction to one of assured survival.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. LEWIS).

Mr. LEWIS. I thank the gentleman for yielding to me.

Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, the irony of December 7 is before us—December 7, 1941, a day that will live in infamy, America was brutally attacked by a well-prepared aggressor who was seeking to dominate the world. It is more than ironic that today—December 7, 1982, 41 years later—we should have this debate on the floor of the House of Representatives.

Try to reflect upon the world crisis in the late 1930's and early 1940's. America was actively seeking to avoid its international responsibility, hoping the world would go away. Two years before Pearl Harbor, there was a debate similar to this one on the House floor. The dialog was between those who urged adequate preparedness and those who would vainly hope. In 1939 the House came within 15 votes of requiring a national referendum before the President could declare war. In 1941 America responded only when crisis crystallized reality.

In 1982 we cannot afford the luxury of naivete nor those who would hope that these Soviet leaders wish for the same kind of peace as you and I.

It is a fact that America must be strong enough in its capability to defend herself to assure that the world aggressor—the U.S.S.R.—will be forced to think again before pursuing its ambitions too far. It is a fact that three Presidents and their Commissions have concluded that the MX missile is a vital part of our triad defense strategy. Even the responsible opponents to this appropriation in question, state their support for a modernized land-based system.

They argue today that because many of us continue to question the basing mode that we should not go forward with missile development. Well it seems to me that such logic is flawed to the core. Is it not more logical to conclude just the opposite? Three Presidents have concluded that MX is fundamental to adequate deterrence. Responsible parties in support of peace agree that it will be a part of the triad. It seems to me that this logic concludes that there is at least a reasonable balance in the debate taken that far.

But there is more. We are at this moment at the negotiating table in Geneva. Those who are at the table who are truly working for peace—rather than beating their breasts with hope reminiscent to 1938—have said time and again that the only chance to get the Soviets to negotiate is for America to be strong in its resolve.

It appears to me that the leadership across the aisle, those who dominate this House, are going to send exactly the wrong message today. If this amendment passes it will be a disaster to our friends at Geneva. If we strike funding for the MX today we will have given the Kremlin an early Christmas present.

I urge my colleagues to weigh carefully what we are about. We do not have the luxury of time provided in 1941. Perhaps Santayana best expressed this kind of situation when he said, "Those who cannot remember the past are condemned to repeat it." I beg you not to add your vote to the ax that would cut the legs off our efforts for meaningful arms reduction and lasting peace.

Mr. Chairman, I hope against those of naive hope, I am afraid this amendment will pass. If so, the world will be able to hear the vodka glasses clinking in Andropov's chamber tonight.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 2 minutes to the gentleman from Ohio (Mr. REGULA).

Mr. REGULA. I thank my colleague for yielding to me.

Mr. Chairman, I have questions, but we do not have enough time and I am only going to ask a few of them.

Question No. 31. How does the MX program meet the limitations of SALT II?

Mr. EDWARDS of Alabama. Mr. Chairman, will the gentleman yield to me?

Mr. REGULA. I yield to the gentleman from Alabama.

Mr. EDWARDS of Alabama. I thank the gentleman for yielding.

The administration takes the position that the MX program, in fact, complies with SALT II. We have not ratified that treaty, but in many ways we have tried to comply with it.

So far as I know, the Defense Minister of the Soviet Union is the only one who seriously contends that the MX does not comply.

Mr. REGULA. Does the MX program meet the limitations of SALT I?

Mr. EDWARDS of Alabama. I believe it does.

Mr. REGULA. Mr. Chairman, I yield back the balance of my time. We do not have sufficient time for further questions.

Mr. ADDABBO. Mr. Chairman, at this time I yield 5 minutes to the gentleman from Massachusetts (Mr. MAVROULES) a coauthor of this amendment.

Mr. MAVROULES. Mr. Chairman, I rise in support of the Addabbo amendment.

This is a historic moment in this House of Representatives. More is at issue here than MX and Dense Pack. Instead, it is time to debate some fundamental questions involving our national security. It is time to separate myth from reality.

In his address to the Nation, President Reagan claimed that "in virtually every measure of military power the Soviet Union enjoys a decided advantage" over the United States. Those of us who serve on the Armed Services Committee or the Defense Appropriations Subcommittee know that this just is not true.

As Members of Congress we have a constitutional responsibility to support and maintain the "common defense" of the United States. The MX program does not stand in isolation, and our national defense rests not upon one single weapon system. With or without MX/Dense Pack, our strategic forces will still possess diversity and redundancy in the missions they perform. Together they have synergistic effect, the combination of the force is stronger than the sum of its parts.

Counting the numbers of weapons on each side is like counting beans. It makes for colorful charts, but poor planning. It has never been U.S. policy to try and match Soviet weapons one for one. I challenge the President, the Secretary of Defense, or any of our commanding generals, or admirals, to publically state they would rather command Soviet forces.

You also will not hear very much about the Navy's new Trident submarine, the U.S.S. *Ohio* which went on station last month. It carries 24 submarine-launched ballistic missiles. Those 24 missiles each hold 10 warheads, and that one submarine can deliver a destructive force 1,600 times as great as the Hiroshima bomb of 1945. The current force structure is to build 20 of these boats.

Also, in this month of December, the Air Force is deploying its first squadron of B-52G bombers carrying air-launched cruise missiles. Each B-52 bomber will carry 12 cruise missiles—a strategic weapon capable of guiding itself to its own target.

Trident and cruise missiles—they are not weapons for the future, they are in the inventory today, adding num-

bers and redundancy to our strategic forces.

Now with the MX/Dense Pack plan, the real problem is not modes of basing, its modes of thinking. As former Secretary of Defense James Schlesinger recently wrote, "the administration's present and prospective MX difficulties are to a considerable extent its own creation."

Will Dense Pack work? Is fratricide a workable theory?

Defense Secretary Weinberger's own expert on MX and Dense Pack is Dr. Charles H. Townes. Dr. Townes warned it is "uncertain" whether Dense Pack silos can be hardened or protected to the point necessary for surviving in an environment of fratricide.

In a September 22 letter to Secretary Weinberger, Dr. Townes concluded that the most troubling aspect of Dense Pack "is that the Soviets may have appropriately modified their weapons—for an effective attack on it—almost as soon as it is fully deployed."

Dr. Townes has these reservations, and the Congress has the responsibility to receive his testimony, consider all the respective merits of dense pack, and then make a decision on a total program. A program which may well become the most expensive in U.S. history.

If you support the Addabbo amendment, you will not damage our national security, in fact you will be adding strength because we will not be fueling another round in the arms race.

Delete the procurement money and support Mr. ADDABBO's amendment. Take the time to look at this program in the detail it deserves.

□ 1730

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 2 minutes to the gentleman from Maine (Mr. EMERY).

Mr. EMERY. Mr. Chairman, it seems to me that we are facing two questions here this afternoon. One is, will this system work? The second is, do we really need it?

I do not think that the floor of the House is the appropriate place to debate the intricacies of physics, but from my knowledge of this system, work on the Armed Services Committee, and discussion with a great many people, I am convinced that the fratricide principle is in fact a sound one unless you believe that this is something that has been thought up during the last several months in order to sell a weapons system. Let me tell the Members that during the length of time that we have been debating nuclear weapons, at least as long as I have been in this House, we have been concerned about the principle of fratricide as it affects systems already deployed; attacks on our systems and capabilities of our own systems to operate in a wartime scenario. So, fratricide is not new. It is in some cases a problem, and in this case it is an opportunity to turn a well-known physical phenomenon to our defensive advantage.

Is it foolproof? Well, I do not think anything is foolproof. We can take a look at every aircraft, every missile, every submarine, every system we have ever devised and manufactured, and we find that there are flaws. There is no system that the mind of man can devise, construct and deploy, that will work perfectly under all circumstances forever. We know that too, but do we need a new system? In my opinion, we most certainly do. I think we need a system that is defensible, a system that is more accurate, a system that will allow us to defend ourselves in the nuclear environment, and against the activities of the Soviet Union that will certainly occur over the next several decades.

Unless we are willing to meet that challenge, unless we are willing to devise defensive mechanisms that will protect our national security, then we are not going to succeed.

Mr. ADDABBO. Mr. Chairman, I yield 30 seconds to the gentleman from Michigan (Mr. CONYERS).

Mr. CONYERS. Mr. Chairman, there is an unstated premise that precedes the swirl of arguments around the MX and this amendment. It is whether we are sane or insane. And if we are insane, no amount of nuclear deterrent will be adequate or sufficient. If we are sane, then it is beyond question, in fact, undebatable that only three Poseidon submarines can totally devastate 70 percent of the U.S.S.R. infrastructure. Therefore, we already possess more than enough nuclear armaments. Never forget: Rationality is the first prerequisite for sound legislative judgment. The ultimate question then is not whether we are for or against the MX missile, but whether or not we have any sense.

Mr. ADDABBO. Mr. Chairman, I yield such time as he may consume to the gentleman from Illinois (Mr. SIMON).

Mr. SIMON. Mr. Chairman, I rise in strong support of the Addabbo amendment to continue research and development on the MX but to call a halt to this strange thing called "Dense Pack."

All of us have had a bewildering barrage of approaches by the White House and military personnel supporting the procurement, but many of us have also had these quiet phone calls from top military people who have said, "This is an unwise use of defense dollars, a use that will take dollars away from our real needs."

If we go ahead will the Soviets not go ahead?

That seems unlikely.

If we go ahead will arms control talks likely be more productive?

That also seems unlikely primarily because the Soviets believe, and many of us fear, that the administration is not serious about arms control negotiations.

Is the economic security of the United States aided by such an expenditure?

The last thing we need is to spend $30 to $40 billion needlessly.

Will an expenditure on MX help us politically in the rest of the world?

It conveys a sense of bristling militarism, rather than a nation searching desperately for peace.

The United States is not alone responsible for the arms race. The Soviets have contributed their full share. But if we approve of this weapons system the arms race will be escalated.

If we took one-tenth of the amount we contemplate spending on this weapons system and used it to promote understanding and exchanges between the Soviet Union and the United States, the world would be much closer to genuine security. We fear the Soviets in large measure because we do not understand them; and they fear us, in large measure because they do not understand us.

Let us build bridges of understanding rather than more and more and more weapons of destruction.

Mr. ADDABBO. Mr. Chairman, I yield such time as he may consume to the gentleman from Iowa (Mr. BEDELL).

Mr. BEDELL. Mr. Chairman, I rise in strong support of the amendment.

Mr. Chairman, as a longstanding opponent to both the production and deployment of the MX missile system, I rise in support of the Addabbo amendment and urge my colleagues to join him in its passage. In determining whether to support the President in his decision to deploy 100 MX missiles in a closely spaced basing (CSB) mode, we must ask ourselves whether MX will truly enhance United States, allied, and world security; whether CSB is more survivable than our present Minuteman basing mode; whether MX is truly affordable; and finally, whether MX truly enhances the cause of greater worldwide arms control. In my mind, the answer to each of these questions is "no."

In defending the President's decision to endorse closely spaced basing, Dr. George Keyworth, Director of the President's Office on Science and Technology Policy, argued that the MX—now ironically known as the Peacekeeper—is not a war fighting weapon because it takes away the option of a preemptive first strike by an enemy, therefore, it makes nuclear war much less likely. Dr. Keyworth went on to state that deployment of the MX will permit reduction in nucle-

ar tension. I find this analysis Orwellian in nature and object to it completely.

I recall reading an arms control impact statement in which the MX was pronounced as the most lethal weapons system known to man—this being due to its incredible accuracy—and as such, could be construed as a first strike weapons system. Today, Dimitri Ustinov, Defense Minister of the Soviet Union, announced that if the United States goes ahead in deploying the MX missile, the Soviet Union will develop a similar weapon that will in no way be inferior. How then is United States, allied and world security enhanced through the deployment of MX when we know well in advance that the Soviet response to this deployment will be to reengage the United States in a new, more costly, more lethal and more destabilizing round of the nuclear arms race? In what manner will a reduction in nuclear tension occur given the fact that we know well in advanced that both we and the Soviets would be engaged continually in developing more and better systems of mass destruction than we presently have?

Dr. Keyworth also argued that closely spaced basing would work as it takes advantage of superhardening of missile silos, and warhead fratricide. In explaining the theory of fratricide, Dr. Keyworth noted four phenomena that would create this destructive effect. First is the intense radiation of gamma rays and neutrons that "within a few millionths of a second, reach and disable nearby enemy warheads. Second is the nuclear blast wave which, for several seconds would destroy neighboring warheads. Third is the fireball, which would prevent incoming warheads from detonating effectively. And, finally dust and debris created in the initial blast would damage any remaining incoming warheads, thus making them ineffective in attack. I find it quite ironic that the theoretical vulnerability of our present Minuteman missile deployments to preemptive attack is solved through the implementation of a new basing mode that relies solely on the theoretical effect of warhead fratricide.

Or does MX survival rely only closely spaced basing? Dr. Charles Townes who headed a panel of experts appointed by the Pentagon to seek flaws in Dense Pack warned that the Soviet Union could begin to counter closely spaced basing by the late 1980's and that survival of Dense Pack would probably require the addition of an antiballistic missile system to defend it. Once again, I see little contribution to U.S. security through the deployment of MX, knowing that within 5 years, we very well might have to abrogate the ABM Treaty of 1972 and engage the Soviets in another segment of the nuclear arms race—that of defensive systems to protect our already awesome offensive system—and the race goes on and on and on with no end in sight.

Finally, we must ask ourselves whether this system is truly affordable to the U.S. taxpayer during an era of intense economic strain and fiscal constraint. The Air Force reports that 100 MX missiles, deployed in a closely spaced basing mode would cost no more than $26 billion. Other experts believe the cost may approach $35 billion and if we add the associated costs of research, development, and deployment of an ABM system to defend the MX, the final price tag for this $26 billion program may exceed $50 billion.

Like many of you, I support a U.S. defense posture that is second to no other power in the world and am committed to a U.S. defense policy that is both sound and rational. Since entering Congress, however, I have committed myself to an ending of the nuclear arms race through mutually verifiable arms control agreements with the Soviet Union. In this regard, deployment of the MX does little to enhance the cause of greater arms control and will certainly result in an intensification of the already precarious nuclear arms race. For these reasons, I implore you to support the Addabbo amendment.

Mr. ADDABBO. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. PANETTA.)

Mr. PANETTA. Mr. Chairman, I rise in strong support of the Addabbo amendment.

Mr. Chairman, in his November 22 address to the Nation, President Reagan unveiled his long-awaited plans for basing the MX missile. In urging the Congress and the American people to support his decision to deploy 100 of the most technologically advanced intercontinental ballistic missiles in close-spaced formation—Dense Pack—the President outlined the twofold objective of the MX program: To deter a Soviet attack and to demonstrate America's resolve at the arms negotiating tables in Geneva.

Mr. Chairman, my fellow colleagues, the people of my district and across the country demand an explanation why after spending $4.5 billion and over half a decade researching and developing the MX program, are we now presented with a $26.4 billion proposal that has failed to develop any semblance of consensus to support its ability to contribute significantly to American security or global stability.

To analyze properly this proposal, we must ask several key questions: First, is this an effective deterrent? Second, how does this proposal relate to efforts at arms control? Third, is this proposal cost effective in today's budget? Let us address each area:

First, is this deployment plan workable—is it an effective deterrent?

Central to the administration's defense planning and the stated objective of the MX proposal is the concept of nuclear deterrence—to make the Soviets believe that a significant portion of our nuclear arsenal can survive an attack and be available for return. The argument follows that the certainty of that costly retaliation dissuades the Soviets from attacking first.

In the context of the present debate on the MX, therefore, we must at a very minimum examine the ability of the proposed system to meet the prescribed conditions of a deterrent force. Admittedly the technical aspects of the present debate are complex with perhaps only a handful of scientists qualified to understand the necessary engineering and military calculations involved. And yet there are scientists and military strategists who legitimately question the functional competence of deploying 100 MX missiles in closely spaced, superhardened silos.

Proponents of the Dense Pack proposal claim that if an attack were launched to knock out all 100 silos, the radiation, debris, explosive pressure and heat from the first warheads to reach the target and explode would destroy or disable the remaining incoming warheads, thereby assuring the survival of some MX missiles. To charges that the Soviets will invariably develop new technologies which in turn will increase the vulnerability of our MX missiles, Pentagon officials have countered that additional weapon systems deployed around the MX site would effectively neutralize such threats. Frankly, it has been precisely this kind of haphazard strategic planning that has given impetus to three decades of uncontrolled weapon increases.

One critical source of insight in the present controversy comes from Dr. Charles Townes, the Nobel physicist who directed the administration's two main MX studies. Dr. Townes has taken occasion to express his deep reservations over plans to deploy MX missiles in closely spaced silos, warning that the Dense Pack basing mode will become increasingly vulnerable with advances in multiple warhead technology.

In addition, I think it is important that we look at the overall composition of our strategic force. To date, the United States relies for over 75 percent of its strategic capacity on weapons systems that are still relatively immune to attack—the submarines and the bomber planes. I am concerned that the administration, in its haste to deploy the MX missile, has not allowed time to examine suffi-

ciently these and other alternatives to fixed land-based deployment.

Second, how does this proposal relate to our overall effort at arms control?

An analysis of the President's MX proposal would not be complete without assessing its impact on arms control efforts. The President identified arms reductions as the second approach—in addition to deterrence—in his program for peace. The cornerstone to any international commitment is trust, engendered by past relevant experience or, at a minimum, ability to verify compliance. The proposed deployment of 100 MX missiles in superhardened silos threatens to undermine the entire, if somewhat disappointing, framework for negotiated arms controls.

Specifically, under the terms of both SALT agreements, the United States is barred from constructing "additional fixed ICBM (intercontinental ballistic missile) launchers." Administration officials contend that the restrictions do not apply to the construction of 100 MX missile silos or shelters. I would contend that that is stretching the terms of SALT II. I might remind my colleagues that while the SALT II accords remain unratified, President Reagan pledged early this year that the United States would abide by its conditions as long as the Soviet Union does likewise—implying tacit recognition of Soviet compliance to date.

Finally, President Reagan has proposed that MX missiles could be used as bargaining chips in arms negotiations with the Soviets. The history of nuclear bargaining chips, however, has demonstrated repeatedly that they are rarely persuasive until deployed, and once deployed are very difficult to abandon.

Third, is this proposal cost effective in today's budget?

In essence, what is being debated today is whether the Congress will approve—despite massive cuts across a broad range of vital domestic programs—the first major installment on the $26.4 billion MX program. Moreover, this action must be taken against the backdrop of the administration's $1.6 trillion defense buildup over the next 5 years and projected deficits in excess of $200 billion.

I would also like to take this opportunity to draw attention to a recent study released by the Congressional Budget Office which estimates that by the mid-1990's, the MX system could reasonably be expected to contribute only 7 to 13 percent of our total nuclear strength in the event of attack. The CBO's analysis was based exclusively upon examination of data supplied by the Department of Defense.

In closing, I would like to emphasize that we all share the belief that it is urgently important to begin now to seek seriously and vigorously alternatives which would be more effective in protecting and promoting the interest, welfare, and security of the American people. Pouring billions of dollars into ill-conceived weapons systems, especially at the expense of our social commitments, will not make the United States invincible any more than pouring money into ineffective welfare programs will make poverty disappear. Moreover, Americans from all walks of life have—at countless meetings and voting booths as well as in letters to their elected representatives—taken occasion to express their support for verifiable balanced reductions, leading to the ultimate elimination, of nuclear weapons.

We must face the fact that weapons originally justified as necessary deterrents to attack now far exceed the destructive potentials required to deter any rational leader from ordering their use. The sheer magnitude and indiscriminate nature of nuclear destruction makes their use impossible unless we are committed to a path of self-destruction and global suicide. And yet, despite these very same self-engendered nightmares, we have persisted in building increasingly lethal weapons.

It is time we challenge the notion that the continued existence of our Nation is assured by the proliferation of nuclear arms. American initiative, ingenuity, and energy have achieved many goals deemed impossible by others. Realistic and imaginative planning to prevent massive nuclear destruction is the most compelling goal of our time; the commitment of tremendous fiscal and human resources to the construction of the MX missile is not the way to turn the world away from the nuclear threat. We must build for peace, not out of fear.

I urge my colleagues to join me in opposing the MX missile.

Mr. ADDABBO. Mr. Chairman, I yield 3 minutes to the gentleman from Illinois (Mr. RUSSO).

Mr. RUSSO. Mr. Chairman, I rise in support of this amendment to save the taxpayers from the first $26 billion installment on this ridiculous pacifier missile.

Before you vote to blow billions of your constituents' dollars on this Rube Goldberg scheme, consider its history.

We do not have to look at all 39 MX basing plans that have come and gone. Let us just look at the ones the Pentagon told us would work.

In the Ford administration, we had final solution No. 1: the subway tunnel.

We were going to drive each missile along a little railroad track inside a buried 11-mile concrete tube. The same poeple who now believe in fratricide told us, "This is it, this is the answer, the Russians will never zap our missiles in the tunnel." But after about 2 years they discovered the tunnel would not work. Actually, it was worse than nothing: The Russians just had to hit the tunnel at any point and it would act like a gun barrel, transmitting the shock wave right to the missile.

So then in the Carter administration we got final solution No. 2: the racetrack.

Again they told us, "This is it, this is the answer, the Russians will never zap our missiles there." Well, this final solution lasted about 3 years. Then President Reagan got in, and the Pentagon realized the racetrack would not work without SALT II. So Cap Weinberger showed President Reagan a political cartoon, and this sophisticated strategic analysis convinced him to throw out the racetrack.

Then we got final solution No. 3: President Reagan said let us put the MX in Minuteman silos and harden them a bit. This final solution lasted about 2 days. The only thing it was good for was to hope it would make the Russians die laughing.

Next, Cap Weinberger came up with final solutions Nos. 4, 5, and 6 all at once.

He said we will either put the missile in an airplane, or maybe we will bury it deep underground, or maybe we will build an ABM around it. He did not know which he wanted, but he will swear on a stack of Bibles that one of them would be the answer. These three final solutions lasted 1 year until the Pentagon figured out none of them was the answer. Deep undergound would break the bank, the ABM would not work, and the airplane was another lethal laughter weapon.

Now we have final solution No. 7: Dense Pack.

How long this one will last, nobody knows. I would give it maybe 6 months.

Nobody in his right mind thinks it will work.

The gentleman from Alabama (Mr. EDWARDS), one of this body's real military experts, says he really hates to spend the money on this thing but we need it for our negotiators. Well, the fact is MX is not a bargaining chip because we have not proposed to bargain with it. Read the newspapers this morning. If we go ahead with MX, the Soviet response will not be easier negotiations, it will be to build an MX of their own. And let us not forget in this game they hold better cards than we do; they can put their ICBM's wherever they want, without worrying about local reaction or environmental impact statements.

Charles Townes, the Nobel physicist who chaired the official MX panel, says the Russians can counter Dense Pack as fast as we can build it.

Jim Schlesinger, the Ford administration Secretary of Defense who started the MX, says the Russians can

neutralize Dense Pack before we can build it.

The Russians can use pin-down, they can use small accurate warheads, they can use very large warheads, they can use earth penetrators, they can use laydown weapons, they can use several of these in combination.

The only problem is choosing from the menu of opportunities Dense Pack offers them.

If we were serious about saving the ICBM's, we would face reality. In the real world, arms control is the only way to do it. Technology cannot do it. Money cannot do it. Arms control can do it.

The nuclear freeze would do it by wiping out the counterforce reliability of Soviet ICBM's.

The gentleman from Tennessee (Mr. GORE) has a plan that would do it by getting rid of Soviet MIRV ICBM's.

But this Dense Pack farce? Mr. Chairman, I will tell you what. Those of you who vote to throw away your constituents' money on this thing, see me after we adjourn. I will tell you where you can get a good deal on the Brooklyn Bridge.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 2 minutes to the gentleman from Arizona (Mr. RUDD).

Mr. RUDD. Mr. Chairman, a long time ago Americans committed ourselves to peace and to liberty and to freedom, and made the bargain with ourselves that we were willing to pay the price for peace rather than get involved in an expensive war in order to survive.

□ 1740

And we are involved in survival at this moment. The nuclear triad was part of that agreement for peace, and I think the plain fact of the matter is that the current missile system is no longer survivable. A few days ago I heard General Rowny, who is a highly respected military man, say that he at one time had been opposed to the Dense Pack arrangment, but he is now convinced that that is survivable and the way to go.

But that is not the issue here today. The issue is this: The Soviets have missiles that many times over have the yield and the throw-weight that we have. We cannot survive without the MX missile.

Mr. Chairman, the issue is not the Dense Pack arrangement; it is the fact that we must build the MX missile.

Mr. Chairman, we are facing an important test of our political resolve today with regard to the issue of the Peacekeeper missile.

We have heard, and will hear continued and repeated testimony on the political, moral, economic, military rights, and wrongs of both the missile itself and the proposed basing mode. Let me state quite clearly that I consider the Peacekeeper to be a necessary and vital part of our strategic deterrence and that the basing mode known as Dense Pack is a revolutionary concept that is the most efficient and acceptable method of deployment, despite arguments to the contrary, I would like to discuss the issue of where that missile fits in our overall national security program.

I do not think that there is anyone present that will say that the concept and practicality of the strategic defense triad is invalid. It is, in fact, the most sensible guarantor of strategic defense and more importantly; of nuclear deterrence.

The requirements of a workable triad deterrent force are these: First, each leg of the triad is independently survivable; second, each leg of the triad, while not sufficient on its own, is sufficient to cause a potential enemy to restrict his options with regard to nuclear attack; and third, each leg must have built safeguards and the flexibility of use and evolution over time.

An integral part of the triad concept is that one leg of the triad must always be upgraded, as advancing technology will always cause a vulnerability in whatever systems one employs in any of the three legs. Unfortunately, that upkeep was neglected for many years in this country. The air breathing leg of the triad, our most flexible and therefore the one leg needed to be most dependable, consists of a fleet of airplanes older than the pilots who fly them. Our Navy is now just beginning to commission the Trident fleet and now we are trying to upgrade and make less vulnerable the missile leg of the triad.

In short, a triad deterrent system requires upgrading and improving if it is to do the job it was designed for: preventing nuclear war. That is the bargain this country made years ago. We are committed to the preservation of our rights and freedoms and the rights and freedoms of peoples all over the world, we made a bargain with ourselves and with all freedom loving people to pay the price for freedom, the maintenance of a viable strategic deterrent, the nuclear triad.

It is a plain fact that the current missile system leg of the triad is no longer survivable. The peacekeeper missile and its deployment scheme will restore the integrity to that section of our nuclear triad.

We need a viable triad: and we do need the peacekeeper to make that triad a viable force. I urge my colleagues to support the funding in this bill for the peacekeeper missile.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. HUNTER).

Mr. HUNTER. Mr. Chairman, I think that most Members in this Chamber know that since 1967 we have essentially been engaged in a unilateral nuclear freeze. The United States has built no new missiles and no new bombers, although we have built a few submarines, and the Soviets during this time have built and deployed, targeted mainly on the United States and our Western allies, in excess of 5,000 warheads. The crown jewel of the Soviet ICBM force has been the SS-18.

It is my opinion, Mr. Chairman, that the Department of Defense made a major mistake in trying to sell the MX missile—and I am talking about the missile, not the basing system—to the Congress. If we forgot about the basing system and thought about sticking to the MX missile in the old silos or changing the old silos slightly, the MX missile would be a logical follow-on to the Minuteman missile. The Minuteman missile has 3 warheads; the MX missile has 10 warheads. It is more accurate. It is really the counterpart to the SS-18. But during the debate last year the MX missile has become inextricably intertwined with the basing system, and when we talk about the MX missile, most Americans today, I believe, think about the basing system in Nevada.

But the MX missile itself—and I am speaking of the missile—is needed as a follow-on, as a replacement for the Minuteman. For the last Minuteman that we put in the last silos in, I believe, 1967, the projected life at that time was about 6 years.

I would like to make one more point, Mr. Chairman, it has been said on the other side that we need a missile that is stabilized, and the MX missile is destabilizing. Actually the MX missile is very stabilizing, and the complaint has been made that we are dedicating a great deal of the money in the MX program to the basing system and not the missile itself.

The CHAIRMAN. The time of the gentleman from California (Mr. HUNTER) has expired.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 3 minutes to the gentleman from New York (Mr. KEMP).

Mr. KEMP. Mr. Chairman, one of the previous speakers talked about arms control, and mentioned that ALBERT GORE has a plan to reduce the Soviet ICBM force. I just wonder, with all due respect to the gentleman from Tennessee and the mutual desire of all of us in this great body to bring about arms control and indeed arms reduction, how can it possibly be accomplished without the willingness and the determination of the United States to do what is necessary to modernize that leg of the strategic forces that is the most vulnerable?

I am not suggesting that we have wholly lost our second-strike capability, but the window of vulnerability is

either open now or will be in the very near future if these asymmetries are not redressed.

So my question is, How can we negotiate with the Soviet Union by unilaterally undercutting the heart of our deterrent forces?

I, too, reject the idea of MX as some kind of a bargaining chip. It is not a bargaining chip. I think it is a vital necessary program at this moment in the life of this Nation. We have a new regime going into the Soviet Union. We have talks going on in Geneva; we have theater nuclear force talks going on over the Soviets unprecedented deployment of IRBM's targeted at Europe. Yet the committee has eliminated production funds for Pershing II. How is it possible to negotiate from a position of unilaterally withdrawing from our negotiating team its sole source of leverage over the Soviets?

My other question is simply this: How could it be possible to leave our negotiators in Geneva if we gut a strategic modernization effort? The Soviets will never be serious about arms control if they see that we are not serious about making our essential defense requirements. Indeed, we, as I suggested before, are reducing unilaterally the leverage, the strength, and the ability of this country to bring about the very arms control agreement that all of us want, from President Reagan all the way to that side of the political aisle; that kind of arms control agreement that would make a real contribution to peace and stability.

The Congress has declared to law that a survivable land-based ICBM system is vital to U.S. national security, and has time and again committed itself to the MX program.

Today, we are asked to reaffirm that commitment.

We are not equipped on the floor today to debate the technical merits of the President's proposed basing plan for the MX. In part this is so because the Congress, in its many responsible committees, has not had the opportunity to examine and review the intricacies of closely spaced basing. The Armed Services and Intelligence Committees, along with the defense appropriations subcommittees, have yet to hold the necessary detailed hearings on CSB.

When these hearings are held, in due course, and all interested Members have had the opportunity to study CSB and to make informed judgments as to its merits, perhaps the Congress will elect not to proceed with this basing mode. Or perhaps we will find CSB desirable and supportable. I just do not want to prejudge that review.

I believe it would be shortsighted and even irresponsible for us to interrupt the continuity of this program before all the facts are in. Make no mistake, if we deny funding today, we would a priori be foreclosing our option to initiate production of the system in this fiscal year. And we would risk impairing our ability to meet the congressionally mandated IOC of 1986.

Only by supporting the committee's mark can we insure full freedom of Congress to review and judge the merits of the President's proposal, without jeopardizing the success and timeliness of the plan.

I would also like to point out that the consequences of our vote today extend beyond the practical requirement of preserving our options. We must also be aware that other governments will look to our action as evidence of our national determination—of failure of will—to respond to the severe and unprecedented growth of the Soviet military threat to peace.

The governments of our NATO allies, for the most part, recognize the urgent need to modernize our defense in Europe. But how are they to explain to their citizenry why they should support a new generation land-based missile in Western Europe if we refuse to support a new land-based missile in this country?

The President, in his November 22 televised address, stressed the importance of our ICBM modernization program to the success of our arms control efforts. Undeniably, Soviet perceptions of America's willingness to commit the resources necessary to defend our interests affect Soviet behavior at the negotiating table, just as it affects Soviet willingness to take risks in many parts of the world.

This is a time of testing for the United States. Just when the Soviets' vast investment in military power is nearing its peak return, a new regime has come to power in the Soviet Union. Yuri Andropov's long years of service to the Soviet police state have made him a skilled observer of U.S. behavior. If this committee should today deny funding for the MX, our action, without fail, will be interpreted as a sign of weakness. that is a signal we can ill afford to send at this delicate moment in history.

Deterrence, and therefore peace, depends upon the quality of America's strategic forces. Because of the Soviets' steady modernization of their offensive forces, the survivability of our land-based force is in jeopardy and our ability to protect our allies is called into question. The MX missile was conceived and developed in response to that threat, with the support of Congress and four administrations.

The MX missile represents an important improvement to our ICBM force. Its added throwweight and high accuracy will give our strategic forces a prompt counterforce capability that is an essential feature of our nuclear deterrent not found in any other component of our strategic forces. If we undercut the MX program now, we will be signaling our acceptance of a continued decline in American strength. Is this the future we envision for our Nation, a world defined by an unchecked Soviet drive to render the United States vulnerable and unable to support our allies?

To repeat, our vote today is not a referendum on the merits of closely spaced basing. It is, however, a referendum on our willingness to preserve our options, to allow for a careful and responsible congressional review during the new Congress, consonant with our recognition of the urgency of our strategic modernization needs. And it will be viewed by others as a referendum on our determination to preserve America's security and strength, which alone has insured the peace for 30 years.

Mr. EMERY. Mr. Chairman, will the gentleman yield?

Mr. KEMP. I yield to my friend, the gentleman from Maine.

Mr. EMERY. Mr. Chairman, I think my colleague, the gentleman from New York (Mr. KEMP), is making an extremely important statement. The fact of the matter is that last June we embarked on what could be the most important of all our negotiating activities. Undermining those activities at this point would be criminal.

Mr. KEMP. Mr. Chairman, Solzhenitzyn, said that if America does not lead the free world, the free world will have no leader. By our vote today, our leadership will be known.

The CHAIRMAN. The time of the gentleman from New York (Mr. KEMP) has expired.

Mr. DICKS. Mr. Chairman, I yield 3 minutes to the gentleman from Kentucky (Mr. HUBBARD).

Mr. HUBBARD. Mr. Chairman, I rise today in support of the Addabbo amendment to the Defense Department's appropriations bill for fiscal year 1983.

During my 8 years in Congress, I have supported the appropriations requests of the Department of Defense. I want the United States to have everything necessary to be militarily superior to any countries who would attack or invade us or our allies.

I have served in both the Army and Air Force. Fort Campbell, Ky., is in my district. Fort Knox, Ky., is adjacent to my district.

Yesterday other Members of Congress and I had the privilege of meeting with President Reagan, Vice President BUSH, and Secretary of Defense Caspar Weinberger at the White House.

We were told by these outstanding men that the MX missile program is "absolutely essential" to our national security.

Secretary Weinberger told us yesterday that "survivability is the name of the game."

President Reagan told us yesterday: "National security—this is the No. 1 responsibility of the Federal Government."

It appears to me that we in America are waging a war among ourselves regarding our ability to wage a war.

Question: Should we now spend an estimated $35 billion for 100 intercontinental MX missiles in underground silos near Cheyenne, Wyo.?

As one who sincerely believes in a strong national security and an excellent defense system, I say no, not now to the MX missile program.

I see our current economy—high interest rates, record level unemployment, business bankruptcies, et cetera—as more of a problem in December 1982, than continuing to add to our national defense capabilities. I believe our defense is adequate.

On this MX missile issue I say no to the Pentagon. Our Federal budget deficit is all but totally out of control.

Right or wrong, the words, "Here come the Russians" nowadays do not scare Kentuckians half as much as "Here come the creditors."

Yesterday I said: "Our people don't want higher taxes." I voted no to the 5-cent-per-gallon gasoline tax increase.

I strongly believe the American people want lower taxes, less Government and spending restraints across the board. And "across the board" includes defense spending.

I urge my colleagues to vote "yes" for the Addabbo amendment.

□ 1750

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 4 minutes to the gentleman from Florida (Mr. YOUNG).

Mr. YOUNG of Florida. Mr. Chairman, if the United States is going to maintain the triad system that has served us well for such a long time we are going to have to do something about the land-based leg, our ICBM system.

We are talking about upgrading now the Minuteman systems that have included technologies that were developed in the 1950's. Since we put the Minuteman in their holes in the ground, the Soviets have deployed eight new missile systems.

As one listens to this debate one might become suspect that there are those in the Chamber who do not believe in the triad system any longer. There may be those who believe that we no longer need a land-based leg for the Triad.

I would like to suggest, Mr. Chairman, should that be the case, the land-based leg of the triad, the ICBM, is the most powerful deterrent missile system that we have. It is the most accurate. It is the most easy to maintian. It is the easiest to keep on alert, and we are able to communicate with the land-based leg more readily than any of the other systems. Command and control become extremely important if we are talking about a nuclear exchange or strategic situation.

It has been suggested that the Trident submarine, and I support the Trident submarine, but that the Trident submarine could easily replace the land-based system. I think all of the Members in the Chamber are aware that it is very difficult to communicate with the submarine at the depth that he would have to be at to protect himself. It is possible that a nuclear submarine could have been destroyed, taken out of action, and the President or the command authority would not even have knowledge of that for an hour or more after that happened.

That, of course, would not happen with the land-based ICBM.

I think it is important we pay close attention to the necessity, the viability, the importance of the Triad, the three-legged defensive system, and to recognize that the land-based leg is an extremely important part of that.

I hope that we are not talking about eventually doing away with the Triad, with the land-based leg, but I get the suspicious feeling that maybe we are when I hear some of the debate that is taking place today.

One of our colleagues commented on what kind of reaction we have had around the world here in the Congress and the Soviet Union. I can tell you what one of the reactions was just by reading in the newspapers. I read what Yuri Andropov has had to say about it. You recall who he is. He is the new leader of the Soviet Union. He was the Director of the KGB for 15 years.

Well, Andropov is really upset. He is really unhappy to think we might go ahead with building a new missile system despite the fact they have fielded, deployed eight new systems since we deployed the Minuteman.

Andropov does not like it and I do not blame him because it certainly is a deterrent to any adventurism that they might want to get active with.

Mr. ADDABBO. Mr. Chairman, I yield 3 minutes to the gentleman from Tennessee (Mr. GORE).

Mr. GORE. Mr. Chairman, this has been a good debate and I think there is obviously good faith on both sides with Members genuinely seeking to do what is best for the country in their view.

My own conclusion is we should keep the research and development money for the MX missile but stop the Dense Pack deployment.

I come to that conclusion for two reasons. First of all because according to some of the best technical and military experts in this country it simply will not work.

Second, what are the implications if this deployment mode does not work? Are we seeking to close our own window of vulnerability or merely open a comparable window of vulnerability onto the Soviet Union?

If we are going to create a world in which both of the superpowers are vulnerable to a first strike we will create a hair trigger situation that will not be good for either country.

I would submit to my colleagues that the disarray and confusion that surrounds this weapons program reflects the lack of a thoughtful, unifying strategic principal or plan tying together America's weapons programs and our arms control efforts.

We have division where we should have unity.

After this vote I believe we could forge a consensus around the principle of stability and an effort to eliminate the fear of a first strike by either nation. Stability, Mr. Chairman, is not a function simply of weapons building but of weapons building and arms control. Neither is it a function merely of the forces of one side in isolation. It is a function of the relationship between the two forces.

If this weapons system was part of a sensible plan which combined arms control and weapons building to achieve that kind of result I would support it. But in the present environment it is surrounded by confusion and it is said by the experts to be incapable of working as it is advertised.

So I urge an aye vote.

Mr. ADDABBO. Mr. Chairman, I yield 1 minute to the gentleman from Florida (Mr. BENNETT).

Mr. BENNETT. Mr. Chairman, the triad is not the Trinity. The triad has been a method of defending ourselves and for deterring nuclear war. But if we do not have a third arm of the triad that is truly credible it does not do any good to spend billions of dollars on it to pretend that we do.

A noncredible leg of the triad is not a bargaining chip.

I think there is too much money at stake in this matter to spend this money on such an incredible type of defense as involved in the Dense Pack. I believe it will be useless by the time it is in place.

Furthermore, I think the money is desperately needed for conventional weapons. I think our country faces today one of the most serious challenges it has ever had; and that is to be adequately defended from the standpoint of conventional weapons. This amendment strikes procurement for the Dense Pack idea and does not in any way prevent further research and development to see where and how to use the missile. I urge the adoption of this amendment.

Mr. ADDABBO. Mr. Chairman, I yield 2 minutes to the gentleman from Oklahoma (Mr. JONES).

Mr. JONES of Oklahoma. Mr. Chairman, in reaching my decision to support the Addabbo amendment I asked myself four questions. First of all, is this basing mode and the MX missile technically accurate and will it work. To that question I really do not have the answer.

But, second, if it does work, and presuming it does, is it cost effective. There I think I can bring something to this debate.

According to a Congressional Budget Office study that we released about a week ago, and presuming that this missile system in Dense Pack basing mode will work, is it cost effective; and the answer is "no."

The CBO paper concludes that, even if Dense Pack works and the MX survives in substantial numbers, the percentage contribution of the MX missile to U.S. strategic capabilities would be small. By 1996, when all systems are fielded the contribution of the MX would range from about 5 percent to about 13 percent depending on the measure of capability chosen, the scenario assumed for the nuclear exchange, and assumptions about arms control. If there was warning of an attack, the MX would contribute 5 percent of all U.S. warhead inventories likely to survive a Soviet first strike; it would provide 7 percent of those surviving warheads capable of destroying Soviet targets hardened against a nuclear blast. Were a Soviet attack to occur as a total surprise—destroying U.S. bombers not on alert and submarines in port—the MX could provide 7 percent of all surviving warheads and 13 percent of hard-target inventories.

And in order to get small percentage capability we are spending at least $35 billion on this system

It seems to me for 5 percent of our nuclear deterrent after a Soviet first strike that $35 billion minimum is not cost effective.

Another question that concerned me was whether or not the President's hopes of making MX operational by 1986 could be achieved if we deleted the procurement funds in 1983. Again, according to the survey of our committee and because of the lead time involved, if it was decided next year to put this in the 1984 budget, the MX could still be operational by 1986 even if we took out the procurement in the 1983 budget.

Finally, does this preclude the President from having a bargaining chip? There I think we have to see what is left in the budget. There is $2.4 billion in research and development. That is clearly an effective bargaining chip.

Mr. ADDABBO. Mr. Chairman, I yield such time as she may consume to the gentlewoman from New York (Ms. FERRARO).

Ms. FERRARO. Mr. Chairman, I rise in support of the amendments to delete funds for procurement of the MX missile and to reduce funds for research and development, test, and evaluation of the proposed Dense Pack basing mode.

Over the past few weeks, we have seen a major lobbying effort by the Reagan administration and its allies in Congress in support of the MX missile and the Dense Pack basing mode.

We have been told that the MX itself is essential to our national security.

We have been told that Dense Pack is the most survivable basing mode possible, and that without it MX will not be safe from Soviet attack.

We have been told that MX should be called "the Peacekeeper," because it will help deter nuclear attack by the Soviet Union.

Mr. Chairman, I have consistently, in my 4 years in Congress, supported necessary programs to achieve a strong national defense. I have supported new weapons systems, such as the Trident II submarine and the Cruise missile. I have repeatedly voted against amendments to delete all funding for the MX missile.

At the same time, I have supported a mutual and verifiable freeze on nuclear weapons. I do not think there is any contradiction in these positions. I believe the overriding issue in United States-Soviet relations must be the prompt negotiation of serious arms control and reduction agreements. I believe both countries should agree to a freeze right now. But I do not believe the United States can simply adopt a freeze unilaterally and hope for the Soviets to follow suit.

The arguments in support of spending a billion dollars this year to build the first five MX missiles are not consistent with my view of our national security requirements. They are based on the notion that we have fallen dangerously behind the Soviets, when the best information available is that we still have an advantage, and that no prominent U.S. military person would trade our forces for the Soviets.

I am not ready today to decide finally that we do not need the MX missile and that the project should be put on the shelf forever. But the reservations I have about the missile lead me to the decision that I will vote today to delete funding for building those first five missiles.

My biggest concern is that we are building a missile that still may not have a home. While the President is committed to Dense Pack, serious questions remain about whether such a system can work. Dense Pack is clearly not the first choice of our military leaders. The idea behind it—that incoming missiles will self-destruct, leaving most of the MX missiles undamaged—is extremely controversial, and flies in the face of a generation of accepted logic regarding nuclear planning. With so many unanswered questions, Dense Pack is not an acceptable place to put the MX.

In addition, there is some question over whether the MX is in fact ready to be built. While this bill provides $1 billion for building the MX, it also provides $1½ billion for research and development, test and evaluation of the missile. We should not be building the missile if there is still that much work to be done on research and development.

The debate over MX includes many serious questions about whether the missile poses a first strike threat and therefore increases the danger of nuclear war, and whether we should commit $30 to $50 billion to a weapons system that may not be necessary to preserve national security. For now, however, we should put the missile on hold until the basic questions of where to put it and whether it is ready for production have been satisfactorily answered. I urge my colleagues to join me in supporting the amendments to delete funding for procurement of the MX and to reduce research funding on Dense Pack.

Mr. ADDABBO. Mr. Chairman, I yield 3 minutes to the gentleman from Washington (Mr. DICKS), a distinguished member of the subcommittee and coauthor of the amendment.

Mr. DICKS. Mr. Chairman, today I would like to read a letter that we received from two former arms negotiators to Chairman ADDABBO, because so much has been made about MX as a bargaining chip.

DEAR MR. CHAIRMAN: One claim for the proposal to place the MX missile in closely spaced basing is its potential use for negotiating purposes with the Soviet Union. As former United States strategic nuclear arms negotiators, our experience in past arms control talks has taught us to be wary of bargaining chips. We believe the United States should proceed with strategic arms programs that are necessary for our security. Such weapons systems need no bargaining chip rationale to secure public support or approval by Congress. They will stand on their own merit.

The MX missile program should not be justified as a useful bargaining chip in discussions with the Soviet Union. It should be examined for its impact on our national security, on a more stable strategic balance, and on the hope for nuclear arms reductions.

Weapons systems employed as bargaining chips have led to agreements to arm, rather than to reduce weaponry. We should recall the testimony of then Under Secretary of Defense David Packard who told the Congress in 1971 that the MIRV is a very important bargaining chip. Today we and the Soviets have deployed over 14,000 MIRVed warheads. We recall the testimony of then Director of Pentagon Research and Engineering, John S. Foster, who called cruise missiles essential to insure that we are in a position of strength to negotiate on this class of strategic weapons during the next round of SALT.

Today the United States has plans for over 85 air-ground and sea-launched cruise

missiles. We have no doubt that the Soviet Union will match this effort.

It seems especially curious to hear of Administration support for MX—

Now listen to this—

As a bargaining chip since were the Soviets to accept the U.S. START proposals at Geneva, the United States would be free to deploy the MX as proposed. Some bargaining chip.

There are many serious questions about the proposed closely spaced basing mode for the MX that need thorough examination. But we strongly believe the MX production funding should not be approved or justified on the basis that it is a useful bargaining chip.

Sincerely,

GERARD C. SMITH AND PAUL C. WARNKE.

I think it is wrong for this side to say that we are somehow undercutting the administration. We still have the Trident submarine, we have the prospect of building the C-5 missile which has the same capability as the MX.

● Mr. MILLER of California. Mr. Chairman, I rise in favor of the amendment to delete funding for deployment of the MX Dense Pack program.

Some will oppose this concept because of its potential $35 billion cost. Malcolm Forbes, publisher of Forbes magazine, recently called on President Reagan to reduce his excessive military spending in order to reduce the unacceptable Federal deficit. Mr. Forbes denounced the Dense Pack concept as a "dunce pack" idea.

My objection is strategic as well as financial. We are all aware that the Dense Pack concept would concentrate over 100 MX missiles in hardened silos, forcing an aggressor to target numerous warheads into the MX site to take out our weapons. The effect of those multiple detonations, according to administration strategists, would be to throw some of the incoming missiles off target and allow us, after a period of time, to launch our own ICBM's without risk of their being countered by Soviet weapons.

According to a recent report, the Soviets would have to detonate 10 megatons of explosive force over the MX site every minute to successfully pin down our missiles. We can only presume that the Soviets would do precisely that, and that they will undertake a massive missile-launching program to develop sufficient missiles to achieve that goal.

Brig. Gen. Gordon E. Fornell recently concluded that in order to achieve that capability, the Soviets would have to undertake "the development of new warheads larger in yield." So, we are being told by the Reagan administration to initiate a program which will assuredly push the Soviets into the development of a new round of larger nuclear weapons.

Let us look for a moment at the effects of exploding 10 megatons a minute, not on the American MX's, but on the American people.

Remember that the strategy would require detonation of 10 megatons per minute for however long the Soviets want to prevent us from launching our own MX missiles.

A single 10-megaton bomb has as much explosive power as 800 Hiroshima bombs. So, if the Soviets wanted to pin down our MX's for just 5 minutes, they would have to detonate the equivalent of 4,000 Hiroshima bombs—4,000.

Presumably, MX strategists are heartened that in the aftermath of such an attack, and the attack might last far longer than 5 minutes, we could launch a similar assault on the Soviet Union. But the United States that launched such an attack would not be the country we seek to defend, for much of this Nation would be a radiated, lifeless, and dying shell.

"A 10-megaton attack would leave any nation on Earth devastated beyond anything in our historical experience," Jonathan Schell wrote in "The Fate of the Earth."

Dense Pack proponents misleadingly suggest that the devastation might be contained to the vicinity of the MX site in Wyoming. But the residents of the other 49 States, and indeed of the entire hemisphere, have little to feel secure about.

A 10-megaton explosion—the equivalent of a single minute's assault on the MX site—would lift millions of tons of dust into the atmosphere, producing a cooling of the Earth's surface. Repeated blasts would deplete the ozone layer, exposing all life to dangerous levels of ultraviolet radiation.

Radioactive clouds from such explosions would move across the United States, producing dust and rain fallout which would contaminate much of the Earth's surface. A 20-megaton blast—2 minutes' attack on the MX Dense Pack—would flatten an area 24 miles in diameter, destroying 450 square miles. People 23 miles away would be severely burned, and exposed people over an area of 2,460 miles would suffer second-degree burns.

Depending on the prevailing winds, a single 20-megaton attack could result in the deaths of 20 million people.

The American people must keep in mind that there would be far more than one 20-megaton explosion. If the Russians knew that our missiles could be kept in their silos only by repeated 10-megaton explosions every minute, the attack would likely be in the thousands of megatons. And the effects of that level of assault would effectively end life as we know it, not just in Wyoming, but throughout this Nation and much of the globe. And among the survivors, the alteration of photosynthesis, the massive increase in cancers and genetic abnormalities, and the destruction of the food chain would render our planet virtually uninhabitable.

This is the inconceivable scene which the Dense Pack paints. Dense Pack is a clear statement to our potential adversaries to build bigger weapons, and to plan to use them in order to tie down our own centralized and vulnerable missiles.●

● Mr. OBERSTAR. Mr. Chairman, this House faces a historic choice. We have the opportunity to prevent the production of a tremendously costly and wasteful weapons system. As a legislative institution, we have the opportunity to exercise a check on a colossal policy mistake by the executive branch. The cause of world peace and that of fiscal responsibility will not allow us to fail.

I have consistently voted against funding of the MX missile system. When I cast my votes against funds for the MX in the past, I did so in the realistic expectation that the present membership of the House would not challenge the administration by rejecting a major weapons system. I think the mood of the House is different today.

The House vote today will determine the course of defense spending not only in fiscal year 1983, but in the years to follow; not only with respect to MX, but also to a whole series of costly and unnecessary weapons systems.

I am convinced that a vote today for fiscal responsibility and defense sanity will influence our colleagues in the other body to join us in saying, at last, the MX, and particularly the Dense Pack system, is a waste of the taxes paid by the people who have sent us to this House.

Through fiscal year 1982, this system has already cost us over $4.7 billion. The administration has requested an additional $4.5 billion for the current fiscal year, including the first construction funds—a very significant policy decision. It is curious, to say the least, that the administration is requesting $1.4 billion for procurement, initiating actual production, when it is still requesting funds for research and development. The rhetorical question that occurs to one is: "Is this system ready to go or not?"

Opposition to the MX is not partisan. I opposed the MX missile years ago when President Carter asked for funds for it. I did so because I had grave reservations about committing our Nation to such an expensive and questionable system. The questions are answered; the doubts resolved—against the system.

The Dense Pack basing system, the latest concoction of the Department of Defense for basing the MX, does not make me very confident about spending $35 or $40 billion of taxpayer money. If I or one of our colleagues came before this House to ask for one-tenth as much money for a domestic

human resources program, with a proposal as harebrained as the dense pack, we would hear the catcalls on the other side of the beltway.

The time has come to look upon the MX with the same skepticism applied to nondefense spending.

The proposed basing system is untried and untestable. Furthermore, the MX appears to be based upon the unrealistic "window of vulnerability" theory. At any first strike attack on the United States, the Soviet Union would face certain and massive U.S. retaliation.

The issue before us now is whether the U.S. House of Representatives will approve billions of dollars for an unworkable missile system with an untested basing mode. I am deeply concerned about the implications on the relationship between Congress and the Executive in the development of defense policy if we rubber stamp the ridiculous MX proposal. I ask the question: "What kind of legislative institution would approve such a proposal?" If we approve funds for procurement of the MX, we should consider abolishing the appropriations process and bring administration defense budgets directly to the floor under a unanimous consent request.

The legislation before us contains funds for procurement as a result of the narrowest possible vote in the Appropriations Committee—a tie vote defeating an amendment to delete these funds. I want to commend the gentleman from New York (Mr. ADDABBO) the chairman of the Defense Appropriations Subcommittee, for his leadership in attempting to impose fiscal restraint and commonsense on the Defense Department budget. He has won the admiration of all of us here in the House who want this senseless waste of taxpayer dollars to end.

I urge adoption of Addabbo amendment, as well as an end of all funding for the MX missile.●

● Mr. GOODLING. Mr. Chairman, in considering the issue of nuclear deterrence, and in particular, the present issue of the MX missile, we should ask ourselves what exactly constitutes deterrence. The prevailing point of view seems to be that we must match the Soviets missile for missile, bomb for bomb, megaton for megaton, and just to be on the safe side we should whenever possible be one up on them. For myself, I take a different point of view: We do not need to gain superiority over the Soviets in the nuclear sphere, nor do we need to match them missile for missile. All we really need to deter the Soviets are a few well-placed missiles aimed at a few select targets in the Soviet Union, and the damage they would be capable of perpetrating would be more than enough to prevent the Soviets from initiating a first strike. For this, we do not need the MX missile, and certainly not 100 of them in 20 square miles out in Wyoming.

We should remember that nuclear deterrance was orginally the means by which we hoped to prevent a conventional attack by the Soviets on Western Europe. Now that the Soviets have a rough parity with us in the nuclear sphere, that position is clearly passé. We should now concentrate our efforts on a thorough revitalization of our conventional forces with a nuclear safeguard such as I have already described. That would be far better than our present course which weighs heavy on the budget.

The great civilizations of the past fell not from outside attacks, but from internal dispute and dissent. The danger from the Soviet Union is not as great to the United States as the dangers it faces from within: Moral strife, greed, and fear. Let us not embark on a course that is dominated by fear and fueled by greed and strife which could well result in the economic and moral collapse of this great Nation of ours. Let us instead put forward a unified and moral front without the MX missile and similar such nuclear programs. This is the feeling I get from my constitutents, as I believe it is of the vast majority of Americans.●

● Mr. HERTEL. Mr. Chairman, December 7 is a day which will always be associated with sneak attacks. It is ironic that this Congress is debating a deployment scheme for the MX missile to protect it from sneak attacks.

Closely spaced basing is a defensive arrangement based on a theory of nuclear fratricide. The theory of nuclear fratricide is impossible to test. It is important to evaluate what we do not know when we consider the value of Dense Pack basing. The Dense Pack theory postulates that in the hellfire environment of an atomic attack, later, incoming warheads would be destroyed by electromagnetic pulse or debris kicked-up in the maelstrom of the blast through which our missiles can supposedly be launched. This defense scenario is based on a Hiroshima type blast in the air. The picture is radically altered by a ground-burst detonation.

Proponents of Dense Pack claim this would enhance and lengthen the fratricide effect for incoming missiles. It is unknown whether MX could launch through this environment. However, it is important to remember that the environment created by an atomic blast is not clearly understood. An appropriate analogy would be comparing it to conducting launch operations on the surface of the Sun, if only momentarily. Furthermore, should the Soviets be capable of simultaneously detonating warheads, the dynamics of the blast environment changes totally and incomprehensibly.

Second, let me caution my colleagues, that we are plainly deluding ourselves if we believe that fratricide will be the defense of the Dense Pack. With this particular configuration, it is postulated that there would be a limited number of cross pull or trajectories which could be attack corridors for a Soviet nuclear salvo on the 14 square mile target in Wyoming. Theoretically, it should be possible to defend this area with an antiballistic missile system, rather like a video arcade game. A single ABM system is permitted under the SALT treaty. The extremely difficult technical problems which must be overcome to implement an ABM system include: differentiating MIRV warheads from meteorites, which they would resemble on radar, and submarine launch ballistic missiles could invalidate the defense by launching south to north or west to east. I hope my colleagues will attempt to evaluate the cost factors.

It was nearly a decade ago this body rejected the ABM, not on the grounds of technical feasibility, but prohibitive costs; that was prior to a threefold decrease in the value of the dollar. You have not been told this, but it cannot be denied, if you buy the Dense Pack, you will ultimately be forced to buy ABM at a price that is anyone's guess. You will be allocating a massive amount of our Nation's security dollars for the deployment mode of a single leg of our nuclear triad which is of questionable quality under actual conditions of combat and would require yet another defensive system of unproven quality and cost.●

● Mr. LAGOMARSINO. Mr. Chairman, there has been some confusion, at least in the press, about the effect of today's vote. In voting on this amendment, we are in no way committing ourselves to a specific basing mode for the MX. What we are doing is buying ourselves some time in which to make a final decision.

The closely spaced basing mode—or Dense Pack, as it is called—was proposed by the administration on November 22, after a year's study. Over the next few months, the various committees in Congress will hold extensive hearings on this and alternative proposals for basing the MX. It is quite possible the hearings may show that the Dense Pack mode is not feasible, in which case it would be rejected. But there is nothing to be gained from prejudging our committees' review by cutting funds for the MX now. If we deny funding at this stage, we would foreclose our option to begin production of the missile itself in the next year; what is worse, we would be sending the wrong kind of signal to the Soviet Union at a very critical time, just as we are starting negotiations for arms reductions.

There are few who would deny that we desperately need to replace our aging ICBM's with a new model. The

MX would be easier to maintain, and incorporate the most recent technological advances. The only real question, in the absence of an agreement with the Soviets to reduce strategic weapons, is the basing mode. If, however, in the absence of any such agreement, we cut off funds for production of the missile itself, the Soviets will have no incentive to negotiate. Congress should be given a chance to review and judge the merits of the President's proposal without jeopardizing the success and timeliness of the program.

In conclusion, the vote on the MX is not a referendum on the merits of the basing mode. It is, however, a referendum on our willingness to preserve our options, to allow a careful and responsible legislative review by the new Congress, and to give our arms negotiators something with which to negotiate, not just on the START but on intermediate-range nuclear forces in Europe.●

● Mrs. SCHNEIDER. Mr. Chairman, the attempt to develop an absolutely involnerable land-based missile is futile. For every effort to harden sites, there will be an effort to develop a counterstrike large enough to destroy them. For every basing mode that relies on a precision timed strike for its defense, precision timing will be perfected. And for every missile system developed to serve as a bargaining chip in future negotiations the other side will engage in the building of bargaining chips of their own.

If I felt that the addition of a thousand warheads to our nuclear arsenal would increase our national security, I could perhaps view it in a different light. But the addition of a $26 billion missile system which is technologically questionable, strategically unsound, and morally indefensible cannot be viewed in a positive light. Some proponents of the MX system, including GTE a major defense contractor, admit that the margin of superiority that the MX would provide could disappear within 2 to 5 years of its full operational deployment. An increasing number of defense experts recognize that the deployment of the MX in the Dense Pack configuration would require the development of yet another expensive, destabilizing, and untestable system to provide for antiballistic missile defenses.

Every Member of Congress, every citizen of this country is deeply concerned about our national security. At a time when our budget deficit is expected to exceed $200 billion, we must carefully examine how a new missile system will affect our national security. Noel Gayer, a former Director of the National Security Agency was recently quoted as saying that:

The Soviets are going to match (the MX) if it takes their last kipek and they're going to feel even more insecure than they do now.

Our national security cannot be increased with the deployment of a missile system that trivializes a nuclear exchange in a contest over which side can destroy the land-based missiles of the other. Such thinking not only denies the massive delivery systems available to both sides, it also denies that either side is likely to quit when it is behind.

I urge my fellow Members of Congress to vote against the MX missile system as a first step in affirming our desire to reduce the deployment of nuclear weapons in all nations.●

● Mr. ROYBAL. Mr. Chairman, I rise in support of Mr. ADDABBO's amendment to delete $988 million for the procurement of the MX missile.

Ever since Mr. Reagan was elected, we have heard little else except the importance of maintaining a strong national defense. I have no argument with that—I doubt any of us do. Instead, my concern stems from the way this administration defines "defense."

They would have us believe that the chief answer to our country's security lies in throwing billions of dollars into complex, costly and largely unproven weapon systems such as the MX missile system. The President wants us to spend at least $26 billion on the MX in the Dense Pack basing mode—that cost could turn out to be well over $35 billion when inflation and cost overruns are taken into account. And this is just for the baseline system. When other essential costs are added in, such as warheads for the missiles, support and sensor equipment, and the antiballistic missiles many scientists feel will be necessary to protect the system, the costs could well exceed $60 billion. What do we get for all this money?

According to the administration, we get an effective deterrent to a first strike by the Soviets, a means of defending ourselves should such an attack occur, and a "bargaining chip" to be used in arms reduction negotiations with the Soviets. Many of our leading scientists and defense experts have compiled an astonishing array of facts and figures indicating that none of these arguments are valid.

We have all seen the figures that show how the Pentagon conveniently skipped over the existence of some of our major weapons, including our submarine fleet, when assessing our vulnerability to the Soviets. Indeed, the Congressional Budget Office estimates that the MX system could provide as little as 5 percent of our retaliatory warheads. These facts make it difficult to understand why we need such a system in the first place.

We are also very familiar with the myriad problems that surround the Dense Pack basing mode. It will be very vulnerable to Soviet attack, since measures are available to counter the "fratricide" effect of all the missiles being clumped together. Most experts believe that antiballistic missiles and additional silos will be needed to effectively protect the MX missiles. Why spend money for missiles we still cannot base effectively?

Not only is the MX system too vulnerable and too costly, it would also violate both SALT I and SALT II. And it does not take much in the way of commonsense to realize the flaws in the bargaining chip theory. The Soviets are just as paranoid about falling behind in terms of weapons production and capability as we are. They have made it clear they will waste no time in developing counters to the MX, no matter what cost and effort is necessary. This is no way to discourage an arms race.

As I said, we have heard all these arguments many times. However, there is yet another aspect to this entire issue that I have not heard fully discussed. Have we really stopped to consider what elements constitute an effective national defense?

Surely, we do need weapons—planes, ships, submarines, tanks, missiles—all the terrible trappings of modern warfare. We need a well-prepared, well-trained and well-equipped fighting unit. We need the force of our values behind us—the belief that our cause is right.

But there is something else that we need, and it is that element which the administration is ignoring—we need the full strength and cooperation of civilian America in any military effort this country undertakes. What good are these costly and complicated weapons systems if we have no one to conceive of them, to build, operate and maintain them, to improve on them? What purpose will these weapons serve if we fail to address the issues that are tearing this Nation apart—inadequate education and training for our people in the face of higher and higher levels of technology; the failure of thousands of businesses, large and small; the depletion and irresponsible management of our resources and continued pollution of our water and air; our growing inability to meet the basic needs of our people. These issues must be addressed or all the sophisticated weapons in the world are not going to be of much help to us.

I urge you to vote for the Addabbo amendment to delete funds for the MX missiles. In the interest of the defense of this country, our priorities must lie elsewhere.●

● Mr. OTTINGER. Mr. Chairman, I rise in strong support of the amendment to the fiscal year 1983 Defense Appropriations bill (H.R. 7355) to delete funding for procurement of the MX missile. I want to commend my distinguished colleague from New

York, the chairman of the House Appropriations Subcommittee on Defense, Representative JOSEPH ADDABBO, for leading this fight against the MX program.

I oppose the MX missile—in any basing mode—because it will make us less secure by increasing the likelihood of nuclear war and accelerating the arms race. The MX is exceedingly destabilizing, costly and unnecessary. Furthermore, it will violate the SALT II Treaty and is likely to eventually require abrogration of the Anti-Ballistic Missile Treaty.

The entire MX program has been based on an illusory concept: the so-called "window of vulnerability." We are developing a $50 billion weapons system which will add 1,000 nuclear weapons to our arsenal on the basis of this concept which is flawed in two major respects. First, the window of vulnerability premise ignores the reality of our current nuclear capability versus that of the Soviets. Second, it contradicts the heart of nuclear strategy.

The myth that our nuclear forces are vulnerable to the Soviets is dispelled when you consider the present state of our arsenals. We still exceed Moscow in sheer destructive power and numbers of warheads. Our arsenal is not concentrated in land-based missiles, but is divided among virtually undetectable submarines and manned bombers and land-based missiles. The Soviets, on the other hand, maintain a vulnerable land-based ICBM force which constitutes 75 percent of its total strategic deployment.

The MX is highly destabilizing because it enhances our first strike capability. The high explosive yield and extreme accuracy of the MX poses a clear threat to the Soviet Union and its land-based forces in particular, forcing Moscow to consider a preemptive or "launch on warning" attack against the United States in times of crisis.

The MX missile also misses the point of our nuclear strategy, which has been to maintain enough firepower to wreak an unacceptable level of destruction after a Soviet attack. We have already far exceeded the minimal nuclear firepower necessary to deter the Russians from attacking, and there is no need to add 1,000 warheads to our arsenals as is envisaged in the MX program. Rear Adm. Gene La Rocque (USN, Ret.), Director of the Center for Defense Information raised this point in a recent letter to me:

We do not need the MX because we can already cause 12,000 nuclear warheads to be exploded on the Soviet Union. When finally deployed in the late 1980's, the MX will add only 1,000 nuclear weapons to an already overwhelming nuclear arsenal.

Even without the MX, by 1989 the U.S. will be able to explode more than 19,000 nuclear weapons on the Soviet Union. Nearly 7,000 of these will be on invulnerable submarines and thousands more will be on alert bombers that will escape any Soviet first-strike.

Incredibly, President Reagan intends to go ahead with this redundant nuclear capability to "make the rubble bounce." He proposes that the MX be placed in a "Dense Pack" basing mode, which has become one of the most ludicrous aspects in the MX debate.

The Dense Pack has never been tested and is frought with countless uncertainties. Many eminent scientists and defense analysts have predicted that the Soviets, in trying to overcome the U.S. first strike capability, will develop methods of defeating Dense Pack by pinning down the MX or by creating earth penetrating weapons to avoid "fratricide."

The debate over "Dense Pack" has been particularly alarming, as voices are raised advocating the deployment of an extensive antiballistic missile system. This would violate our most effective and stabilizing arms control agreement with the Russians and escalate the arms race to new and more perilous heights.

President Reagan ignores the MX's dangerous implications for existing United States-Soviet arms control agreements. Indeed, he frames the MX as a "bargaining chip" which will be used to exact concessions from the Soviet Union. This psychology has fueled the arms race for the past 30 years; it is ludicrous for the President to assume that he can develop for the United States a true first strike capability and not expect the Russians to do everything in their power to counter it.

The MX promises a future plagued by instability, obsessed with an escalated arms race and devastated by excessive spending for new weapons systems at an enormous cost to our social and economic structures. It will be a future dependent on a perilous hair trigger response in times of crisis. In short, the MX promises a future that will be less secure than ever.

I strongly urge my colleagues to support Chairman ADDABBO's amendment to delete funding for the MX missile. I am including in the RECORD a copy of the letter which I recently received from Rear Admiral La Rocque:

CENTER FOR DEFENSE INFORMATION,
Washington, D.C., December 2, 1982.

Hon. RICHARD L. OTTINGER,
Rayburn House Office Building,
Washington, D.C.

DEAR CONGRESSMAN OTTINGER: Thank you for your inquiry concerning the MX missile/Dense Pack proposal of the Department of Defense. I know that you and other members of Congress face a most important decision on this matter. I want to make one central point which I believe cuts to the heart of the matter.

The basic issue has been lost in the confusing debate over the shifting kaleidoscope of MX basing schemes, huge costs, and plans to use the MX missile to fight a nuclear war: the United States simply does not need the MX missile, no matter how it may be deployed or how much it costs.

We do not need the MX because we can already cause 12,000 nuclear weapons to be exploded on the Soviet Union. When finally deployed in the late 1980's the MX will add only 1,000 nuclear weapons to an already overwhelming nuclear arsenal.

By the time the MX is completed we will have built at least 10,000 other new nuclear weapons for striking the Soviet Union. This includes weapons for the air-, ground-, and sea-launched cruise missiles, the Trident missiles, Pershing II missiles, and many new gravity bombs.

Even without the MX, by 1989 the U.S. will be able to explode more than 18,000 nuclear weapons on the Soviet Union. Nearly 7,000 of these will be on invulnerable submarines and thousands more will be on alert bombers that will escape any Soviet first strike.

This is the main point: the MX missile, destructive as it may be and invulnerable as it probably will not be, simply is not needed because it will add almost nothing to the U.S. nuclear strength. It is not worth anything at any cost or in any basing mode.

Sincerely,

GENE R. LAROCQUE,
Rear Admiral USN (Ret.),
Director.●

● Mr. BOLAND. Mr. Chairman, I intend to support the amendments to delete fiscal year 1983 procurement funds, and reduce research, development, test and evaluation funds, for the MX missile.

I have not been convinced by any of the arguments I have heard or read that the United States needs a new, land-based ICBM. Even if that need could be demonstrated, I am not convinced that the MX missile, in the Dense Pack basing mode would meet that need.

It seems to me that the call for a new, land-based ICBM is grounded on two premises. First, that ICBM's which are land-launched are, solely because of the character of their launching platform, clearly and unalterably superior to missiles launched from any other platform; and second, that the means exist by which the survivability of land-based ICBM's can be guaranteed to the maximum extent mathematically possible for any weapons system. I do not believe that either premise is valid. Land-based ICBM's are currently more accurate and powerful than either sea-launched or air-launched missiles. That fact, however, is not a constant in the calculation of the relative merits of weapons systems. We already have under development an extremely powerful submarine-launched missile with improved accuracy—the Trident II D-5 which will have essentially the same performance characteristics as the MX. Submarine launching of ballistic missiles is a technology at which the United States excels. There is therefore no reason to expect that the Trident II missile, which is scheduled to be deployed only a short time after

the deployment of MX, will not perform as expected.

Even if the military advantages of land-based ICBM's could never be matched by other weapons systems, there would be no reason to invest more of our resources in them unless they could survive a nuclear attack. I realize that no weapons system is totally invulnerable, but I have not been convinced that the survivability problems associated with land-based ICBM's are amenable to a solution that would place them on a competitive plane with air-launched or submarine-launched weapons. Land-launched ICBM's are, it seems to me, inherently vulnerable. Any attempts to enhance vulnerability, such as the Dense Pack basing mode, can be readily countered. Countermeasures demand further improvements which invite further countermeasures in a never ending and costly circle that in the end yield us little if anything in terms of added security.

Mr. Chairman, I know that the Soviets has made a major investment in new land-launched ICBM's, and that most of their strategic nuclear weapons are land based. That was, and is, their choice to make. I see no reason to follow their lead especially in light of the clear technological and numerical advantage we hold in submarine-launched ballistic missiles and air- and sea-launched cruise missiles. In spite of appearances to the contrary, the resources we can devote to defense are finite. We cannot afford to procure weapons systems, like the MX, which are of dubious utility. Although I support efforts to bring an end to the arms race, I also know that until those efforts show promise, we must maintain a strong defense. I believe we can do so more resourcefully and more beneficially by improving existing systems of demonstrated value rather than by sinking billions of dollars into systems that will not contribute to the national defense.●

● Mr. GUNDERSON. Mr. Chairman, the open and well-publicized debate of the President's MX/Dense Pack proposal, both by the Members of Congress and the American public, has offered all citizens an opportunity to participate in the decisionmaking process which yields our defense policy. It has also offered every American the opportunity to consider, in their own mind, the factors contributing to such an important decision. One can only conclude that our national defense decisionmaking process, as it now stands, is somewhat fragmented and clearly deficient in that it fails to examine the entire national security picture.

Clearly, the choice of any single defense strategy or weapon, the MX missile for example, cannot be dependent solely on the discussion of cost or capability alone, or even simply its place in the arms reduction process. This consideration of a weapons system as controversial as the MX must take into account the numerous factors, both domestic and international, which accompany any such decision.

My decision to vote against procurement funding for the MX missile was based upon the primary factors which must be considered in any approach to any weapons decision and to defense spending in general. Several primary factors present themselves in the examination of this missile, which, when considered, in total, will yield an acceptable decision.

The first concern is the status of the international, strategic climate and the effect this weapon would have on it. In addition, our own overall defensive strategy, both strategic and conventional must be examined with an eye toward the role this weapon will play in it.

Clearly, certain deficiencies have appeared in the U.S. capability to defend itself, due, in part, to the neglect of the last decade. This neglect has also reached our capability to continue an unqualified deterrent, as our ICBM's and B-52's continue to age and deteriorate.

The administration has forwarded the revitalized MX missile as the panacea for our land-based needs. While the maintenance of the strategic triad is a worthwhile goal, the MX does not have to be the replacement. Clearly, the development and deployment of a smaller, less costly ICBM, though admittedly years away, would be more desirable than the $35 billion MX.

In terms of our own strategic policy, the improvements which will be made by the adoption of the cruise missile, B-1B bomber, the Trident submarine deployment, and, in the future, the advanced technology bomber (Stealth) will surely compensate for the deficiencies of the Minuteman force.

A second concern, most important at this juncture in the Nation's history, is the economic difficulties facing the country. While most other programs in the Federal budget, such as education or energy, have been asked to tighten the fiscal belt, the Pentagon has been allowed to forward budgets which contain at least a 7-percent real growth. It is difficult for any Member of Congress to ask his constituents to make do with less when our own Government appears to support the oft-stated fiscal austerity premise only in selected cases.

The effect of the MX on our relationship with other nations, the third factor, offers a vote in favor of the weapon's deployment. What effect the weapon would have on the Soviet Union is open to debate. Their recent rhetoric on the deployment of a superior weapon in response to the MX may be no more than an effort to further persuade our public against the missile. However, we must also consider the possibility that the procurement of the MX will again launch the Soviets into the arms race—a contest they have participated in undeterred for the past two decades.

The termination of the program, on the other hand, could have a significant effect on our relationship with our allies in Europe. The deployment of the MX on our own territory would make it much easier for the European governments and people to rationalize the deployment of the Pershing II and ground-launched cruise missile on their territory next year. Clearly, this deployment is vital to the defense of Europe and the potential success of our negotiations with the U.S.S.R. in Geneva.

The fourth factor, the actual capability and performance of the weapon is, in this case, virtually untestable. While the concept of fratricide used in the Dense Pack may seem plausible on paper, its actual effectiveness can only be proven under one circumstance: a nuclear attack. Under such a limitation one must wonder whether this weapon can actually reaffirm and reassure our deterrent capability. Despite the acknowledged capability and accuracy of the missile itself, will it reinstate in the Soviet mind the doubt that assured destruction of our land-based force is not possible? If a significant portion of our society, including many defense experts believe it unworkable, what guarantee is there that the Soviets would not reach a similar conclusions?

Finally, the MX clearly ranks below several other weapons, both strategic and conventional, which are of critical need to our Armed Forces. Procurement of additional Trident submarines, deemed by all experts the safest leg of the Triad, has been slowed in the defense appropriations bill in favor of the MX. The appropriations legislation we are considering today contains further development and procurement funds for a military buildup which includes a new strategic bomber, air-launched cruise missiles, ground-launched cruise missiles, the new M-1 tank, several aircraft including fighters, helicopters, tankers, and cargo aircraft. The bill also funds two nuclear aircraft carriers, and numerous other conventional and nuclear weapons.

In this context, the Pentagon must also learn to conserve in accordance with the fiscal difficulties facing the Nation. The prioritized value of the weapons available should be established by the Department of Defense. Instead, a request has been offered that does not simply improve the areas where we are most lacking or simply further solidify the systems which provide the best security, it asks for improvements in all areas. Such a

request may seem reasonable upon initial scrutiny, but in actuality the funding limitation placed upon our Nation, and thus the Department of Defense, preclude such a spending policy.

While no American citizen, especially myself, desires a weakened national security capability, the prosperous program outlined by the Pentagon goes beyond what is rationally needed for our security, particularly in light of our current economic problems. The pressing needs in other areas and the valuable contributions other weapons and programs can make to our defensve effort eliminate the MX missile as an immediate priority.

Although the termination of the system may have an undesired effect on our NATO relationship, the progress we are making in other areas of our defense capability should well indicate to the Europeans our firm commitment to the improvement of our forces. This, in turn, will provide the needed rationale for their participation in the improvement of the Atlantic Alliance's defenses through the deployment of the Pershing II and the ground-launched cruise missile.

In the future we must continue to view our defense spending in terms of the factors I have outlined. Clearly, the fractured decisionmaking process we now use and the distinct lack of final decisions has worked only to further delay the improvement and modernization of our defensive capabilities. Our consideration must be based upon the entire national security interest, not simply the shaded view of one group or another.

The sum parts—the strategic climate, the economy, foreign affairs, the weapon's capability, and the requirements of the defense budget—all indicate that the MX is not the answer to our national security and defense needs.●

● Mr. WIRTH. Mr. Chairman, in the Middle Ages during a different era of military strategy, knights on horseback were loaded with ever more armor in an effort to make them less vulnerable to enemy attack. By the 15th century, they lost all mobility, and in hand-to-hand combat they were sitting ducks for slaughter by foot soldiers lightly armed with crossbows. Too much hardware made the armored knight useless for carrying out his basic military function.

This is disturbingly similar to what we are considering today. We are being asked to spend $988 million for procurement of five MX missiles, and $2.5 billion for research and development of the missile and the administration's proposed Dense Pack basing mode. The current total cost of the program is estimated at $26.4 billion, a figure we can expect from past experience to rise dramatically over the life of the project. Down the line, we may well be asked to spend additional tens of billions of dollars for an antiballistic missile system to protect the MX.

These staggering figures overlook some very simple points. First, the MX missile is not ready for procurement, or why would we need to spend $2.5 billion on research? Second, and even more basic, is this weapon necessary to our basic defense needs?

I think the answer is clearly "no," and urge my colleagues to support the amendments offered by the gentleman from New York (Mr. ADDABBO). I would like to briefly outline my reasons for believing that the MX, far from offering our country added security, would indeed make our country less secure.

First, the MX missile could give the United States a first strike nuclear war capability, thus effectively destroying the rough balance that now exists between our country and the Soviet Union in nuclear forces. The MX would allow our country to destroy the bulk of the Soviets' land-based missiles, which represent 75 percent of their nuclear force. It would thus be a highly destabilizing system, providing the Soviet Union with, at the very least, a public excuse for massive new nuclear weapons development.

Second, the alleged window of vulnerability is highly questionable. Despite the Soviet Union's lead in numbers of land-based ICBM's, the United States is still far ahead in terms of nuclear warheads, most of which are based in virtually invulnerable submarines. We are already able to respond to any Soviet attack with thousands of missiles—is a significant deterrent. MX is not justified in terms of additional needed deterrence: It is only justified if we embrace it as a first strike weapon. That is not, and should not be, U.S. policy.

Third, MX would endanger, and perhaps violate outright, the few fragile nuclear arms control treaties we have successfully negotiated. The administration argues that because the MX is to be technically transportable, it will not violate SALT II's prohibition on additional fixed missile launchers. But that is more semantics than reality, and is being interpreted as such by the Soviets. SALT II, while unratified, is the best framework of its kind we have been able to devise and must not be undermined, at least until we have an agreement to replace it. Additionally, the administration plans to deploy an antiballistic missile system to protect the MX if the Soviets take steps to counter this missile system, which would be a clear violation of the ABM Treaty, one of our most successful arms control pacts which is still in force. Thus, proceeding with this weapon would indeed lessen our level of security.

Fourth, we are being told that the MX is an essential "bargaining chip" in the stalled Geneva START negotiations. But the administration's START proposals include no provision to trade the MX for part of the Soviet arsenal, like the SS-18 missile which is already in place. More fundamentally, are we really willing to spend close to $30 billion on a bargaining chip of dubious validity? The administration's "bargaining chip" argument is a signal that there is little of substantive value to recommend the MX.

Fifth, is the proposed basing mode for this missile. To me Dense Pack makes no more sense than the earlier racetrack scheme of the last administration. The idea that the first incoming Soviet missiles would cause fratricide of later missiles, while leaving the MX free for a retaliatory strike is highly dubious. The Defense Department's own chief of research and development has pointed out that the effectiveness of Dense Pack requires developing techniques to harden silos to 10 times the strength of the most recent hardening of our Minuteman II silos. Finally, questions have been raised by many experts about whether MX silos could be made strong enough to keep a single incoming warhead from disabling a good many of the MX missiles, and whether a strong nuclear blast in the air space above the Dense Pack would leave the MX operational. Because the survivability of the MX in Dense Pack is far from assured, it would be a tempting target for Soviet planners. As their technology develops, experts believe there will be numerous ways in which the Soviets can defeat Dense Pack in the 1987-90 period. The survivability of the MX in this basing scheme relies on an unprovable 1-in-a-1,000 scenario.

Sixth, the proposal to base the MX around Warren Air Force base near Cheyenne, Wyo., has not undergone an environmental impact study, and could lead to serious impacts in the entire region. If the system is built, such potential damage must be mitigated.

Mr. Chairman, I have always favored a strong defense, and that means that we need to be spending more in the 1980's than we did in the 1970's. But the MX could actually harm our Nation's security, as well as diverting urgently needed resources from less glamorous military areas like readiness, spare parts, and training for our forces. Our existing Minuteman missiles could be made more accurate, a possibility acknowledged by DOD officials.

In these times of projected budget deficits in the coming years approaching $200 billion annually, we simply must subject the Pentagon to the same kind of discipline as other parts of the budget. We cannot afford every poorly justified multibillion dollar weapon on the Pentagon's shopping list. If we proceed with weapons like the MX, we will risk major national se-

curity risks at home by diverting urgently needed scarce resources away from people who are in increasing need. And, we will escalate the insane nuclear arms race at a time when there may be a real opportunity for improved relations with the Soviet Union.

Mr. Chairman, the choice before us is critical and clear. I strongly urge my colleagues to support the amendment by the gentleman from New York, (Mr. ADDABBO).●

● Mr. DORGAN of North Dakota. Mr. Chairman, building and maintaining a strong defense must remain a top priority for the U.S. Congress and for the United States. But strengthening our national security does not mean that we buy every billion-dollar item on the Pentagon's shopping list.

A case in point is the MX missile.

I strongly believe that we need a strong nuclear force to prevent Soviet aggression or adventurism. And I believe we now have such a deterrent.

The Pentagon concluded in its 1982 report that the United States and Soviet Union have roughly equal nuclear forces.

In November, the United States launched its first Trident submarine carrying 24 Trident I missiles. Each of these subs carries enough weapons to target every Soviet city over 100,000 people. And we plan to build 12 to 15 of these potent ships.

I support the Trident I program because it gives a secure nuclear punch that will not force the Soviets to launch on warning of an attack.

Similarly, we will deploy this month the first operational squadron of B-52's carrying air-launched cruise missiles with nuclear warheads. The Soviets have no sound defense against this weapon, which works by evading Soviet radar, not by surprising our adversaries in a sudden strike.

So both of these weapons add to the numbers and power of our strategic power without tightening the hair trigger on nuclear war. Wise investments in national security.

The MX is not.

A careful review of the facts will show that the MX will not boost our security; that the MX may not work; and that even if the MX did work as advertised, it would cost far too much to build.

ENOUGH IS ENOUGH

We do not need an MX missile for several reasons.

We can already explode more than 12,000 nuclear weapons on the Soviet Union. More than enough to wipe it out. So we don't need the 1,000 extra warheads the MX would offer.

As noted before, we have also taken steps to beef up and modernize our air- and sea-based forces with cruise and Trident I missiles. We have already strengthened our land-based force by installing more accurate and powerful Mark 12-A warheads on our Minuteman III missiles. These are as advanced as the warheads on the best Soviet missiles—the SS-18's and SS-19's.

The MX is not just frosting on the cake. It is frosting on the frosting.

By deploying a missile with the speed, accuracy, and explosive power to knock out Soviet ICBM's, we may invite a nuclear war. The Soviets surely know that we will not target the MX on empty missile silos.

The only reason to deploy such a weapon is to be able to strike first. This could force the Soviets to launch on warning since 75 percent of the Soviet force is land-based. Changing our defense policy to do this makes no sense and I cannot morally support it. Nor do I believe the Alice-in-Wonderland tale of nuclear survival.

The bottom line is that the first strike would be the last strike.

Our national security requires that we reject this proposed change of course. We must return to the promotion of nuclear stability and strive to reduce the chance of accidental nuclear war.

DOUBTS ON DENSE PACK

Even if proponents convinced me that we needed the MX in 1986, they could not convince me that the Dense Pack basing mode makes any sense.

The Pentagon's own advisory panel on the MX warned that "the U.S.S.R. could readily and early on deploy counters to 100 missiles in 100 capsules, from a technological standpoint, in the 1987-90 period." The chairman of the panel, Dr. Charles H. Townes, reportedly advised Secretary of Defense Weinberger that the Soviets would have less trouble defeating Dense Pack than we would in building it.

No wonder that Herbert Scoville, former Deputy Director of the CIA, called Dense Pack a "Rube Goldberg" scheme. Scoville has warned that the Pentagon might not be able to achieve the kind of silo hardening required in the Dense Pack plan.

More doubts about the MX Dense Pack arise from a recent article in the New York Times by Kosta Tsipis, director of the Program in Science and Technology for International Security at the Massachusetts Institute of Technology. Dr. Tsipis argues that the Soviets could destroy Dense Pack by exploding their attacking missiles simultaneously, by setting off ground-penetrating bombs, or by sending in their missiles in waves.

Since Dr. Tsipis has conducted a careful study on Dense Pack, I would like to bring this article to the attention of my colleagues and the people of North Dakota.

BANG NOT WORTH THE BUCKS

The Air Force claims Dense Pack will cost about $25 billion for building the 100 missile base.

But the Tsipis article also makes clear that the only way to protect Dense Pack from attack is by installing an antiballistic missile defense system around it. But such an installation would not only violate the 1972 ABM Treaty with the Soviet Union, but cost as much as $12 to $25 billion.

So the cost now becomes $25 to $50 billion.

Other additions to the system like missile mobility or deep basing could push the MX cost over $50 billion—not counting inevitable overruns in price.

We cannot afford Rube Goldberg schemes when our economy is floundering, budget deficits are soaring, and our small businesses and family farms are facing the worst crisis in 50 years.

Nor can the poor and hungry of the world afford the MX and an unfettered arms race. The world has amassed a nuclear arsenal equal to 3.5 tons of TNT for every inhabitant of our planet. Yet 500 million suffer from chronic malnutrition.

This is a scandal.

In conclusion, I agree with former Defense Secretary James Schlesinger, who said that the MX Dense Pack is "fatally flawed."

But it is not just that we cannot count on the MX. We cannot afford it and we do not need it.

So I support the Addabbo amendments to strike $988 million for MX procurement and to reduce MX research funds from $2.5 billion to $1 billion.

Let us make sure we maintain a strong America with weapons programs that we need, and ones that we can count on working.●

● Mr. FORD of Tennessee. Mr. Chairman, after long years of research and development, more than 30 proposals for basing the MX have been thoroughly examined by two administrations. All have been discarded for a variety of technical, political, and environmental reasons. And now President Reagan has presented Congress with another expensive, elaborate, unworkable, and unsurvivable basing scheme for the troubled MX missile—the so-called Dense Pack plan.

The rationale for the MX Dense Pack plan has been that the Nation needs a "survivable" land-based missile that also has counterforce capability. However, many technical experts—including two former secretaries of defense agree that the Dense Pack basing mode is clearly unsurvivable.

In my own State, we are particularly sensitive to this issue in the wake of a recent disaster in Tullahoma, Tenn., where four workers died and two were injured in a fire at a MX testing center during cleanup of debris from a MX rocket motor that exploded. What if it had been a MX missile itself—with 10 nuclear bombs.

There has been considerable debate on effects that the MX will have on our economy. Right now, we are faced with deep recession and unmet human needs. This weapon would be a major contributor to a projected $200 billion budget deficit.

The Dense Pack MX will place a tremendous strain on our overburdened Federal budget. The Air Force estimates the cost of this system at $26 billion. This does not include an estimated $4 billion for MX warheads, $7.5 billion for the procurement of an ABM system, and a possible additional $6 billion for procurement of 100 more missiles.

If these likely additions and necessary components of MX Dense Pack are totaled, we will present the American people with a final bill for $54 billion.

According to the Congressional Budget Office, this enormous expenditure on the MX would only make a relatively small contribution to our strategic capabilities. In an era when we find domestic programs slashed to the bone, I find this MX spending unacceptable. Also building MX sites will not—as President Reagan claims—increase the pressure on the Soviet Union to accept meaningful limits on or reductions in nuclear weapons. Instead, such action by the United States at this time will escalate the arms race and undermine our ability to negotiate new arms control agreements.

This has already been verified by Soviet Defense Minister Dmitri who warned today that "if the United States deploys its new MX missile, the Soviet Union will develop a similar weapon that will in no way be inferior."

Next year, will the administration come back to the Congress asking for huge sums of money to develop a weapons system to counteract the Soviet's anti-MX system. When will we get off this merry-go-round?

Construction of the 100 new silos for Dense Pack would also constitute a violation of the spirit of both the SALT I and II accords. The American people have spoken out strongly in favor of concerted Government efforts to stop the nuclear buildup and to reduce nuclear armaments by the prompt negotiation and ratification of bilateral and verifiable agreements.

If this weapon is authorized it will clearly demonstrate this Congress disregard of the national public outcry for a freeze on the production and deployment of nuclear weapons.

Rather than commit this country to an ill-considered and, by most accounts, unworkable plan for basing the MX, I urge my colleagues to support the amendment to be offered by Defense Subcommittee Chairman ADDABBO to delete funding for production of the MX from the 1983 defense appropriations bill. My colleagues, let us not build this expensive, unnecessary weapon.●

● Mr. FORD of Michigan. Mr. Chairman, I rise in support of the amendments offered by my colleague, Congressman ADDABBO, chairman of the House Appropriations Subcommittee on Defense, to delete procurement funds for the MX and to reduce research and development for the MX. I have very real doubts whether this program is at all necessary. President Reagan's November 23 televised presentation of relative nuclear strengths of the United States and the Soviet Union served no purpose except to deceive the public. Mr. Reagan not only ignored the total number of deliverable warheads—9,700 for the United States and 8,300 for the Soviets—but also failed to mention that American nuclear forces are superior in quality and flexibility.

In addition, the Dense Pack basing scheme is reliant on two unproven theories. The first assumption is that the silos within which the MX missile will be placed can be super-hardened to such a degree that Soviet nuclear weapons will not be able to destroy the MX. This is beyond current engineering capabilities and may, in fact, be impossible. The second unproven theory is that of nuclear "fratricide." Although this concept may seem appealing and logical, there are serious doubts about its validity. Considering the administration's firm commitment to Dense Pack, it is ironic that it is already considering the addition of an antiballistic missile system or additional silos to strengthen the Dense Pack system.

Dense Pack is also a blatant violation of SALT II, which Reagan promised to adhere to in May. The administration claims that the MX in Dense Pack is a "mobile" system and, therefore, does not violate SALT II's prohibition against the construction of additional fixed ICBM launchers. Dense Pack calls for 100 missile launchers in 100 holes. There are no additional launchers, no transport vehicles to move the missiles once they are in place, and thus, no mobility.

By far, the biggest problem with the MX missile is its price tag. The administration estimates that the MX system will cost over $26 billion to deploy. With a budget deficit over $150 billion per fiscal year and massive cuts in domestic programs which aid the elderly, students, and the poor, it is unconscionable for the administration to seek this military boondoggle. The time has come for the Congress to say "no" to the MX missile.●

● Mr. LEHMAN. Mr. Chairman, I was greatly dismayed by the vote taken last week in the full Appropriations Committee concerning funding for the MX. I had hoped to be present in order to cast the deciding vote against this weapon. Unfortunately, I was unable to leave the hospital in time to make the vote.

Thanks to cancer research, I have won my personal battle against this disease and I am determined that others have the chance to successfully fight cancer. I find it absurd that we are cutting back on funds for cancer research while increasing funding for nuclear arms.

Researchers at Memorial Sloan-Kettering Hospital in New York, where I have spent the past 3 weeks, have told me that important research has been hindered by budget cutbacks. Just when they think they are on the verge of making some very significant discoveries, Federal grants are not renewed and alternative funding sources are unavailable.

What does it say about our national priorities when we are prepared to spend billions on nuclear weapons and at the same time reduce spending on research that can save lives? I feel very strongly about this issue, and that is why I am here today. If my vote can make a difference, I want to be here to stop this MX madness; and in the future I intend to work hard to secure more Federal support for the type of research being conducted at Sloan-Kettering.●

Mr. EDWARDS of Alabama. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I listened with great interest to the gentleman from Washington reading the letter. I do not know anybody over here or in the administration who has contended that the MX missile is a bargaining chip. I would be the first to agree that it is too expensive to use simply as a chip. But I will guarantee you, Mr. Chairman, that if we do not go forward with the MX missile, then the desire and the incentive on the part of the Soviet Union to sit at the bargaining table and talk to us at the START talks will diminish overnight. It is just that simple. And that is not a bargaining chip. That is a fact of life.

The reason they are at the bargaining table today is because they do believe in fact that we have the will and the determination to do what is necessary to secure this country. And if they ever believed that we do not have that will and determination, therein is the end to the START talks, and that would be an unfortunate thing for this great Nation of ours.

Now, we have heard an awful lot of comment in the last hour and a half about Dense Pack, about basing, about who knows what about Dense Pack.

Let me just remind the Members of the House that it was the Congress that insisted that the President come back to the Congress by December 1 with a basing plan. We turned down the basing plan the President had sent

earlier. So it has only been in the last few days that the Dense Pack proposal has been before us pursuant to the request of the Congress.

And so we have written into our bill, both in the procurement section and in the R&D section, provisions drafted by the gentleman from Ohio (Mr. REGULA), fencing this money until March 15 so that the Congress can become better acquainted with the Dense Pack, so that we can all understand in a much better way exactly what is involved.

The question of Dense Pack is not here today before us. The question here today is whether we are in fact going to go forward with a replacement for the Minuteman, a missile that is now becoming more vulnerable everyday, a missile that we desperately need to replace.

You can argue all you want to about whether the Triad is good or bad. But you are copping out if you ignore the fact that Minuteman is becoming vulnerable. We do indeed need to replace it. We do indeed need to go forward with a missile that is available to us as a replacement, and that is the MX.

There is ample time written into this bill for the basing mode to be resolved. There is ample language written into this bill which says that until the administration comes forward by March 1 with the schedules and all the other documents necessary to show that there is a basing plan and a missile plan going hand in hand, that this money will not be available. That language is in here.

I think the committee has done an adequate job of fencing, and I think it is important that we understand that.

Now, let me close, Mr. Chairman, by saying this.

There has been talk about spending restraints. The concern I have is that the MX has become sort of the symbol of that restraint. And I think we have lost a lot of our perspective as we have talked about the MX vis-a-vis spending restraints.

I will remind the Members again that we have cut $18 billion out of the President's budget, that we have made a 10-percent reduction in his procurement, that we have made a 5-percent reduction in his research and development budget, we have made major cuts in this bill. And if it is a spending restraint that you are concerned about, we have used great restraint as we have drafted this bill and as we have brought it to the floor.

I think the world is watching what we do today. I think the Soviet Union is watching. I think our own people are watching as to whether or not we have the determination, the will, the fortitude, to be counted as far as security for this country is concerned.

I would hope and I would pray that the day will never come when we will have to deploy the MX missile. But I will venture to say that if we do not go forward with it now in one way or another, that day will come because the START talks will fall into a wasted effort.

And so I plead with you today to give the President the chance to go forward with this proposal, to give those who negotiate the chance to keep the Soviet Union at the bargaining table, to keep the incentive there on the part of the Soviet Union. It is extremely important. And I urge a "no" vote on the amendment of the gentleman from New York.

Mr. ADDABBO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, we come to the end of this debate. And it has been confusing.

To make it simple, we are debating this amendment striking $988 million for the procurement of MX missiles that still requires $1.7 billion of research and development. It is that simple. We are being asked to appropriate money for a missile that still needs almost twice as much money to do research and development during fiscal year 1983.

If we worry about our opponents, I think Andropov gave us the answer today if we vote down this amendment. He says if we go with MX, Russia will build their version of the MX. We then have an arms escalation. But more important, most important, if we do not adopt this amendment and they go ahead with MX in the Dense Pack mode, we have made the first installment of $1 billion toward the cancellation of the only agreements that exist between us and Russia. There also would be a violation of the ABM treaty if Dense Pack is protected with an antiballistic missile defense system. This is not just a canister that is being buried in Wyoming. This is a silo, a new silo, in violation of the SALT agreement. And if we vote down this amendment, that is what you would be doing today, giving our children the heritage of seeing this Congress start down the road toward the abrogation of the SALT agreements intended to stop the escalation of this nuclear insanity.

□ 1810

So I tell my colleagues, this is solely an amendment to cut the MX production.

Do you want your bargaining chip? Do you want to go ahead? You have the R&D of $1.7 billion for the missile, and over $700 million for the basing modes.

The CHAIRMAN. All time has expired.

The question is on the amendment offered by the gentleman from New York (Mr. ADDABBO).

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. EDWARDS of Alabama. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 245, noes 176, not voting 12, as follows:

[Roll No. 423]

NOT VOTING—12

Alexander	Dougherty	Mattox
Bafalis	Heckler	Santini
Blanchard	Hefner	Shuster
Bolling	Levitas	Skelton

□ 1820

Mr. SILJANDER and Mr. SHAW changed their votes from "aye" to "no."

Mrs. SCHNEIDER, Mr. WEAVER, and Mr. FORSYTHE changed their votes from "no" to "aye."

So the amendment was agreed to.

□ 1830

The result of the vote was announced as above recorded.

Mr. ADDABBO. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. ROSTENKOWSKI, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 7355) making appropriations for the Department of Defense for the fiscal year ending September 30, 1983, and for other purposes, had come to no resolution thereon.

DEFERRALS AND REVISIONS—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 97-264)

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Appropriations and ordered to be printed.

(For message, see proceedings of the Senate of today, December 7, 1982.)

ANNUAL REPORT—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Energy and Commerce.

(For message, see proceedings of the Senate of today, December 7, 1982.)

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair would like to make the following announcement.

We have completed the formal business of the day. When the House adjourns, it will adjourn to meet at 2 o'clock tomorrow.

The Chair appreciates the fact that we stayed very late last night, and tomorrow we expect to stay and finish the Defense appropriation bill. We will be working late tomorrow night.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 5133, FAIR PRACTICES IN AUTOMOTIVE PRODUCTS ACT

Mr. BEILENSON, from the Committee on Rules, submitted a privileged report (Rept. No. 97-946) on the resolution (H. Res. 622) providing for the consideration of the bill (H.R. 5133) to establish domestic content requirements for motor vehicles sold in the United States, and for other purposes, which was referred to the House Calendar and ordered to be printed.

PRESIDENT DE LA MADRID'S INAUGURAL ADDRESS

(Mr. DE LA GARZA asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DE LA GARZA. Mr. Speaker, I know that you will agree with me that the extraneous matter which I submit for your perusal, the inaugural speech of the newly inaugurated President of Mexico, Lic Miguel de la Madrid Hurtado, will make interesting reading.

Mr. Speaker, as an official guest of the Government of Mexico I was privileged to attend the inauguration of Lic Miguel de la Madrid Hurtado, the new President of Mexico.

When President de la Madrid made his first address to the nation as its President he described a challengingly strong course for his country to follow.

Mindful of the impact of the new President's speech will have on the entire hemisphere, I would like to share with you the entire text of President de la Madrid's inaugural address.

MIGUEL DE LA MADRID, PRESIDENT OF MEXICO, INAUGURAL ADDRESS, DECEMBER 1, 1982

Honorable Congress of the Union, Mexicans: I have sworn before you to observe and protect the Constitution and the laws of the Republic, to carry out loyally and patriotically the duties of the office conferred upon me by the people, and to seek in all things the well-being and prosperity of the Union. That oath is not a mere formality, but the most solemn declaration of the political, legal and moral obligation I hereby assume to the people of Mexico.

In line with those imperatives, I shall make the Presidency of the Republic the instrument of guidance and service that the framers of the Constitution designed for leading the nation towards the goals set by the sole legitimate author of our history—the Mexican people.

I shall govern in accordance with the Constitution and the laws. I shall govern with the purpose of pursuing the high objectives they set forth. I shall govern with the purpose of preserving and strengthening national independence; of protecting and increasing the enjoyment of individual and collective freedoms; of enriching democratic participation in political, economic and cultural affairs, and of fostering the fraternal and harmonious community life of all Mexicans. I shall govern with the purpose of preserving and reinforcing the peace of the Republic.

I shall govern within the framework of a rule of Law. My administration will subject its action to the law. I shall respect and exact respect for the legal system born out of the Mexican Revolution. That is the way to guide free community life and social efforts towards justice. I firmly believe that there are no rights that run counter to the law and that the more we obey the laws, the less we will have to obey men.

Our State of Law, as mandated by the Constitution of 1917, is a strong State. The strength of the State guarantees the unity of the nation, ensures our independence and enables us to carry out the mandate for social change. The Mexican State is strong, not because it arbitrarily imposes its will, but because it rests on the consensus of the majority. We shall preserve its strength, for there can be no justice with a weak State, nor can any State be strong without freedom or with injustice. We shall strengthen ourselves in the laws, freedom and justice that are our justification.

I shall govern in accordance with the mandate I received at the polls. I tried to make the elections a true plebiscite on ideology and programs. To that end, I conducted my election campaign as an intensive process of consultation with the people. I probed the nation's sentiments, in order to draft a premise and objectives that would be based on them. The people voted for a detailed and specific platform in the elections marked by the heaviest voter turnout in our history. As a result, I received a clear mandate to which I must adjust the action of my administration. Those are the foundations of the administration I am beginning today at the behest of the nation. We will not have to propose new doctrines, because we already have the doctrine that has been given its legitimacy by our history—the doctrine that has sustained the national consensus under all kinds of circumstances, and the one the people upheld on July 4th. My ideological commitment is to the Mexican Revolution.

Today we begin a new chapter in Mexico's history. We do so within the tradition of the popular movements that spur and guide us: the Independence, the Reform and the Revolution. We shall draw upon the contributions made at each stage of our history, through the efforts of each administration, and, of course, upon the progress achieved under the direction of Jose Lopez Portillo. We owe many accomplishments to his administration: the strenthening of our federalism; a great thrust to economic activity and employment: outstanding advances in energy and food supplies; significant increases in education and social security; support to marginalized groups; the political reform; the administrative reform; the basic stages of the National Planning System; the reaffirmation of the State's guiding role; the nationalization of the banking system; an era of broad freedoms, and an active and dignified foreign policy. My recognition and appreciation for the efforts and accomplishments of Jose Lopez Portillo.

In beginning this new state, we must recognize and accord its proper value to the national heritage we Mexicans have built.

We have an extensive infrastructure; a major industrial plant; the fourth largest oil reserves in the world and extractive facilities of the first order; abundant agricultural, forest, fisheries and mining resources; great tourism potential. Communication media and routes link all parts of the country together. We have educational, healthcare and social security systems; administrative and cultural cadres; responsible workers and able, nationalistic entrepreneurs; and a system of freedoms firmly grounded in a basic consensus of the people. We have achieved much, thanks to the effort of all Mexicans.

On the other hand, I am aware that I am assuming responsibility for the Republic's government at a difficult time.

Mexico is undergoing a grave crisis. We are suffering inflation that will reach almost 100 percent this year; an unprecedented public-sector deficit fuels the fire of inflation, while savings to finance public-sector investment are lacking; outdated prices and rates of public goods and services place state enterprises in a deficit position, conceal inefficiencies and subsidize high-income groups. Weakness in the dynamics of productive sectors has slowed our growth rate to zero.

The flow of foreign currency into the financial system has been paralyzed, except for that from exports of oil and a few other public-sector products and from loans to that sector. Our public and private foreign debt has reached inordinate proportions, and debt servicing imposes an excessive burden on the budget and our balance of payments and drains off funds needed for productive investments and social expenditures. The tax collection system has been undermined and its inequities consequently accentuated. Foreign credit has been drastically reduced, and domestic savings and investment have been discredited. Under these circumstances, the productive plant and employment are seriously threatened. Thus, we are confronting the highest rate of open unemployment in recent years. Mexicans with low incomes are finding it increasingly difficult to satisfy basic subsistence needs.

The crisis is evident in the expressions of mistrust and pessimism regarding the country's ability to fulfill its immediate requirements. It is evident in the emergence of discord among classes and groups; in the angry search for the guilty; in the mutual and growing recriminations; in the feelings of despair and discouragement and in the exacerbation of individual and sectarian egoism, all of which are tendencies that corrode the solidarity essential to community life and collective effort.

An atomosphere has spread that encourages the enemies of the system, built through the people's extraordinary democratic effort, to rush in to condemn it indiscriminately and to foster doubts about our historical course.

This is the national outlook. We point out assest and advances in contrast to liabilities and difficulties in order to maintain a realistic perspective, taking neither an Apocalyptic nor an ingenuous view of the grave circumstances we face. We are confronting difficulties, serious difficulties, but we are not a defeated or bankrupt nation.

The crisis is taking place in international context of uncertainty and fear; a deep recession is in the making. There are trade wars, even among allies, and protectionism in the guise of free exchange. High interest rates, the drop in raw materials prices and the rise in the prices of industrial products are driving many countries to insolvency. In addition to world economic disorder, there is political instability, the arms race and the struggle between great powers to expand their spheres of influence. Never in recent times has international harmony seemed so far distant a prospect.

We are in an emergency. This is not the moment for hesitation or complaining; it is a time for definition and responsibility. We will not simply be carried along with the current. The situation is intolerable. I will not allow our homeland to crumble away through our fingers. We shall act, decisively and firmly.

By integrating our collective efforts in a great movement of national solidarity, Mexico will win out. At this time, more than ever before, we Mexicans have been able to experience and witness the fact that, over and above individual interests, lie the interests of the Republic and the future of our country. That is the national sentiment, which, as of today, we must transform into decided and vigorous action.

I am launching and Immediate Program for the Reordering of the Economy, the main purposes of which are to wage an in-depth combat against inflation, to protect employment and to reestablish the basic conditions for a dynamic, sustained, just and efficient development. Details and procedures will be announced during the first month of this administration. We shall begin work immediately. The severity of the crisis will determine the dimension of our efforts.

These are the ten points of our program:

First: *Reduction of growth in public spending.* I shall propose an austerity budget, strictly adjusted to available financial resources, which will maintain public services at a minimum acceptable level, uphold operational and investment priorities for our most needed programs, provide for payments on the debts we have incurred and limit the growth of current expenses to increase public saving.

Second: *Protection of employment.* I shall promote special programs for productive and socially useful work in the most depressed rural zones and in marginalized urban areas. Within our austerity plan, we shall redirect investment resources towards projects that generate a considerable use of manpower and we shall make adjustments in capital-intensive programs. To protect existing jobs, we shall promote a selective program of support to industry that will stress aid to intrinsically sound medium-sized and small enterprises, by such means as timely loans, priority treatment in access to currency, technical assistance and demand that is organized and stimulated by public sector purchases. Responsible and patriotic entrepreneurs—who form a majority—will merit my administration's respect for their legitimate rights and be accorded incentives for the tasks they undertake that further the interests of the majority of the Mexican people.

Employment is the fundamental value to be protected. We shall ask those who are the factors of production for moderation and responsibility in their negotiations, so as to keep wages and profits within reasonable bounds. We shall precisely define the contents of the basic food basket for popular consumption and shall reinforce the strict, effective and honest control of prices of the articles that comprise it, in order to defend the purchasing power of working families in the country and the city. Subsidies will be rechanneled and rationalized to this end with a view to a just reconciliation of consumer interests with production incentives.

Third: *Continuation of works in progress* with a selective criterion. We shall accelerate investment for prioritary and immediate production, decrease investment that is not indispensable, and cancel projects when they are found to be unnecessarily expensive or of a low-priority or improperly programmed nature.

Fourth: *Strengthening of standards ensuring discipline, proper programming, efficiency and scrupulous honesty in implementation of authorized public spending.* Financial responsibility will be the prime criterion in supervising and evaluating the performance of government officials. The exercise of budget outlays will be strictly regulated to eliminate squandering, waste or corruption.

Fifth: *Protection and encouragement of programs for the production, importation and distribution of basic foods for human consumption.* We shall combat speculation in this field. We shall improve and rationalize State intervention in the production, processing, distribution and consumption of foodstuffs for popular consumption so that the resources employed will really benefit the sector we are interested in protecting.

Sixth: *Increase in public income* to curb the unbirdled growth of our deficit and the consequent disproportionate rise in the public debt. I shall immediately promote a tax reform to increase the fairness of direct taxes, provide uniformity in indirect taxation and revise fictitious levels of untaxed items. This fiscal reform is also designed to increase tax revenues with a view to providing sounder foundations for financing public expenses. We shall take new steps in tax administration. We shall revise tax incentives to that they will support production and employment and provide sound encouragement for exports.

We will inevitably have to increase prices and rates for goods and services produced by the public sector, charging higher rates for those used by social groups with the highest relative incomes. He who has more must pay more; basic justice demands it. At the same time, we shall demand of administrators and request of workers in public enterprises, explicit efficiency and productivity commitments. This must be their contribution to the essential reordering of the economy to which we Mexicans must all be committed. We must face reality: we cannot tolerate the collapse of our public enterprises, the fundamental heritage of our nation.

Seventh: Channeling credit to national development priorities, while preventing speculation or the diversion of funds to financing purposes not justified by the production, processing, distribution and consumption of the goods and services required for general consumption or by the best interests of the nation.

We shall take care that the nationalized banking system performs with efficiency and honesty. Domestic credit and savings are based on trust. The Mexican Government will show its capability of fulfilling its responsibility through a trustworthy and efficient management of the national banking system. I will not permit rapacity, nor the use of bank credits for the political advancement of bank officers, nor banking procedures that affect the rights of depositors. I reject financial populism. We will offer attractive returns on savings, security in the management of public resources and productivity and efficiency in banking services, in order to avoid unjustified increases in the cost of credit.

The nationalization of the banking system is irreversible. We shall restructure our lending institutions in such a way as to ensure effective control of the nation through their association with the State. We shall propose new and creative formulas to avoid their bureaucratization, so that savings depositors, loan recipients and society as a whole—workers, campesinos, entrepreneurs—will have a proper share in the management and even in the partrimony of these institutions. To nationalize is not to "State-ize". The nationalized bank must belong to the people and not to a new minority group of directors.

Eight: *Regularization of the exchange market under the authority and monetary sovereignty of the State.* We shall adjust exchange control mechanisms to achieve a realistic and functional system that corresponds to the actual operation of the Mexican economy. We propose to recover its proper role in the exchange market for our national financial system and to maintain a realistic exchange rate that will encourage exporters and foster the acquisition of the foreign exchange needed to supply goods and services to our productive plant. We shall eliminate irrational exchange subsidies that affect the heath of public finances. We shall maintain a strict control over imports and gradually rationalize protection accorded to the various sectors to eliminate unwarranted profits that have a negative effect on the well-being of consumers. These steps will lead to a better integration of industry and will improve the competitive position of our products. We shall strive to reestablish objective conditions that will keep domestic savings in Mexico and prevent the flight of financial resources.

Ninth: *Restructuring of the Federal Public Administration* to increase its effectiveness and flexibility. We shall make use of the considerable progress that has already been achieved, rectify what has proved deficient and make the essential innovations. We shall make public administration subject to planning, order and the strictest possible application of rules governing the responsible conduct of government officials.

Tenth: We shall act under the principle of *guidance by the State* and within the *mixed-economy system* established by the General Constitution of the Republic.

For the purposes of affirming these principles and lending clarity and certitude to the path that we shall follow, I shall submit to the consideration of the Congress and the state legislatures, which have permanent constitutional amending authority, a proposal for amendments and additions to the Constitution of the Republic on economic matters.

Based on the operative principles in this field and on the will of the people as expressed in the July 4th elections, this proposal aims to reassert and strengthen the State's responsibility to direct and promote national development; to reaffirm and define harmonious and jointly accountable coexistence of the public, private and social sectors in our economic system; to ratify economic freedoms, subject to the public interest, and to establish at the Constitutional level a system of democratic planning for development.

The economic activity of the State and of individuals—whether they be from the social or the private sector—requires a clear legal framework that will strike a proper balance between the authority of the State and individual rights and liberties. This necessary harmony must be governed by nationalism, freedom, democracy and social justice.

With this ten-point program, we shall take our first step in responding to the crisis. All Mexicans must join in this great national task, mindful that no foreign aid or magic solution can do the job for us. Recovery will take time—the next two years. The first few months of our administration will be arduous and difficult. The present situation makes this so. Austerity is imperative; we shall see that it is enforced, and that the burden it implies is shared equitably.

I shall govern with a view to surmounting the crisis, but at the same time I shall also implement the six-year platform that the people voted for when they approved the seven general theses that emerged from the consultation of public opinion. From each of them we shall formulate a set of effective policies in order to start now to build the society defined by the majority of the nation's people. These campaign commitments will orient our government's activities and the work of the National System of Democratic Planning.

REVOLUTIONARY NATIONALISM

My conduct will be guided by revolutionary nationalism. It is the ideology that synthesizes our historic will to form a vigorous political, economic and social community; it is the consciousness of our identity and collective image. Revolutionary nationalism evinces loyalty to our traditions and customs, devotion to the land where we were born and to the meaning of our history; it is rooted in a democratic conviction; it undergirds the transforming power of the nation through the State, and it imposes upon us the obligation to overcome everything that jeopardizes our political or economic independence.

Revolutionary nationalism is the vital unifying force that can enable Mexicans to achieve the goals of the people. I shall strive to strengthen it; I shall maintain its transforming nature and I shall affirm its impact on social justice.

Revolutionary nationalism, as a national purpose, lives on and gains strength in the consciousness of the younger generations. Education is the nation's instrument for affirming its identity. The Constitution calls for public education to disseminate and instill democratic attitudes, egalitarian ideals, and pride in and defense of national independence. We shall most emphatically address the quality of education; we shall facilitate access of the people at large to higher education and organize a vigorous ongoing literacy campaign. More and better education for all is an imperative of Mexico's cultural, technological and economic independence.

Revolutionary nationalism is based on culture, and we shall promote the national and regional aspects of culture in order to preserve and enrich it. We shall make our culture an instrument of individual and collective liberation. We shall defend it against colonializing encroachment. We shall promote creative freedom and the enjoyment of culture by everyone. We shall improve knowledge of our history and devotion to the symbols of our native land. With strict adherence to our laws, we shall orient the use of government-owned communications media towards these high purposes.

Mexico's foreign policy is the synthesis and instrument of our revolutionary nationalism. The affirmation of our identity allows us to meet others on an equal footing; our values of independence, freedom, democracy and justice are projected beyond our borders in our respect for ideological pluralism and in the demand for a new international order.

Without pretensions to leading others, without dogmatism alien to historic conditions or false pragmatism lacking direction and purpose, we shall maintain a policy of principles—our principles. We are aware of the limitations imposed on them in a world of frustrated selfish interests and paralyzing economic insecurity, but we are also aware that repeating them regularly, with firm diplomacy open to negotiation, will serve to defend our own values and objectives and those of other nations seeking their development in independence and freedom.

With unshakable conviction, we shall continue to uphold the principles of self-determination of peoples, non-intervention, peaceful settlement of disputes, sovereign equality of States, disarmament for the preservation of peace, and equitable and efficient international cooperation.

Isolationism is not only anachronistic but impossible. Cooperation among free peoples is the only path to peace in an interdependent world. By improving the coordination of our action and strategies at home, we shall

be more effective in upholding our objectives and principles in our participation in international forums and in bilateral action.

We shall work to rebuild world economic and political security, and to strengthen seriously weakened international agencies, we shall work for peace and disarmament, for solidarity with the best causes of the developing world, to promote respectful and equitable relations with our neighbors, to strengthen Latin American brotherhood, for a just and peaceful solution to tensions in Central America, with respect for those nation's sovereignty and support for their development. We shall consolidate the links between our domestic and foreign policies, because we have set ourselves to improve our access to the benefits of international cooperation and to serve the highest national interest efficiently.

In order to strengthen our commitment to federalism, I respectfully urge the Senate of the Republic to exert its authority more dynamically in matters of foreign policy.

It is with genuine pride that I assume supreme command of the Armed Forces, fundamental institutions of proven loyalty and patriotism, efficiency and indisputable professionalism. Deeply identified with the people and demonstrating strict adherence to the law and unwavering nationalistic and revolutionary convictions, the Armed Forces are the country's greatest guarantee of national sovereignty and defense. To every possible extent, I shall strive to provide them with the means for fulfilling the noble mission assigned to them by the Constitution and for ensuring that members of the Armed Forces and their families will enjoy the same standard of living demanded by the rest of the population. I shall issue orders for the participation of the Armed Forces within their respective spheres of competence and in accordance with their internal discipline, in drafting the National Development Plan.

INTEGRAL DEMOCRATIZATION

We are committed to working towards the complete democratization outlined in our Constitution. We shall strengthen the separation of powers, federalism and the free municipality. We shall respect pluralism and all forms of political association and heed public opinion and the media with responsibility and freedom.

We shall not limit ourselves to perfecting the electoral process, but will also strengthen democracy in every sphere of society's life—in communities, neighborhoods, labor unions and political associations and leagues. We shall foster organization of producers and consumers and dialog between labor and management, so as to promote productivity and lay a better groundwork for the redistribution of income.

We shall maintain constant contact with the people. I will call for public debate to study the progress made in the political reform process, the function and make-up of the Senate of the Republic, citizen participation in the government of the Federal District, and the judicial reform. We shall strengthen the systems for keeping the nation informed on government activities. I shall keep democracy alive and well in Mexico.

EGALITARIAN SOCIETY

An egalitarian society is a demand stemming from the Mexican Revolution. Social inequality continues to be one of Mexico's most serious problems.

The struggle for equality involves dynamic action to achieve equity in the production and distribution processes and to expand stock capacity and opportunities. I reject populism which yields to mere expediency and causes society to regress. We shall combat inequality on a realistic, permanent and lasting basis.

We shall strive, with renewed determination, to achieve equity for all; every group and individual must help to the best of their ability to see to it that everyone receives the fair treatment he deserves. We shall strengthen the weakest sections by providing training, without false paternalism or demagoguery. We shall review all instruments of economic and social policy in light of their impact on distribution. We shall seek to ensure the effectiveness of social spending, avoiding special treatment that leads to injustice. We shall combat the most serious inequality in the country—that which exists between the rural and urban sectors—by every means available to us.

Our fundamental concern will be to satisfy the people's basic needs: food, housing, education, culture, recreation and sports. We shall raise the right to health care to constitutional status so as to lay the foundation for a solid, integrated national healthcare system; we shall give priority to preventive medicine, especially in the marginalized rural and urban areas. We shall attack the housing problem on all fronts: by setting aside land reserves, by administrative reorganization, new technologies, financing and support to owner-built housing. In the area of food we shall give the highest priority to production and supply policies, with emphasis on proper planning, effective implementation and equitable treatment for producers, distributors and consumers.

Beginning today we shall fight all inequality but in this area, as in all others, I must be sincere with Mexicans. As long as the crisis persists, we cannot make quantitative progress in the process of social justice; the immediate danger lies in the deterioration that day by day makes inequality more acute. The first step is to check that deterioration; we shall do so by an equitable balancing of the burden of costs and by fostering the qualitative changes that will give us solid support for progressing more rapidly toward an egalitarian society as soon as possible.

MORAL REGENERATION

The moral regeneration of society will be a commitment and a permanent standard of conduct for my administration. Through the example given by my government, beginning with my own example, I hope to encourage the commitment of all Mexicans, of each and every one of the sectors and of groups in all fields to strengthen our values.

Law, which is the synthesis of social morality and of the republican, democratic and revolutionary ethics created by Mexicans over the years, will be the fundamental guide for this regeneration. We shall update the constitutional provisions governing the accountability of civil servants and promote a new law on this matter as well as amendments and addenda to existing penal legislation. We shall introduce new techniques of government administration designed to prevent, detect, correct and, if necessary, to penalize unethical conduct on the part of government officials and employees.

I shall promote systems to put an end to illegal compensation and to render a clear accounting of the income of government officials. I shall regulate fringe benefits to which officials are entitled and prohibit the use of government goods and services for purposes other than those for which they are intended. We shall prevent illicit business practices in government construction or service contracts and in purchases by the government and its enterprises. I shall not allow government funds to be used to further the personal political careers of officials.

We shall put a stop to the unlawful misuse of government payrolls; we shall root out illegal conduct in the granting of authorizations, permits, licenses and concessions, and in the inspection and supervision called for by laws and regulations.

I insist: service in public office is not compatible with operating businesses whose activities are based on economic relations with the government. To do both is unethical. Either one governs or one makes business deals. Government office should not be used for anyone's personal gain.

We shall perfect the systems used for the management of State resources and strengthen the systems for the control and supervision of public administration.

To fulfill the objective of making the government of the Republic a model of conduct, I shall promote the establishment of a Federal Comptroller's Office, with the rank of Ministry of State, to systematize and strengthen the various activities involved in the supervision, control and evaluation of public administration. We shall make vigorous and decisive use of this new instrument.

I expect a dynamic and vigilant attitude on the part of the Chamber of Deputies and the Accounting Office of the Ministry of Finance toward the programs and budgets of the Federal Executive Branch.

The moral regeneration of society is a challenge to be faced by all Mexicans alike. We cannot allow the nation to weaken and decline. Our problems are so serious that it is only through moral regeneration that we will be able to overcome them. Mexicans are a deeply moral people and they demand that I pursue all forms of corruption. I shall do so. I will govern by example.

The people must be given the means of asserting their legitimate interests in dealings with the government. I am hereby instructing the Attorney General's Office to hold public hearings so as to sound out public opinion to be used in drafting bills and promoting actions to provide society with a better system for the administration of justice and of public safety.

We shall clean up and modernize the police departments of the federal government and the Federal District. People throughout the country are demanding this. We must act quickly. The police should be a guarantee of public safety and order, not a cause of their breakdown. We shall work out agreements with the state governments to support them in similar undertakings. The people are entitled to security for themselves and their families, and we shall make sure that they have it.

DECENTRALIZATION OF NATIONAL LIFE

We shall promote decentralization of national life. There can be no thought of the Republic's vitality without the full participation of the states in defining and implementing the tasks required by national development. We shall combat the centralization that saps our energy and inhibits far-reaching action.

Adopting one of the nation's demands as my own, I have decided to promote the transfer of preschool, primary, secondary, and normal school education—now administered by the Federal Government throughout the country—to local governments, to-

gether with the corresponding financial resources.

Well-founded reasons of a pedagogical, academic and administrative nature indicate that we should now return to the original educational system set forth in the Constitution of 1917, in which basic education was the responsibility of local and municipal governments. Through the Ministry of Public Education, the Federal Government will continue to direct and evaluate programs. The labor rights of the teaching profession and the autonomy of its union will be scrupulously respected.

I respectfully invite the governors of the states to participate wholeheartedly and decisively in this new task of strengthening state governments. The validity of federalism is the concern not just of the Federal Government, but of everyone. I know that we can count on your valuable support.

I invite the teachers of our nation, who have worked tirelessly in efforts for nationalistic change to collaborate in this movement to achieve real decentralization. The nation will be stronger for it.

Decentralization of national life will draw support from the vigor and enterprise of the states. We shall decentralize public health services to bring them closer to beneficiaries. We shall immediately propose to local governments that agreements be drafted to enable them to take charge of programs in other areas. We shall revise the distribution of functions in order to bring about a new division of responsibilities among the three branches of government.

We shall continue the consolidation of free municipalities; political autonomy depends on economic self-sufficiency. We shall initiate amendments to Article 115 of the Constitution by proposing that the Congress and state legislatures, which have permanent authority to amend the Constitution, assign to the municipalities their own inviolable sources of income with which to provide the public services in their charge. We shall thus comply with widespread demand voiced in our consultation with the people.

The time has come to create the conditions that will enable the municipalities to rely less on federal contributions and more on their own tax programs. We shall soon invite tax authorities throughout Mexico to join in designing a new scheme for the division of authority on these matters.

One of the major challenges where decentralization is concerned is the intolerable growth of Mexico City and its metropolitan area. We must take energetic steps to curb the accelerated growth of the area by offering other settlement possibilities. We shall protect the quality of life in our capital, which, because of its macrocephalic growth, is suffering serious deterioration that we must combat. Special attention must be given to the urgent problem of transportation.

DEVELOPMENT, EMPLOYMENT AND THE FIGHT AGAINST INFLATION

The people have declared themselves in favor of a strategy designed to promote development and employment and to fight inflation. The measures enumerated in the ten points are based on these objectives. In addition to implementing these immediate policies, we shall also adopt other parallel policies for addressing and promoting the structural changes required by our economy. We shall tackle the problems of inadequate domestic savings, low productivity, the poor competitive position of our products abroad, and social inequality. We shall do so by means of far-reaching and unremitting action.

We shall give high priority to the needs of the Mexican campesino. We shall diversify his job opportunities by giving added impulse to agroindustry. We shall make rational use of agricultural, forest, livestock and fishery products. We shall make land tenure secure. We shall improve conditions in rainfall-dependent areas and introduce planning techniques in rural areas. We intend to broaden the social development of Mexico's agricultural sector.

We shall democratize, modernize, and streamline the government entities in charge of agriculture. We shall give no quarter in our fight against all the corrupt practices that fleece the Mexican campesino. We will promote production and justice in our countryside.

Energy sources are an inalienable part of the nation's heritage. We shall continue to rely on petroleum to support our development, seeing to its rational utilization for the benefit of present and future generations, and without thinking of it as a panacea that saves us from the need to work on other aspects of our development. I will pay special attention to the appropriate planning and efficient and honest operation of our petroleum industry, the mainstay of our economic nationalism. We shall apply this same criterion to our electric industry.

We shall modernize the state-affiliated, private and public industrial plant, employing firm high-productivity criteria that prevent waste, incorporate technological change and maintain national priorities. In view of the prevailing world economic instability, we must do this if we want to keep Mexico a sovereign and viable country, expand our domestic market, and also participate effectively in the flow of international trade. We need to carry out a real revolution in technology and productivity. We shall spare no effort in bringing about this transformation, which can no longer be delayed.

We shall address the ecological problem and the preservation of the environment in such a way as to improve the quality of life and protect man and our natural resources. We shall reinforce the national awareness of the importance of ecology, an essential factor in the protection of our environment.

I shall not govern solely to overcome present adversity. I know the immediate and medium-term needs of my compatriots; I shall govern decisively, so as to bring about a future of well-being for all Mexicans. We shall work for our children and for our children's children. We must take care of the country that we want for them, and make it greater still. We can and must do it.

DEMOCRATIC PLANNING

A political system that is incapable of regularly voicing popular demand is condemned to failure. State action must be planned as the coherent product of the aims, desires and expectations of the majority of its citizens. Planning, to be democratic, should incorporate the vitality and creative participation of society as a whole and arouse the enthusiastic and fruitful participation of all Mexicans in the great national tasks that cannot be undertaken by the government alone.

In coming days I shall send to this Honorable Congress a bill outlining the National Planning System. With this system, we shall integrate the states and municipalities into our mixed economy system, with all due respect for their sovereignty and regional interests, in order to strengthen our joint national action. We shall institutionalize an ongoing process for consulting public opinion that will enable us to adapt plans to changing conditions and will provide the means for keeping public officials in constant contact with the opinions of those to whom they are responsible.

This bill is based on the constitutional principle of guidance by the State. Governments cannot abdicate either the responsibilities or the specific mandate given them by the people. For this reason, we are proposing mechanisms for consulting the opinions of the different sectors and organizations and of the general public, and for their efficient participation in the decisions programmed. Within this framework, in May of next year I shall present to the country the 1983-1988 National Development Plan.

Honorable Congress of the Union, Mexicans: I demand hard work and solidary responsibility on the part of all Mexicans. The country's economic conditions will impose great sacrifices upon us in the short run. But we shall address ourselves to the basic needs of the population, we shall put the economy on a sound footing, we shall fulfill our commitments abroad, and we shall steadfastly maintain the free and democratic functioning of society and of the State.

I cannot offer major quantitative changes in the near future, nor any sudden improvement in our situation. To surmount the crisis we must work, produce and save with greater intensity and quality than ever before. Within this framework of severe limitations, however, we propose to carry out the changes that will profoundly transform the nation.

This is the challenge and that will be our victory.

We shall not overcome the crisis by aspiring to return to the conditions that preceded it. It would not be worth the effort or the sacrifice, nor would the people accept it. We are going to create a different and better chapter in our history.

We shall not overcome the crisis merely by paying the consequences; that would only make it recurrent. We will overcome the crisis by doing away with the causes that produced it, by making the qualitative changes that will lead us to a new society. We have the necessary tools: the principles, the institutions, the political will, in a great country endowed with abundant natural resources and an unshakable attachment to the native land we love so well.

We shall make qualitative changes in our democratic life. We shall move decisively and fearlessly toward higher levels of civic participation. The State is society organized into a structure, not a structure empty of content. We shall not "State-ize" society; that would be totalitarianism. We shall seek changes that imbue State structures with all the vitality and creativity of civil society, to and from the State, respecting freedom and with an unwavering commitment to justice, we shall give new impetus to the integral development of society and individuals. We have made progress in political democracy; let us now set about making even more progress in social democracy so as to break down the barriers raised by limited participation and by structures that disregard society. Let us seek not just a larger State, but a greater integration of society into the State. People are the priority.

We shall promote changes in conduct. We shall renew social morality. I shall make use of all my authority. I shall require each and every one of my associates to conform to

the highest standards of public honesty. In this there shall be neither compromise nor toleration. New laws and undeniable political determination will be the government's contribution to this process. A new civic conscience—which we shall foster by using all the communication and social education media—will be the primary guardian of public morality in both governors and the governed.

We shall promote the meaningful nature and value of work, as well as discipline, perseverance, thrift and civic responsibility, the awareness of a solidarity present and a common future, and foster appreciation of what is our own, pride in being Mexican, and the love of our native land. These are not mere concepts or phrases; they are the qualities that have enabled us to become what we are and those we must cultivate if we are to eventually become a prosperous nation in every sense of the word, capable of ensuring independence, liberty and justice for all.

We shall reestablish confidence in the country and in ourselves. Confronting the difficult circumstances that afflict us, we shall restore confidence based on the certainty of every individual and group of their inalienable rights and on their awareness of their grave responsibilities. Respecting both those values, each of us can do his work, and will do his work, because that is the conviction of all.

With history as our witness, we strongly assert our confidence in our national greatness and our indestructible future. We need only recall that we have forged a nation of free men from a structure of colonial domination and oppressed castes; that we have forged a developing society in the face of all types of obstacles, in the midst of an adverse geography and a poor society. We need only realize that we are respected the world over as an original and independent people. We shall move forward, reaffirming our confidence in Mexico.

As President of Mexico, I will do my part to the limit of my abilities and with full awareness of my supreme duty to serve the nation. I will speak truthfully. I will tell the people what can be done and what cannot be done. I will say what has been accomplished, where we have failed and the reason for each failure, demanding accountability and recognizing the limitations the circumstances impose on us.

I will govern with realism, adhering to principles—with realism in the analysis and design of practical policies to broaden our scope of action. I will govern with imagination but avoid fantasy.

I will govern for all Mexicans. The interest of each one shall be my guide, and his right the limit of my authority. I shall do this without forgetting my irreversible commitment to our nation's majority groups—the campesinos, the workers and the middle classes who supported me with their votes. I will do so thanks to the collective strength of a revolutionary movement that established, along with social rights, individual liberties and social and political pluralism, for which, with that same collective strength—both democratic and emancipatory—we shall demand respect. I will govern with the strength of the men and women of Mexico and with the vitality and idealism of the country's youth.

Today, fellow countrymen, let us set to the task of national recovery, with everyone on his feet, enthusiastically and vigorously prepared to make the sacrifices the moment requires, prepared to show generosity and patriotism; with all of us prepared to carry on the achievements of Mexico, those of the Mexico of yesterday, rich in heroism; those of the Mexico of tomorrow, rich in possibilities; those of our Mexico, the eternal Mexico.

Long live Mexico!

H.R. 746, REGULATORY REFORM

(Mr. LEVITAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. LEVITAS. Mr. Speaker, I take this time to call to the attention of the Members of the House that the Rules Committee has announced that on this Thursday they will resume consideration of a rule for the Regulatory Procedures Act, regulatory reform, and that this rule, when granted, will make it in order for the House to complete action on this important legislation which passed the other body 94 to 0 earlier this year.

Mr. Speaker, in light of the specific commitments which have been made by the leadership of this House, it seems to me that we now have the opportunity for final action on this important legislation that the American people have been waiting for, for so long.

Mr. Speaker, I would like to put in the RECORD correspondence between the Speaker and the President of the United States and a colloquy between the majority leader and myself relative to the commitments which have been made. I have no doubt, Mr. Speaker, that the solemn commitments which have been given with respect to the consideration of this legislation before the end of this Congress will be honored by all the parties concerned.

The material follows:

THE WHITE HOUSE,
Washington, August 18, 1982.

Hon. THOMAS P. O'NEILL, JR.,
Speaker of the House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: I am writing to ask your urgent attention to H.R. 746, the regulatory reform bill that was approved by the House Judiciary Committee last year. The bill still has not been considered further by the House, and time is critically short for action to be completed this session on this important reform legislation.

Within the first few days of my Administration, I made reform of the federal regulatory system one of the top priorities of my Administration. I directed all executive agencies, consistent with regulatory statutes, to eliminate unnecessary regulatory burdens and ensure that all new regulations were as cost-effective as possible. I established a review process to see that these policies were carried out.

These regulatory reform policies have been a basic element in my Administration's program for economic recovery; they have had bipartisan support; and they have, I believe, been successful. The growth and burden of federal regulation have been substantially reduced. Already, many billions of dollars have been saved. Important health, safety, and environmental objectives have not been compromised; in many cases they have been advanced.

The principle behind these reforms is straightforward. The expenditure of resources required by regulations is every bit as costly to the economy as the resources taxed and spent directly by our government—and should be just as carefully controlled as our tax and spending policies.

If these reforms are to be continued and expanded to embrace the several "independent" regulatory agencies, it is essential that they be enacted in statutory law. For several years, Republicans and Democrats in both Houses of Congress have been working on legislation that would enact many of the elements of my regulatory reform program. As you know, the Senate passed regulatory reform legislation on March 24, 1982. S. 1080, sponsored principally by Senators Laxalt and Leahy, was approved by a vote of 94-0, and there were indications of early consideration and passage of the House version.

The time has now come for consideration of this legislation in the House. I know that, in recent weeks, our representatives have been discussing this legislation in a constructive spirit. I am concerned, however, that the bill has been delayed so long as to raise questions as to whether the bipartisan manner in which the legislation was passed in the Senate, and which has prevailed in the House as well, will continue so that the legislation may now proceed to prompt floor consideration. No elected officials should object on partisan grounds to stricter review of regulations to ensure that they implement statutory programs in a balanced and cost-effective manner. At a time when direct government spending is under such critical review, we simply cannot afford "business as usual" where regulations are concerned.

Mr. Speaker, on this issue we can join forces to establish lasting reforms to the regulatory process. I therefore ask you and your colleagues to pass H.R. 746 so that action may be completed on this legislation before the end of the 97th Congress.

Sincerely,

RONALD REAGAN.

U.S. HOUSE OF REPRESENTATIVES,
Washington, D.C., August 19, 1982.

Hon. RONALD REAGAN,
The President,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: I am writing in response to your recent letter concerning House consideration of H.R. 746, the regulatory reform legislation.

As you know, Congressman Elliott Levitas of Georgia has been a tireless advocate of this legislation. Largely as a result of his persistence, I directed my staff to scrutinize this legislation, and work with the business community, administration representatives and other concerned parties to work out a regulatory reform package that meets the objectives of regulatory reform without unnecessarily burdening federal agencies.

This legislation will make lasting changes in the way our government functions. These changes impose time consuming requirements that will involve additional burdens for federal agencies. These major changes to our basic administrative laws risk leading to expensive and time consuming litigation. Procedural changes, if not crafted with extreme care, could alter underlying substantive statutes. New opportunities to chal-

lenge agency actions in court might serve only to interfere with the ability of the government to function smoothly. Moreover, the changes in this legislation which affect independent agencies must be subjected to the most careful scrutiny, since these agencies have been set up so that neither Congress nor the President can determine their policies.

My staff reports to me that these discussions have progressed well and that a series of amendments to improve the House bill are close to completion. I am optimistic that work on these amendments can be completed quickly. I intend to schedule this matter for House consideration as soon as this work is completed, with the objective of completing House action on H.R. 746 by mid-September.

Sincerely,

THOMAS P. O'NEILL, Jr.,
The Speaker.

[From the CONGRESSIONAL RECORD, Oct. 1, 1982]

REGULATORY REFORM BILL

Mr. LEVITAS. Mr. Speaker, I asked for this time in order to engage in a colloquy with the distinguished majority leader.

A number of Members have spoken to me during the afternoon and evening of yesterday and today with respect to H.R. 746, the regulation reform bill which has a great deal of support, and which was in the midst of hearings before the Rules Committee yesterday at the time the balanced budget issue came up, and as a result of that and that alone, I am told further proceedings were suspended on the regulation reform bill rule.

The distinguished chairman of the Rules Committee, the gentleman from Missouri (Mr. BOLLING), this afternoon informed me that it was his intention to resume the hearings on the regulation reform bill during the lameduck session in a timely manner so that there would be adequate time to consider such a rule.

And my question to the distinguished majority leader is what would the intentions be of the leadership with respect to consideration of that bill.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Texas.

Mr. WRIGHT. Mr. Speaker, I would like to point out that the bill to which the gentleman refers was scheduled by the leadership for consideration in the House this week subject to the granting of a rule. I know of no Member in the House who has been more diligent than the gentleman from Georgia in pursuit of that bill, and in the promotion of that legislation.

It is my understanding that due in large part to the diligence of the gentleman from Georgia many of the misunderstandings and concerns that earlier existed now have been resolved.

It still is the purpose of the leadership to schedule that bill upon the granting of a rule. If the understanding of the gentleman from Georgia is correct, assuming the granting of a rule, after this Congress returns in late November, it had been and will be the purpose of the leadership to schedule it for consideration in the House.

Mr. LEVITAS. I thank the majority leader for that information.

DEATH OF JOHN W. McCORMACK II

(Mr. MOAKLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. MOAKLEY. Mr. Speaker, it is with great sorrow that I rise to advise the House of the death of John W. McCormack II, during the recent congressional recess, on September 27. Jocko was the beloved nephew of the late Speaker John W. McCormack and brother of Attorney General Edward McCormack.

Mr. Speaker, I express my condolences to Jocko's family—his beloved wife, Lorna; his son Sean; his mother, Mary; and his brother, Edward. Theirs is a loss shared by myself and all of Jocko's many friends.

His uncle, the Speaker, whose name he proudly bore, was an inspiration to Jocko. And Jocko, in turn for a source of pride to John and Harriet, who had no children of their own.

Although Jocko himself never ran for public office he was active in civic and community affairs in my town of South Boston and in Framingham, where he settled and raised a family. Jocko was never too busy to lend a helping hand to a friend or neighbor and will always be remembered, by all of us who counted him our friend, for his kindness, his charity, and particularly his sense of humor. All of these qualities he retained even in the adversity of his difficult last year.

Mr. Speaker, again I express my condolences to Jocko's family and to his coworkers at Canteen Corp., an organization to whose growth and success he contributed significantly during his many years of association with them. Mr. Speaker, under leave of the House, I would place in the RECORD at this point the moving tribute to Jocko delivered by his friend and employer, Pat O'Malley:

EULOGY FOR JOHN W. McCORMACK II, SEPTEMBER 30, 1982

In the hushed hours of dawn on Monday, September 27, a kindly Providence claimed a great and gallant guy, John W. "Jocko" McCormack. His name was synonymous with respect—his trademark an extraordinary sense of humor. His convictions were firm—his thinking flexible. Beneath his rugged exterior gleamed a sensitive and compassionate nature. The living of many has been enriched by his warm friendliness, his depth of understanding, and his ready willingness to give of himself. He served the Navy and the United States of America with love, loyalty, respect, pride, and dedication. His heroism won for him a Presidential citation following World War II.

Today there is a great void in our ranks, a shattered star in our constellation, but the warm and vibrant image of "Jocko" remains engraved in our minds and deep within our hearts.

We cannot help, Dear Lord, but be sad at the loss of one who has brought so much laughter and so much love into our hearts and who exemplified so beautifully how to live gracefully in spite of tremendous physical pain and suffering.

"Jocko" had a great appreciation of this life because he knew how to live it. He never had the time nor the inclination to just sit around and await God's call. He was indeed a special and beautiful man—strong in determination and courage and filled with enthusiasm for life, love, beauty, people, and fun.

We pray this morning that the spirit of John McCormack may live, as we strive to possess and share the gifts of dignity and intelligence, of candor and compassion, of fidelity and enthusiasm which he bestowed on all who knew him. He carried warmth and affection with him always. He never thought of himself as great, although that is what he was. Those who thought they knew "Jocko" from one pattern of discourse were ever mistaken. "Jocko" had no single inspiration from which he drew his enthusiasm and verve for living and by which he shaped his life, but he was careful to deny no source that might help him live it more deeply, more justly, and more meaningfully. The warmth and affection "Jocko" had for his fellow man, the dignity of his carriage, and the contagious cordiality of his smile and humor magnetized every gathering of people. To all who knew him he gave matchless talent for life, and he radiated a strength of character and mind that excelled any we can imagine in one individual. The adversity and pain with which he has lived the past year would cripple the minds of most of us. "Jocko" rose above these circumstances. He was a master of "mind over matter" and ruled his body as if it were an inanimate object. He was always in control of himself. Because he did not manipulate, he could not be manipulated. Because he was open, he had no taste for cunning. Some who knew him chiefly for his love of life and his rare sense of humor may be surprised at the deep spiritual qualities which he possessed. He never wore them on his sleeve, but I know how happy he was when last Sunday Monsignor Sullivan quietly entered his hospital room and gave him communion and absolution just before he entered the gates of Heaven.

"Jocko" loved his home in Framingham, and he loved his beautiful wife, Lorna, with whom he truly enjoyed over twenty-five years of all the joys, the sorrows, and the romance of a happy marriage. Listen to this letter "Jocko" wrote Lorna just after his first illness:

DEAR LORNA: I just got through talking with you, and I know that I've never been demonstrative with words. I want you to know I bless the day I met you. I love you with all my heart. You have not only been a good wife and mother but, to an undeserving guy like me, you have been an inspiration.

All the fancy words and flowery phrases are encompassed in "You are—I am".

JOCKO.

Lorna; Sean; His mother, Mary; and his brother, Edward, were the core of his life. What pride he took in Sean's accomplishments in sports and at school, and what pleasurable anticipation he had for Sean's future. Following are excerpts from a letter "Jocko" wrote to Sean when Sean was fourteen months old:

Sean, you are now fourteen months old, and this letter is being written today to be opened on your sixteenth birthday. Mom and I truly love you and always will. Remember, as you grow beyond sixteen, that

you have a beautiful, loving mother. If I could write your script for life, and I hope some day I can, I would want you always to profess your faith in God, keep a clean body and mind, be friendly and understanding. Always be your own man and know that in this life you must work for whatever you have a right to expect out of life.

Who among us would have believed that "Jocko" would write such heart-warming letters?

"Jocko" loved Canteen, where he was our business associate for over eighteen years. Just a few days before his death he sent to our president, Jim McGuire, a chronological summary of his association with Canteen, naming in loving terms all those with whom he worked through the years. Many of those names had long since been forgotten by Jim and me.

He truly loved South Boston, where he was born and where he frequently visited his beloved mother, Mary, until sickness slowed him down.

"Jocko" shared that kind of love which, I am sure, God reserves for those who love Him. But he did not keep his love to himself. He gave it to family—to friends—to strangers—to neighbors—Yes, to all who needed love.

You and I experience today that dreadful tension which can only be felt by the believing friend. It is the tension between the joy which is real but is so difficult to acknowledge through our tears—the joy which comes from the understanding that God is giving the vision of Himself to one whose life was lived so lovingly—and the sorrow that, in His wisdom, He has left us lonely and bereft, deprived of John's kindness, humor, laughter, love, and warmth, upon which so many of us have come to depend. The sorrow—that deep and most painful sorrow which each of us experiences this morning—is cruel beyond measure and meaningless unless we believe that Jesus died and rose again and that, with Him, God will bring rest to those who have died through Him. We are admonished to comfort one another with these words, for without them there is no comfort.

"Jocko" lived with the joy of a man who loved life, who lived it to the fullest with uncompromising integrity, and who shared the best of what he had with all those who walked the road with him. How he loved to tell humorous and loving stories about his dad, whom he affectionately called "Knocko", and his uncle and close friend, Speaker John W. McCormack, whose name He bore so proudly. "Jocko's" story of his dad leading the South Boston St. Patrick's Day parade on a horse borrowed from the city barn is a legend that will live in memory.

He loved and was loved. All of us have been blessed by his life, his patriotism, his friendship, and we all rejoice in having known him.

And so this morning each one of us must be filled with gratitude because this man lived. He has now returned to his Maker without fear in his heart. I don't know how things are organized "up there", but I've got news for that illustrious company—something new and beautiful has been added, and if a few of the saints have grown a little stuffy through the ages they had better shine up their halos and get with it, because, now that "Jocko" has arrived, it will never be stuffy any more.

To Lorna and Sean—to his mother, Mary—and to his brother, Edward, and all members of John's family—you must believe that, from his place in Heaven, he will support you, strengthen you, and always be with you. May God be merciful to his gentle soul, and may he find rest for eternity with him in paradise.

Good-bye, "Jocko". We loved you, and we shall forever miss you.

□ 1330

CELEBRATING 100 YEARS OF ONTARIO'S HISTORY

(Mr. BROWN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BROWN of California. Mr. Speaker, at this time I invite my colleagues in the House to join me in the pleasure of celebrating the centennial anniversary of the city of Ontario, Calif. On December 11, 1982, citizens and friends of Ontario will gather to commemorate this occasion and celebrate the beginning of the city's second century. This ceremony promises to be most memorable and is one which I am most pleased to attend.

The city of Ontario, along with the Ontario Chamber of Commerce and the Ontario Centennial Committee, have sponsored numerous events throughout the past year in order to publicize and celebrate the city's 100th anniversary. I would like to take this opportunity to applaud the efforts of the members of these organizations, and all other Ontario citizens who have contributed to the success of the Ontario centennial celebrations.

The original Ontario colony was founded in the fall of 1882 by George and William Chaffey. It initially encompassed 6,216 acres purchased from Capt. J. S. Garcia and the Kincaid Ranch which were located near the mouth of the San Antonio Canyon. The colony was conceived as a model agricultural community with mutually owned irrigation and hydroelectric power programs.

It has been said that the plan of the Chaffey brothers for their new colony of Ontario was one of the most perfect ever formulated for colonization. This plan was considered superior because of the four principles on which the colony was founded. These principles included: First, a main thoroughfare connecting one end of the colony to the other; second, the equal distribution of water resources to each agricultural lot, irrespective of its distance from the source; third, the establishment of a college of agriculture; and fourth, the inclusion of a revisionary clause in the deeds to each allotment forbidding the sale of liquor, in order to secure the best possible class of settlers.

Influenced by these guidelines, the community soon expanded and prospered as colonists began to settle in substantial numbers. The original colony territory was soon augmented by the purchase of railroad and government lands, in addition to the extensive acreage obtained by the purchase of land from private individuals.

Development then proceeded rapidly throughout the Ontario area. By March of 1883, the colony was in need of a post office, which was established with L. Alexander as postmaster. In 1883, a school district was formed, and the first Ontario public school was established March 8, 1884. By 1886, the community had witnessed the opening of an agricultural college, and the initial beginnings of a public library and reading room.

Land sales were numerous throughout the rest of the 19th century, as Ontario gained recognition as an extremely productive spot within the Citrus Belt. Further impetus to Ontario colony development was soon provided by the passage of the first Santa Fe train through the nearby Cajon Pass.

Community improvements occurred steadily during the later part of the 1800's and throughout the 20th century. Irrigation and flood control systems were constructed, streets were graded and paved, sidewalks were laid, and a unique mule-powered rail system operated along the beautiful Euclid Avenue.

The San Antonio Electric Light & Power Co. was organized in 1891 for the purpose of furnishing electricity to the Ontario, Pomona, and Redlands areas. This company is credited as being the first plant in the United States which transmitted electricity over long distances. Power from this plant was used to electrify the Euclid Avenue rail system in 1926, thereby rendering the mule-powered system obsolete.

From these worthy beginnings, significant accomplishments have ensued. Nine years after the Chaffey brothers founded the original colony, the city of Ontario was incorporated under the laws of the State of California on December 11, 1891. Ontario has since developed into a general law city which operates under a modified city manager form of government. It is governed by a city council of five, which is chaired by the mayor.

Under this system, the city has evolved well beyond its initial development of citrus groves and vineyards. An Ontario airport was established in July of 1923 by the Ontario Aircraft Corp. This occurrence made Ontario the second city in southern California to establish a municipal airport. Today, Ontario International Airport, run by the city of Los Angeles, is a multimillion-dollar facility which handles over 1.8 million passengers annually. Thus, Ontario is now a center for aircraft transportation, construction, and maintenance. The city also con-

tains a variety of manufacturing and packing industries which contribute substantially to Ontario's expanding economy.

Ontario today is a growing and vibrant community with a population of over 88,000. The city's business and professional communities have grown significantly in recent years and its citizenry is pleased with, and indeed proud of, the progress achieved from the city's balanced development.

As Ontario enters its second century, I am confident that my colleagues in the House will join with me in sending congratulations and best wishes to this exemplary community.

COMPLETION OF I-90 IN SEATTLE

(Mr. LOWRY of Washington asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. LOWRY of Washington. Mr. Speaker, yesterday during the long and important discussion on the transportation funding bill, I made notice that I would enter correspondence from the U.S. Department of Transportation and the Washington State Department of Transportation into the RECORD today. That correspondence is attached:

FEDERAL HIGHWAY ADMINISTRATION,
Washington, D.C., December 6, 1982.

Hon. MICHAEL E. LOWRY,
House of Representatives, Washington, D.C.

DEAR MR. LOWRY: I spoke today with your Administrative Assistant, Mr. Donald Wolgamott, who told me about your concern regarding the amount of Interstate "4R" funding available to the State of Washington for resurfacing, restoration, rehabilitation, and reconstruction projects. Mr. Wolgamott indicated you were concerned that Washington State is not receiving enough Interstate 4R funds to ensure prompt completion of I-90 in Seattle.

The Federal-Aid Highway Act of 1981 authorized separate Interstate funds for 4R work, including work on the Interstate System which Section 4(b) excluded from eligibility for Interstate construction funds. It is important to emphasize that the 4R program is an Interstate program financed by a distinct category of Interstate funds. The Federal share of project costs is the same as for all Interstate construction projects in Washington State, 90.64 percent.

As you are aware, the level of Interstate 4R funding authorized by the 1981 act did not adequately reflect System needs. This problem will be rectified by congressional approval of the proposed user tax increase we have recommended to Congress. Under the version which the House of Representatives is considering (H.R. 6211), Washington State would see a significant increase in the amount of Interstate 4R funds it receives. The Interstate 4R authorization for fiscal year 1984 would increase from $800 million under current law to $2.1 billion under H.R. 6211. As a result, Washington State's apportionment for fiscal year 1984 would increase from $16.8 million (apportioned on October 1, 1982) to approximately $40 million. In following years, interstate 4R authorizations would be increased. Thus, with the proposed user tax increase, we believe there would be enough Interstate construction funding to finance all remaining gap work by the early 1990's and also enough Interstate 4R funds to complete the 4R work items on projects such as I-90.

I hope this information is helpful to you. Please do not hesitate to contact me again if you have any further questions on this matter.

Sincerely yours,

L. P. LAMM,
Deputy Administrator.

OLYMPIA, WASH., *December 6, 1982.*

Representative MICHAEL E. LOWRY,
Washington, D.C.

The Washington State DOT respectfully urges you to support passage of the surface transportation bill H.R. 6211 today. While we have some concern over specific provisions in H.R. 6211 such as the proposed 85 percent minimum apportionment for each State these issues can be addressed in House/Senate conference it is essentially that multiyear highway legislation be enacted during the special session with highway authorization which reflect a 5-cent increase in the Federal gas tax the 5-cent increase and a multiyear transportation bill will add to the certainty that Washington State can complete its Interstate System including I-90 and with the interstate 4R component be able to maintain it.

QUANE BERENTSON,
Secretary, Washington State DOT.

TRIBUTE TO THE HONORABLE HENRY S. REUSS

The SPEAKER pro tempore (Mr. MURTHA). Under a previous order of the House, the gentleman from Wisconsin (Mr. ZABLOCKI) is recognized for 60 minutes.

GENERAL LEAVE

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks in paying tribute to our colleague, Congressman REUSS.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. ZABLOCKI. Mr. Speaker, it is a pleasure and privilege to pay tribute to our friend and colleague from Milwaukee, Chairman HENRY REUSS. As one whose district adjoins Chairman REUSS' Fifth District of Wisconsin, I have had the privilege of witnessing firsthand HENRY's many accomplishments for his constituents in Milwaukee.

For example, anyone taking a drive through downtown Milwaukee will see ample evidence of HENRY REUSS' efforts. The new Federal building, which Milwaukeeans chose to name after him, is important for a number of reasons. Developed as a private building, the structure pumps tax revenues into the city. In addition, its construction has created hundreds of jobs for our Milwaukee workers who have been suffering from our current economic ills.

The Henry S. Reuss Federal Building and Plaza also serves as a keystone of the Milwaukee downtown development for which Milwaukee is presently receiving national acclaim. As one who has heard HENRY argue the case of channeling Federal money to areas where it will serve citizens the most, I find it typical that HENRY would fight long and hard to put Federal funds to the best possible use in Milwaukee's downtown.

When HENRY REUSS came to Congress 28 years ago, he came with enthusiasm and an obvious set of solutions for our country's problems. His enthusiasm has not subsided, and many of his policies have proven worthwhile. A number of HENRY's thoughtful suggestions in areas including jobs programs, economic policy, housing, renewable energy sources, and preservation of the environment, have materialized or are well on their way to doing so.

As a national figure who has not forgotten the folks back home, HENRY is just as comfortable chairing a meeting of top economic experts as he is hiking on the 800-mile Ice Age Trail in Wisconsin, which he established. He is as comfortable at community meetings in Milwaukee as he is at the Federal Reserve.

Importantly, HENRY's enthusiasm for service and his reponsiveness to the duties of his job have not diminished in recent months. We see him in the press now as often as we did before he announced his retirement, I am pleased to say.

His consistent concern with the conditions of the poor, the middle class, and the unemployed surfaced most recently in his work to lay the groundwork for major jobs legislation. At a time when HENRY could have been cleaning off his desk, he was working toward enactment of a jobs program at a pace faster than ever!

His skillful leadership and persistent hard work resulted in a healthier Milwaukee Road, jobs for Milwaukee brewery workers, community development grants, and a transformation of Milwaukee's downtown.

On a national scale, HENRY made his mark on a broader-based constituency. He was an early supporter of open housing and civil rights legislation to assure that equal opportunities are available to all people, regardless of the color of their skin. As chairman of the House Banking Committee, he made his views on economic recovery known. He advocated responsible urban development and made sure the views of the consumers were heard in banking issues.

One of the major pieces of legislation of which HENRY can be proud is the Financial Deregulation and Mone-

tary Control Act of 1980. That legislation addressed problems HENRY had been concerned with and gave greater flexibility to savings and loans and other financial institutions. His early insight into this issue resulted in enactment of a strong bill, one that seeks to remove barriers between financial institutions.

As chairman of the Joint Economic Committee, HENRY investigated issues ranging from gas deregulation to defense spending to agricultural policy and studied their relation to the economic health of this country.

Mr. Speaker, it is interesting that HENRY REUSS had constructed a windmill long before renewable energy alternatives became popular. It is one small example of a REUSS insight come true.

HENRY is a fine statesman, intelligent, a true gentleman, and open to new ideas.

It is a pleasure to have served with him in the House of Representatives, and I wish him every happiness in the future. To HENRY, his wife Margie and his entire family, best wishes on a job well done, and good luck for the future.

Mr. Speaker, this morning an excellent article by Mr. Martin Tolchin appeared in the New York Times, on HENRY'S career, which I insert under permission granted at this point in the RECORD for the benefit of my colleagues.

[From the New York Times, Dec. 7, 1982]

REPRESENTATIVE REUSS: LOOKING BACK ON 28 YEARS IN THE HOUSE

(By Martin Tolchin)

WASHINGTON, December 6.—When Representative Henry S. Reuss was selected recently by the Democratic leadership to respond to one of President Reagan's Saturday afternoon radio talks, a leadership aide offered him a script. Mr. Reuss scanned it and replied, "I think I'll go with what I've got."

"He didn't care what the President said," the aide recalled, "and he didn't care what we said."

The 70-year-old Congressman, a liberal Democrat from Milwaukee, has been doing things his way since he arrived on Capitol Hill in 1954, and that has usually been good enough for the House Democratic leadership.

It turned to him this fall when it wanted to publicize the plight of the economy, and the hearings Mr. Reuss has under way in the Joint Economic Committee have helped lay the groundwork for the pending highways-jobs bills. While Mr. Reuss favors such a proposal, he opposes an increase in the gasoline tax to finance it, and would prefer to put a ceiling on the third year of Mr. Reagan's tax cut.

The hearings constitute a swan song for Mr. Reuss who is retiring this month after 28 years in the House, including six years as chairman of the Banking Committee.

"STRAIGHT AS AN ARROW"

During his stay in Washington, Mr. Reuss has earned a reputation as an intellectual who is "straight as an arrow" but decidedly not a backslapper, as a colleague, Representative Benjamin S. Rosenthal, Democrat of Queens, put it.

About his crusade for public works legislation, Mr. Reuss said:

"I think the voters delivered a message on Nov. 2. They thought Reaganomics was deficient in both common sense and fairness. Ronald Reagan has given supply-side economics a bad name. Instead of concentrating on how our economy can become more efficient and productive, he concentrated on lining the pockets of military contractors and the very wealthy who are the principal beneficiaries of his tax cut."

Mr. Reuss said he was retiring because "I figured a fellow ought to do something new." Having undergone heart bypass surgery in 1980, he plans to devote himself to practicing law, teaching, writing and "enjoying life."

Looking back over his years in Washington, he says that Congress has changed considerably, not always for the better. "The quality of the average member today." he said, "is the finest in history, in terms of general education and outlook on public life. But the institution has moved backward, and is less effective today than 28 years ago."

The reasons, he said, are the "evolution of the electronic Congressman" who lives by the television set and computer, the accompanying decline of the parties, "especially mine," and "unbridled" campaign expenditures. "Congress is less collegial," he said, "because there's more egotism and less team spirit."

Mr. Reuss was a 63-year-old "young Turk" when he gained the chairmanship of the Banking Committee in 1975, ousting Representative Wright Patman, an octogenarian, and jumping over two colleagues. It was a year of revolt against aging chairmen; Democrats also toppled the chairmen of the Armed Services and Agriculture Committees.

"In 1975, I'd been here 20 years, and I was still in the four place on the Banking Committee," he recalled. "I knew if I just waited around, by the time I got to be chairman, if ever, I would have developed watermelon seeds between the ears."

As committee chairman, he helped push through the New York City loan guarantee bill, as well as one for the Chrysler Corporation. He said he doubted whether the New York City bill would ever come to pass, because the city, state, banks and unions appeared reluctant to make the sacrifices he felt were needed.

But he has no afterthoughts about helping New York: "We couldn't let New York City go down the drain." He added, however, that "to this day I'm not sure we did the right thing with Chrysler."

PEACE CORPS INSPIRATION

He considers his proudest achievement to be the long crusade that resulted in the "Financial Deregulation and Monetary Control Act of 1980," which gave greater flexibility to financial institutions. "We had set up such a crazy system of highly specialized institutions that our financial system was showing signs of rigor mortis," he said. "We moved to break down some of those barriers between institutions, and let the savings and loan associations make a wide variety of loans, and allow banks to do some of the things hitherto reserved to investment bankers."

Mr. Reuss was also the author of legislation that established the Peace Corps, having been inspired by a visit to Cambodia. "The specific vision," he said, "was the contrast between the super highway between Pnom Penh and the sea, and four young Americans crashing through the jungle to build a school. I've observed that in the last gasp of a civilization, they build great highways from the center to the sea, and than the barbarians come in the other way, and wipe out the civilization."

Mr. Reuss has also exulted in what he calls "feats of statutory archaeology, looking at old lawbooks and finding something nobody knew existed and resurrecting it." In the days before the Clean Water Act, he said, he discovered "The Refuse Act of 1899," which provided penalties for water pollution. Similarly, he discovered a Reconstruction statute that banned housing discrimination on the basis of race, color or creed.

What would he do if he could live his career over again?

"I'd be a bit more angelic to my staff and slap some backs," he said. "It's a marvelous job. Where else do you have a daily opportunity to do good, and get paid for it?"

□ 1840

Mr. KASTENMEIER. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I am delighted to yield to my colleague, the gentleman from Wisconsin.

Mr. KASTENMEIER. Mr. Speaker, with the retirement of my good friend from Wisconsin, HENRY REUSS, from the House of Representatives, we will lose a colleague of extraordinary vision and creativity.

The scope of his interests is vast. The impact he has had in terms of international finance, our own economic structure and our environment, has been typically underplayed but very significant.

Many, I am certain, will speak today of his early promotion of what was to become the Peace Corps; of his uncovering the long forgotten and unused 1899 Refuse Act, that caught hundreds of companies illegally dumping wastes into rivers and led to enactment of the Clean Water Act; his long history of expertise in the area of international finance and his ability to somehow make it understandable to the rest of us; and his leadership role as chairman of the House Banking Committee and of the Joint Economic Committee.

The Milwaukee Journal, in an article earlier this year, said that HENRY REUSS "has a mind like a Cyclone fertilizer spreader, constantly spraying ideas in every direction." I am certain HENRY would like that analogy. Those of us who have known and observed him through the years know that he is as comfortable in his hiking boots, walking the trails of the Ice Age Scientific Reserve, the 1,000-mile-long trail and related parks in Wisconsin, to which he was so key in establishing, as he is dealing with bankers in Zurich.

Those of us from Wisconsin know of his longstanding devotion to his home town, Milwaukee. His dedication to restoring that city and vitalizing it as a

key link in the Midwest is legend with the constituents he has served so well.

His departure from the House will clearly leave a void. It will also probably lower the average IQ of this collective body significantly.

For me, it will represent the departure of a valued friend for more than 24 years. Even before I became a Member of Congress, HENRY REUSS graciously came to my district to aid in my cause and has done so many times since.

He has been a source of wise counsel and advice.

Indeed, both he and his wife, Margie, who has achieved in her own right the admiration of many in the field of economics, have been good friends and advisers to many of us.

Those of us who have known HENRY REUSS through the years know that for HENRY there is no such thing as retirement. The only question to be answered is which of the many interests and opportunities that await him will claim his time.

I am certain we will continue to hear from and about HENRY REUSS. I can only wish him continued success as he pursues his new adventures.

Mr. VENTO. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I am delighted to yield to the gentleman from Minnesota.

Mr. VENTO. Mr. Speaker, I want to commend the gentleman from Wisconsin (Mr. ZABLOCKI) for holding this special order and allowing me to take the opportunity to say, "Thank you" to HENRY REUSS for the help he has been to me as a Member and for the help he has been to the people of this Nation.

Really, HENRY REUSS, in my mind's eye, personified an excellent role model to those of us who aspired to work in the direction and development of national policy.

Really, in terms of my experience on the Banking Committee, on which I served for 4 years, when I first came, he took time and effort to listen to all the members on that committee and lead us in really what I think is a landmark time in terms of addressing the problems and responsibilities in the jurisdiction of that committee. Whether the issue was monetary policy, whether the issue was housing, or whether the issue was consumer affairs, the yeoman service that he provided almost singlehandedly in terms of dealing with community reinvestment provisions, with regard to banks and the regulated savings and loan industry, is work that will long be remembered.

It might be said that the work and policies and efforts of HENRY REUSS are much like the volcano of Mount St. Helens, in that the ash and the effect of those policies will be permeating the very fiber of this Nation for years to come in a very positive way.

So it is with some degree of regret that I learned of our chairman's desire to retire, but certainly the last 2 years really have been the crowning jewel in his performance over three decades of public service.

In terms of his voice and his views being reflected as chairman of the Joint Economic Committee, Mr. Speaker, it certainly has resulted in something we can hold up as Democrats and as progressives from the Midwest and show that we did have a voice during a very difficult time in the development of public policy that did express our views and hopes so eloquently. This was just at a time when we had from my own great State the voice of Hubert Humphrey during these past few years, and indeed they have been very difficult times in terms of public policy. In the direction we have moved, fortune was good to us because we had HENRY REUSS as chairman of the Joint Economic Committee, and I am grateful to him, as I am sure other Democrats and others are that that voice and those views were reflected as eloquently as they were.

That is HENRY and I wish you and your family and your wife especially who have contributed and sacrificed so much in terms of public service a long and hardy future.

Mr. ZABLOCKI. I thank the gentleman for joining in this tribute.

I now yield to the gentlewoman from Ohio (Ms. OAKAR).

Ms. OAKAR. I thank my friend and colleague from Wisconsin for yielding. I certainly commend him for having this special order on our good friend, HENRY REUSS.

From the time Chairman REUSS first arrived in Congress in 1954 he has proven to be both an able legislator and a profound theoretician. I must say he has a tremendously magnificent command of the English language as well.

These are qualities we will sorely miss when the chairman leaves at the end of this Congress.

It is really difficult to measure the achievements of Chairman REUSS. He has guided so much legislation in so many diverse areas, probably one of the most versatile individuals in Congress, as banking, the environment, economics, foreign affairs, to name a few.

As his last assignment in Congress Chairman REUSS chaired some of the most important Joint Economic Committee hearings which I have seen and heard that affect the economic future of our country. Those hearings provided us with distinguished commentary by some of the most important thinkers of our country, and it was only fitting that they be chaired by Chairman REUSS.

There has been a line of thought throughout much of his actions, knowing our present state of affairs and trying to guard our ship of state through future uncharted waters. This has been the hallmark of his tenure here and he leaves a legacy for all of us to ponder.

How many of us remember the excitement of the Peace Corps? That was another achievement of my colleague.

When social security was under attack and underfinanced in 1970 it was Chairman REUSS who in 1971 proposed a 20-percent hike in social security benefits to provide a decent living for our older Americans.

In the area of taxation Chairman REUSS has consistently stood for genuine tax reform, reform aimed at benefiting those who are middle and lower income citizens, the majority of Americans.

Mr. Chairman, I salute one of the greatest Members of this House. I wish him well.

On a personal level, like my colleague, the gentleman from Minnesota (Mr. VENTO) he and I came in the same year to Congress and we served under the leadership of HENRY REUSS as chairman of the Committee on Banking, Finance and Urban Affairs during my first two terms. He was an excellent chairman, very, very fair and very knowledgeable, and certainly gave much of his time to those of us who were new. I know Chairman REUSS will continue for more years to come to serve the American people and, indeed, his country and I wish him and his family my very sincere best wishes.

Mr. ZABLOCKI. I thank the gentlewoman for her contribution.

Mr. Speaker, at this time I yield to the gentleman from Florida (Mr. BENNETT).

Mr. BENNETT. The gentleman from Wisconsin is indeed a man who has left a tremendous list of legislation that he has enacted carefully and discreetly and thoughtfully for our country, a real heritage that has been given to us in the legislation that he has proposed and we have enacted.

He has been a real leader in Congress. All of us, I guess, aspire to be leaders but here we have a real leader.

But despite all of those glowing terms about a fellow Congressman, I guess really the greatest sentiment that I have, and I presume most Members of Congress have when we see a Member of Congress retire, is our affection for him and our concern that he is not going to be with us as much as he was in the past.

Many times at lunch or in the subway train or in our offices I have visited with this delightful personality, this intellectual giant that does not make ordinary people like myself feel

inferior. This very fine and splendid American has been a treasured friend and I am sure will be in the future. But that is the main sentiment I have in seeing him leaving in the capacity of being a Congressman.

I hope he comes back many times because he is a delightful person to be with and we have all been enriched by his presence.

Mr. ZABLOCKI. I thank the gentleman for his contribution.

I now yield to the gentleman from Wisconsin (Mr. GUNDERSON).

Mr. GUNDERSON. I thank the gentleman for yielding.

I would like to join with you in paying tribute at this time to one of certainly our most distinguished colleagues, not only in this Congress but certainly one of our colleagues in the State delegation from Wisconsin.

HENRY REUSS was serving in this Congress, to be honest, long before STEVE GUNDERSON ever thought about running for Congress. I think I can share only two experiences with each and every one of you which reflect on the kind of individual he is.

One experience dates back to when I was in college. I remember during those early 1970's, during the hotbed of the antiwar sentiment at the University of Wisconsin campus in Madison.

In particular I recall as a student there, an undergraduate student, reading the posters on which it said Congressman HENRY REUSS was going to come to Bascom Hall and speak to students. Being the curious political science major that I was at that time I made sure that I attended.

I recall there was not a large attendance at the meeting. He began giving some remarks about the war and our international relations at that time. But then it came down to the question and answer period.

The thing I remember as one who was getting one of their first experiences with a Member of Congress whom they had read about, heard a great deal about, and considered part of the national leadership of this country, was the fact that we had in this gentleman one who I did not agree with totally, not even the remarks he made that afternoon at Bascom Hall, but one who saw his role as an educator and as one who would try to promote reconciliation at a time of grave emotional strife and tension among the people of this country. That is because he used that afternoon to try to speak to all of the students there and try to get them to understand the total picture of what our country could or could not do.

That is one of the very first experiences, live experiences I have had with a Member of Congress and I suspect that has had an impact on my desire to be a part of public service myself.

The second experience that I would like to share with you is one that happened just recently. That was a couple of months ago during the August recess, if I recall, the Congressman from Milwaukee, who was noted for his work on the Banking, Finance and Urban Affairs Committee in helping the large cities of our country, took time out from his work to come up to St. Croix Falls in my congressional district, a small town in a rural part of my area.

He came there because we were having a dedication. We were having a dedication of the Ice Age Interpretive Center, which was a part of the Ice Age National Scientific Reserve, and the only reason we were doing this is because one Congressman from Milwaukee, one Congressman from Wisconsin by the name of HENRY REUSS had for years provided the leadership, and I think more than the leadership, the tenacity to continue to promote what he thought was a very, very important program which now is beginning to see some of the fruits of its harvest in this particular Ice Age Reserve and this interpretive center.

So Congressman REUSS came into western Wisconsin, to the Third Congressional District, to dedicate this particular interpretive center for which he had had so much to do and to show this to the people of Wisconsin, and I think even our country.

But I think it says a second thing about this man who is not only a Congressman, not only an educator, not only one who promotes reconciliation, but one who understands America and our world, both its urban areas from Milwaukee and its rural areas that I come from.

He also understands that we need to, as Leopold, another famous Wisconsinite wrote some time ago, we need to understand that the outstanding scientific discovery of the 20th century is not television or radio but, rather, the complexity of the land organism and the land we come from.

If we are to learn from history, as some people believe we do, then I believe we need to look at the leadership that our distinguished colleague has provided in this area. Once we do that, as we go forth in this country, there are going to be many people that are going to follow in the Halls of the Congress and even from the delegation from Milwaukee and the State of Wisconsin.

But I suspect that there are going to be few people as well rounded, as totally universally committed to the overall purpose that we as human beings have, not as political parties and not even as patriarchs of our own country, but as human beings as our distinguished colleague from Wisconsin.

So I appreciate and thank my distinguished colleague and chairman of the Foreign Affairs Committee for sponsoring this special order so that all of us and in particular those younger Members like myself who have learned and been inspired by his work, could have this brief opportunity to rise and say thank you, not Congressman REUSS, but thank you, HENRY, for what you have done and continue to provide that inspiration to us in the years ahead, even if it is not in this Chamber.

□ 1900

Mr. ZABLOCKI. I thank the gentleman for his contribution.

Mr. Speaker, I yield to the gentleman from Minnesota (Mr. OBERSTAR).

Mr. OBERSTAR. I thank the gentleman for yielding.

Mr. Speaker, I find it, like most of my colleagues, rather difficult to offer a farewell tribute to the gentleman from Wisconsin (Mr. REUSS). I think it is simply a matter of not wanting to let him go.

In this Congress, as the chairman of the Joint Economic Committee, and particularly in the last 3 months, the gentleman has been vigorously involved in efforts to correct the disastrous economic policies of the present administration, and in so doing he has established himself as the leader of the loyal opposition on economic matters. I can only think of an appropriate parallel with our parliamentary counterpart in England, where he would be considered the Chancellor of the Exchequer in a shadow cabinet.

HENRY REUSS has literally had prodigious activities in these concluding months of the 97th Congress. And that will make his departure all the more difficult for those of us entering the 98th Congress.

He has been an enthusiastic and energetic and eloquent and articulate, as well as a tireless leader in the fight for what we consider in this party, on this side of the aisle, to be compassionate, fiscally responsible, and effective economic legislation.

In 1981 it was my privilege to work with HENRY REUSS, DAVE OBEY, MO UDALL, in developing the most responsible tax legislation considered in the 97th Congress. Had we adopted the Udall-Reuss-Obey proposal a year ago we would today have substantially reduced Federal deficits, we would have a significantly lower rate of unemployment, we would have a substantially healthier economy.

Let me stop there a moment and say that had that occurred, surely that would be HENRY REUSS' greatest legacy to the country on leaving this Congress.

Those of us who know and respect Chairman REUSS have no doubt that the years ahead for him will be tremendously fulfilling ones. Freed of the institutional responsibilities and con-

straints of this body he will in the future develop those considerable energies and all of his impressive mental and political abilities to the pursuit of academic as well as pragmatic endeavors to enlighten us and benefit all of his fellow Americans.

I am proud that in one of my first acts as a member of the Democratic Caucus before the 94th Congress convened, I helped elect HENRY REUSS chairman of the House Banking Committee. That pride I must say is shared by the overwhelming number of members of that class who contributed to that successful effort.

A constituent of HENRY REUSS' wrote to me a few weeks ago urging that we establish a Draft Henry Reuss for President Committee. And those of us who know HENRY REUSS well and love him cannot but take such a suggestion seriously.

Mr. ZABLOCKI. I thank my colleague for his observations.

I yield to the gentleman from New York (Mr. SCHEUER).

Mr. SCHEUER. Mr. Speaker, I, too, rise sadly for the loss of HENRY to this Chamber, but with a feeling that this step must be right for him at this time.

HENRY has been a towering Member of this House. He has been egregious. He has stood out head and shoulders above the herd.

As chairman of the Banking Committee and as chairman of the Joint Economic Committee, HENRY acquired a reputation of solidity, of professionalism, of erudition, of scholarship, of sound judgment that reflected on every Member of this House.

When there were important economic questions of the day, it was to HENRY that the business media, columnists and editors turned, as well as the general practitioners in the electronic and printed press. And always in commenting on national and international economic affairs, HENRY combined his brilliance as an economist, his scholarship, his sound and thorough knowledge of economics, with a compassion, with a people-oriented warmth that made him a populist spokesman in the tradition of Bob LaFollette, for everything that was good and decent in America.

As he distinguished himself, he reflected great credit upon every Member of this House. And time and time again, as I would read his comments on the important issues of the day, or would listen to him on television, I had a sense of pride that our political system could send to Congress and then put a square peg in a square hole of outstanding leadership a man of such elegance of economic thought, and a man of such personal warmth and humanity.

So I can only say that we are all going to miss HENRY. We are going to miss him for his profundity, for his professionalism, and above all for the warmth and affection that we have felt in a two-way glow between the many, many friends of his in this body and HENRY himself.

Mr. ZABLOCKI. Mr. Speaker, at this time I yield to the gentleman from Wisconsin (Mr. OBEY).

Mr. OBEY. Mr. Speaker, the first time I ever met HENRY REUSS I was a student at the University of Wisconsin, and we had a meeting of the Young Democrats in the old education building. HENRY gave a really good speech that night. When he was finished, I remember asking him—this was at the time Dwight Eisenhower was President, just before the 1958 elections. And I remember asking HENRY, "Would you mind evaluating Dwight Eisenhower."

And HENRY said, "Well, let me just say that Dwight Eisenhower was the only man in history that had a chance to be President and turned it down."

I thought that that was really a very funny comment at the time. As you know, that was the view of Eisenhower by a lot of Democrats who wanted to see more done on the part of the Federal Government.

I just thought that that remark caught the wry humor or exemplified the wry humor which HENRY has contributed on so many occasions.

I think if you are looking for words to describe HENRY REUSS, you look for words like humor, guts. I have never seen HENRY back away from a fight or be shy about starting fights that he felt needed to be fought for the good of the common people in this country. I think obviously the word "intelligence" comes to mind. We know that HENRY brings force of intellect to his work which many of us envy and certainly as his colleagues cherish.

I think also as a younger, newer member of the Wisconsin delegation I have to say that HENRY has been immensely kind. When I came here in April of 1969 in a special election it was a pretty lonely experience. It was not like it is when you have 70 or 80 freshmen coming in and you have some people to talk to about your common problems.

HENRY REUSS was one of those who took the time to sit down and point out to me where various people were coming from in the House and taught me a lot of the ropes that you have to know here. In those days there were not very many senior Members that took all that much time. I was grateful to have a delegation of people by a person such as HENRY who would take the time.

□ 1910

If you take a look at his career, it is truly impressive. I do not know of any career in the House that has had as much impact on the world after World War II as HENRY's had; first of all, his role in helping implement the Marshall plan, which is truly, I think, one of the great economic recovery actions taken by the Western World. It is one of the key reasons that we have a strong and vital Western Europe as an ally today.

If you take a look at his insistence upon economic fairness and policies that would lead to fairness and growth and the eloquence with which he has pursued those policies; if you take a look at his really inexhaustible efforts, as the gentleman in the well knows, for his home State and his home city of Milwaukee to help revitalize the downtown area, you just have to be proud to have spent a portion of your career in the company of a man with the qualities of HENRY REUSS.

I very much hate to see him leave. He is a tremendous loss to the State of Wisconsin and I know he is a tremendous personal loss to us all.

Mr. ZABLOCKI. Mr. Chairman, I yield to the gentleman from California (Mr. JOHN L. BURTON).

Mr. JOHN L. BURTON. Mr. Chairman, I thank the gentleman from Wisconsin for yielding.

I think it is proof of my affection for HENRY REUSS that I ran over from the office and put my tie back on to come and speak for this.

The first time I met HENRY was in the backyard of PETE STARK's house when I was first a Member of Congress after being elected in a special election in June of 1974. PETE STARK with his introduction of HENRY took about 5 minutes to introduce him and to ask him a question on how you would solve all the problems of the universe and of this Nation. I remember HENRY going, "Well, one could consider socialism." After having said that, then he launched into one of his talks about how we could try to make this economic system of ours work to a better degree than it does to improve the quality of life for the people of this Nation.

The second thing I remember about HENRY was sitting with him down in the House dining room having lunch and he ordered a beer to drink and he naturally ordered, which I consider actually to be the best beer in the country, Pabst Blue Ribbon. It was a good Milwaukee beer owned by Democrats, he said. Our family lived in Milwaukee and we, too, were graced with growing up under Socialist mayors and knew they could make a city work.

Another thing I remember about HENRY, my wife and I had HENRY when he was chairman of the Banking Committee, he and his wife over to our house for dinner to impress a California banker friend of mine. We got the wrong kind of roast. We thought we were getting in effect the eye of a prime rib, but we got a rump roast, only we were cooking it like a prime

rib and we could not cut the thing. I remember it was right after the New York bailout bill and my wife, Sharon, was really panicked and she said, "What are we going to do? How are we going to deal with this?"

And I said, "For Christ's sake, HENRY, if you bailed out New York, you ought to be able to bail out this dinner."

So we brought him in to fix up the meat and I remember always the gentleman, as he was cutting the meat and then chewing on it and he went, "Oh, oh, very delicious."

I figured anybody that could bail out New York could bail out JOHN BURTON trying to make a prime rib out of a rump roast.

Also I remember HENRY when he ran for chairman of the Banking Committee against another great American, Wright Patman, and I think HENRY was 60 years old at that time. It was 1975. He felt that with I believe 20 years seniority and at the age of 60 he was the most unique of all the young Turks in the House.

He was a man of great wit, of great perception.

I am happy for him that he is leaving. I am not happy for the country. I am happy for HENRY because those of us that do decide to leave here under our own power realize that there is, in fact, not only life after death, but life after serving in the House.

I would differ with JIMMY OBERSTAR. I think HENRY REUSS ought to be serious about his chances of being President and would be happy to join an exploratory committee. I am committed to CHRIS DODD first, but he is my second choice; but HENRY has done a great service to this country. When the Democratic Party takes over that White House and tears down the fence and has a picnic on the lawn after the next Presidential election, I am looking forward to an intelligent and humane Chairman of the Federal Reserve Board whose term will be limited to 3 years.

HENRY, I love you very much and I look forward to opening a bar and having you come out and run the kitchen.

Mr. ZABLOCKI. I thank the gentleman for his contribution.

Mr. Speaker, I yield to the gentleman from Oklahoma (JIM JONES).

Mr. JONES of Oklahoma. Mr. Speaker, I thank the gentleman for yielding.

I am truly delighted to participate in this tribute to our good friend and colleague, HENRY REUSS. I had the privilege of getting to observe HENRY REUSS for the first time about 21 years ago when I came to this institution right out of college and worked for a Congressman from Oklahoma while going to law school at night. As a staff assistant, particularly staff assistants who are attending law school at the same time do, they sit around and size up this institution and determine who are the giants, who are the movers and shakers and who make things happen. Out of the very small handful of Members of Congress in the 1961 to 1964 timeframe, we concluded, those of us who really knew what was going on, obviously, concluded that HENRY REUSS was one of those handful who were the movers and shakers, the people that made things happen through the force of their intellect, the force of their objectivity, the force of their vision for this country.

Since that time, having been elected to the Congress, I got to see HENRY REUSS in a more personal way, but it really has been only the last 2 years in which I have truly appreciated the value of HENRY REUSS to this institution and to this country. Having been elected as chairman of the Budget Committee, we had a number of tough fights in the last 2 years. In that process, HENRY REUSS was one of the most instrumental, one of the most helpful people I know in trying to put together a package, a program that was both fair and workable, to bring this country out of the economic doldrums in which we have been living and into a path of true economic recovery.

The private meetings we have had together show that he does have the intellect, he does have the vision; but just as important, he knows how to wheel and deal and come up with a compromise package designed to meet the broad spectrum of concerns in this body.

Those who have spoken about HENRY today have said different things from different perspectives; but a few characteristics come out in all the conversations, all the speeches.

First of all, his brilliance; that goes without question; his courage, that has been demonstrated time and time again on issue after isssue; his statesmanship, all of us feel that about HENRY REUSS; his dignity and then as our colleague, DAVE OBEY said, his kindness. For the last 2 years he has been very kind, very gentle, very helpful to me in the work that I have tried to perform as chairman of the Budget Committee. For that experience and that time period alone, I will be eternally grateful for that help and for that friendship.

So many of the comments today have sounded like a farewell and we will never see you again. I do not intend mine to be a farewell at all because this country, particularly in the next few years ahead, faces some tremendous problems, the likes of which we have not seen in at least three or four, maybe five decades.

Insofar as I will be working on those problems, I can assure you and I hope that I can count on HENRY to continue to counsel those of us who are trying to grapple with those problems, because his intellect, his vision will be needed in the next few years by those of us who are remaining as much or more so than it has been in the last 28 years when he so ably served this country.

Mr. ZABLOCKI. I thank the gentleman for his comments.

Mr. Speaker, I yield to the gentleman from Ohio (Mr. PEASE).

Mr. PEASE. Mr. Speaker, I thank the gentleman very much for yielding.

I am pleased to participate in this special order. I frankly had not been aware of it until I turned on my television set and saw the earlier speakers talking about HENRY.

□ 1920

So what I am saying is essentially off the cuff, but very, very much heartfelt.

There is no person, and I emphasize no person, that I have respected as much in my 6 years in Congress as HENRY REUSS. He is truly a gentleman and a scholar. Those qualities are not ones that automatically come to the fore in the Congress. Actually, our political system, with its rough and tumble, its hurly-burly, often mitigates against genuine scholars coming into this body.

So that makes HENRY REUSS an uncommon man. He is a genuine scholar, an intellectual, a man of ideas and principles, a leader by the force of his ideas as well as by the force of his personality.

He is a person who has represented not only his own congressional district, but the Nation as a whole in many, many policy fields.

HENRY is witty, urbane, intelligent, humane, energetic, inventive, a perfect role model, as one of the earlier speakers has said, for younger Members of the House.

He has influenced me, perhaps without knowing it fully, but he has influenced me a great deal in the last 6 years. I think that has made me a better Member of Congress.

I thank the gentleman for yielding and for taking this time.

Mr. ZABLOCKI. Mr. Speaker, I yield to the gentleman from New York (Mr. SCHUMER).

Mr. SCHUMER. I thank the gentleman from Wisconsin, the chairman of the Committee on Foreign Affairs, for yielding.

Mr. Speaker, I, too, join with my colleagues in praise of HENRY RUESS, someone whose departure I will sorely feel.

I have only known Chairman REUSS for 2 years as we have served on the Committee on Banking, Finance, and Urban Affairs, and he on the Joint Economic Committee with me, interested in economic ideas. But he has truly been an inspiration.

I know before I spoke, some of the more senior Members said that he would prove an excellent role model to younger Members. I think I realized that the first time I walked into his office and asked him whether he thought it was a good idea for me to seek membership on the Committee on Banking, Finance, and Urban Affairs.

Chairman REUSS to me symbolizes the best in American Government, a man of ideas, yet a man pragmatic enough to see those ideas implemented; a man of compassion who never forgot about his roots and about the little people who depend on all of us here.

Time and time again HENRY REUSS has had his compassion embodied in law so that literally tens of millions of Americans have benefited from the fact that he took public service as his calling.

Mr. Speaker, I will sorely miss the presence of HENRY REUSS here, both in his writings, his readings, and in his personage. He is the kind of gentleman who would go out of his way for a younger Member interested in the kinds of things that he was interested in, and one who would hope to follow in his footsteps.

I thank the chairman of the committee for allowing me this opportunity.

Mr. ZABLOCKI. I thank the gentleman from New York.

Mr. Speaker, I yield to the gentleman from Texas (Mr. GONZALEZ).

Mr. GONZALEZ. Mr. Speaker, I thank the distinguished chairman for this opportunity to rise and say a few things, sadly, about this departing illustrious Member of the House with whom I have had the great privilege of serving on the same committee since I came to the Congress 21 years ago and whose leadership has been exemplary and whose idealism, as one of my colleagues said here previously, his academic and profound seminal thinking has been an inspiration to me all along in my service here in the House.

I think from the very outset when I came up, which will be 21 years shortly, I will have been on January 10 next exactly 21 years in the House. I was elected in a special election November 4, 1961, and was sworn in here on January 10, 1962.

I went back to my office after the swearing-in and I had an emergency call from a businessman in my district. At that time my district consisted of the entire county. This businessman was in great anguish because we had suffered a blightening cold spell, what we call a norther. As a result, it had created a problem for those who had their cattle in the fields depending on field feed. This meant that they had to have prickly pear burners available.

This man manufactured them in San Antonio, but in order to supply on an emergency basis, he had to have these component parts which were manufactured in Congressman REUSS' district. So not knowing what to do, I just picked up the phone and called the Congressman. There he was on the other end of the line.

I explained my dilemma. He said, "Let us see what we can do."

The next thing I know I get a call back from him and he says, "I contacted the manufacturer in Wisconsin and the parts are on the way. The problem is solved."

This was my introduction to HENRY REUSS. Mind you, I had just come aboard and barely had seen him at that time because at that time the Committee on Banking and Currency, as it was called then, met very infrequently. As a matter of fact, in 1962 we had three meetings during that whole period, three formal meetings.

But I think that the departure of HENRY REUSS from the Congress is truly a loss to the country, to the Congress particularly. As I have worked with and under his leadership, one of the first assignments on the subcommittee was to the subcommittee that he then chaired, the Subcommittee on International Finance as it was then known.

That being a very special field of interest, I noticed the tremendous reputation that HENRY REUSS had not only in our country but internationally. He developed not only an expertise, but such a knowledge in depth that he was recognized. He wrote numerous articles. In fact, I think the record should show that he is the author of more than one book and that his preeminence in this respect was very well noted in the academic world and also in the business world.

His leadership on the House Committee on Banking, Finance, and Urban Affairs, as I said and repeat, was exemplary. That service gave every one of us a target or a goal to emulate.

I think the record also ought to show that on top of being considered an expert in these fields, he was the first, for example, who discussed the possibility of what came out later to be revenue sharing. It was really a Henry Reuss initiative, first spelled out and even discussed in the Congress by HENRY REUSS, becoming a reality a few years later.

So I join my colleagues in expressing my sincere regrets and sadness at seeing this great American leave the active scene of combat. However, I know that HENRY REUSS is not going to retire into oblivion, and it is my hope that if he remains in the environs here in Washington that he will be available for consultation and will visit us often. I certainly wish him Godspeed in his future endeavors.

I thank the Chairman for allowing me this opportunity.

Mr. ZABLOCKI. I thank the gentleman for his comments.

Mr. Speaker, I yield to the gentleman from California (Mr. ANDERSON).

Mr. ANDERSON. I thank the gentleman for yielding.

Mr. Speaker, I am honored by this opportunity to rise and join my colleagues in duly recognizing the Honorable HENRY REUSS, who, at the conclusion of this special session, will be bidding farewell to the Congress, after 28 years as one of our most distinguished Members.

An accomplished author and legislator, HENRY, in addition to his brilliant performance as chairman of the Joint Economic Committee, originated many innovative concepts in response to the needs and challenges of our citizens. He has encouraged each of us to be like him: open-minded, progressive, and concerned for the needs of both our country and its citizens.

I know that, from a personal standpoint, one of HENRY's most cherished moments was when the President and the Congress approved legislation creating the Peace Corps. He is also to be recognized for his work as an avid yet practical environmentalist; as an advocate of fair housing legislation and other programs to aid our poorer citizens; and as author or sponsor of many programs that have served the economic well-being of all our people.

It is in this spirit of State and national service that HENRY became actively a part of so many causes: as commissioner of the Milwaukee chapter of the March of Dimes, as director of the American Youth Hostels, and as a board member of the Enterprise Foundation. I would also like to call to mind his military service to our Nation during the Second World War, and his receipt of the Bronze Star Medal for Valor as a result of his heroic actions during the Rhine River crossing. After the war, he served as deputy general counsel for the Marshall plan, and helped bring to fruition this noble and generous effort to restore Europe to economic health.

My wife, Lee, joins me in extending to HENRY REUSS, his wife, Margaret, and their four children, our warmest wishes for a healthful and prosperous future. His knowledge, leadership, vitality, and warm personality will be dearly missed in this body.

● Mr. CONTE. Mr. Speaker, there are too few creative thinkers in the Congress already without having to suffer the loss of one of the most successful. HENRY REUSS, who has decided to retire at the end of this term, has been at the root of some of this body's best legislative initiatives of the past quarter century.

HENRY's monetary and legal expertise has already been accompanied by a passion to defend equal opportunity and provide creative solutions to na-

tional problems. In the 1960's, HENRY's dogged research laid the groundwork for landmark open housing and antipollution legislation. His belief in aiding the less fortunate of the world by providing opportunities for our young people to engage in intercultural education led to the creation of the Peace Corps, and his resolve to aid our Nation's cities and towns led to his authorship of the first Federal Revenue Sharing Act.

To become chairman of the House Banking Committee in 1975, HENRY, in his usual independent fashion, piloted a coup of the leadership, instituted the important Subcommittee on the City, and went about his business of helping the Nation's needy.

His ascension to the chairmanship of the Joint Economic Committee brought with it knowledge and expertise in international and domestic economics unmatched by any other Member. His insights into the mechanics of our domestic monetary policy have served the committee and the Nation very well, especially in these times of economic strain.

HENRY has been a great friend through the years, and his unique talents and creative thinking are needed as much today as ever before. I cannot blame a man for wanting to spend a few hours more with his fishing pole, and I know that HENRY will continue to influence our Nation's direction regardless of the office he holds. I wish him health and happiness in the future.●

● Mr. BOLAND. Mr. Speaker, I am pleased to join the many friends of HENRY REUSS in congratulating him on his outstanding congressional service and wishing him well as he retires at the end of the 97th Congress. For 28 years HENRY has represented the Fifth District of Wisconsin with intelligence, integrity, and dedication. His retirement will deprive the House of one of its most capable Members.

As chairman of the Committee on Banking, Finance and Urban Affairs from 1975 to 1981, HENRY combined his extensive knowledge of finance with an even-handed approach to his role as chairman. Under his leadership, the committee was able to effectively guide the House in its consideration of complex legislation affecting the national economy and the banking community. Since 1981, when HENRY assumed chairmanship of the Joint Economic Committee, he has continued to focus his considerable knowledge on economic matters of intense national concern.

With his diligence and scholarship, HENRY REUSS has provided the people of the United States with a uniquely capable voice in their National Government. For those of us who have served with him, he has provided an invaluable source of knowledge and wise counsel. I wish HENRY the greatest success in his future endeavors.●

● Mr. MURTHA. Mr. Speaker, the next Congress will certainly miss the leadership and insightfulness of Congressman HENRY REUSS.

Particularly with his recent work on the Joint Economic Committee, HENRY REUSS has been a leading spokesman for the elderly, poor, and less fortunate in our society. In addition, he has been bold and imaginative in proposing alternatives to the administration's economic policies. It is through this type of lively, intelligent debate that we can hope to achieve a consensus economic policy to promote growth and get the American economy moving again.

But it has not simply been in the economy that HENRY REUSS has left his mark. To each issue I have been involved with during my years in Congress, HENRY has brought intelligent analysis and an appreciation for the many sides of the debate. His suggestions have always been constructive. He is a man of philosophy and principle with the courage to stand firm for his convictions.

The service of HENRY REUSS in Congress has been in the highest traditions of the House of Representatives. I know I join with his many friends and colleagues in wishing him well and extending our thanks for the contribution he has made to our Nation.●

● Mr. ADDABBO. Mr. Speaker, it is with great pride and pleasure that I join my colleagues in paying tribute to our good friend and most distinguished colleague, HENRY REUSS.

HENRY's impressive record of achievement in his 28 years of service to his constituents and his Nation is one of which he should be proud, and I join my colleagues in expressing our deep admiration and gratitude.

Since his election to the House of Representatives in 1955, HENRY has been the source of innovative and challenging ideas, and always a man of great intellect and wit. As chairman of the Joint Economic Committee and former chairman of the House Banking, Finance and Urban Affairs Committee, HENRY has demonstrated his leadership and expertise in international finance and trade. As chairman of the Joint Economic Committee, HENRY has tackled such diverse areas as agricultural policy, the Nation's economic status of women—certainly an impressive and demanding workload.

He will be well-remembered by his constituents, the residents of the Fifth Congressional District of Wisconsin, for his tireless efforts on behalf of open housing legislation and antipollution measures. As chairman of a special nonlegislative Subcommittee on the City, his dedication to the urban middle class and poor directed his legislative efforts. HENRY will be fondly remembered by over 40,000 past Peace Corps volunteers and countless future members; his proposals in 1957 provided the impetus for the foundation of this organization.

HENRY REUSS will be sorely missed by his constituents and the Nation; but especially by those of us who have had the honor of serving with him. I wish him every success in his future endeavors.●

● Mr. FORD of Michigan. Mr. Speaker, I will truly miss the presence of one of the most respected and intellectual Members of Congress—HENRY S. REUSS. Throughout his 28 years in the House, HENRY has exhibited a broad range of interests and expertise. As chairman of the Joint Economic Committee, HENRY has used that body as a forum for topics as varied as the international economic impact of Persian Gulf politics and the economic status of women in America. I doubt if anyone is better suited for the chairmanship of this committee than HENRY.

Early in his congressional career, one of Congressman REUSS' major accomplishments was his work with two of the great statesmen of our time, the late President John F. Kennedy and the late Hubert H. Humphrey, which created the Peace Corps. I know that HENRY must receive great satisfaction knowing of the opportunities that the Corps has provided many of America's youth and the positive reflection it has made of the United States in foreign countries.

Late in his career, HENRY became active in environmental issues. After noting the dearth of legislation to protect the waters of Wisconsin and the rest of the United States, HENRY began a thorough search of the United States Code and unearthed the Refuse Act of 1899. He used this act to file innumerable lawsuits in Wisconsin, and focused national attention on the need for a comprehensive water pollution law. These efforts culminated in the Clean Water Act of 1972. In addition, Chairman REUSS' dedication to the outdoors spurred his involvement in preservation projects throughout the country.

Undoubtedly, HENRY is best known for his work on economic issues. In 1975, he became chairman of the Committee on Banking, Finance and Urban Affairs, a position which he held through 1980. In this capacity, he worked on a variety of projects, including urban assistance and banking deregulation. He also has been the pointman in the congressional drive to pressure the Federal Reserve Board to keep interest rates low for productive purposes.

HENRY REUSS' dedication to the elderly, the needy, and people from all walks of life throughout America will be greatly missed in the Halls of Con-

gress. I look upon his departure with great sadness, and wish him continued success and happiness.●

● Mr. ST GERMAIN. Mr. Speaker, it has been my pleasure to serve with HENRY REUSS on the Banking Committee for more than 20 years. While others here today will mention HENRY'S accomplishments on other committees, I am struck by one thing as I look back over that span of service on the Banking Committee—HENRY REUSS has truly been one of Congress futurists.

From when I first came to Congress in 1961, here was our colleague from Milwaukee using every forum to remind us that the American financial system was inextricably tied into the world financial system. Drawing on his experience and contacts with the Marshall plan—and long before the financial pages and editorial writers began devoting space to the world's financial interdependence—HENRY was here on the floor speaking of special drawing rights, the Eurodollar, the Euromoney markets—pushing and pulling the rest of us into understanding the impact of changes in the world's financial system on our own system.

When he became chairman of the House Banking Committee in 1975, HENRY began a multifaceted effort to turn the committee beyond the mundane decisions about whether we would continue regulation Q for another 90 days and onto the larger questions of structural change needed to take financial structures set up in the 19th and early 20th centuries into the 21st century. Chairman REUSS looked at the system from every angle.

Among his major accomplishments were the establishment in 1975 of the so-called FINE study—financial institutions and the nation's economy. Using my Subcommittee on Financial Institutions as a vehicle, Chairman REUSS inspired a major effort to reexamine all aspects of financial legislation. I would like to quote from the preface of the discussion principles to indicate the scope of this effort:

As a means of insuring the widest possible participation, including that of the consumer, citizen and financial groups, the following set of Discussion Principles, a result of preliminary discussions with staff and expert consultants, is submitted as a part of the FINE (Financial Institutions and the Nation's Economy) Study process.

The broad approach embodied in these Discussion Principles is deemed essential to insure that proposals for the restructuring of our Nation's financial institutions clearly promote efficiency of financial markets through increased competition among financial institutions. Artificial and outmoded constraints which have served to inhibit capital formation required of a flourishing economy must be dealt with comprehensively if the credit needs of this Nation—private individuals, government, and business—are to be met.

Hearings will now be held on these principles, leading to the consideration of implementing legislation. The Committee encourages the fullest possible participation, by the submission of suggestions, criticisms, and supplemental proposals.

And full participation we got, HENRY knows from his years here that the best change—the best legislation—takes time, that you have got to keep at it. And because he kept at it, HENRY S. REUSS can take a large share of the credit for:

The Federal Reserve System now has to come up every 6 months and apprise the Congress of its targets for money growth for the next year. For those who come late to this debate, you would be surprised to know how difficult and impassioned this attempt by Congress to obtain information from the super-secret Federal Reserve System became. But HENRY REUSS persisted.

The General Accounting Office—the Congress watchdog—can now audit the banking agencies: the Federal Reserve System, the Federal Deposit Insurance Corporation, and the Comptroller of the Currency. Again, for those who come late to this effort and wonder why it should ever have not been so, the Congress is operating with new and additional information because HENRY REUSS persisted.

And finally, in 1980, 5 years after the start of the FINE process, HENRY got his "landmark," the Depository Institutions Deregulation and Monetary Control Act—the major effort to untangle the anachronistic restrictions set up over more than 100 years of banking legislation came to life with all the oxygen it needed. Again, because HENRY REUSS persisted.

The Federal Reserve System, both at the Board of Governors level and throughout the district banks and branches, is becoming more broadly representative of the citizens of this Nation as a result of Mr. REUSS' reports, columns, speeches, and prodding. While HENRY would be the first to say that all of the financial regulatory agencies have a long way to go in employment opportunity and representation, the groundwork has been laid because HENRY REUSS persisted.

Mr. Speaker, Mr. REUSS has left a large pair of shoes to fill as chairman of the Banking Committee, but I am well served by remembering how he stuck to it, how he returned again and again to the problem that needed correcting. We will miss Chairman REUSS and we will try to live up to the challenge he has left us.●

● Mr. DERWINSKI. Mr. Speaker, we join today in paying tribute to the public service of our retiring colleague, the Honorable HENRY S. REUSS, chairman of the Joint Economic Committee and former chairman of the House Banking, Finance and Urban Affairs Committee.

His dynamic leadership in the House over the past 28 years has been a source of great inspiration and respect. His concentration on economic matters and monetary policy has gained him national recognition as a skillful legislator. HENRY'S perceptive insights and broad experience in these committees important responsibilities will be hard to replace.

HENRY REUSS has served the Fifth District of Wisconsin as a dedicated and effective Member of this body. HENRY'S experience and creative legislative proposals have added much to the Congress.

As HENRY REUSS leaves the Congress, I join in congratulating him on his many years of dedicated service, and wish him many more happy and healthy years in his well-deserved retirement.●

● Mr. GARCIA. Mr. Speaker, HENRY REUSS leaves Congress after this term, and with him goes another piece of the liberal Democratic tradition. Throughout his career, he fought for the poor and minorities. But there was nothing knee-jerk in his liberalism. He believes in what he was doing.

For 28 years, HENRY REUSS was a Member of this great body. He has seen a lot of changes, a lot of history. He has also made history. He bailed out my city, New York, a few years back. He helped draft the legislation to establish the Peace Corps, one of the most humane forms of foreign aid this country has ever devised.

This is a tough occupation we have. We are constantly on center stage and under public scrutiny. We never really know whether or not we are being effective. Election results only tell us half the story; our legislative record tells the other half.

In that case, HENRY REUSS will be remembered. He was a diligent legislator. He was also a leader, in a strong and somewhat quiet way. The 98th Congress will miss his leadership. The Democratic Party will miss his guidance and dependability.●

● Mr. WILLIAM J. COYNE. Mr. Speaker, Chairman REUSS has been the kind of Congressman who makes one proud to be in politics and proud to be a Member of the House. Even before I came to Washington, when I served on the Pittsburgh City Council, HENRY REUSS was one of the few persons in Washington who was alert to reforms being carried out in my city. He wanted to probe what we were doing and find out if policies that were proving beneficial in our area could be helpful to other cities.

For anyone interested in urban affairs, Chairman REUSS was a fount of knowledge. His understanding of local tax issues, urban transportation, metropolitan governance, and land use matters was impressive.

He has also been a great innovator. He was not afraid to pursue little-known or unpopular causes. And when

he pushed for a new approach, it was evident that he had researched it thoroughly. His national reputation as one of the keenest thinkers in the House is well deserved.

I count myself fortunate to have known and worked with Chairman REUSS. The House will be a poorer place for his leaving. But it is also a richer place for his having served so long and so well.

As we bid him farewell, I know I join my colleagues in expressing the confident hope that we in this House and in the country at large will still have the benefit of his counsel for many years to come.●

● Mr. STOKES. Mr. Speaker, it is a pleasure for me to join with the distinguished gentleman from the State of Wisconsin, Mr. ZABLOCKI and the rest of my colleagues in honoring one of the most respected and valuable Members of the House, Congressman HENRY REUSS. As we all know, HENRY will be retiring at the end of the 97th Congress.

I take this time to say to Congressman REUSS that every Member of the House and the American people will sorely miss the expertise and commitment you have brought to the business of this body.

Mr. Speaker, I have seen few legislators during my 14 years in the Congress who have made such a profound and indelible mark on the work of this body like my friend from Wisconsin's Fifth Congressional District. At the same time, he has gained a reputation for his intellect and dedication throughout the business, academic, and other sectors of the Nation.

Congressman REUSS currently serves as the distinguished chairman of the Joint Economic Committee and is the ranking Democrat and former chairman of the House Banking, Finance and Urban Affairs Committee. Throughout his 14 terms in the House, HENRY REUSS has become known as the resident expert on economic and monetary policy. Accordingly, the leadership and Members on both sides of the aisle have come to respect his opinion and positions on key issues dealing with economic and monetary policy.

In fact, Mr. Speaker, much of the historic legislation relating to monetary policy, in some way, bears the mark of Congressman REUSS. At this time, I would like to share some examples with my colleagues.

First, it was Congressman REUSS' amendment which gave the President in 1975, the authority to impose wage and price controls. In 1976, it was HENRY REUSS who dared to sue the Federal Reserve Board to block presidents of regional Federal Reserve banks from voting on domestic monetary policy as members of the Federal Open Market Committee. Mr. REUSS won that battle just as he won so many other battles dealing with economic policy.

Mr. Speaker, it has been Congressman REUSS at the forefront of the fight, time and time again, to make the Federal Reserve Board lower its often excessively high interest rates. Finally, it was a bill sponsored by Congressman REUSS that passed requiring all banks to make minimum reserve deposits with the Federal Reserve bank, whether they are members are not.

Mr. Speaker, the list of Reuss authored measures in the areas of economic and monetary policy is exhaustive. Throughout his many years in the Congress, HENRY REUSS seems never to have lost his enthusiasm or commitment to developing progressive ideas to remedy the economic and monetary woes of this Nation. I applaud him for that perseverance.

With the continued economic crisis in this Nation and the ongoing need for creative and progressive measures to address those concerns, we will undoubtedly miss the leadership and legislative efforts of HENRY REUSS in the 98th Congress.

Mr. Speaker, it is with those thoughts in mind, that I join with my colleagues in saluting the man who has become the resident expert on economic and monetary policy in the House, the Honorable HENRY REUSS.●

● Mr. MAZZOLI. Mr. Speaker, I join my colleagues today in paying tribute to Representative HENRY REUSS of the Fifth District of Wisconsin. HENRY has rendered a distinct service to the House as chairman of the Joint Economic Committee. HENRY's leadership and economic scholarship has made him a valuable asset to the House as well as the State of Wisconsin. I extend to HENRY and his family my best wishes upon his retirement.●

● Mr. SHUSTER. I am pleased to join in this tribute to our distinguished colleague, the Honorable HENRY REUSS, who is retiring from this House after 28 years of exemplary service. His constituents in the Fifth Congressional District of Wisconsin, the Members of this body, and the people of the Nation will miss his dedicated representation and able leadership.

As former chairman of the House Banking Committee, and as chairman of the Joint Economic Committee, HENRY REUSS showed exceptional grasp of complex economic problems, and is widely recognized as one of the foremost experts on international finance. He was an early proponent of the Peace Corps, and an advocate of renewal of our own urban areas. He also was a leader in the development of the revenue sharing concept.

In his efforts in foreign policy, environmental conservation, and in domestic and international economics, HENRY REUSS always showed intelligence, determination and compassion. We who have served with him have benefited from having HENRY REUSS as a colleague and a friend.

I wish him the best of success in his future endeavors.●

● Mr. HOYER. Mr. Speaker, when the 97th Congress comes to a close at the end of the month, it will lose one of its most distinguished and able Members. HENRY REUSS, chairman of the Joint Economic Committee and former chairman of the Committee on Banking, Finance and Urban Affairs, is retiring after 14 extremely fruitful terms in the Congress of the United States.

My tenure in Congress—19 months—has been considerably shorter than HENRY REUSS', and I am honored to have had the privilege of working with him. He is a recognized expert on international finance, a creative economic thinker and, most of all, a generous and tolerant man who extends his compassion to all those around him. He has unswervingly maintained his commitment to help the less fortunate: the poor, the sick and the old; and he has served his country with energy and dedication which can be a model to us all.

Chairman REUSS has played a critical role in the shaping of major events of the past five decades. He contributed to the Roosevelt economic recovery plan through his work at the Office of Price Administration; he earned a medal for distinguished service in World War II; he assisted the Marshall reconstruction of Europe; and he joined Congress in 1954. Throughout his career, and, most particularly, since his election in the 1950's, he has been a forceful and articulate presence in the development and enactment of economic policy in this institution.

But perhaps Mr. REUSS may best be remembered as a man of keen intellect; a man whose ability to recognize the important link between positive government action and a healthy economy was crucial to his successful development of fiscal policy; a man whose ideas, however creative, were always backed with an intelligent analysis of economic facts. It is a sign of the strength of his vision that these ideas have been adopted by administrations of both parties.

I recently had the honor of joining Chairman REUSS at Joint Economic Committee hearings on the unemployment problem. He consistently attempted to go beyond the numbing statistics of the problems in this country and into the realities and magnitude of its unemployment problems. He did this by covering those anonymous faces with flesh and bone and offering the true stories of life as an unemployed person. It is this humanity, this striving to fulfill the vision of this country, that so endears us to Chair-

man REUSS and makes it equally difficult to see him go.

Mr. Speaker, I ask my colleagues to join me in expressing the deep sense of appreciation that we feel for the contributions that HENRY REUSS has made to this institution and to this great Nation. His intelligence, bold thinking, and, above all, his refusal to retreat from his deeply held convictions in the face of political adversity are all qualities that will be missed. I am privileged to have worked with HENRY REUSS, and I wish him and his wife Margaret continued success in the future.●

● Mr. ROE. Mr. Speaker, I deem it a great honor to rise today to join in a well-deserved salute to our colleague HENRY REUSS as he winds up 14 terms of outstanding service to the people of the Fifth District of Wisconsin and the Nation.

HENRY has served with great distinction as current chairman of the Joint Economic Committee and in his previous role as chairman of the House Banking Committee.

In his three terms as chairman of the House Banking Committee, HENRY REUSS developed the reputation as the guardian of the common man in his dealings with the banking industry. HENRY's advice to a group of bankers who came to his office one day is still told with relish by those who were lucky enough to be in attendance. "Make a lot of loans, do not charge too much interest and make it up in volume," he told the startled group.

His battles with the Federal Reserve bank have also become legendary. He was among the first to charge the Federal Reserve's monetary policies were responsible for our Nation's high interest rates. How prophetic he was in that assertion.

HENRY REUSS was also a leader in helping secure passage of one of the first revenue sharing bills introduced in Congress during the recession of the early 1970's.

His record has been one of hard work and dedication to the interests of the American people. His guidance will be sorely missed. It is my hope he will make himself available to us as we seek answers to the Nation's continuing economic crisis.●

● Mr. GUARINI. Mr. Speaker, I rise to join my colleagues in praise of our friend from Wisconsin, HENRY REUSS, a splendid gentleman who, over the years, has become a national statesman in his role as a leading voice in national economic policy. As chairman of the Joint Economic Committee and as the former chairman of the House Banking, Finance, and Urban Affairs Committee, HENRY REUSS has been in the forefront of our struggle to bring stronger economic health to our Nation.

Chairman REUSS' benchmark is legislation which proposes solutions to problems fairly and equitably. His has been a voice of reason in these difficult economic times. I have had the pleasure of working closely with Chairman REUSS on one piece of legislation particularly concerned with fairness: a bill to limit the 1983 tax cut to a ceiling of $700. This measure would direct the tax cut to middle-class Americans, who are most in need of tax relief, and who are the consumers most likely to pull us out of this lengthy recession.

In closing, let me say that I have always admired HENRY REUSS for his wisdom and efficacy. I shall always remember him as a practical person looking for fair solutions that work. I know we all wish Chairman REUSS the best of luck in his new endeavors.

I salute him as an effective and outstanding public servant and truly a great American.●

● Mr. RODINO. Mr. Speaker, I want to join my colleagues in paying tribute to a good friend and an invaluable Member of this House who is retiring at the end of this term. Congressman HENRY REUSS, the highly respected chairman of the Joint Economic Committee, is a man of creative ideas and effective action who has been a leader in Congress for over a quarter of a century fighting for the needs of our cities and for the needs of all our citizens.

As a man who has always backed up his ideas with learned study and sharp analysis, HENRY REUSS has led the initiatives for the Peace Corps, the first tough antipollution laws, and major jobs, housing and urban assistance programs. Whenever our country has been faced with economic problems over the last three decades, we have routinely turned to the gentleman from Wisconsin to provide the intellectual underpinnings for our Government's policies to solve problems.

He is a friend and wise counselor to me, and I will miss his enthusiasm, vitality and wit in the House. The people of Wisconsin will surely miss his dedicated service.

I am proud to have served with this man of integrity, compassion and commitment, and I wish him all the best as he leaves the House.●

● Mr. SCHEUER. Mr. Speaker, it is with a profound sense of regret that we acknowledge the retirement of our truly outstanding colleague from the Fifth District of Wisconsin, HENRY S. REUSS. Although wishing his decision to retire might have been otherwise, I am pleased to have this opportunity to offer a few words in appreciation for his 28 years as a Member of this body.

First elected to Congress in 1954, HENRY has distinguished himself as a dedicated representative of his Milwaukee constituency and as a highly competent and skilled legislator. He is generally recognized as one of the most intellectually gifted Members of the House, certainly its most professional economist.

Over the years, HENRY REUSS has established a well-deserved reputation as a leading congressional authority in the area of international finance. As a member, and later chairman, of the House Banking Committee and as chairman of the Joint Economic Committee, HENRY has demonstrated time and again an incisive grasp of economics—national as well as international—that is second to no one. His expertise in economic affairs has earned him the respect and admiration of Members on both sides of the aisle.

As chairman of the Banking Committee, his leadership was pivotal in the passage of loan guarantees that kept New York City from going under in 1975, an accomplishment for which the entire New York delegation will ever be grateful.

HENRY REUSS has always been a thoughtful and articulate spokesman for the Democratic Party on a wide variety of issues, and has been a warm personal friend of many amongst us. He will be sorely missed.●

● Mr. FASCELL. Mr. Speaker, it is a pleasure to join in tribute to our colleague, HENRY REUSS. The list of his accomplishments during his 28 years of service in the House speaks clearly of a man whose perception of the needs of our country is acute and whose dedication to meeting those needs and solving difficult problems is unequaled. He is a man of vision, great intellect, courage, creativity, and tenacity. In a sense, too, it would not be inaccurate to label HENRY a maverick—a bright, well informed, demanding conscience of this legislative body urging his colleagues to take an unorthodox step in an important fight.

Among the legislative accomplishments which have given HENRY the greatest satisfaction, he cites the establishment of the Peace Corps, the creation of the Ice Age Scientific Reserve and Trail, and what he calls statutory archeology. Many of us recall the unearthing of a 1865 statute regarding an equal right to housing which he used to pursue open-housing legislation in the 1960's, and the 1899 Refuse Act which he used with great effectiveness in his fight against water pollution.

HENRY is probably best known for his leadership in the economic field. He served, of course, as chairman of the Banking and Currency Committee—and played a key role in House reform when he challenged the seniority system and unseated that committee's chairman—and as chairman of the Joint Economic Committee, where he has gained a national reputation for his mastery of complex financial matters. But it is his service on the House Government Operations Committee where I have had the opportu-

nity to observe and work with HENRY most closely. It was in Government Operations that HENRY waged war against water pollution with the aid of the 1899 Refuse Act and the Corps of Engineers and where he won on so many occasions. I have the greatest admiration for his conservation efforts and, again, his recognition of the vital importance of an issue before it became a popular cause.

The House of Representatives and the Fifth Congressional District of Wisconsin are losing a man of great intelligence and ability, of ingenuity and drive. Our only consolation is the certainty that HENRY REUSS will continue to work in the same manner for Wisconsin and the Nation in his new role, whatever and wherever that is. Let me thank HENRY for the privilege of knowing and working with him, and wish him the very best.

Mr. Speaker, I include an article from today's New York Times entitled "Representative REUSS: Looking Back on 28 Years in the House" in the RECORD.

[From the New York Times, Dec. 7, 1982]

REPRESENTATIVE REUSS: LOOKING BACK ON 28 YEARS IN THE HOUSE

(By Martin Tolchin)

WASHINGTON, December 6.—When Representative Henry S. Reuss was selected recently by the Democratic leadership to respond to one of President Reagan's Saturday afternoon radio talks, a leadership aide offered him a script. Mr. Reuss scanned it and replied, "I think I'll go with what I've got."

"He didn't care what the President said," the aide recalled, "and he didn't care what we said."

The 70-year-old Congressman, a liberal Democrat from Milwaukee, has been doing things his way since he arrived on Capitol Hill in 1954, and that has usually been good enough for the House Democratic leadership.

It turned to him this fall when it wanted to publicize the plight of the economy, and the hearings Mr. Reuss has under way in the Joint Economic Committee have helped lay the groundwork for the pending highways-jobs bills. While Mr. Reuss favors such a proposal, he opposes a increase in the gasoline tax to finance it, and would prefer to put a ceiling on the third year of Mr. Reagan's tax cut.

The hearings constitute a swan song for Mr. Reuss who is retiring this month after 28 years in the House, including six years as chairman of the Banking Committee.

STRAIGHT AS AN ARROW

During his stay in Washington, Mr. Reuss has earned a reputation as an intellectual who is "straight as an arrow" but decidedly not a backslapper, as a colleague, Representative Benjamin S. Rosenthal, Democrat of Queens, put it.

About his crusade for public works legislation, Mr. Reuss said:

"I think the voters delivered a message on Nov. 2. They thought Reaganomics was deficient in both common sense and fairness. Ronald Reagan has given supply-side economics a bad name. Instead of concentrating on how our economy can become more efficient and productive, he concentrated on lining the pockets of military contractors and the very wealthy who are the principal beneficiaries of his tax cut."

Mr. Reuss said he was retiring because "I figured a fellow ought to do something new." Having undergone heart bypass surgery in 1980, he plans to devote himself to practicing law, teaching, writing and "enjoying life."

Looking back over his years in Washington, he says that Congress has changed considerably, not always for the better. "The quality of the average member today," he said, "is the finest in history, in terms of general education and outlook on public life. But the institution has moved backward, and is less effective today than 28 years ago."

The reasons, he said, are the "evolution of the electronic Congressman" who lives by the television set and computer, the accompanying decline of the parties, "especially mine," and "unbridled" campaign expenditures. "Congress is less collegial," he said, "because there's more egotism and less team spirit."

Mr. Reuss was a 63-year-old "young Turk" when he gained the chairmanship of the Banking Committee in 1975, ousting Representative Wright Patman, an octogenarian, and jumping over two colleagues. It was a year of revolt against aging chairmen; Democrats also toppled the chairmen of the Armed Services and Agriculture Committees.

"In 1975, I'd been here 20 years, and I was still in the four place on the Banking Committee," he recalled. "I knew if I just waited around, by the time I got to be chairman, if ever, I would have developed watermelon seeds between the ears."

As committee chairman, he helped push through the New York City Loan guarantee bill, as well as one for the Chrysler Corporation. He said he doubted whether the New York City bill would ever come to pass, because the city, state, banks and unions appeared reluctant to make the sacrifices he felt were needed.

But he has no afterthoughts about helping New York: "We couldn't let New York City go down the drain." He added, however, that "to this day I'm not sure we did the right thing with Chrysler."

PEACE CORPS INSPIRATION

He considers his proudest achievement to be the long crusade that resulted in the "Financial Deregulation and Monetary Control Act of 1980," which gave greater flexibility to financial institutions. "We had set up such a crazy system of highly specialized institutions that our financial system was showing signs of rigor mortis," he said, "We moved to break down some of those barriers between institutions, and let the savings and loan associations make a wider variety of loans, and allow banks to do some of the things hitherto reserved to investment bankers."

Mr. Reuss was also the author of legislation that established the Peace Corps, having been inspired by a visit to Cambodia. "The specific vision," he said, "was the contrast between the super highway between Pnom Penh and the sea, and four young Americans crashing through the jungle to build a school. I've observed that in the last gasp of a civilization, they build great highways from the center to the sea, and then the barbarians come in the other way, and wipe out the civilization."

Mr. Reuss has also exulted in what he calls "feats of statutory archaeology, looking at old lawbooks and finding something nobody knew existed and resurrecting it." In the days before the Clean Water Act, he said, he discovered "The Refuse Act of 1899," which provided penalties for water pollution. Similarly, he discovered a Reconstruction statute that banned housing discrimination on the basis of race, color or creed.

What would he do if he could live his career over again?

"I'd be a bit more angelic to my staff and slap some backs," he said. "It's a marvelous job. Where else do you have a daily opportunity to do good, and get paid for it?"●

● Mr. BONIOR of Michigan. Mr. Speaker, I thank our colleague from Wisconsin, Chairman ZABLOCKI, for putting aside this time to pay tribute to Chairman HENRY REUSS.

The House is a place that often sets obstacles to original and careful thinking. If these barriers have been hurdled in the last few decades, that feat, in no small part, can be credited to Chairman REUSS.

The Peace Corps, the Ice Age Trail—someday I hope to hike a section or two—"statutory archeology," keeping the term current is alone an accomplishment—these are certainly the varied accomplishments of a thoughtful career.

But the final measure of this institution is its success in overseeing and encouraging our Nation's sprawling economy. It is our most demanding job. As chairman of first the Banking Committee, and then the Joint Economic Committee, HENRY REUSS has done that job well.

He was right about the regressive impact of last year's tax cut. He was right about the deficit it would generate. He offered us a real alternative. He has been right about interest rates. Most recently, he has been woefully right about the wisdom of the proposed gas tax.

In the House, Chairman REUSS has been an original. More than that, he has been a thoughtful original. In the Joint Economic Committee, he found one of those places in this institution conducive to thought.

We shall surely miss him.●

● Mr. MINISH. Mr. Speaker, I am pleased to join in this special order to honor our esteemed colleague, HENRY REUSS, on his retirement from these Chambers.

I had the privilege of serving with HENRY, when he chaired the Banking Committee. Getting to know him personally, I have the highest regard for his abilities and sensitivity as a man. Under Chairman REUSS' effective leadership, the Banking Committee developed significant legislation which will help to shape banking policy for many years to come.

Chairman REUSS's skill, expertise, and personality are a great asset to the House and I know we will surely miss him, but not forget his work. Outstanding legislators, such as

HENRY, leave lasting impressions on these Chambers.

My most sincere good wishes for happiness to you and your family, HENRY. God bless.●

● Mr. ANNUNZIO. Mr. Speaker, it is a genuine pleasure for me to join with the chairman of the House Foreign Affairs Committee, the Honorable CLEMENT J. ZABLOCKI, in paying tribute to our distinguished colleague, the Honorable HENRY S. REUSS, who is retiring from the House of Representatives after 28 years of outstanding service.

I have enjoyed working with HENRY on the House Banking, Finance and Urban Affairs Committee, and his influence upon my own career in Congress goes back to when I first came to the House of Representatives. His advice, his expertise, and his counsel have been invaluable to me, and he will be missed by all of us who have come to know him as one of the most skillful and respected legislators in the Congress.

Congressman HENRY REUSS has devoted his life to public service, and his record is most commendable. He served as assistant corporation counsel of Milwaukee County from 1939 to 1940, and as Assistant General Counsel of the Office of Price Administration from 1941 to 1942. HENRY is a decorated and honored World War II veteran, having received the Bronze Star Medal and several Bronze Battle Stars. In 1949, he was Deputy General Counsel of the Marshall plan in Paris, France. He also has authored several books, has taught in college, and has served as a member of the Milwaukee School Board.

First elected to Congress in 1954, Congressman REUSS has ably represented the Fifth District of Wisconsin for almost three decades, providing exemplary service to his constituents and to our Nation. HENRY has a record of distinguished service as the former chairman of the House Banking, Finance and Urban Affairs Committee, and as chairman of the Joint Economic Committee. His dedication, his integrity, his knowledge, and his accomplishments in the House of Representatives are an inspiration to his friends and fellow citizens.

I extend to my respected colleague, HENRY REUSS, my regards and best wishes for his continued success in future endeavors, as well as a healthy and happy retirement.●

● Mr. FUQUA. Mr. Speaker, it is difficult to find appropriate words to honor a man like HENRY REUSS whose career in so many fields has been marked with honors.

His distinguished elective career dating back to service on the Milwaukee School Board from 1953 to 1955, has been crowned with his service in this House since 1955 and his able chairmanship of the Committee on Banking, Finance and Urban Affairs.

In his role as chairman of the Banking, Finance and Urban Affairs Committee, HENRY REUSS has worked diligently and effectively to assure the viability of our banking and economic systems and to bring our cities back to their past glories.

During 28 years of service in the House of Representatives, HENRY REUSS has regularly demonstrated a commitment to the institution, the Nation, and his constituents which all can admire.

During World War II, HENRY REUSS was awarded the Bronze Star and two bronze battle stars in recognition of his courageous service.

Though we in the House of Representatives have no similar decorations to award our colleagues, HENRY REUSS would certainly be among the first so recognized if such honors were bestowed.●

● Mr. SENSENBRENNER. Mr. Speaker, at the end of this Congress our colleague, Representative HENRY REUSS, chairman of the Joint Economic Committee and former chairman of the House Banking, Finance and Urban Affairs Committee, will be retiring. I would like to join with my colleagues in recognizing the years of impeccable service HENRY REUSS has given this Congress in representing the Fifth District of Wisconsin.

The dedication and expertise with which HENRY REUSS served is exemplified through the 14 consecutive elections he has won, many without a serious challenge, since first taking office in 1954.

During the course of his tenure in Congress, HENRY REUSS has been the consumate entrepreneur. As head of the Government Operations Subcommittee on Conservation and Natural Resources, he brought to life the little known 1899 Refuse Act, which directly prohibits the dumping of effluents into interstate waterways. This law was subsequently used as a net to catch industrial polluters.

This entrepreneurship and a keen intellect earned HENRY REUSS an early chairmanship of the House Banking Committee. In the field of international finance, he is a widely recognized congressional expert on such matters as the gold market, the flux of various foreign currencies, and the development of the Eurodollar.

His persistent drive in addressing issues, combined with an astute analysis and foresight have made the current chairman of the Joint Economic Committee an invaluable asset to Congress for more than a quarter of a century. I join with my fellow colleagues in honoring the distinguished service of HENRY REUSS.●

● Mr. ROYBAL. Mr. Speaker, the adjournment of the 97th Congress will mark the end of the congressional service of one of our most respected colleagues. HENRY S. REUSS has served with distinction in the House for 28 years and both we, his colleagues, and his constituents will miss him a great deal.

HENRY is a senior Member of Congress of stature and accomplishment. He was instrumental in establishing the successful and much needed Peace Corps. He has also been a key member of the Committee on Banking, Finance and Urban Affairs as well as an effective chairman of the Joint Economic Committee. His dedication to the public interest and his tireless work on behalf of his constituents in Wisconsin make him an asset which the Congress will sorely miss.

I want to extend to my friend my hearty best wishes on his retirement.●

● Mr. BINGHAM. Mr. Speaker, I appreciate the opportunity of joining in paying tribute to our distinguished and esteemed colleague, HENRY REUSS, as his long service in this House draws to a close.

I first knew HENRY some 40 years ago when we both served as lawyers in the Office of Price Administration. He was then, as he always has been, energetic, capable, and full of ideas.

It was my good fortune to serve with HENRY for one term on the Banking Committee and we have worked together on a number of projects, especially in the Democratic study group.

HENRY has surely been one of the shining lights of the House during his long period of service.

His many legislative achievements are well known and need not be detailed by me. I want to mention only one, for which I as a New Yorker was especially grateful: his shepherding to passage of the legislation that helped New York City survive its financial crisis.

History should record that HENRY played a crucial role in the historic events of 1975 when the rigid and harmful system of selecting committee chairs on the basis of seniority alone was modified: HENRY had the courage to wage an active campaign for the chairmanship of the Banking Committee, even though he was fourth from the top in terms of seniority. The steering and policy committee, which had the new responsibility of recommending committee chairs to the caucus, responded to the challenge, recognizing HENRY's unusual qualifications for the post, and the battle was won.

HENRY has always been wonderful to work with, especially in the development of Democratic policy. His fund of ideas was bottomless, but he was always ready to mesh his ideas with those of others and to share the credit.

My wife, June, and I wish for HENRY and Margie many years of happiness and productive life.●

● Mr. CARMAN. Mr. Speaker, I rise today to congratulate HENRY REUSS on his years of service to the people of Wisconsin and the country. He has served with distinction not only for the past 28 years in Congress, but also during World War II. His receiving the Bronze Metal attests to the distinguished manner in which he performed his military service.

In Congress, his chairmanship of the House Committee on Banking, Finance and Urban Affairs and his present position as chairman of the Joint Economic Committee testify to his leadership. I wish him all the best in the future.●

● Mr. CORRADA. Mr. Speaker, I join with the many Members today in this tribute to the distinguished career of our colleague Congressman HENRY REUSS of Wisconsin.

Throughout his entire congressional career, with considerable skill and intellectual acumen, Congressman REUSS has consistently been in the forefront of the many issues and has carried his expertise to the sometimes arid world of international finance and monetary policy.

Presently the chairman of the Joint Committee, it perhaps is characteristic of his career that just recently, assigned to come up with an economic stimulus program for the House Democratic leadership, HENRY REUSS was once again in the national spotlight, pointing out some time-tested and some economically viable ways out of the present recession, and some alternative policies that the country and Congress would be wise to consider in our present economic downturn.

Such prescience, I note, has always marked his congressional career whether the issue was an international volunteer corps for the United States, now known as the Peace Corps, or environmental issues, or any other issue with which the Congress has had to grapple.

The citizens of his own city of Milwaukee, his State of Wisconsin and, most important, our Nation have always had the benefit of his thinking, his legislative mastery, his talent for hard work but, always, commonsense in thinking our way through complicated problems.

I share the hopes of all the Members here today that we bid a fond farewell to a Congressman who has been a chairman of a key committee, the House Banking, Finance and Urban Affairs Committee, before taking up his present influential position.

As he retires, I can only wish that our country continues to receive the benefits of his accumulated wisdom and intellectual diligence.

To his wife and family, too, we hope they have many pleasant hours with his companionship as he leaves the House of Representatives where he has faithfully served since 1954.●

● Mr. RHODES. Mr. Speaker, I am pleased to join in the special order paying tribute to HENRY REUSS, a very able, well-informed, and hardworking Member.

As is well known, HENRY has distinguished himself in the House as an expert on international finance, and as an initiator of creative legislative ideas. With foresight, he was an early proponent of allowing the dollar to float away from the price of gold; he realized the merits of revenue sharing; and envisioned a plan similar to the Peace Corps years before it became a reality.

HENRY REUSS has been dedicated to the idea of an efficient and responsive Government, prompting him to suggest several novel solutions to problems on the Federal level. The breadth and depth of HENRY'S commitment to his constituents, and to the Nation, is amply reflected in the impressive record he has produced during his term in office.

It was a genuine pleasure to have had the opportunity to work with HENRY REUSS in the House for the past 28 years. Betty joins me in wishing him and his wife, Margie, well in the future.●

● Mr. STANTON of Ohio. Mr. Speaker, I want to enthusiastically join my colleagues in paying tribute to my good friend from Wisconsin, HENRY REUSS. As ranking minority member on the House Banking, Finance and Urban Affairs Committee, I quite predictably had philosophical differences with my chairman, HENRY REUSS, from time to time. However, he was always a most worthy adversary, impeccably honest and fair, who shared my commitment to the health of our Nation's and the free world's economy.

HENRY REUSS not only is one of the few great intellectuals in Congress but also is one of a handful of Members of this body with a full understanding of the complex issues of our international financial system. Over the years, he has been instrumental in guiding the necessary authorizing legislation through Congress affecting the World Bank, the International Monetary Fund, and the various regional multilateral development banks. His concern for the well-being of people everywhere dates back to his service in the General Counsel's Office of the Marshall plan to reconstruct Europe in the late 1940's.

I was privileged to work with HENRY on the Depository Institutions Deregulation and Monetary Control Act of 1980, the most significant piece of banking legislation since the sweeping overhaul of our Nation's financial institutions in the 1930's. Among other things, this act gave the Federal Reserve the necessary powers to more effectively conduct monetary policy. Moreover, for the first time in recent memory, it allowed depository institutions to pay consumers a market rate of interest on insured deposits gradually over a 6-year period.

At the outset of the 97th Congress HENRY REUSS relinquished his chairmanship of the Banking Committee to become chairman of the Joint Economic Committee, where he continues to play a very strong role. In 1975 Chairman REUSS was instrumental in creating the formal and constructive dialog which now occurs between the Congress and the Federal Reserve. Just a few weeks ago, Federal Reserve Chairman Paul Volcker appeared before Chairman REUSS to testify on the latest developments in the Federal Reserve's monetary policy. As a result of that hearing, it is noteworthy to point out the Federal Reserve agreed to explore all aspects of a five-point proposal which Chairman REUSS advanced recently. This is testimony to HENRY'S constant devotion to promoting the dialog about the role of monetary policy in our Nation's economy.

I am pleased that in the final analysis, HENRY and I see eye to eye, for we have both decided that the time has come for us to retire from Congress.

In addition to his many significant legislative achievements, HENRY REUSS leaves a reputation for rising above partisanship in his dedication to the best interests of our Nation. This is in the finest tradition of this body and the legislative process, and I am proud and privileged to have served with him.●

● Mr. STARK. Mr. Speaker, a critic once said of a mediocre Lear, "He played the King as though under momentary apprehension that someone else was about to play the ace."

Our retiring colleague, the gentleman from Wisconsin (Mr. REUSS), has never given anyone grounds for such a sardonic review of any role he has played during his political career. From his losing effort in 1952 to replace Joe McCarthy, to his long and successful career in the House, including top billing as chairman of the House Banking, Finance and Urban Affairs Committee and the Joint Economic Committee, HENRY REUSS has always played to rave reviews.

Because HENRY has had such a successful career, I flatter myself by looking for parallels between our respective experiences. We were both born in Milwaukee, got our undergraduate educations in the East, served in the military and were involved in banking before being elected to Congress. I served with HENRY on the Banking Committee when I first came to Congress in 1973. Now, all I have to do is gain reelection eight more times, become a chairman and match all of HENRY'S other accomplishments. He

has set a high standard for all of us to measure-up to and he will leave a big gap in our ranks.

No one has ever been able to accuse HENRY REUSS of a bad performance. He has been a respected leader in this House for almost 30 years and continues to lead today. I am honored to have served with him and look forward to his wise counsel in the years ahead. And, he certainly is qualified for higher office.●

● Mr. ROSENTHAL. Mr. Speaker, I would like to add my voice to the many being heard today in tribute to a man who has served this Congress and the American people for almost three decades.

HENRY S. REUSS of Wisconsin's Fifth District is retiring in a few weeks and the traits which have made him a desired ally and a troublesome opponent—his hard-driving style, his genius for international finance, his devotion to a carefully defined cause—will be missed.

He has carved out his place in history through his positions as chairman of the House Banking, Finance and Urban Affairs Committee from 1975-81, and as chairman during this last Congress of the Joint Economic Committee. He has thrown himself into such special projects as the establishment of the Peace Corps. As he has delved into matters of international finance, he has never forgotten the needs of his constituents in Milwaukee and has put their priorities above all else.

HENRY's physical presence will certainly be missed in these halls but his voice will undoubtedly still be heard.●

● Mr. OTTINGER. Mr. Speaker, I rise in warmest praise of our colleague from Wisconsin, HENRY REUSS, and his tremendous contributions to this House and our country.

HENRY has been a good friend and adviser to me, since I was first elected in 1964, as he has been to so many Members. His has always been a voice of reason, progressiveness, and caring.

HENRY's specialty has been economics, and as such he has dealt with issues that have always been at the center of our national agenda. As chairman of the Banking and Currency Committee, he has formulated responsible urban development initiatives and championed consumer concerns in banking matters. As chairman of the Joint Economic Committee he has led the fight against Reaganomics and has been at the national forefront in exposing its inadequacies.

HENRY leaves behind him a fine history of legislative accomplishments which include laying the groundwork for creation of both the Peace Corps and the Ice Age Scientific Reserve and Trail. He will also be remembered for helping establish open-housing legislation in the 1960's.

Even after 28 years of service, HENRY has remained a "young turk," innovative and challenging unsatisfactory status quos. Most members disappear from the picture after they announce their retirement, but HENRY has doubled his activities and grown in stature as a Democratic spokesman. His national response to President Reagan's media defense of his economic program was one of the most brilliant and effective of any Democratic effort.

HENRY will be sorely missed by his colleagues. We wish him well in what will surely be an active retirement, continuing as spokesman for the most decent and constructive interests of this country.●

● Mr. D'AMOURS. Mr. Speaker, it is with deep gratitude and appreciation that I join with my colleagues in paying tribute to one of the most respected and well-versed Members of Congress, HENRY REUSS. HENRY's departure will leave us with a challenge in trying to fill the void he will leave behind. I have been honored to serve on the Banking Committee with HENRY and have come to know and appreciate him both as an effective spokesman for his constituents in Milwaukee and as a national leader in the fields of economic reform, urban policy, and international finance.

He has served in this body for almost 30 years and his influence upon us all will be here for many more years. His scholarly approach to legislation, his ability to understand the "whole" and not just the "parts," and his selfless devotion to the ideals of the democratic process have been left to us, and to those who come after us, as a legacy to be treasured and valued.

The magnitude of his willingness to work on behalf of us all, his ability to see directly to the heart of an issue, and his sincerity in trying to resolve a problem without alienating anyone are all traits that we will miss in this body. I can only hope that we will be able to carry on the tradition that HENRY has left with us so that the good of the people will continue to remain a priority.

The years that I have spent on the Banking Committee with HENRY have been extremely educational years and ones which, I'm sure, will continue to serve me in good stead. I would like to take this opportunity to wish HENRY the best of luck in his many future endeavors.●

LEST WE FORGET

The SPEAKER pro tempore (Mr. AKAKA). Under a previous order of the House the gentleman from California (Mr. DORNAN) is recognized for 60 minutes.

GENERAL LEAVE

Mr. DORNAN of California. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the subject of my special order today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. DORNAN of California. Mr. Speaker, twice in the well of this august body today I mentioned that today is the 41st anniversary of Pearl Harbor, one of the most horrible periods in the 2-century and 6-year history of our Nation, when our country was caught completely unprepared both at our major naval and air and Army facilities in the Hawaiian Islands, and also in the Philippine Islands, which were then an American colony. It led to the capitulation of thousands of troops, both American and our brave Philippine allies on the Bataan Peninsula on April 9, 1942, and then on the island of Corregidor less than 4 weeks later on May 6.

The suffering that those thousands of Americans went through really defies description. Only those who truly lived through it and felt the intense pain can conjure up those memories. NBC television presented a superb documentary on this just within the last 48 hours, and to see men in their 60's recalling events 41 years ago, brought instantly to tears over and over again, just gave a slight indication of the depth of that pain and agony.

This Nation at the end of World War II—and I was 8 years of age; it was my exact eighth birthday, April 3, when the Japanese began their major offensive against our defenders on Bataan—I remember those days vividly, and lived through very impressionable years, 8 to 12 years of age, when the war ended, that enfolded in me the terrible firestorms of Dresden and Hamburg, Nagasaki and Hiroshima at the end of the war, but divulged stories to mankind that we thought we had left behind in the Dark Ages—the living skeletons, many of whom still died, freed in Auschwitz, Buchenwald, Belsen, and the death camps in Poland, some of which had been ground into the dirt where there was not a square inch where one could not pick up the bones of and the remains of millions of people who had been killed. The world resolved that never again would we tolerate in this modern world torture, abuse of prisoners, abuse of the Geneva Convention that tried to bring some sanity to the insanity of war, and yet within a few years American boys were being captured in Korea. Three hundred and ninety are known to be alive and as healthy as can be in a POW stockade, never to be heard of again; men shot down all over the world by Soviet fighters, literally hundreds of them

killed in between Vietnam and the Korean war that almost were forgotten by our American people. Then, that long decade, long tragedy of Vietnam, where again served American fighting men, this time most of them officers able to survive in the north, but the enlisted young men caught in the south, a 90-percent fatality rate, torture as bad as that inflicted by Nazi Germany, although in much less numbers; as bad as that inflicted by the sadistic Japanese against British, Australian, and New Zealand troops in Burma and our troops in Southeast Asia; and those torture-ridden survivors from Bataan and Corregidor.

All of these nightmare stories came out again on the evening of March 28, 1973, when the last airplane landed bringing our men home, when we approached that 10th anniversary. But, did it bring all of our men home? No, because every single high-ranking intelligence source that I respect in the United States, the military structure and in the CIA, formed to assist our President, in every administration of either party, has conceded to me that the evidence is overwhelming that we will be again, as we did in Korea, leaving behind men at the end of the Vietnam crisis.

I would like to address myself to that problem now in my last days as a Member of this great Congress of the United States, and touch on some of the things that I tried to accomplish in 17 years of activity on this issue.

I would like to pay respect to my closest associate, who put in years of hard work on this issue, 4 years before I came to Congress, my good and dear friend, BENJAMIN GILMAN, of New York. Since he is coming back to the 98th Congress, I hope that the Democratic majority, particularly a man of different political persuasion whom I admire as a person, the chairman of my Pacific and Asian Affairs Committee, STEPHEN SOLARZ, will see fit not only to continue the task force efforts of our House Task Force on Missing and Prisoners in Southeast Asia, but will see fit to heed whatever advice I can give him from my almost two decades of experience on this issue, to let Mr. BENJAMIN GILMAN, of New York, take over the reins as chairman of this task force that Mr. SOLARZ has so graciously given to me—a heavy responsibility, even though I am of a different party, and even of a different political ideology generally.

I would like to yield to my good friend, Mr. BENJAMIN GILMAN, as we go over most of our frustrations and the first little lights that we were able to set fire to on this issue.

Mr. GILMAN. Mr. Speaker, I thank the gentleman for yielding to me.

Mr. Speaker, I want to take this opportunity to thank the gentleman from California (Mr. DORNAN) for taking the time for this special order on this special day, Pearl Harbor Day, in order to keep the Congress apprised of the progress in accounting for our MIA-POW's and report what still has to be done for the 2,500 Americans who are still missing in action or prisoner of war in Southeast Asia.

On this occasion, I also want to commend the gentleman from California (Mr. DORNAN) for his outstanding work over the past 2 years as the chairman of the House Task Force on Missing Persons in Southeast Asia and his untiring efforts for our MIA's during his past 6 years in the Congress. His retirement from the Congress will leave a big void. We will truly miss BOB DORNAN's work in this and other important issues.

Our missing in action in Vietnam, in Laos and Cambodia is one of those issues which defies the traditional approaches the Congress has made in other matters. Despite the work of our former Select Committee on MIA's, despite the number of congressional hearings that we have held on the MIA problem, no matter how many meetings we initiated, and how many gatherings of the families of our missing in action, the bulk of our work must inevitably come from the Vietnamese, Laotian, and Cambodian Governments, and that places us in an extremely difficult position. It is very difficult and painful to continually report to the families of the 2,500 missing in action that there is no new information, no good news, and no bad news. In the 10 years I have been in the Congress, I have worked on no issue more difficult to resolve than our MIA-POW issue.

From the families' point of view, and from the point of view of many of us in the Congress, we are fighting a two-headed enemy—the governments of Southeast Asia and, in too many instances, our own Government. During the early days of the MIA struggle—over 10 years ago—the families' distrust of the Government was deep-seated and strong. Many MIA families believed, and some still do, that our Nation knew that live men were left in Vietnam and that we failed to rescue them at the cessation of hostilities. The complex fabric of public reaction to the Vietnam war also colored the attitudes of Government officials who, after the war, refused to consider this issue in a direct manner. There was a pattern of denial and evasion which still results in bitter feelings on the part of some family members.

But it is not my intention in this special order to underscore those bitter feelings. Indeed, in the last 3 years, there has been a distinct change in the attitude of our Government toward this issue. Many factors have contributed to that change—a more open feeling about the war in Vietnam, the active involvement of our Vietnam veteran, in this issue, and the passage of time.

The families of our missing have weathered some difficult times over the past decade, and the admiration and cooperation of our Government are just rewards for their patience and perseverance. While the administration has been cooperating with the Congress and other interested parties in seeking the truth on the MIA issue, I am not fully satisfied that we are doing enough. Many of us will never be satisfied that we have done enough. There are times that the doubts about our progress linger, and I am concerned that during this passage of time we may have abandoned some opportunities which could have borne fruit. We often wonder if there are any live Americans still being held as POW's, how they may have fared while negotiations and debates continue in our own country.

It is appropriate at these concluding days of the 97th Congress that we examine just where we have been and where are we going with regard to this issue.

We have been to the point of no return, as far as I am concerned. We have invested too much both as a nation and as a humanitarian people to turn back now. In the past 10 years, the Vietnamese have returned only 77 sets of remains to our Nation. The Laotians have officially returned no servicemen, although Lao resistance forces have cooperated in securing the remains of Comdr. Nick Brooks, lost in action in January 1970. For a 10-year period, in which there have been numerous overtures by the United States, many offers of assistance, diplomatic and congressional missions and family visits, this record is wholly inadequate. We heard testimony from a Vietnamese-Chinese mortician in June 1980, whose testimony has been deemed credible by our intelligence agencies. That Vietnamese mortician said on several occasions—passing a polygraph test administered by our Government—that he personally prepared the remains of 400 American servicemen during the Vietnam war, and that the Vietnamese Government was storing these remains to use as bargaining chips at a later date.

When we visited Hanoi we asked to inspect the site where these remains were reportedly being held. The Vietnamese, who appeared to be caught off guard, denied us access to the warehouse, stating we would not have time to travel to that building. However, on the way to the airport, a member of our congressional delegation took a photo of the building, which was in reality only a few blocks from where our meeting took place.

This is an example of the kind of duplicity that the Vietnamese have practiced in avoiding the real issue. When

we confront Vietnam officials with our requests for information, the discussion is usually shifted—"that the United States is slandering the Vietnamese on the yellow rain issue; that the United States is in a league with the Chinese against the Vietnamese; that the United States owes billions of dollars in reparations to the Vietnamese." With this reasoning and dialog it is no wonder that the resolution of the MIA issue has taken over a decade.

On a recent visit to Vietnam and Laos, four family members with relatives missing in action met with government officials and scored some important gains in this difficult battle of will. The families, including George Brooks of Newburgh, traveled to Vientiane, Laos, and to Hanoi in Vietnam. They met with officials, who assured the Americans that the MIA issue was a high priority. In Laos, the families for the first time were permitted to travel to an actual plane crash site at Pakse and came upon some pieces of an American aircraft. While the Laotians were indeed forthcoming in this regard, I was disturbed to learn that the files we repeatedly turned over to the Laotian Government on certain downed Americans—files prepared by our Government in the Lao language—were missing and had probably never been submitted to the proper Laotian officials.

The Laotians appear to be willing to work with the United States to begin a joint recovery effort to search for remains in the Laotian countryside. While that attitude is encouraging, the Lao Government has not yet established any permanent committee on the MIA's nor have they made any definite strides in getting the recovery missions off the ground.

The Vietnamese, on the other hand, have established a committee to deal with the MIA problem. Their committee even issued a white paper a few years ago denouncing U.S. criticism of the Vietnamese on the MIA matter. We have met with the members of that Vietnamese committee and I have faith that they are well versed in all aspects of the missing-in-action issue. Their meticulous recordkeeping and their very orderly preparation of the personal effects which were returned with sets of remains are indicative that the Vietnamese are highly aware of the impact and importance that the MIA issue has for most Americans. I do not, however, believe that the Vietnamese have disclosed all the facts and information that they know.

So now what? Where do we go from here? What are we to do in the next several months to bring about more activity on the MIA issue? And from there, how do we maintain progress and bring the proper pressure on the Vietnamese, the Laotians, and Cambodians to provide for final accounting of our missing in action?

One of the first things we will have to do in the next few months is to meet with our President to let him know just how critically important this matter is to us. The families have not yet met with President Reagan, and I think that it is extremely important for our Commander in Chief to focus his personal attention on our 2,500 MIA's. The White House has not made the public statements and has not given the highest priority to this issue that is so necessary for a national movement to bring MIA's and POW's home. We will be calling upon President Reagan to meet with us to discuss how we can best proceed toward a resolution of this agonizing issue.

It is also time for us to seriously discuss—on a government-to-government basis—joint recovery efforts. If these nations do not have the equipment and funding necessary for such a mission, we should be able to provide them with the necessary expertise and guidance necessary. We cannot afford to allow such a proposal and these initiatives to die from neglect.

But most important, I urge my colleagues to continue working with our Government agencies, keeping the pressure on them to produce the most responsive and responsible positions on the MIA issue. Now that we are beginning to achieve some progress, now that some of the doors are beginning to open in Southeast Asia, there can be no letting up. Our MIA's deserve no less.

□ 1950

In closing, again I want to commend the outstanding work that has been undertaken by our chairman of the task force, the gentleman from California (Mr. DORNAN), who has devoted so many years to this issue and so much of this time and effort to trying to bring about an accounting. I hope that we are soon going to see that accounting become a reality.

Mr. DORNAN of California. I say to the gentleman from New York (Mr. GILMAN), that he knows I treasure the traditions of the House because it is a governor on us when we get angry to have to refer to a Member with whom we may be disagreeing as the distinguished gentleman from this State or that.

But every now and then the tradition weighs heavy on me when I want to use the full impact of familiarity with a friend so that people watching on television on the Hill or on cable network across this country will know that it is more than just the formal expressions of respect.

So I say, BEN, God bless you for your work. I am sure glad you are coming back. I know you will not forget and that is what I would like to title this whole special order tonight, "Lest We Forget."

I treasure your friendship in the future and particularly over the last 6 years and before that when I joined you here in the Congress, all of the efforts you did so as not to forget friends of mine that were left behind that you could just as easily, and you have shown such devotion to your best friends in the Air Force and other branches of the service. Thanks BEN.

Mr. GILMAN. I thank the gentleman for his kind words and I hope he will continue to give us the benefit of his advice and support in the months and years ahead.

Mr. DORNAN of California. I remember when a great black general, and I say black because we do not have, unfortunately, many big, handsome, black Americans with eight stars on their shoulders, I remember when full Gen. Chappie James retired he said he was going to stay in the Washington, D.C., area because he wanted to be close to the arena where he could hear the roars of the lions and the screams of the martyrs. I will stay in the area of this arena for at least at couple of years, I say to the gentleman from New York (Mr. GILMAN).

Mr. BAILEY of Pennsylvania. Mr. Speaker, will the gentleman yield?

Mr. DORNAN of California. It gives me great pleasure now to yield to a man that I have served here with for several years, that although we have not had a chance to work together that much, it just gave me a kick, frankly, to be in the same House with him because we did not get many Vietnam veterans in this House who were airborne qualified officers, chosen to lead other men in Vietnam, and who understood fully that that war was lost here on Capitol Hill, mainly on the television screens of America, and that there is not anything 99.99 percent of the veterans, the men and women of all of the services who fought in Vietnam ever have to ever be sorry for or apologize.

The 600,000 dead boat people, the 1.5 to 2 million people genocided in Cambodia, the victims today of red rain, yellow rain, blue rain, nerve gases, the concentration camps, four major ones that we have identified still open in Vietnam, the intense suffering of the men who have probably been left behind, I do not care whether it is a handful or 100 or 200, it is unbelievable and a disgrace.

All of the agony that still goes on with the Vietnam Communist occupation of Laos, Cambodia, the refugee camps my daughter spent a year in and that I have traveled over four times to see, all of this agony was exactly what we were trying to prevent, exactly what President Reagan meant when up in Nashua in New Hampshire when in the debate that won him the Presidency he said that Vietnam was a noble cause.

By just sheer, dumb coincidence, since I saw Congressman DON BAILEY play in the Rose Bowl in Pasadena in 1965, I have only been lucky enough to go to four Rose Bowl games. I was sitting in the stands and he was taking it on the chin, grinding leather against leather down in the field. I remember in 1965 starting a brief television show where he debated what was happening in Vietnam and the death figure sticks in my mind of 213 men. In 1964 I wrote a movie script called "The 101st American" when the 101st American died in Vietnam, and I was going to tie it into the 101st Airborne. Years later, over a decade later, I served with a man who went from that football game gridiron, his good education, to officer training, airborne jump school, and finds himself in Vietnam.

I hope some way, somehow, you will come back to this Congress, or the U.S. Senate, or you will stay in the arena area here, DON, and continue to serve our country. We need more and more veterans of the Vietnam war in this House just so desperately, and it is a pleasure to yield to you on this special order about or MIA's.

Mr. BAILEY of Pennsylvania. I thank the gentleman very, very much, particularly for your kind personal words. I want to thank you also in my capacity as a Vietnam veteran, thank yourself and the gentleman from New York (Mr. GILMAN) for keeping a very uncomfortable issue in the national spotlight and before our people.

The last 2 years I have spent very, very quietly interviewing particularly refugees who were boat people, who had spent time in reeducation camps, so-called reeducation camps.

I have also had come into my possession letters from individuals who have been sent to the Soviet Union to work in order to try to compensate for the debt that Vietnam owes to the Soviet Union, an ever-growing debt.

During this process I have become aware of and tried to work with those groups establishing a liaison with resistance groups fighting within Vietnam and within Laos and those that are associated with the new coalition that has been formed there under the leadership of Prince Sihanouk and Mr. Sun San, whom I personally also have personally tried to help.

During the process, of course, of picking up information one of the things I consistently looked for was the evidence of Americans who were seen or whom reference had been made to, either Americans who had been seen or located or were somewhere within the Southeast Asian area. It is very clear that we still have American soldiers who are being held there. The evidence is, as the gentleman mentioned earlier in his special order, overwhelming.

We now have a government which has slowly come to the realization under President Reagan's leadership that indeed that is the case. Very unfortunately, though, and I think it is important to note this, people that view a government, a massive government, a great bureaucracy, have a tendency to think that executive leadership is simply a matter of edict or change and it is not.

There is a great deal of lethargy, and I really do not know the reason for it, within much of our intelligence community and certainly within the State Department that just does not want to, for some reason, acknowledge or accept the responsibility for doing something about this problem.

I may be unfair to them, and if I am I hope that I will someday stand corrected.

But the truth, in fact, is that we have a country that is embarrassed. I very much want to thank you people in particular, Congressman DORNAN and Congressman GILMAN, for what you have done. The real problem with policy in our country is the fact that we just do not want to admit that the United States of America would leave her soldiers behind, and in the rationalizations that many policymakers and antiwar types I suppose would say now incur in order to avoid resolution of some of the realities of what has happened to Southeast Asia, along with that goes the desire not to recognize some Americans that we left behind.

Words are not adequate to express what anybody who sits back and reflects for a moment feels about that. What if it were you or me? What if it were your brother or sister? What if it were your father or other relative? But it is not.

So the Nation just lets those families and relatives of people there just hang in doubt somewhere in between while we do not do anything about it as a country. As a country we are not going to take up arms to solve the problem. Let us be honest about it.

I know many people feel they want to do something about this. I feel, and this is why I really wanted to run over here and commend you two gentlemen, I feel really we have to do something about the grassroots problem with public opinion and getting the truth out in this country. It is the only way to change things.

Right now you have a media that failed to report. I found one report in the United States last week, about one and one-half column inches or so in the Los Angeles Times. There was a revolt in Saigon a week ago, Ho Chi Minh City. Hanoi Radio has spent about, at least from the reports that we have from the wire services, and they are French wire services, amazingly, not American, but the media indicates that Hanoi now has spent a great deal of time trying to explain that situation, and we are going to research it out thoroughly, of course.

□ 2000

But it is amazing that with the millions of American soldiers who were involved in Southeast Asia, with a half a million new citizens, soon to be new citizens, in this country, with the now openly acknowledged presence of American soldiers still being held captive—and I say to the gentleman from New York (Mr. GILMAN), I know the gentleman is aware of this, the gentleman from California (Mr. DORNAN) and I know the gentleman is aware of the fact—that we have knowledge of locations of remains, et cetera, that people have access to, knowledge of, that probably could be returned. And with the resources of the American intelligence community and our State Department, nothing is being done to emphasize or publicize these realities.

It is very difficult to get the American people aroused, I suppose, or concerned when we spend so much media time on Eastern Europe, as perhaps we should, different problems in Latin America, as perhaps we should. But we cannot get just a modicum of news reporting on an area where the United States of America has spent so much blood and so much effort.

The Communist takeover has been a total dismal, absolute failure—a mindless tyranny, devoid of any respect for any individual's rights, who make a practice of manipulating American media, and thereby public opinion, and therefore government policy—because unfortunately I suppose they understand the system even better than many of our own citizens.

I guess the only thing to do is to continue trying to struggle and fight to get the word out. I quite frankly am frustrated and do not believe that it is viable to try to go to Government institutions or to our Government agencies to get these problems solved. I think you just have to work person by person to bring people together who at least care about doing something about our soldiers over there. You get a finger pointed at you, and you get called some kind of rightwing fanatic or nut, unfortunately.

I suppose that serves the interests of those who are looking for an excuse not to do anything. I do not know of anyone who wants to lead expeditionary forces or go to war. As a former soldier I would do anything within reason to avoid an armed conflict. But it is a terribly, terribly unfortunate thing that access to media time in this country is so controlled by what I am sure is not some sort of overt collusion, but certainly there has got to be some preference for attitudes or viewpoints which controls information.

And I think the resultant lack of Government response means that you just have to go to the private sector and you have got to go to individuals who believe the way that we do and

try to do something about helping those people.

At some point our Government is going to be embarrassed. Sooner or later someone is going to come out, sooner or later someone is either going to be released—they just released 30 French prisoners of war, not too many years ago, that had been held since the fifties and late forties. And there are going to be a lot of embarrassed Congressmen and Senators, and I hope not an embarrassed American President, mostly I think an embarrassed people.

As a country I just cannot understand how we as a people can take our soldiers and send them to a place to fight and then somehow, because it creates political difficulties for us to face the music, not at least try to bring those kids home.

Again I thank both of the gentlemen very much for the efforts they have made. Someday they will come to fruition. We will get our people back, and hopefully, and I am sure without violence, but only when our Government really puts the pressure and emphasis on trying to do something, and they have the means at their disposal. They are just not doing it.

I have talked to intelligence analysts who are very much aware of what is going on in Vietnam today. Their feeling is it is OK, just let it perk and cook along. But the last thing in the world we would want to do is ever really stand up for those values in which we believe by assisting in that effort, in whatever subtle ways that we can.

On behalf of my comrades in arms, I would just like to thank both the gentlemen very, very much.

Mr. DORNAN of California. Thank you very much Captain. I thank the Congressman from Pennsylvania (Mr. BAILEY).

Mr Speaker and all interested Americans on this, the 41st anniversary of the bombing of Pearl Harbor, I pause once again to salute, with Mr. GILMAN, the men who fought so bravely, like Mr. BAILEY, to protect the call of freedom. And we pause here again so that we will not forget, although I am afraid that in our haste, as Mr. BAILEY said, to put Vietnam behind us and to create definitely future embarrassments because of trying to sweep away history, that we are forgetting the 2,553 men and their noble families who are unaccounted for, and among them the handful or not such a small handful who may be still fighting in some small individual way, not for the freedom of Southeast Asia, that fight is over for any American prisoners, but fighting for their own personal freedom.

In the 17 years since my best friend in the Air Force, captain, now Lt. Col. David Hrdlicka was shot down over Sam Neua in Laos I have never been able to forget. I still wear a bracelet with David's name on it. I have traveled to Laos four times, South Vietnam eight times, to Hanoi in August of 1979. Mr. GILMAN has been to Hanoi four times, I believe, certainly three. I have heard the cries from pain wracked families, watched the disgraceful end to Saigon as it became Ho Chi Minh City before our eyes, watched the Communist Vietnamese invasion of Cambodia, the fall of Phnom Penh, when with nine other Congressmen we sat helpless across the border in Bangkok, Thailand, having to cancel our trip into Hanoi, which I had waited 10 years to accomplish, listened to the promises of the Hanoi Vietnamese, and seen absolutely no progress, a war between China and Vietnam, and the continued agony in that area that I referred to before.

Mr. Speaker, I took this special order tonight to join with Mr. GILMAN in pointing out that for some of us this will never be over until a full accounting is made—as much as is humanly possible—for hundreds of Americans out of that 2,500 figure. There is certainly no contravening, contradicting or disavowing the fact that 400 boxes of remains, 400 plus, are in some warehouse, somewhere in the Hanoi area, with the bones of our American heroes that we demand to have back for proper funerals in this country, as we have had for a couple of dozen, so that those families are able to rebuild their lives, and we are able to take some small measure of dignity out of that decade of agony in Indochina.

I am pleased and more than a little proud to say that House Joint Resolution 479 to provide for the designation of POW-MIA Recognition Day was signed into law for a July date last year, and for this year and into the future always on August 9, the day that more Americans began their agony of suffering as POW's than ever in history—August 9, 1942, in the Bataan Corregidor nightmare. I have introduced several pieces of legislation here including House Concurrent Resolution 275, which currently has 11 cosponsors, to try and animate this body to send the strongest message possible to the Communist conquerers of Southeast Asia that we are deadly serious, that we will never forget our missing men. I have held task force hearings, read POW and refugee letters into the RECORD, given speeches, stood before you countless times. And yet, as Mr. GILMAN says, not much progress has been made except by that great and noble volunteer organization, the League of Families.

I am not complaining. Obviously I am not campaigning. I am just simply imploring that this body address this issue with the attention it deserves, and to remember the sacrifice that those men who made in Southeast Asia may still at this moment, may be in the progress of being made by a handful of men suffering the most intense pain any American could suffer, as they feel that we wrote them off. There truly is something worse than death.

□ 2010

It is to rot somewhere in some Gulag dungeon in Siberia or in some Communist or dictator cell anywhere in this world and feel that your loved ones and your fellow citizens have forgotten you.

I have four pages of facts here that my staff carefully put together over months of work but because of the late hour I guess it does not make much sense to read carefully and respectfully each little set of facts and suspicions and sets of evidence on the devious way this issue has been handled by the Communists in Hanoi.

I respect—and I use that word with a small "r"—the skill of the current Foreign Minister of the Hanoi government that rules the three nations of Indochina today. I would ask Mr. Thach who has stared me down eyeball to eyeball across his negotiating table in Hanoi, I would ask him if he has any power or clout with Pham Van Dong or any sense of judgment about his country that is on the razor's edge of starvation, that the way to break loose anything in the United States is to execute the greatest search that anybody has ever made for men out in the small villages and to come up with some live Americans, because we know there are some there, particularly in Laos where they have complete hegemony and control, and then to take some bad press. They are so worried about bad press. They do not get much bad press in France when they return bones at the price of somewhere between $8,000 to $50,000. They know they are getting bad press because they are still refusing to give back the bones of the grandson of a former great President and war hero of France, Charles de Gaulle's grandson, who fought and died in Vietnam. Take their bad press. It will only last a few months and then wait and see if this great legislative body, the Congress of the United States, does not respond to them returning all the remains home, that we will not let even Communists or people under a Communist system of government starve.

When there is an earthquake in China or Yugoslavia or some natural tragedy of nature in the Soviet Union, the United States is the first Nation to respond with help.

The tragedy with the great Chinese earthquake a few years ago when the Gang of Four was still in power, that based on pride they let tens of thousands of their people die without American aid that could come from this wealthy country, rather than let

that aid come into a country that is also barely able to feed itself.

Foreign Minister Thach, I know you will read these words. I know your delegation to the United Nations in New York goes over every single thing we do in this Congress with a fine-tooth comb about potential economic aid to Vietnam, Cambodia, or Laos.

Well, be advised that as a private citizen outside the Congress, or the Gilmans in this Congress, we are not going to forget that you have played fast and loose with American women, mothers, daughters, sons that are now in their twenties that were infants when their dads were lost; you cannot play with people's emotions like this. You have your traditions, your respect for animism and the spirits of your ancestors and your grandfathers and grandmothers. Well, we are not going to forget our men that were left behind there when we know you have 400 or more sets of remains and we are demanding that they be returned. You cannot destroy them or burn them or execute the remaining live men you have and get away with it because you, Mr. Toc, are sophisticated enough, and I say this for the second time in the well of this great Congress, you are sophisticated enough to be familiar with one of the great writers of history in any language, William Shakespeare, and as he said in Hamlet, "Murder though it hath no tongue will by most miraculous organ out."

If you harm these final American survivors, if you destroy in some funeral pyre the bones of our heroes, it will eventually get out. Someone will turncoat on your regime. Someone will escape from that country. Someone will have a relative killed in some Communist night of the long knives and somehow or other somebody will make it out to the free world and tell the story.

If you want to put this chapter of history behind you, you know how to start. Start by giving us back our remains and initiating a legitimate search where you do not charge the wives and fathers and mothers $18,000 to fly around in a Communist Russian supplied helicopter that you are paying for with your young men sent as slave labor to work on the natural gas pipeline from Siberia.

Open your mind up and let us be open on the table on what you know we know about what you know and let us get this thing put behind us.

In conclusion, I refuse to close my eyes and so do some other Congressmen. All it needs is one dynamic handful of leaders in any free legislative body to keep an issue alive. We are not going to turn our backs. We cannot forget. We are not going to forget.

As Alexandr Solzhenitsyn, the greatest Russian living today, along with Dr. Sakharov, as Solzhenitsyn said in 1974, "If the Government of North Vietnam had difficulty in explaining to you Americans what happened to your brothers with our American POW's who have not yet returned, I on the basis of my experience in the Gulag Archipelago of prison camps can explain this quite clearly. There is a law in the Archipelago that those who have been treated the most harshly and withstood the most bravely, the most honest men, the most courageous, the most unbending, never again come out into the free world. They are never again shown to the world because they will tell such tales as the human mind cannot accept. A part of your returned POW's told you they were tortured. This means that those who have remained behind were tortured maybe even more and did not yield an inch. These are your best people. These are your first heroes who is solitary combat have stood the test and today they cannot take courage from our applause because they cannot hear it from their solitary cells where they either die or sit for 30 years like Raoul Wallenberg who was seized in 1945, was taken to the Soviet Union where he has been in prison for 30 years and they will still not yet give him up.

And of Alexandr Solzhenitsyn, I ask this House to rise up and put an end to this suffering in the 98th Congress, to the suffering of our fellow American families. If we do not do everything humanly possible, if we do not unturn every stone, then we are denying our heritage and we are literally eviscerating our future for this country in our third century, which by every form of reasoning should be our best century. Do not allow this to happen. I ask the remaining members of the task force to see that this issue is seen through to its humane conclusion. As I leave this House, my only regret is that I could not see a proper solution to this agonizing issue that has involved so much of my life; but I am not going to take off my bracelet, as I told a whole array of Russian diplomats and Politburo members in the Kremlin, I will not take off this bracelet of Dave Hrdlicka even if we get his remains home, because I will replace it with a bracelet of Shcharansky and other people who are suffering in Siberia.

I guess what I am saying is that I am stuck wearing this Montagnard bracelet that has been on my wrist since 1966 for the rest of my life. I guess I will die with it on, and the other bracelet that grew out of the Montagnard bracelet, the people who are the relatives of the Mung tribesmen being poison gassed, genocided off the planet at this very moment in Indochina, that bracelet will stay forever and I will keep changing the other bracelet with the names of the heroes, who as Solzhenitsyn said, are rotting away somewhere in solitary combat against the forces of despotism and evil, and it does not always have to be Communist evil, either.

The freedom for which my friends fought in Vietnam and the younger men who were my vintage as a Korean veteran, I will not forget them, so help me Almighty God.

I wanted to end on a positive note, but in this special order I want to ask two younger Members, I think they will be coming back to the House some day, although they were defeated, that since I put them on the committee should have worked more closely with me in their heroic and tough efforts to do something on this issue.

I appeal again from the bottom of my heart to Mr. SOLARZ, as one of the hardest working Members of the loyal opposition from my standpoint, to keep this task force intact, to utilize the talents and the longstanding experience of Mr. GILMAN and any Members who are given this responsibility to serve on this task force; do not go off on tangents on your own the way some of my friends did on the task force.

□ 2020

I say work together with Mr. GILMAN, make this a team effort.

On April 9 next I will look forward to turning on cable television on Bataan/Corregidor Day on the 41st anniversary of that day of infamy in the history of our country and seeing another special order, other men get in the well, and other women who serve all of us Americans, and take out 1-minute speeches, special orders, keep this issue alive, and do not ever let the conquerors of Vietnam think we are going to write off the memory of our men, so help all of us, Almighty God.

FACTS

When the Vietnam war ended in 1973 with the Paris peace accords, there were 2,553 men still unaccounted for in Southeast Asia; 1,178 were listed as KIA-bodies not recovered. And there were 1,279 listed as MIA and 96 remained as POW's.

In the almost 10 years that have elapsed, only 77 remains have been returned out of the 2,553. In Laos, where 559 men were MIA, only 2 remains have been returned and no information regarding the men held in the huge caves in Sam Neau has been released.

Within the last few years, there have been 280 firsthand live sighting reports from refugees and 170 secondhand reports on American soldiers in Southeast Asia.

Only two men are still listed as MIA: Maj. Jeffery Lemon, USAF and Lt. Col. Winfred Sisson, USMC. We have begun to turn our backs on the men who gave their lives for freedom.

SUSPICIONS

Lingering suspicions prod us to believe that Hanoi has not been straightforward in dealing with us. Hanoi's reputation: As late as 1977, the French have paid for prisoners and continue to do so for the remains of Frenchmen killed in the Indochina war nearly 20 years ago. All, long after the Vietnamese claimed to have no more remains.

In November 1979, a Vietnamese mortician reported to have processed some 400 American bodies. His testimony before the congressional committee has been verified as "irrefutable" by the DIA. These bodies were then stored in a morgue near Saigon several years after its collapse.

After years of testimonies, and hundreds of files being turned over to the Vietnamese, it is incontrovertible that they have precise records of our missing men. They have a Third Reich fascination with details. In fact, their Ministry of Defense had an enemy proselytizing department which provided their troops with morale and the world with propaganda concerning our captured men.

Lt. Gen. Eugene Tighe, ex-head of the DIA, testified in 1981 that it is his considered opinion that there are live Americans still being held in Southeast Asia.

The reports from many of the 500,000 people fleeing from the Communist repression have lent credence to the reports of American men still alive in Southeast Asia.

Unfortunately, Hanoi is associating their humanitarian obligation, in some perverted way, with some kind of economic reparations from the United States.

There are the continuing suspicions that the Vietnamese will use the POW/MIA issue for some form of political leverage—Kampuchea into the United Nations, smokescreen for territorial aspirations. Our missing men will become bargaining chips in some surrealistic game of political chess.

Only 13 percent of American casualties in North Vietnam have been accounted for.

EVIDENCE

The Vietnamese claimed that since 1973 they have had no evidence nor remains of American soldiers. In light of this claim, one must weigh the evidence.

As late as October 14, 1982, four bodies have been returned: Maj. Robert Trice, USAF, December 20, 1965; Ens. Donald P. Frye, USN, June 19, 1967; PO William P. Jackson, USN, June 19, 1967; and PO Donald P. McGrane, USN, June 19, 1967.

The painful cases of Tucker Guggleman, Capt. Richard Van Dyke, Lt. Stephen Musselman, and Comdr. Ron Dodge all scream out in indignation to the blatant lies of the Vietnamese. How could it take 14 years to account for Ron Dodge? How could the Montgomery committee return without Tucker Guggleman in 1975 if the Vietnamese said he died 6 months before the committee's arrival?

The fascination with details that they have, supports the belief that they have complete records of every man held in Southeast Asia. If they had the sophistication in Laos to build the stadium size cave compound in Sam Neua, then the Pathet Lao, under the control of the North Vietnamese, certainly had the organization necessary to keep records. They are there; somewhere in a hermetically sealed room lay the files that tell the fate of some 2,500 American men.

The evidence substantiates the suspicions that there are men still missing who can be accounted for in Southeast Asia.

PROGRESS

The Reagan adminstration has given the problem of accounting for the missing men the highest priority. William P. Clark said:

> We have enough information not to rule out the possibility that some of our unaccounted for men could still be held alive in Southeast Asia.

But progress has been slow due to the lack of cooperation of the Vietnamese Communists who continue to tie this issue to their political objectives. With thousands held in reeducation camps and thousands more sent to the Soviet Union as slave labor, appealing to their humanitarian sympathies seems unrealistic. With the slaughter of millions of innocents in Laos and Kampuchea and the reprehensible use of yellow (red) rain, it is no surprise that the Vietnamese have so inhumanely manipulated this issue of our missing men.

Although our progress has been slow, the Vietnamese have been able to attain a seat in the United Nations and their puppet government in Kampuchea is now bucking for one.

Since 1975, the International Monetary Fund has loaned the Vietnamese Government over $170 million. The United States provides for 20.65 percent of the IMF's funds.

We have provided them with close to $100,000 in medical assistance.

Yet, we have only received seven remains in the last 3 years.

We desperately need the humanitarian cooperation of the people of Southeast Asia if we are to see any real progress in this area.

THE KEY TO THE DOOR

We must find the key to resolving this issue. If the Governments of Vietnam and Laos wish to see further cooperation from the United States, then they must be more forthcoming with their information. We must find a way to impress upon those governments that if they have information they should divulge it now. If they have prisoners, feed them, heal them and return them to us. We will bear no resentment—we understand the misery of the war. We will only welcome our heroes home.

As William Shakespeare said in his most tragic work "King Lear," "Endurance is all." If men are still alive, if they have been able to endure all the hardship that life has doled them, then send them home for they are our best. These are our heroes.

As John F. Kennedy said, when discussing the Cuban missile crisis, if you have a rat cornered and you do not want it to fight then you have to give it a way out. We must find a way to let the Vietnamese release our men and come out unscathed.

Maybe the recent trip of the National League of Families will provide us with that key. I am sure though, that we cannot sit idly by and allow further inhuman acts of terror to rage in Southeast Asia and I am convinced that before any diplomatic relations can be established with Vietnam and Laos, some resolution must be found to this tragic legacy of the Vietnam war.

We cannot close our eyes; we cannot turn our backs; we cannot forget. As Alexandr Solyhenitsyn said in 1975:

> If the Government of North Vietnam has difficulty explaining to you what happened to your brothers, with your American POW's who have not yet returned, I, on the basis of my experience in the Archipelago, can explain this quite clearly. There is a law in the Archipelago that those who have been treated the most harshly and withstood the most bravely, the most honest, the most courageous, the most unbending, never again come out into the world. They are never again shown to the world because they will tell such tales as the human mind cannot accept. A part of your returned POW's told you that they were tortured. This means that those who have remained were tortured even more, but did not yield an inch. These are your best people. These are your first heroes, who, in a solitary combat, have stood the test. And today, they cannot take courage from our applause. They can't hear it from their solitary cells where they may either die or sit for thirty years, like Raoul Wallenberg, the Swedish diplomat who was seized in 1945 in the Soviet Union. He has been imprisoned for thirty years and they will not give him up.

I ask this House to rise up and put an end to this suffering, to their families suffering. If we do not do everything humanly possible, if we do not unturn every stone, then we are denying our heritage and eviscerating our future. Do not allow this to happen. I ask the remaining members of the task force to see this issue to its humane conclusion. As I leave this House, I only regret that I could not see a proper solution to this issue, but I will not take off my bracelet until the last man has been released and the freedom for which these men fought achieved. I will not forget, so help me Almighty God.

Mr. HEFTEL. Mr. Speaker, I wish to commend Mr. DORNAN of California and Mr. GILMAN for their dedication to the bodies and to the actual individuals who may be living who were never returned from Vietnam.

I am sure the gentleman from New York (Mr. GILMAN) will carry on with great courage and leadership that which our colleague, the gentleman from California (Mr. DORNAN) has portrayed, and I do so with a great sense of confidence in the spirit that Mr. DORNAN will leave behind and the spirit that Mr. GILMAN of California will carry forward.

And there is always the possibility that Mr. DORNAN will return to do it himself.

THE LATE HONORABLE CRAIG HOSMER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. LUNGREN) is recognized for 60 minutes.

GENERAL LEAVE

Mr. LUNGREN. Mr. Speaker, at the outset I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the life, character, and public service of the late Honorable Craig Hosmer.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. LUNGREN. Mr. Speaker, several days ago it was my sad duty to officially report to this body the passing of a former Member of Congress, Craig Hosmer, one known by many Members still serving and many who have left this body in the past few years.

You could go through his record as stated in "Who's Who in America" and give the simple facts:

HOSMER, CRAIG, lawyer, former congressman; b. Brea, Calif., May 6, 1915; s. Chester Cleveland and May Jane (Craig) H.; A.B., U. Calif., 1937; postgrad. U. Mich., 1938, U.S. Naval Acad., 1941; J.D. U. So. Calif., 1940; m. Marian Caroline Swanson, Feb. 12, 1946; children—Susan Jane, Craig Larkin. Admitted to Calif. bar, 1940, Supreme Ct. bar, 1953; practiced in Long Beach, 1946-47; 49-74; spl. asst. U.S. dist. atty. for AEC, Los Alamos, 1948; mem. 83d-93d congresses from 32d Dist. Calif., mem. interior and insular affairs and joint com. on atomic energy, ranking minority mem.; adviser U.S. Atoms-for-Peace Del., Geneva, 1958, 63, 71; Congl. adviser 18 Nation Disarmament Conf., UN Conf. Com. on Disarmament; mem. U.S. del. to Internat. Atomic Energy Agy., 1959-75; pres. Am. Nuclear Energy Council, 1975-78, bd. dirs., 1978—; energy cons., 1978-79; of counsel firm Doub. Purcell & Muntzing, Washington, 1979—. Bd. dirs. Inst. for Congress, 1975-78; v.p., bd. dirs. Oceanic Ednl. Found., 1972—. Served to rear adm. USNR, 1941-46. Recipient Oliver Townsend award for disting. service Atomic Indsl. Forum, 1978. Mem. Am. Nuclear Soc., AAAS Editor; U. So. Calif. Law Rev., 1939-40. Home: 5024 Van Ness St NW Washington DC 20016 Office: 1875 Eye St NW Suite 775 Washington DC 20006.

But that really would not give you a full picture of the man. Although I do not always rely on local newspapers to provide the best explanation for things which have occurred or describe people or activities, I think our local newspaper, the Long Beach Press-Telegram, on the Wednesday following the death of Craig Hosmer, said it very well.

They entitled it: "Hosmer: a quiet man of achievement."

This is what they said:

A RECORD OF SERVICE, OF GOOD CHEER, OF CALM ACCOMPLISHMENT

Oct. 26 would have been a special day for Craig Hosmer. It will be the 40th anniversary of the sinking of the SS President Coolidge, a troopship that struck a U.S. mine field while entering Espiritu Santo Harbor, 400 miles southeast of Guadalcanal. Hosmer—who had gone into the Navy immediately after being admitted to the bar in 1940—commanded the Coolidge's naval gun crew. The ship sank in an hour and 23 minutes. Only two of the 6,000 men aboard lost their lives.

The next morning Hosmer, weary from the successful search among the survivors for the 48 men of his command, wrote his log of the events. His last entry, on the conclusion of that exciting day:

"1930—Bunked down. No one takes long to get to sleep tonight. This has been quite a day. The men are all cheerful and morale is good despite the losses they all have suffered. Little more than the clothes we wear and partial pay cards were saved in most cases. They were marvelously calm when the mines exploded. Stuck right to their posts."

Perhaps the qualities we see most clearly in others are the qualities we ourselves possess. Hosmer praised sailors who were cheerful, calm and—as he put it elsewhere in the log—"doing the logical things." The praise was no doubt equally deserved by Hosmer that day—and in the years that followed.

In World War II, Hosmer, who had entered the Navy as an enlisted man, rose to full commander. Later in the Naval Reserve he rose to the rank of rear admiral. After the war, Hosmer entered private law practice, served a year as attorney at the Los Alamos, N.M., laboratories of the Atomic Energy Commission, and then returned to his home in Long Beach to run for Congress.

He served 22 years in the House of Representatives and became one of that body's recognized experts on nuclear energy. After he retired in 1976, he stayed in Washington to lobby for nuclear power, and to serve as president of the American Nuclear Energy Council, a trade association.

On Monday, on a cruise ship bound for Mexico, Craig Hosmer died. His life was rich in accomplishment, no doubt because he stayed calm, cheerful and did the logical things. He will be missed in Washington, where he was quietly but widely influential, and he will be missed by the Southern California constituents he served diligently and well.

Sometimes we reach this place in rather curious ways. The very first political activity I was involved in was as a 6-year-old child in Long Beach, Calif., walking door to door, handing out literature for a fellow named Craig Hosmer who was running for Congress. I really cannot remember whether he won at that time or whether he lost, because again, more curiously, he ran and was defeated and he had to run a second time in order to win.

I, attempting to succeed him, once removed by a Member of the other party who intervened, was unsuccessful my first time and had to run a second time.

He covered many of the areas that I have now, both in Los Angeles and Orange County, serving people who were noted for, among other things, having a large percentage of retired among them.

We had the first Leisure World in our district. I have it now; he served it then. Some of the areas in my district were beanfields. He explained to a friend of mine one time why, if you go to certain parts of Orange County, Calif., you will see houses built with what appear to be many different fences or stones around them. He would explain to you that the reason why it was that particular size, covered all around or fenced all around by a stone fence, was the fact that that was a farmer's beanfield that he sold off to be developed.

Unfortunately, in my area there are no beanfields left. In fact, in Orange County, in my area, there are not many orange trees left. We have found a metropolis in our area. Nonetheless, it remains very much the same type of community, conservative people, hard-working people, people who ask for nothing more than to have a place for their children to grow up in and for them to retire.

Craig was somebody who served them. He was somebody I looked up to as a young person growing up. The first person you go to work for when you are young is someone you look up to and admire and follow, although from a distance. He served our community well. He served for 22 years. He served until, as he put it, he got a little tired of it.

He said to the press upon his retirement that he wanted to make way for younger people because they are in the majority and this is a government by the majority. I am not sure that is completely the reason he retired, but I think there is some truth to that.

He served this Congress well. He served as one of the outstanding Members with knowledge and expertise in the area of atomic energy. He was the ranking member on the Joint Committee on Atomic Energy. That marked a time in this House and in the Senate when there was tremendous bipartisanship on the question of energy, nuclear energy.

The chairman of that committee, also from California, southern California, was Chet Holifield, a Democrat. He and Craig worked very closely together to make sure that that issue did not become a partisan issue; that it was one we faced in this country together as American citizens, Democrats and Republicans, liberals and conservatives; but nonetheless, Americans trying to deal with something new.

Atomic energy, how do you put it to the best uses? How do you use it so it can be used for peace and not necessarily for war?

Craig also served as the ranking Republican on the Committee on Interior and Insular Affairs. You can talk to Members who served with him and find out about the yeomanlike service that he performed, the long hours that he worked, the personal attention that he gave.

It is not so much just a reflection of the fact that we have more staff members here, we have more committees and more subcommittees and more work and we delegate more work to the staff. Even as that was coming on in the House, Craig insisted on doing even more than his usual, to be expected, personal effort.

□ 2030

He was someone who was looked up to in this House for that expertise. He was looked up to in this House for the hard work he put on, but even more than that he was looked up to in this House for his sense of humor, for the calm way he could attack things, but also in the way that he could use a rhetorical scalpel to make his point. Luckily, I was never on the end of any of those nice scalpel strikes. In some ways I was the beneficiary of some of them.

When I ran my first time, the person from my party who had been the standard bearer in the previous election, a former State representative, decided to go again, and I decided to challenge him. Some in our area thought that was a little forward of me. They suggested that I might start at the city council level, work my way up to State assemblyman, State senator, and perhaps in about 15 years run for Congress. I tried to point out to them that I had looked on my form 1040, my income tax return, in vain for a youth tax. I found I was being taxed as much as those who were older, and I thought therefore that perhaps I ought to have the same opportunity as they did. In fact, Craig felt the same way, and for whatever reason decided to give me a little help.

The fellow running against me made a mistake. In our area of the country, our part of the State, he decided to attack Craig Hosmer because Craig Hosmer had helped me. There was the first mistake. The second mistake was that he put it in a letter, not realizing that our former colleague, Craig Hosmer, would rise to the occasion and meet him on the playing field of letters. It was described in one newspaper, one of the letters, as the latest entry in the transcontinental poison pen derby. What it meant was that I got a lot of support out of that, and I got a lot of support from those who had supported Craig Hosmer for so very long.

In World War II Craig entered the Navy as an enlisted man and rose to full commander, but following his service, he, like many others after that war, decided to serve his country as a reservist, and he served in the Naval Reserve, many, many years, finally retiring from the Reserve as a rear admiral.

He was somebody from our area. He was born in Orange County, Brea, Calif. He went to school in two communities in my district, Huntington Beach and Long Beach. He went to the University of California at Berkeley. He later, as I mentioned before, graduated from the University of Southern California Law School, where he was the editor of the Law Review.

Another interesting thing I recall very well was the fact that Craig's parents, although they have gotten along in years, at that time lived right around the corner from me, and some of my brothers and sisters and myself used to go over there at times to visit them. That was another connection we had.

He was, very simply, a man of our district, a man of our community, a man with a lot of service, a man of good cheer, a man of calm accomplishment. Sometimes I suppose we think that those who seek the limelight, those that love to get on the nightly news, who are on television or radio on a daily basis, are the ones who are the leaders in this House. Oftentimes we forget that the leaders in this House many times are those who dig in and do the hard work that must be done in the various committees, who come to the floor and add their wisdom—not a lot, but just as necessary; sometimes calm the storm with humor, sometimes rile up the calm with charged remarks, but in many ways certainly making this institution a very human institution.

Mr. Speaker, I am sorry that this special order took place at this late hour. I am sorry because this does place a burden on those who work for us in this Chamber and work with us in this Chamber, but I am also sorry because the confused schedule that we have faced over the last couple of days probably has not allowed a number of Craig's former colleagues to be here. I have a number of letters that I have entered into the RECORD of colleagues that served with him.

I was reminded just the other day when I was down in the Members' gym, where I ran into another Member who had not served with Craig, but met him there when he was down in the gym on occasion, he said he saw Craig hitting the paddleball against the wall, and went up to him wanting to play a game with him. It was only then that Craig mentioned to him that his health would not allow him to do that, that that would be too strenuous for him.

In many ways, many of us thought of Craig as a very, very healthy man. I had heard just 2 weeks before his death that he was smiling as usual, had a good word for me, a good word for everybody. It did not matter whether you were the locker room boy in the locker room or the Speaker of the House, Craig Hosmer treated you the same way.

He went out of his way to welcome me to the House of Representatives. Both he and his wife Marian were most hospitable to my wife and myself, and on very simple terms remained the quiet man of achievement that was proclaimed by our local newspaper and that has been confirmed by the comments of many Members who greeted me with surprise when I mentioned that Craig had passed away when we were gone during the election recess.

Mr. Speaker, Craig Hosmer is a man who will be missed by this House. He will be missed by his friends. He will be missed by his family. He will be missed by the communities he served so well. He is someone that still acts as an inspiration for me, and I hope I can serve the people of my district as ably as he served them in the past.

● Mr. STARK. Mr. Speaker, the death of Craig Hosmer brings to an end a full and productive life. I served just one term in this House with my fellow Californian but that was long enough for me to come to know the important role he played in this body.

At the time of Craig Hosmer's retirement from Congress in 1974, another respected colleague, Bill Steiger of Wisconsin who also was taken from us prematurely, said of the man we commemorate today, "His conscientiousness and his thoughtfulness have brought him wide respect both in Congress and among those on all sides of the energy issue. He has made a sizable contribution in his 11 terms and will be remembered for it for a long time."

The fact that so many today testify to Craig Hosmer's accomplishments indicates that Bill Steiger had it right 8 years ago when he commented on the long-term impact of Craig Hosmer's congressional service. It remains today as a monument to the man so many of us knew and respected. My sympathy goes to the family of our colleague.●

● Mr. ANDERSON, Mr. Speaker, I rise to pay tribute and to express my sympathy over the death of my friend and former colleague, Craig Hosmer. I knew Craig since the early 1960's, even before I came to serve here in Washington. Since he represented much of the same territory as I do now, I would often see and speak with Craig when he returned to the district while I was serving as Lieutenant Governor.

Among his many contributions while in Congress, Craig's involvement with atomic energy development while serving as ranking member of the Interior Committee and the Joint Committee on Atomic Energy is most memorable. To be sure, he served on these committees with the same hard work and dedication that he did when he was a member of the U.S. Atoms-for-Peace delegation in Geneva.

To lose a friend is never easy, and indeed, Craig is one who I, along with so many others will miss very much. I saw and spoke with Craig back home in California only the day before he passed away, which makes his death for me all the more hard to accept.

Mr. Speaker, I know you and my colleagues join my wife, Lee, and me in sending sincere condolences to Craig's wife, Marian, his daughter, Susan and his son Larkin. His friendship and service will always be remembered.●

● Mr. BADHAM. Mr. Speaker, today it is my privilege to pay tribute to a former Member of this honorable body, Craig Hosmer, who recently died an untimely death. Craig, who was a good friend of mine as well as many who serve in this House, served for 22 years in the House of Representatives from the Long Beach and Orange County area of southern California.

Craig Hosmer was a distinguished legislator who was noted for his poignant honor and expertise in the field of atomic energy, serving for many years as the leading minority member of the Joint Committee on Atomic Energy.

During his service in Washington, Craig fought an endless, and seemingly hopeless, battle for year-round daylight saving time, which he considered important for the Nation as a means for saving energy. His articles and speeches on the subject were delightful examples of understated humor, to which Members of this body looked forward each year.

Unfortunately, when the time was right for year-round daylight saving time, the President of the United States took over the promotion of the change in the national interest and Craig Hosmer, as usual, was once again left in the lurch, a development which he accepted with grace and style.

In the meantime, however, Craig became an unqualified expert on atomic energy, both for the generation of power to light our cities and for propulsion for our warships. He joined with another distinguished former Member, Chet Holifield, in serving as messengers to the free world on the importance of nuclear power for the future of mankind, delivering scholarly lectures throughout the country and carrying important legislation in this area in the Congress of the United States.

Craig Hosmer was a native of Orange County, Calif., born in Brea on May 6, 1915. He received his law degree from the University of Southern California, after graduating from the University of California. He was in the naval services during World War II for 6 years, served as an attorney for the Atomic Energy Commission and was a member of the American Nuclear Society, Phi Beta Psi fraternity and was a retired admiral in the Naval Reserve at the time of his death.

Craig Hosmer was elected to the House of Representatives in 1952 and in addition to his service on the Joint Committee on Atomic Energy, was a member of the Interior and Insular Affairs Committee. He served as a congressional advisor to the U.S. delegations to Atomic-for-Peace Conferences and the International Atomic Energy Agency.

As a member of a pioneer Orange County family, Craig Hosmer was the nephew of the late Ted Craig of Brea, who served as a speaker of the California Assembly nearly 50 years ago. All of us in this House and his family friends and associates here in California were well-served by Craig Hosmer and all of us were better off for having known him. We shall miss him.●

● Mr. RHODES. Mr. Speaker, I was shocked and saddened when I learned of the sudden death in October of our former colleague, Craig Hosmer.

Craig and I began our congressional careers in the same year, 1952. Having had the opportunity of working closely with him, I know well of his unstinting efforts to secure the necessary water to meet the needs of the dry Southwest, and of his outstanding work in promoting the use of nuclear power.

The chairmanship of the Joint Committee on Atomic Energy, upon which he served, eluded him during his tenure only because he was a member of the minority party. Nevertheless, he was widely recognized as an expert in the field. Evidence of this recognition resulted in his appointment as an adviser to the U.S. Atoms-For-Peace delegation at Geneva and the 18-nation Disarmament Conference.

When he left Congress, after serving 22 years in the House, he founded the American Nuclear Council, to provide a forum for national and international exponents of nuclear power.

Probably the part of his public career of which Craig Hosmer was most proud, was his service in the U.S. Navy. As a Navy officer during World War II, Craig served in the North Atlantic, Iwo Jima, and Okinawa. Upon completion of his active duty, he continued his interest and commitment to the Navy, serving in the Reserves and ultimately attaining the rank of rear admiral.

Craig Hosmer was a dedicated public servant and a trusted friend. Betty joins me in extending our sincere sympathy to his widow, Marian and their two children, Larkin, and Susan.●

● Mr. ROE. Mr. Speaker, it is with much sadness that I rise today to salute the memory of our late colleague Craig Hosmer.

For 22 years, Craig Hosmer served the people of his California district with both honor and distinction. His record in Congress was certainly one to be admired and emulated.

At the time of his retirement in 1974, Congressman Craig Hosmer was the ranking member of the Interior Committee and the Joint Committee on Atomic Energy.

Our Nation's water development system owes a great debt to the efforts of Craig Hosmer. In his influential position on the Interior Committee he was a major force in developing and securing approval of the Colorado River Basin project and other vital water projects.

Craig Hosmer was one who realized the power and promise of nuclear energy and its potential benefits to mankind. But he was also out front in pointing out the dangers that the misuse of this most potent force could bring. It was a great honor in his career to be chosen three times to serve as an adviser to the U.S. Atoms-For-Peace delegation at the 18-member Disarmament Conference in Geneva.

Congressman Craig Hosmer was a dedicated public servant who devoted his life to the well-being of others. I pray his memory will serve as an inspiration to us all in the years to come.●

● Mr. DERWINSKI. Mr. Speaker, it was my privilege to have served with the late Congressman, Craig Hosmer, during his brilliant service in the House of Representatives. I join in expressing my sorrow at his passing.

As a Member of Congress, Craig Hosmer was a sincere, hard working Representative for the people of California. I remember that I was impressed with Craig's courtesy and his ability as a legislator. I held great admiration and respect for his judgment and counsel, and always found him to be a very warm, pleasant, and understanding individual.

During his distinguished career in the House, Craig made countless contributions to the legislative process. As ranking member of the Interior Committee and the Joint Committee on Atomic Energy, Craig was influential

on both water resources development and nuclear power initiatives. During his tenture of 22 years, Craig Hosmer served as an adviser to the U.S. Atoms-for-Peace delegation at the Disarmament Conference in Geneva, and worked to develop the Colorado River Basin project.

Craig had many friends on both sides of the aisle and was admired and trusted for his knowledgeable and wise counsel. Craig was truly dedicated to public service, and lived up to the full measure of his responsibilities.

Mrs. Derwinski joins me in extending our heartfelt condolences to his widow, Marian, and his entire family. We will remember him as a true friend and respected colleague.●

● Mr. HORTON. Mr. Speaker, it is with deep sadness that I join with my colleagues today to pay tribute to a good friend and former colleague, Craig Hosmer. Craig served the people of his southern California congressional district with distinction throughout his 11 terms in the House of Representatives. A pioneer in water resource development and nuclear power, Craig recognized the need for this country to develop energy resources in order to maintain energy independence, well before any Arab oil embargo. Craig's work and strong support for the Colorado River Basin project is a lasting testimonial to his dedication and perseverance.

I had the honor and privilage to serve on the Joint Committee on Atomic Energy shortly after Craig left office. Much of what we accomplished was based upon the work of Craig Hosmer. He also served as an adviser to the U.S. delegation in Geneva at the 18-member Disarmament Conference.

Craig also served his country with distinction during the Second World War as a Rear Admiral in the Naval Reserve. He participated in two of the major battles of the Pacific theater; Iwo Jima and Okinawa.

Craig will be missed by all of those who knew him, just as he has been missed by this House since he retired. It is with heartfelt sadness that I extend my sincere condolences to the family and friends of Craig Hosmer.●

● Mr. ADDABBO. Mr. Speaker, it is with great sadness that I join my colleagues today in honoring our good friend and former colleague, Craig Hosmer, who passed away last month.

Craig served his constituents, the residents of the 18th, 32d, and 34th Congressional Districts of California, and this institution well for 22 years until his retirement in 1974. As ranking Republican on the House Interior Committee and the Joint Committee on Atomic Energy, Craig was influential in nuclear power and water resources legislation, including the Colorado River Basin Project, which allocated California's share of vital river water for industry and agriculture. Craig served as an adviser to the U.S. Atoms for Peace delegation at Geneva and the 18-nation Disarmament Conference.

Craig retired in 1974, expressing his desire that younger, new people serve in the House. He then became an energy consultant here in Washington and served as president of the American Nuclear Council. I join my colleagues in offering my deepest sympathies and prayers to Craig's family in this difficult time.●

● Mr. MONTGOMERY. Mr. Speaker, I was saddened to hear of the death of former Representative Craig Hosmer of California. He served so ably in this Chamber for 22 years and I considered him a close personal friend.

I always had the utmost respect for Craig and he was counted on for his leadership and expertise, especially in the areas of atomic energy and on matters concerning the Interior. He gained this vast knowledge by working so hard and so effectively as a member of the Interior Committee and on the Joint Committee on Atomic Energy. In addition, he served his State and his Nation as an adviser to the U.S. Atoms-For-Peace delegation in Geneva.

Besides working so long and diligently for his California constituents in the Halls of Congress, Craig served his country in the Armed Forces. He fought in World War II at Iwo Jima and Okinawa, and he continued to serve his country as a rear admiral in the Naval Reserve.

The people of California, and this country, can be proud of the most outstanding work done by Craig Hosmer both as a public servant and as a member of our military. He was a fine American and I was proud to have served with him in this Chamber.●

● Mr. FUQUA. Mr. Speaker, I would like to join those colleagues today who are honoring the memory of Craig Hosmer, who served in this body with distinction and dignity from 1952 until 1974.

The very fact that so many Members of this House are taking the time today to honor Craig Hosmer's memory 8 years after his retirement speaks volumes about the respect in which he was held by his colleagues.

During more than two decades representing the 18th, 32d, and 34th Districts of California, Craig Hosmer established a record of attention to constituent needs and national priorities which is well remembered by those of us who were honored to serve with him.

Craig Hosmer was elected to the House of Representatives after distinguished service with the U.S. Navy during World War II in which he rose to the rank of rear admiral of the Naval Reserve and participated in the battles of Iwo Jima and Okinawa.

His memory will remain with us on the honor roll of outstanding Members of Congress.●

GENERAL LEAVE

Mr. HEFTEL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and to include extraneous material on the subject of the special order today of the gentleman from Illinois (Mr. PRICE).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Hawaii.

There was no objection.

TRIBUTE TO HON. JOHN G. FARY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. PRICE) is recognized for 30 minutes.

● Mr. PRICE. Mr. Speaker, I requested this special order today to pay tribute to our colleague, the Honorable JOHN G. FARY, of Illinois, who will leave the House of Representatives at the end of this Congress.

The people of Chicago will lose a dedicated representative and champion of their interests, and the people of the United States will lose the benefit of Mr. FARY's contributions to the Federal legislative process and his insights into the issues that we must consider here.

JOHN FARY came to the 94th Congress by special election to the vacancy created by the death of the Honorable John Kluczynski. Mr. FARY quickly proved himself to be a worthy successor.

Mr. FARY and I became fast friends, and with Congressman ANNUNZIO, of Chicago, we solved all the world's problems many times over every day in the dining room.

If JOHN FARY's personality and career could be described by one word, that word would be "loyalty": Loyalty to his friends, loyalty to his colleagues, loyalty to his constituents, loyalty to his State, loyalty to his party, and loyalty to his country.

We need more people like JOHN FARY in Congress, and I hope we get them. But JOHN's unique temperament and humor are not likely to be matched and will be missed around here.

I wish him and his family all the best for the future.●

● Mr. ANNUNZIO. Mr. Speaker, it is a genuine pleasure for me to join my good friend, the dean of the Illinois delegation, MEL PRICE, in paying tribute to a dear friend, JOHN FARY.

JOHN has represented the Fifth District of Illinois for the last 7 years. His dedication to his committee assign-

ments, his loyalty to the Democratic Party, and his devotion to the highest standards of integrity are well known to all of those who have been privileged to have worked with JOHN on the Public Works Committee or as a Member of the Congress of the United States.

He was elected to Congress in 1975. Since coming to Congress, he has served on the Public Works Committee, where he became chairman of the Subcommittee on Public Buildings and Grounds, and he has also given distinguished service as a member of the Surface Transportation Subcommittee of the Public Works Committee.

JOHN FARY played a leading role in the revitalization of Midway Airport in Chicago, and it was largely due to his efforts and hard work that flights have been restored from Chicago to Washington and Washington to Chicago at Midway.

He also played a key role in securing $37 million for the Little Calumet watershed plan in Illinois. When completed in 10 years, this watershed will provide four reservoirs and hundreds of jobs in the Chicago area.

During the last 3 years Illinois has received more Federal highway funds than any other State because of the efforts of JOHN FARY, who has been an outstanding watchdog on the Public Works Committee for Illinois.

Before coming to Congress, JOHN served as a legislator in the Illinois General Assembly for almost 22 years where he was respected by all of his colleagues as a knowledgeable legislator and a dedicated public servant who was completely committed to his responsibilities, to his job, and to the Democratic Party of Cook County. Because of his great respect for JOHN FARY, the late Mayor Richard J. Daley picked him to replace the late distinguished Congressman from that district, John Kluczynski.

JOHN FARY has indeed been a worthy successor to John Kluczynski on the Public Works Committee. In a short 7 years, he has left his mark. He has performed conscientiously and constructively on behalf of his constituency. He has served his city well and his city is proud because of JOHN's outstanding contributions in the Congress. JOHN left no stone unturned in his efforts on the Public Works Committee to insure that Chicago and the State of Illinois received all of the benefits to which our State was entitled under the law.

Over the years he has been an especially close friend and we have shared good fellowship and camaraderie. We have assisted each other on all types of legislation that would benefit our city and our State.

JOHN has been an effective Congressman for the Fifth District, serving his constituency well. He has been a highly respected member of the Public Works Committee, a knowledgeable Member of Congress, and a good team player who will be sorely missed by all of us in the Congress of the United States. His outstanding voting record reflects his great love for the United States of America, and he has never been found wanting in his voting record to protect the best interests of the United States and to insure that this country remains the greatest and most powerful democracy in the world.

I join all of my colleagues in Illinois in saying, "JOHN, thank you for a job well done," and I want to extend to you as you leave this Congress best wishes for long life, good health, and continued success in all of your endeavors.●

H.R. 7379—CORCORAN TO ALGERIANS, CANADIANS: DROP PRICES OR KEEP YOUR GAS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. CORCORAN) is recognized for 5 minutes.

● Mr. CORCORAN. Mr. Speaker, we all know that natural gas prices are higher than they need to be. But did you know that one of the chief causes of soaring natural gas prices for much of the country is imported natural gas?

In 1981, we imported 904 billion cubic feet of natural gas at an average price of $4.88 per Mcf. Of this amount, 762 billion cubic feet came from Canada at an average price of $4.83 per Mcf. 105 billion cubic feet came from Mexico and was priced at $5.01 per Mcf. Natural gas consumers in this country paid $4.2 billion to Canadian and Mexican natural gas producers. Another $204 million went to Sonatrach, the Algerian National Energy Co., for imported liquefied natural gas.

When you compare the average border cost of these imports ($4.83 per Mcf), with the average cost of domestic natural gas in 1981 ($2.06 per Mcf), you can see the role imported natural gas is playing in the natural gas prices American consumers are paying. By the time Canadian gas is transported to residential consumers, it may cost as much as $6.75 to $7.

Even this year, at a time when my colleague from Ohio (Mr. BROWN) informs us that domestic natural gas is being burned off into the air, we are importing ever greater quantities of natural gas. For the first 9 months of this year, we imported 703 Bcf. This is deceptive, however, because new projects for the import of Canadian natural gas and Algerian LNG came on line in October. Thus, the figures for the last 3 months of the year are likely to be substantially higher.

Do we need these expensive imported supplies? No, at a hearing conducted in Indianapolis, Ind., by the Fossil and Synthetic Fuels Subcommittee on October 8, Panhandle Eastern Pipeline Co. testified that it did not need Canadian gas this winter at all, but that it was required by its contract with the Canadian gas supplier to take 75 percent of the contract volume. More than half of the 45-percent increase in Panhandle's wholesale rate effective October 1, 1982, was due to this unneeded Canadian gas and the facilities required to transport it to Panhandle's service area.

Panhandle's situation is not atypical. As you can see from the factsheet submitted with this statement, 14 interstate and intrastate natural gas pipelines imported Canadian gas in 1981. Another imported Mexican natural gas at a price even higher than Canadian natural gas.

Some parts of the country are now confronted with the unique privilege of consuming Algerian liquefied natural gas. If Canadian and Mexican gas represent the Cadillacs of the natural gas market, Algerian LNG is the Rolls-Royce. Regasified Algerian LNG enters the pipeline in Louisiana priced at $7.13 per Mcf. It will cost even more for Massachusetts consumers if a new price provision sought by Distrigas and Sonatrach is approved by DOE. Thanks to many of my colleagues, including Mr. MICHEL and Mr. FINDLAY, consumers are not yet paying these Rolls Royce prices for gas which they do not need. But unless something is done now, they may.

We can stop it. The legislation I am introducing today would give governments as well as importing and exporting companies 6 months in which to renegotiate import prices and conditions. If exporting countries insist on maintaining prices that are above the level sustainable by the U.S. market, American gas companies will have to turn to the cheaper American supplies that are now being shut in. A company which has made expenditures based on a previously granted license to import Algerian LNG, whose importation is suspended because of this act, would be entitled to recover its costs, since those costs were incurred in good faith.

If, alternatively, lower foreign gas prices are agreed upon, hopefully pursuant to contracts with less onerous "take or pay" provisions, natural gas consumers served by importing companies will benefit immediately because natural gas pipelines will be paying less than they expected to pay.

This legislation does not entail months of proceedings at FERC to make contract-by-contract determinations about prudency, abuse or any other such silliness.

It places imports of natural gas in today's market for natural gas, not above it. I ask for your support.

FACTSHEET

CANADIAN GAS IMPORTS

In 1981, we imported 904 billion cubic feet of natural gas at an average of $4.88 per thousand cubic feet. Of this amount, 762 billion cubic feet came from Canada, 4.3 percent less than in 1980. We paid $3,681,832,000 (nearly $3.7 billion) for Canadian gas. This price reflects an increase of 11.8 percent over the amount paid per mcf. for Canadian gas in 1980. The price of Canadian gas averaged $4.83 per mcf. compared with an average 1981 price of $2.06 per mcf. for domestic gas supplies.

Importers of natural gas from Canada are now authorized to pay up to $4.94 per million BTU. If currently pending import requests are approved by DOE, Canadian gas will reach virtually every State in the continental United States.

In 1981, the following interstate gas pipelines received 730 billion cubic feet of Canadian gas: (1) Great Lakes Gas Transmission Company; (2) Inter-City Minnesota Pipelines, Ltd.; (3) Michigan-Wisconsin Pipeline Company; (4) Midwestern Gas Transmission Company; (5) Northern Natural Gas Company; (6) Northwest Alaskan Pipeline Company; (7) Northwest Pipeline Corporation; (8) Pacific Gas Transmission Corporation; (9) Tennessee Gas Pipeline Company; (10) Texas Eastern Transmission Corporation; and (11) Transcontinental Gas Pipeline Corporation.

The following intrastate pipelines received 31 billion cubic feet of Canadian gas: (1) The Montana Power Company; (2) St. Lawrence Gas Co., Inc.; and (3) Vermont Gas Systems, Inc.

Canadian gas was delivered by truck to distribution companies in Manchester and Tilton, New Hampshire.

MEXICAN GAS IMPORTS

In 1981, Border Gas, Inc. imported 105 billion cubic feet of natural gas from Mexico at an average price of $5.01 per mcf. The total cost of Mexican imports was $526,236,000, an increase of 13.7 percent over 1980.●

LEGISLATION PROVIDING GREATER EQUITY TO "INNOCENT SPOUSES" BURDENED WITH TAX LIABILITY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. STARK) is recognized for 5 minutes.

● Mr. STARK. Mr. Speaker, today I am introducing legislation to provide greater equity and justice to those "innocent spouses" now unfairly burdened with tax liability under section 6013(e) of the Internal Revenue Code.

In January 1971, Congress enacted an amendment to the Tax Reform Act of 1969 which recognized that joint and several liability by married couples filing joint Federal tax returns was not always a fair determination of tax liability. In seeking to relieve one spouse from liability for an erroneous understatement of gross income attributed to the other spouse the act established the concept of the "innocent spouse."

For purposes of the act a spouse could be declared innocent if five conditions were met: First, a joint return was filed; second, an amount properly includable in gross income had been omitted from the return; third, the omitted income exceeded 25 percent of the gross income reported on the joint return; fourth, the innocent spouse established that in signing the return he or she did not know of and had no reason to know of the omission from the income; and fifth, taking into account whether or not the spouse significantly benefited from the items omitted from gross income and all other facts and circumstances, it was inequitable to hold the spouse in question liable for the deficiency in tax.

While Congress believes this remedial act would create equitable and just relief for an innocent spouse it has at best turned out to be only a halfway measure. First, there is a flaw in the existing legislation because it only provides relief with respect to taxes on amounts includable in gross income under chapter 1 of the code. However, frequently cases involved errors in deductions or credits rather than gross income and thus the innocent spouses have not been forgiven for the tax liability. Since the intent of the original bill was to grant relief where it would be inequitable to impose liability, my proposed bill represents the recognition of the obvious fact that it is possible that such an inequity could arise in the context of improper deductions or credits.

Second, drawing the line at income omissions exceeding 25 percent of gross income stated on the return has proven too high and onerous a threshold test in many situations. It is unnecessarily excludes from coverage situations involving sizable tax deficiencies caused by erroneous deductions against income where relief would be equitably deserving. In reducing the threshold test to a "substantial understatement" of tax, that is, those exceeding 10 percent or $500, whichever is the lesser amount, required to be shown on the return, this legislation seeks to grant more equitable relief without unnecessarily overburdening the courts and the Internal Revenue Service with suits in which the deficiency is de minimis.

Third, this amendment will eliminate the unfair provision requiring the innocent spouse prove that she or he did not significantly benefit from the omitted item. When the couple is separated or living apart due to abandonment or desertion, it is easy enough to establish that the innocent spouse did not significantly benefit. However, as matters now stand, it is more difficult and sometimes impossible, to prove no significant benefit when the couple lives together. In removing this test we will end the inherent bias against an innocent spouse who is living with a guilty tax evader.

Last, my bill provides relief for innocent spouses filing separate returns under section 66 of the Internal Revenue Code, which relates to treatment of community income where spouses live apart. In a noncommunity property State, a taxpayer filing a separate return is not taxed on income earned by the other spouse. However, at present, in an community property State, like California, a taxpayer filing a separate return is charged with income earned by the other spouse.

The income of each spouse is community income and 50 percent is therefore attributable to the nonearning spouse and must be reported on the latter's separate return. As a result, in a community property State an innocent spouse is liable for a deficiency attributable solely to income earned by the other spouse. As Congress has acknowledged the justice of granting relief for joint returns it seems only equitable to make relief available in a similar manner to those filing separate returns.

Clearly persons who are unaware of an uninvolved in the substantial understatements of tax attributable to gross erroneous items reported by their spouses on Federal tax returns deserve and need the protection from unfair tax liability which this bill is designed to provide.

H.R. 7382

A bill to amend the Internal Revenue Code of 1954 to expand the circumstances where relief from liability for income tax (and penalties and interest with respect thereto) is provided to a spouse for a deficiency with respect to a joint return, and to provide similar relief with respect to certain separate returns of married individuals

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subsection (e) of section 6013 of the Internal Revenue Code of 1954 (relating to spouse relieved of liabiity in certain cases) is amended to read as follows:

"(e) SPOUSE RELIEVED OF LIABILITY IN CERTAIN CASES.—

"(1) IN GENERAL.—Under regulations prescribed by the Secretary, if—

"(A) a joint return has been made under this section for a taxable year,

"(B) on such return there is a substantial understatement of tax attributable to grossly erroneous items of 1 spouse,

"(C) the other spouse establishes that in signing the return he or she did not know, and had no reason to know, that there was such substantial understatement, and

"(D) taking into account all the facts and circumstances, it is inequitable to hold the other spouse liable for the deficiency in tax for such taxable year attributable to such substantial understatement.

Then the other spouse shall be relieved of liability for tax (including interest, penalties, and other amounts) for such taxable year to the extent such liability is attributable to such substantial understatement.

"(2) GROSSLY ERRONEOUS ITEMS.—For purposes of this subsection, the term 'grossly erroneous items' means, with respect to any spouse—

"(A) any item of gross income attributable to such spouse which is omitted from gross income, and

"(B) any claim of a deduction or credit by such spouse in an amount for which there is no basis in fact or law.

"(3) SUBSTANTIAL UNDERSTATEMENT.—For purposes of this subsection, the term 'substantial understatement' means any understatement (as defined in section 6661(b)(2)(A)) which exceeds the lesser of—

"(A) 10 percent of the tax required to be shown on the return for the taxable year, or

"(B) $500.

"(4) SPECIAL RULE.—For purposes of paragraph (2)(A), the determination of the spouse to whom items of gross income (other than gross income from property) are attributable shall be made without regard to community property laws."

(b) Section 66 of such Code (relating to treatment of community income where spouses live apart) is amended by redesignating subsection (b) as subsection (c) and by inserting after subsection (a) the following new subsection:

"(b) SPOUSE RELIEVED OF LIABILITY IN CERTAIN OTHER CASES.—Under regulations prescribed by the Secretary, if—

"(1) an individual files a separate return for any taxable year,

"(2) such individual does not include in gross income for such taxable year an item of community income properly includible therein which is attributable to the other spouse,

"(3) the individual establishes that in signing such separate return he or she did not know of, and had no reason to know of, such item of community income, in such individual's gross income,

"(4) taking into account all facts and circumstances, it is inequitable to include such item of community income in such individual's gross income,

then, for purposes of this title, such item of community income shall be treated in accordance with the rules contained in section 879(a)."

(c) The amendments made by subsections (a) and (b) shall apply to all taxable years to which the Internal Revenue Code of 1954 applies. Corresponding provisions shall be deemed to be included in the Internal Revenue Code of 1939 and shall apply to all taxable years to which such Code applies.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Hampshire (Mr. D'AMOURS) is recognized for 5 minutes.

● Mr. D'AMOURS. Mr. Speaker, I was unavoidably absent from the floor of the House during consideration of two amendments to the Federal Trade Commission authorization bill, H.R. 6995. Had I been present, I would have voted "aye" on the amendment offered by Representative BROYHILL, rollcall No. 403, and I would have voted "no" on the amendment offered by Representative LUKEN, rollcall No. 404.●

EXPORT-IMPORT BANK FINANCING NOTIFICATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. NEAL) is recognized for 5 minutes.

● Mr. NEAL. Mr. Speaker, I am informing the House today of the U.S. Export-Import Bank's proposal to provide additional financing to enable the Republic of Indonesia to buy U.S.-made radio isotope and pharmaceutical production equipment and services for a laboratory near Jakarta.

The Eximbank originally granted Indonesia a loan of $13,086,000 for this project on April 27, 1982. This was 75 percent of the total purchases planned in the United States.

Subsequently, the U.S. supplier, General Atomic Co. of San Diego, Calif., was awarded an additional contract of $5,286,000 to supply the Jakarta Laboratory. The Eximbank is now proposing a loan for 75 percent of the increase, or $3,964,000.

This Eximbank notification was referred to me as chairman of the Banking Committee's Subcommittee on International Trade, Investment and Monetary Policy. Under section 2(b)(3)(iii) of the Export-Import Bank Act of 1945, as amended, the Eximbank must notify Congress of proposed loans or guarantees involving the export of nuclear technology or equipment. Unless Congress determines otherwise, the Eximbank may give final approval to the transaction after 25 days of continuous session of the Congress after notification.

I am submitting the Eximbank's notification, which includes details regarding the additional financing for the Indonesian laboratory, for the RECORD. I would welcome any comments or questions my colleagues might have on this financial proposal.

The Eximbank material follows:

EXPORT-IMPORT BANK
OF THE UNITED STATES,
Washington, D.C., October 19, 1982.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES,
The Speaker's Room, U.S. Capitol, Washington, D.C.

DEAR MR. SPEAKER: This is to inform you of an increase in the financing to be provided by Eximbank for a project in Indonesia. This financing was reported to Congress on March 17, 1982, pursuant to Section 2(b)(3)(iii) of the Export-Import Bank Act of 1945. Enclosed is a copy of that report.

On April 27, 1982, Eximbank authorized a loan in favor of the Republic of Indonesia ("ROI") in the amount of $13,086,000 to assist in financing the purchase in United States of radio-isotope and pharmaceutical production equipment and technical services for a pharmaceutical laboratory ("Project"). The U.S supplier, General Atomic Company of San Diego, California, was awarded additional procurement for the project which raised the value of its sale from $17,448,000 to $22,734,000. As a consequence the ROI requested a corresponding increase in Eximbank's assistance and on October 19, 1982, Eximbank authorized an increase in its Credit from $13,086,000 to $17,050.000. The scope of the Project remains unchanged.

Sincerely,

WILLIAM H. DRAPER III.

Enclosures.

EXPORT-IMPORT BANK
OF THE UNITED STATES,
Washington, D.C., March 17, 1982.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES,
The Speaker's Room, U.S. Capitol, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to Section 2(b)(3)(iii) of the Export-Import Bank Act of 1945, as amended, Eximbank hereby submits a statement to the United States House of Representatives with respect to the following transaction involving U.S. exports to the Republic of Indonesia ("ROI").

A. DESCRIPTION OF TRANSACTION

1. Purpose

Eximbank is prepared to authorize a Credit of $13,086,000 to the Republic of Indonesia to facilitate the purchase in the United States of radio-isotope and pharmaceutical production equipment and technical services for a pharmaceutical laboratory near Jakarta, Indonesia for use by BATAN, the national atomic energy agency of the ROI. The ROI has selected the General Atomic Company of San Diego, California, to provide the goods and services. The total U.S. export value of this sale is $17,448,000. A portion of this transaction was included in a preliminary commitment issued previously for potential U.S. suppliers of goods and services for the project. The Germans were awarded the bulk of the procurement for the basic research reactor, the scope of which included the pharmaceutical laboratory equipment and services which are to be financed by Eximbank.

2. Identity of the parties

The ROI will be the borrower and will issue an unconditional full faith and credit obligation to repay the Eximbank Credit. The Indonesian National Atomic Energy Agency (BATAN) will be the user of the equipment and services.

3. Executive branch approval

Eximbank requested through the Department of State the views of the Executive Branch on the proposed transaction. The State Department has advised Eximbank that the Executive Branch has no objection to our proceeding with this transaction.

4. Nature and use of the services

The goods and services to be exported from the United States will relate to a research reactor being built by BATAN near Jakarta which is expected to produce 80% of the Indonesian national demand for medical isotopes. The reactor will also be used for basic research and proof-testing of fuel for power reactors. The General Atomic Company received the order for the associated laboratory facility which will be used to produce radio-pharmaceuticals as well as radio-isotopes for industrial applications. The scope of supply for this work will include preliminary facility design, design and supply of equipment, process specifications, training and transfer of technology.

B. EXPLANATION OF FINANCING

1. Reasons

In August, 1980, Eximbank issued a preliminary commitment offering to provide financing for a research reactor and related equipment and services. The preliminary commitment was issued on terms considered necessary to meet officially supported foreign competition. While the bulk of the research reactor was awarded to the Germans, a portion of the original project was awarded to General Atomic. Eximbank will finance the $9,448,000 portion of the pro-

posed transaction covered by its preliminary commitment on the terms provided therein but will finance the remainder under Eximbank's current terms resulting in the blended financing charges described in paragraph 2(a) below.

The procurement of the goods and the performance of the services will provide more than 84 man-years of employment for General Atomic's employees and its suppliers. Financing for the export of the services will provide employment in a sector where there are limited employment opportunities in the United States inasmuch as very few new nuclear reactors are being built here. Also, the financing permits General Atomic to keep its employees involved in a very important technological area so that they may maintain their skills and expertise.

2. The financing plan

The total cost of the U.S. goods and services to be exported from the United States for the project is estimated to be $17,448,000, which will be financed as follows:

	Amount	Percentage
Cash payment	$2,617,200	15
Supplier financing (without an Eximbank guarantee)	1,744,800	10
Eximbank credit	13,086,000	75
Total	17,448,000	100

(a) Eximbank Charges: The Eximbank credit will bear interest at the rate of 10.25 percent per annum, payable semi-annually. There will be a commitment fee of 0.5 percent per annum charged on the undisbursed portion of the Eximbank credit and a credit application fee of .92 percent of the amount of the Eximbank credit. In addition, the Supplier Financing to be provided by General Atomic will bear interest at the rate of 10.25 percent per annum.

(b) Repayment terms: Indebtedness incurred by the ROI under the Supplier Financing and the Eximbank credit will be repaid in twenty equal semiannual installments of principal beginning April 1, 1986. This date is six months after the estimated completion date of the facility. The Supplier financing will be repaid from the earlier installments and Eximbank will be repaid from the later installments.

Attached is additional information on Eximbank activity in and economic data on the Republic of Indonesia.

Sincerely,

WILLIAM H. DRAPER III.

Attachment.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. ALEXANDER (at the request of Mr. WRIGHT), for today, on account of illness in the family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. WHITTAKER) to revise and extend their remarks and include extraneous material:)

Mr. COLLINS of Texas, for 45 minutes, on December 16, 1982.

Mr. COLLINS of Texas, for 45 minutes, on December 17, 1982.

Mr. COURTER, for 60 minutes, on December 8, 1982.

Mr. CORCORAN, for 5 minutes, today.

(The following Members (at the request of Mr. RATCHFORD) to revise and extend their remarks and include extraneous material:)

Mr. STARK, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. D'AMOURS, for 5 minutes, today.

Mr. BIAGGI, for 30 minutes, on December 8, 1982.

Mr. ROSTENKOWSKI, for 60 minutes, on December 13, 1982.

Mr. BRINKLEY, for 60 minutes, on December 13, 1982.

(The following Member (at the request of Mr. HEFTEL) to revise and extend his remarks and include extraneous material:)

Mr. NEAL, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. DE LA GARZA, to extend his remarks in the RECORD and to include therein extraneous material, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,666.

Mr. BROWN of California, and to include extraneous matter in the body of the RECORD notwithstanding the fact that it exceeds two pages of the CONGRESSIONAL RECORD and is estimated by the Public Printer to cost $1,690.

Mr. DORNAN of California, and to include extraneous matter in the body of the RECORD on his special order of Thursday, December 2, 1982, notwithstanding the fact that it exceeds two pages of the CONGRESSIONAL RECORD and is estimated by the Public Printer to cost $4,950.

Mr. OBERSTAR, to revise and extend his remarks prior to vote on Addabbo amendment, H.R. 7355.

(The following Members (at the request of Mr. RATCHFORD) and to include extraneous matter:)

Mr. BAILEY of Pennsylvania.
Mr. MINISH.
Mr. FASCELL.
Mr. WEISS.
Mr. LAFALCE.
Mr. CLAY in three instances.
Mr. DINGELL in three instances.
Mrs. SCHROEDER.
Mr. MARKEY.
Mr. FAUNTROY.
Mr. CONYERS in two instances.
Mr. GARCIA.
Mr. DORGAN of North Dakota.
Mr. MILLER of California.
Mr. MOTTL in two instances.

(The following Members (at the request of Mr. WHITTAKER) and to include extraneous matter:)

Mr. CRAIG in two instances.
Mr. LUJAN in three instances.
Mr. LEWIS.
Mr. CONTE.
Mr. YOUNG of Florida.
Mr. CONABLE.
Mr. GILMAN in three instances.
Mr. CARMAN in two instances.
Mr. WINN.
Mr. BROWN of Ohio.
Mr. COLLINS of Texas.
Mr. GEJDENSON.

SENATE JOINT RESOLUTION REFERRED

A joint resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 244. Joint resolution designating January 17, 1983, as "Public Employees' Appreciation Day"; to the Committee on Post Office and Civil Service.

ADJOURNMENT

Mr. HEFTEL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 8 o'clock and 39 minutes p.m.) under its previous order, the House adjourned until Wednesday, December 8, 1982, at 2 p.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

5245. A letter from the Assistant Secretary of the Army (Installations, Logistics and Financial Management), transmitting notice of the Army's intention to move two chemical agent identification sets from Newark, Ohio, to Rocky Mountain Arsenal where the sets will be destroyed, pursuant to section 409(b)(4) of Public Law 91-121, as amended; to the Committee on Armed Services.

5246. A letter from the Secretary of the Navy, transmitting the required written report to accompany the notice of November 1, 1982, that a weapon system had exceeded the baseline unit cost by more than 25 percent, pursuant to section 917(b)(2) of Public Law 97-86; to the Committee on Armed Services.

5247. A letter from the Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the decision to convert to contractor performance the Naval Amphibious School, Little Creek, Va., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

5248. A letter from the Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the decision to convert to contractor performance the Naval Weapons Center, China Lake, Calif., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

5249. A letter from the Architect of the Capitol, transmitting the semiannual report on expenditures covering the period April 1, 1982, through September 30, 1982, pursuant to section 105(b) of Public Law 88-454, as amended; to the Committee on Appropriations.

5250. A letter from the Assistant Secretary for Congressional Relations, transmitting a report of political contributions of Ambassadors-to-be Edward Peck, Samual Hart, and John Holdridge and members of their families, pursuant to section 304(b)(2) of Public Law 96-465; to the Committee on Foreign Affairs.

5251. A letter from the Acting Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b(a); to the Committee on Foreign Affairs.

5252. A letter from the Secretary of Housing and Urban Development, transmitting a report on the activities of the Department's Inspector General covering the period ended September 30, 1982, pursuant to section 5(b) of Public Law 95-452; to the Committee on Government Operations.

5253. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to authorize settlement of a claim of the Shoalwater Bay Indian Tribal Organization; to the Committee on Interior and Insular Affairs.

5254. A letter from the Assistant Secretary of the Interior for Indian Affairs, transmitting a proposed plan for the use and distribution of the Hoopa Valley Tribe judgment funds awarded in Dockets Nos. 342-70 and 343-70 before the U.S. Court of Claims, pursuant to section 2(a) and 4 of Public Law 93-134; to the Committee on Interior and Insular Affairs.

5255. A letter from the Director, Minerals Management Service, Department of the Interior, transmitting notice of the proposed refund of $80,666.35 to Shell Oil Co., Mobil Oil Corp., Union Oil Co. of California, and Arco Oil & Gas Co., for excess royalty payment, pursuant to section 10(b) of the Outer Continental Shelf Lands Act of 1953; to the Committee on Interior and Insular Affairs.

5256. A letter from the Assistant Attorney General (Antitrust Division), transmitting a report on competition in the coal industry, pursuant to 30 U.S.C 208(2); to the Committee on Interior and Insular Affairs.

5257. A letter form the Deputy Assistant Secretary of the Interior for Indian Affairs, transmitting a report on cancellations and adjustments of reimbursable charges of the Government of the United States existing as debts against individual Indians or tribes of Indians during fiscal year 1982, pursuant to the act of July 1, 1982; to the Committee on Interior and Insular Affairs.

5258. A letter from the Administrator, Federal Aviation Administration, transmitting a report on the "National Airspace System Plan," pursuant to section 504 of Public Law 97-248; to the Committee on Public Works and Transportation.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BONIOR of Michigan: Committee on Rules. House Resolution 622. A resolution providing for the consideration of H.R. 5133, a bill to establish domestic content requirements for motor vehicles sold in the United States, and for other purposes (Rept. No. 97-946). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. WRIGHT (for himself and Mr. FROST):

H.R. 7377. A bill to designate the Lakeview Lake project, Mountain Creek, Tex., as the "Joe Pool Lake"; to the Committee on Public Works.

By Mr. RODINO:

H.R. 7378. A bill to codify without substantive change recent laws related to money and finance and to improve the United States Code; to the Committee on the Judiciary.

By Mr. CORCORAN:

H.R. 7379. A bill to establish new import prices for natural gas and liquefied natural gas authorized by the Department of Energy to be imported to the United States pursuant to section 3 of the Natural Gas Act, and for other purposes; to the Committee on Energy and Commerce.

By Mr. ST GERMAIN:

H.R. 7380. A bill to repeal sections 301 through 308 of the Tax Equity and Fiscal Responsibility Act of 1982, which impose withholding on interest and dividends; to the Committee on Ways and Means.

By Mr. SEIBERLING:

H.R. 7381. A bill to amend title II of the Social Security Act and the Internal Revenue Code of 1954 to exclude from wages, for purposes of computing benefits and taxes under the old-age, survivors, and disability insurance program, the quarterly cash remuneration for the services of a domestic employee in a private home of the employer if such quarterly cash remuneration is less than $200 or the employee has not attained age 19 before the beginning of the quarter; to the Committee on Ways and Means.

By Mr. STARK:

H.R. 7382. A bill to amend the Internal Revenue Code of 1954 to expand the circumstances where relief from liability for income tax (and penalties and interest with respect thereto) is provided to a spouse for a deficiency with respect to a joint return, and to provide similar relief with respect to certain separate returns of married individuals; to the Committee on Ways and Means.

By Mr. GINGRICH:

H. Res. 621. Resolution to amend the Rules of the House of Representatives to establish an Office for the Bicentennial of the House of Representatives; to the Committee on Rules.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 4070: Mr. JEFFORDS.

H.R. 4147: Mr. FOWLER.

H.R. 4588: Mr. ADDABBO, Mr. BEILENSON, Mr. BROWN of California, Ms. FERRARO, Mr. FORD of Tennessee, Mr. GREEN, Mr. HANCE, Mrs. HECKLER, Mr. LEBOUTILLIER, Mr. MARTINEZ, Mrs. SCHNEIDER, Mr. STOKES, Mr. UDALL, Mr. WALKER, and Mr. ZEFERETTI.

H.R. 5422: Mr. HOWARD.

H.R. 6928: Mr. DELLUMS, Mr. ADDABBO, and Mr. BAFALIS.

H.R. 6950: Mr. DENARDIS, Mr. BAILEY of Pennsylvania, and Mr. WASHINGTON.

H.R. 6983: Mr. JACOBS.

H.R. 7041: Mr. GINGRICH, Mr. BARNARD, Mr. HUTTO, Mr. KOGOVSEK, Mr. EDWARDS of Oklahoma, Mr. BLILEY, and Mr. DAN DANIEL.

H.R. 7066: Mr. FAZIO and Mr. WHITEHURST.

H.R. 7305: Mr. BONER of Tennessee.

H.R. 7314: Mr. HENDON and Mr. MCHUGH.

H.R. 7323: Mr. DYMALLY, Mr. GILMAN, and Mr. DORGAN of North Dakota.

H.R. 7361: Mr. HOYER.

H.J. Res. 532: Mr. SIMON, Mr. WALGREN, Mr. MINETA, Mrs. BOUQUARD, Mr. PETRI, Mr. EMERSON, Mr. HOWARD, Mr. EDGAR, Mr. NELLIGAN, Mr. HOYER, Mr. ST GERMAIN, Mr. MOAKLEY, Mr. ANDERSON, Mr. SHUMWAY, Mr. GREEN, Mrs. HECKLER, Mr. MAVROULES, Mr. ROTH, Mr. WIRTH, Mr. GILMAN, Mr. CORCORAN, and Mr. APPLEGATE.

H.J. Res. 591: Mr. BREAUX, Mr. BURGENER, Mr. DIXON, Mr. ERDAHL, Mr. HANSEN of Idaho, Mr. HILER, Mr. LOWERY of California, and Mr. MYERS.

H.J. Res. 592: Mr. KEMP.

H.J. Res. 627: Mr. GLICKMAN and Mr. MINETA.

H. Con. Res. 401: Mr. BIAGGI, Mr. LOWRY of Washington, Mr. MAVROULES, Mr. BEDELL, Mr. MINETA, Mr. ROE, Mr. PANETTA, Mrs. KENNELLY, Mr. FOGLIETTA, Mr. STUDDS, Mr. NOWAK, Mr. GILMAN, Mr. MARTINEZ, Mr. SHAW, and Mr. WASHINGTON.

H. Con. Res. 413: Mr. KEMP, Mr. FROST, Mrs. HOLT, Mr. BADHAM, Mr. MURPHY, Mr. COATS, Mr. WILSON, Mr. RATCHFORD, Mr. WAXMAN, Mr. BEREUTER, and Mr. SOLOMON.

H. Res. 424: Mr. ASPIN, Mr. BARNARD, Mr. BONKER, Mr. BRODHEAD, Mr. CROCKETT, Mr. FORD of Tennessee, Mrs. HECKLER, Mr. HERTEL, Mr. HOWARD, Mr. HUBBARD, Mr. KASTENMEIER, Mr. MATSUI, Mr. MCHUGH, Mr. OBERSTAR, Mr. PEASE, Mr. ROSENTHAL, Mr. SIMON, Mrs. SNOWE, Mr. WEISS, and Mr. DORNAN of California.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

670. By the SPEAKER: Petition of the International Union—UAW, Region 4, Detroit, Mich., relative to H.R. 5133 and S. 2300—fair practices in automotive products; to the Committee on Energy and Commerce.

671. Also, petition of the National Association of State Auditors, Comptrollers and Treasurers, Nashville, Tenn., relative to repeal of sections 215 and 204(B) of the Tax Equity and Fiscal Responsibility Act of 1982; to the Committee on Ways and Means.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 5133

By Mr. FRENZEL:

—Page 14, redesignate section 7 as section 8 and insert after line 11 the following new section:

SEC. 7. WAIVER FOR GATT.

(a) IN GENERAL.—The President may suspend the implementation of sections 1 through 6 upon a finding by the President that the implementation of such sections would violate the obligations of the United States under the General Agreement on Tariffs and Trade.

(b) NOTICE TO CONGRESS.—The President shall transmit to the House of Representatives and the Senate any findings made by the President that the implementation of sections 1 through 6 would violate the obligations of the United States under the General Agreement on Tariffs and Trade.

—Page 15, redesignate section 8 as section 9.

H.R. 7145

By Mr. CONYERS:

—Page 5, line 11, strike out "$4,454,740,000," and insert in lieu thereof "$2,709,890,000," and on line 12 immediately before the period insert the following ": *Provided*, That none of the funds appropriated or otherwise made available under this paragraph may be obligated or expended for the production of additional fissionable materials, or for the assembly or testing of new warheads."

—Page 5, line 24, strike out "$1,306,841,000," and insert in lieu thereof "$818,741,000" and on line 25, immediately before the period insert the following ": *Provided*, That none of the funds appropriated or otherwise made available in this paragraph may be obligated or expended to increase existing production capacity."

By Mr. CONTE:

—On page 14, line 5, delete "$1,244,857,000" and insert "$1,243,857,000" in lieu thereof;

On page 22, after line 3, insert the following new section:

SEC. . None of the funds appropriated in this Act shall be used for construction of the Manteo (Shallowbag) Bay Project in North Carolina.

H.R. 7355

By Mr. GREEN:

—Page 73, after line 16, insert the following new section:

SEC. 794. Notwithstanding the appropriations made by titles IV and V, such appropriations shall be reduced by $5,250,000,000 (in addition to the reduction required by section 790). In addition, of the appropriations made by titles IV and V, $1,750,000,000 shall be transferred to operation and maintenance accounts under title III. In order to comply with the reductions and transfers made by the preceding sentences, no reduction shall be made in amounts available for spare parts, repair parts, or ammunition.

By Mr. HARKIN:

—Page 73, immediately after line 16, insert the following new sentence:

SEC. 794. None of the funds provided in this Act may be used by the Central Intelligence Agency or the Department of Defense to furnish military equipment, military training or advice, or other support for military activities, to any group or individual, not part of a country's armed forces, for the purpose of assisting that group or individual in carrying out military activities in or against Nicaragua.

H.R. 7357

By Mr. EDWARDS of California:

—Page 18, after line 23, insert the following new subsection:

(c) Section 287 of the Immigration and Nationality Act (8 U.S.C. 1357) is amended by adding at the end thereof the following new subsection:

"(d) Notwithstanding any other provision of this section, other than paragraph (3) subsection (a), an officer or employee of the Service shall not enter without the consent of the owner (or agent thereof) or a properly executed warrant onto the premises of a farm or other outdoor operation for the purpose of interrogating a person believed to be an alien as to the person's right to be or to remain in the United States.".

By Mr. PEYSER:

—Page 37, line 11, strike out the close quotation mark and the period following and add after that line the following new subsection:

"(e) Notwithstanding the laws of any State or any judicial decree of any court of any State but subject to section 241, no person who has been granted asylum under this section may be involuntarily removed from the United States.".

Page 37, line 9, strike out "subsection" and insert in lieu thereof "subsections".

By Mr. WEISS:

—Page 59, after line 6, insert the following new subsection:

(d) Section 212(d)(1) (8 U.S.C. 1182(d)(1)) is amended by striking out "(11) and (25)" and inserting in lieu thereof "(11), (25), and (28)".

—Page 57, after line 18, insert the following new section (and redesignate the succeeding section, and conform the table of contents, accordingly):

MODIFICATION OF CERTAIN GROUNDS FOR EXCLUSION

SEC. 204. (a)(1) Paragraph (13) of section 212(a) (8 U.S.C. 1182(a)) is repealed.

(2) Paragraph (28) of such section is amended—

(A) by striking out subparagraphs (A) through (E),

(B) in subparagraph (G)—

(i) by striking out "advocating or teaching opposition to all organized government, or" before clause (i), and

(ii) by striking out "or (v)" and all that follows through "dictatorship;"

(C) by striking out "paragraph (G)" in subparagraph (H) and inserting in lieu thereof "subparagraph (B)",

(D) by striking out "subparagraphs (B), (C), (E), (F), (G), and (H)" in subparagraph (I) and inserting in lieu thereof "subparagraphs (A), (B), and (C)", and

(E) by redesignating subparagraphs (F), (G), (H), and (I), as subparagraphs (A), (B), (C), and (D), respectively.

(3) Paragraph (29) of such section is amended—

(A) by inserting "or" after "security,", and

(B) by striking out ", or (C)" and all that follows through "1950".

(b)(1) Paragraph (6) of section 241(a) (8 U.S.C. 1251(a)) is amended—

(A) by striking out subparagraphs (A) through (E),

(B) in subparagraph (G)—

(i) by striking out "advocating or teaching opposition to all organized government, or" before clause (i), and

(ii) by striking out "or (v)" and all that follows through "dictatorship;",

(C) by striking out "paragraph (G)" in subparagraph (H) and inserting in lieu thereof "subparagraph (B)", and

(E) by redesignating subparagraphs (F), (G), and (H), as subparagraphs (A), (B), and (C), respectively.

(2) Paragraph (7) of such section is amended by striking out ", unless" and all that follows up to the semicolon.

SENATE—*Tuesday, December 7, 1982*

(Legislative day of Tuesday, November 30, 1982)

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

*Blessed is the nation whose God is the Lord, the people he chose for his inheritance * * *. The eyes of the Lord are on those who fear him, on those whose hope is in his unfailing love.*—Psalm 33: 12, 18 (N.I.V.)

Our Father who art in Heaven, strengthen the Senators against confusion and indifference and frustration. In this seriously critical hour of our national welfare, help them to resist the pervasive ambivalence and apathy which shrouds this place like fog. Forgive the cynicism, the doubt, the tentativeness that mocks constructive action. Help them to realize they are not alone, that God is present and He can elevate these days to significant achievement. Grant to the Senators, individually and collectively, the will to resist a negative, destructive spirit and help them to make these last hours of the 97th Congress ones to be remembered and honored. We pray this in the name of Him whose wisdom and power and love are available to all who seek Him. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

SENATE AGENDA

Mr. BAKER. Mr. President, I believe I am correct in saying that after the recognition of the two leaders under the standing order there is already an order entered for a period for the transaction of routine morning business to extend not past the hour of 12 noon. Is that correct?

The PRESIDENT pro tempore. That is correct.

Mr. BAKER. At 12 noon, is there not already an order for the Senate to stand in recess until the hour of 2 p.m. in order to accommodate the requirement that Senators on both sides of the aisle may attend caucuses of an official nature off the floor of the Senate?

The PRESIDENT pro tempore. The leader is correct.

Mr. BAKER. Mr. President, at 2 p.m., under the order previously entered, the Senate will vote on the Poland resolution, on which the yeas and nays were ordered yesterday. No further action on that resolution may be taken except for final passage and vote.

After that, Mr. President, it is the expectation of the leadership that the Senate will be asked to turn to the consideration of the D.C. appropriations bill. Radio Marti will recur as the pending business. It is hoped that today we can complete action on Radio Marti; the D.C. appropriations bill; S. 2000, the bankruptcy bill; and perhaps H.R. 1524, the California utilities bill. That is a great deal to expect for one day, but there is a very great shortage of time between now and the time we adjourn sine die.

I repeat what I indicated on yesterday, Mr. President, that Members should be on notice of the possibility of a late session any evening and the possibility of a Saturday session.

Mr. President, I believe I have no further need for my time under the standing order. I see no Senator seeking recognition. I offer the remaining time to the minority leader if he wishes.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER (Mr. DANFORTH). The minority leader is recognized.

Mr. ROBERT C. BYRD. Mr. President, I thank the majority leader.

POLISH SOLIDARITY DAY

Mr. ROBERT C. BYRD. Mr. President, December 13, 1982, will mark the first anniversary of the brutal military crackdown in Poland, aimed at smashing the solidarity labor union movement in that country. The imposition of martial law by a military dictatorship exposed, for all the world to see, the transparencies of Marxist-Leninist regimes who are fearful of their own populations.

One only has to recall that solidarity began as a small, almost obscure, union in the shipyards of Gdansk. It had grown to encompass more than 10 million industrial workers from the coal miners of Silesia to the factory workers in nearly all the major cities of Poland. It had even spread to the rural areas, where the normally docile peasant farmers began organizing their own solidarity unions.

The emergence of solidarity in Poland represented a threat to the Soviet leadership. Poland a year ago was not Hungary of 1956, which the Soviets invaded to suppress a revolt of intellectuals and students. Poland a year ago was not Czechoslovakia of 1968, where Soviet tanks were used to roll back the liberalization of the "Prague Spring." Poland a year ago was not Afghanistan, a neutral, third world country for which the Soviets have always had imperialist designs.

The Poland of a year ago was a Poland comprised of 10 million industrial workers and peasants who wanted a greater voice in the running of their unions and a greater voice in controlling their own destinies. And this created a dilemma for the Soviets. It was one thing to turn guns on students and intellectuals. It would be quite another to turn guns on the proletariat, the so-called foundation of the Communist state.

Faced with this dilemma, the Soviets turned to the Polish generals. Either General Jaruzelski was to crack down on the Polish people or the Soviets would intervene and do so themselves. General Jaruzelski imposed a military dictatorship, solidarity was banned and its courageous leader, Lech Walesa, was imprisoned, and the Polish people were once again relegated to facing the grim reality of a corrupt and repressive government.

Mr. President, as a cosponsor of Senate Resolution 501, I believe it represents the strong sentiments and concerns of all Americans. I believe it is appropriate to set aside December 12 as a demonstration of our solidarity with the people of Poland.

S. 3081—WEST VIRGINIA FEDERAL JUDICIARY IMPROVEMENT ACT

Mr. ROBERT C. BYRD. Mr. President, I am introducing legislation to improve and facilitate the administration of justice in the Federal judiciary in my home State of West Virginia. In recent years, the judiciary has been increasingly burdened in West Virginia by a disparity of caseloads between the northern and southern districts; by the retention of a "swing" judgeship position which must serve the entire State, although Judge Haden, who serves in that position, is also the

chief judge for the southern district; and by the inclusion of several counties in each of the districts that would be better included, because of the region's geography, in the State's other judicial district.

In brief, the bill which I am introducing would transfer Wood and Wirt Counties to the southern district, with Braxton, Webster, and Pocahontas Counties being shifted to the northern district. The "swing" judge's designation would be eliminated, with Chief Judge Haden being permanently located in the south. Judge Kidd would be transferred from the southern to the northern district, and the temporary judgeship would be abolished.

This change will not cost the Federal Government any additional money. The southern district will be reduced from 4½ to 4 judges, and the northern district will be increased from 1½ to 2.

The judicial caseload for the northern district has greatly increased in recent years. The Statistical Analysis and Reports Division of the Administrative Office of the U.S. Courts issued a judicial workload profile for the year ending June 30, 1982, in which the northern district for West Virginia was ranked as 15th in the Nation in the total number of civil filings. There has been a 24-percent increase in the court's caseload in the past 5 years, and the current caseload of 1,233 cases is 12.6 percent larger than in the previous year. This formidable burden has been shouldered by 1½ judges.

The bill that I am introducing is supported by the Federal District Court judges in the State, by the Circuit Council for the 4th Judicial Circuit, and was initiated by Chief Judge Charles A. Moye, Jr., chairman of the Subcommittee on Judicial Statistics of the Committee on Court Administration of the Judicial Conference. I believe that this bill will alleviate the difficult situation that exists in my State, and I commend it to my colleagues for their favorable consideration.

Mr. President, I ask unanimous consent that the bill be introduced under the joint cosponsorship of myself and my senior colleague (Mr. RANDOLPH).

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 3081

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 129 of title 28, United States Code, is amended—

(1) in subsection (a) by—

(A) striking out ", Wirt, and Wood";

(B) inserting "Braxton," after "Berkeley,";

(C) inserting "Pocahontas" after "Pleasants,"; and

(D) inserting "Webster, and" after "Upshur"; and

(2) in subsection (b) by—

(A) striking out "Braxton,", "Pocahontas," and "Webster,"; and

(B) inserting "Wirt, Wood," after "Wayne,".

SEC. 2. (a) The existing district judgeship for the Southern District of West Virginia, authorized by section 2 of the Act entitled "An Act to provide for the appointment of additional district and circuit judges and for other purposes", approved October 20, 1978, (92 Stat. 1632; 28 U.S.C. 133 note) shall, as of the date of enactment of this Act, be authorized under section 133 of title 28 of the United States Code as a district judgeship for the Northern District of West Virginia, and the incumbent of that office shall henceforth hold office under section 133, as amended by this Act.

(b) The existing district judgeship for the Northern and Southern Districts of West Virginia shall be authorized as the district judgeship for the Southern District.

SEC. 3. The table in section 133 of title 28, United States Code, is amended by striking out the following:

"West Virginia:	
"Northern	1
"Southern	3
"Northern and Southern	1",

and inserting in lieu thereof the following:

"West Virginia:	
"Northern	2
"Southern	4".

Mr. ROBERT C. BYRD. Mr. President, I have no need for additional time. I yield 4 minutes of the time allocated to me to the distinguished Senator from Wisconsin.

The PRESIDING OFFICER. The Senator from Wisconsin.

MILITARY STRENGTH

Mr. PROXMIRE. Mr. President, we get advice from all kinds of sources about our Federal policies and the policies we should follow in the Senate. One of the least likely appeared on Sunday in the comic strips in a comic panel on Beetle Bailey by Mort Walker. I think the advice that Mort Walker gives us through Beetle Bailey is not only interesting but very timely.

The first panel shows the general, General Halftrack, I think is his name, saying, "I'm not sure the Government is doing the right thing." The major says, "What's it doing now?" General Halftrack says, "It cut Federal money to schools * * * it cut money to libraries * * * " The major says, "Where's the money going?" General Halftrack says, "To us!"—that is, to the Pentagon.

The major says, "Is that bad?" And the general says, "That's what I was wondering."

Then he looks at what he has—the sergeant and Beatle Bailey and Zero and the other character who is not as bright or intelligent or informed as he might be. The general says, "Money won't help them, but schools and libraries might."

Well, Mr. President, I think probably more millions of Americans saw that comic strip than read any editorial on Sunday. I think some of them might have nodded their heads and said, "Well, there is something to that."

The Congress has its priorities confused. The Congress and the President should remember that we build military strength—military strength, I am talking about—through schools and libraries and education, as well as through having a strong military force.

I think this is a neat and simple and dramatic way of demonstrating that.

Incidentally, on the same day, the distinguished chairman of the Appropriations Committee, Senator MARK HATFIELD, appeared on "Meet the Press" and made very much the same point. He made it extremely well. I intended to call the attention of the Senate to that later on, when the transcript becomes available of Chairman HATFIELD's appearance, because it was a masterful performance on the part of Senator HATFIELD.

One of the points the chairman of the Senate Appropriations Committee made is that we should not measure our military strength strictly on the basis of our procurement or on the size of our military force or on how much money we spend, but we should also measure it in our economic terms and in our productivity and in our education and in the capability of our citizens to understand national policy and to support national policy.

DECAPITATION: AN EXPLOSIVE NUCLEAR STRATEGY

Mr. PROXMIRE. Mr. President, in the New York Times of November 2, 1982, Arthur Macy Cox makes a cogent case against the Reagan administration's defense policy, which he thinks will "substantially increase the risk of nuclear holocaust."

Last May, Secretary of Defense Caspar Weinberger signed into effect a new defense guidance doctrine, which is to be implemented over the next 5 years. The principal intent of this doctrine is to develop the capacity to decapitate the Soviet Union in a first-strike nuclear attack. This term means that we would destroy the Soviet leadership and the communications network that regulates their nuclear weapons in a first-strike nuclear attack, thus making a counterattack impossible and winning a nuclear war. The decapitation strategy calls for an array of stunningly powerful and expensive first-strike nuclear weapons, such as the MX missile, the Trident II submarine, and the Pershing II missile.

Cox urges us to consider the implications of such an approach. Most important is that it departs from our previous defense policy of deterrence, which seeks to prevent, rather than prepare for nuclear war. Deterrence is based on the premise that neither the United States or U.S.S.R. could hope to win a nuclear war if both nations possessed an adequate second-strike force. Therefore, the defense needs of the United States could be met by a survivable second-strike force.

Changing from a nuclear strategy from deterrence to decapitation, then, would significantly increase our military expenditures. Even more important, Cox argues, is that it would create enormous tension between our Nation and the Soviet Union. The tension that exists between us now would look miniscule in comparison to a situation where both superpowers are on constant edge, in fear of a surprise nuclear attack. We would both be forced to adopt a policy of "launch on warning," which is hardly a recipe for peaceful coexistence. Moreover, the chances for an accidental unleashing of nuclear weapons would be much greater.

Cox concludes by recommending that we abolish the decapitation nuclear strategy, and return to the nonagressive policy of deterrence. Deterrence would not only be less costly, but may be much more in line with our highest national priority: survival.

I ask unanimous consent that the Cox article from the New York Times be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Nov. 2, 1982]

WRONG DIRECTION IN NUCLEAR STRATEGY

(By Arthur Macy Cox)

WASHINGTON.—The Reagan Administration is pursuing a nuclear strategy that reverses the policies of every President since Dwight D. Eisenhower—policies that have avoided nuclear war for 37 years. Since the 1950's United States policy has stressed the importance of deterring nuclear war, promoting nuclear stability and reducing the possibility of accidental or unintentional nuclear war. Today, the Reagan Administration is moving rapidly in the opposite direction. The new Reagan policies, if carried out, will substantially increase the risk of nuclear holocaust.

Last week, President Leonid I. Brezhnev, speaking to Soviet military leaders, referred to "Washington's aggressive policy, which is threatening to push the world into the flames of nuclear war." Mr. Brezhnev's remarks cannot be dismissed as merely another dramatic flourish of anti-American propaganda. They are an aggressive response to an aggressive new United States policy and the very real weapons that the United States plans to deploy to carry out that policy.

This May, Secretary of Defense Caspar W. Weinberger signed a five-year "Defense Guidance" that calls for adoption of a nuclear war strategy based on creating the weapons necessary to "decapitate" the Soviet state. That means deploying nuclear weapons so accurate, so powerful and so fast on target that they could destroy the Soviet civilian and military leadership even in underground bunkers protected by stone and steel. They would also be able to destroy Soviet communications systems that control the ability to launch nuclear weapons.

When we have deployed the first-strike weapons capable of "decapitating" the Soviet state we will have the theoretical possibility of launching a surprise attack and "winning" a nuclear war. If the Soviet leaders and the communications systems required to launch nuclear weapons were destroyed, there would theoretically be no Soviet nuclear counterattack against the United States.

Until now the theory of deterrence has been based on the shared knowledge that any nuclear attack would be suicidal because both sides had an assured second-strike capacity to destroy the other. The ability to "decapitate with a first strike would change everything. Not wanting to be decapitated, the Soviet Union would move to a policy of launch on warning. The nuclear arms race would spiral out of control. Both sides, fearing surprise attack, would be on constant hair-trigger alert, increasing the probability of the accidential launching of nuclear weapons.

Even so, the Reagan Administration is pressing ahead to build and deploy first-strike weapons. The Pershing 2, scheduled for deployment in Germany early in 1984, is a first-strike weapon that will be able to reach its targets in the Soviet Union in six minutes. The MX is a first-strike weapon and the Trident II (D-5) submarine-launched missile is a first-strike weapon. First-strike weapons run counter to all principles of deterrence. They make unintentional nuclear war more likely.

We have no requirement for a weapon as accurate, powerful and fast as the MX will be. The existing Minuteman III missiles have been modernized with Mark 12-A warheads that are more accurate than the warheads on the best Soviet missiles—the SS-18's and the SS-19's. If there is a requirement for a less vulnerable basic system for our ICBM's, we should try to deal with that problem, but this does not mean, at the same time, a requirement for a first-strike weapon such as the MX.

The Trident II (D-5) submarine-launched missile is also a surprise-attack weapon. The accuracy, power and speed of that missile's warheads will be destabilizing. The Trident I missile on the Poseidon and Trident submarines is a powerful deterrent, but it is not accurate enough or fast enough to be a "decapitation" weapon. We have ample deterrence without first-strike weapons. For example, our strategic bombers will soon be equipped with long-range cruise missiles, which, though very accurate, are very slow. Bombers can always be turned back as well. They are not first-strike weapons.

What this means is that we should change course. We should reject the policy of "decapitation" and the building and deployment of first-strike weapons. We should return to the promotion of nuclear stability and deterrence with emphasis on reducing the possibility of unintentional or accidental launch of nuclear weapons.

We should return, also, to genuine arms control negotiations with the Soviet Union, giving priority to a ban on first-strike weapons, a comprehensive test ban, and a ban on antisatellite weapons and other military uses of space. These measures will provide a more stable framework for drastically reducing existing nuclear arsenals on an equal and verifiable basis.

POTENTIAL FOR GENOCIDE STILL EXISTS

Mr. PROXMIRE. Mr. President, since 1967 I have daily urged the Senate to ratify the Convention of the Prevention and Punishment of Genocide. Today, once again, I should like to call on the United States to join with over 80 other nations in officially condemning genocide.

Although the Genocide Convention was initially drawn up in response to the Nazis' Holocaust, the need for the treaty is still very real. Widespread violations of human rights and the continual use of violence to resolve social and political disputes remind us that the potential for genocide still exists in the world today.

For example, recently Survival International, U.S.A., a group dedicated to advancing the rights of indigenous peoples, issued a report describing the political situation in Guatemala. According to the report, written by Craig W. Nelson and Kenneth I. Taylor, Guatemalan Indian communities are the targets of Gen. Rios Montt's counterinsurgency program. The authors say that the program not only has contributed to the deaths of many members of the Indian population, but, also has reportedly affected the Indians' expression of their national culture.

Mr. President, while a clear understanding of the situation in Guatemala is difficult to obtain, reports such as this remind us that the potential for genocide still exists in the world, many years after the Nazis' Holocaust. The Genocide Convention makes the act of genocide an international crime and once again, I urge my colleagues to give this treaty favorable consideration.

TRENDS IN CONVENTIONAL ARMS TRANSFER TO THE THIRD WORLD BY MAJOR SUPPLIER 1974-81

Mr. PROXMIRE. Mr. President, the volume of arms deliveries abroad does not necessarily determine relative military advantage or increase in political influence. One need only to recall the billions of rubles the Soviet Union invested in Egypt only to find that a new government turned to the West for diplomatic and economic support. In Africa, Somalia, and Ethiopia have changed sides in terms of arms suppliers, with a startling degree of quickness. Furthermore, arms are sometimes used up or depleted in warfare such as that between India and Pakistan where U.S. equipment was used on both sides.

In addition, arms delivery statistics tell us little about the sophistication of the weapons or their impact on the regional balance of power. Nor do they allow us to determine if these weapons are being used solely for self protection.

Standing by themselves, statistics are signposts—giving an indication of velocity and change of direction but telling us nothing about the consequences of arms deliveries.

Arms sales are justified by a wide array of intellectual arguments. They are considered national security sales. They are important for reasons of employment in the aerospace industry. They are thought to be elements of U.S. influence abroad. If we do not sell, then someone else will. Sales support democracies against hostile neighbors.

All of these arguments are commonly heard. Sometimes they were accurate. And just as often they are not. Sales can backfire—for example the Iranian situation when our most sophisticated air-to-air missile was compromised as well as the technical details of our F-14 aircraft. Arms sales stimulate regional arms races as can be seen in Latin America; between India and Pakistan; and in the Middle East. Arms are used for repression of local populations or for wars of aggression against neighbors. They complicate diplomatic relations as in the example of the People's Republic of China and the Republic of China.

While it is comforting to say that arms keep the peace, we know from hundreds of years of history that arms are used. Every major weapon system developed by mankind, including biological warefare, chemical warfare, and nuclear weapons, has been used in combat.

The more the nations of the world sell weapons to the Third World, the higher the intensity of battle will become, the greater the likelihood of widespread war, and the greater the drain on scarce resources.

Weapons are the international heroin of the Third World. Nations start out with a tantalizing taste and soon become hooked on an ever more rich diet until the demand outstrips the resources for fulfillment.

Mr. President, I ask unanimous consent that the remaining tables from the Congressional Research Service report on Trends in Conventional Arms Transfers to the Third World by Major Supplier be printed in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

TABLE 3.—NUMBERS OF WEAPONS DELIVERED BY MAJOR SUPPLIERS TO THE THIRD WORLD [1]

Weapons category	United States	U.S.S.R.	Major Western European [2]
1974–77			
Tanks and self-propelled guns	3,881	4,595	1,215
Artillery	3,123	7,375	1,260

DESCRIPTION OF ITEMS COUNTED IN WEAPONS CATEGORIES, 1974–81

Tanks and self-propelled guns.—Light, medium and heavy tanks; self-propelled artillery; and self-propelled assault guns.

Artillery.—Field and air defense artillery, mortars, rocket launchers, and recoilless rifles—100 mm. and over; FROG launchers—100 mm. and over.

Armored personnel carrier (APC's) and armored cars.—Personnel carriers, armored and amphibious; armored infantry fighting vehicles; and armored reconnaissance and command vehicles.

Major surface combatants.—Aircraft carriers, cruisers, destroyers, frigates.

Minor surface combatants.—Minesweepers, subchasers, motor torpedo boats; and patrol craft, motor gunboats.

Submarines.—All submarines, including midget submarines.

Guided missile patrol boats.—All boats in this class.

Supersonic combat aircraft.—All fighters and bombers designed to function operationally at speeds above Mach 1.

Subsonic combat aircraft.—All fighters and bombers, including propeller driven, designed to function operationally at speeds below Mach 1.

Other aircraft.—All other fixed-wing aircraft, including trainers, transports, reconnaissance aircraft, and communications/utility aircraft.

Helicopters.—All helicopters, including combat and transport.

Surface-to-air missiles (SAM's).—All air defense missiles, excluding those which are shoulder-fired.

NATIONS IN REGIONS IDENTIFIED IN ARMS DELIVERY TABLES AND CHARTS

EAST ASIA AND PACIFIC

Australia, Brunei, Burma, China, Fiji, French Polynesia, Gilbert Islands, Hong Kong, Indonesia, Japan, Kampuchea (Cambodia), North Korea, North Vietnam, Laos, Macao, Malaysia, Nauru, New Caledonia, New Hebrides, New Zealands, Norfolk Islands, Papua New Guinea, Philippines, Pitcairn, Singapore, Solomon Islands, South Korea, South Vietnam, Taiwan, Thailand, and Western Somoa.

NEAR EAST AND SOUTH ASIA

Afghanistan, Algeria, Bahrain, Bangladesh, Egypt, India, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Libya, Morocco, Nepal, North Yemen (Sana), Oman, Pakistan, Qatar, Saudi Arabia, South Yemen (Aden), Sri Lanka, Syria, Tunisia, and United Arab Emirates.

EUROPE

Albania, Austria, Bulgaria, Belgium, Canada, Czechoslovakia, Cyprus, Denmark, Finland, France, Germany, Democratic Republic; Germany, Federal Republic; Greece, Hungary, Iceland, Ireland, Italy, Liechtenstein, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Spain, Sweden, Switzerland, Turkey, United Kingdom, U.S.S.R., and Yugoslavia.

AFRICA (SUB-SAHARAN)

Angola, Benin, Botswana, Burundi, Cameroon, Cape Verde, Central African Empire/Republic, Chad, Congo, Djibouti, Equatorial Guinea, Ethiopia, Gabon, Gambia, Ghana, Guinea, Guinea-Bissau, Ivory Coast, Kenya, Lesotho, Liberia, Madagascar, Malawi;

Mali, Mauritania, Mauritius, Mozambique, Niger, Nigeria, Reunion, Rwanda, Senegal, Seychelles, Sierra Leone, Somalia, South Africa, St. Helena, Sudan, Swaziland, Tanzania, Togo, Uganda, Upper Volta, Zaire, Zanbia, and Zimbawe.

LATIN AMERICA

Antigua, Argentina, Bahamas, Barbados, Belize, Bermuda, Bolivia, Brazil, British Virgin Islands, Cayman Islands, Chile, Colombia, Costa Rica, Cuba, Dominica, Dominican Republic, Ecuador, El Salvador, Falkland Islands, French Guiana, Grenada, Guadeloupe, Guatemala;

Guyana, Haiti, Honduras, Jamaica, Martinique, Mexico, Monteserrat, Netherlands Antilles, Nicaragua, Panama, Paraguay, Peru, St. Christ-Nevis, St. Lucia, St. Pierre and Miquelon, St. Vincent, Suriname, Trinidad-Tobago, Turks and Caicos, Uruguay, and Venezuela.

Mr. PROXMIRE. Mr. President, I thank the minority leader and I yield the floor.

Mr. ROBERT C. BYRD. Mr. President, I yield back the remainder of my time.

Mr. BAKER. Mr. President, I have no further need for time. I believe at the conclusion of this time there is an order for a period for the transaction of routine morning business.

The PRESIDING OFFICER. The leader is correct.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business, not to extend beyond the hour of 12 noon, with statements therein limited to 5 minutes each.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

TIME LIMITATION AGREEMENT—H.R. 7144

Mr. BAKER. Mr. President, my staff advises me that the request I am about to put has been agreed to on this side of the aisle. I will state it now for the consideration of the distinguished minority leader.

Mr. President, I ask unanimous consent that at 3 p.m. today the Senate turn to the consideration of Calendar No. 951, H.R. 7144, the D.C. appropriations bill, and that it be considered under the following time limitation agreement: 30 minutes on the bill to be equally divided between the chairman of the Appropriations Committee and the ranking minority member or their designees; 2 hours on an amendment to be offered by the Senator from Missouri (Mr. EAGLETON) dealing with the D.C. Convention Center; 20 minutes on any remaining first degree amendments; 10 minutes on second degree amendments; 5 minutes on any debatable motions, appeals, or points of order, if so submitted to the Senate; and that the agreement be in the usual form with respect to division and control of time.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, we have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, at 2 p.m. or shortly thereafter, when the roll-call vote is concluded on the Poland resolution, what will be the business before the Senate? Will Radio Marti recur as the pending business?

The PRESIDING OFFICER. It will recur automatically.

Mr. BAKER. I thank the Chair.

SENATE JOINT RESOLUTION 270—TO DESIGNATE 1983 AS THE BICENTENNIAL OF AIR AND SPACE FLIGHT

Mr. MATHIAS. Mr. President, I sent a joint resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the joint resolution?

Mr. MATHIAS. Mr. President, I state for the Senate that this resolution has been cleared by the majority leader and the minority leader; that it has also been cleared by the Judiciary Committee.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The legislative clerk read as follows:

A joint resolution (S.J. Res. 270) to designate 1983 as the bicentennial of air and space flight.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration, and, without objection, the joint resolution will be considered to have been read the second time at length.

Mr. MATHIAS. Mr. President, the joint resolution speaks for itself. It is to designate the year 1983 as the year in which the nations of the world will celebrate 200 years of manned flight.

In 1783, the famous French balloonist Montgolfier made the first manned flight in recorded history. It is interesting that this achievement in France was followed very closely by manned flight in the State of Maryland when, in Baltimore, Md., just a few months after the Montgolfier flight, a 13-year-old boy named Edward Warren became the first American to ascend from the Earth's surface.

This is a year which will be celebrated in many ways, not the least of which will be by looking forward into the future of manned flight both within the Earth's atmosphere and beyond. So it is a significant occasion, and I hope the Senate will see fit to adopt this resolution and name 1983 as the bicentennial of air and space flight. I ask immediate approval of the resolution.

The PRESIDING OFFICER. The joint resolution is open for amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the joint resolution.

The joint resolution (S.J. Res. 270) was ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

The joint resolution, with its preamble, reads as follows:

S.J. RES. 270

Whereas the first manned flight in history was made by Etienne de Montgolfier at LaMuette, France on November 21, 1783 releasing man from his terrestrial shackles;

Whereas a few months later in Baltimore, Maryland, a thirteen year old boy named Edward Warren soared aloft in a balloon launched by Peter Carnes, Esq. who a few days previously launched America's first hot air balloon, the Splendid Chariot, from the grounds of the Indian Queen Tavern in Bladensburg, Maryland and;

Whereas the United States and its first ally, France, together with many other countries will celebrate the extraordinary achievements in air and space flight of the past two centuries;

Whereas the United States Organizing Committee has been established to plan, coordinate and assist in the implementation of national, state and local festivities during 1983;

Whereas the Bicentennial provides an opportunity for increasing public awareness in international trade, of education in science, mathematics and engineering, and of re-igniting the creativity and competitiveness that has historically fueled America and its economy; now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the year commencing January 1, 1983, is hereby designated the Bicentennial of Air and Space Flight, and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe the year with appropriate ceremonies and activities.

AMBASSADOR GERARD SMITH'S THOUGHTS ON THE IAEA

Mr. MATHIAS. Mr. President, the former director of the U.S. Arms Control and Disarmament Agency and chief SALT I negotiator, Ambassador Gerard Smith, is qualified to discuss all aspects of the nuclear equation. His is an experienced and reasonable voice which this Chamber should not ignore. Indeed, when Gerard Smith speaks, we in the Senate would be well advised to sit up and listen.

I share his concern expressed in an article about American policy toward the International Atomic Energy Agency. In fact, I wrote President Reagan along the same lines earlier this fall, and would like to place my letter in the RECORD at this time.

As the final phase of this Government's IAEA "reassessment" draws near, we must guard against any weakening of America's nuclear nonproliferation policy.

I ask unanimous consent that Ambassador Smith's article entitled "U.S. Role in Atom Agency" which appeared in the New York Times on October 26, 1982, be printed in the RECORD at this point and my letter to President Reagan dated September 29, 1982, be printed following the article.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. ROLE IN ATOM AGENCY

(By Gerard C. Smith)

The Administration recently suspended United States contributions to the International Atomic Energy Agency and is now reassessing whether we should continue to participate in the agency's activities. As a former representative at the agency, I—along with other former representatives, including T. Keith Glennan, Gerald F. Tape and Henry D. Smyth—believe that this is a dangerous course.

The agency's main functions are to promote the peaceful uses of atomic energy internationally while providing inspection and safeguard systems to insure that nuclear material and equipment are not diverted to military purposes. Accordingly, this country has a vital interest in the performance of the agency's functions, which are integral to our national security.

We deplore the patently illegal action taken at the close of the agency's General Conference in September to reject the credentials of the Israeli representative to the meeting, and we share the anxiety of the Administration to make clear that any recurrence of such illegal political action will not be tolerated by the United States and might well force us to take action unwelcome to those who support it.

But we believe the following options should be ruled out as clearly antithetical to our interests:

United States withdrawal from the agency or nonparticipation in its activities.

Refusal (after the current suspension) to pay the assessed contribution to the agency's budget and safeguards costs.

Any diminution in our efforts to support and strengthen the agency's safeguards system.

The agency and its safeguard system are irreplaceable and essential to efforts to stem the proliferation of nuclear weapons.

We must continue to participate in and supply leadership to its activities to insure that such functions are performed as well as possible. To opt out would be a monumental mistake.

SEPTEMBER 29, 1982.

President RONALD REAGAN,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: It is encouraging to observe the interest of your Administration in the International Atomic Energy Agency and the obvious importance that you attach to its work. The wide attention attracted to the IAEA by the action of the United States in protecting the rejection of the credentials of the Israeli delegation will remind the world of the vital function of this international agency.

Having made this point in a forceful way, I urge you to direct the American delegation to return to the next meeting of the IAEA with instructions to pursue new methods of containing the danger of nuclear prolifera-

tion. In addition, it would be useful for the Secretary of State to inquire of the USSR whether it would support new, more effective, international measures by which nuclear proliferation could be detected and restrained. The joint action of the world's two nuclear superpowers would be a major step in the right direction, and would be welcomed by people everywhere.

Today we are witnessing both horizontal and vertical proliferation. More nations are experimenting with nuclear technology, and nuclear technology is ever more sophisticated. Intelligence sources have advised that there are even sub-national organizations that are capable of acquiring nuclear devices.

The United States played a leading role in the Agency's founding, during the Eisenhower Administration, by actively encouraging the participation of other nations, including the Soviet Union. Since that time, support for the IAEA has remained a cornerstone of U.S. nonproliferation policy. To abandon our leadership now—or even to appear to step back from it—might damage the machinery of nonproliferation beyond repair.

Sincerely,

CHARLES MCC. MATHIAS, Jr.,
U.S. Senator.

GLOBAL ECONOMY IN SERIOUS TROUBLE

Mr. MATHIAS. Mr. President, we are setting postdepression records in this country for unemployment, business failure, and low farm income. But we are not unique. The global economy is in serious trouble. Nor is it clear that it has bottomed out and is headed for a recovery.

Instead, we are witnessing escalating requests for debt rescheduling and rising unemployment figures in the West. In response to these pressures, we are also facing rising protectionist sentiment and increasing complaints about bank "bailouts."

The dimensions of our dilemma together with the elements of a remedial operation were outlined in the Sunday's Outlook section of the Washington Post in an article entitled, "Can the West Avoid Economic Disaster?" by Jean Francois-Poncet, the former Foreign Minister of France. His analysis is superb, his prescriptions timely. I commend this excellent article to all who share my concern that we risk losing control of our economic fate. I ask unanimous consent that Mr. Francois-Poncet's article be included in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Dec. 5, 1982]

CAN THE WEST AVOID ECONOMIC DISASTER?

(By Jean Francois-Poncet)

PARIS.—Instead of searching the skies of Moscow for clues to the intentions of the new Soviet leadership, the leaders of the West might better turn their attention to the disquieting racket arising from the machine rooms of the Western economy. Our leaders are suffering from two serious delusions.

Faced with the formidable Third World debt, they are convinced that international financial institutions are able to cope with the resulting bankruptcies case by case and by using the traditional methods. Moreover, hoping to be delivered from their nightmares, they anticipate the recovery of the American economy and with it the automatic rescue of the other imperiled economies of the world.

Unfortunately, both of these convictions are lame. No one can really claim to be able to read the future of the U.S. economy, or to say when, with what force or for how long the winds of recovery will blow. The American economy staggers under the triple weight of the Federal budget deficit, high real interest rates and world recession. I doubt that the promised recovery will turn it into a powerful locomotive to pull out other economies. The general confidence in the solidity of the international financial system reflects a strange degree of optimism.

True, until now accidents have been avoided. When needed, central banks intervened with determination and speed. Commercial banks did not flounder. The IMF fully assumed its role.

However, is the situation really under control? Is it enough just to sit back and wait for the clouds to clear? The answer is probably not, for four reasons:

Despite appearances, the problem of indebtedness is political, rather than financial. The most difficult task is not to have central banks impose emergency measures nor to get countries in a state of bankruptcy to accept rescheduling agreements as provided by the IMF. The real problem will surface when the time comes to carry out the drastic rehabilitation measures prescribed.

It is unduly optimistic to believe that fragile governments—in countries whose populations grow at a staggering rate and where there are glaring social inequalities and widespread unemployment, corruption and misery—are ready to enforce the financial and economic *diktats* imposed on them. What is more probable is that, under the pressure of an agitated public, the established authorities or those who may replace them will eventually decide, either unilaterally or in agreement with other debtor countries, to repudiate their debts and to refuse the sacrifices demanded of them in the name of Western banks.

Debtor countries must reduce their imports to balance their acccounts and repay their debts. The IMF encourages them to do so, and, besides, they have no choice. However, the process necessarily means a further deterioration and extension of the world recession and leads to a painful contradiction. At a time when the IMF urges all borrowing countries to clean up their houses, Western countries through the GATT demand that they open their markets, threatening retaliation should they refuse. It is past time to put some order into our own politics and to view the problem of debt and its economic consequences in a coherent global context.

The role the system entrusts to the IMF is that of negotiator and guarantor rather than lender. The bulk of the actual financing is done through private banks. A good example is Mexico: while using all the financial facilities it disposes of, the IMF supplies a little over $1 billion per year, while private banks are asked to increase their commitments to $5 billion for 1983 alone.

Despite the errors they have committed, that is asking quite a lot from those major banks, whose dubious loans already run far higher than their capital. It is asking way too much of the some 1,500 small- and medium-size banks that, disregarding pressing appeals, are choosing to pull out.

By putting pressure on banks, governments run a serious risk. For, should the operation ultimately fail, they expose themselves to justified demands for compensation.

There is reason to wonder whether the present situation is not deteriorating rather than improving. The total debt of underdeveloped countries is estimated at $600 billion, to which short-term debt should be added. This cumulative figure is but one element. No one knows the exact nature of the off-shore banks' transactions. The collapse of the Ambrosiano Bank and the Italian government's refusal to guarantee its transactions in Luxemburg underscore the risk that such interbank activity—estimated at $2 trillion—implies.

Finally, too little attention is paid to the rising European debt. Sweden, Denmark, Belgium and Ireland are already faced with difficult financial situations. Italy, Spain and France are on a downhill slope.

So what lessons can we learn from this gloomy picture?

The threat weighing on the world economy is much more serious than commonly acknowledged. If we allow it to develop, a depression similar to the one that shook the world in 1929, 1930 could well follow. But with a difference: it would quickly revive inflation, which all affected governments would be forced to confront. Unavoidably, they would react in a way that dealt a massive backhanded blow to the measures of financial rehabilitation that are now being so painfully put in place.

Then, it is high time for Western leaders to drop their wait-and-see policies. A major initiative is imperative. Instead of nurturing the hope that everything will fall into place by itself, that there is no particular urgency and that it is necessary to maintain a conspiracy of silence, Western countries must face the crisis squarely and offer plausible solutions.

The Versailles summit, which failed to broach any one of these problems, will be remembered in history as the summit of idle talk and blindness. What the world needs is a "Versailles in reverse."

At the top of the agenda would be the restructuring of world debt and the substantial expansion of funds available to the IMF.

It would then be necessary to create a financial security net designed to restore confidence, a prerequisite to any real economic recovery. This would have to go beyond the present cooperation among central banks.

Finally, we would need to reconstruct the international financial system, drawing the proper lessons from the experience since 1973. Rash actions in the past resulted not only from errors in judgment but also from structural weaknesses, which are well known and must be eliminated.

There is no reliable source of information on the actual situation of the debtors. There are still major gaps in a number of countries' internal legislation. Commercial banks have become the principal money lenders but are unable to impose the disciplinary measures that should accompany their loans.

The reciprocal responsibilities of central banks and commercial banks are unclear. The first should not pull the second out of difficulties resulting from unsound manage-

ment. But commercial banks have reason to turn to their governments when they fulfill a mission in the public interest, one undertaken with governmental approval and because of the government's own failure to act.

Then, international institutions should be able to offer Third World countries the long-term funds they need for their development. Unfortunately, this is not part of the IMF's role and is not within the means of the World Bank.

Avoid the worst, restore confidence, reconstruct an obsolete financial system: those are the urgent tasks awaiting the Western world. They will determine not only the well-being of our economies but also our political future.

No one can say how Yuri Andropov will conduct the policies of his country. But it is common knowledge that in the balance between East and West, the Soviet Union depends on its military advantage while the West has always played on its economic strength. This balance would be shattered if, by sheer blindness or apathy, the West failed to take the necessary measures immediately to preserve its economic vitality. That is one favor the West should not grant Andropov.

UNICEF ESSAY WINNERS FETED BY SWEDISH AMBASSADOR

Mr. MATHIAS. Mr. President, several days before Halloween, the Ambassador of Sweden, Count Wilhelm Wachtmeister, and Countess Wachtmeister, acted as hosts for a unique celebration. Their guests of honor were the 17 children from Maryland, the District of Columbia, and Virginia, who wrote winning essays in the UNICEF Festival of Sharing Essay Contest.

The Swedish residence was festive that night with orange candles glowing both inside and out. The dining room was filled with delightful Swedish delicacies. Countess Wachtmeister welcomed the children to a formally set table. As they ate, she answered questions about the decorations, the food, and Swedish customs. At each seat was a place card—a leaf with the child's name painted on it—and a Swedish and American flag pin.

Ambassador Wachtmeister congratulated the winners and presented them with prizes contributed by the U.S. Committee for UNICEF, Washington Area Office.

At a time when parents, teachers, and community leaders are searching for safe and constructive Halloween activities, it is encouraging that over 300 area students, ages 7 to 11, cared enough to write about their concern for the world's children.

The Swedish Government and people, through their generous contribution to UNICEF, have set a high standard that challenges us and every other nation.

Mr. President, I ask unanimous consent to enter in the RECORD the names of the 17 winners and the 4 first-place essays.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MARYLAND WINNING ESSAY

WE HOPE FOR PEACE

(By Cinnamon Daniel)

People are dying,
And children are crying
All over the world.

I wish people would not fight,
For it gives me an awful fright
And it makes people die.

If countries would agree
What a nicer place this would be
For evey man and woman.

All countries should come together
And make peace now and forever.
It's something we can all hope for.

We should care for one and all
And help when somebody calls.
There are burdens we can share.

If countries disagree,
We should try and make them see
That problems can be solved in a friendly way.

People are dying,
And children are crying
Let's see what we can do.

DISTRICT OF COLUMBIA WINNING ESSAY (TIE)

HOW I, A DIME, HELPED UNICEF

(By Crystal Smith)

I was the only coin in Jane's piggybank and I was so lonely. One day I heard Jane ask her mother if she could get a dime out of her piggybank. I knew that it would be me.

Jane came in her room and shook her bank. I jingled around. I loved it when she did that. She took me out and put me in her coat pocket.

When we got to school she gave me to her teacher. Her teacher put me in a box. I didn't know why though. Then I heard Jane's teacher tell Jane, "Thank you for donating to UNICEF." When I heard that I knew it was for a good cause. I knew it because I had heard Jane and her mother discussing how UNICEF was an organization for helping the needy. I was so happy that I was going to be helpful.

Later on, I and some other coins were taken to the office. I was excited because I had not been to a principal's office before. When I got there it wasn't as I had expected. The box I was in was thrown into a bag with a lot of other boxes. I suppose they were for UNICEF too. I could hear the other coins talking among themselves. No other coins were talking to me, so I just sat there.

We were placed in a truck and taken for a long ride. Finally after about five or six hours we arrived at a building. I wanted badly to see this building I was in. Then I heard someone say that it was the United Nations Building. Right away I knew with a name sounding like that, it had to be a big building.

After a while we coins were taken out of our boxes and put into a bigger sack. Then I decided that it was time for me to stop being shy so I whispered to the nickel next to me,"Do you know what we're here for?" I said it loud enough so all the other coins could hear. They all didn't know, so I told them that we would be taken to far away places to help many needy children and their families. I also said that we would be used to buy medicine and supplies, equip schools, help community sanitation projects, set up nutrition programs and teach people how to help themselves.

All the coins were happy that they were going to be helpful. We were happy that we were going to be used.

STARVATION

(By Stephanie Joe)

Little sad tear drops,
Stream from children's eyes,
For their loving mother,
Has perished from their lives.
She died of starvation
And you can hear the children's cries.

Rocks pierce their flesh
And gnats take their blood,
As the children lay sadly helpless
In the mud.

No food to eat,
Not a morsel of meat
Hunger flows through them
And everywhere all about.

Death awaits them
While they live in their land.
All they can do is depend on you.
So give a helping hand.

VIRGINIA WINNING ESSAY

CHILDREN MUST BE EDUCATED

(By Kimberly Ann Golden)

Children in every corner of the world have the right and the need to be educated. Education is the key to understanding and world peace. All of the countries of the world, even the small and poor countries can invest in a better future by educating their children. Countries which do not educate all of their children are hurting the children, the country, and the world.

Children living in countries without school for everyone do not grow to their full ability. As a result the country doesn't grow to its full ability. Children who do not go to school are unhappy. They know things are different in other places and they feel as if they aren't good enough to experience better situations. When children feel they aren't as important as other children they stop dreaming, exploring and experimenting. When this happens, the children stop growing and at the same time the country's future growth is reduced. The children will probably follow in their parents' footsteps because that is the only thing they will know about. When uneducated children become adults they are unable to change bad situations in their country. All of the countries of the world should allow every child to continue to dream, explore and experiment, through education, so the country and the world will grow into a better place for everyone.

The size of the country is not important, but it is important that children go to school no matter where they live. All countries, from the large and powerful to the very small and poor, need to change. The

changes that happen in the future are going to come from the children of today. Changes in everything, doctors, lawyers, government, and even changes in better ways to grow food is only going to happen if children can go to school and learn and dream and experiment. In school, children also learn how to get along with other people. Oh, how beautiful the world would be if everyone could get along together.

Mr. MATHIAS. Mr. President, I make the point of order that a quorum is not present.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

The PRESIDING OFFICER. The clerk will suspend the calling of the roll.

RECESS UNTIL 2 P.M.

The PRESIDING OFFICER. Under the previous order, the Senate will stand in recess until 2 p.m. today.

The Senate, at 12 noon, recessed until 2 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. LUGAR).

POLISH SOLIDARITY DAY

The Senate resumed consideration of the resolution (S. Res. 501).

The PRESIDING OFFICER. Under the previous order, a vote will now occur on Senate Resolution 501. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

ON SOLIDARITY WITH THE PEOPLE OF POLAND

Mr. MOYNIHAN. Mr. President, as an original cosponsor of the pending resolution, which urges the President to declare December 13 a national day of solidarity and prayer with the Polish people, I rise to urge its adoption by the Senate.

I am hopeful, and indeed confident, that the vote in support of this resolution will be near to unanimous, that we might demonstrate to the world that the U.S. Senate is undivided in its commitment to the indomitable people of Poland.

I would also like to commend the junior Senator from Alaska, Mr. MURKOWSKI, for his initiative in bringing this important measure before the Senate this week.

Finally, Mr. President, I would like to ask if this is all that we can do for the people of Poland? Is this all that we are going to do?

I have never underestimated the power of prayer, and I am confident that the Polish people will appreciate the gesture of solidarity that this resolution represents. But I am also afraid that the United States will not, in the end, do much more for Poland than offer gestures, or symbols. This troubles me.

When President Reagan announced on October 9 his intention to terminate Poland's most favored nation trading status, as an expression of his discontent with the continuing Soviet-guided military repression that has scarred the people of Poland since last December 13, the New York Times quite rightly described it as "symbolic," for our present trade with Poland is negligible. The administration's most recent action has had little identifiable effect on the Polish junta, or on its Soviet masters. And it is not likely to result in any meaningful pressure being applied to the Government of Poland.

The administration has steadfastly refused to resort to the measure most likely to be felt in Warsaw, which would be to declare Poland's long overdue loans in default. A declaration of defualt would add in a significant way to the economic and financial pressure on the Polish junta and on the Soviets who helped to install it. In the continuing absence of the political and economic reforms that are our goals—let us not be misled into believing that the expected formal end of martial law will lead to the release of all the 10,000 political prisoners in Poland—we shall not adopt a policy of conciliation toward the Polish generals. We should be seeking opportunities to apply economic and financial pressure.

Yet, despite the urging of the Congress to do so in the last two continuing resolutions on appropriations, the administration has not taken any steps toward the application of such strong financial pressure. In fact, the U.S. Government has continued a practice begun last January of actually paying the Polish junta's over due debts to American banks. I have discussed this policy, and my objections to it, on numerous occasions on this floor and will not detain the Senate at this point with a by now familiar recitation.

I would, however, like to remind Senators that during this month of December 1982, 1 year after the imposition of martial law, and at a time when we are voting an expression of our solidarity with the Polish people, the Commodity Credit Corporation of the United States will pay $37 million of Poland's unpaid debts. Under no obligation, legal or moral, to make these disbursements, the U.S. government is as a matter of policy preparing to make payments equal to $37 million on behalf of the government of General Jaruzelski.

This will bring to $338 million the amount of General Jaruzelski's debts that the American Government has financed since the imposition of martial law in Poland.

I support the present resolution. I think it is important that the Senate make the strong statement that it herein does. And I urge my colleagues to consider whether and how we shall back it up.

SENATOR KASTEN SPEAKS AT THE UN ABOUT POLAND

Mr. President, for the edification of Senators and the many readers of the CONGRESSIONAL RECORD, I would like to ask that a powerful and persuasive address delivered yesterday by the junior Senator from Wisconsin, Mr. KASTEN, be printed in the RECORD as part of the debate preceeding the adoption of Senate Resolution 501.

Senator KASTEN, whose tireless work in the Senate on behalf of the people of Poland is unsurpassed by any Member, is presently a public member of the U.S. delegation to the United Nations. In that capacity, he was called upon yesterday to speak in the Third Committee during debate on the timely subject of human rights of Poland.

Senator KASTEN's address needs no editorial comment by this Senator. It should be made a part of the record of the Senate's deliberation on Senate Resolution 501. I ask unanimous consent, therefore, that the full text of an address by Senator KASTEN be included at this point in the RECORD.

There being no objection, the remarks, were ordered to be printed in the RECORD, as follows:

STATEMENT BY HON. ROBERT W. KASTEN, JR.

Mr. Chairman, I wish to address today the continuing suppression of human rights and fundamental freedoms in Poland.

This is an issue which is of profound importance for a proud and courageous people, of course—and for peace and stability in the world. Last December 13, in Poland, one of the major hopes and indeed prospects of the post-war period for renewal of civil society was brutally repressed by a member State of this organization. This was the attempt of the Polish people to create a genuinely free labor movement which expressed the real will of the workers; to put back into the hands of the Polish people greater control of their own social, economic, political and cultural destiny; and to breed new life into a society which had been deadened by a totalitarian system as unsuccessful as it was inhumane. What was repressed in Poland was an effort at peaceful, non-violent change supported by the overwhelming majority of the Polish people themselves.

Although some changes have been instituted recently by the Polish authorities, and additional changes are rumored to be imminent, there has been no fundamental change in the basic situation in Poland: The free Solidarity trade union movement has been outlawed; the apparatus of repression remains in force; massive violations of human rights and fundamental freedoms continue; and Poland's basic problems have not been resolved. Indeed, in some areas repression is still increasing. Just last week, for example, Poland's military authorities dissolved the independent Polish actors' association—after other methods of harassment and intimidation had failed—to crush the highly successful boycott of state-controlled televison and radio which the actors'

association had instituted to protest repression.

Mr. Chairman, a measure of the international community's revulsion at the repression which has befallen Poland is contained in Resolution 1982/26, adopted by the United Nations Commission on Human Rights last March in Geneva. That Resolution expressed the Human Rights Commission's deep concern over the continuing widespread violations of human rights and fundamental freedoms in Poland. It reaffirmed the rights of the Polish people to pursue their political and economic development free from outside interference. And it called for an end in Poland to measure restricting human rights and fundamental freedoms, for the release of prisoners detained without charge and a review of sentences imposed under martial law.

The Resolution also called on the Secretary-General to undertake a thorough, objective study of the human rights situation in Poland and to present a comprehensive report to the Thirty Ninth Session of the Commission in the Spring of 1983. Mr. Chairman, this issue is so important, and the continuing violations of human rights in Poland so grave, as to make it absolutely essential that the Secretary-General appoint the Special Rapporteur mandated by Resolution 1982/26 without further delay. This action, and prompt preparation of the required report, would make a positive contribution to greater international understanding of repression in Poland; it could serve as a further useful inducement to real improvements in the human rights situation in that country.

The Governing Body of the International Labor Organization also expressed its continuing concern at events in Poland during its just completed session in Geneva. On November 19, the ILO's Governing Body overwhelmingly approved—by a vote of forty seven to four, with three abstentions—the report on Poland of its Committee on Freedom of Association. That report expressed particularly deep concern at the actions of the Polish government in dissolving all existing trade unions, especially Solidarity. It noted that the provisions of the new Polish Trade Union Act of October 8, 1982 do not conform to the International Labor Organization's principles of freedom of association and collective bargaining particularly in respect to recognition of trade union rights, in the area of collective bargaining, and in respect to strike procedures and penalties. The Report also noted that, a full year after the repressive crackdown, numerous persons are still being detained in Polish prisons and that new arrests took place in Poland as recently as August and September.

The ILO Report accordingly recommended that the International Labor Organization's Governing Body, in its February-March 1983 session, consider possible establishment of an official Commission of Inquiry on Poland.

Mr. Chairman, these actions make it clear that the international community does not accept the view, often expressed by the Polish military authorities and their supporters that the Polish repression is solely a Polish internal matter. Clearly, these international organizations consider—as we do—that the repressive activities of the Jaruzelski regime, including the Trade Union Law of October 8, 1982, are serious violations of Poland's freely assumed international obligations and commitments and thus are a matter of profound and legitimate concern to all countries. Indeed, Polish repression directly violates, inter alia, the United Nations Charter, the Universal Declaration of Human Rights, the International Covenant on Economic, Social and Coltural Rights, several conventions of the International Labor Organization, and the Helsinki Final Act, to all of which the government of Poland is a party.

Nor can we accept the view that as a result of some largely cosmetic gestures by the Jaruzelski government, we need no longer concern ourselves with the human rights situation in Poland. For the fact is that nothing fundamental has yet changed in Poland: the instruments of repression in Poland remain and massive repression of human rights and fundamental freedoms continues to occur.

Certainly we join all free men in welcoming the long overdue release in November of Lech Walesa, the leader of Solidarity. We, like others, earnestly hope that this move now will be followed by the release of the other leaders, members, advisers and supporters of Solidarity and of the Polish reform movement who are still interned; that martial law itself will be rescinded; and that there will be renewed, genuine dialogue between the Government, Solidarity, and the Church.

But, at the same time, we cannot ignore the fact that Mr. Walesa was imprisoned for eleven months, the last seven reportedly in virtual solitary confinement, for activities which the United Nations and numerous other international organizations actively support and promote—namely, for seeking to achieve expanded rights for Polish workers through free trade unionism. Though released from confinement, Mr. Walesa's political activities remain circumscribed by Polish authorities.

Nor, Mr. Chairman, can we or will we overlook other salient facts about the human rights situation in Poland today.

We will not overlook the fact that the Polish martial law government has abolished the ten-million member Solidarity trade union, including the private farmers union, by administrative fiat; and that it has passed new laws prohibiting Solidarity's restoration—even use of its name—and severely restricting all union activities. We will not ignore that this was done in blatant violation of numerous International Labor Organization Conventions, as the ILO Report definitively establishes. Nor that repression was expressly imposed to roll back the momentum toward political and social change which Solidarity represented, and which was and is supported by the great majority of the Polish people. It thus involves suppression of one of the most basic rights of any people: The right of the Polish people to self-determination; their right freely to decide their own political status and freely to guide their own economic, social and cultural development.

In a vain attempt to justify their repressive actions, Polish authorities have offered a number of "explanations." General Jaruzelski has accused Solidarity of seeking the destruction of socialist Polish statehood and the dismantling of the postwar configuration of forces in Europe. Solidarity's leaders, he has claimed, had embarked upon a process of "confrontation" which would have plunged Poland "into the abyss of fratricide". Solidarity's activities, he has further charged, had led to "chaos and demoralization [which] have assumed the proportions of a disaster."

Let us examine these charges.

The charge that Solidarity sought to overthrow the Polish Communist regime is an outright falsehood. The Solidarity Union never challenged the supremacy of the Communist Party in Poland or demanded Poland's withdrawal from the Warsaw Pact. To the contrary: it vowed to observe the Polish Constitution and to recognize the "leading role" of the Polish Communist Party. Solidarity's only so-called "crime" was to demand those human rights to which the Polish government has legally committed itself in international agreements: free trade unions; freedom of expression; the reduction of censorship; and end to political trials; and honest information about Poland's past and present.

Nor was Solidarity embarked on a policy of confrontation which would have culminated in fratricidal strife. In the year and a half preceding the imposition of martial law, it was the Polish government—not Solidarity—which sought to provoke a confrontation. It was the Polish government which engaged in a continuous effort to undermine and obstruct the implementation of the historic Gdansk Agreement of August 31, 1980. It was the government which deliberately distorted Solidarity's aims in the government-controlled media, which harassed and beat Solidarity activists, and which finally proposed a law outlawing strikes. In the face of these provocations, Solidarity persisted in its call for a national dialogue. Perhaps the most striking feature of Solidarity's struggles for human rights is the commitment of its leaders and members to a policy of non-violence. To accuse such a movement of seeking to provoke civil war is to engage in blatant, cynical inversion of the truth.

It also is totally absurd to charge that Solidarity's activities were bringing Poland to the verge of economic chaos. Months before the imposition of martial law, Solidarity's leaders sought to curtail strikes and prevent disruption. Time and again Solidarity's leaders proposed economic reforms to increase productivity and efficiency. It was the authorities, in fact, that blocked every initiative and were concerned solely with the question of political power. The imposition of martial law, far from rescuing Poland from economic chaos, can only intensify Poland's economic difficulties, as current development indicate. Even official Polish Government forecasts project a six to seven percent decline in national income in 1982 under martial law, and this figure probably is overly optimistic. An industrial economy cannot be run at gunpoint.

Mr. Chairman, Solidarity's only "crime" was its failure to acquiesce in the Polish regime's claim to omnipotence. It's members refused to regard themselves as a kind of state property. They had the temerity to demand their human rights, and the audacity to seek to place limits on the heretofore absolute powers of the regime. For this singular act of insubordination—and for this act alone—the Polish military government is trying to destroy Solidarity and the broader spirit of reform it represents.

Mr. Chairman, in that effort the Polish military regime continues, a full year after the application of martial law, to commit sweeping acts of repression against nearly all segments of Polish society.

The very decree on the State of War which established that repression suspends, or limits for the duration of the proclamation, all fundamental civil rights recognized by the Polish Constitution and the international treaties to which Poland is a party. And actions taken under that, and other repressive laws violate numerous provisions of

the Declaration of Human Rights (Articles 3, 5, 8, 9, 10 and 11) and of the International Convenant on Civil and Political Rights (Articles 6, 7, 8, 9, 10, 14 and 15) which inter alia affirm the individual's right to be free from cruel, inhuman or degrading treatment or punishment. Indeed the current actions of Poland's military authorities make a mockery of these international commitments.

Mr. Chairman, the human costs of these violations continue to be enormous:

The Polish authorities themselves have acknowledged the killing of strikers and demonstrators in the course of suppressive actions. On December 17, 1981, for example, the regime announced that nine coal miners had been shot to death by security forces breaking a strike in the Wujek coal mines near Katowice. Following the nationwide disturbances on August 31, 1982, the official media reported the deaths of two demonstrators in Lubin, one in Wroclaw, and one in Gdansk. And unofficial and unconfirmed reports indicate an even higher number of fatalities actually may have occurred.

Moreover, additional thousands of Polish citizens have been wounded and injured in the course of police actions. Numerous eyewitness accounts testified to excessive use of police force in the past year to suppress public manifestations of dissatisfaction with repression.

Thousands of Polish citizens have been convicted of martial law violations by summary military and civil tribunals, and many others are under arrest and awaiting trial. Thus, over five thousand people were arrested or detained in the wake of the August 31, 1982 disturbances alone. According to conservative estimates there are approximately 700 detainees and 4000 individuals who are languishing in prison for violation of martial law offenses. Others estimate that at least ten thousand are now serving sentences or awaiting trial and as many as thirty thousand have been sentenced under martial law to prison terms ranging from three months to nine years.

Sentences for martial law violations often have been severe. Even minor offenses, such as printing and distributing underground news bulletins, have entailed sentences of three to five years' imprisonment.

Accounts of beatings and physical abuse of prisoners continue to abound. The Catholic Church and the International Committee of the Red Cross have made strenuous efforts to visit martial law prisoners in various detention centers, but the Polish regime has generally done what it could to frustrate such efforts. When one such visit was permitted in early January, ICRC inspectors reported deplorable conditions in all but four or five showcase facilities in former resorts. They reportedly often found eighteen to twenty persons sharing a single room with a common toilet, internees were locked up with common criminals, and some were sent to psychiatric hospitals.

The scale of such police actions as warrantless search of homes and offices, confiscation of personal documents and property, monitoring of telephones and other forms of electronic eavesdropping—all without legal recourse—have been massive.

Tight military and government control has been reimposed by the Jaruzelski regime over print and electronic media. The Polish press, radio and television have resumed practices reminiscent of the 1950's. Pluralism of viewpoints, regard for factual accuracy, and candor have all but vanished in Poland. Solidarity's press has been shut down and church periodicals subjected to censorship.

The martial law regime also has used a system of ideological "verification" to subdue dissident voices and produce a uniform media line conforming to military distates. According to a key official of the dissolved journalists association and to Western press reports, more than 1,200 print and media journalists have lost their positions in the ideological purge. The creation in late March of a new, regime-controlled journalists organization demonstrated the regime's determination to eradicate all vestiges of public autonomy and assert complete dominance over public life.

Martial law decrees also have expressly banned all types of public assembly and demonstrations without prior permission of the authorities, except for limited types of religious celebrations. Under this provision, the regime reportedly has employed massive amounts of police force to suppress strikes, demonstrations and other open manifestations of popular unrest. Elite internal security troops and Zomo riot police have used tanks, armoured cars, water cannons, tear gas, clubs and in some instances, even small arms, to crush what almost always have been non-violent protest actions. Crowd violence against police generally has occurred only after the authorities had forcibly suppressed attempts to hold peaceful protest actions.

Stiff action has been taken against those attempting to carry on free union activities. Severe prison sentences have been mandated for persons persisting in such trade union activities, especially those organizing and participating in strikes.

Some Polish industrial plants have been militarized. According to the Polish newspaper, Zycie Warszawy (October 21, 1982), the essence of such militarization is that workers in the enterprise involved are, in effect, inducted into military service from the moment of militarization. Military service principles, including military penal provisions and summary court procedures, are substituted for normal conditions of work; factory directors have military command authority, including the possibility of lenghtening working hours and transferring workers, without consultations with the workers.

In addition, the martial law authorities have employed another highly effective method of stifling worker protests. This is the so-called "wolf-ticket" which involves dismissal from employment and the effective denial of future employment in any state-controlled sector of the economy. A worker denied employment in this manner becomes dependent on his family for support, a particularly onerous sanction in the wake of the steep price rises which have caused the costs of food and other basic necessities in Poland to skyrocket.

Mr. Chairman, the suppression of human rights and fundamental freedom of the Polish people which we have documented also constitutes a massive violation of the Helsinki Final Act. Since my country, like many others, has made these violations a central subject at the review talks of the Conference on Security and Cooperation in Europe, in Madrid, I will not review them again in detail today before this Committee.

However, I do wish, Mr. Chairman, to mention one particularly flagrant violation of the Helsinki Final Act and of the United Nations Charter on which it is based: the continuing Soviet effort to dictate, and to control events in Poland. Through massive intimidation and interference, the Soviet Union has conspired with the Polish military authorities to deprive the Polish people of their rights to self determination. As my government has fully documented (Special Report No. 94 on Soviet Involvement in Poland, July 1980-December 1981), Poland was subjected in the period leading up to imposition of martial law, to a continuous barrage of Soviet pressures, threats and acts of intimidation, including military maneuvers to bring about repression in Poland and to stifle the reform process supported by the great majority of the Polish people. And continuing attacks on the Church, private agriculture and the Polish workers movement appear in the official Soviet press to supplement Soviet official encouragement for a continuing tough line against the forces of reform in Poland.

It is a bitter irony that the Soviet Communist Party, which calls itself the "vanguard of the proletariat", so avidly has sought to crush in Poland the true aspirations of the Polish working class. It is equally ironic that the Soviet Union, which purports to be the leader of world revolution, is so rigid and intolerant—and so fearful—that it cannot permit peaceful, progressive reform in one of its neighbors. Certainly it is inconsistent with the United Nations Charter for any country to assume that some ideological prerogative grants it the right to control another—whether in Afghanistan or Poland.

Mr. Chairman, we are convinced that a rapid and complete restoration of human rights and fundamental freedoms is the surest guarantee of peace and stability in Poland. Continuing repression of the Polish people's rights cannot solve Poland's intractable economic and political problems. Purely superficial and cosmetic changes designed more to put a respectable facade on repression than to change the underlying situation cannot bring a lasting solution. Only a return to a genuine process of national reconciliation and self-determination can do so.

We therefore urgently call upon the government of Poland to lift martial law repression in fact and substance, not just in name; to release all of its political prisoners; and to return to a process of constructive and uncoerced dialogue with the Polish Church and with Solidarity.

We call upon the new leaders of the Soviet Union to abide by the provisions of the United Nations Charter and the Helsinki Final Act to respect the rights of the Polish people freely to pursue its political, economic, social and cultural development, and to refrain from the threat or use of force against Poland.

And we urge all countries in this Committee to support all efforts in this body and its specialized agencies to promote the earliest possible return to a process of self-determination in Poland and the fullest possible restoration of human rights and fundamental freedoms in that country.

My country has joined others in taking a number of measures to encourage improvements in the human rights situation in Poland. We also have made it absolutely clear that if real, not just cosmetic, improvements do occur, these will be met with a reciprocal positive United States response. Our actions have been and will be guided by the practical consideration of strengthening respect for human rights in Poland, including the rights of free association which the Polish people exercised in forming the Solidarity Union. The denial of human rights not only affects the Polish people but has

done grave damage to world peace. We all, therefore, have a fundamental stake in the genuine termination of the repression in Poland and in the revival of the process of peaceful change which inspired the hopes of the Polish people and—indeed—of freedom-loving people throughout the world.

● Mr. D'AMATO. Mr. President, I rise in support of the pending resolution and share the concern expressed by many Amricans over the tragic events which have occurred in Poland since the imposition of martial law nearly 1 year ago. The declaration of martial law by the Polish Council of State, under the leadership of Gen. Wojciech Jaruzelski, represents an attempt to deal a serious blow to the freedom and rights of the Polish people. Nevertheless, it is important to remember that the Polish authorities have not acted alone. Under constant pressure from the Soviet Union, General Jaruzelski has sought to extinguish the free spirit of the Polish workers, denying them the right to strike as well as imposing stringent control with respect to personal travel and communications.

Despite repeated statements that the Government would remove restrictions instituted since December 12, 1981, the situation in Poland today, nearly a year later remains grave. The recent outlawing of the free trade union solidarity has only served to exacerbate the domestic tension already present in Poland. While there have been some encouraging signs, including the release of solidarity leader Lech Walesa from confinement, thousands of workers remain imprisoned. In addition, the volatile domestic situation in Poland has been further frustrated by a deteriorating economy. Food supplies remain at critically low levels with even basic commodities in short supply. Meanwhile, the government's foreign debt has grown to more than $26 billion.

As a member of the Commission on Security and Cooperation in Europe, I am particularly concerned over the flagrant violation of human rights as outlined in the Helsinki Final Act and the UN Universal Declaration on Human Rights by the Jaruzelski regime. I deplore the actions of the Polish Communist authorities designed to suppress even the most basic civil liberties and share the sense of outrage expressed by Pope John Paul II, President Reagan and others in response to the events in Poland.

It is more important than ever that Americans stand in solidarity with the people of Poland. Therefore, I have joined as a cosponsor of Senate Concurrent Resolution 501, expressing the sense of the Senate that it is vital that Americans continue to protest martial law repression in Poland. This important resolution calls upon the President to proclaim a national day of solidarity and prayer with the Polish people.●

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Utah (Mr. HATCH) are necessarily absent.

I further announce that, if present and voting, the Senator from Utah (Mr. HATCH) would vote "yea."

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN) and the Senator from Hawaii (Mr. INOUYE) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote who have not voted?

The result was announced—yeas 96, nays 0, as follows:

[Rollcall Vote No. 395 Leg.]

NOT VOTING—4

Glenn	Hatch
Goldwater	Inouye

So the resolution (S. Res. 501) was agreed to.

The preamble was agreed to.

The resolution, together with the preamble, is as follows:

S. RES. 201

Whereas the American people have since the early days of our Revolution and Nation had a deep and lasting friendship with the Polish people and nation, founded upon an unfaltering respect for freedom;

Whereas the American people expressed widespread admiration and support for the creativity, combined with restraint and discipline, with which the Polish people in 1980 and 1981 attempted to evolve a mutually more responsive relationship between workers and government;

Whereas the imposition of martial law on December 13, 1981, and actions taken by the martial law government, including the imprisonment for many months of the people's chosen trade union representative, Lech Walesa, have constituted grave abridgments of the human rights and civil liberties of the Polish people, and violated the United Nations Charter, the Helsinki Final Act, the Universal Declaration of Human Rights, and other international human rights agreements which Poland signed and ratified as a participating state;

Whereas the martial law regime continues in Poland to engage in acts of violence and repression against its own citizens in contravention of the indomitable right of the Polish people to determine their own future;

Whereas the outlawing of the free and lawful trade union Solidarity by the Polish Government in October 1982 is a further suppression of the clearly expressed will of the Polish people: Now, therefore, be it

Resolved, That it is the sense of the Senate—

(1) that the Senate condemns and abhors the suppression of civil liberties and human rights by the martial law government in Poland;

(2) that the American people respect and admire the commitment to the ideals of freedom and independence manifested by the Polish people and Mr. Lech Walesa in particular; that the American people welcome the release to his family of Lech Walesa, and hope that he will be permitted to express himself freely and contribute to a full and free dialog on Poland's future and the resolution of her problems by Poles themselves, free from external influence or coercion;

(3) that the American people hope that Polish authorities will take early, concrete, and significant steps to return their human rights and civil liberties to the people of Poland, beginning with the full lifting of martial law and release of remaining detainees, and will resume a full, sincere, and free dialog with Solidarity and the church to commonly resolve Poland's problems; and

(4) that the President of the United States is urged to proclaim December 12, 1982, the eve of the first anniversary of the imposition of martial law repression in Poland, officially as a national day of solidarity and prayer for the people and nation of Poland.

Mr. PERCY. Mr. President, first of all I would like to thank the Senate for that splended vote on a very important and vital issue.

Second, I would like to say that Senator ZORINSKY left the floor for a moment and he wanted to seek recognition.

I see him on the floor now, and I am prepared to yield the floor to him.

BUDGET WAIVER FOR RADIO MARTI

The PRESIDING OFFICER. The question is on agreeing to the motion to waive section 402 of the Budget Act as the pending business.

The Senator from Nebraska is recognized.

Mr. ZORINSKY. Mr. President, I ask unanimous consent to yield the floor to the distinguished Senator from New York for the purpose of making a statement or a unanimous-consent request without losing my right to the floor and without this being considered the end of a speech for the purpose of the two-speech rule, and I ask that I again be recognized at the conclusion of the remarks of the Senator from New York.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, I thank the Senator for yielding.

(The remarks of Senator MOYNIHAN relating to Poland, which were presented at this point in the proceedings, appear earlier in the RECORD.)

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. ZORINSKY. I thank the Chair.

Mr. President, in continuation of the saga of Radio Marti's final report by the Presidential Commission on Broadcasting to Cuba, dated August 17, 1982, I read as follows:

The Commission recommends that Radio Marti use two transmitters in order to reach all areas of Cuba effectively. The first transmitter should be located in the Fiorida Keys, as close to Cuba as possible. While the budget proposal already submitted to the Congress includes $1.2 million for this purpose, the Department of Defense transmission facilities at the U.S. Navy installation on Saddlebunch Key should be utilized if at all possible in order to reduce costs.

A second transmitter should be located at a Caribbean site in order to broadcast to eastern Cuba.

Radio Marti transmitters located in the United States should conform to the domestic 50KW power limit. To avoid interference with existing U.S. or third country stations, and to define its signal as precisely as possible towards Cuba, Radio Marti should have highly directional antennas.

H. HEADQUARTERS AND STUDIO

The Commission recommends that RBC, INC.'s, headquarters and Radio Marti's major studio be located in Washington, D.C. in close proximity to the oversight agency. Small bureaus should be located in New York and Miami.

I. INFORMATION GATHERING

The Commission recommends that Radio Marti arrange for subscriptions to the Western wire services reporting from Cuba, the personnel and means to monitor Cuban and Latin American publications and other sources of news, and correspondents in key locations, in addition to the small regional offices in New York and Miami.

J. PROGRAMMING

Relevance is essential. Conditions in Cuba of the 1980's, not the 1950's, 60's or 70's, must be addressed. Cuban society has undergone socio-economic, political and value changes as a result of government policies and pervasive socialization efforts since Castro came to power.

Credibility will be established over time only if Cubans perceive that Radio Marti is not a spokesman for particular partisan groups in the U.S. This means reporting on as many developments as possible in Cuba. In contrast to the Castro government's media, Radio Marti must be perceived as comprehensive, reliable and objective.

Mr. BAKER. Mr. President, will the Senator yield to me without losing his right to the floor and without it counting as a second speech, and with the understanding that he be re-recognized at the conclusion of the quorum which I will suggest if that request is granted?

Mr. ZORINSKY. Without this being the end of my speech for the purposes of the two-speech rule?

Mr. BAKER. Yes, I include that.

Mr. ZORINSKY. I so yield the floor to the majority leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I thank the Chair.

Mr. President, I think it might be helpful if we had a few moments to confer more informally than if we do it while debate proceeds. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, I ask unanimous consent that I be recognized to speak but without it interrupting the speech of the Senator from Nebraska (Mr. ZORINSKY), without it counting toward my two-speech limit, and with me being able to yield back the floor to Senator ZORINSKY at the conclusion of my speech.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. LEAHY. I thank the Chair.

First, I ask unanimous consent that Dr. Janet Breslin be allowed access to the floor throughout the debate on H.R. 5427 and any vote on the bill or any amendments today or any succeeding days.

The PRESIDING OFFICER. Without objection, it is so ordered.

(Mr. LEAHY'S remarks are printed later in today's RECORD.)

Mr. ZORINSKY. Mr. President, I continue to read:

The Commission therefore recommends that news, commentaries and news analysis form the heart of programming for Radio Marti blended in to features, sports, music and cultural programs designed to attract the widest possible listenership in Cuba. As an instrument of U.S. foreign policy, Radio Marti's program content should be carefully monitored to ensure that it conforms with policy guidance received from the Department of State. Care must be taken to assure objectivity and under no circumstances should broadcasts appear pedantic, propagandistic or inflammatory. Truth should be Radio Marti's hallmark. Newcasts and commentaries must be accurate, balanced and, where possible, verifiable by Cubans residing on the island. This means reporting on both negative and positive aspects of events related to Cuba. By maintaining these objectives and observing high journalistic standards, Radio Marti programming should win a large following in Cuba.

K. BUDGET AND PERSONNEL

The Commission recommended in its Interim Report a budget of $10 million in FY 82 and $7.7 million in FY 83, as submitted by the Department of State to the Congress. The Commission believes this recommendation remains justified in order to implement Radio Marti effectively. Given the high costs of two directional antennas and of the personnel to meet Radio Marti's need for specialized research and programming, these funding levels are reasonable.

To meet the personnel requirements described in Section III. G. the Commission recommends staffing for Radio Marti of 168 employees. Of these, 148 persons would meet programming requirements and 20 others would be required to meet administration needs. When the Caribbean transmitter is ready for use, it is estimated that an additional 14 employees would be needed. These positions, which were requested in the Administration's budget proposal, are further identified in Appendix J.

I wish to now read the introduction from a book on Jose Marti entitled "Inside the Monster," and the introduction is done by Philip S. Foner, and it proceeds as follows:

During the years 1810–1825 Spain's colonies in the New World revolted and achieved independence. Only Cuba and Puerto Rico remained of what was once the great Spanish empire of the West Indies, Central and South America. Of these two, Cuba was by far the more important to Spain. Following the destruction of the sugar economy of St. Domingue (later to become Haiti), Cuba gradually emerged as the world's largest producer of sugar. By 1838 it was the prize of Spain's reduced overseas empire. Its contribution to the Spanish treasury alone made it an important possession for the perpetually bankrupt Spanish monarchy.

As the sugar economy expanded, slaves poured into Cuba from Africa. Between 1762 and 1838, 391,024 Negroes were brought to the island, and despite the acceptance by Spain in 1817 of a British-inspired agreement to end the slave trade, the flow of slaves from Africa not only continued but increased. Slaves were imported illegally in greater numbers after 1817 than when the trade was legal.

Cuban white society was mainly made up of Creoles, born in the New World, and Peninsulares who were born in Spain. The political affairs of the island were dominated by the Peninsulares, who occupied nearly all of the positions in the colonial bureaucracy. The Peninsulares also dominated the commerical life of the island. The Creoles, on the other hand, were principally landowners—cattleraisers and tobacco, coffee and sugar planters—and the professional people.

An inevitable conflict developed between these two white groups and increased in intensity in the nineteenth century. While the Peninsulares were fanatically pro-Spain, as might be expected from the political and economic advantages Spanish policies afforded them, the Creoles resented the restrictions imposed upon their political aspirations and upon their freedom to trade under Spanish mercantilist policies. While Cuba was emerging as the world's largest producer of sugar, the colony was still functioning under Spain's backward and chaotic colonial policies, and a leading characteristic of the Spanish island's political life was the notorious corruption of the officials. Inevitably, the ideas of the Creoles ran counter to Spanish colonial policy. Furthermore, as travel brought them into contact with conditions in other countries, particularly those in the nearby United States, the Creoles increasingly resented the corrupt,

inefficient, and frequently repressive Spanish colonial rule in Cuba.

Some Creoles believed that only through independence could Cuba achieve a modern political and economic form of society. Even during the Latin American independence struggles, there were Cubans who favored joining the revolutions against Spain and ridding the island of domination by the mother country. In 1825, to assist these revolutionists, Mexico and Venezuela planned an expedition to Cuba to aid in the independence struggle. But the United States, fearing an independent Cuba would lead to the end of slavery with repercussions in the Southern states, let it be known through Secretary of State Henry Clay that it would block any move to liberate Cuba from Spain. Another factor influencing this decision was the belief of the American government that in due time, under the operation of the law of political economy, Cuba would fall into the lap of her North American neighbor. The United States was not only becoming a major market for Cuban sugar, but despite Spanish restrictions, an important source of its manufactured goods. Hence, as John Quincy Adams put it, as long as Cuba remained part of Spain, in time it would, like a ripe apple, fall into the lap of the United States.

Independence movements arose and fell after the 1820s in Cuba. The struggle for liberation from Spain was retarded by the simple fact that the Negro population grew enormously with the rise of the sugar economy. In 1842 the official census reported a population of 1,007,524 inhabitants: 448,291 white, 152,838 free colored, and 436,495 Negro slaves. The danger of slave insurrection increased with the growth of the black population, and Cuban planters increasingly looked upon the Spanish government, and particularly the Spanish military power on the island, as the major safeguard against rebellious slaves.

To be sure, the value of Spanish protection of person and property in a slave society clashed with the restrictions imposed upon the island by Spanish imperial policies. The Cuban planters demanded the right to buy goods from countries other than Spain and to sell in a market larger than that offered by the mother country. But as long as slavery was the key to Cuba's prosperity and protection against the slaves was embodied in Spanish power, the Creoles swallowed their distaste for the repressive features of Spanish rule and turned a deaf ear to appeals for liberation of the island from the mother country.

Mr. President, I ask unanimous consent that at the conclusion of the Senate's consideration of the District of Columbia Appropriations Act or whatever time the Senate returns to the consideration of this motion concerning the budget waiver on H.R. 5427 I not lose my right to the floor and the interruption not be considered the end of the speech for purposes of the two-speech rule and that I be duly rerecognized first on the resumption of the consideration of this question.

The PRESIDING OFFICER. Without object, it is so ordered.

Mr. ZORINSKY. Thank you, Mr. President.

However, both Peninsulares and Creoles were opposed to any attempts from Spain, egged on by England, to alter or abolish slavery, the key to the prosperity of Cuba. Consequently it is not surprising that when Spain appeared to be veering toward supporting abolition of slavery, thus seemingly abandoning its role as protector of white Cubans against blacks, schemes of annexation to the United States, where slavery flourished, emerged. But as the fears that Spain would interfere with slavery subsided, annexationist sentiment in Cuba lost its main appeal. Annexationism continued, but the main initiative now came from the predominantly proslavery groups in the United States who saw in the annexation of Cuba a vast area for the expansion of the Cotton Kingdom and the acquisition of increased political power in the national government. In the end, Spain's refusal to sell the island to the United States and the opposition of antislavery expansionist forces in the North either to purchase or capture of Cuba through filibustering expeditions, doomed the annexationist movement in the United States. With the outbreak of the Civil War in 1861, annexation, for the time being, was dead.

In 1865, Spain, suffering from internal dissension and political and economic difficulties, and fearing the rise of independence movements in Cuba, adopted a policy of conciliation toward its colonial possession. A royal decree of November 25, 1865, established a Colonial Reform Commission to discuss proposals for reforms in the island. Despite conservative opposition in Madrid, the Spanish colonies in the Antilles elected twenty commissioners, sixteen of whom came from Cuba, and the remaining four from Puerto Rico.

The election of commissioners in Cuba and the debates in Madrid created a wave of excitement in the island and fostered the hope that at last the long-awaited reform of Cuban political and economic life was on the way.

(The following remarks by Mr. LEAHY occurred during the presentation of Mr. ZORINSKY and are printed at this point in the RECORD by unanimous consent.)

Mr. LEAHY. Mr. President, I am a long-time supporter of the Voice of America and similar efforts to bring news of the free world to citizens of countries within the Communist sphere.

These broadcasts provide the only source of uncensored information that millions of people, living in countries with a state-controlled press, can rely upon. But I must take exception to the Radio Broadcasting to Cuba Act before us today. This bill would establish a special radio station financed by the American Government to provide sports, music, entertainment, as well as presumably negative information about Cuba solely designed for the Cuban population 90 miles off our Florida coastline.

We are being asked to authorize at least $7.5 million to build this radio station. But as far as I can figure out, no one in Cuba is even going to hear these broadcasts.

I am not so sure that the same holds true, however, for the people in Iowa, Texas, Missouri or my own home State of Vermont which has a station now broadcasting on one of the same frequencies proposed for Radio Marti.

These Americans may well be hearing a Government-subsidized radio station with a stronger signal than private, independent stations in their area. Moreover, these American stations will be drowned out by Cuban attempts to block Radio Marti.

According to the Senate Foreign Relations Committee report on this bill, the Cubans have the capability to block Radio Marti's signal and are planning to construct two 500,000 watt stations—10 times the generating power of Radio Marti—to do just that. In order for our radio stations to make the technical adjustments to protect their signals against the Cuban broadcasts, it would cost the American taxpayer an additional $40 million according to the Congressional Budget Office.

Moreover, if the U.S. Government compensates the effected stations for lost revenues as a result of these Cuban counterbroadcasts, the annual cost of Radio Marti would be in the hundreds of millions of dollars.

That is a lot of money for something that is not going to work, especially at a time when we are cutting out just about everything in this country—aid to the unemployed, aid to the handicapped, aid to the disabled, aid to the hungry. We are going to spend hundreds of millions of dollars for something that will not work.

One year ago, President Reagan created a special Presidential Commission "to develop recommendations with respect to the broadcasting of information and ideas to Cuba." This Commission received almost $100,000 for its work and issued two slim reports on the venture.

Commenting on the 11-page interim report, the Foreign Relations Committee noted it "contained little discussion on the background or rationale for its recommendations." The final report—all of 25 pages long—apparently overcame earlier shortcomings to the committee's satisfaction.

One of the bright ideas to come from the Commission report—which cost approximately $4,000 a page—was to name Radio Marti in honor of the Cuban patriot.

But the selection of Marti may be as bad as the idea itself. Marti lived part of his life in this country and had some very pointed views toward the United States.

Upon returning to Cuba from the United States in 1895, he wrote the following. Let us hear the views of Señor Marti, the person after whom we are proposing to name this radio station, the person in whose honor we are going to spend hundreds of millions of dollars of American taxpayers' money. Here is what he said about the United States, this man we are going to spend hundreds of millions of dollars to eulogize:

It is my duty to prevent the United States from spreading over the West Indies and over other lands in our America. All I have done up to now, and shall do hereafter, is to that end. I have lived inside the monster and know its entrails and my weapon is only the slingshot of David.

We will spend hundreds of millions of dollars of the taxpayers' money to honor and memorialize this man, who referred to the United States as a monster.

Marti wrote a paeon of praise to Karl Marx at the time of Marx' death.

And writing in the Argentine newspaper, La Nacion in 1882, Marti said:

We are at the height of a struggle between Capitalism and the worker. The Capitalist compels the poor worker to work at ruinous wages.

Frankly, as one Latin American friend told me, the selection of the name "Radio Marti" for this U.S. propaganda effort, tells the Cubans and other Latin Americans more about the naivete and ignorance of this administration toward the countries south of our border. They think it makes us look a little ridiculous. A lot of snide comments and a lot of chuckles are heard at the same time they shake their heads and wonder that this is what we will spend hundreds of millions of dollars on.

Mr. President, this multimillion dollar radio experiment is not this Vermonter's idea of sound, fiscally responsible national policy. Perhaps, as I grow older and the longer I stay here, I become more and more fiscally conservative.

But, it is some sort of dipsy doodle that no one in the White House appears to have thought through very carefully.

I urge my colleagues to spare the President the embarrassment this program is bound to cause him if enacted into law, while sparing the American taxpayer the millions of dollars that would be wasted on this ill-conceived venture. I really do want to spare the President embarrassment, coming on the heels of his Latin American trip, to sign into law legislation authorizing a radio station named after a man who referred to our country as a monster.

Mr. President, I have at the desk 19 amendments, to be called up if we actually get into votes on this matter. These are to protect each radio station in Vermont, and an amendment to protect the emergency radio broadcasting system.

This is something people have not looked at very closely. If Radio Marti is put into place and if the Cubans go through with the jamming mechanisms, we put greatly at risk the emergency broadcasting system in this country.

What we end up with is a radio station that will not work and could well cost hundreds of millions of dollars to the American taxpayer, a station named after a man who referred to the United States as a monster, a station that will bring about the jamming of a lot of our commercial stations in this country, stations built under the free enterprise system. Worse yet, it will put into jeopardy the emergency broadcasting system of this country.

That will all be for naught, all to be able to try to broadcast something into Cuba that will never reach there.

DISTRICT OF COLUMBIA APPROPRIATIONS, 1983

The PRESIDING OFFICER (Mr. HAYAKAWA.) The hour of 3 p.m. having arrived, the Chair lays before the Senate H.R. 7144, which the clerk will state by title.

The legislative clerk read as follows:

A bill (H.R. 7144) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1983, and for other purposes.

The Senate proceeded to consider the bill which had been reported from the Committee on Appropriations.

The PRESIDING OFFICER. The Senator from New York.

Mr. D'AMATO. Mr. President, it is once again a pleasure to present the D.C. budget to the Senate. As required the bill presented represents a balanced budget for the Nation's Capital. In terms of total Federal funds this bill is well below the President's request and the House bill, while at the same time providing the increase requested by the President in the Federal payment, as authorized by Public Law 97-334.

The Federal funds recommended total $573 million. This is comprised of: $361 million for the Federal payment; $11.8 million for water and sewer services to Federal installations; $52.1 million for retirement fund contributions; $3.1 million for a special crime initiative; and $145 million for capital project loans.

These funds are partially offset by a rescission of $48.8 million. This rescission represents previous appropriated capital loan authority that was never used and will not be used under current projections of the capital program. The total of these funds falls within our allocation under the first budget resolution.

Mr. President, I will shortly submit for the Senate's consideration a series of amendments to the House D.C. Appropriations bill for fiscal year 1983. These amendments are contained in S. 2917 with three exceptions.
